ADAPTEC, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1. Basis of Presentation

In the opinion of management, the accompanying Unaudited Condensed Consolidated Interim Financial Statements ("financial statements") of Adaptec, Inc. and its wholly-owned subsidiaries (collectively the "Company") have been prepared on a consistent basis with the March 31, 2003 audited consolidated financial statements and include all adjustments, consisting of only normal recurring adjustments, necessary to provide a fair statement of the results for the interim periods presented. The financial statements have been prepared in accordance with the regulations of the SEC, and, therefore, omit certain information and footnote disclosure necessary to present the statements in accordance with generally accepted accounting principles. These Financial Statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended March 31, 2003, which was filed with the SEC on June 26, 2003. The first quarters of fiscal 2004 and fiscal 2003 ended June 27, 2003 and June 28, 2002, respectively. For presentation purposes, the accompanying Financial Statements have been shown as ending on the last day of the calendar month. Certain amounts reported in previous periods have been reclassified to conform to the current period presentation. The results of operations for the first quarter of fiscal 2004 are not necessarily indicative of the results to be expected for the entire fiscal year.

Edgar Filing: ADAPTEC INC - Form 10-Q

The glossary of acronyms and accounting rules and regulations referred to within this Quarterly Report on Form 10-Q are listed in alphabetical order in Note 18.

2. Recent Accounting Pronouncements

In May 2003, the FASB issued SFAS No. 150, which establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. The financial instruments affected include mandatorily redeemable stock, certain financial instruments that require or may require the issuer to buy back some of its shares in exchange for cash or other assets and certain obligations that can be settled with shares of stock. This statement is effective immediately for all financial instruments created or modified after May 31, 2003 and by the first interim period commencing after June 15, 2003 for existing financial instruments. The adoption of SFAS No. 150 does not currently effect the Company's financial position or results of operations.

In November 2002, a consensus was reached on EITF No. 00-21 which provides guidance on how to account for arrangements that involve the delivery or performance of multiple products, services and/or rights to use assets. The provisions of EITF No. 00-21 apply to revenue arrangements entered into in fiscal periods beginning after June 15, 2003. The adoption of EITF No. 00-21 did not have a material impact on the Company's financial position and results of operations.

3. Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with APB Opinion No. 25 as interpreted by FIN 44 and complies with the disclosure provisions of SFAS No. 148, an amendment of SFAS No. 123. The following table illustrates the effect on net income and earnings per share as if the Company had applied the fair value recognition provisions of SFAS No. 123 to employee and director

6

stock option plans, including shares issued under the Company's ESPP, collectively called "options" for all periods presented:

	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
	(in thousands, except per share amounts)	
Net income, as reported	\$ 40,802	\$ 2,554
Add: Deferred stock-based compensation expense included in reported net income, net of tax	1,124	1,279
Deduct: Total stock-based compensation expense determined under the fair value-based method, net of tax	(6,891)	(9,588)
	\$ 35,035	\$ (5,755)
Basic net income per share:		
As reported	\$ 0.38	\$ 0.02
Pro forma	\$ 0.32	\$ (0.05)
Diluted net income (loss) per share:		
As reported	\$ 0.33	\$ 0.02
Pro forma	\$ 0.29	\$ (0.05)

SFAS No. 123 requires the use of option pricing models that were not developed for use in valuing employee stock options. The Black-Scholes option pricing model, used by the Company, was developed for use in estimating the fair value of short-lived exchange traded options that have no vesting restrictions and are fully transferable. In addition, option pricing models require the input of highly subjective assumptions, including the option's expected life and the price volatility of the underlying stock. Because the Company's options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in the opinion of management, the existing models do not necessarily provide a reliable measure of the fair value of options.

Edgar Filing: ADAPTEC INC - Form 10-Q

The fair value of options granted in the first quarter of fiscal 2004 and 2003, as reported was estimated at the date of grant using the Black-Scholes valuation model with the following weighted average assumptions:

	Employees' Stock Option Plans	
	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
Expected life (in years)	3	4
Risk-free interest rate	1.7%	2.4%
Volatility	66%	76%
Dividend yield		

4. Business Acquisitions

During the first quarter of fiscal 2004, the Company purchased Eurologic Systems Group Limited ("Eurologic") and ICP vortex Computersysteme GmbH ("ICP vortex"). The acquisitions were

7

accounted for under the purchase method of accounting in accordance with SFAS No. 141. Accordingly, the estimated fair value of assets acquired and liabilities assumed in the acquisitions and the results of operations of the acquired entities were included in the Company's consolidated financial statements as of the respective effective date of the acquisitions through the end of the period. There were no significant differences between the accounting policies of the Company and Eurologic and ICP vortex.

Eurologic: On April 2, 2003, the Company completed the acquisition of Eurologic, a provider of external and networked storage solutions. The Company acquired Eurologic to further enhance its direct-attached and fibre-attached server storage capabilities by allowing it to provide end-to-end block- and file-based networked storage solutions. As consideration for the acquisition of all of the outstanding capital stock of Eurologic, the Company paid \$25.6 million in cash (subject to the holdback as described below) and assumed stock options to purchase 0.5 million shares of the Company's common stock, with a fair value of \$1.6 million. The Company also incurred \$1.1 million in transaction fees, including legal, valuation and accounting fees. The assumed stock options were valued using the Black-Scholes valuation model with the following assumptions: volatility rate ranging from 57%-81%; a risk-free interest rate ranging from 1.1%-2.5%; and an estimated life ranging from 0.08-4 years. Eurologic is being integrated into the Company's SSG segment.

Holdback: As part of the Eurologic purchase agreement, \$3.8 million of the cash payment was held back (the "Holdback") for unknown liabilities that may have existed as of the acquisition date. The Holdback, which was included as part of the purchase price, is included in "Other long-term liabilities" in the Unaudited Condensed Consolidated Balance Sheet as of June 30, 2003 and will be paid out to the former Eurologic stockholders 18 months after the acquisition closing date, except for funds necessary to provide for any unknown liabilities.

Earn-out Payments: The Company also committed to the stockholders of Eurologic contingent consideration, also referred to as earn-out payments, up to a maximum of \$10.0 million. The earn-out payments become payable when certain revenue levels are achieved subsequent to Eurologic's acquisition by the Company. The earn-out payments will be recorded as purchase price adjustments in the period in which the attainment of the milestones become probable and the contingent consideration becomes determinable.

The preliminary allocation of the purchase price to the tangible and identifiable intangible assets acquired and liabilities assumed is summarized below (in thousands). The preliminary allocation was

8

based on an independent appraisal and management's estimates of fair value. The allocation of the purchase price may be subject to change based on the final appraisal and estimate of fair value.

Cash	\$	3,335
------	----	-------

Edgar Filing: ADAPTEC INC - Form 10-Q

Accounts receivable	10,424
Inventory	4,066
Other current assets	1,793
Property and equipment	2,861
Total assets acquired	22,479
Accounts payable	(7,292)
Current liabilities	(7,908)
Total liabilities assumed	(15,200)
Net tangible assets acquired	\$ 7,279

The allocation of the purchase price to the tangible and intangible assets acquired and liabilities assumed is as follows (in thousands):

Net tangible assets acquired	\$ 7,279
Acquired in-process technology	3,649
Goodwill	9,414
Other intangible assets:	
Core technology	5,046
Covenants-not-to-compete	148
Customer relationships	880
Trade name	1,476
Current backlog	395
	7,945
Net assets acquired	\$ 28,287

The other intangible assets are being amortized over periods which reflect the pattern in which economic benefits of the assets are expected to be realized. The core technology and customer relationships are being amortized over an estimated useful life of four years, the trade name and covenants-not-to-compete are being amortized over two years and the current backlog was fully amortized in the first quarter of fiscal 2004. The estimated weighted average useful life of other intangible assets, created as a result of the acquisition of Eurologic, is approximately three years. No residual value is estimated for the other intangible assets. In accordance with SFAS No. 142, the Company will not amortize the goodwill, but will evaluate it at least annually for impairment. Goodwill is not expected to be deductible for tax purposes.

In-process Technology: The amount allocated to acquired in-process technology was determined through established valuation techniques in the high-technology computer industry. Approximately \$3.6 million was written off in the first quarter of fiscal 2004 because technological feasibility had not been established and no alternative future uses existed. The Company acquired various external and networked storage products that enable organizations to install, manage and scale multiterabyte storage

solutions. The identified projects focus on increased performance while reducing the storage controller form factor. The value was determined by estimating the net cash flows from the products once commercially viable and discounting the estimated net cash flows to their present value.

Net Cash Flows. The net cash flows from the identified projects were based on estimates of revenues, cost of revenues, research and development expenses, including costs to complete the projects, selling, marketing and administrative expenses, royalty expenses and income taxes from the projects. The Company believes the assumptions used in the valuation as described below were reasonable at the time of the acquisition.

Net Revenues. The estimated net revenues were based on management's projections of the projects. The business projections were compared with and found to be in line with industry analysts' forecasts of growth in substantially all of the relevant markets. Estimated total net

Edgar Filing: ADAPTEC INC - Form 10-Q

revenues from the projects were expected to grow through fiscal 2008, and decline thereafter as other new products are expected to become available. These projections were based on estimates of market size and growth, expected trends in technology, and the nature and expected timing of new product introductions by the Company and those of its competitors.

Gross Margins. Projected gross margins were based on Eurologic's historical margins, which were in line with industry averages.

Operating Expenses. Estimated operating expenses used in the valuation analysis of Eurologic included research and development expenses and selling, marketing and administrative expenses. In developing future expense estimates and evaluation of Eurologic's overall business model, an assessment of specific product results including both historical and expected direct expense levels and general industry metrics was conducted.

Research and Development Expenses. Estimated research and development expenses include costs to bring the projects to technological feasibility and costs associated with activities undertaken to correct errors or keep products updated with current information (also referred to as "maintenance" research and development) after a product is available for general release to customers. These activities include routine changes and additions. The estimated maintenance research and development expense was 5.0% of net revenues for the in-process technologies throughout the estimation period.

Selling, Marketing and Administrative Expenses. Estimated selling, marketing and administrative expenses were consistent with the general industry cost structure in the first year net revenues were generated and increased in later years.

Effective Tax Rate. The effective tax rate utilized in the analysis of the in-process technologies reflects a combined historical industry average for the United States Federal and state statutory income tax rates.

Royalty Rate. The Company applied a royalty charge of approximately 2% of the estimated net revenues for each in-process project to attribute value for dependency on existing technology.

Discount Rate. The cost of capital reflects the estimated time to complete the projects and the level of risk involved. The discount rate used in computing the present value of net cash flows was approximately 27% for each of the projects.

10

Percentage of Completion. The percentage of completion was determined using costs incurred by Eurologic prior to the acquisition date compared to the estimated remaining research and development to be completed to bring the projects to technological feasibility. The Company estimated, as of the acquisition date, the projects were approximately 60% complete. The Company expects the remaining costs to bring the planned in-process projects to completion to be approximately \$2 million. Development of these projects remains a significant risk to the Company due to the remaining effort to achieve technological feasibility and rapidly changing customer markets. Failure to bring these products to market in a timely manner, in a competitive market, could adversely impact the Company's future sales, results of operations and growth. Additionally, the value of the intangible assets acquired may become impaired.

The Company is in the process of finalizing its plans to integrate the Eurologic operations. Such activities may include the transfer of certain manufacturing operations to Singapore, exiting certain duplicative facilities and the involuntary termination or relocation of certain employees. The Company's plans in this regard will be finalized in the third quarter of 2004. The acquisition-related restructuring liabilities will be accounted for under EITF No. 95-3 and therefore included in the purchase price allocation of the cost to acquire Eurologic. The Company has accrued a preliminary estimate of \$3.1 million for these activities. Any changes to the estimate will result in an increase or decrease to the accrued restructuring charges and a corresponding increase or decrease to goodwill. The Company utilized accrued severance charges of \$0.3 million during the first quarter of fiscal 2004.

