ATLAS CLOSES ON SALE OF GRASSY MOUNTAIN AND ANNOUNCES YEAR END FINANCIAL RESULTS  
-----

Denver, Colorado - Atlas Minerals Inc. (the "Company") announced today that, through its wholly-owned subsidiary, Atlas Precious Metals Inc. ("APMI"), it has completed the sale of the Grassy Mountain gold property located in northern Malheur County, Oregon to Seabridge Gold Inc. (formerly Seabridge Gold Resources, Inc.) and its wholly-owned subsidiary, Seabridge Gold Corporation (collectively "Seabridge"). From prior work, the property is known to host a gold mineral inventory of 17,217,000 tons at a grade of 0.061 ounce per ton of gold using a cutoff grade of 0.02 ounce per ton.

The Company originally entered into a purchase option agreement for the property with Seabridge in February 2000. This agreement was subsequently modified and amended on three different occasions, the latest being in December 2002. Under the final agreement ("Agreement"), the Company received a \$300,000 non-refundable option payment from Seabridge on December 20, 2002 in exchange for which Seabridge obtained the right to acquire the Grassy Mountain gold property for a final cash payment of \$600,000 due on or before March 31, 2003. During February 2003, the Company assigned all of its rights, title and interest in, to and under the Agreement to APMI. As the result, Seabridge made the final payment for purchase of the Grassy Mountain property to APMI.

The Company also announced today its financial results for the fiscal year ended December 31, 2002. The Company reports current assets of \$1.07 million and current liabilities of \$0.60 million. For the twelve-month period, the Company had a net loss of \$437,000 or \$0.07 per share. For the year, the Company had mining revenue of \$22,000 from the shipment of diatomaceous earth product from late September through December attributable to the start up of the White Cliffs diatomite mine located in Arizona. The Company had capital expenditures of \$204,000 during the year comprised almost entirely of the initial asset

## Edgar Filing: ATLAS MINERALS INC - Form 8-K

acquisition of White Cliffs and purchase of related mobile mining equipment.

Effective March 11, 2003, the Company merged its subsidiary, Atlas Gold Mining Inc. ("AGMI"), with and into APMI, with APMI remaining the surviving company. As a result of this merger, APMI now owns 100% of the gold processing mill and related facilities and infrastructure related to the Gold Bar mine in Eureka County, Nevada, previously held by AGMI.

As previously announced in September 2002, the Company entered into an exclusive option agreement (the "Option Agreement") to acquire 100% of the outstanding shares of Western Gold Resources, Inc., a private Florida company whose primary asset is the Estrades polymetallic mine located in northwestern Quebec. In January 2003, the Company assigned to APMI all of the rights, title and interest the Company had as Optionee under the Option Agreement. The parties have subsequently agreed to extend the option period under the Option Agreement, initially set to expire on March 31, 2003, to June 30, 2003. APMI is in the process of completing the due diligence of Western Gold Resources, Inc. and the Estrades mine. To date, no definitive decision regarding consummation of the proposed merger has been made, and there can be no guarantee that the proposed merger will be completed.

The Board of Directors approved April 29, 2003, as the date for the next annual general meeting of shareholders of the Company. The meeting is scheduled to be held in Denver, Colorado starting at 10:00 a.m. All information pertaining to the AGM was mailed to shareholders of record during the first week of April 2003.
