PART I

FORWARD-LOOKING STATEMENTS

This Form 10-QSB contains "forward-looking statements" relating to NeoGenomics, Inc., a Nevada corporation (referred to individually as the "Parent Company" or collectively with all of its subsidiaries as the "Company" in this Form 10-QSB), which represent the Company's current expectations or beliefs including, but not limited to, statements concerning the Company's operations, performance, financial condition and growth. For this purpose, any statements

Edgar Filing: NEOGENOMICS INC - Form 10QSB

contained in this Form 10-QSB that are not statements of historical fact are forward-looking statements. Without limiting the generality of the foregoing, words such as "may", "anticipation", "intend", "could", "estimate", or "continue" or the negative or other comparable terminology are intended to identify forward-looking statements. These statements by their nature involve substantial risks and uncertainties, such as credit losses, dependence on management and key personnel, variability of quarterly results, and the ability of the Company to continue its growth strategy and competition, certain of which are beyond the Company's control. Should one or more of these risks or uncertainties materialize or should the underlying assumptions prove incorrect, actual outcomes and results could differ materially from those indicated in the forward-looking statements.

Any forward-looking statement speaks only as of the date on which such statement is made, and the Company undertakes no obligation to update any forward-looking statement or statements to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time and it is not possible for management to predict all of such factors, nor can it assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

NeoGenomics, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE A - ORGANIZATION AND DESCRIPTION OF BUSINESS

NeoGenomics, Inc. ("NEO") was incorporated under the laws of the state of Florida on June 1, 2001 and on November 14, 2001 agreed to be acquired by American Communications Enterprises, Inc., a Nevada corporation ("ACE"). As a result of the acquisition, NEO became the operating subsidiary of ACE. ACE was formed in 1998 and succeeded to NEO's name on January 3, 2002 (collectively NEO and ACE are referred to as "NeoGenomics", the "Company", "we", "us", or "our" throughout this Form 10-QSB).

On April 4, 2003, we amended our articles of incorporation to (1) effect a one-for-100 reverse split of our common stock, (2) reduce the authorized number of common shares from 500,000,000 to 100,000,000, and (3) authorize 10,000,000 shares of preferred stock for future issuance, with such terms, restrictions and limitations as may be established by the Board of Directors.

As a result of the above, all references to the number of shares and par value in the accompanying consolidated financial statements and notes thereto have been adjusted to reflect the April 2003 reverse stock split as though it had been completed as of January 1, 2003.

Basis of Presentation

Our accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and the instructions to Form 10-QSB and Rule 10-1 of Regulation S-X of the Securities and Exchange Commission (the "SEC"). Accordingly, these consolidated financial statements do not include all of the footnotes required by accounting principles generally accepted in the United States of America. In our opinion, all adjustments (consisting of normal and recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2005 are not necessarily indicative of the results that may be expected for the year ended December 31, 2005. The accompanying consolidated financial statements and the notes thereto should be read in conjunction with our audited consolidated financial statements as of and for the year ended December 31, 2004 contained in our Form 10-KSB.

Principles of Consolidation

Edgar Filing: NEOGENOMICS INC - Form 10QSB

The accompanying consolidated financial statements include the accounts of NEO and ACE. All significant intercompany accounts and balances have been eliminated in consolidation.

Revenue Recognition

Net revenues are recognized in the period when tests are performed and consist primarily of net patient revenues that are recorded based on established billing rates less estimated discounts for contractual allowances principally for patients covered by Medicare, Medicaid and managed care and other health plans. These revenues also are subject to review and possible audit by the payers. We believe that adequate provision has been made for any adjustments that may result from final determination of amounts earned under all the above arrangements. There are no known material claims, disputes or unsettled matters with any payers that are not adequately provided for in the accompanying consolidated financial statements.

7

Accounts Receivable and Allowance for Doubtful Accounts

We record accounts receivable net of estimated and contractual discounts. We provide for accounts receivable that could become uncollectible in the future by establishing an allowance to reduce the carrying value of such receivables to their estimated net realizable value. We estimate this allowance based on the aging of our accounts receivable and our historical collection experience for each type of payer. Bad debts are charged off to the allowance account at the time they are deemed uncollectible.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. The reported amounts of revenues and expenses during the reporting period may be affected by the estimates and assumptions we are required to make. Estimates that are critical to the accompanying consolidated financial statements include estimates related to contractual adjustments, and the allowance for doubtful accounts. It is at least reasonably possible that our estimates could change in the near term with respect to these matters.