Pro forma financials have not been presented for the first quarter of fiscal 2004 as the results of Eurologic have been included in our financial statements from April 2, 2003. Pro forma financial results for the first quarter of fiscal 2003, as if the Company had acquired Eurologic at the beginning of the period, after applying certain adjustments, including amortization of acquired other intangible assets, would have been as follows:

**Three-Month Period
Ended**

June 30, 2002

Edgar Filing: ADAPTEC INC - Form 10-Q

	Three-Month Period Ended
	(in thousands, except per share amounts)
Net revenues	\$ 120,602
Net income (loss)	(2,594)
Net income (loss) per share:	
Basic	\$ (0.02)
Diluted	\$ (0.02)

ICP Vortex: On June 5, 2003, the Company completed the acquisition of ICP vortex. ICP vortex was an indirect wholly-owned subsidiary of Intel Corporation and provided a broad range of hardware and software RAID data protection solutions, including SCSI, Serial ATA and Fibre Channel products. The Company paid \$14.3 million in cash to acquire ICP vortex. The Company also incurred \$0.3 million in transaction fees, including legal, valuation and accounting fees. ICP vortex is being integrated into the Company's SSG segment.

The preliminary allocation of the purchase price to the tangible and identifiable intangible assets acquired and liabilities assumed is summarized below (in thousands). The preliminary allocation was

11

based on an independent appraisal and management's estimate of fair value. The allocation of the purchase price may be subject to change based on the final appraisal and estimate of fair value.

Cash	\$ 2,775
Accounts receivable	2,539
Inventory	2,113
Other current assets	2,167
Property and equipment	1,458
	<hr/>
Total assets acquired	11,052
Accounts payable	(362)
Current liabilities	(1,074)
Long-term liabilities	(393)
	<hr/>
Total liabilities assumed	(1,829)
	<hr/>
Net tangible assets acquired	\$ 9,223
	<hr/>

The allocation of the purchase price, to the tangible and intangible assets acquired and liabilities assumed is as follows (in thousands):

Net tangible assets acquired	\$ 9,223
Goodwill	410
Other intangible assets:	
Core technology	3,630
Customer relationships	410
Trade name	830
Royalties	60
	<hr/>
	4,930
	<hr/>
Net assets acquired	\$ 14,563

The other intangible assets are being amortized over periods which reflect the pattern in which economic benefits of the assets are expected to be realized. The core technology and trade name are being amortized over an estimated useful life of three years, the customer relationships are being amortized over four years and the royalties are being amortized through the end of the third quarter of 2004. The estimated weighted average useful life of other intangible assets, created as a result of the acquisition of ICP vortex, is approximately three years. No residual value is estimated for the other intangible assets. In accordance with SFAS No. 142, the Company will not amortize the goodwill, but will evaluate it at least annually for impairment. Goodwill is not expected to be deductible for tax purposes.

Pro forma results of operations have not been presented because the effects of the acquisition were not material to the Company on an individual basis.

Platys: In connection with our acquisition of Platys Communications, Inc. ("Platys") in the second quarter of fiscal 2002, approximately \$53.4 million of the purchase price was allocated to acquired in-process technology and written off in fiscal 2002 because technological feasibility had not been established and no alternative future uses existed. The Company acquired certain ASIC-based

iSCSI technology for IP storage solutions. The value was determined by estimating the expected cash flows from the products once commercially viable, discounting the net cash flows to their present value, and then applying a percentage of completion to the calculated value.

The Company completed certain in-process projects and began shipping product in the fourth quarter of fiscal 2003 with additional in-process products expected to be completed by the end of fiscal 2004. The Company believes market acceptance of iSCSI technology will accelerate when leading storage OEMs complete development of their external storage arrays incorporating iSCSI technology. The Company expects the remaining costs to bring the planned in-process projects to completion to be approximately \$7 million. Development of these projects remains a significant risk to the Company due to the remaining effort to achieve technological feasibility, rapidly changing customer markets. Failure to bring these products to market in a timely manner, in a competitive market, could adversely impact the Company's future sales, profitability and growth. Additionally, the value of the intangible assets acquired may become impaired.

Covenants-not-to-compete	4,818	(2,872)	4,670	(2,464)
Customer relationships	1,290	(66)		
Trade name	2,306	(202)		
Backlog and royalties	455	(404)		
Subtotal	71,199	(44,811)	58,324	(39,978)
Intellectual property assets	43,892	(16,625)	43,892	(14,843)
Total	\$ 115,091	\$ (61,436)	\$ 102,216	\$ (54,821)

In the first quarter of fiscal 2004, the Company acquired other intangible assets in association with the Eurologic and ICP vortex acquisitions (Note 3). Amortization expense of other intangible assets was \$6.6 million and \$4.0 million for the first quarter of fiscal 2004 and 2003, respectively.

14

Edgar Filing: ADAPTEC INC - Form 10-Q

The annual amortization expense of the other intangible assets that existed as of June 30, 2003, is expected to be as follows:

	Estimated Amortization Expense	
	Acquisition-related intangible assets	Intellectual property assets
	(in thousands)	
Fiscal Years:		
2004 (remaining nine months)	\$ 11,593	\$ 5,345
2005	8,290	7,005
2006	4,637	6,670
2007	1,854	6,316
2008	14	1,931
Total	\$ 26,388	\$ 27,267

7. Line of Credit

In May 2001, the Company obtained an unsecured \$20.0 million revolving line of credit. The line of credit has a term, as amended, through August 2003 and bears interest at a "Prime Rate" in effect or at a "Fixed Term Rate" as elected by the Company. Prime Rate refers to the rate of interest as established by the line of credit provider while the Fixed Term Rate is determined in relation to the London Interbank Offered Rate. In addition, the Company is charged a fee equal to 0.15% per annum on the average daily unused amount of the line of credit. Under the terms of the line of credit, the Company is required to maintain certain financial ratios, among other restrictive covenants. As of June 30, 2003, the Company was in compliance with all such covenants. No borrowings were outstanding under the line of credit during the first quarter of fiscal 2004. The Company did not renew the line of credit upon its expiration in August 2003.

8. 4³/₄% Convertible Subordinated Notes

In the first quarter of fiscal 2004, the Company redeemed the outstanding \$82.4 million balance of its 4³/₄% Convertible Subordinated Notes for an aggregate price of \$83.0 million resulting in a loss on extinguishment of debt of \$0.8 million (including unamortized debt issuance costs of \$0.2 million). In the first quarter of fiscal 2003, the Company repurchased 4³/₄% Convertible Subordinated Notes with a book value of \$47.4 million for an aggregate price of \$45.9 million, resulting in a gain on extinguishment of debt of \$1.1 million (net of unamortized debt issuance costs of \$0.4 million). The gain (loss) on extinguishment of debt has been included in "Interest and other income" in the Company's Unaudited Condensed Consolidated Statement of Operations (Note 10).

9. Guarantees

Intellectual property indemnification obligations

The Company has entered into agreements with customers and suppliers that include limited intellectual property indemnification obligations that are customary in the industry. These guarantees generally require the Company to compensate the other party for certain damages and costs incurred as a result of third party intellectual property claims arising from these transactions. The nature of the intellectual property indemnification obligations prevents the Company from making a reasonable

estimate of the maximum potential amount it could be required to pay to its customers and suppliers. Historically, the Company has not made any significant indemnification payments under such agreements and no amount has been accrued in the accompanying consolidated financial statements with respect to these indemnification guarantees.

Product Warranty

The Company provides an accrual for estimated future warranty costs based upon the historical relationship of warranty costs to sales. The estimated future warranty obligations related to product sales are recorded in the period in which the related revenue is recognized. The estimated future warranty obligations are affected by product failure rates, material usage and replacement costs incurred in correcting a product

Edgar Filing: ADAPTEC INC - Form 10-Q

failure. If actual product failure rates, material usage or replacement costs differ from the Company's estimates, revisions to the estimated warranty obligations would be required; however the Company made no adjustments to pre-existing warranty accruals in the first quarter of fiscal 2004. A reconciliation of the changes to the Company's warranty accrual for the first quarter of fiscal 2004 and 2003 was as follows:

	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
	(in thousands)	
Balance at beginning of period	\$ 1,343	\$ 1,516
Warranties assumed	120	
Warranties provided	890	1,073
Actual costs incurred	(924)	(964)
	\$ 1,429	\$ 1,625

10. Interest and Other Income

The components of interest and other income for the first quarter of fiscal 2004 and 2003, were as follows:

	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
	(in thousands)	
Interest income	\$ 6,574	\$ 8,092
Gain on settlement with former president of DPT	49,256	
Gain (loss) on extinguishment of debt	(790)	1,100
Foreign currency transaction gains (losses)	695	(357)
Gain on investments	324	
	\$ 56,059	\$ 8,835
Total	\$ 56,059	\$ 8,835

11. Restructuring Charges

During the first quarter of fiscal 2004, the Company recorded \$0.4 million in restructuring charges, consisting of a net adjustment of \$0.1 million to the second quarter of fiscal 2003 restructuring provision and an adjustment of \$0.3 million to the first quarter of fiscal 2002 restructuring provision.

The adjustment to the second quarter of fiscal 2003 restructuring provision includes an additional accrual for lease costs offset by a reduction to severance and benefits, as actual costs were lower than originally anticipated. The adjustment to the first quarter of fiscal 2002 restructuring provision consists of additional lease costs. The additional lease costs pertain to a sublease arrangement entered in the first quarter of fiscal 2004 with a third party where the sublease payments through the end of the lease term are insufficient to cover the Company's obligations on the facility by approximately \$0.4 million.

The Company also implemented restructuring plans in fiscal 2003, 2002, and 2001. For a complete discussion of all restructuring actions implemented in fiscal 2003, 2002 and 2001, please refer to the notes included in the Company's Annual Report on Form 10-K for the year ended March 31, 2003.

The activity in the accrued restructuring reserves related to all of the plans was as follows for the first quarter of fiscal 2004:

	Severance And Benefits	Other Charges	Total
	(in thousands)		
Fourth Quarter of Fiscal 2003 Restructuring Plan:			
Reserve balance at March 31, 2003	\$ 3,026	\$	\$ 3,026
Cash paid	(2,597)		(2,597)
Reserve balance at June 30, 2003	\$ 429	\$	\$ 429
Second Quarter of Fiscal 2003 Restructuring Plan:			
Reserve balance at March 31, 2003	\$ 187	\$ 252	\$ 439
Provision adjustment	(50)	99	49
Cash paid	(94)	(109)	(203)
Reserve balance at June 30, 2003	\$ 43	\$ 242	\$ 285
Fourth Quarter of Fiscal 2002 Restructuring Plan:			
Reserve balance at March 31, 2003	\$ 38	\$ 727	\$ 765
Cash paid		(25)	(25)
Reserve balance at June 30, 2003	\$ 38	\$ 702	\$ 740
First Quarter of Fiscal 2002 Restructuring Plan:			
Reserve balance at March 31, 2003	\$	\$ 164	\$ 164
Provision adjustment		299	299
Cash paid		(67)	(67)
Reserve balance at June 30, 2003	\$	\$ 396	\$ 396
Fiscal 2001 Restructuring Plan:			
Reserve balance at March 31, 2003	\$	\$ 862	\$ 862
Cash paid		(71)	(71)
Reserve balance at June 30, 2003	\$	\$ 791	\$ 791
Total of All Restructuring Plans:			
Reserve balance at March 31, 2003	\$ 3,251	\$ 2005	\$ 5,256
Provision adjustment	(50)	398	348

Edgar Filing: ADAPTEC INC - Form 10-Q

	<u>Severance And Benefits</u>	<u>Other Charges</u>	<u>Total</u>
Cash paid	(2,691)	(272)	(2,963)
Reserve balance at June 30, 2003	\$ 510	\$ 2,131	\$ 2,641

The Company anticipates that the remaining restructuring reserve balance of \$2.6 million will be substantially paid out by the first quarter of fiscal 2009. The longer term payments relate to lease obligations and are reflected in "Other long-term liabilities" in the Unaudited Condensed Consolidated Balance Sheet, with the remaining restructuring reserve balance included in "Accrued liabilities".

