UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

x Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended March 31, 2010

or

o Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File Number: 0-24649

REPUBLIC BANCORP, INC.

(Exact name of registrant as specified in its charter)

Kentucky	**61-0862051**

(State of other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
601 West Market Street, Louisville, Kentucky (Address of principal executive offices)	**40202** (Zip Code)

(502) 584-3600

(Registrant s telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. x Yes o No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). o Yes o No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer o	Accelerated filer x
Non-accelerated filer o	Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). o Yes x No

Indicate the number of shares outstanding of each of the issuer s classes of common stock, as of the latest practicable date:

The number of shares outstanding of the registrant s Class A Common Stock and Class B Common Stock, as of April 23, 2010, was 18,509,995 and 2,308,974, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS MARCH 31, 2010 AND 2009 (UNAUDITED) AND DECEMBER 31, 2009

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation The consolidated financial statements include the accounts of Republic Bancorp, Inc. (the Parent Company) and its wholly-owned subsidiaries: Republic Bank & Trust Company (RB&T) and Republic Bank (collectively referred together with RB&T as the Bank), Republic Funding Company and Republic Invest Co. Republic Invest Co. includes its subsidiary, Republic Capital LLC. The consolidated financial statements also include the wholly-owned subsidiaries of RB&T: Republic Financial Services, LLC, TRS RAL Funding, LLC and Republic Insurance Agency, LLC. Republic Bancorp Capital Trust (RBCT) is a Delaware statutory business trust that is a wholly-owned unconsolidated finance subsidiary of Republic Bancorp, Inc. All companies are collectively referred to as Republic or the Company. All significant intercompany balances and transactions are eliminated in consolidation.

Republic operates 44 banking centers, primarily in the retail banking industry, and conducts its operations predominately in metropolitan Louisville, Kentucky, central Kentucky, northern Kentucky, southern Indiana, metropolitan Tampa, Florida, metropolitan Cincinnati, Ohio and through an Internet banking delivery channel. Republic s consolidated results of operations are primarily dependent upon net interest income, which represents the difference between the interest income and fees on interest-earning assets and the interest expense on interest-bearing liabilities. Principal interest-earning assets represent investment securities and real estate mortgage, commercial and consumer loans. Interest-bearing liabilities primarily consist of interest-bearing deposit accounts, securities sold under agreements to repurchase, as well as short-term and long-term borrowing sources.

Other sources of banking income include service charges on deposit accounts, debit card interchange fee income, title insurance commissions, fees charged to customers for trust services and revenue generated from Mortgage Banking activities. Mortgage Banking activities represent both the origination and sale of loans in the secondary market and the servicing of loans for others.

Republic s operating expenses consist primarily of salaries and employee benefits, occupancy and equipment expenses, communication and transportation costs, marketing and development expenses, Federal Deposit Insurance Corporation (FDIC) insurance expense, bank franchise tax expense, data processing, debit card processing expense and other general and administrative costs. Republic s results of operations are significantly impacted by general economic and competitive conditions, particularly changes in market interest rates, government laws and policies and actions of regulatory agencies.

Republic, through its Tax Refund Solutions (TRS) segment, is one of a limited number of financial institutions which facilitates the payment of federal and state tax refunds through third party tax-preparers located throughout the U.S., as well as tax-preparation software providers. The Company facilitates the payment of these tax refunds through three primary products: Electronic Refund Checks (ERCs), Electronic Refund Deposits (ERDs) and Refund Anticipation Loans (RALs). Substantially all of the business generated by TRS occurs in the first quarter of the year. TRS traditionally operates at a loss during the second half of the year, during which the segment incurs costs preparing for the upcoming tax season.

ERCs/ERDs are products whereby a tax refund is issued to the taxpayer after the Company has received the refund from the federal or state government. There is no credit risk or borrowing cost for the Company associated with these products because they are only delivered to the taxpayer upon receipt of the refund directly from the Internal Revenue Service (IRS). Fees earned on ERCs/ERDs are reported as non interest income under the line item Electronic Refund Check fees.

RALs are short-term consumer loans offered to taxpayers that are secured by the customer s anticipated tax refund, which represents the source of repayment. The Company underwrites the RAL application through an automated credit review process utilizing information contained in the taxpayer s tax return and the tax-preparer s history. If the application is approved, the Company advances the amount of the refund due on the taxpayer s return up to specified amounts less the loan fee due to the Company and, if requested by the taxpayer, the fees due for preparation of the return to the tax-preparer. As part of the RAL application process, each taxpayer signs an agreement directing the IRS to send the taxpayer s refund directly to the Company. The refund received from the IRS is used by the Company to pay off the RAL. Any amount due the taxpayer above the amount of the RAL is remitted to the taxpayer once the refund is received

by the Company. The funds advanced by the Company are generally repaid by the IRS within two weeks. The fees earned on RALs are reported as interest income under the line item Loans, including fees.

For additional discussion regarding TRS, see the following sections:

- *Part I Item 1 Financial Statements:*
- *Footnote 3 Loans and Allowance for Loan Losses*

Recently Issued Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board (FASB) amended previous guidance relating to transfers of financial assets and eliminates the concept of a qualifying special purpose entity. This guidance must be applied as of the beginning of each reporting entity s first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. This guidance must be applied to transfers occurring on or after the effective date. Additionally, on and after the effective date, the concept of a qualifying special-purpose entity is no longer relevant for accounting purposes. Therefore, formerly qualifying special-purpose entities should be evaluated for consolidation by reporting entities on and after the effective date in accordance with the applicable consolidation guidance. The disclosure provisions were also amended and apply to transfers that occurred both before and after the effective date of this guidance. The adoption of this guidance did not have a material impact on the Company s results of operations or financial position.

In June 2009, the FASB amended guidance for consolidation of variable interest entity guidance by replacing the quantitative-based risks and rewards calculation for determining which enterprise, if any, has a controlling financial interest in a variable interest entity with an approach focused on identifying which enterprise has the power to direct the activities of a variable interest entity that most significantly impact the entity s economic performance and (1) the obligation to absorb losses of the entity or (2) the right to receive benefits from the entity. Additional disclosures about an enterprise s involvement in variable interest entities are also required. This guidance is effective as of the beginning of each reporting entity s first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. The adoption of this guidance did not have a material impact on the Company s results of operations or financial position.

Reclassifications Certain amounts presented in prior periods have been reclassified to conform to the current period presentation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, the financial statements do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for fair presentation have been included. Operating results for three months ended March 31, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010. For further information, refer to the consolidated financial statements and footnotes thereto included in Republic s Form 10-K for the year ended December 31, 2009.

Table of Contents

2. INVESTMENT SECURITIES

Securities available for sale:

The gross amortized cost and fair value of securities available for sale and the related gross unrealized gains and losses recognized in accumulated other comprehensive income (loss) were as follows:

March 31, 2010 (in thousands)	Gross Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. Treasury securities and U.S. Government agencies	$ 66,077	$ 28	$ (328)	$ 65,777
Private label mortgage backed and other private label mortgage-related securities	7,663	164	(2,035)	5,792
Mortgage backed securities	202,771	8,945		211,716
Collateralized mortgage obligations	126,907	880	(137)	127,650
Total securities available for sale	$ 403,418	$ 10,017	$ (2,500)	$ 410,935

December 31, 2009 (in thousands)	Gross Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. Treasury securities and U.S. Government agencies	$ 48,000	$ 82	$	$ 48,082
Private label mortgage backed and other private label mortgage-related securities	8,085		(2,184)	5,901
Mortgage backed securities	227,792	10,362		238,154
Collateralized mortgage obligations	123,536	765	(127)	124,174
Total securities available for sale	$ 407,413	$ 11,209	$ (2,311)	$ 416,311

Mortgage backed Securities

At March 31, 2010, with the exception of the $5.8 million private label mortgage backed and other private label mortgage-related securities, substantially all of the mortgage backed securities held by the Company were issued by U.S. government-sponsored entities and agencies, primarily Federal Home Loan Mortgage Corporation (Freddie Mac or FHLMC) and Fannie Mae (FNMA), institutions which the government has affirmed its commitment to support. Because the decline in fair value of the mortgage backed securities is attributable to changes in interest rates and illiquidity, and not credit quality, and because the Company does not have the intent to sell these mortgage backed securities and it is likely that it will not be required to sell the securities before their anticipated recovery, the Company does not consider these securities to be other-than-temporarily impaired at March 31, 2010.

As mentioned throughout this filing, the Company s mortgage backed securities portfolio includes private label mortgage backed and other private label mortgage-related securities with a fair value of $5.8 million which had net unrealized losses of approximately $2.1 million at March 31, 2010. As of March 31, 2010, the Company believes there is no further credit loss component of other-than-temporary impairment

(OTTI) in addition to that which has already been recorded. Additionally, the Company does not have the intent to sell these securities and it is likely that it will not be required to sell the securities before their anticipated recovery.