NOTE B - LIQUIDITY

Our consolidated financial statements were prepared using accounting principles generally accepted in the United States of America applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. At December 31, 2004, we had working capital and stockholders' deficits of approximately \$822,000 and \$426,000 respectively. However, subsequent to December 31, 2004, we enhanced our working capital as we refinanced our short-term indebtedness of \$740,000 included in current liabilities with indebtedness that does not mature until March 31, 2007 (see Note C). We believe this debt facility, which allows for unsecured borrowings of \$1,000,000 after April 30, 2005, and improving

Edgar Filing: NEOGENOMICS INC - Form 10QSB

operations, will provide adequate capital to fund our operations and growth for 2005 and beyond. At March 31, 2005, we had a working capital surplus of \$25,800. As such, our consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should we be unable to continue as a going concern.

NOTE C - RELATED PARTY TRANSACTIONS

During the first eight months of 2003, the executive offices of the Company shared space, on a rent-free basis, with Naples Women's Center ("NWC"), a company owned by Dr. Michael Dent, our Chairman of the Board. In addition, NWC provided bookkeeping services to the Company free of charge. An estimate of the fair market value of these services has been expensed and added to paid-in capital as a capital contribution.

During 2001 and 2002, we borrowed approximately \$117,332 from the Naples Women's Center to meet our short-term cash needs. In 2003, we repaid approximately \$58,666 of this amount, and in 2004, we repaid the remaining \$58,666, plus accrued interest at a rate of 8.0% per annum.

During the period from December 2002 to April 2003, Steven C. Jones, one of our directors, advanced \$32,000 under a short term bridge loan agreement. Mr. Jones is a principal of Aspen Select Healthcare, LP (formerly known as MVP 3, LP), which consummated debt and equity financing transactions with the Company on April 15, 2003 and refinanced the debt portion of the transaction on March 23, 2005. These advances, plus accrued interest at a rate of 8.0% per annum, were repaid to Mr. Jones on April 17, 2003.

During the three months ending March 31, 2005, and 2004 and 2003, the Company incurred consulting expenses from a director of \$22,500 and \$52,000, respectively, for various consulting work performed in connection with managing the financial affairs of the Company and acting as the Principle Financial Officer.

8

On April 15, 2003, we entered into a revolving credit facility with MVP 3, LP ("MVP 3"), a partnership controlled by certain of our shareholders. Under the terms of the agreement MVP 3, LP agreed to make available up to \$1.5 million of debt financing with a stated interest rate of prime + 8% and such credit facility had an initial maturity of March 31, 2005. At December 31, 2004, we owed MVP 3, approximately \$740,000 under this loan agreement, which is classified as "Due to affiliates" under the current liabilities section of our balance sheet. This obligation was repaid in full through a refinancing on March 23, 2005.

On March 11, 2005 we entered into an agreement with HCSS, LLC and eTelenext, Inc. to provide eTelenext, Inc's Accessioning Application, AP Anywhere Application and CMQ Application. HCSS, LLC is a holding company created to build a small laboratory network for the 50 small commercial genetics laboratories in the United States. HCSS, LLC is owned 66.7% by Dr. Michael T. Dent, our Chairman. By becoming the first customer of HCSS in the small laboratory network, the Company is saving approximately \$152,000 in up front licensing fees. Under the terms of the agreement, the Company is required to pay \$22,500 over three months to customize this software and will pay an annual membership fee of \$6,000 per year and monthly transaction fees of between \$10.00

Edgar Filing: NEOGENOMICS INC - Form 10QSB

- \$2.50 per completed test, depending on the volume of tests performed. The eTelenext system is an elaborate laboratory information system (LIS) that is in use at many larger labs. By assisting in the formation of the small laboratory network, the Company will be able to increase the productivity of its technologists and have on-line links to other small labs in the network in order to better manage its workflow.

On March 23, 2005, we entered into an agreement with Aspen Select Healthcare, LP (formerly known as MVP 3, LP) to refinance our existing indebtedness of \$740,000 and provide for additional liquidity of up to \$760,000 to the Company. Under the terms of the agreement, Aspen Select Healthcare, LP ("Aspen"), a Naples, Florida-based private investment fund will make available up to \$1.5 million of debt financing in the form of a revolving credit facility (the "Credit Facility") with an initial maturity of March 31, 2007. Aspen is managed by its General Partner, Medical Venture Partners, LLC, which is controlled by a director of NeoGenomics. We incurred \$53,587 of transaction expenses in connection with establishing the Credit Facility, which have been capitalized and are being amortized to interest expense over the term of the agreement.