18

12. Commitments and Contingencies

In December 1999, the Company purchased Distributed Processing Technology Corporation ("DPT"). As part of the purchase agreement, \$18.5 million of the purchase price was held back ("Holdback Amount"), from former DPT stockholders, for unknown liabilities that may have existed as of the acquisition date. For accounting purposes, the Holdback Amount was included as part of the acquisition purchase price. The holdback amount was included in "Accrued liabilities" in the Consolidated Balance Sheets at March 31, 2003. Subsequent to the date of purchase, the Company determined that certain representations and warranties made by the DPT stockholders were incomplete or inaccurate, which caused the Company to lose revenues and incur additional expenses. In addition, certain DPT products were found to be defective. In December 2000, the Company filed a claim against the DPT stockholders for the Holdback Amount of \$18.5 million. In January 2001, the DPT stockholders notified the Company as to their objection of its claim. Under the terms of the purchase agreement, the Company's claim was submitted to arbitration. Thereafter, the Company also initiated arbitration proceedings against Steven Goldman, the principal shareholder and former president of DPT alleging causes of action for, amongst others, fraud, fraudulent inducement, and negligent misrepresentation. The arbitration hearing was conducted during December 2002. In April 2003, the arbitrator issued a partial decision in the Company's favor for \$50.0 million, including the remaining balance of the Holdback Amount, related to the Company's claim of negligent misrepresentation. In May 2003, the Company entered into a written settlement and a mutual general release agreement with Steven Goldman, on his own and on behalf of all the selling shareholders of DPT, pursuant to which it was agreed that the Company would retain the Holdback Amount and additionally, Steven Goldman would pay the Company \$31.0 million. The Company received the \$31.0 million cash payment in May 2003 and recorded a gain of approximately \$49.3 million in the first quarter of fiscal 2004. The cash received from the DPT settlement of \$31.0 million was included in cash provided from operating activities in the Unaudited Condensed Consolidated Statements of Cash Flows.

On December 15, 2000, the Company received a statutory notice of deficiency from the IRS with respect to its Federal income tax return for fiscal 1997. The Company filed a Petition with the United States Tax Court on March 14, 2001, contesting the asserted deficiencies. Settlement agreements have been filed with the United States Tax Court on all but one issue. The Company believes that the final outcome of all issues will not have a material adverse impact on its financial position or results of operations, as it believes that it has meritorious defense against the asserted deficiencies and any proposed adjustments and has made sufficient tax provisions. However, the Company cannot predict with certainty how these matters will be resolved and whether it will be required to make additional payments.

In addition, the IRS is currently auditing the Company's Federal income tax returns for fiscal 1998 through fiscal 2001. The Company believes that it has provided sufficient tax provisions for these years and the ultimate outcome of the IRS audits will not have a material adverse impact on its financial position or results of operations. However, the Company cannot predict with certainty how these matters will be resolved and whether it will be required to make additional tax payments.

The Company is a party to other litigation matters and claims which are normal in the course of its operations, and while the results of such litigation matters and claims cannot be predicted with certainty, the Company believes that the final outcome of such matters will not have a material adverse impact on its financial position or results of operations.

19

13. Income Taxes

Edgar Filing: ADAPTEC INC - Form 10-Q

Income tax provisions for interim periods are based on the Company's estimated annual income tax rate. In the first quarter of fiscal 2004, the Company recorded an income tax provision of \$2.8 million on a pretax income of \$43.6 million. The tax rate for the first quarter of 2004 differed from the combined United States Federal and state statutory income tax rate of 40%, due to the tax treatment allowed for certain transactions that differ from financial statement reporting. For tax purposes, the gain on settlement with the former president of DPT of \$49.3 million is treated as an adjustment to the tax basis of the DPT common stock acquired and does not result in taxable income. The tax rate benefit derived from the differing treatment of the DPT settlement was partially offset by the amortization of acquisition-related intangible assets, excluding goodwill, that are not fully deductible for tax purposes.

14. Net Income Per Share

Basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per share gives effect to all potentially dilutive common shares outstanding during the period. In computing diluted net income per share, the average stock price for the period is used in determining the number of shares assumed to be purchased upon the exercise of stock options.

A reconciliation of the numerator and denominator of the basic and diluted net income per share computations are as follows:

	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
	(in thousands, except per share amounts)	
Numerators:		
Net income	\$ 40,802	\$ 2,554
Adjustment for interest expense on 3% and 4 ³ / ₄ % Convertible Subordinated Notes, net of taxes	1,862	
Adjusted net income	<u>\$ 42,664</u>	<u>\$ 2,554</u>
Denominators:		
Weighted average shares outstanding basic	107,956	105,979
Effect of dilutive securities:		
Employee stock options	1,969	2,196
3% Convertible Subordinated Notes	16,327	
4 ³ / ₄ % Convertible Subordinated Notes	1,649	
Weighted average shares and potentially dilutive common shares outstanding diluted	<u>127,901</u>	<u>108,175</u>
Net income per share:		
Basic	\$ 0.38	\$ 0.02
Diluted	\$ 0.33	\$ 0.02

20

Certain instruments potentially convertible into common stock were excluded from the diluted computation for the first quarter of fiscal 2004 and 2003 because their exercise prices were greater than the average market price of the common shares and their inclusion would have been anti-dilutive. The items excluded for the first quarter of fiscal 2004 and 2003 were as follows:

Three-Month Period Ended

Edgar Filing: ADAPTEC INC - Form 10-Q

	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
	(in thousands)	
Outstanding employee stock options	15,114	12,631
Warrants	1,310	1,310
4 ³ / ₄ % Convertible Subordinated Notes		4,082
3% Convertible Subordinated Notes		16,327

15. Comprehensive Income

The Company's comprehensive income consisted of net income and the changes in net unrealized gains (losses) on marketable securities, net of taxes and foreign currency translation adjustments, net of taxes, as follows:

	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
	(in thousands)	
Net income	\$ 40,802	\$ 2,554
Net unrealized gains (losses) on marketable securities, net of taxes	(1,148)	656
Foreign currency translation adjustment, net of taxes	(49)	165
Comprehensive income	\$ 39,605	\$ 3,375

The components of accumulated other comprehensive income, net of income taxes, were as follows:

	June 30, 2003	March 31, 2003
	(in thousands)	
Unrealized gain on marketable securities, net of tax provision of \$1,831 at June 30, 2003 and \$2,596 at March 31, 2003	\$ 2,746	\$ 3,894
Foreign currency translation, net of tax benefit of \$102 at June 30, 2003 and \$69 at March 31, 2003	(153)	(104)
Total	\$ 2,593	\$ 3,790

16. Segment Reporting

SSG provides interface products that enable the movement, storage and protection of data across a range of server platforms, direct attached storage devices, SANs, NAS devices, and external storage systems. These products bring Host I/O technology, including SCSI and RAID solutions to storage applications. SSG is also investing in Serial ATA and Serial Attached SCSI technologies.

DSG provides high-performance I/O connectivity and digital media solutions for personal computing platforms, including notebook and desktop PCs sold to consumers and small and midsize businesses.

Edgar Filing: ADAPTEC INC - Form 10-Q

SNG provides storage connectivity solutions for servers, storage devices, fabric switches and NAS devices. SNG's products incorporate iSCSI, TOE functionality, fibre channel and multi-port ethernet technologies. SNG has recently announced the availability of its iSCSI HBAs through its distribution channel partners and continues to work with major OEM customers on testing and integration of iSCSI and TOE products.

Unallocated corporate expenses includes restructuring charges, interest and certain other income and interest expense.

Summarized financial information on the Company's reportable segments is shown in the following table. There were no inter-segment revenues for the periods shown below. The Company does not separately track assets or depreciation by operating segments nor are the segments evaluated under these criteria.

	SSG	DSG	SNG	Other	Total
	(in thousands)				
Three-Month Period Ended June 30, 2003:					
Net revenues	\$ 93,820	\$ 11,910	\$ 1,563	\$	\$ 107,293
Segment income (loss)	54,415	(1,763)	(12,462)	3,402	43,592
Three-Month Period Ended June 30, 2002:					
Net revenues	\$ 87,774	\$ 16,344	\$ 3,728	\$	\$ 107,846
Segment income (loss)	17,223	547	(16,875)	4,315	5,210

The following table presents the details of unallocated corporate income and expenses for the first quarter of fiscal 2004 and 2003:

	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
	(in thousands)	
Unallocated corporate expenses, net	\$ 145	\$ 654
Restructuring charges	(348)	
Interest and other income	6,803	8,835
Interest expense	(3,198)	(5,174)
Total	\$ 3,402	\$ 4,315

22

17. Supplemental Disclosure of Cash Flows

	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
	(in thousands)	
Non-cash investing and financial activities:		
Deferred stock-based compensation	1,582	
Adjustment for deferred stock-based compensation	556	1,560
Unrealized gain (loss) on available-for-sale securities	(1,148)	656

18. Glossary

The following is a list of acronyms that are contained within this Quarterly Report on Form 10-Q. They are listed in alphabetical order.

ASIC: Application Specific Integrated Circuit

APB: Accounting Principles Board

ATA: Advanced Technology Attachment

DSG: Desktop Solutions Group

EITF: Emerging Issues Task Force

ESPP: Employee Stock Purchase Plan

FASB: Financial Accounting Standards Board

FIN: FASB Interpretation Number

HBA: Host Bus Adapters

I/O: Input/Output

IP: Internet Protocol

IRS: Internal Revenue Service

iSCSI: Internet Protocol SCSI

NAS: Network Attached Storage

NIC: Network Interface Card

OEM: Original Equipment Manufacturer

PC: Personal Computer

RAID: Redundant Array of Independent Disks

SAN: Storage Area Networks

SCSI: Small Computer System Interface

SEC: Securities Exchange Commission

Serial ATA: Serial Advanced Technology Attachment

SFAS: Statement of Financial Accounting Standards

SNG: Storage Networking Group

SSG: Storage Solutions Group

TOE: TCP/IP Offload Engine

USB: Universal Serial Bus

VAR: Value Added Reseller

The following is a list of accounting rules and regulations referred to within this Quarterly Report on Form 10-Q. They are listed in alphabetical order.

APB Opinion No. 25 *Accounting for Stock Issued to Employees*

EITF No. 95-3 *Recognition of Liabilities in Connection with Purchase Business Combinations*

EITF No. 00-21 *Accounting for Revenue Arrangements with Multiple Deliverables*

FIN 44 *Accounting for Certain Transactions Involving Stock Compensation*

SFAS No. 123 *Accounting for Stock-Based Compensation*

SFAS No. 141 *Business Combinations*

SFAS No. 142 *Goodwill and Other Intangible Assets*

SFAS No. 148 *Accounting for Stock-Based Compensation Transition and Disclosure an amendment of SFAS No. 123*

SFAS No. 150 *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*

Edgar Filing: ADAPTEC INC - Form 10-Q

This Quarterly Report on Form 10-Q contains forward-looking statements that involve risks and uncertainties. The statements contained in this document that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including, without limitation, statements regarding our expectations, beliefs, intentions or strategies regarding our business. We may identify these statements by the use of words such as "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "might," "plan," "potential," "predict," "project," "should," "will," "would" and other similar expressions. All forward-looking statements included in this document are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements, except as may otherwise be required by law.

Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those set forth in the "Risk Factors" section and elsewhere in this document. In evaluating our business, current and prospective investors should consider carefully these factors in addition to the other information set forth in this document.

While management believes that the discussion and analysis in this report is adequate for a fair presentation of the information presented, we recommend that you read this discussion and analysis in conjunction with our Annual Report on Form 10-K for the year ended March 31, 2003.

For your convenience, we have included, in Note 18 to the Notes to the Unaudited Condensed Consolidated Financial Statements, a Glossary that contains (1) a brief description of a few key acronyms commonly used in our industry that are used in this Quarterly Report and (2) a list of accounting rules and regulations that are also referred to herein. These acronyms and accounting rules and regulations are listed in alphabetical order.