The mortgage backed securities portfolio is predominantly backed by residential properties.

Table of Contents

Securities to be held to maturity:

The carrying value, gross unrecognized gains and losses, and fair value of securities to be held to maturity were as follows:

March 31, 2010 (in thousands)	Carrying Value	Gross Unrecognized Gains	Gross Unrecognized Losses	Fair Value
U.S. Treasury securities and U.S. Government agencies	$ 9,183	$ 211	$	$ 9,394
Obligations of states and political subdivisions	384	38		422

Total securities to be held to maturity	$ 49,296	$ 502	$ (67)	$ 49,731

December 31, 2009 (in thousands)	Carrying Value	Gross Unrecognized Gains	Gross Unrecognized Losses	Fair Value
U.S. Treasury securities and U.S. Government agencies	$ 9,187	$ 90	$	$ 9,277
Obligations of states and political subdivisions	384	38		422
Mortgage backed securities	2,748	108	(1)	2,855
Collateralized mortgage obligations	38,605	84	(108)	38,581
Total securities to be held to maturity	$ 50,924	$ 320	$ (109)	$ 51,135

Sales of Securities Available for Sale

During the three months ended March 31, 2010 and 2009, there were no sales or calls of securities available for sale.

Table of Contents

Market Loss Analysis

Securities with unrealized losses at March 31, 2010 and December 31, 2009, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, are as follows:

March 31, 2010 (in thousands)	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury securities and U.S. Government agencies	$ 35,263	$ (328)	$	$	$ 35,263	$ (328)
Private label mortgage backed and other private label mortgage-related securities	5,134	(2,035)			5,134	(2,035)
Mortgage backed securities, including Collateralized mortgage obligations	22,912	(75)	11,740	(129)	34,652	(204)
Total	$ 63,309	$ (2,438)	$ 11,740	$ (129)	$ 75,049	$ (2,567)

December 31, 2009 (in thousands)	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury securities and U.S. Government agencies	$	$	$	$	$	$
Private label mortgage backed and other private label mortgage-related securities	5,901	(2,184)			5,901	(2,184)
Mortgage backed securities, including Collateralized mortgage obligations	19,738	(64)	12,093	(172)	31,831	(236)
Total	$ 25,639	$ (2,248)	$ 12,093	$ (172)	$ 37,732	$ (2,420)

As of March 31, 2010, the Company s security portfolio consisted of 136 securities, 16 of which were in an unrealized loss position. The majority of unrealized losses are related to the Company s mortgage-backed and other securities, as discussed below:

Table of Contents

The amortized cost and fair value of the investment securities portfolio by contractual maturity at March 31, 2010 follows. Expected maturities may differ from contractual maturities if borrowers have the right to call or prepay obligations with or without call or prepayment penalties. Securities not due at a single maturity date are detailed separately.

March 31 2010, (in thousands)	Securities available for sale		Securities to be held to maturity	
	Amortized Cost	**Fair Value**	**Carrying Value**	**Fair Value**
Due in one year or less	$ 2,000	$ 2,021	$ 3,184	$ 3,387
Due from one year to five years			5,878	5,924

Collateralized mortgage obligations	126,907	127,650	37,123	37,182
Total	$ 403,418	$ 410,935	$ 49,296	$ 49,731

Other-than-temporary impairment (OTTI)

Unrealized losses for all investment securities are reviewed to determine whether the losses are other-than-temporary. Investment securities are evaluated for OTTI on at least a quarterly basis and more frequently when economic or market conditions warrant such an evaluation to determine whether a decline in their value below amortized cost is other-than-temporary. In conducting this assessment, the Company evaluates a number of factors including, but not limited to:

- The length of time and the extent to which fair value has been less than the amortized cost basis;
- The Company s intent to hold until maturity or sell the debt security prior to maturity;
- An analysis of whether it is more likely than not that the Company will be required to sell the debt security before its anticipated recovery;
- Adverse conditions specifically related to the security, an industry, or a geographic area;
- The historical and implied volatility of the fair value of the security;
- The payment structure of the security and the likelihood of the issuer being able to make payments;
- Failure of the issuer to make scheduled interest or principal payments;
- Any rating changes by a rating agency; and
- Recoveries or additional decline in fair value subsequent to the balance sheet date.

The term other-than-temporary is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value are not necessarily favorable, or that there is a general lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Once a decline in value is determined to be other-than-temporary, the value of the security is reduced and a corresponding charge to earnings is recognized for the anticipated credit losses.

Nationally, residential real estate values have declined significantly since 2007. These declines in value, coupled with the reduced ability of certain homeowners to refinance or repay their residential real estate obligations, have led to elevated delinquencies and losses in residential real estate loans. Many of these loans have previously been securitized and sold to investors as private label mortgage backed and other private label mortgage-related securities. The Company owned and continues to own four private label mortgage backed and other private label mortgage-related securities with an amortized cost of $7.7 million at March 31, 2010. All principal was written off for a fifth security previously owned by the Company, as losses on this security equaling Republic s principal ownership was passed through to the Company by the servicer/trustee. None of these private label securities are guaranteed by government agencies. Approximately $1.9 million (*Securities 1 through 3 in the table below*) of these securities are mostly backed by Alternative A first lien mortgage loans. The remaining $5.8 million (*Security 4 in the table below*) represents an asset backed security with an insurance wrap or guarantee. The average life of these securities is currently estimated to be approximately two years.

14

Table of Contents

Due to current market conditions, all of these assets remain extremely illiquid, and as such, the Company determined that these securities are Level 3 securities in accordance with FASB ASC topic 820, *Fair Value Measurements and Disclosures.* Based on this determination, the Company utilized an income valuation model (present value model) approach, in determining the fair value of these securities. This approach is beneficial for positions that are not traded in active markets or are subject to transfer restrictions, and/or where valuations are adjusted to reflect illiquidity and/or non-transferability. Such adjustments are generally based on available market evidence. In the absence of such evidence, management s best estimate is used. Management s best estimate consists of both internal and external support for these investments. *See Footnote 6, Fair Value for additional discussion.*

In April 2009, the FASB finalized three ASCs regarding the accounting treatment for investments including mortgage backed securities. These ASCs changed the method for determining if an OTTI exists and the amount of OTTI to be recorded through an entity s income statement. The changes brought about by the ASCs reflect a more accurate representation of the credit and noncredit components of an OTTI event. These ASCs were effective for financial statements issued for periods ending after June 15, 2009.

Prior to the second quarter of 2009, all unrealized losses related to the private label mortgage backed and other private label mortgage-related securities were transferred from accumulated other comprehensive loss to an immediate reduction of earnings classified as net impairment losses on investment securities in the consolidated statement of income and comprehensive income. With the adoption of the above mentioned ASCs as of April 1, 2009, the Company recorded a cumulative effect adjustment to retained earnings for all unrealized losses in the Company s private label mortgage backed and other private label mortgage-related securities which were deemed to be non-credit in nature with a corresponding adjustment to accumulated other comprehensive loss.

During the first quarter of 2009, prior to the adoption of the ASCs, the Company recognized total non cash OTTI charges to the income statement of $3.1 million for its private label mortgage backed securities and other private label mortgage-related securities.

The following table presents a rollforward of the credit losses recognized in earnings for the period ended March 31, 2010:

(in thousands)

Beginning balance, January 1, 2010	$	17,266
Pass through of actual losses		(1,836)
Amounts related to credit loss for which an other-than-temporary impairment was not previously recognized		69
Additions/Subtractions:		
Increases to the amount related to the credit loss for which other-than-temporary impairment was previously recognized		
Ending balance, March 31, 2010	$	15,499

Further deterioration in economic conditions could cause the Company to record additional impairment charges related to credit losses of up to $7.7 million, which is the current gross amortized cost of the Company s private label mortgage backed securities and other private label mortgage-related securities.

