MICROPAC INDUSTRIES, INC.

NOTES TO FINANCIAL STATEMENTS
(Unaudited)

Note 1 BASIS OF PRESENTATION

Business Description

Micropac Industries, Inc. (the “Company”), a Delaware corporation, manufactures and distributes various types of hybrid microelectronic circuits, solid state relays, power controllers, and optoelectronic components and assemblies. The Company’s products are used as components in a broad range of military, space and industrial systems, including aircraft instrumentation and navigation systems, power supplies, electronic controls, computers, medical devices, and high-temperature (200o C) products.

In the opinion of management, the unaudited financial statements include all adjustments (consisting of only normal, recurring adjustments) necessary to present fairly the financial position as of May 30, 2015, the results of operations for the three months and six months ended May 30, 2015 and May 31, 2014, and the cash flows for the six months ended May 30, 2015 and May 31, 2014. Unaudited financial statements are prepared on a basis substantially consistent with those audited for the year ended November 30, 2014. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States have been condensed or omitted pursuant to the rules and regulations promulgated by the Securities and Exchange Commission. However, management believes that the disclosures contained are adequate to make the information presented not misleading.

Note 2 SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of sales and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition

Sales are recorded as shipments are made based upon contract prices. Any losses anticipated on fixed price contracts are provided for currently. Sales are recorded net of sales returns, allowances and discounts.

The Company recognizes sales in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Subtopic 605-10-S99, Revenue Recognition (ASC 605-10-S99). ASC 605-10-S99 requires that four basic criteria must be met before sales can be recognized: (1) persuasive evidence of an arrangement exists; (2) shipment has occurred or services have been rendered; (3) the fee is fixed and determinable; and (4) collectibility is reasonably assured.

Deferred revenue represents prepayments from customers and will be recognized as sales when the products are shipped per the terms of the contract.

Short-Term Investments

The Company has \$2,002,000 in short term investments at May 30, 2015. Short-term investments consist of certificates of deposits with initial maturities greater than 90 days. These investments are reported at historical cost, which approximates fair value. All highly liquid investments with initial maturities of 90 days or less are classified as cash equivalents. All short-term investments are securities which the Company has the ability and intent to hold to maturity and mature within one year.

Inventories

Inventories are stated at lower of cost or market value and include material, labor and manufacturing overhead. All inventories are valued using the FIFO (first-in, first-out) method of inventory valuation. The Company determines the need to write inventory down below its cost via an analysis based on the usage of inventory over a three year period and projected usage based on current backlog.

Income Taxes

The Company accounts for income taxes using the asset and liability method. Under this method the Company records deferred income taxes for the temporary differences between the financial reporting basis and the tax basis of assets and liabilities at enacted tax rates expected to be in effect when such amounts are realized or settled. The resulting deferred tax liabilities and assets are adjusted to reflect changes in tax law or rates in the period that includes the enactment date.

Property, Plant, and Equipment

Property, plant, and equipment are carried at cost, and depreciation is provided using the straight-line method at rates based upon the following estimated useful lives (in years) of the assets:

Buildings	15
Facility improvements	8-15
Machinery and equipment	5-10
Furniture and fixtures	5-8

The Company assesses long-lived assets for impairment under ASC 360-10-35, Property, Plant and Equipment – Subsequent Measurement. When events or circumstances indicate that an asset may be impaired, an assessment is performed. The estimated future undiscounted cash flows associated with the asset are compared to the asset’s net book value to determine if a write down to market value less cost to sell is required.

Repairs and maintenance are expensed as incurred. Improvements which extend the useful life of property, plant, and equipment are capitalized.

Research and Development Costs

Costs for the design and development of new products and processes are expensed as incurred.

Note 3 NEW ACCOUNTING PRONOUNCEMENT

On May 28, 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods and services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for the Company on December 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. On July 9, 2015 the FASB agreed to defer the effective date to annual reporting periods beginning after December 15, 2017 and the interim periods within that year. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

Note 4 FAIR VALUE MEASUREMENT

The Company had no financial assets or liabilities measured at fair value on a recurring basis as of May 30, 2015 and November 30, 2014. The fair value of financial instruments such as cash and cash equivalents, short term investments, accounts receivable, and accounts payable approximate their carrying amount based on the short maturity of these instruments. There were no nonfinancial assets measured at fair value on a nonrecurring basis at May 30, 2015 and November 30, 2014.

Note 5 COMMITMENTS

On January 23, 2015, the Company renewed the Loan Agreement with a Texas banking institution. The Loan Agreement provides for revolving credit loans, in amounts not to exceed a total principal balance of \$6,000,000, and specific advance loans for acquisitions with an aggregate amount not to exceed \$7,500,000 in a single advance or in multiple advances. The Loan Agreement also contains financial covenants to maintain at all times including (i)

minimum working capital of not less than \$4,000,000, (ii) a ratio of senior funded debt, minus the Company's balance sheet cash on hand to the extent in excess of \$2,000,000, to EBITDA of not more than 3.0 to 1.0, and (iii) a ratio of free cash flow to debt service of not less than 1.2 to 1.0. The Company has not, to date, drawn any amounts under the loan agreement or the revolving line of credit and is currently in compliance with the financial covenants.

