Edgar Filing: TORRENT ENERGY CORP - Form S-1

Approximate date of proposed sale to the public: As soon as practicable after the registration statement becomes effective.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act, check the following box: [X]

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. []

CW887441.32

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. []

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. []

If delivery of the prospectus is expected to be made pursuant to Rule 434, check the following box. []

CALCULATION OF REGISTRATION FEE

Title of each class of securities to be registered	Amount to be registered ⁽¹⁾	Proposed maximum offering price per share ⁽²⁾	Proposed maximum aggregate offering price	Amount of registration fee
Common stock, \$0.001 par value	125,000 ⁽³⁾	\$2.08	\$260,000	\$27.82
Common stock, \$0.001 par value	1,174,000 ⁽⁴⁾	\$2.08	\$2,441,920	\$261.29
Common stock, \$0.001 par value issuable upon conversion or redemption of Series E Convertible Preferred Stock	15,000,000 ⁽⁵⁾	\$2.08	\$31,200,000	\$3,338.40
Total	16,299,000		\$33,901,920	\$3,627.51

(1) An indeterminate number of additional shares of common stock shall be issuable pursuant to Rule 416 to prevent dilution resulting from stock splits, stock dividends or similar transactions and in such an event the number of shares registered shall automatically be increased to cover the additional shares in accordance with Rule 416 under the Securities Act.

(2) Estimated solely for purposes of calculating the registration fee in accordance with Rule 457(c) and Rule 457(g) under the Securities Act, using the average of the high and low price as reported on the Over-The-Counter Bulletin Board on August 7, 2006, which was \$2.08 per share.

(3) Represent the number of shares of common stock issued to a selling stockholder as consideration for technical services pursuant to a letter agreement dated July 21, 2006.

(4) Represent a portion of shares of common stock sold to certain selling stockholders pursuant to two securities purchase agreements entered into on February 11, 2005.

(5) Estimated number of shares of common stock issuable upon conversion or redemption of Series E Convertible Preferred Stock as provided under the investor registration rights agreement dated as of June 28, 2006 between our company and Cornell Capital Partners, LP.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH

Edgar Filing: TORRENT ENERGY CORP - Form S-1

SECTION 8(A) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE SECURITIES AND EXCHANGE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(A), MAY DETERMINE.

PROSPECTUS

Subject to completion

_____, 200__

TORRENT ENERGY CORPORATION

16,299,000 Shares of Common Stock of Torrent Energy Corporation

This prospectus relates to the resale by the selling stockholders of up to 16,299,000 shares of common stock of Torrent Energy Corporation, a Colorado Corporation, which may be resold by selling security holders named in this prospectus. This resale of up to 16,299,000 shares of our common stock includes:

- 125,000 shares of our common stock issued to a selling stockholder as consideration for technical services pursuant to a letter agreement dated July 21, 2006;
- 1,174,000 shares of our common stock sold to certain selling stockholders pursuant to two securities purchase agreements entered into on February 11, 2005; and
- 15,000,000 shares of our common stock issuable upon conversion or redemption of Series E Convertible Preferred Stock as provided under the investor registration rights agreement dated as of June 28, 2006 between our company and Cornell Capital Partners, LP.

The Series E Convertible Preferred Stock is convertible into shares of our common stock at any time by dividing the liquidation amount of the Series E Convertible Preferred Stock being converted by \$2.50. The holder of the Series E Convertible Preferred Stock may only convert up to 1,250 Series E Convertible Preferred Stock into common shares in any 30 day period. We may, in our discretion, waive this conversion limitation; and this conversion limitation shall not apply upon the occurrence and continuance of an event of default. The holder of the Series E Convertible Preferred Stock also may not convert any Series E Convertible Preferred Stock if the aggregate number of common stock beneficially owned by such holder will exceed 4.99% of our then issued and outstanding common stock following the conversion.

From the first trading day of the month after effectiveness of this registration statement or December 1, 2006, whichever is earlier, we will be required to redeem a certain number of Series E Convertible Preferred Stock each month. The number of Series E Convertible Preferred Stock we need to redeem is determined by dividing the total number of Series E Convertible Preferred Stock by the number of months remaining through August 2008. However, if the closing trading price of our common stock exceeds \$2.50 for the five consecutive trading days immediately before a redemption date, then we will not need to make the redemption.