Under the terms of the Credit Facility, we are able to borrow up to 80% of "eligible" accounts receivable, 50% of our net furniture and equipment balance, secured by substantially all of our assets, and up to \$500,000 on an unsecured basis until April 30, 2005 and up to \$1,000,000 on an unsecured basis after April 30, 2005. The interest rate on the Credit Facility is prime + 6.0%, payable monthly in arrears. With respect to this agreement, we are subject to the following restrictive covenants: (i) we are not to incur indebtedness outside of this agreement in excess of \$50,000 without written authorization of Aspen, (ii) we cannot declare or pay any dividend on our common stock, and (iii) we are also subject to other general covenants typical of an instrument of this kind. In addition, as a condition to these transactions, the Company, Aspen and certain individual shareholders agreed to amend and restate their shareholders' agreement to provide that Aspen will have the right to appoint up to three of seven of our directors and one mutually acceptable independent director. We also amended and restated the Registration Rights Agreement with Aspen and certain individual shareholders, which grants to Aspen certain demand registration rights and which grants to all parties to the agreement, piggyback registration rights. As part of the Credit Facility transaction, the Company also issued to Aspen a five year Warrant to purchase up to 2,500,000 shares of its common stock at an exercise price of \$0.50/share (which we anticipate will result in us recording stock based interest expense in 2005 and beyond). We have accrued \$131,337 for the value of such Warrant as of the original commitment date as a discount to the face amount of the Credit Facility. The Company is amortizing such discount to interest expense over the 24 month of the Credit Facility.

NOTE D - EQUITY FINANCING TRANSACTIONS

During 2004, we sold 3,040,000 shares of our common stock in a series of private placements at \$0.25/share to unaffiliated third party investors. These

transactions generated net proceeds to the Company of approximately \$740,000 after deducting certain transaction expenses. Under the terms of the stock purchase agreements used in these transactions, the Company agreed to use its

Edgar Filing: NEOGENOMICS INC - Form 10QSB

reasonable best efforts to file with the SEC within 180 days of any transaction, and to cause to be declared effective thereafter, a resale registration statement which includes the shares purchased by such third party investors. As of March 31, 2005, the Company had not filed such resale registration statement with the SEC and is in breach of such provision under certain of the stock purchase agreements executed with third party investors. There were no penalties stipulated for failing to meet this registration deadline. The Company currently anticipates filing such resale registration statement shortly.

On January 3, 2005, we issued 27,288 shares of common stock under the Company's 2003 Equity Incentive Plan to two employees of the Company in satisfaction of \$6,822 of accrued, but unpaid vacation.

During the period January 3, 2005 to March 31, 2005, we sold 450,953 shares of our common stock in a series of private placements at \$0.30/share and \$0.35/share to unaffiliated third party investors. These transactions generated net proceeds to the Company of approximately \$146,000. Under the terms of the stock purchase agreements used in these transactions, the Company agreed to use its reasonable best efforts to file with the SEC within 180 days of any transaction, and to cause to be declared effective thereafter, a resale registration statement which includes the shares purchased by such third party investors.

End of Financial Statements

10

Item 2. - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

NeoGenomics, Inc. operates a medical testing laboratory and research facility based in Fort Myers, Florida that is targeting the rapidly growing genetic and molecular testing segment of the medical laboratory market. Our common stock is listed on the NASDAQ Over-the-Counter Bulletin Board (the "OTCBB") under the symbol "NGNM." Our business plan features two concurrent objectives:

1. Development of a clinical laboratory to offer routine cytogenetics, FISH, Flow Cytometry and molecular biology testing services; and
2. Development of a research laboratory to offer sponsored research services to other companies that are seeking to develop genomic products that will determine the genetic basis for female and neonatal diseases, cancers and other forms of disease.

The vision of NeoGenomics is to merge a high-end genetic and molecular testing laboratory with ongoing research activities to help bridge the gap between clinical medicine and genomic research. We believe that this combination could allow the Company to speed the process of discovery and innovation and develop new advanced testing methods to identify the genetic and molecular

Edgar Filing: NEOGENOMICS INC - Form 10QSB

causes of disease. Over the last five years, advances in technology and genetic research, including the complete sequencing of the human genome, have made possible a whole new set of tools to diagnose and treat diseases. This has opened up a vast opportunity for laboratory companies that are positioned to address this growing market segment.