Note 6 EARNINGS PER COMMON SHARE

Basic and diluted earnings per share are computed based upon the weighted average number of shares outstanding during the respective periods. Diluted earnings per share gives effect to all dilutive potential common shares. For the three months and six months ended May 30, 2015 and May 31, 2014, the Company had no dilutive potential common stock.

Note 7 SHAREHOLDERS' EQUITY

On December 17, 2013, the Board of Directors of Micropac Industries, Inc. approved the payment of a special dividend of \$0.10 per share for shareholders of record as of January 15, 2014. The dividend was paid to the shareholders on February 12, 2014.

On December 16, 2014, the Board of Directors of Micropac Industries, Inc. approved the payment of a special dividend of \$0.10 per share for shareholders of record as of January 12, 2015. The dividend was paid to the shareholders on February 10, 2015.

MICROPAC INDUSTRIES, INC.

(Unaudited)

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Business

Micropac Industries, Inc. (the "Company"), a Delaware corporation, manufactures and distributes various types of hybrid microelectronic circuits, solid state relays, power controllers, and optoelectronic components and assemblies. The Company's products are used as components in a broad range of military, space and industrial systems, including aircraft instrumentation and navigation systems, power supplies, electronic controls, computers, medical devices, and high-temperature (200o C) products. The Company's products are either custom (being application specific circuits designed and manufactured to meet the particular requirements of a single customer) or standard, proprietary components such as catalog items.

The Company's facilities are certified and qualified by Defense Logistics Agency (DLA) to MIL-PRF-38534 (class K-space level), MIL-PRF-19500 JANS (space level), and MIL-PRF-28750 (class K-space level) and is certified to ISO 9001-2002. Micropac is a NASA core supplier, and is registered to AS9100-Aerospace Industry standard for supplier certification. The Company has UL approval on the new isolated solid state industrial power controllers.

The Company's core technology is the packaging and interconnecting of miniature electronic components, utilizing thick film substrates, forming microelectronics circuits. Other technologies include light emitting and light sensitive materials and products, including light emitting diodes and silicon phototransistors used in the Company's optoelectronic components and assemblies

Results of Operations

	Three months ended				Six months ended			
	5/30/2015	%	5/31/2014	%	5/30/2015	%	5/31/2014	%

Interest and other income	0.1	%	-		0.1	%	(0.1))%
INCOME BEFORE TAXES	12.7	%	7.7	%	10.0	%	10.7	%
Provision for taxes	4.0	%	2.7	%	3.3	%	3.8	%

NET INCOME 8.7 % 4.9 % 6.7 % 6.9 %

Sales for the three and six month periods ended May 30, 2015 totaled \$5,265,000 and \$10,050,000, respectively. Sales for the second quarter increased 2.0% or \$103,000 above sales for the same period of 2014, while sales for the first six months of 2015 increased \$29,000 above the first six months of 2014. Sales were 14% in the commercial market, 61% in the military market, and 25% in the space market for the six months ended May 30, 2015 compared to 24% in the commercial market, 63% in the military market, and 13% in the space market for the six months ended May 31, 2014.

One customer accounted for 18% of the Company's sales for the three months ended May 30, 2015 and two customers accounted for 16% each of the Company's sales for the six months ended May 30, 2015, while two customers accounted for 12% and 10% of the Company's sales for the three months ended May 31, 2014, and two customers accounted for 9% each of the Company's sales for the six months ended May 31, 2014.

Cost of goods sold for the second quarters of 2015 and 2014 totaled 60.2% and 62.7% of net sales, respectively, while cost of goods sold for the six months ended May 30, 2015 and May 31, 2014 totaled 59.8% and 59.7% of net sales, respectively. Cost of goods sold improved in the second quarter of 2015 compared to 2014 associated with changes in product mix and process automation and redesign of the standard solid state relay. In actual dollars, cost of goods sold decreased \$72,000 in the second quarter of 2015 compared to the same period of 2014. Year to date cost of goods sold increased \$34,000 for the first six months of 2015 as compared to the same periods in 2014.

Research and development expense decreased \$27,000 for the second quarter of 2015 versus 2014 and increased \$131,000 for the first six months of 2015 compared to the same period of 2014. The research and development expenditures were associated with continued development of several power management products, fiber optic transceivers and high voltage optocouplers. The Company will continue to invest in research and development of these products and other new opportunities.

Selling, general and administrative expense for the second quarter and first six months of 2015 totaled 19.3% and 20.5% respectively of net sales compared to 21.0% for the same periods in 2014. In actual dollars, selling, general and administrative expense decreased \$65,000 for the second quarter and decreased \$49,000 for the first six months of 2015 compared to the same periods in 2014. The decrease was associated with a decrease in consultant expenses.