Acquisitions

During the first quarter of fiscal 2004, we purchased Eurologic Systems Group Limited, or Eurologic, and ICP vortex Computersysteme GmbH, or ICP vortex. The acquisitions were accounted for under the purchase method of accounting in accordance with SFAS No. 141. Accordingly, the estimated fair value of assets acquired and liabilities assumed in the acquisitions and the results of operations of the acquired entities were included in our consolidated financial statements as of the respective effective date of the acquisitions through the end of the period. There were no significant differences between the accounting policies of the Company and Eurologic and ICP vortex.

Eurologic: On April 2, 2003, we completed the acquisition of Eurologic, a provider of external and networked storage solutions. We acquired Eurologic to further enhance our direct-attached and fibre-attached server storage capabilities by allowing us to provide end-to-end block- and file-based networked storage solutions. As consideration for the acquisition of all of the outstanding capital stock of Eurologic, we paid \$25.6 million in cash, subject to the holdback, and assumed stock options to purchase 0.5 million shares of our common stock, with a fair value of \$1.6 million. We also incurred \$1.1 million in transaction fees, including legal, valuation and accounting fees. The assumed stock options were valued using the Black-Scholes valuation model with the following assumptions: volatility rate ranging from 57% - 81%; a risk-free interest rate ranging from 1.1% - 2.5%; and an estimated life ranging from 0.08 - 4 years. Eurologic is being integrated into our SSG segment.

As part of the Eurologic purchase agreement, \$3.8 million of the cash payment was held back, also referred to as the Holdback, for unknown liabilities that may have existed as of the acquisition date. The Holdback, which was included as part of the purchase price, is included in "Other long-term liabilities" in the Unaudited Condensed Consolidated Balance Sheet as of June 30, 2003 and will be

paid out to the former Eurologic stockholders 18 months after the acquisition closing date, except for funds necessary to provide for any unknown liabilities.

We also committed to the stockholders of Eurologic contingent consideration, also referred to as earn-out payments, up to a maximum of \$10.0 million. The earn-out payments become payable when certain revenue levels are achieved subsequent to Eurologic's acquisition by us. The earn-out payments will be recorded as purchase price adjustments in the period in which the attainment of the milestones become probable and the contingent consideration becomes determinable.

Approximately \$3.6 million of the purchase price was allocated to acquired in-process technology, which consisted of various external and networked storage products that enable organizations to install, manage and scale multiterabyte storage solutions, and was written off in the first quarter of fiscal 2004.

Edgar Filing: ADAPTEC INC - Form 10-Q

We are also in the process of finalizing our plans to integrate the Eurologic operations. Such activities may include the transfer of certain manufacturing operations to Singapore, exiting certain duplicative facilities and the involuntary termination or relocation of certain employees. Our plans in this regard will be finalized in the third quarter of 2004. The acquisition-related restructuring liabilities will be accounted for under EITF No. 95-3 and therefore included in the purchase price allocation of the cost to acquire Eurologic. We have accrued a preliminary estimate of \$3.1 million for these activities. Any changes to the estimate will result in an increase or decrease to the accrued restructuring charges and a corresponding increase or decrease to goodwill. We utilized accrued severance charges of \$0.3 million during the first quarter of fiscal 2004.

ICP Vortex: On June 5, 2003, we completed the acquisition of ICP vortex. ICP vortex was an indirect wholly-owned subsidiary of Intel Corporation and provided a broad range of hardware and software RAID data protection solutions, including SCSI, Serial ATA and Fibre Channel products. We paid \$14.3 million in cash to acquire ICP vortex. We also incurred \$0.3 million in transaction fees, including legal, valuation and accounting fees. ICP vortex is being integrated into the our SSG segment.

Platys: In connection with our acquisition of Platys in the second quarter of fiscal 2002, approximately \$53.4 million of the purchase price was allocated to acquired in-process technology and written off in fiscal 2002. We acquired certain ASIC-based iSCSI technology for IP storage solutions. We identified research projects of Platys in areas for which technological feasibility had not been established and no alternative future uses existed. We completed certain in-process projects and began shipping product in the fourth quarter of fiscal 2003 with additional in-process products expected to be completed by the end of fiscal 2004. We believe market acceptance of iSCSI technology will accelerate when leading storage OEMs complete development of their external storage arrays incorporating iSCSI technology. We expect the remaining costs to bring the planned in-process projects to completion to be approximately \$7 million. Development of these projects remains a significant risk to us due to the remaining effort to achieve technological feasibility and rapidly changing customer markets. Failure to bring these products to market in a timely manner, in a competitive environment, could adversely impact our future sales, profitability and growth. Additionally, the value of the intangible assets acquired may become impaired.

26

Results of Operations

The following table sets forth the items in the Unaudited Condensed Consolidated Statements of Operations as a percentage of net revenues:

	Three-Month Period Ended	
	June 30, 2003	June 30, 2002
Net revenues	100%	100%
Cost of revenues	57	44
	43	56
Operating expenses:		
Research and development	24	29
Selling, marketing and administrative	19	22
Amortization of acquisition-related intangible assets	5	3
Write-off of acquired in-process technology	3	
Restructuring charges	0	
	51	54
Income(loss) from operations	(8)	2
Interest and other income	52	8
Interest expense	(3)	(5)

Edgar Filing: ADAPTEC INC - Form 10-Q

Income from operations before provision for income taxes	41	5
Provision for income taxes	3	3
Net income	38%	2%

Business Segments. Our current reportable business segments are Storage Solutions Group, or SSG, Desktop Solutions Group, or DSG, and Storage Networking Group, or SNG. See "Item 1. Business" in Part I of our Annual Report on Form 10-K for the year ended March 31, 2003 and Note 16 to Notes to the Unaudited Condensed Consolidated Financial Statements included herein, for a detailed discussion of our reportable business segments.

Net Revenues. Net revenues for the first quarter of fiscal 2004 were \$107.3 million, a decrease of 1% from net revenues of \$107.8 million for the first quarter of fiscal 2003.

Net revenues for the first quarter of fiscal 2004 consisted of \$93.8 million from the SSG segment, an increase of 7% from the first quarter of fiscal 2003, \$11.9 million from the DSG segment, a decrease of 27% from the first quarter of fiscal 2003, and \$1.6 million from the SNG segment, a decrease of 58% from the first quarter of fiscal 2003.

Our distributor-owned inventories increased by approximately 6% in the first quarter of fiscal 2004 from the fourth quarter of fiscal 2003 and decreased by approximately 24% in the first quarter of fiscal 2004 as compared to the first quarter of fiscal 2003.

Net revenues from our SSG segment for the first quarter of fiscal 2004 increased from the corresponding period of fiscal 2003 due to our acquisition of Eurologic in April 2003 which resulted in increased sales of our external storage solutions and increased sales of our RAID products, due to sales of ServeRAID to International Business Machines, or IBM, which began in the second quarter of fiscal 2003. However, the increase in sales of these products was offset by a continued decline in sales volumes of our SCSI products. The decline in the volume of SCSI products sales was primarily attributable to a continued reduction in industry-wide demand for these products due to penetration of other lower cost solutions, such as ATA. As we continue to transition from our Ultra 160 family of

27

products, the major product family of our SSG segment, to our new family of Ultra 320 products, we expect to see additional declines in SCSI product sales due to lower market share.

We are continuing to see a shift in our product mix towards a greater portion of RAID products as compared to SCSI products. Additionally, we have recently begun commercial shipments of our RAID enabled products based on next generation Serial ATA technology and we expect to launch our Serial Attached SCSI products in early fiscal 2005. Our future revenues will, over time, be significantly influenced by the extent to which we are successful in gaining customer acceptance for, and ultimately selling, our Serial ATA, Serial Attached SCSI and external storage solutions products to our current and new customers.

Net revenues from the DSG segment for the first quarter of fiscal 2004 decreased from the first quarter of fiscal 2003 due to a decline in sales volumes of our SCSI-based desktop computer solutions and USB 2.0 host-bus adapters, offset partially by sales of digital media products launched in the second quarter of fiscal 2003. The decline in sales volume of SCSI-based desktop computer solutions was caused by a continued reduction in demand resulting from the penetration of other lower cost solutions and alternative technologies. We expect revenues from our SCSI-based desktop computer solutions to continue to decline.

Net revenues from the SNG segment for the first quarter of fiscal 2004 decreased from the first quarter of fiscal 2003 due to decline in the sales volume of our fibre channel products and NICs. A majority of the decrease was due to a decline in sales volumes of fibre channel products to OEMs and the balance was due to a decline in sales volumes of NICs. The decrease was only slightly offset by revenues from sales of iSCSI HBAs, introduced in the fourth quarter of fiscal 2003. We expect revenues from existing NIC products, which represented approximately 80% of our net revenues from our SNG segment in the first quarter of fiscal 2003, to continue to decline. Additionally, we expect sales of our fibre channel products to continue to decline. Our future SNG revenues will, over time, be significantly influenced by the extent to which we are successful in gaining customer acceptance for, and ultimately selling, our iSCSI products.

Gross Margin. As a percentage of net revenues, gross margin was 43% for the first quarter of fiscal 2004 compared to 56% for the first quarter of fiscal 2003. Gross margins declined in the first quarter of fiscal 2004 compared to the first quarter of fiscal 2003 reflecting the decline in sales of our SCSI products, which carry relatively high margins, and an increase in sales of our ServeRAID products to IBM and sales of external storage systems resulting from our acquisition of Eurologic. Our RAID products and external storage solutions generally carry lower margins than our SCSI products, and to the extent that revenues from these product lines continue to increase relative to revenues from our SCSI products, we would expect our gross margins to be adversely impacted.

Research and Development Expense. Research and development expense was \$25.9 million, or 24% of net revenues, for the first quarter of fiscal 2004 compared to \$31.2 million, or 29% of net revenues, for the first quarter of fiscal 2003. The decrease in research and development expense is partially due to a decrease in deferred compensation charges associated with our acquisition of Platys Communications, Inc., or Platys. Deferred compensation charges, which represents the vesting of restricted stock and assumed stock options and payment of unvested cash, decreased by \$1.6 million in the first quarter of fiscal 2004 compared to the first quarter of fiscal 2003. Excluding the deferred compensation charges, our research and development spending decreased 13% in the first quarter of fiscal 2004 over the corresponding period of fiscal 2003. The decrease in spending, net of deferred compensation charges, was due to savings obtained through reductions in infrastructure spending and reduced headcount resulting from the restructuring programs implemented in fiscal 2003 and savings obtained by transitioning certain research and development efforts to India. However, these savings were partially offset by additional development expenses as a result of our acquisition of Eurologic and

28

to a lesser degree, our acquisition of ICP vortex. We remain committed to significant levels of research and development in order to enhance technological investments in our solutions.

Selling, Marketing and Administrative Expense. Selling, marketing and administrative expense was \$20.4 million, or 19% of net revenues, for the first quarter of fiscal 2004 compared to \$24.1 million, or 22% of net revenues, for the first quarter of fiscal 2003. The decrease in selling, marketing and administrative expense is partially due to a decrease in deferred compensation charges associated with our acquisition of Platys. Deferred compensation charges decreased by \$0.9 million in the first quarter of fiscal 2004 compared to the first quarter of fiscal 2003. Excluding the deferred compensation charges, our selling, marketing and administrative spending decreased 12% in the first quarter of fiscal 2004 over the corresponding period of fiscal 2003. The decrease in spending, net of deferred compensation charges, was primarily attributable to reductions of our workforce, marketing programs and infrastructure spending as a result of the restructuring plans implemented in fiscal 2003. However, these savings were partially offset by the additional workforce brought on through our acquisitions of Eurologic and ICP vortex.

Amortization of Acquisition-Related Intangible Assets. Amortization of acquisition-related intangible assets included in operating expenses for the first quarter of fiscal 2004 was \$4.8 million compared to \$3.7 million in the first quarter of fiscal 2003. The increase was due to the amortization of purchased other intangible assets of \$1.1 million related to the acquisitions of Eurologic and ICP vortex in the first quarter of fiscal 2004.