The medical testing laboratory market can be broken down into three primary segments:

- o clinical lab testing,
- o anatomic pathology testing, and
- o genetic/molecular testing.

Clinical labs typically are engaged in high volume, high automation tests on blood and urine. Clinical lab tests often involve testing of a less urgent nature, for example, cholesterol testing and testing associated with routine physical exams. This type of testing yields relatively low average revenue per test. Anatomic pathology ("AP") testing involves evaluation of tissue, as in surgical pathology, or cells as in cytopathology. AP testing typically seeks to answer the question: is it cancer? The most widely known AP tests are Pap smears, skin biopsies, and tissue biopsies. AP tests are typically more labor and technology intensive than clinical lab tests and thus typically have higher average revenue per test than clinical lab tests.

We believe genetic/molecular testing is the newest and fastest growing subset of the laboratory market. Genetic testing or "cytogenetics" involves analyzing chromosomes taken from the nucleus of cells for abnormalities in a process called karyotyping. A karyotype evaluates the entire 46 human chromosomes by number, and banding patterns to identify abnormalities associated with diseases. Examples of cytogenetics testing include bone marrow testing to diagnose various types of leukemia and lymphoma, and amniocentesis testing of pregnant women to diagnose genetic anomalies such as Down syndrome in a fetus. Molecular biology involves testing for even more specific causes of diseases based on very small alterations in cellular biology and DNA. Examples of common molecular biology testing include screening for paternity, cystic fibrosis or Tay-Sachs disease.

Both cytogenetics and molecular biology have become important and highly-accurate diagnostic tools over the last five years. New tests are being developed rapidly, thus this market segment is expanding rapidly. Genetic/molecular testing requires very specialized equipment and credentialed individuals (typically PhD level) to certify the results. The following chart shows the differences between the genetic/molecular segment and other segments of the medical laboratory testing market. Up until about five years ago, the

11

genetic/molecular segment was considered to be part of the Anatomic Pathology segment, but given its rapid growth, many industry veterans now break genetic/molecular testing out into its own segment.

Source: Research Analysts and Company Estimates

(1) Estimated Revenue/Test is for the technical component of such tests and does not include revenue for the professional component or interpretation of such tests.

Our initial focus is on the oncology and advanced natology testing markets. We target oncologists that perform bone marrow sampling and obstetricians and perinatologists that perform amniocentesis testing and other natology screening tests. Historically, our clients have been predominantly located in Florida. Beginning in January 2005, based on the experience of our new President, we began targeting large institutional clients in the Eastern United States. As we grow, we anticipate offering additional tests that will allow us to more broadly penetrate the oncology and advanced natology testing markets as well as broaden our focus from genetic and molecular biology testing to more traditional types of anatomic pathology testing that are complementary to our current test offerings.

We compete in the marketplace based on the quality and accuracy of our test results, our turn-around times and our ability to provide after-test support to those physicians requesting consultation. We believe our average 3-5 day turn-around times on oncology-related cytogenetics tests is among the best in the industry and is helping to increase the usage patterns of cytogenetics tests by our referring oncologists and hematopathologists. Based on anecdotal information, we believe that most competing cytogenetics labs typically have 7-21 day turn-around times on average. Traditionally, longer turn-around times for cytogenetics tests have resulted in fewer tests being ordered since there is an increased chance that the test results will not be returned within an acceptable diagnostic window when other adjunctive diagnostic test results are available. We believe our turn-around times are resulting in our referring physicians requesting more of our testing services in order to augment or confirm other diagnostic tests, thereby giving us a significant competitive advantage in marketing our services against those of other competing laboratories.

We have an opportunity to add additional types of tests to our product offering. We believe that by doing so we may be able to capture increases in our testing volumes through our existing customer base as well as more easily attract new customers via the ability to bundle our testing services more appropriately to the needs of the market. For instance, initial testing for most hematological cancers yields total revenue ranging from approximately \$1,500 - \$2,500/case and is generally comprised of cytogenetic, fluorescence in-situ hybridization (FISH), flow cytometry, and morphology testing. Until recently, we only performed cytogenetic testing in-house, which averaged approximately \$500 of revenue per case. In December 2004, we added FISH testing to our product

offering, and in February 2005, we began offering flow cytometry testing services. We believe that with the addition of these two new testing platforms, we will nearly double our average revenue per oncology case.