We may elect to pay for the redemption of Series E Convertible Preferred Stock by cash or through issuance of our common stock. If we choose to pay for the redemption of Series E Convertible Preferred Stock in cash, we will need to pay the liquidation amount of the Series E Convertible Preferred Stock to be redeemed plus a 20% redemption premium. If we choose to pay for the redemption of Series E Convertible Preferred Stock through issuance of our common stock, the number of shares of our common stock to be issued is determined by dividing the liquidation amount of the Series E Convertible Preferred Stock to be redeemed by \$1.67. However, if the closing trading price of our common stock as of the redemption date falls below \$1.67, we will not be allowed to pay for the redemption through issuance of our common stock.

The shares of our common stock and Series E Convertible Preferred Stock were acquired by the selling shareholders directly from us in private offerings that were exempt from registration under the U.S. securities laws. We have been advised by the selling security holders that they may offer to sell all or a portion of their shares of common stock being offered in this prospectus from time to time. The selling stockholders may sell common stock from time to time in the principal market on which the stock is traded at the prevailing market price or in negotiated transactions. The selling stockholders may be deemed underwriters of the shares of common stock which they are offering. We will not receive any proceeds from the resale of shares of common stock by the selling security holders. However, we have received proceeds from the sale of shares of common stock that are presently outstanding. We will pay the expenses of registering these shares.

Our common stock is registered under Section 12(g) of the Securities Exchange Act of 1934, and is listed on the Over-The-Counter Bulletin Board under the symbol "TREN". The last reported sales price per share of our common stock as reported by the Over-The-Counter Bulletin Board on December 1, 2006, was \$1.52.

Our business is subject to many risks and an investment in our common stock will also involve a high degree of risk. You should invest in our common stock only if you can afford to lose your entire investment. You should carefully consider the various risk factors described beginning on page 7 before investing in our common stock.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The information in this Prospectus is not complete and may be changed. This Prospectus is included in the Registration Statement that was filed by Torrent Energy Corporation with the Securities and Exchange Commission. The selling stockholders may not sell these securities until the registration statement becomes effective. This Prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any state where the sale is not permitted.

Please read this prospectus carefully. You should rely only on the information contained in this prospectus. We have not authorized anyone to provide you with different information.

The date of this prospectus is _____, 2006.

PROSPECTUS SUMMARY

The following summary highlights selected information contained in this prospectus. This summary does not contain all the information you should consider before investing in the securities. Before making an investment decision, you should read the entire prospectus carefully, including the "risk factors" section, the financial statements and the secured convertible notes to the financial statements.

OUR BUSINESS

We are an exploration stage company primarily engaged in the exploration of coalbed methane in the Coos Bay region of Oregon and in the Chehalis Basin region of Washington State. Through our wholly-owned subsidiary, Methane Energy Corp., we hold leases to approximately 116,000 acres of prospective coalbed methane lands in the Coos Bay region. Through our wholly-owned subsidiary, Cascadia Energy Corp., we are evaluating approximately 130,000 acres in Washington State to commence an exploratory program for possible hydrocarbon deposits. We changed our name from Scarab Systems, Inc. to Torrent Energy Corporation on July 13, 2004 to reflect the change in our business operations towards coalbed methane exploration. The change in our business operations occurred as a result of our entering into a lease purchase and sale agreement, through Methane on April 30, 2004. We were previously a web design and internet application developer.

For the fiscal year ended March 31, 2006, we generated no revenue and a net loss of \$5,295,572, as compared to no revenue and a net loss of \$2,701,460 for the year ended March 31, 2005. As a result of recurring losses from operations and working capital deficiency, our auditors, in their report dated June 28, 2006, have expressed substantial doubt about our ability to continue as going concern.

Our principal offices are located at One SW Columbia Street, Suite 640, Portland, Oregon 97258 and our telephone number is (503) 224-0072. We are a Colorado corporation.

THE OFFERING

Common stock offered by selling stockholders	Up to 16,299,000 shares
Common stock to be outstanding after offering	Up to 49,523,941 shares
Use of Proceeds	We will not receive any proceeds from the sale of the common stock.

Over-The-Counter Bulletin Board Symbol

TREN

The above information regarding common stock to be outstanding after the offering is based on 33,224,941 shares of common stock outstanding as of December 1, 2006 and assumes the subsequent conversion or redemption of our issued Series E Convertible Preferred Stock.