Write-off of Acquired In-Process Technology. In connection with our acquisition of Eurologic, approximately \$3.6 million of the purchase price was allocated to acquired in-process technology and written off in the first quarter of fiscal 2004. We identified research projects of Eurologic in areas for which technological feasibility had not been established and no alternative future uses existed. We acquired various external and networked storage products that enable organizations to install, manage and scale multiterabyte storage solutions. The identified projects focus on increased performance while reducing the storage controller form factor. The value was determined by estimating the expected cash flows from the products once commercially viable and discounting the net cash flows to their present value.

Net Cash Flows. The net cash flows from the identified projects were based on estimates of revenues, cost of revenues, research and development expenses, including costs to complete the projects, selling, marketing and administrative expenses, royalty expenses and income taxes from the projects. We believe the assumptions used in the valuation as described below were reasonable at the time of the acquisition.

Net Revenues. The estimated net revenues were based on management's projections of the projects. The business projections were compared with and found to be in line with industry analysts' forecasts of growth in substantially all of the relevant markets. Estimated total net revenues from the projects were expected to grow through fiscal 2008, and decline thereafter as other new products are expected to become available. These projections were based on estimates of market size and growth, expected trends in technology, and the nature and expected timing of our new product introductions and those of our competitors.

Gross Margins. Projected gross margins were based on Eurologic's historical margins, which were in line with industry averages.

Operating Expenses. Estimated operating expenses used in the valuation analysis of Eurologic included research and development expenses and selling, marketing and administrative expenses. In developing future expense estimates and evaluation of Eurologic's overall business model, an

assessment of specific product results including both historical and expected direct expense levels and general industry metrics was conducted.

Research and Development Expenses. Estimated research and development expenses include costs to bring the projects to technological feasibility and costs associated with activities undertaken to correct errors or keep products updated with current information (also referred to as "maintenance" research and development) after a product is available for general release to customers. These activities include routine changes and additions. The estimated maintenance research and development expense was 5.0% of net revenues for the in-process technologies throughout the estimation period.

Selling, Marketing and Administrative Expenses. Estimated selling, marketing and administrative expenses were consistent with the general industry cost structure in the first year net revenues were generated and increased in later years.

Effective Tax Rate. The effective tax rate utilized in the analysis of the in-process technologies reflects a combined historical industry specific average for the United States Federal and state statutory income tax rates.

Royalty Rate. We applied a royalty charge of approximately 2% of the estimated net revenues for each in-process project to attribute value for dependency on existing technology.

Discount Rate. The cost of capital reflects the estimated time to complete the projects and the level of risk involved. The discount rate used in computing the present value of net cash flows was approximately 27% for each of the projects.

Percentage of Completion. The percentage of completion was determined using costs incurred by Eurologic prior to the acquisition date compared to the estimated remaining research and development to be completed to bring the projects to technological feasibility. We estimated, as of the acquisition date, the projects were approximately 60% complete. We expect the remaining costs to bring the planned in-process projects to completion to be approximately \$2 million. Development of these projects remains a significant risk to us due to the remaining effort to achieve technological feasibility and rapidly changing customer markets. Failure to bring these products to market in a timely manner, in a competitive environment, could adversely impact our future sales, results of operation and growth. Additionally, the value of the intangible assets acquired may become impaired.

Restructuring Charges. We recorded \$0.4 million in restructuring charges during the first quarter of fiscal 2004 consisting of a net adjustment of \$0.1 million to the second quarter of fiscal 2003 restructuring provision and an adjustment of \$0.3 million to the first quarter of fiscal 2002 restructuring provision.

The adjustment to the second quarter of fiscal 2003 restructuring provision includes an additional accrual for lease costs offset by a reduction to severance and benefits, as actual costs were lower than originally anticipated. The adjustment to the first quarter of fiscal 2002 restructuring provision consists of additional lease costs. The additional lease costs pertain to a sublease arrangement entered in the first quarter of fiscal 2004 with a third party where the sublease payments through the end of the lease term are insufficient to cover our obligations on the facility by approximately \$0.4 million.

Interest and Other Income. Interest and other income was \$56.1 million for the first quarter of fiscal 2004 compared to \$8.8 million for the first quarter of fiscal 2003. The increase in interest and other income was primarily related to the components of other income, partially offset by lower yields earned on our cash, cash equivalents and marketable securities. Other income for the first quarter of fiscal 2004 included a gain of \$49.3 million due to the settlement with the former president of Distributed Processing Technology Corporation, or DPT, gain distributions of \$0.3 million on

investments and a loss of \$0.8 million on redemption of our 4³/₄% Convertible Subordinated Notes, or 4³/₄% Notes.

Edgar Filing: ADAPTEC INC - Form 10-Q

In the first quarter of fiscal 2004, we redeemed 4³/₄% Notes with a book value of \$82.4 million for an aggregate price of \$83.0 million, resulting in a loss on redemption of \$0.8 million (including unamortized debt issuance costs of \$0.2 million). In the first quarter of fiscal 2003, we repurchased 4³/₄% Notes with a book value of \$47.4 million for an aggregate price of \$45.9 million, resulting in a gain of \$1.1 million (net of unamortized debt issuance costs of \$0.4 million).

Interest Expense. Interest expense was \$3.2 million for the first quarter of fiscal 2004 compared to \$5.2 million for the first quarter of fiscal 2003. The decrease in interest expense was due to a decline in interest expense due to the reduction in the outstanding balance of our 4³/₄% Notes and the General Holdback owed to the Platys shareholders.

Income Taxes. Our income tax provision was \$2.8 million for the first quarter of fiscal 2004 compared to \$2.7 million for the first quarter of fiscal 2003. Income tax provisions for interim periods are based on our estimated annual effective income tax. The tax rate for the first quarter of 2004 differed from the combined United States Federal and state statutory income tax rate of 40% due to the tax treatment allowed for certain transactions that differ from financial statement reporting. For tax purposes, the gain on settlement with the former president of DPT of \$49.3 million is treated as an adjustment to the tax basis in DPT common stock acquired and does not result in taxable income. The tax rate benefit derived from the differing treatment of the DPT settlement was partially offset by the amortization of acquisition-related intangible assets, excluding goodwill, that are not fully deductible for tax purposes.

Liquidity and Capital Resources

Operating Activities: During the quarter-ended June 30, 2003 net cash provided by operating activities was \$38.2 million. However, our cash, cash equivalents and marketable securities decreased \$78.7 million during the quarter ended June 30, 2003. The decrease was primarily due to \$29.9 million of cash used for the acquisitions of Eurologic and ICP vortex and \$83.0 million paid for the redemption of the remaining 4³/₄% Notes.

Cash provided by operating activities primarily resulted from our net income of \$40.8 million, adjusted for non-cash items including depreciation and amortization of intangible assets of \$12.7 million, deferred stock-based compensation of \$1.3 million, write-off of in-process technology of \$3.6 million in connection with our acquisition of Eurologic offset by the non-cash portion of the gain on settlement with the former president of DPT of \$18.3 million. Additionally changes to working capital assets and liabilities, excluding the impact of balances acquired from Eurologic and ICP vortex, reduced cash provided by operating activities by \$0.4 million as is more fully discussed below:

During the quarter ended June 30, 2003 accounts receivable decreased \$3.7 million and days sales outstanding increased to 49 at June 30, 2003 as compared to 45 at March 31, 2003. The increase in days outstanding reflects changes in the composition of our receivables balance due to our acquisition of Eurologic and also a higher proportion of sales occurring towards the end of the current quarter.

Inventories increased \$1.1 million during the quarter-ended June 30, 2003 and our inventory turns rate increased to 9.1 at June 30, 2003 from 8.9 at June 30, 2003. The increase in inventory turns is due to our continuing efforts to efficiently manage inventory to meet customer demand.

Prepaid expenses and other current assets decreased \$6.0 million during the quarter-ended June 30, 2003. The decrease was primarily associated with a \$4.8 million income tax refund received during the quarter.

Accrued liabilities, including other long-term liabilities, decreased \$8.6 million during the quarter-ended June 30, 2003. The decrease was primarily due to \$3.0 million of payments made in connection with the various restructuring plans we have implemented and \$1.9 million annual payment to IBM for patent license fees. Additionally, cash flow from operations were used to satisfy \$2.1 million of liabilities assumed from Eurologic.

Liquidity. As of June 30, 2003, we had \$663.6 million of cash, cash equivalents and marketable securities, of which \$466.4 million was held by our Singapore subsidiary. Although we do not have any current plans to repatriate cash from our Singapore subsidiary to our United States parent company, if we were to do so, additional income taxes at the combined United States Federal and state statutory rate of approximately 40% could be incurred from the repatriation.

Edgar Filing: ADAPTEC INC - Form 10-Q

The IRS is currently auditing our tax return for fiscal 1997 and final settlement agreements have been filed with the United States Tax Court on all but one issue. We believe the final outcome of all issues will not have a material adverse impact on our liquidity.

In May 2001 we obtained a revolving line of credit of \$20.0 million which expired on August 1, 2003. We believe our existing working capital, together with expected cash flows from operations and available sources of equity and equipment financing, will be sufficient to support our operations through fiscal 2004.

The following table summarizes our contractual obligations at June 30, 2003 and the effect these obligations are expected to have on our liquidity and cash flow in future periods.

Contractual obligations by Year (in thousands)	Remaining Nine Months of Fiscal 2004	Fiscal 2005	Fiscal 2006	Fiscal 2007	Fiscal 2008	Thereafter	Total
3% Convertible Subordinated Notes				250,000			250,000
IBM Patent License Fees		1,850					1,850
Software licenses	2,423						2,423
Operating leases	6,714	7,510	5,368	4,808	3,872	2,403	30,675
Total	\$ 9,137	\$ 9,360	\$ 5,368	\$ 254,808	\$ 3,872	\$ 2,403	\$ 284,948

We invest in technology companies through two venture capital funds, Pacven Walden Ventures V Funds and APV Technology Partners II, L.P. To date, the carrying value of such investments aggregates \$3.0 million. We have also committed to provide additional funding of up to \$0.9 million.

At June 30, 2004 and 2003, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Accordingly, we are not exposed to the type of financing, liquidity, market or credit risk that could arise if we had such relationships.

Recent Accounting Pronouncements

In May 2003, the FASB issued SFAS No. 150, which establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. The financial instruments affected include mandatorily redeemable stock, certain financial instruments that require or may require the issuer to buy back some of its shares in exchange for cash or other assets and certain obligations that can be settled with shares of stock. This statement is effective immediately for all financial instruments created or modified after May 31, 2003 and by the first interim period commencing after June 15, 2003 for existing financial instruments. The adoption of SFAS No. 150 does not currently effect our financial position or results of operations.

32

In November 2002, the EITF reached a consensus on Issue No. 00-21 which provides guidance on how to account for arrangements that involve the delivery or performance of multiple products, services and/or rights to use assets. The provisions of EITF No. 00-21 apply to revenue arrangements entered into in fiscal periods beginning after June 15, 2003. The adoption of EITF No. 00-21 did not have a material impact on our financial position and results of operations.

RISK FACTORS

Our business faces significant risks. The risks described below may not be the only risks we face. Additional risks that we do not yet know of or that we currently think are immaterial may also impair our business operations. If any of the events or circumstances described in the following risks actually occur, our business, financial condition or results of operations could suffer, and the trading price of our common stock could decline.

Our operating results have fluctuated in the past, and are likely to continue to fluctuate, and if our future results are below the expectations of investors or securities analysts, the market price of our common stock would likely decline significantly. Our quarterly

Edgar Filing: ADAPTEC INC - Form 10-Q

operating results have fluctuated in the past, and are likely to vary significantly in the future, based on a number of factors related to our industry and the markets for our products. Factors that are likely to cause our operating results to fluctuate include those discussed in the risk factors below. For example, in the first quarter of fiscal 2004, our operating results were materially affected by unusual charges, including the following:

Gain on settlement of the DPT arbitration

Write-off of acquired in-process technology from Eurologic

Amortization of acquisition-related intangible assets

Deferred compensation in connection with our Platys acquisition.