The following table details the credit ratings and the total impairment loss related to all other factors recorded as a component of accumulated other comprehensive income for the Company s private label mortgage backed and other private label mortgage-related securities as of March 31, 2010:

Table of Contents

(in thousands)	Amortized Cost	Fair Value	Gross Unrealized Gains / (Losses)	Cumulative Credit OTTI Losses	Ratings as of March 31, 2010 S&P	Fitch	Moody s
Security 1	$ 494	$ 658	$ 164	$ (8,446)	CC		Ca
Security 2	1,094	1,079	(15)	(3,272)	CC	C

3. LOANS AND ALLOWANCE FOR LOAN LOSSES

The composition of the loan portfolio follows:

(in thousands)	March 31, 2010	December 31, 2009
Residential real estate	$ 1,076,748	$ 1,097,311
Commercial real estate	647,005	641,451
Real estate construction	78,556	83,090
Commercial	101,119	104,274
Consumer	51,999	21,651
Overdrafts	1,468	2,006
Home equity	316,293	318,449
Total loans	2,273,188	2,268,232
Less: Allowance for loan losses	25,640	22,879
Loans, net	$ 2,247,548	$ 2,245,353

Activity in the allowance for loan losses follows:

	Three Months Ended March 31,	
(in thousands)	2010	2009
Allowance for loan losses at beginning of period	$ 22,879	$ 14,832
Charge offs - Banking	(1,993)	(895)
Charge offs - Tax Refund Solutions	(14,584)	(27,054)
Total charge offs	(16,577)	(27,949)
Recoveries - Banking	239	155
Recoveries - Tax Refund Solutions	2,309	5,175
Total recoveries	2,548	5,330
Net loan charge offs/recoveries - Banking	(1,754)	(740)
Net loan charge offs/recoveries - Tax Refund Solutions	(12,275)	(21,879)
Net loan charge offs/recoveries - Total Company	(14,029)	(22,619)
Provision for loan losses - Banking	2,777	22,008
Provision for loan losses - TRS	14,013	3,657
Provision for loan losses- Total Company	16,790	25,665
Allowance for loan losses at end of period	$ 25,640	$ 17,878

Table of Contents

Information regarding Republic s impaired loans follows:

(in thousands)	March 31, 2010	December 31, 2009
Loans with no allocated allowance for loan losses	$ 10,316	$ 10,995
Loans with allocated allowance for loan losses	38,761	37,851
Total impaired loans	$ 49,077	$ 48,846
Amount of the allowance for loan losses allocated	$ 4,510	$ 4,718
Average of individually impaired loans during the year	42,176	35,930
Interest income recognized during impairment		
Cash basis interest income recognized		

Republic defines impaired loans to be those commercial related loans that the Company has classified as doubtful (collection of total amount due is improbable) or loss (all or a portion of the loan has been written off or a specific allowance for loss has been provided) or otherwise meet the definition of impaired. Impaired loans also include loans accounted for as troubled debt restructurings (TDRs). As of March 31, 2010, the Company had allocated $3.1 million of specific reserves to customers whose loan terms have been modified in troubled debt restructurings. The Company had outstanding $38 million to customers whose loans were classified as a troubled debt restructuring, of which $11 million were on non-accrual status, as of March 31, 2010.

Detail of non-performing loans and non-performing assets follows:

(in thousands)	March 31, 2010	December 31, 2009
Loans on non-accrual status	$ 39,955	$ 43,136
Loans past due 90 days or more and still on accrual	4	8
Total non-performing loans	39,959	43,144
Other real estate owned	6,203	4,772
Total non-performing assets	$ 46,162	$ 47,916
Non-performing loans to total loans - Total Company	1.76%	1.90%
Non-performing loans to total loans - Banking Segment	1.78%	1.90%
Non-performing assets to total loans (including OREO)	2.03%	2.11%

The composition of non-performing loans by loan type follows:

(in thousands)	March 31, 2010	December 31, 2009
Residential real estate	$ 15,796	$ 14,832
Commercial real estate	12,540	16,850
Real estate construction	9,177	9,500
Commercial	481	647

Consumer		77		71
Home equity		1,888		1,244
Total non-performing loans	$	39,959	$	43,144

Non-accrual loans and loans past due 90 days or more and still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

Table of Contents

RAL Loss Reserves and Provision for Loan Losses:

At March 31st of each year the Company reserves for its estimated RAL losses for the year based on current year and historical funding patterns and based on information received from the IRS on current year payment processing. The Company charges off substantially all outstanding RALs by June 30th each year with subsequent collections recorded as recoveries.

Substantially all RALs issued by the Company each year are made during the first quarter. Losses associated with RALs result from the IRS not remitting taxpayer refunds to the Company associated with a particular tax return. This occurs for a number of reasons, including errors in the tax return, tax return fraud and tax debts not previously disclosed to the Company during its underwriting process. While the RAL application form is completed by the taxpayer in the tax-preparer s office, the credit approval criteria is established by TRS and the underwriting decision is made by TRS. TRS reviews and evaluates all tax returns to determine the likelihood of IRS payment. If any attribute of the tax return appears to fall outside of predetermined parameters, TRS will not originate the RAL.

Annually, TRS goal for RAL losses is to be below 1.0% of total RALs originated for a given calendar year. As of March 31, 2010, $18.5 million of total RALs originated were outstanding past their expected funding date from the IRS compared to $33.9 million at March 31, 2009, representing 0.63% and 1.38% of total gross RALs originated during the respective tax years. As a result, TRS recorded a net provision for loan loss expense of $14.0 million and $22.0 million during the first quarter of 2010 and 2009. Included as a reduction to the first quarter 2009 TRS provision for loan losses was $2.8 million representing a limited preparer-provided guarantee for RAL product performance. Despite the increase in origination volume, the decrease in the Company s provision for loan losses was largely due to improved underwriting criteria developed from the Company s 2009 tax season funding history from the IRS.

The Company s gross loss reserves for RALs equated to 0.55% and 1.01% of total RALs originated during the first quarter of each year. Based on the Company s 2010 RAL volume, each 0.10% increase in the loss rate for RALs represents approximately $3.0 million in additional provision for loan loss expense. The Company expects the actual loss rate realized will be less than the current uncollected amount, as the Company will continue to receive payments from the IRS throughout the year and make other collection efforts to obtain repayment on the RALs.

The following table illustrates the effect on the second quarter 2010 provision for loan losses of TRS if final losses of RALs differ from management s current estimate by as much as 5 basis points higher or 20 basis points lower:

As of March 31, 2010 (dollars in thousands)

Total RALs originated during the current year tax season:	$	2,967,798

If % of RALs That Do Not Payoff Changes	Provision for Loan Losses	Increase / (Decrease) In Provision For Loan Losses From Current Estimate
Increase 5 basis points	$ 15,497	$ 1,484
Current Estimate (Base)	14,013	

Decrease 5 basis points	12,529	(1,484)
Decrease 10 basis points	11,045	(2,968)
Decrease 15 basis points	9,561	(4,452)
Decrease 20 basis points	8,077	(5,936)

4. DEPOSITS

Ending deposit balances were as follows at March 31, 2010 and December 31, 2009:

(in thousands)	March 31, 2010	December 31, 2009
Demand (NOW and SuperNOW)	$ 257,835	$ 245,502
Money market accounts	607,177	590,134
Brokered money market accounts	65,400	64,608
Internet money market accounts	6,002	6,236
Savings	37,265	33,691
Individual retirement accounts*	34,909	34,651
Time deposits, $100,000 and over*	174,462	169,548
Other certificates of deposit*	131,542	135,171
Brokered certificates of deposit*	111,317	1,004,665
Total interest-bearing deposits	1,425,909	2,284,206
Total non interest-bearing deposits	473,221	318,275
Total	$ 1,899,130	$ 2,602,481

* - Represents time deposits

During the fourth quarter of 2009, the Company obtained $921 million in brokered certificates of deposits to be utilized to fund the first quarter 2010 RAL program. These brokered certificates of deposits had a weighted average life of three months with a weighted average interest rate of 0.51%. Also, during January of 2010, the Company obtained an additional $542 million in brokered certificates of deposits to fund additional RAL demand. These brokered certificates of deposits acquired in January had a weighted average life of 55 days and a weighted average interest rate of 0.56%. There were no brokered certificates outstanding at March 31, 2010 related to the RAL program

During March 2010, the Company obtained $25 million in brokered deposits to be utilized by the Traditional Bank for on-going funding needs. These deposits had a weighted average maturity of five years and a weighted average cost of 2.90%.

5. FEDERAL HOME LOAN BANK (FHLB) ADVANCES

At March 31, 2010 and December 31, 2009, FHLB advances outstanding were as follows:

(in thousands)	March 31, 2010	December 31, 2009

Putable fixed interest rate advances with a weighted average interest rate of 4.51%*(1)*	$	150,000	$	150,000
Fixed interest rate advances with a weighted average interest rate of 3.19% due through 2035		395,564		487,607
Total FHLB advances	$	545,564	$	637,607

(1) - Represents putable advances with the FHLB. These advances have original fixed rate periods ranging from one to five years with original maturities ranging from three to ten years if not put back to the Company earlier by the FHLB. At the end of their respective fixed rate periods and on a quarterly basis thereafter, the FHLB has the right to require payoff of the advances by the Company at no penalty. During the first quarter of 2007, the Company entered into $100 million of putable advances with a final maturity of 10 years and a fixed rate period of 3 years. Based on market conditions at this time, the Company does not believe that any of its putable advances are likely to be put back to the Company in the short-term by the FHLB.

Table of Contents

During the first quarter of 2010, the Company prepaid $87 million in FHLB advances. These advances had a weighted average cost of 3.48% and were all scheduled to mature between April 2010 and January 2011. The Company incurred a $1.5 million prepayment penalty in connection with this transaction.