To obtain funding for our ongoing operations, we entered into an investment agreement with an accredited investor on June 28, 2006 for the sale of 25,000 shares of our Series E Convertible Preferred Stock for gross proceeds of \$25,000,000 pursuant to the terms of the investment agreement, of which \$9,000,000 was received by our company on the closing of the investment agreement, \$8,500,000 was received by our company upon initial filing of this registration statement, and \$7,500,000 will be received by our company when this registration statement is declared effective by the Securities and Exchange Commission.

The Series E Convertible Preferred Stock is convertible into common stock at any time by dividing the dollar amount being converted by \$2.50. Based on this conversion price, 10,000,000 shares of our common stock would be issuable upon conversion of all of the Series E Convertible Preferred Stock. The holder of the Series E Convertible Preferred Stock may only convert up to \$1,250,000 of Series E Convertible Preferred Stock into common shares in any 30 day period. We may, in our discretion, waive this conversion limitation; and this conversion limitation shall not apply upon the occurrence and continuance of an event of default.

From the first trading day of the month after effectiveness of this registration statement or December 1, 2006, whichever is earlier, we will be required to redeem a certain number of Series E Convertible Preferred Stock each month. The number of Series E Convertible Preferred Stock we need to redeem is determined by dividing the total number of Series E Convertible Preferred Stock by the number of months remaining through August 2008. However, if the closing trading price of our common stock exceeds \$2.50 for the five consecutive trading days immediately before a redemption date, then we will not need to make the redemption.

We may elect to pay for the redemption of Series E Convertible Preferred Stock by cash or through issuance of our common stock. If we choose to pay for the redemption of Series E Convertible Preferred Stock in cash, we will need to pay the liquidation amount of the Series E Convertible Preferred Stock to be redeemed plus a 20% redemption premium. If we choose to pay for the redemption of Series E Convertible Preferred Stock through issuance of our common stock, the number of shares of our common stock to be issued is determined by dividing the liquidation amount of the Series E Convertible Preferred Stock to be redeemed by \$1.67. Based on this conversion price, approximately 14,970,060 shares of our common stock would be issuable if all of our Series E Convertible Preferred Stock are redeemed and paid for through the issuance of our common stock. However, if the closing trading price of our common stock as of the redemption date falls below \$1.67, we will not be allowed to pay for the redemption through issuance of our common stock.

See the "Description of Securities" sections for a complete description of the common stock and the Series E Convertible Preferred Stock.

RISK FACTORS

Much of the information included in this prospectus includes or is based upon estimates, projections or other forward-looking statements. Such forward-looking statements include any projections or estimates made by us and our management in connection with our business operations. These include (i) the potential prospective for coalbed methane and conventional natural gas production in the Coos Bay Basin and the Chehalis Basin, (ii) the potential pipeline capacity in the port of Coos Bay area, and (iii) greater market for natural gas in Coos County and the Pacific Northwest region in general. While these forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgment regarding the direction of our business, actual results will almost always vary, sometimes materially, from any estimates, predictions, projections, assumptions, or other future performance suggested herein. We undertake no obligation to update forward-looking statements to reflect events or circumstances occurring after the date of such statements.

Such estimates, projections or other forward-looking statements involve various risks and uncertainties as outlined below. We caution readers of this prospectus that important factors in some cases have affected and, in the future, could materially affect actual results and cause actual results to differ materially from the results expressed in any such estimates, projections or other forward-looking statements. In evaluating us, our business and any investment in our business, readers should carefully consider the following factors.

Risks Relating to Our Business

Our independent auditors have expressed substantial doubt about our ability to continue as a going concern, which may hinder our ability to obtain future financing.

In their report dated June 28, 2006, our independent auditors stated that our consolidated financial statements for the fiscal year ended March 31, 2006 were prepared assuming that we would continue as a going concern. Our ability to continue as a going concern is an issue raised as a result of recurring losses from operations and working capital deficiency. Our ability to continue as a going concern is subject to our ability to obtain necessary funding from outside sources, including obtaining additional funding from the sale of our securities. Our continued net operating losses increase the difficulty in meeting such goals and there can be no assurances that such funding methods will prove successful.

We have a history of losses that may continue, which may negatively impact our ability to achieve our business objectives.

