#### 1. Organization and Significant Accounting Policies

Western Asset Emerging Markets Income Fund II Inc. (the Fund ) was incorporated in Maryland and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended, (the 1940 Act ). The Fund s primary investment objective is to seek high current income. As a secondary objective, the Fund seeks capital appreciation. In pursuit of these objectives, the Fund under normal conditions invests at least 80% of its net assets, plus any borrowings for investment purposes, in debt securities of government and government related issuers located in emerging market countries (including participations in loans between governments and financial institutions), and of entities organized to restructure the outstanding debt of such issuers, and in debt securities of corporate issuers located in emerging market countries.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles ( GAAP ).

- (a) Investment Valuation. Debt securities are valued at the mean between the last quoted bid and asked prices provided by an independent pricing service that are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Equity securities for which market quotations are available are valued at the last sale price of official closing price on the primary market or exchange on which they trade. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market, and are valued at the mean between the bid and asked prices as of the close of business of that market. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund may value these investments at fair value as determined in accordance with the procedures approved by the Fund s Board of Directors. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates market value.
- (b) Reverse Repurchase Agreements. The Fund may enter into a reverse repurchase agreement in which the Fund sells a portfolio security at a specified price with an agreement to purchase the same or substantially the same security from the same counterparty at a fixed or determinable price at a future date. When entering into reverse repurchase agreements, the Fund s custodian delivers to the counterparty liquid assets, the market value of which, at the inception of the transaction, at least equals the repurchase price (including accrued interest). The Fund pays interest on amounts obtained pursuant to reverse repurchase agreements. Reverse repurchase agreements are considered to be borrowings, which may create leverage risk to the Fund.
- (c) Financial Futures Contracts. The Fund may enter into financial futures contracts typically to hedge a portion of the portfolio. Upon entering into a financial futures contract, the Fund is required to deposit cash or securities as initial margin, equal to a certain percentage of the contract amount (initial margin deposit). Additional securities are also segregated up to the current market value of the financial futures contracts. Subsequent payments, known as variation

margin, are made or received by the Fund each day, depending on the daily fluctuations in the value of the underlying financial instruments. The Fund recognizes an unrealized gain or loss equal to the daily variation margin. When the financial futures contracts are closed, a realized gain or loss is recognized equal to the difference between the proceeds from (or cost of) the closing transactions and the Fund s basis in the contracts.

The risks associated with entering into financial futures contracts include the possibility that a change in the value of the contract may not correlate with the changes in the value of the underlying financial instruments. In addition, investing in financial futures contracts involves the risk that the Fund could lose more than the initial margin deposit and subsequent payments required for a futures transaction. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

(d) Loan Participations. The Fund may invest in loans arranged through private negotiation between one or more financial institutions. The Fund s investment in any such loan may be in the form of a participation in or an assignment of the loan. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of set-off against the borrower and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation.

The Fund assumes the credit risk of the borrower, the lender that is selling the participation and any other persons interpositioned between the Fund and the borrower. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

(e) Credit and Market Risk. The Fund invests in high yield and emerging market instruments that are subject to certain credit and market risks. The yields of high yield and emerging market debt obligations reflect, among other

#### Notes to Schedule of Investments (unaudited) (continued)

things, perceived credit and market risks. The Fund s investment in securities rated below investment grade typically involves risks not associated with higher rated securities including, among others, greater risk related to timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The consequences of political, social, economic or diplomatic changes may have disruptive effects on the market prices of investments held by the Fund. The Fund s investment in non-dollar denominated securities may also result in foreign currency losses caused by devaluations and exchange rate fluctuations.

(f) Foreign Currency Translation. Investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the respective dates of such transactions.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, the possibility of lower levels of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability.

(g) Security Transactions. Security transactions are accounted for on a trade date basis.

#### 2. Investments

At August 31, 2007, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$ 10,431,114
Gross unrealized depreciation	(7,820,455)
Net unrealized appreciation	\$ 2,610,659

At August 31, 2007, the Fund had the following open futures contracts:

	Number of Contracts	Expiration Date	Basis Value	Market Value	Unrealized Gain (Loss)
Contracts to Buy: U.S. Treasury 5 Year Notes	585	12/07	\$ 62,195,081	\$ 62,421,328	\$ 226,247
Contracts to Sell: U.S Treasury 10 Year Notes	184	9/07	\$ 19,425,455	\$ 20,145,125	\$ (719,670)

U.S Treasury 10 Year Notes 726 12/07 78,858,432 79,168,031 (309,599) \$ (1,029,269)

**Net Unrealized Loss on Open Futures** 

**Contracts** \$ (803,022)

Transactions in reverse repurchase agreements for the Fund during the period ended August 31, 2007 were as follows:

Average<br/>Daily<br/>Balance\*Weighted<br/>Average<br/>Interest Rate\*Maximum<br/>Amount<br/>Outstanding\$38,665,0745.152%\$49,256,694

Interest rates on reverse repurchase agreements ranged from 1.000% to 5.200% during the period ended August 31, 2007.

<sup>\*</sup>Average based on the number of days that the Fund had reverse repurchase agreements outstanding.

### Notes to Schedule of Investments (unaudited) (continued)

At August 31, 2007, the Fund had the following reverse repurchase agreements outstanding:

Face			
Amount	Security		Value
7,350,000	Reverse Repurchase Agreement with JP Morgan, dated 6/13/07 bearing 5.100% to be repurchased at a date and amount to be determined, collateralized by: \$7,000,000 Pemex Project Funding Master Trust, 6.625% due 6/15/35; Market value (including accrued interest) - \$7,268,743	\$	7,350,000
4,843,200	Reverse Repurchase Agreement with Credit Suisse First Boston, dated 8/28/07 bearing 1.000% to be repurchased at a date and amount to be determined, collateralized by: \$3,519,000 Republic of Turkey, 11.875% due 1/15/30;  Market value (including accrued interest) - \$5,433,185	Ψ	4,843,200
7,038,500	Reverse Repurchase Agreement with JP Morgan, dated 8/31/07 bearing 5.150% to be repurchased at \$7,043,534 on 9/5/07, collateralized by: \$7,000,000 United Mexican States, 5.625% due 1/15/17;  Market value (including accrued interest) - \$7,058,151		7,038,500