Each FHLB advance is payable at its maturity date, with a prepayment penalty for fixed rate advances that are paid off earlier than maturity. FHLB advances are collateralized by a blanket pledge of eligible real estate loans. At March 31, 2010, Republic had available collateral to borrow an additional $215 million from the FHLB. In addition to its borrowing line with the FHLB, Republic also had unsecured lines of credit totaling $216 million available through various other financial institutions.

Aggregate future principal payments on FHLB advances, based on contractual maturity dates are detailed below:

Year		**(in thousands)**
2010	$	
2011		75,000
2012		110,000
2013		66,000
2014		168,000
Thereafter		126,564
Total	$	545,564

The following table illustrates real estate loans pledged to collateralize advances and letters of credit with the FHLB:

(in thousands)		**March 31, 2010**		**December 31, 2009**
First lien, single family residential real estate	$	658,431	$	733,511
Home equity lines of credit		70,181		91,014
Multi-family commercial real estate		19,664		38,526

Table of Contents

6. FAIR VALUE

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair values:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity s own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Company used the following methods and significant assumptions to estimate the fair value of each type of financial instrument:

Securities available for sale: For all securities available for sale, excluding private label mortgage backed and other private label mortgage-related securities, fair value is typically determined by matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities, but rather by relying on the securities relationship to other benchmark quoted securities (Level 2 inputs). With the exception of private label mortgage backed and other private label mortgage-related securities securities, all securities available for sale are classified as Level 2 in the fair value hierarchy.

In April 2009, the FASB finalized three ASCs regarding the accounting treatment for investments including mortgage backed securities. These ASCs changed the method for determining if an OTTI exists and the amount of OTTI to be recorded through an entity s income statement. The changes brought about by the ASCs reflect a more accurate representation of the credit and noncredit components of an OTTI event. These ASCs were effective for financial statements issued for periods ending after June 15, 2009. The Company recognized a $1.8 million cumulative effect of initially applying FASB ASC topic 320 *Investments Debt and Equity Securities*, as an adjustment to retained earnings at April 1, 2009, with a corresponding adjustment to accumulated other comprehensive income. Due to current market conditions, all of these assets are extremely illiquid, and as such, the Company determined that these securities are Level 3 securities in accordance with FASB ASC topic 820, *Fair Value Measurements and Disclosures.* Based on this determination, the Company utilized an income valuation model (present value model) approach, in determining the fair value of these securities.

See Footnote 2 Investment Securities for additional discussion regarding the Company s private label mortgage backed and other private label mortgage-related securities.

Derivative instruments: Mortgage Banking derivatives used in the ordinary course of business consist of mandatory forward sales contracts (forward contracts) and rate lock loan commitments. The fair value of the Company s derivative instruments is primarily measured by obtaining pricing from broker-dealers recognized to be market participants. The pricing is derived from market observable inputs that can generally be verified and do not typically involve significant judgment by the Company. Forward contracts and rate lock loan commitments are classified as Level 2 in the fair value hierarchy.

Mortgage loans held for sale: The fair value of mortgage loans held for sale is determined using quoted secondary market prices. Mortgage loans held for sale are classified as Level 2 in the fair value hierarchy.

Impaired Loans: The fair value of impaired loans with specific allocations of the allowance for loan losses is generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal

Table of Contents

process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are typically significant and result in a Level 3 classification of the inputs for determining fair value.

Other Real Estate Owned: Nonrecurring adjustments to certain commercial and residential real estate properties classified as other real estate owned are measured at the lower of carrying amount or fair value, less costs to sell. Fair values are generally based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Mortgage Servicing Rights: The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income. The Company is able to compare the valuation model inputs and results to widely available published industry data for reasonableness. Mortgage servicing rights are classified as Level 2 in the fair value hierarchy.

Assets and liabilities measured at fair value under on a recurring basis, including financial assets and liabilities for which the Company has elected the fair value option, are summarized below:

		Fair Value Measurements at March 31, 2010 Using:			
(in thousands)	**Carrying Value**	**Quoted Prices in Active Markets for Identical Assets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**	**Total Fair Value**
Securities available for sale:

Mortgage servicing rights	8,430		10,475		10,475

The following section details impairment charges recognized during the period:

The Company recorded realized impairment losses related to its Level 3 private label mortgage backed and other private label mortgage-related securities totaling $0 and $3.1 million for the three months ended March 31, 2010 and 2009. *See Footnote 2 Investment Securities for additional detail.*

At March 31, 2010 and December 31, 2009, impaired loans, which are measured for impairment using the fair value of the collateral for collateral dependent loans, had a carrying amount of $49 million, with a valuation allowance of $5 million.

At March 31, 2010 and December 31, 2009, other real estate owned, which is measured at the lower of carrying or fair value less costs to sell, had a net had a carrying amount of $1.3 million and $1.3 million, which is comprised of the outstanding balance of $6.1 million and $2.1 million, net of valuation allowances of $4.8 million and $799,000, respectively.

Mortgage servicing rights (MSR s), which are carried at lower of cost or fair value, were written down $1.3 million during the fourth quarter of 2008 related to the impairment of six of the 24 tranches within the portfolio. Due primarily to a decline in the expected prepayment speed of the Company s sold loan portfolio with servicing retained, the fair value of the Company s MSRs increased during 2009. As a result of this increase, the Company reduced its corresponding valuation allowance by $1.1 million during the first quarter of 2009 and an additional $122,000 during

the second quarter of 2009. No MSR valuation allowance existed at December 31, 2009 and March 31, 2010.

Table of Contents

The carrying amounts and estimated fair values of financial instruments, at March 31, 2010 and December 31, 2009 follows:

	March 31, 2010		December 31, 2009	
(in thousands)	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:				
Cash and cash equivalents	$ 322,291	$ 322,291	$ 1,068,179	$ 1,068,179
Securities available for sale	410,935	410,935	416,311	416,311
Securities to be held to maturity	49,296	49,731	50,924	51,135
Mortgage loans held for sale	5,801	5,801	5,445	5,445
Loans, net	2,247,548	2,472,078	2,245,353	2,259,654
Federal Home Loan Bank stock	26,274	26,274	26,248	26,248
Accrued interest receivable	9,596	9,596	10,049	10,049
Liabilities:				
Deposits:				
Non interest-bearing accounts	473,221	473,221	318,275	318,275
Transaction accounts	973,679	973,679	940,171	940,171
Time deposits	452,230	456,895	1,344,035	1,349,268
Securities sold under agreements to repurchase and other short-term borrowings	275,111	275,111	299,580	299,580
Subordinated note	41,240	41,148	41,240	41,148
Federal Home Loan Bank advances	545,564	540,343	637,607	636,600
Accrued interest payable	2,420	2,420	2,888	2,888

The methods and assumptions used to estimate fair value are described as follows:

Carrying amount is the estimated fair value for cash and cash equivalents, accrued interest receivable and payable, demand deposits, short-term debt, and variable rate loans or deposits that reprice frequently and fully. The methods for determining the fair values for securities and mortgage loans held for sale were described previously. For fixed rate loans or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk. Fair value of debt is based on current rates for similar financing. It was not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability. The fair value of off balance sheet items is not considered material.

The fair value estimates presented herein are based on pertinent information available to management as of March 31, 2010 and December 31, 2009. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date and, therefore, estimates of fair value may differ significantly from the amounts presented.

Table of Contents

7. MORTGAGE BANKING ACTIVITIES

Activity for mortgage loans held for sale was as follows:

(in thousands)	March 31, 2010	March 31, 2009
Balance, beginning of period	$ 5,445	$ 11,298
Origination of mortgage loans held for sale	49,109	183,563
Proceeds from the sale of mortgage loans held for sale	(49,621)	(187,336)
Net gain in sale of mortgage loans held for sale	868	3,974
Balance, end of period	$ 5,801	$ 11,499

Mortgage banking activities primarily include residential mortgage originations and servicing. The following table presents the components of Mortgage Banking income:

(in thousands)	March 31, 2010	March 31, 2009
Net gain on sale of mortgage loans held for sale	$ 868	$ 3,974
Change in mortgage servcing rights valuation allowance		1,133
Loan servicing income, net of amortization	144	(933)
Mortgage banking income	$ 1,012	$ 4,174

Activity for capitalized mortgage servicing rights was as follows:

(in thousands)	March 31, 2010	March 31, 2009
Balance, beginning of period	$ 8,430	$ 5,809
Additions	489	1,604
Amortized to expense	(627)	(1,601)
Change in valuation allowance		1,133
Balance, end of period	$ 8,292	$ 6,945

Activity for the valuation allowance for capitalized mortgage servicing rights was as follows:

(in thousands)	March 31, 2010	March 31, 2009
Balance, beginning of period	$	$ (1,255)
Additions to expense		

Reductions credited to operations			1,133
Direct write downs			
Balance, end of period	$	$	(122)

The fair value of MSRs was $10.4 million and $10.5 million at March 31, 2010 and December 31, 2009. The fair value at March 31, 2010 was calculated using a discount rate of 9% with prepayment speeds ranging from 191% to 374%, depending on the stratification of the specific MSR, and a weighted average default rate of 1.50%. The fair value for year end 2009 was calculated using a discount rate of 9% with prepayment speeds ranging from 170% to 379%, depending on the stratification of the specific MSR, and a weighted average default rate of 1.50%.