We have accumulated a deficit of \$8,880,349 to March 31, 2006 and incurred net losses applicable to common shareholders of \$5,295,572 for the fiscal year ended March 31, 2006; and \$2,701,460 for the fiscal year ended March 31, 2005. We cannot assure you that we can achieve or sustain profitability on a quarterly or annual basis in the future. Our operations are subject to the risks and competition inherent in the establishment of a business enterprise. There is no assurance that future operations will be profitable. We may not achieve our business objectives and the failure to achieve such goals would have an adverse impact on us.

If we are unable to obtain additional funding our business operations will be harmed and if we do obtain additional financing our then existing shareholders may suffer substantial dilution.

We will require additional funds to sustain and expand our oil and gas exploration activities. We anticipate that we will require up to approximately \$21,000,000 to fund our continued operations for the fiscal year ending March 31, 2007. Additional capital will be required to effectively support our operations and to implement our business strategy. There can be no assurance that financing will be available in amounts or on terms acceptable to us, if at all. The inability to obtain additional capital will restrict our ability to grow and may reduce our ability to continue to conduct business operations. If we are unable to obtain additional financing, we will likely be required to curtail our exploration plans and possibly cease our operations. Any additional equity financing may result in substantial dilution to our then existing shareholders.

We have a limited operating history and if we are not successful in continuing to grow our business, then we may have to scale back or even cease our ongoing business operations.

Our company has a limited operating history in the business of oil and gas exploration and must be considered to be an exploration stage company. We have no history of revenues from operations and have no significant tangible assets. We have yet to generate positive earnings and there is no assurance that we will ever operate profitably. Our company has a limited operating history in the business of oil and gas exploration and must be considered an exploration stage company. Our success is significantly dependent on successful lease acquisition, drilling, completion and production programs. Our operations will be subject to all the risks inherent in the establishment of a developing enterprise and the uncertainties arising from the absence of a significant operating history. We may be unable to locate recoverable reserves or operate on a profitable basis. We are in the exploration stage and potential investors should be aware of the difficulties normally encountered by enterprises in the exploration stage. If our business plan is not successful, and we are not able to operate profitably, investors may lose some or all of their investment in our company.

If we are unable to retain the services of Mr. Carlson and other senior executives or if we are unable to successfully recruit qualified managerial and field personnel having experience in oil and gas exploration, we may not be able to continue our operations.

Our success depends to a significant extent upon the continued service of Mr. John Carlson, our president and chief executive officer, and a director. Loss of the services of Mr. Carlson could have a material adverse effect on our growth, revenues, and prospective business. We do not maintain key-man insurance on the life of Mr. Carlson. In addition, in order to successfully implement and manage our business plan, we will be dependent upon, among other things, successfully recruiting qualified managerial and field personnel who have experience in the oil and gas exploration industry. Competition for qualified individuals is intense. There are no assurances that we will be able to find and attract new employees; or to retain existing employees; or to find, attract and retain qualified personnel on acceptable terms.

As our properties are in the exploration and development stage, there is no assurance that we will establish commercially exploitable discoveries on our properties.

Exploration for economic reserves of oil and gas is subject to a number of risk factors. Few properties that are explored are ultimately developed into producing oil and/or gas wells. Our properties are in the exploration stage only

and are without proven reserves of oil and gas. We may not establish commercially exploitable discoveries on any of our properties; and we may never have profitable operations.

We are unsure about the likelihood that we will discover and establish a profitable production of gas from coal seams in the Coos Bay or Chehalis Basin regions.

Currently, there is no commercial production of coal in the state of Oregon. Additionally, no coalbed methane gas production exists either in Washington or Oregon. Coalbed methane gas only accounts for a small percentage of all natural gas production in the United States. The closest coalbed methane production to the Coos Bay and Chehalis Basin occurs in the state of Wyoming. As a result, it is unlikely that we will discover any significant amount of coalbed methane in the Coos Bay or Chehalis Basins or be able to establish wells that will produce a profitable amount of coalbed methane gas.

Even if we are able to discover commercially exploitable resources on any of the properties on which we hold an interest, we may never achieve profitability or may not receive an adequate return on invested capital because the potential profitability of oil and gas ventures depends upon factors beyond the control of our company.