We believe this bundled offering approach could drive large increases in our revenue and afford the Company significant synergies and efficiencies in our operations, sales and marketing activities.

	<u>Avg. Rev/Test</u>
Cytogenetics	\$400-\$600
Fluorescence In Situ Hybridization (FISH)	\$200-\$400
Flow cytometry	
- Technical component	\$400-\$600
- Professional component	\$100-\$200
Morphology	<u>\$400-\$700</u>
Total	\$1,500-\$2,500

The cytogenetics and molecular biology testing markets in general can be seasonal and the volumes of such tests tend to decline somewhat in the summer months as referring physicians and their patients are vacationing. In southern Florida, currently our primary referral market for lab tests, this seasonality is further exacerbated because a meaningful percentage of the population returns to homes in the Northern U.S. to avoid the hot summer months. We estimate that our growth rates during the second and third quarter of each year will be somewhat impacted by these seasonality factors.

The following discussion and analysis should be read in conjunction with the financial statements for the three months ended March 31, 2005, included with this Form 10-QSB. Readers are also referred to the cautionary statement, which addresses forward-looking statements made by us.

Critical Accounting Policies

The preparation of financial statements in conformity with United States generally accepted accounting principles requires our management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Our management routinely makes judgments and estimates about the effects of matters that are inherently uncertain.

Our critical accounting policies are those where we have made difficult, subjective or complex judgments in making estimates, and/or where these estimates can significantly impact our financial results under different assumptions and conditions. Our critical accounting policies are:

- o Revenue Recognition
- o Accounts Receivable

Revenue Recognition

Net revenues are recognized in the period when tests are performed and consist primarily of net patient revenues that are recorded based on established billing rates less estimated discounts for contractual allowances principally

Edgar Filing: NEOGENOMICS INC - Form 10QSB

for patients covered by Medicare, Medicaid and managed care and other health plans. These revenues also are subject to review and possible audit by the payers. We believe that adequate provision has been made for any adjustments that may result from final determination of amounts earned under all the above arrangements. There are no known material claims, disputes or unsettled matters with any payers that are not adequately provided for in the accompanying consolidated financial statements.

13

Accounts Receivable

We record accounts receivable net of estimated and contractual discounts. We provide for accounts receivable that could become uncollectible in the future by establishing an allowance to reduce the carrying value of such receivables to their estimated net realizable value. We estimate this allowance based on the aging of our accounts receivable and our historical collection experience for each type of payer. Bad debts are charged off to the allowance account at the time they are deemed uncollectible.

Results of Operations for the Three Months ended March 31, 2005 as Compared to the Three Months ended March 31, 2004

During the three months ended March 31, 2005, our revenues increased approximately 29% to \$230,000 from \$179,000 during the three months ending March 31, 2004, primarily as a result of attracting new customers to our services and increasing the volume of services sold to existing customers. During the three months ending March 31, 2005, our cost of revenue increased approximately 21% to \$177,000 from \$146,000 during the three months ending March 31, 2004, primarily as a result of additional costs associated with hiring more laboratory personnel to support our increased testing volumes as well as increased costs as a result of opening new lines of business. This resulted in a 62% increase in our gross profit to approximately \$53,000 for the three months ended March 31, 2005 from approximately \$33,000 during the three months ended March 31, 2004. This change is primarily attributable to our increased revenues and testing volumes for the period ended March 31, 2005 as compared to the three month period ended March 31, 2004. We believe our gross margin will continue to improve as we perform more tests.

During the three months ended March 31, 2005, our selling, general and administrative expenses increased by approximately 33% to approximately \$241,000 from approximately \$182,000 in the three months ended March 31, 2004. This increase was primarily as a result of higher personnel and personnel-related expenses associated with increased levels of staffing. Selling, general and administrative expenses include all of our overhead and technology expenses as well as the cost of our management and sales personnel. Interest expense for the most recent quarter increased approximately 31% to approximately \$27,000 from approximately \$21,000 for the three months ended March 31, 2004. Interest expense is mainly comprised of interest payable on advances under our Credit Facility from Aspen, which have increased as a result of our increased borrowing. In connection with our new credit facility, discussed below in "Liquidity and Capital Resources," we recorded \$131,337 of a debt discount for the issuance of warrants and we incurred \$53,587 of financing costs. These amounts will be amortized to interest expense over the 24 month period of the new credit facility.