In the first quarter of fiscal 2003, our operating results were materially affected by unusual charges, including the following:

Deferred compensation in connection with our Platys acquisition and

Amortization of acquisition-related intangible assets

Our operating expenses are largely based on anticipated revenues, and a large portion of our expenses, including those related to rent and salaries, are fixed in the short term. As a result, lower than anticipated revenues for any reason could cause significant variations in our operating results from quarter to quarter.

Due to the factors summarized above, we believe that you should not rely on period-to-period comparisons of our financial results as an indication of our future performance. In the event that our revenues fall below the expectations of market analysts or investors, the market price of our common stock could decline substantially.

Our operating results may be adversely affected by the uncertain geopolitical environment and unfavorable economic and market conditions. Adverse economic conditions worldwide have contributed to the slowdown in the information technology industry and may continue to impact our business, resulting in:

Reduced demand for our products as a result of a decrease in capital spending by our customers;

Increased price competition for our products

Increased risk of excess and obsolete inventories

33

Excess facilities and manufacturing capacity and

Higher overhead costs as a percentage of revenues.

Political turmoil in many parts of the world, including terrorist and military actions, may continue to put pressure on global economic conditions. If the economic and market conditions in the United States and globally do not improve, or if they deteriorate further, we may continue to experience material adverse impacts on our business, operating results, and financial condition as a consequence of the above factors or otherwise. We do not expect the trend of lower capital spending among our customers to reverse itself in the near term.

Because our sales are made by means of standard purchase orders rather than long-term contracts, if demand for our customers' products declines or if our customers do not control their inventories effectively, they may cancel or reschedule shipments previously ordered from us or reduce their levels of purchases from us. The volume and timing of orders received during a quarter are difficult to forecast. Our customers generally order based on their forecasts and they frequently encounter uncertain and changing demand for their products. If demand falls below such forecasts or if our customers do not control their inventories effectively, they may cancel or reschedule shipments previously ordered from us. Our customers have from time to time in the past canceled or rescheduled shipments previously ordered from us, and we cannot assure you that they will not do so in the future. In addition, because our sales are made by means of standard purchase orders rather than long-term contracts, we cannot assure you that these customers will continue to purchase quantities of our products at current levels, or at all. Historically, backlog has not been a significant factor for us, and we have set our operating budget based on forecasts of future revenues. Because much of our operating budget is relatively fixed in the short-term, if revenues do not meet our expectations, then our financial results will be adversely affected.

Costs associated with acquisitions or strategic alliances may adversely affect our results of operations, which could be exacerbated if we are unable to integrate the acquired companies, products or technologies. In June 2003, we acquired ICP vortex, a provider of a broad range of hardware and software RAID data protection solutions. In April 2003, we acquired Eurologic, a provider of external and network storage solutions. In August 2001, we completed our acquisition of Platys, a developer of IP storage solutions. In addition, we enter into strategic alliances from time to time with other companies. For example, we entered into a technology licensing agreement with IBM in March 2002. As part of our overall strategy, we may continue to acquire or invest in complementary companies, products or technologies and enter into strategic alliances with other companies. In order to be successful in these activities, we must:

Conduct acquisitions that are timely, relative to existing business opportunities

Successfully prevail over competing bidders for target acquisitions at an acceptable price

Invest in companies and technologies that contribute to the growth of our business

Incorporate acquired operations into our business and maintain uniform standards, controls and procedures

Retain the key employees of the acquired operation and

Develop the capabilities necessary to exploit newly acquired technologies.

The benefits of acquisitions or strategic alliances may prove to be less than anticipated and may not outweigh the costs reported in our financial statements. Completing any potential future acquisitions or strategic alliances could cause significant diversions of management time and resources. If we acquire new businesses, products or technologies in the future, we may be required to assume contingent liabilities and amortize significant amounts of other intangible assets and, over time,

recognize significant charges for impairment of goodwill and/or other intangible assets. If we consummate any potential future acquisitions in which the consideration consists of stock or other securities, our existing stockholders' ownership may be significantly diluted. If we proceed with any potential future acquisitions in which the consideration is cash, we may be required to use a substantial portion of our available cash. We may not be successful in overcoming these risks or any other problems encountered in connection with these or other business combinations, investments or strategic alliances. These transactions may adversely affect our business, financial position and operating results.

If we do not meet our restructuring objectives or if the economic slowdown continues, we may have to implement additional plans in order to reduce our operating costs and may, as a result, incur additional material restructuring charges. As a result of the economic slowdown, in the second and fourth quarters of fiscal 2003 and the first and fourth quarters of fiscal 2002, we implemented restructuring plans to reduce our operating costs and recorded restructuring charges of \$14.3 million and \$10.0 million in fiscal years 2003 and 2002, respectively. The plans included primarily the reduction of our workforce and the consolidation of our manufacturing operations in Singapore. The goals of the plans were to support future growth opportunities, focus on investments that grow revenues and increase operating margins. If we do not meet our restructuring objectives or if the economic slowdown continues, we may have to implement additional restructuring plans to reduce our

operating costs, which could cause us to incur material restructuring charges. Further, these restructuring plans may not achieve the goals we had in implementing them due to such factors as significant costs or restrictions that may be imposed in some international locales on workforce reductions and a potential adverse affect on employee morale that could harm our efficiency and our ability to act quickly and effectively in the rapidly changing technology markets in which we sell our products.

Demand for our products would likely be negatively affected if demand in the server, network storage and desktop computer markets declines. Our business or operating results would be adversely affected by a decline in demand for our products. For example, for the first time in several years, the demand in the server market declined slightly in fiscal 2002 and fiscal 2003, which contributed to a decline in our net revenues. We cannot predict when and if server sales growth will increase. In addition, other technologies may replace the technologies used in our existing products and the acceptance of our products using new technologies in the market may not be widespread, which could adversely affect our revenues.

We expect that the products we are developing for the network storage marketplace will be an important component of our future growth, and these products may not be accepted by the market or reach the market in a timely fashion. In April 2003, we acquired Eurologic, a provider of external and networked storage solutions. In August 2001, we acquired Platys, a development stage company with insignificant revenues, to enhance our technologies for the network storage market. The marketplace for advanced storage products is highly competitive and our technology may never be broadly adopted. In addition, there are substantial risks that known and unknown challenges to successful deployment of our products, and of products incorporating our products, will cause delays in their reaching the market. If our network storage products, and our customers' products using our technology, do not achieve a broad level of market acceptance, or if we encounter substantial delays in entering the market, our growth will likely be impaired.

If we do not provide adequate support during our customers' design and development stage, or if we are unable to provide such support in a timely manner, we may lose revenues to our competition. Certain of our products are designed to meet our customers' specifications and, to the extent we are not able to meet these expectations in a timely manner or provide adequate support during our customers' design and development stage, our customers may choose to buy similar products from another company.

35

Our reliance on industry standards and technological changes in the marketplace may cause our net revenues to fluctuate or decline. The computer industry is characterized by various, evolving standards and protocols. We design our products to conform to certain industry standards and protocols such as the following:

Technologies:

ATA	PCI-X
Serial ATA	RAID
Fibre channel	SCSI
FireWire/1394	Serial Attached SCSI
iSCSI	Ultra DMA
PCI	USB

Operating Systems:

Linux	OS/2
Macintosh	UNIX
Netware	Windows

In particular, a majority of our revenues are currently derived from products based on the SCSI standards. If consumer acceptance of these standards declines, or if new standards emerge, and if we do not anticipate these changes and develop new products, these changes could adversely affect our business and financial results. For example, we believe that changes in consumers' perceptions of the relative merits of SCSI-based products and competing products incorporating lower-cost solutions, such as ATA, have adversely affected our sales since fiscal 1998 and are likely to affect our future sales.

If we lose the cooperation of other hardware and software producers whose products are integral to ours, our ability to sustain or grow our revenues could be adversely affected. We must design our products to operate effectively with a variety of hardware and software products supplied by other manufacturers, including the following:

Microprocessors

Peripherals and

Operating system software.

We depend on significant cooperation from these manufacturers to achieve our design objectives and develop products that operate successfully with their products. We believe that we generally have good relationships with leading system, peripherals, and microprocessor suppliers. These companies could, from time to time, elect to make it more difficult for us to design our products for successful operability with their products. For example, if one or more of these companies were to determine that as a result of competition or other factors our technology or products would not be broadly accepted by the markets we target, these companies may no longer work with us to plan for new products and new generations of our products, which would make it more difficult to introduce products on a timely basis or at all. Further, some of these companies might decide not to continue to offer products that are compatible with our technology and our markets could contract. If any of these events were to occur, our revenues could be adversely affected.

Our dependence on new products may cause our net revenues to fluctuate or decline. Our future success significantly depends upon our completing and introducing enhanced and new products at competitive prices and performance levels in a timely manner. The success of new product introductions depends on several factors, including the following:

Designing products to meet customer needs

Product costs

36

Timely completion and introduction of new product designs

Quality of new products

Differentiation of new products from those of our competitors and

Market acceptance of our products.

Our product life cycles in each of our segments may be as brief as 12 months. As a result, we believe that we will continue to incur significant expenditures for research and development in the future. We may fail to identify new product opportunities and may not develop and bring new products to market in a timely manner. In addition, products or technologies developed by others may render our products or technologies obsolete or noncompetitive, or our targeted customers may not select our products for design or integration into their products. The failure of any of our new product development efforts could have an adverse effect on our business and financial results. For example, sale of our SCSI-based products in our DSG segment have declined in recent periods due to the availability of lower-cost desktop solutions. In addition, our SNG segment is focused on developing 1-gigabit TOE Network Accelerator Cards, which is expected to offer faster performance and result in stronger return on investment for our customers.. While we focus on TOE technology, we expect our SNG revenues from our 10/100 NICs will continue to decline as OEMs transition their product lines to the 1-gigabit NIC products. To the extent that our TOE technology is not selected for design or integration by OEMs, our business and future financial results could be adversely affected.

We have also recently introduced RAID enabled products based on the next generation Serial ATA technology. We will not succeed in generating significant revenue from our new Serial ATA technology products if the market does not adapt to this new technology. If they do not, our revenue and operating results will, over time, be adversely affected.

If we are unable to compete effectively, our net revenues could be adversely affected. The markets for all of our products are intensely competitive and are characterized by the following:

Rapid technological advances

Frequent new product introductions

Evolving industry standards and

Price erosion.

Consequently, we must continue to enhance our products on a timely basis to keep pace with market demands. If we do not do so, or if our competition is more effective in developing products that meet the needs of our existing and potential customers, we may lose market share and not participate in the future growth of our target markets. For example, we face intense competition in the transition from products employing Ultra 160 technology to solutions employing Ultra 320 technology. We must also integrate the recently acquired Eurologic operations. Our future success will depend on the level of acceptance of Eurologic products by new and existing customers. Further, in our DSG segment, our USB 2.0 products have several competitors. We believe that our future success will depend significantly on our ability to participate in the ongoing development of the network storage market. While we are focusing on solutions employing iSCSI technology for this market, many other companies are also focusing on networked storage solutions based on identified technologies that include, but are not limited to, iSCSI. Even if iSCSI technology achieves broad market acceptance, our early technological advantage in this field may not afford us the advantages we had anticipated if such acceptance is delayed due to the continuing global slowdown in technology spending. If iSCSI technology, or our products employing this technology, are not accepted by the market, our growth would be impaired.

37

We cannot assure you that we will have sufficient resources to accomplish all of the following:

Meet growing product demand

Make timely introductions of new products

Compete successfully in the future against existing or potential competitors

Provide OEMs with design specifications in a timely manner and

Prevent price competition from eroding margins.

Product quality problems could lead to reduced revenues and gross margins. We produce highly complex products that incorporate leading-edge technology, including both hardware and software. Software often contains "bugs" which can unexpectedly interfere with expected operations. We cannot assure you that our pre-shipment testing programs will be adequate to detect all defects which might interfere with customer satisfaction, reduce sales opportunities, or affect our gross margins if the cost of remedying the problems exceeded reserves established for that purpose. An inability to cure a product defect could result in the failure of a product line, and withdrawal, at least temporarily from a product or market segment, damage to our reputation, inventory costs, product reengineering expenses, and a material impact on revenues and margins.