The potential profitability of oil and gas properties is dependent upon many factors beyond our control. For instance, world prices and markets for oil and gas are unpredictable, highly volatile, potentially subject to governmental fixing, pegging, controls or any combination of these and other factors, and respond to changes in domestic, international, political, social and economic environments. Additionally, due to worldwide economic uncertainty, the availability and cost of funds for production and other expenses have become increasingly difficult, if not impossible, to project. In addition, adverse weather conditions can also hinder drilling operations. These changes and events may materially affect our future financial performance. These factors cannot be accurately predicted and the combination of these factors may result in our company not receiving an adequate return on invested capital.

Even if we are able to discover and complete a gas well, there can be no assurance the well will become profitable.

We have not yet established a commercially viable coalbed methane gas resource. Even if we are able to do so, a productive well may become uneconomic in the event water or other deleterious substances are encountered which impair or prevent the production of oil and/or gas from the well. In addition, production from any well may be unmarketable if it is impregnated with water or other deleterious substances. In addition, the marketability of oil and gas which may be acquired or discovered will be affected by numerous factors, including the proximity and capacity of oil and gas pipelines and processing equipment, market fluctuations of prices, taxes, royalties, land tenure, allowable production and environmental protection, all of which could result in greater expenses than revenue generated by the well.

The oil and gas industry is highly competitive and there is no assurance that we will be successful in acquiring the leases.

The oil and gas industry is intensely competitive. We compete with numerous individuals and companies, including many major oil and gas companies that have substantially greater technical, financial and operational resources. Accordingly, there is a high degree of competition for desirable oil and gas leases, for suitable properties for drilling operations, for necessary drilling equipment, as well as for access to funds. We cannot predict if the necessary funds can be raised or that any projected work will be completed. Our budget anticipates our acquiring additional leases for acreage in both the Coos Bay and Chehalis Basins. This acreage may not become available or, if it is available for leasing, we may not be successful in acquiring clear title to the leases. If we do not acquire the leases, we will not be able to completely fulfill our current business plan. Failure to carry out our business plan may reduce the likelihood of achieving profitable operations and may discourage investors from investing in our company. If these things happen, we may not be able to raise additional funds when we need them and we may have to cease operations.

The marketability of natural resources will be affected by numerous factors beyond our control that may result in us not receiving an adequate return on invested capital to be profitable or viable.

The marketability of natural resources that may be acquired or discovered by us will be affected by numerous factors beyond our control. These factors include market fluctuations in oil and gas pricing and demand, the proximity and capacity of natural resource markets and processing equipment, governmental regulations, land lease tenure, land use, regulation concerning the importing and exporting of oil and gas, and environmental protection regulations. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in us not receiving an adequate return on invested capital to be profitable or viable.

Oil and gas operations are subject to comprehensive regulations that may cause substantial delays or require capital outlays in excess of those anticipated causing an adverse effect on our company.

Oil and gas operations are subject to federal, state, and local laws relating to the protection of the environment, including laws regulating removal of natural resources from the ground and the discharge of materials into the environment. Oil and gas operations are also subject to federal, state, and local laws and regulations that seek to maintain health and safety standards by regulating the design and use of drilling methods and equipment. Various permits from government bodies are required for drilling operations to be conducted; no assurance can be given that such permits will be granted. Environmental standards imposed by federal, state, or local authorities may be changed, and any such changes may have material adverse effects on our activities. Moreover, compliance with such laws may cause substantial delays or require capital outlays in excess of those anticipated, thus causing an adverse effect on our business operations. Additionally, we may be subject to liabilities for pollution or other environmental damages. We believe that our operations comply, in all material respects, with all applicable environmental and health and safety regulations. To date, we have not been required to spend any material amount on compliance with environmental and health and safety regulations. However, we may be required to do so in the future and this may affect our ability to expand or maintain our operations. Our operating partners maintain insurance coverage customary to the industry; however, we are not fully insured against all possible environmental and health and safety risks.

Oil and gas exploration and production activities are subject to certain environmental regulations that may prevent or delay the commencement or continuation of our operations.

In general, our oil and gas exploration and production activities are subject to certain federal, state and local laws and regulations relating to environmental quality and pollution control. Such laws and regulations increase the costs of these activities and may prevent or delay the commencement or continuation of a given operation. Compliance with these laws and regulations has not had a material effect on our operations or financial condition to date. Specifically, we are subject to legislation regarding emissions into the environment, water discharges and storage and disposition of hazardous wastes. In addition, legislation has been enacted which requires well and facility sites to be abandoned and reclaimed to the satisfaction of state authorities. However, such laws and regulations are frequently changed and we are unable to predict the ultimate cost of compliance. Generally, environmental requirements do not appear to affect us any differently or to any greater or lesser extent than other companies in the industry. We believe that our operations comply, in all material respects, with all applicable environmental regulations. Our operating partners maintain insurance coverage customary to the industry; however, we are not fully insured against all possible environmental risks.