Provisions for taxes decreased \$55,000 for the first six months of 2015 compared to the same period in 2014. The estimated effective tax rate was 33% for 2015 and 36% for 2014.

Net income increased \$205,000 for the second quarter of 2015 versus 2014 and decreased \$18,000 for the first six months of 2015 compared to the same period of 2014.

Liquidity and Capital Resources

Cash and cash equivalents totaled \$12,874,000 as of May 30, 2015 compared to \$9,994,000 on November 30, 2014, an increase of \$2,880,000. The increase in cash and cash equivalents is primarily attributable to \$3,229,000 cash provided from operations including advanced payments from customers of \$2,449,000 for the purchase of long lead time materials, offset by a payment of a cash dividend of \$258,000, and the investment of \$98,000 in equipment.

The Company expects to continue to generate adequate amounts of cash to meet its liquidity needs from the sale of products and services and the collection thereof for at least the next twelve months.

Outlook

New orders for year-to-date 2015 totaled \$8,154,000 compared to \$7,126,000 for 2014. The increase resulted from new orders on various custom products.

Backlog totaled \$19,279,000 on May 30, 2015 compared to \$9,639,000 as of May 31, 2014 and \$21,175,000 on November 30, 2014. The backlog represents a good mix of the company's products and technologies with 23% in the commercial market, 32% in the military market, and 45% in the space market compared to 13% in the commercial

market, 75% in the military market, and 12% in the space market on May 31, 2014.

The Company cannot assure that the results of operations for the interim period presented are indicative of total results for the entire year due to fluctuations in customer delivery schedules, or other factors over which the Company has no control.

Cautionary Statement

This Form 10-Q contains forward-looking statements that are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially. Investors are warned that forward-looking statements involve risks and unknown factors including, but not limited to, customer cancellation or rescheduling of orders, problems affecting delivery of vendor-supplied raw materials and components, unanticipated manufacturing problems and availability of direct labor resources.

The Company produces silicon phototransistors and light emitting diode die for use in certain military, standard and custom products. Fabrication efforts sometimes may not result in successful results, limiting the availability of these components. Competitors offer commercial level alternatives and our customers may purchase our competitors' products if the Company is not able to manufacture the products using these technologies to meet the customer demands. Approximately \$2,400,000 of the Company's backlog is dependent on these semiconductors.

The Company disclaims any responsibility to update the forward-looking statements contained herein, except as may be required by law.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

The Company's Chief Executive Officer and Chief Financial Officer (the Certifying Officers) are responsible for establishing and maintaining disclosure controls and procedures for the Company. The Certifying Officers have designed such disclosure controls and procedures to ensure that material information is made known to them, particularly during the period in which this report was prepared. The Certifying Officers have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Exchange Act Rules 13a-15(e) and 15d-15(e) (the Rules) under the Securities Exchange Act of 1934 (or Exchange Act)) and determined that as of May 30, 2015, the Company's disclosure controls and procedures are not effective due to the continuing material weaknesses described in Management's Annual Report on Internal Control Over Financial Reporting as reported in our Annual Report on Form 10-K at November 30, 2014.

(b) Changes in internal controls.

During the first and second quarter of 2015, our management was actively engaged in the implementation of remediation efforts to address the material weaknesses that were identified in our Annual Report on Form 10-K for Fiscal 2014. These remediation efforts were designed both to address the identified material weaknesses and to enhance our overall financial reporting control environment. The plan to remediate those material weaknesses was described in detail in our Annual Report on Form 10-K for Fiscal 2014 and our efforts to implement that plan are summarized below:

We are in the process of implementing personnel resource plans, as well as training, designed to ensure that we have sufficient personnel with knowledge, experience, and training in the application of GAAP commensurate with our financial reporting requirements. The Company is in the process of hiring an additional qualified staff accountant.

We are continuing to re-design and strengthen our tax accounting process using internal resources and external training.

We developed enhanced controls and user checklists to be used during monthly, quarterly, and year end close processes.

The Accounting Manager and CFO performed additional closing procedures in the first and second quarter of 2015. As a result, we believe that there are no material inaccuracies or omissions of material fact and, to the best of our

knowledge, believe that the condensed financial statements of the Company at and for the three months and six months ended May 30, 2015, fairly present in all material respects, the financial condition and results of operations in conformity with U.S. GAAP.

There have not been any other changes in internal control over financial reporting in the three months ended May 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM LEGAL PROCEEDINGS

1.

The Company is not involved in any material current or pending legal proceedings.

ITEM 1A RISK FACTORS

Information about risk factors for the three months and six months ended May 30, 2015 does not differ materially from that set forth in Part I, Item 1A, of our Annual Report on Form 10-K for the year ended November 30, 2014.