Mortgage Banking derivatives used in the ordinary course of business consist of mandatory forward sales contracts and rate lock loan commitments. Mandatory forward contracts represent future commitments to deliver loans at a specified

Table of Contents

price and date and are used to manage interest rate risk on loan commitments and mortgage loans held for sale. Rate lock loan commitments represent commitments to fund loans at a specific rate. These derivatives involve underlying items, such as interest rates, and are designed to transfer risk. Substantially all of these instruments expire within 90 days from the date of issuance. Notional amounts are amounts on which calculations and payments are based, but which do not represent credit exposure, as credit exposure is limited to the amounts required to be received or paid.

The Company adopted FASB ASC topic 815, *Derivative and Hedging* at the beginning of the first quarter of 2009, and has included the expanded disclosures required by that statement.

The following tables include the notional amounts and realized gain (loss) for Mortgage Banking derivatives recognized in Mortgage Banking income as of March 31, 2010 and December 31, 2009:

(in thousands)	**March 31, 2010**	**December 31, 2009**
Mandatory forward contracts:		
Notional amount	$ 31,200	$ 32,270
Change in fair value of mandatory forward contracts	47	616
Rate lock loan commitments:		
Notional amount	$ 31,522	$ 28,734
Change in fair value of rate lock loan commitments	63	(338)

Mandatory forward contracts also contain an element of risk in that the counterparties may be unable to meet the terms of such agreements. In the event the counterparties fail to deliver commitments or are unable to fulfill their obligations, the Company could potentially incur significant additional costs by replacing the positions at then current market rates. The Company manages its risk of exposure by limiting counterparties to those banks and institutions deemed appropriate by management and the Board of Directors. The Company does not expect any counterparty to default on their obligations and therefore, the Company does not expect to incur any cost related to counterparty default.

The Company is exposed to interest rate risk on loans held for sale and rate lock loan commitments. As market interest rates fluctuate, the fair value of mortgage loans held for sale and rate lock commitments will decline or increase. To offset this interest rate risk, the Company enters into derivatives such as mandatory forward contracts to sell loans. The fair value of these mandatory forward contracts will fluctuate as market interest rates fluctuate, and the change in the value of these instruments is expected to largely, though not entirely, offset the change in fair value of loans held for sale and rate lock commitments. The objective of this activity is to minimize the exposure to losses on rate loan lock commitments and loans held for sale due to market interest rate fluctuations. The net effect of derivatives on earnings will depend on risk management activities and a variety of other factors, including market interest rate volatility, the amount of rate lock commitments that close, the ability to fill the forward contracts before expiration, and the time period required to close and sell loans.

Table of Contents

8. OFF BALANCE SHEET RISKS, COMMITMENTS AND CONTINGENT LIABILITIES

Republic, in the normal course of business, is party to financial instruments with off balance sheet risk. These financial instruments primarily include commitments to extend credit and standby letters of credit. The contract or notional amounts of these instruments reflect the potential future obligations of Republic pursuant to those financial instruments. Creditworthiness for all instruments is evaluated on a case by case basis in accordance with Republic s credit policies. Collateral from the customer may be required based on the Company s credit evaluation of the customer and may include business assets of commercial customers, as well as personal property and real estate of individual customers or guarantors.

Republic also extends binding commitments to customers and prospective customers. Such commitments assure the borrower of financing for a specified period of time at a specified rate. The risk to Republic under such loan commitments is limited by the terms of the contracts. For example, Republic may not be obligated to advance funds if the customer s financial condition deteriorates or if the customer fails to meet specific covenants. An approved but unfunded loan commitment represents a potential credit risk once the funds are advanced to the customer. Unfunded loan commitments also represent liquidity risk since the customer may demand immediate cash that would require funding and interest rate risk as market interest rates may rise above the rate committed. In addition, since a portion of these loan commitments normally expire unused, the total amount of outstanding commitments at any point in time may not require future funding.

As of March 31, 2010, exclusive of Mortgage Banking loan commitments, Republic had outstanding loan commitments of $570 million, which included unfunded home equity lines of credit totaling $305 million. As of December 31, 2009, exclusive of Mortgage Banking loan commitments, Republic had outstanding loan commitments of $479 million, which included unfunded home equity lines of credit totaling $301 million. These commitments generally have open ended maturities and variable rates. At March 31, 2010 rates primarily ranged from 3.00% to 7.50% with a weighted average rate of 4.84%.

Standby letters of credit are conditional commitments issued by Republic to guarantee the performance of a customer to a third party. The terms and risk of loss involved in issuing standby letters of credit are similar to those involved in issuing loan commitments and extending credit. Commitments outstanding under standby letters of credit totaled $10 million and $12 million at March 31, 2010 and December 31, 2009. In addition to credit risk, the Company also has liquidity risk associated with standby letters of credit because funding for these obligations could be required immediately. The Company does not deem this risk to be material.

At March 31, 2010 and December 31, 2009, Republic had a $10 million letter of credit from the FHLB issued on behalf of one RB&T client. This letter of credit was used as a credit enhancement for a client bond offering and reduced RB&T s available borrowing line at the FHLB. The Company uses a blanket pledge of eligible real estate loans to secure the letter of credit.

Table of Contents

9. EARNINGS PER SHARE

Class A and Class B shares participate equally in undistributed earnings. The difference in earnings per share between the two classes of common stock results solely from the 10% per share cash dividend premium paid on Class A Common Stock over that paid on Class B Common Stock. The Class A Common shares are entitled to cash dividends equal to 110% of the cash dividend paid per share on Class B Common Stock. Class A Common shares have one vote per share and Class B Common shares have ten votes per share. Class B Common shares may be converted, at the option of the holder, to Class A Common shares on a share for share basis. The Class A Common shares are not convertible into any other class of Republic s capital stock.

A reconciliation of the combined Class A and Class B Common Stock numerators and denominators of the earnings per share and diluted earnings per share computations is presented below:

	Three Months Ended March 31,	
(in thousands, except per share data)	**2010**	**2009**
Net income	$ 44,628	$ 25,759
Weighted average shares outstanding	20,814	20,662
Effect of dilutive securities	58	170
Average shares outstanding including dilutive securities	20,872	20,832
Basic earnings per share:		
Class A Common Share	$ 2.15	$ 1.25
Class B Common Share	2.13	1.24
Diluted earnings per share:		
Class A Common Share	$ 2.14	$ 1.24
Class B Common Share	2.13	1.23

Stock options excluded from the detailed earnings per share calculation because their impact was antidilutive are as follows:

	Three Months Ended March 31,	
	2010	**2009**
Antidilutive stock options	673,444	665,644

10. SEGMENT INFORMATION

The reportable segments are determined by the type of products and services offered, distinguished between Traditional Banking, Mortgage Banking and Tax Refund Solutions (TRS). They are also distinguished by the level of information provided to the chief operating decision maker, who uses such information to review performance of various components of the business (such as branches and subsidiary banks), which are then aggregated if operating performance, products/services, and customers are similar. Loans, investments and deposits provide the majority of the net revenue from Traditional Banking operations; servicing fees and loan sales provide the majority of revenue from Mortgage Banking operations; RAL fees and ERC/ERD fees provide the majority of the revenue from TRS. All Company operations are domestic.

The accounting policies used for Republic s reportable segments are the same as those described in the summary of significant accounting policies. Segment performance is evaluated using operating income. Goodwill is not allocated. Income taxes are allocated based on income before income tax expense. Transactions among reportable segments are made at fair value.

For additional discussion regarding TRS, see the following sections:

- *Part I Item 1 Financial Statements:*
- *Footnote 1 Basis of Presentation and Summary of Significant Accounting Policies*
- *Footnote 3 Loans and Allowance for Loan Losses*
- *Footnote 11 Regulatory Matters*
- *Part I Item 1A Risk Factors of the Company s 2009 Annual Report on Form 10-K*

Table of Contents

11. REGULATORY MATTERS

During the first quarter of 2009, RB&T made public its Community Reinvestment Act Performance Evaluation (the CRA Evaluation). The CRA Evaluation assesses RB&T s initiatives and performance that are designed to help meet the credit needs of the areas it serves, including low and moderate-income individuals, neighborhoods and businesses. The CRA Evaluation also includes a review of RB&T s community development services and investments in RB&T s assessment areas.

RB&T received High Satisfactory ratings on the Investment Test component and the Service Test component evaluated as part of the CRA Evaluation. Based on issues identified within RB&T s Refund Anticipation Loan (RAL) program, RB&T received a Needs to Improve rating on the Lending Test component, and as a result, a Needs to Improve rating on its overall rating.