Exploratory drilling involves many risks and we may become liable for pollution or other liabilities that may have an adverse effect on our financial position.

Drilling operations generally involve a high degree of risk. Hazards such as unusual or unexpected geological formations, power outages, labor disruptions, blow-outs, sour gas leakage, fire, inability to obtain suitable or adequate machinery, equipment or labor, and other risks are involved. We may become subject to liability for pollution or hazards against which we cannot adequately insure or against which we may elect not to insure. Incurring any such liability may have a material adverse effect on our financial position and operations.

Risks Relating to Our Series E Convertible Preferred Stock:

There are a large number of shares issuable upon conversion or redemption of our Series E Convertible Preferred Stock and the sale of these shares may depress the market price of our common stock.

As of December 1, 2006 we had 33,224,941 shares of common stock issued and outstanding and 17,500 shares of Series E Convertible Preferred Stock outstanding. In addition, we may be obligated to issue between 10,000,000 to approximately 14,970,060 shares of our common stock upon conversion or redemption of the outstanding Series E Convertible Preferred Stock. All of these shares of our common stock, including all of the shares issuable upon conversion or redemption of the Series E Convertible Preferred Stock may be sold without restriction. The sale of these shares may adversely affect the market price of our common stock.

The issuance of shares upon conversion or redemption of the Series E Convertible Preferred Stock may cause immediate and substantial dilution to our existing stockholders.

The issuance of shares upon conversion or redemption of the Series E Convertible Preferred Stock may result in substantial dilution to the interests of other stockholders since we may choose to pay for our redemption of the Series E Convertible Preferred Stock through issuance of our common stock and the selling stockholders may also choose to convert and sell the full amount issuable on conversion. The upper limit of the number of shares of our common stock that may be issued from conversion or redemption of Series E Convertible Preferred Stock is approximately 14,970,060 shares, which will have the effect of further diluting the proportionate equity interest and voting power of holders of our common stock, including investors in this offering.

The issuance of shares in the event of default under the terms of the Series E Convertible Preferred Stock may cause immediate and substantial dilution to our existing stockholders.

The issuance of shares upon conversion of the Series E Convertible Preferred Stock under circumstances involving specific events of default may result in substantial dilution to the interests of other stockholders. Under certain default circumstances the holders of the Series E Convertible Preferred Stock may elect conversion to common stock at a conversion price of \$0.50 per share. The upper limit of the number of shares of our common stock that may be issued from conversion of our Series E Convertible Preferred Stock under this circumstance is approximately 50,000,000 shares, which will have the effect of further diluting the proportionate equity interest and voting power of holders of our common stock, including certain investors in this offering.

Redemption of shares for cash under the terms of the Series E Convertible Preferred Stock may cause us to scale back or cease our operations if we are unable to obtain substitute funding under acceptable terms.

Enforcement of the mandatory redemption requirement under the terms of the Series E Convertible Stock would result in a monthly outflow of more than \$1 million and could have a material adverse effect on our financial position and operations.

Risks Relating to Our Shares of Common Stock

If we fail to remain current in our reporting requirements, we could be removed from the OTC Bulletin Board which would limit the ability of broker-dealers to sell our securities and the ability of stockholders to sell their securities in the secondary market.

Companies trading on the OTC Bulletin Board, such as us, must be reporting issuers under Section 12 of the Securities Exchange Act of 1934, as amended, and must be current in their reports under Section 13, in order to maintain price quotation privileges on the OTC Bulletin Board. If we fail to remain current on our reporting requirements, we could be removed from the OTC Bulletin Board. As a result, the market liquidity for our securities could be severely adversely affected by limiting the ability of broker-dealers to sell our securities and the ability of stockholders to sell their securities in the secondary market.

Our shares of common stock are subject to the penny stock rules of the Securities and Exchange Commission and the trading market in our securities is limited, which makes transactions in our shares of common stock cumbersome and may reduce the value of an investment in our shares of common stock.