Edgar Filing: NEOGENOMICS INC - Form 10QSB

As a result of the foregoing, our net loss for the three months-ended March 31, 2005 increased approximately 27% to approximately \$215,000 from approximately \$170,000 during the three months-ended March 31, 2004.

Liquidity and Capital Resources

During the three months ended March 31, 2005, our operating activities used approximately \$243,000 in cash. This amount primarily represented cash used to pay general and administrative expenses associated with our operations and to fund our working capital needs. We also spent approximately \$12,000 on new equipment. We were able to finance operations and equipment purchases primarily through the sale of equity securities and net advances under our Credit Facility, which together provided approximately \$254,000 during the three months ended March 31, 2005. At March 31, 2005, we had cash and cash equivalents of approximately \$113,000.

During 2004, we sold 3,040,000 shares of our common stock in a series of private placements at \$0.25/share to unaffiliated third party investors. These transactions generated net proceeds to the Company of approximately \$740,000 after deducting certain transaction expenses. Under the terms of the stock

14

purchase agreements used in these transactions, the Company agreed to use its reasonable best efforts to file with the SEC within 180 days of any transaction, and to cause to be declared effective thereafter, a resale registration statement which includes the shares purchased by such third party investors. As of March 31, 2005, the Company had not filed such resale registration statement with the SEC and is in breach of such provision under certain of the stock purchase agreements executed with third party investors. There were no penalties stipulated for failing to meet this registration deadline. The Company currently anticipates filing such resale registration statement shortly.

On January 3, 2005, we issued 27,288 shares of common stock under the Company's 2003 Equity Incentive Plan to two employees of the Company in satisfaction of \$6,822 of accrued, but unpaid vacation.

During the period January 3, 2005 to March 31, 2005, we sold 450,953 shares of our common stock in a series of private placements at \$0.30/share and \$0.35/share to unaffiliated third party investors. These transactions generated net proceeds to the Company of approximately \$146,000. Under the terms of the stock purchase agreements used in these transactions, the Company agreed to use its reasonable best efforts to file with the SEC within 180 days of any transaction, and to cause to be declared effective thereafter, a resale registration statement which includes the shares purchased by such third party investors.

On March 23, 2005, we entered into an agreement with Aspen Select Healthcare, LP (formerly known as MVP 3, LP) to refinance our existing indebtedness of \$740,000 and provide for additional liquidity of up to \$760,000 to the Company. Under the terms of the agreement, Aspen Select Healthcare, LP ("Aspen"), a Naples, Florida-based private investment fund will make available up to \$1.5 million of debt financing in the form of a revolving credit facility (the "Credit Facility") with an initial maturity of March 31, 2007. Aspen is managed by its General Partner, Medical Venture Partners, LLC, which is

Edgar Filing: NEOGENOMICS INC - Form 10QSB

controlled by a director of NeoGenomics.

Under the terms of the Credit Facility, we are able to borrow up to 80% of "eligible" accounts receivable, 50% of our net furniture and equipment balance, secured by substantially all of our assets, and up to \$500,000 on an unsecured basis until April 30, 2005 and up to \$1,000,000 on an unsecured basis after April 30, 2005. The interest rate on the Credit Facility is prime + 6.0%, payable monthly in arrears. With respect to this agreement, we are subject to the following restrictive covenants: (i) we are not to incur indebtedness outside of this agreement in excess of \$50,000 without written authorization of Aspen, (ii) we cannot declare or pay any dividend on our common stock, and (iii) we are also subject to other general covenants typical of an instrument of this kind. As part of the Credit Facility transaction, the Company also issued to Aspen a five year Warrant to purchase up to 2,500,000 shares of its common stock at an exercise price of \$0.50/share.

At the present time, we have limited cash resources. We do not anticipate that we will generate significant cash flow from operating activities until late 2005. As a result, we anticipate that we will require approximately \$200,000 to \$300,000 of additional working capital financing during the next twelve months in order to meet our working capital requirements during this period. We currently plan to finance our operations through borrowings under our Credit Facility with Aspen. Advances under this Credit Facility are limited, at any given time, based on a formula contained in the loan agreement. The Company may not be eligible to obtain all of its working capital funding needs from Aspen or another source. If the Company is unable to obtain such funding, the Company will be required to curtail or discontinue operations.