Effective February 25, 2009, RB&T entered into a Stipulation and Consent Agreement with the FDIC agreeing to the issuance of a Cease and Desist Order (the Order) predominately related to required improvements and increased oversight of RB&T s compliance management system. The Company filed the final Order as Exhibit 10.62 of its 2008 Annual Report on Form 10-K.

As stated in the CRA Evaluation, the FDIC concluded that RB&T violated Regulation B (Reg B), which implements the Equal Credit Opportunity Act (ECOA), specifically related to RB&T s tax refund business and its RAL program. The Reg B issues involved RB&T s requirement that both spouses who file a joint tax return sign a RAL proceeds check, even if one spouse opted out of the RAL transaction. The RAL is ultimately repaid to RB&T by the IRS with funds made payable to both spouses. The Reg B issues also involved a claim that in 2008 one electronic return originator (ERO) did not allow spouses to opt out of RAL transactions. In 2008, which is the period covered by the FDIC s CRA Evaluation, RB&T offered its tax related products through over 8,000 EROs nationwide.

In response to the CRA Evaluation, RB&T changed certain procedures and processes to address the Reg B issues raised by the FDIC. By statute, a financial holding company, such as the Company, that controls a Bank with a Needs to Improve CRA rating has limitations on certain future business activities, including the ability to branch and to make acquisitions, until its CRA rating improves. As also required by statute, the FDIC referred their conclusions regarding the alleged Reg B violations to the Department of Justice (DOJ). During the second quarter of 2009, the Company was notified that the DOJ had referred the Reg B issue back to the FDIC for administrative handling with no further corrective action required by the DOJ. At this time, the FDIC has not required any further corrective actions by RB&T above and beyond those listed in the Order.

The Order cites insufficient oversight of RB&T s consumer compliance programs, most notably in RB&T s RAL program. The Order requires increased compliance oversight of the RAL program by RB&T s management and board of directors, which is subject to review and approval by the FDIC. Under the Order, RB&T must increase its training and audits of its ERO partners, who make RB&T s tax products available to taxpayers across the nation. In addition, various components of the Order require RB&T to meet certain implementation, completion and reporting timelines, including the establishment of a compliance management system to appropriately assess, measure, monitor and control third party risk and ensure compliance with consumer laws.

In addition to the compliance issues cited in regard to the RAL program, the Order also required RB&T to correct Home Mortgage Disclosure Act (HMDA) reporting errors. As part of the Order, RB&T made corrections to its 2007 and 2006 HMDA reporting, in December of 2008. As a

result of the errors in its 2007 and 2006 HMDA reporting, RB&T paid a $22,000 civil money penalty during the first quarter of 2009.

The Order also reflected other alleged consumer compliance violations. RB&T has addressed these other alleged violations and management believes it has implemented all necessary and required corrective actions regarding these items in accordance with the expectations of its regulator.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations.

Management s Discussion and Analysis of Financial Condition and Results of Operations of Republic Bancorp, Inc. (Republic or the Company) analyzes the major elements of Republic s consolidated balance sheets and statements of income. Republic, a bank holding company headquartered in Louisville, Kentucky, is the Parent Company of Republic Bank & Trust Company, (RB&T), Republic Bank (collectively referred together with RB&T as the Bank), Republic Funding Company and Republic Invest Co. Republic Invest Co. includes its subsidiary, Republic Capital LLC. The consolidated financial statements also include the wholly-owned subsidiaries of RB&T: Republic Financial Services, LLC, TRS RAL Funding, LLC and Republic Insurance Agency, LLC. Republic Bancorp Capital Trust is a Delaware statutory business trust that is a 100%-owned unconsolidated finance subsidiary of Republic Bancorp, Inc. Management s Discussion and Analysis of Financial Condition and Results of Operations of Republic should be read in conjunction with Part I Item 1 *Financial Statements.*

This discussion includes various forward-looking statements with respect to credit quality, including but not limited to, delinquency trends and the adequacy of the allowance for loan losses, segments, corporate objectives, the Company s interest rate sensitivity model and other financial and business matters. Broadly speaking, forward-looking statements may include:

- projections of revenue, expenses, income, losses, earnings per share, capital expenditures, dividends, capital structure or other financial items;
- descriptions of plans or objectives for future operations, products or services;
- forecasts of future economic performance; and
- descriptions of assumptions underlying or relating to any of the foregoing.

The Company may make forward-looking statements discussing management s expectations about various matters, including:

- delinquencies, future credit losses, non-performing loans and non-performing assets;
- further developments in the Company s ongoing review of and efforts to resolve possible problem credit relationships, which could result in, among other things, additional provisions to the allowance for loans losses;
- deteriorating credit quality, including changes in the interest rate environment and reducing interest margins;
- the overall adequacy of the allowance for loans losses;
- future short-term and long-term interest rates and the respective impact on net interest margin, net interest spread, net income, liquidity and capital;
- the future regulatory viability of the Tax Refund Solutions (TRS) business operating segment;

- anticipated future funding sources for TRS;
- potential impairment of investment securities;
- the future value of mortgage servicing rights;
- the impact of new accounting pronouncements;
- legal and regulatory matters including results and consequences of regulatory actions and examinations;
- future capital expenditures;
- the strength of the U.S. economy in general and the strength of the local economies in which the Company conducts operations; and
- inflation, interest rate, market and monetary fluctuations and the Bank s ability to maintain current deposit and loan levels at current interest rates.

Forward-looking statements discuss matters that are not historical facts. As forward-looking statements discuss future events or conditions, the statements often include words such as anticipate, believe, estimate, expect, intend, plan, project, target, can, could, may, similar expressions. Do not rely on forward-looking statements. Forward-looking statements detail management s expectations regarding the future and are not guarantees. Forward-looking statements are assumptions based on information known to management only as of the date the statements are made and management may not update them to reflect changes that occur subsequent to the date the statements are made. See additional discussion under *Part I Item 1A Risk Factors* of the Company 2009 Annual Report on Form 10-K.

As used in this report, the terms Republic, the Company, we, our and us refer to Republic Bancorp, Inc., and, where the context requires, Republic Bancorp, Inc. and its subsidiaries; and the term the Bank refers to the Company s subsidiary banks: Republic Bank & Trust Company and Republic Bank.

Table of Contents

BUSINESS SEGMENT COMPOSITION

As of March 31, 2010, the Company was divided into three distinct segments: Traditional Banking, Tax Refund Solutions and Mortgage Banking.

Net income, total assets and net interest margin by segment for the three months ended March 31, 2010 and 2009 are presented below:

	Three Months Ended March 31, 2010			
(in thousands)	Traditional Banking	Tax Refund Solutions	Mortgage Banking	Total Company
Net income	$ 2,775	$ 41,713	$ 140	$ 44,628
Segment assets	3,019,385	147,209	14,401	3,180,995
Net interest margin	3.78%	NM	NM	7.27%

	Three Months Ended March 31, 2009			
(in thousands)	Traditional Banking	Tax Refund Solutions	Mortgage Banking	Total Company
Net income	$ 2,131	$ 20,885	$ 2,743	$ 25,759
Segment assets	3,180,121	137,555	19,969	3,337,645
Net interest margin	3.85%	NM	NM	8.12%

NM Not Meaningful

(I) Traditional Banking

As of March 31, 2010, Republic had 44 full-service banking centers with 35 located in Kentucky, five located in metropolitan Tampa, Florida, three located in southern Indiana and one located in metropolitan Cincinnati, Ohio. RB&T s primary market areas are located in metropolitan Louisville, Kentucky, central Kentucky, northern Kentucky and southern Indiana. Louisville, the largest city in Kentucky, is the location of Republic s headquarters, as well as 20 banking centers. RB&T s central Kentucky market includes 12 banking centers in the following Kentucky cities: Bowling Green (1); Elizabethtown (1); Frankfort (1); Georgetown (1); Lexington, the second largest city in Kentucky (5); Owensboro (2); and Shelbyville (1). RB&T s northern Kentucky market includes banking centers in Covington, Florence and Independence. RB&T also has banking centers located in Floyds Knobs, Jeffersonville and New Albany, Indiana. Republic Bank has locations in Hudson, New Port Richey, Palm Harbor, Port Richey and Temple Terrace, Florida, as well as metropolitan Cincinnati, Ohio.

(II) Tax Refund Solutions (TRS)

Republic, through its TRS segment, is one of a limited number of financial institutions which facilitates the payment of federal and state tax refunds through third party tax-preparers located throughout the U.S., as well as tax preparation software providers. The Company facilitates the payment of these tax refunds through three primary products: Electronic Refund Checks (ERCs), Electronic Refund Deposits (ERDs) and Refund Anticipation Loans (RALs). Substantially all of the business generated by TRS occurs in the first quarter of the year.

ERCs/ERDs are products whereby a tax refund is issued to the taxpayer after the Company has received the refund from the federal or state government. There is generally no credit risk or borrowing cost for the Company associated with these products because they are only delivered to the taxpayer upon receipt of the refund directly from the Internal Revenue Service (IRS). Fees earned on ERCs/ERDs are reported as non interest income under the line item Electronic Refund Check fees.