The Securities and Exchange Commission has adopted Rule 15c-9 which establishes the definition of a penny stock, for the purposes relevant to us, as any equity security that has a market price of less than \$5.00 per share or with an exercise price of less than \$5.00 per share, subject to certain exceptions. For any transaction involving a penny stock, unless exempt, the rules require:

that a broker or dealer approve a person's account for transactions in penny stocks; and

the broker or dealer receive from the investor a written agreement to the transaction, setting forth the identity and quantity of the penny stock to be purchased.

In order to approve a person's account for transactions in penny stocks, the broker or dealer must:

obtain financial information and investment experience objectives of the person; and

make a reasonable determination that the transactions in penny stocks are suitable for that person and the person has sufficient knowledge and experience in financial matters to be capable of evaluating the risks of transactions in penny stocks.

The broker or dealer must also deliver, prior to any transaction in a penny stock, a disclosure schedule prescribed by the Securities and Exchange Commission relating to the penny stock market, which, in highlight form:

sets forth the basis on which the broker or dealer made the suitability determination; and

that the broker or dealer received a signed, written agreement from the investor prior to the transaction.

Generally, brokers may be less willing to execute transactions in securities subject to the penny stock rules. This may make it more difficult for investors to dispose of our shares of common stock and cause a decline in the market value of our shares of common stock.

Disclosure also has to be made about the risks of investing in penny stocks in both public offerings and in secondary trading and about the commissions payable to both the broker-dealer and the registered representative, current quotations for the securities and the rights and remedies available to an investor in cases of fraud in penny stock transactions. Finally, monthly statements have to be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stocks.

National Association of Securities Dealers Inc. sales practice requirements may also limit a stockholder's ability to buy and sell our shares of common stock.

In addition to the penny stock rules described above, the National Association of Securities Dealers Inc. has adopted rules that require that in recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer's financial status, tax status, investment objectives and other information. Under interpretations of these rules, the National Association of Securities Dealers Inc. believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. The National Association of Securities Dealers Inc. requirements make it more difficult for broker-dealers to recommend that their customers buy our shares of common stock, which may limit your ability to buy and sell our shares of common stock and have an adverse effect on the market for its shares.

USE OF PROCEEDS

The shares of common stock offered hereby are being registered for the account of the selling stockholders named in this prospectus. As a result, all proceeds from the sales of the common stock will go to the selling

stockholders and we will not receive any proceeds from the resale of the common stock by the selling stockholders. We will, however, incur all costs associated with this registration statement and prospectus.

MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Our common stock is quoted on the OTC Bulletin Board under the symbol "TREN". Prior to July 30, 2004, our common stock was quoted under the symbol "SBSY." Prior to March 24, 2003, our common stock was quoted under the symbol "IRVV."

For the periods indicated, the following table sets forth the high and low bid prices per share of common stock. The following quotations obtained from Stockwatch reflect the high and low bids for our shares of common stock based on inter-dealer prices, without retail mark-up, mark-down or commission and may not represent actual transactions.

Quarter Ended	High	Low
March 31, 2004	\$0.51	\$0.05
June 30, 2004	\$1.29	\$0.38
September 30, 2004 ⁽¹⁾	\$1.18	\$0.65
December 31, 2004	\$1.37	\$0.72
March 31, 2005	\$1.36	\$0.93
June 30, 2005	\$3.56	\$0.95
September 30, 2005	\$2.58	\$1.56
December 31, 2005	\$2.43	\$1.68
March 31, 2006	\$3.07	\$1.94
June 30, 2006	\$3.93	\$1.62
September 30, 2006	\$2.58	\$1.40

Holders

Our shares of common stock are issued in registered form. Computershare Trust Company, Inc., 350 Indiana Street, Suite 800, Golden, CO 80401 (Telephone: 303.262.0600; Facsimile: 303.262.0604) is the registrar and transfer agent for our shares of common stock.

On December 1, 2006, the shareholders list of our shares of common stock showed 129 registered holders of our shares of common stock and 33,224,941 shares of common stock outstanding. The number of record holders was determined from the records of our transfer agent and does not include beneficial owners of shares of common stock whose shares are held in the names of various security brokers, dealers, and registered clearing agencies.