Capital Expenditures

We currently forecast capital expenditures for the coming year in order to execute on our business plan. The amount and timing of such capital expenditures will be determined by the volume of business, but we currently anticipate that we will need to purchase approximately \$200,000 to \$300,000 of additional capital equipment during the next twelve months. We plan to fund these expenditures through borrowings under our Credit Facility with Aspen and through traditional lease financing from equipment lessors. We may not be eligible to obtain all of our capital equipment funding needs from Aspen or another source.

15

If we are unable to obtain such funding, we will be required to curtail our equipment purchases, which may have an impact on our ability to generate revenues.

Staffing

Currently, we have nine full-time employees, one part-time employee and four part-time consultants. During 2005, we plan to add additional laboratory technologists and laboratory assistants to assist us in handling a greater volume of tests and to perform sponsored research projects. In addition, we intend to continue building our sales force in an effort to sustain our sales growth, as well as add personnel in management, accounting, and administrative functions. The number of such additional personnel and their salaries will be determined by the volume of business we are generating and the availability of adequate financial resources to pay the salaries of such personnel.

Item 3 - CONTROLS AND PROCEDURES

A) Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's Principal Executive Officer and Acting Principal Financial Officer of the effectiveness of the design and operation of the Company's disclosure controls and procedures. The Company's disclosure controls and procedures are designed to provide a reasonable level of assurance of achieving the Company's disclosure control objectives. The Company's Principal Executive Officer and Acting Principal Financial Officer have concluded that the Company's disclosure controls and procedures are, in fact, effective at this reasonable assurance level as of the period covered. In addition, the Company reviewed its internal controls, and there have been no significant changes in its internal controls or in other factors that could significantly affect those controls subsequent to the date of their last evaluation or from the end of the reporting period to the date of this Form 10-QSB.

(B) Changes in Internal Controls Over Financial Reporting

In connection with the evaluation of the Company's internal controls during the Company's first fiscal quarter ended March 31, 2005, the Company's Principal Executive Officer and Acting Principal Financial Officer have determined that there are no changes to the Company's internal controls over financial reporting that has materially affected, or is reasonably likely to materially effect, the Company's internal controls over financial reporting.

PART II. - OTHER INFORMATION

Item 1. Legal Proceedings

The Company is currently a defendant in one lawsuit from a former employee relating to compensation related claims. The Company does not believe this lawsuit is material to its operations or financial results and intends to vigorously pursue its defense of the matter.

Item 2. Changes in Securities

On January 3, 2005, we issued 27,288 shares of common stock under the Company's 2003 Equity Incentive Plan to two employees of the Company in satisfaction of \$6,822 of accrued, but unpaid vacation.

On March 23, 2005, the Company entered into a Loan Agreement with Aspen Select Healthcare, LP ("Aspen") to provide up to \$1.5 million of indebtedness

pursuant to a credit facility (the "Credit Facility"). As part of the Credit Facility transaction, the Company also issued to Aspen a five year Warrant to purchase up to 2,500,000 shares of its common stock at an exercise price of \$0.50/share.

Edgar Filing: NEOGENOMICS INC - Form 10QSB

During the period January 1, 2005 to March 31, 2005, we sold 450,950 shares of our common stock in a series of private placements at \$0.30/share and \$0.35/share to unaffiliated third party investors. These transactions generated net proceeds to the Company of approximately \$146,000. These transactions involved the issuance of unregistered stock to accredited investors in transactions that we believed were exempt from registration under Rule 506 promulgated under the Securities Act of 1933.

Item 3. Defaults Upon Senior Securities

NONE

Item 4. Submission of Matters to a Vote of Securities Holders

NONE

Item 5. Other Information

NONE

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

The following exhibits are filed as part of this Form 10-QSB.

Exhibit Number	Description	
31.1	Certification by Principal Executive Officer pursuant to 15 U.S.C. Section 7241, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002	Provided herewith
31.2	Certification by Principal Financial Officer pursuant to 15 U.S.C. Section 7241, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002	Provided herewith
32.1	Certification by Principal Executive Officer and Principal Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002	Provided herewith

17

(b) Reports on Form 8-K.

On March 30, 2005, we filed a report on Form 8-K announcing that the Company had obtained a \$1.5 million revolving credit facility with Aspen Select Healthcare, LP. All of the related transaction documents were filed as attachments to this Form 8-K.