RALs are short-term consumer loans offered to taxpayers that are secured by the customer s anticipated tax refund, which

represents the source of repayment. The Company underwrites the RAL application through an automated credit review process utilizing information contained in the taxpayer s tax return and the tax-preparer s history. If the application is approved, the Company advances the amount of the refund due on the taxpayer s return up to specified amounts less the loan fee due to the Company and, if requested by the taxpayer, the fees due for preparation of the return to the tax-preparer. As part of the RAL application process, each taxpayer signs an agreement directing the IRS to send the taxpayer s refund directly to the Company. The refund received from the IRS is used by the Company to pay off the RAL. Any amount due the taxpayer above the amount of the RAL is remitted to the taxpayer once the refund is received by the Company. The funds advanced by the Company are generally repaid by the IRS within two weeks. The fees earned on RALs are reported as interest income under the line item Loans, including fees.

The Company has agreements with Jackson Hewitt Inc. (JHI) and Jackson Hewitt Technology Services LLC (JHTSL), both subsidiaries of Jackson Hewitt Tax Service Inc. (referred to collectively as JH), and Liberty Tax Service (Liberty) to offer RAL and ERC/ERD products. JH and Liberty provide preparation services of federal, state and local individual income tax returns in the U.S. through a nationwide network of franchised and company-owned tax-preparers offices. Approximately 35% and 23% of the Company s first quarter 2010 and 2009 TRS revenue was derived from JH with another 27% and 5% from Liberty for the same periods. See *Results of Operations Tax Refund Solutions* for additional discussion of JH and Liberty agreements.

Substantially all RALs issued by the Company each year are made during the first quarter. Losses associated with RALs result from the IRS not remitting taxpayer refunds to the Company associated with a particular tax return. This occurs for a number of reasons, including errors in the tax return, tax return fraud and tax debts not previously disclosed to the Company during its underwriting process. While the RAL application form is completed by the taxpayer in the tax-preparer s office, the credit approval criteria is established by TRS and the underwriting decision is made by TRS. TRS reviews and evaluates all tax returns to determine the likelihood of IRS payment. If any attribute of the tax return appears to fall outside of predetermined parameters, TRS will not originate the RAL.

At March 31st of each year the Company reserves for its estimated RAL losses for the year based on current year and historical funding patterns and based on information received from the IRS on current year payment processing. The Company charges off substantially all outstanding RALs by June 30th each year with subsequent collections recorded as recoveries.

Subsequent to the first quarter, the results of operations for the TRS business operating segment consist primarily of fixed overhead expenses and adjustments to the segment s estimated provision for loan losses, as estimated results became final. However, as was the case in 2009, the fourth quarter can be impacted by the funding strategy for the upcoming tax season. As detailed in the section titled *TRS Funding First Quarter 2010 Tax Season* below, the TRS business operating segment incurred a fourth quarter net loss of $1.5 million with approximately $200,000 attributable to the negative spread the segment earned on brokered deposits obtained for the upcoming first quarter 2010 tax season.

TRS Rebate Accruals

During September 2009, the Company announced a new pricing model reducing the fees the Bank charges consumers for RALs beginning with the first quarter 2010 tax season. With respect to new contracts entered into for the first quarter 2010 tax season, TRS substantially reduced rebates paid to individual technology and tax preparation service providers in connection with the delivery of tax refund products.

TRS Funding First Quarter 2010 Tax Season

Due to the on-going excessive costs of securitization structures, the Company elected not to obtain funding from a securitization structure for the first quarter 2010 tax season. Instead, the Company utilized brokered certificates of deposits and to a lesser extent its traditional borrowing lines of credit as its primary RAL funding source for the first quarter 2010 tax season. During the fourth quarter of 2009, the Company obtained $921 million in brokered certificates of deposits to be utilized to fund the first quarter 2010 RAL program. These brokered certificates of deposits had a weighted average life of three months with a weighted average interest rate of 0.51%. Also, during January of 2010, the Company obtained an additional $542 million in brokered certificates of deposits to fund additional RAL demand. These brokered certificates of deposits acquired in January had a weighted average life of 55 days and a weighted average interest rate of 0.56%.

Table of Contents

TRS Funding First Quarter 2009 Tax Season

Due to the same reasons mentioned under *TRS Funding First Quarter 2010 Tax Season,* the Company utilized brokered certificates of deposits as its primary RAL funding source for the first quarter 2009 tax season. During the fourth quarter of 2008, the Company obtained $918 million in brokered certificates of deposits to be utilized to fund the first quarter 2010 RAL program. These brokered certificates of deposits had a weighted average life of three months with a weighted average interest rate of 2.71%. Also, during January of 2009, the Company obtained an additional $375 million in brokered certificates of deposits to fund additional RAL demand. These brokered certificates of deposits acquired in January had a weighted average life of 45 days and a weighted average interest rate of 1.27%.

(III) Mortgage Banking

Mortgage Banking activities primarily include 15, 20 and 30-year fixed-term single family residential rate real estate loans that are sold into the secondary market, primarily to Freddie Mac. From 2003 through mid 2009, the Bank historically retained servicing on substantially all loans sold into the secondary market. In order to take advantage of the steep yield curve, during the second quarter of 2009, the Company borrowed

from the FHLB to fund a pool of 15 year fixed rate residential real estate loans. Administration of loans with servicing retained by the Bank includes collecting principal and interest payments, escrowing funds for property taxes and insurance and remitting payments to secondary market investors. A fee is received by the Bank for performing these standard servicing functions.

As part of the sale of loans with servicing retained, the Company records an MSR. MSRs represent an estimate of the present value of future cash servicing income, net of estimated costs, which Republic expects to receive on loans sold with servicing retained by the Company. MSRs are capitalized as separate assets when loans are sold and servicing is retained. This transaction is posted to net gain on sale of loans, a component of Mortgage Banking income in the income statement. Management considers all relevant factors, in addition to pricing considerations from other servicers, to estimate the fair value of the MSRs to be recorded when the loans are initially sold with servicing retained by the Company. The carrying value of MSRs is initially amortized in proportion to and over the estimated period of net servicing income and subsequently adjusted quarterly based on the weighted average remaining life of the underlying loans. The amortization is recorded as a reduction to Mortgage Banking income.

The carrying value of the MSRs asset is reviewed monthly for impairment based on the fair value of the MSRs, using groupings of the underlying loans by interest rates. Any impairment of a grouping would be reported as a valuation allowance. A primary factor influencing the fair value is the estimated life of the underlying loans serviced. The estimated life of the loans serviced is significantly influenced by market interest rates. During a period of declining interest rates, the fair value of the MSRs is expected to decline due to increased anticipated prepayments within the portfolio. Alternatively, during a period of rising interest rates, the fair value of MSRs is expected to increase, as prepayment assumptions on the underlying loans would be anticipated to decline. Management utilizes an independent third party on a monthly basis to assist with the fair value estimate of the MSRs.

Table of Contents

Due to the significant reduction in long-term interest rates during December of 2008, the fair value of the MSR portfolio declined as prepayment speed assumptions were adjusted upwards resulting in an impairment charge of $1.3 million for the fourth quarter and year ended December 31, 2008. During the first quarter of 2009, prepayment speed assumptions stabilized to levels similar to those assumed in the third quarter of 2008 and the Company reversed $1.1 million from the valuation allowance. There were no impairment charges recorded prior to the fourth quarter of 2008 and no MSR valuation allowance existed at December 31, 2009 and March 31, 2010.

See additional detail regarding Mortgage Banking under Footnote 10 Segment Information of Part I Item 1 Financial Statements.

OVERVIEW

Net income for the three months ended March 31, 2010 was $44.6 million, representing an increase of $18.9 million, or 73%, compared to the same period in 2009. Diluted earnings per Class A Common Share increased 73% to $2.14 for the quarter ended March 31, 2010 compared to $1.24 for the same period in 2009. General highlights for the three months ended March 31, 2010 by business segment consist of the following:

Traditional Banking

- Net income increased $664,000, or 30%, for the first quarter of 2010 compared to the same period in 2009.

- Net interest income within the Traditional Banking segment decreased $697,000 or 2%, for the quarter first quarter of 2010 to $27.3 million. The net interest margin declined 7 basis points for the quarter ended March 31, 2010 compared to the fourth quarter of 2009 decreasing to 3.78%.

- The provision for loan losses was $2.8 million for the quarter ended March 31, 2010 compared to $3.7 million for the same period in 2009, due primarily to improved credit metrics.

- Non interest income increased $2.7 million, for the first quarter of 2010 compared to the same period in 2009 due primarily to the decline in impairment charges associated with the Company s small private label mortgage backed and other mortgage-related securities.