Dividends

We have never declared or paid any cash dividends on our common stock. During the fiscal year ended March 31, 2006, we paid dividends of \$72,672 on our Series B Preferred Stock, all of which had been accrued during the previous fiscal year. During the fiscal year ended March 31, 2006, we accrued preferred stock dividends of \$308,442 on our Series C Preferred Stock (See Note 11 to our audited consolidated financial statements); and during the subsequent quarter ended June 30, 2006, we reached agreement with the purchaser of the Series C Preferred Stock to accept shares of common stock in lieu of cash payment of the aggregate accrued dividend due of \$343,712. We do not anticipate paying any cash dividends to common stockholders in the foreseeable future. In addition, any future determination to pay cash dividends will be at the discretion of the board of directors and will be dependent upon our

financial condition, results of operations, capital requirements, and such other factors as the board of directors deem relevant.

Equity Compensation Plan Information

The following table provides a summary of the number of options granted under our compensation plans, as well as options granted outside of our compensation plans, the weighted average exercise price and the number of options remaining available for issuance all as of September 30, 2006.

	Number of securities to be issued upon exercise of outstanding options	Weighted-Average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	N/A	N/A	N/A
Equity compensation plans not approved by security holders ⁽¹⁾	200,000 ⁽²⁾	\$0.50	Nil
Equity compensation plans not approved by security holders ⁽³⁾	2,500,000	\$1.47	Nil
Equity compensation plans not approved by security holders ⁽⁴⁾	725,000	\$2.78	Nil
Total	3,425,000	\$1.69	Nil

(2) Of the 800,000 options, 600,000 were granted outside of the non-qualified stock option plan. Please see the 2004 Non-Qualified Stock Option Plan section below.

(3) Referring to our 2005 equity incentive plan. Please see the 2005 Equity Incentive Plan section below.

(4) Referring to our 2006 equity incentive plan. Please see the 2006 Equity Incentive Plan section below.

2006 Equity Incentive Plan

On May 10, 2006, our board of directors adopted the 2006 Equity Incentive Plan for our executives, employees and outside consultants and advisors. Under the 2006 Equity Incentive Plan, executives, employees and outside consultants and advisors may receive awards as described in the 2006 Equity Incentive Plan. The purpose of the equity incentive plan is to provide long-term performance incentives to those key employees and consultants of our company and our subsidiaries who are largely responsible for the management, growth and protection of the business of our company and our subsidiaries. A maximum of 1,000,000 shares of our common stock are subject to the 2006 Equity Incentive Plan. As of September 30, 2006, 725,000 options with an average exercise price of \$2.78 per share had been granted under the 2006 Equity Incentive Plan to directors and to employees.

2005 Equity Incentive Plan

On March 17, 2005, our board of directors adopted the 2005 Equity Incentive Plan for our executives, employees and outside consultants and advisors. Under the 2005 Equity Incentive Plan, executives, employees and outside consultants and advisors may receive awards as described in the 2005 Equity Incentive Plan. The purpose of

the equity incentive plan is to provide long-term performance incentives to those key employees and consultants of our company and our subsidiaries who are largely responsible for the management, growth and protection of the business of our company and our subsidiaries. A maximum of 2,000,000 shares of our common stock is subject to the 2005 Equity Incentive Plan. As of December 31, 2005, a registration statement on Form S-8 was filed to register the common stock issuable under our 2005 Equity Incentive Plan with an amendment to increase the number of shares under the plan to 2,500,000. As of September 30, 2006, 2,500,000 options with an average exercise price of \$1.47 per share had been granted under the 2005 Equity Incentive Plan as further described below.

On April 1, 2005, 1,200,000 stock options were granted to directors and officers under the 2005 Equity Incentive Plan to purchase 1,200,000 shares of our common stock. On April 15, 2005, 300,000 stock options were granted to an officer of our subsidiary, Methane Energy Corp., under the 2005 Equity Incentive Plan to purchase 300,000 shares of our common stock with an exercise price of \$1.25 per share. On June 2, 2005, 200,000 stock options were granted to consultants under the 2005 Equity Incentive Plan to purchase 200,000 shares of our common stock with an exercise price of \$2.00 per share. On October 15, 2005, 250,000 stock options were granted to a newly hired employee of our subsidiary, Methane Energy Corp., under the 2005 Equity Incentive Plan to purchase 250,000 shares of our common stock with an exercise price of \$2.00 per share. On November 22, 2005 40,000 stock options were grant