If there is a shortage of components used in our customers' products, our sales may decline, which could adversely affect our results of operations and financial position. If our customers are unable to purchase certain components which are embedded into their products, their demand for our products may decline. For example, beginning in the fourth quarter of fiscal 2000, we experienced the impact of other companies' chip supply shortages, which reduced the demand for our SSG products. This negatively affected our revenues in the first half of fiscal 2001. Similar shortages of components used in our customers' products could adversely affect our net revenues and financial results in future periods.

The manufacture and introduction of our products is highly complex. We confront challenges in the manufacturing process that require us to:

- Maintain a competitive manufacturing cost structure
- Implement the latest process technologies required to manufacture new products
- Exercise stringent quality control measures to ensure high yields
- Effectively manage the subcontractors engaged in the wafer fabrication, test and assembly of products and
- Update equipment and facilities as required for leading edge production capabilities.

We cannot assure you that problems with our manufacturing process may not occur in the future. If any such problems with our manufacturing process were to occur, we might not be able to meet the demands of our customers, which could harm our reputation, result in the loss of customers and adversely affect our net revenues and financial results in future periods.

We currently purchase all of the finished production silicon wafers used in our products from wafer suppliers, and if they fail to meet our manufacturing needs, it would delay our production and our product shipments to customers and negatively affect our operations. Independent foundries manufacture to our specifications all of the finished silicon wafers used for our products. We currently purchase finished production silicon wafers used in our products through our agreements with TSMC and UMC. The manufacture of semiconductor devices is sensitive to a wide variety of factors, including the following:

The availability of raw materials

38

The availability of manufacturing capacity

Transition to smaller geometries of semiconductor devices

The level of contaminants in the manufacturing environment

Impurities in the materials used and

The performance of personnel and equipment.

We cannot assure you that manufacturing problems may not occur in the future. A shortage of raw materials or production capacity could lead our wafer suppliers to allocate available capacity to other customers. Any prolonged inability to obtain wafers with competitive performance and cost attributes, adequate yields or timely deliveries would delay our production and our product shipments, and could have an adverse effect on our business and financial results. We expect that wafer suppliers will continually seek to convert their processes for manufacturing wafers to more advanced process technologies. Such conversions entail inherent technological risks that can affect yields and delivery times. If for any reason the wafer suppliers we use are unable or unwilling to satisfy our wafer needs, we will be required to identify and qualify additional suppliers. Additional wafer suppliers may be unavailable, may take significant amounts of time to qualify or may be unable to satisfy our requirements on a timely basis.

If our manufacturing demand for silicon wafers falls below our projections, we may not be able to fully utilize our prepayments to TSMC, which could adversely affect our results of operations and financial position. From time to time, we have entered into "take or pay"

contracts that have committed us to purchase specific wafer quantities over extended periods based on our projected needs. In addition, we have made advance payments to Taiwan Semiconductor Manufacturing Company, or TSMC, in order to secure guaranteed wafer capacity. If our demand for wafer units falls below our projections, we may not be able to fully utilize our advance payments. The unused portion of the advance payments may be impaired and written off as an asset impairment charge, which would adversely affect our financial results.

We depend on subcontractors, and if they fail to meet our manufacturing needs, it could delay shipments of our products and result in the loss of customers. We rely on subcontractors for the assembly and packaging of the integrated circuits included in our products. We have no long-term agreements with our assembly and packaging subcontractors. We have, from time to time, used board subcontractors to better balance production runs and capacity. We employ Surface Mount Technology Corporation to manufacture certain ServeRAID products, which we sell to IBM. In addition, we employ Celestica Inc. to manufacture components for Eurologic external storage products. We cannot assure you these subcontractors will continue to be able and willing to meet our requirements for these components or services. Any significant disruption in supplies from, or degradation in the quality of components or services supplied by, these subcontractors could delay shipments and result in the loss of customers or revenues, which could have an adverse effect on our financial results.

We depend on the efforts of our distributors, which if reduced, could result in a loss of sales of our products in favor of competitive offerings. We derived approximately 42% of our net revenues for the first quarter of fiscal 2004 from independent distributor and reseller channels. Our financial results could be adversely affected if our relationships with these distributors or resellers were to deteriorate or if the financial condition of these distributors or resellers were to decline. Given the current economic environment, the risk of distributors and resellers going out of business has increased significantly.

Our distributors generally offer a diverse array of products from several different manufacturers. Accordingly, we are at risk that these distributors may give higher priority to selling products from other suppliers. A reduction in sales efforts by our current distributors could adversely affect our

business and financial results. Our distributors build inventories in anticipation of future sales, and if such sales do not occur as rapidly as they anticipate, our distributors will decrease the size of their product orders. If we decrease our price protection or distributor-incentive programs, our distributors may also decrease their orders from us. In addition, we have from time to time taken actions to reduce levels of products at distributors and may do so in the future. These actions may affect our net revenues and negatively affect our financial results.

Our operations depend on key personnel, the loss of whom could affect the growth and success of our business. In order to be successful, we must retain and motivate our executives, the general managers of our business segments, our principal engineers and other key employees, including those in managerial, technical, marketing and information technology support positions. In particular, our product generation efforts depend on hiring and retaining qualified engineers. The expansion of high technology companies in Silicon Valley, where we predominately operate our business, has increased demand for experienced management, technical, marketing and support personnel and despite the economic slowdown, competition for their talents is intense. In addition, with the exception of a few employees with whom we entered into employment agreements in connection with acquisition transactions, we do not have employment contracts with our key employees, including any of our executive officers. The loss of any of these key employees could have a significant impact on our operations. We also must continue to motivate employees and keep them focused on our strategies and goals, which may be particularly difficult due to morale challenges posed by workforce reductions and general uncertainty.

Our international operations involve risks, and may be subject to political or other non-economic barriers to our being able to sell our products in certain countries, local economic conditions that reduce demand for our products among our target market, and potential disruption in the supply of necessary components. Many of our subcontractors are primarily located in Asia and we have sales offices and customers located throughout Europe, Japan and other countries. Our international operations and sales are subject to political and economic risks, including political instability, currency controls, changes in import/export regulations, tariffs and freight rates. In addition, because our primary wafer supplier, TSMC, is located in Taiwan, we may be subject to certain risks resulting from political instability in Taiwan, including conflicts between Taiwan and the People's Republic of China. These and other international risks could result in the creation of political or other non-economic barriers to our being able to sell our products in certain countries, create local economic conditions that reduce demand for our products among our target market or expose us to potential disruption in the supply of necessary components or otherwise adversely affect our ability to generate revenue and operate effectively.

The recent outbreak of SARS in the Asia-Pacific region and its continued spread could harm sales of our products. The recent outbreak of severe acute respiratory syndrome, or SARS, that began in China, Hong Kong, Singapore and Vietnam affected sales of our products in the first quarter of 2004 and may continue to have a negative impact on our business. Our business may continue to be impacted by a number of SARS-related factors, including, but not limited to, disruptions in the operations of our customers and their partners, reduced sales in certain end-markets, such as servers, and increased costs to conduct our business abroad. While the recent outbreak of SARS appears to be contained, a

recurrence of this illness could adversely affect our net revenues.

If the carrying value of our long-lived assets is not recoverable, an impairment loss must be recognized which would adversely affect our financial results. Certain events or changes in circumstances would require us to assess the recoverability of the carrying amount of our long-lived assets. In fiscal 2003, we recorded an impairment charge of \$1.5 million relating to the decline in value of minority investments. In fiscal 2002, we recorded impairment charges of \$77.6 million relating to technology acquired in a prior acquisition and the decline in value of minority investments. In addition, the FASB issued SFAS No. 142 in July 2001, whereby goodwill must be evaluated annually and

40

whenever events or circumstances occur which indicate that goodwill might be impaired. For acquisitions consummated prior to July 1, 2001, we adopted SFAS No. 142 on April 1, 2002. We will continue to evaluate the recoverability of the carrying amount of our long-lived assets, and we may incur substantial impairment charges which could adversely affect our financial results.

If actual results or events differ materially from those contemplated by us in making estimates and assumptions, our reported financial condition and results of operations for future periods could be materially affected. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. Note 1 of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended March 31, 2003 describes the significant accounting policies essential to preparing our consolidated financial statements. The preparation of these financial statements requires estimates and assumptions that affect the reported amounts and disclosures. Although we believe that our judgments and estimates are appropriate and correct, actual future results may differ materially from our estimates.

If we are unable to protect and enforce our intellectual property rights, we may be unable to compete effectively. Although we actively maintain and defend our intellectual property rights, we may be unable to adequately protect our proprietary rights. In addition, the laws of certain territories in which our products are or may be developed, manufactured or sold, including Asia and Europe, may not protect our products and intellectual property rights to the same extent as the laws of the United States. Because we conduct a substantial portion of our operations in Singapore and other locations outside of the United States and sell to a worldwide customer base, we are more dependent on our ability to protect our intellectual property in international environments than would be the case if our operations were more domestic.

Despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our intellectual property, which could harm our business and ability to compete effectively. We have from time to time discovered counterfeit copies of our products being manufactured or sold by others. Although we have programs to detect and deter the counterfeiting of our products, significant availability of counterfeit products could reduce our revenues and damage our reputation and goodwill with customers.

Third parties may assert infringement claims against us, which may be expensive to defend and could divert our resources. From time to time, third parties assert exclusive patent, copyright and other intellectual property rights to our key technologies, and we expect to continue to receive such claims in the future. For example, we entered into a patent cross-license agreement with IBM in May 2000. Under this agreement, which was amended in March 2002, we received a release from infringement claims prior to January 1, 2000 and received the right to use certain of IBM's patents through June 30, 2007. In consideration, we are paying, in annual installments, an aggregate patent fee of \$13.3 million, and we granted IBM a license to use all of our patents for the same period. The risks of our receiving additional claims from third parties may be enhanced in periods such as the one that we are currently entering where we are beginning to offer product lines employing new technologies relative to our existing products.

We cannot assure you that third parties will not assert other infringement claims against us, directly or indirectly, in the future, that assertions by third parties will not result in costly litigation or that we would prevail in such litigation or be able to license any valid and infringed intellectual property from third parties on commercially reasonable terms. These claims may be asserted in respect of intellectual property that we own or that we license from others. In addition to claims brought against us by third parties, we may also bring litigation against others to protect our rights. Intellectual

41

property litigation, regardless of the outcome, could result in substantial costs to us and diversion of our resources, and could adversely affect our business and financial results.

We may be engaged in legal proceedings that could cause us to incur unforeseen expenses and could occupy a significant amount of our management's time and attention. From time to time we are subject to litigation or claims that could negatively affect our business operations and financial position. Such disputes could cause us to incur unforeseen expenses, could occupy a significant amount of our management's time and attention, and could negatively affect our business operations and financial position. Also see Item 1 "Legal Proceedings" contained in Part II of this report and Item 3 "Legal Proceedings" contained in Part I of our Annual Report on Form 10-K for the year ended March 31, 2003.

If we repatriate cash from our foreign subsidiaries, we may incur additional income taxes which would negatively affect our results of operations and financial condition. We held \$466.4 million of cash, cash equivalents and marketable securities at our subsidiary in Singapore at June 30, 2003. From time to time we may need to repatriate our cash from Singapore to the United States. If we do so, we could incur additional income taxes at the combined United States Federal and state statutory rate of approximately 40% from the repatriation, which would negatively affect our results of operations and financial condition.

We may be subject to a higher effective tax rate that could negatively affect our results of operations and financial position. Our effective tax rate is benefited by a Singapore tax holiday relating to certain of our products. The terms of the tax holiday provide that profits derived from certain products will be exempt from tax through fiscal 2004, subject to certain conditions. If we do not continue to meet the conditions and requirements of the tax holiday in Singapore or are unable to negotiate an extended tax holiday, our effective tax rate will increase, which would adversely affect our financial results.

We may be required to pay additional federal income taxes which could negatively affect our results of operations and financial position. On June 27, 2000, we received a statutory notice of deficiency from the IRS, with respect to our Federal income tax returns for fiscal 1994 through 1996. In December 2001, our 1994 through 1996 tax audits were resolved and settlement agreements were filed with the United States Tax Court. On December 15, 2000, we received a statutory notice of deficiency from the IRS with respect to our Federal income tax return for fiscal 1997. We filed a Petition with the United States Tax Court on March 14, 2001 contesting the asserted deficiencies and settlement agreements have been filed with the United States Tax Court on all but one issue. In addition, the IRS is currently auditing our Federal income tax returns for fiscal 1998 through fiscal 2001. While we believe we have meritorious defenses against the asserted deficiencies and any proposed adjustments, and that sufficient taxes have been provided, we cannot predict the final outcome of these matters, and the final resolution could adversely affect our results of operations and financial position.

We finance our capital expenditure needs from operating cash flows and capital market financing, and if we need to seek additional financing, it may not be available on favorable terms. In order to finance strategic acquisitions, capital asset acquisitions and other general corporate needs, we rely on operating cash flows and capital markets. Historically, we have been able to access capital markets, but this does not necessarily guarantee that we will be able to access these markets in the future or at terms that are acceptable to us. The availability of capital in these markets is affected by several factors, including geopolitical risk, the interest rate environment and the condition of the economy as a whole. In addition, our own operating performance, capital structure and expected future performance impacts our ability to raise capital. We believe that our current cash, cash equivalents, short-term investments and future cash provided by operations will be sufficient to fund our needs through fiscal 2004. This includes repaying our existing convertible debt when due. However, if our operating performance falls below expectations, we may need additional funds.

We are exposed to fluctuations in foreign currency exchange rates. Because a significant portion of our business is conducted outside the United States, we face exposure to adverse movements in non-United States currency exchange rates. These exposures may change over time as business practices evolve and could have an adverse impact on our financial results and cash flows. Historically, our exposures have related to non-dollar-denominated operating expenses in Europe and Asia, where we sell primarily in United States dollars. We began Euro-denominated sales to our distribution customers in the European Union in the fourth quarter of fiscal 2003 and expect to continue such sales in the future. Additionally, we purchase a substantial portion of our raw materials and manufacturing equipment from foreign suppliers, and incur labor and other operating costs in foreign currencies, particularly in our Singapore & Ireland manufacturing facilities. An increase in the value of the dollar could increase the real cost to our customers of our products in markets outside the United States where we sell in dollars, and a weakened dollar could increase the cost of local operating expenses and procurement of raw materials to the extent we must purchase components in foreign currencies.

We hold minority interests in non-public companies, and if these companies face financial difficulties in their operations, our investments could be impaired. We continue to hold minority interests in privately held companies. These investments are inherently risky because these companies are still in the development stage and depend on third parties for financing to support their ongoing operations. In addition, the markets for their technologies or products are typically in the early stages and may never develop. If these companies do not have adequate cash funding to support their operations, or if they encounter difficulties developing their technologies or products, especially in the current economic downturn, our investments in these companies may be impaired and could adversely affect our financial results. For example,

Edgar Filing: ADAPTEC INC - Form 10-Q

we recorded impairment charges in the second and fourth quarters of fiscal 2003 and in the first and third quarters of fiscal 2002 related to a decline in the values of minority investments deemed to be other-than-temporary.

Our spin-off of Roxio may have potential subsequent tax liabilities that could negatively affect our results of operations. Pursuant to our distribution of the Roxio, Inc., or Roxio, common stock, we received an opinion from PricewaterhouseCoopers LLP, or PwC, regarding the tax-free nature of the transaction to us and to our stockholders under Section 355 of the Internal Revenue Code. The validity of the PwC opinion relating to the qualification of the distribution as a tax-free transaction is subject to factual representations and assumptions. We are not aware of any facts or circumstances that would cause such representations and assumptions to be untrue. In addition, the opinion of PwC is not binding on the IRS. If we or Roxio fail to conform to the requirements set forth in the IRS regulations, it could cause the distribution to be taxable to us and to our stockholders, and our financial results could be adversely affected.

We may have potential business conflicts of interest with Roxio with respect to our past and ongoing relationships, and we may not resolve these conflicts on terms favorable to us. Conflicts of interest may arise between Roxio and us in a number of areas relating to our past and ongoing relationship, including:

Tax, indemnification and other matters arising from the separation

Intellectual property matters

The nature, quality and pricing of transitional services we have agreed to provide to Roxio and

Business opportunities that may be attractive to both Roxio and us.

These and other business conflicts could adversely affect the growth of our business in the future.

Recently enacted and proposed changes in securities laws and regulations are likely to increase our costs. The Sarbanes-Oxley Act of 2002 has required and will continue to require changes in some of our corporate governance and securities disclosure or compliance practices. That Act also requires

the SEC to promulgate new rules on a variety of subjects, in addition to rule proposals already made, and the Nasdaq National Market has proposed revisions to its requirements for companies that are Nasdaq-listed. We expect these developments will require us to devote additional resources to our operational, financial and management information systems, procedures and controls to ensure our continued compliance with current and future laws and regulations. We expect these developments to make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced coverage or incur substantially higher costs to obtain coverage. These developments could make it more difficult for us to attract and retain qualified members of our board of directors, or qualified executive officers. We are presently evaluating and monitoring regulatory developments and cannot estimate the timing or magnitude of additional costs we may incur as a result.

We may encounter natural disasters, which could cause disruption to our employees or interrupt the manufacturing process for our products. Our operations could be subject to natural disasters and other business disruptions, which could seriously harm our revenues and financial condition and increase our costs and expenses. Our corporate headquarters are located in California, near major earthquake faults. Additionally, our primary wafer supplier, TSMC, is located in Taiwan, which has experienced significant earthquakes in the past. A severe earthquake could cause disruption to our employees or interrupt the manufacturing process, which could affect TSMC's ability to supply wafers to us, which could negatively affect our business and financial results. The ultimate impact on us and our general infrastructure of being located near major earthquake faults is unknown, but our net revenues and financial condition and our costs and expenses could be significantly impacted in the event of a major earthquake.

Manmade problems such as computer viruses or terrorism may disrupt our operations and harm our operating results. Despite our implementation of network security measures, our servers are vulnerable to computer viruses, break-ins, and similar disruptions from unauthorized tampering with our computer systems. Any such event could have an adverse effect on our business, operating results, and financial condition. In addition, the effects of war or acts of terrorism could have an adverse effect on our business, operating results, and

financial condition. In addition, as a multi-national company with headquarters and significant operations located in the United States, we may be impacted by actions against the United States. We are predominantly uninsured for losses and interruptions caused by terrorist acts and acts of war.

The price of our securities may be subject to wide fluctuations. Our stock has experienced substantial price volatility, particularly as a result of quarterly variations in our operating results, the published expectations of analysts, and as a result of announcements by our competitors and us. In addition, the stock market has experienced price and volume fluctuations that have affected the market price of many technology companies, in particular, and that have often been unrelated to the operating performance of such companies. In addition, the price of our securities may also be affected by general global, economic and market conditions, and the cost of operations in one or more of our product markets. While we cannot predict the individual effect that these factors may have on the price of our securities, these factors, either individually or in the aggregate, could result in significant variations in the price of our common stock during any given period of time. These fluctuations in our stock price also impact the price of our outstanding convertible securities and the likelihood of the convertible securities being converted into cash or equity.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

For financial market risks related to changes in interest rates, equity price and foreign currency exchange rates, reference is made to "Quantitative and Qualitative Disclosures About Market Risk" in Part II, Item 7A, of our Annual Report on Form 10-K for the year ended March 31, 2003.

44

Item 4. Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer (CEO) and our Chief Financial Officer (CFO), we conducted an evaluation of our disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-14(c) and 15d-14(c)) as of a date, also referred to as the Evaluation Date, within 90 days before the filing date of this quarterly report. Based upon that evaluation, our CEO and our CFO have concluded that as of the Evaluation Date, the design and operation of our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

There were no significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation and up to the filing date of this Quarterly Report on Form 10-Q. There were no significant deficiencies or material weaknesses, and therefore, no corrective actions were taken.

The Company's management, including our CEO and CFO, does not expect that our disclosure controls and procedures will prevent all errors and fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with its policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

45

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

In December 1999, we purchased Distributed Processing Technology Corporation, or DPT. As part of the purchase agreement, \$18.5 million of the purchase price was held back, which we refer to as the Holdback Amount, from former DPT stockholders, for unknown liabilities that may have existed as of the acquisition date. For accounting purposes, the Holdback Amount was included as part of the acquisition purchase price. Subsequent to the date of purchase, we determined that certain representations and warranties made by the DPT stockholders were incomplete or inaccurate, which caused us to lose revenues and incur additional expenses. In addition, certain DPT products were found to be defective. In December 2000, we filed a claim against the DPT stockholders for the Holdback Amount of \$18.5 million. In January 2001, the DPT stockholders notified us as to their objection to our claim. Under the terms of the purchase agreement, our claim was submitted to arbitration. Thereafter, we also initiated arbitration proceedings against Stephen Goldman, the principal shareholder and former president of DPT, alleging causes of action for, amongst others, fraud, fraudulent inducement, and negligent misrepresentation. The arbitration hearing was conducted during December 2002. In May 2003, we entered into a written settlement and a mutual general release agreement with Stephen Goldman, on his own and on behalf of all the selling shareholders of DPT, pursuant to which it was agreed that we would retain the Holdback Amount and additionally, Stephen Goldman would pay us \$31.0 million. We received the \$31.0 million cash payment in May 2003. The settlement contributed \$31.0 million to our operating cash-flows and resulted in a gain of \$49.3 million in the first quarter of fiscal 2004.

For additional information regarding our other material legal proceedings, reference is made to "Legal Proceedings" in Part I, Item 3, of our Annual Report on Form 10-K for the year ended March 31, 2003. The information provided in such Form 10-K regarding those matters remains substantially unchanged. In addition, we are a party to other litigation matters and claims which are normal in the course of our operations, and while the results of such litigation matters and claims cannot be predicted with certainty, we believe that the final outcome of such matters will not have a material adverse impact on our financial position or results of operations.

Item 6. Exhibits and Reports on Form 8-K

(a)

Exhibits:

Exhibit 99.1*	Certification of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. Section 1350, As Adopted Pursuant To Section 906 of the Sarbanes-Oxley Act of 2002.
---------------	--

*

These certifications are not deemed filed by the SEC and are not to be incorporated by reference in any filing of the Registrant under the Securities Act of 1933 or the Securities Exchange Act of 1934, irrespective of any general incorporation language in any filings.

(b)

Reports on Form 8-K:

During the first quarter ended June 30, 2003, we filed with the Securities and Exchange Commission the following Current Reports on Form 8-K:

On April 11, 2003, we filed a Current Report on Form 8-K pursuant to Item 5 to report that we had entered into a definitive agreement to acquire Eurologic Systems Group Limited, a provider of external and networked storage solutions.

On April 23, 2003, we filed a Current Report on Form 8-K pursuant to Item 5 to report that we had won a partial decision in the amount of \$50 million in the arbitration proceedings of Adaptec and Stephen Goldman, former principal owner of DPT.

On May 28, 2003, we filed a Current Report on Form 8-K pursuant to Item 5 to report that we had settled our claims against Stephen Goldman, former principal owner and president of DPT for \$49.3 million.

Edgar Filing: ADAPTEC INC - Form 10-Q

- c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

- a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

- b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officer and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

/s/ ROBERT N. STEPHENS

Date: August 8, 2003

Robert N. Stephens
Chief Executive Officer
49

**CERTIFICATION OF CHIEF FINANCIAL OFFICER
PURSUANT TO RULE 13A-14 OR 15D-14 OF THE SECURITIES
EXCHANGE ACT OF 1934, AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Marshall L. Mohr, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Adaptec, Inc.;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
- a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

Edgar Filing: ADAPTEC INC - Form 10-Q

- b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
- c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5.

The registrant's other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

- a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
- b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6.

The registrant's other certifying officer and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

/s/ MARSHALL L. MOHR

Marshall L. Mohr
Chief Financial Officer
50

Date: August 8, 2003