- Total non interest expense increased $1.5 million, or 7%, during the first quarter of 2010 compared to the first quarter of 2009 primarily due to an early termination penalty paid on FHLB advance prepayments.

- Total non-performing loans to total loans for the Traditional Banking segment decreased to 1.78% at March 31, 2010, from 1.90% at December 31, 2009, as the total balance of non-performing loans decreased by over $3 million for the same period.

Tax Refund Solutions (TRS)

- Net income increased $20.8 million for the first quarter of 2010 compared to the same period in 2009 primarily due to the following:

- A reduction in third party rebates resulting from the change in pricing model announced in September 2009;

- Growth in volume of tax refunds processed ; and

- A reduction in the RAL loan loss provision due largely to improved underwriting criteria developed from the Company s 2009 tax season funding history from the IRS.

- The total dollar volume of tax refunds processed during the first quarter 2010 tax season increased $2.5 billion, or 32%, over the first quarter 2009 tax season. Total RAL dollar volume increased from $2.5 billion during the first quarter 2009 tax season to $3.0 billion during the first quarter 2010 tax season.

- The Company obtained $921 million in brokered deposits during the fourth quarter of 2009 and an additional $542 million in brokered certificates of deposits during the first quarter of 2010 to fund anticipated RAL demand.

Mortgage Banking

- Within the Mortgage Banking segment, mortgage banking income decreased $3.2 million during the first quarter of 2010 compared to the same period in 2009. The majority of this decline was in the gain on sale of loan category, as a meaningful decline in short-term interest rates during the first quarter of 2009 contributed to a dramatic prior year increase in demand for 15 and 30 year fixed rate loans, which the Company sold into the secondary market.

- Mortgage banking income during the first quarter of 2009 was positively impacted by the reversal of $1.1 million of the valuation allowance related to the MSR portfolio.

RESULTS OF OPERATIONS

Tax Refund Solutions (TRS)

TRS entered the first quarter of the 2010 tax season with a plan that, among other things, reduced prices on its Refund Anticipation Loan (RAL) and Electronic Refund Check (ERC)/Electronic Refund Deposit (ERD) products, eliminated some products such as instant RALs, limited the number of locations that could offer the RAL product, focused on the consistent delivery of products to its customers and emphasized asset quality through improved loan underwriting. This led to net income at TRS of $41.7 million for the first quarter of 2010 compared to $20.9 million for the first quarter of 2009.

The Company was able to achieve its strong growth in net income at TRS despite an 11% decline in RAL fees and a reduction in the number of tax preparations offices that originated Republic RALs during the first quarter 2010 tax season. The increase in net income from TRS was driven by lower losses on RALs, growth in demand for TRS non-loan ERC/ERD product, lower funding costs compared to the first quarter of 2009 and an increase in the average number of bank products per active location.

The 11% decline in RAL fees for the first quarter of 2010 was driven by the Company s new pricing model for the 2010 tax season, which substantially reduced Republic s pricing to the customer on its RAL product. In conjunction with the new pricing model, Republic significantly reduced third party rebates to technology and service providers, partially offsetting the reduction in price. TRS was also able to partially offset the decline in RAL fees through an increase in volume, as the total number of RALs processed increased 14% over the first quarter of 2009 while the dollar volume of RALs processed increased 21%.

While the Company experienced a decline in RAL revenue during the quarter, ERC/ERD fee income increased 132% over the first quarter of 2009. ERC/ERD fees are included as a component of non interest income on the income statement. ERC/ERD fee income was positively impacted by a 28% increase in the number of ERCs/ERDs processed. In addition, the Company increased ERC/ERD fee income significantly through the previously mentioned reduction in third party payments.

TRS net income also benefited significantly from lower funding costs in 2010 as compared to 2009. Average brokered deposits outstanding utilized to fund RALs during the first quarter of 2010 and 2009 were $1.0 billion and $857 million with a weighted average cost of 0.55% and 2.29%, respectively. As a result, interest expense for the TRS segment was $1.4 million for the first quarter of 2010, a decrease of $3.3 million from the first quarter of 2009.

At March 31st of each year the Company reserves for its estimated RAL losses for the year based on current year and historical funding patterns and based on information received from the IRS on current year payment processing. The Company charges off substantially all outstanding RALs by June 30th each year with subsequent collections recorded as recoveries. RALs outstanding past their expected due date at March 31, 2010 and 2009 were $18.5 million, or 0.63% of total RALs originated during the first quarter 2010 season, compared to $33.9 million, or 1.38% of RALs originated during the first quarter 2009 season. As a result, TRS provision for loan losses was $14.0 million for the first quarter of 2010 compared to $22.0 million during the first quarter of 2009. The decrease in the Company s provision for loan losses was due to improved underwriting criteria developed from the Company s 2009 tax season funding history from the IRS.

As previously disclosed, the Company met with the FDIC in March of 2010 to discuss the future viability of the TRS program. The Company expects to have future discussions related to this and other regulatory matters.

Net Interest Income

The largest source of Republic s revenue is net interest income. Net interest income is the difference between interest income on interest-earning assets, such as loans and investment securities and the interest expense on liabilities used to fund those assets, such as interest-bearing deposits, securities sold under agreements to repurchase and Federal Home Loan Bank advances. Net interest income is impacted by both changes in the amount and composition of interest-earning assets and interest-bearing liabilities, as well as market interest rates.

Total Company net interest income decreased $3.9 million, or 5%, for the first quarter of 2010 compared to the same period in 2009. The total Company net interest margin decreased 85 basis points to 7.27% for the same period. The most significant components comprising the total Company decrease in net interest income were as follows:

Traditional Banking segment

Net interest income decreased $697,000, or 2%, for the first quarter of 2010 compared to 2009. The traditional Bank s net interest margin declined 7 basis points for the same period to 3.78%. The decrease in net interest income was due primarily to a decrease in interest income resulting from the continued paydowns and downward repricing of loans and investments. Generally, the Company s strategy has largely been not to extend expected maturities on a significant portion of the paydowns it has received due to market projections of interest rate increases in the future. As a result, much of the cash the Company received from paydowns over the past several months has been reinvested into short-term lower yielding investments, which has greatly improved the Company s risk position from future interest rate increases, while negatively impacting current earnings. The Company has been unable offset this reduction in interest income during the first quarter of 2010 by lowering its cost of funds.

Table of Contents

The Company expects to continue to receive paydowns in its loan and investment portfolios. These paydowns will continue to cause compression in Republic s net interest income and net interest margin, as the cash received from these paydowns is reinvested at lower yields. Additionally, because the Federal Funds Target rate (FFTR) (the index which many of the Company s short-term deposit rates track) has remained at a target range between 0.00% and 0.25%, no future FFTR decreases from the Federal Open Markets Committee (FOMC) of the FRB are possible, exacerbating the compression to the Company s net interest income and net interest margin caused by its repricing loans and investments. The Company is unable to precisely determine the ultimate negative impact to the Company s net interest spread and margin in the future because several factors remain unknown at this time, such as future demand for financial products and the overall future need for liquidity, among many other factors.

For additional information on the potential future effect of changes in short-term interest rates on Republic s net interest income, see Table 10, Interest Rate Sensitivity for 2010 in this section of the document.

TRS segment

Net interest income within the TRS segment decreased $3.0 million, or 6%, for the first quarter of 2010 compared to the same period in 2009. The decrease in net interest income within the TRS segment was primarily due to a reduction in RAL fee income resulting from the Company s new pricing model, which substantially lowered RB&T s RAL fee to its customers. In conjunction with the new pricing model, Republic significantly reduced third party rebates to its technology and service providers, partially offsetting the reduction in price. As also previously discussed, TRS was also able to partially offset the decline in RAL fees through an increase in the volume of RALs processed.

---

(1) For the purpose of this calculation, the fair market value adjustment on investment securities resulting from FASB ASC topic 320 Investments Debt and Equity Securities is included as a component of other assets.

(2) The amount of loan fee income included in total interest income was $51.2 million and $57.8 million for the three months ended March 31, 2010 and 2009.

(3) Average balances for loans include the principal balance of non accrual loans and loans held for sale.

(4) Yields on tax exempt securities have been computed based on a fully tax-equivalent basis using the federal income tax rate of 35%.

Table of Contents

Table 2 illustrates the extent to which changes in interest rates and changes in the volume of interest-earning assets and interest-bearing liabilities impacted Republic s interest income and interest expense during the periods indicated. Information is provided in each category with respect to (i) changes attributable to changes in volume (changes in volume multiplied by prior rate), (ii) changes attributable to changes in rate (changes in rate multiplied by prior volume) and (iii) net change. The changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate.

Table of Contents

Provision for Loan Losses

The Company recorded a provision for loan losses of $16.8 million for the first of quarter 2010, compared to a provision of $25.7 million for the same period in 2009. The significant components comprising the increase in the provision for loan losses were as follows:

Traditional Banking segment

The provision for loan losses within the Traditional Banking segment was $2.8 million for the first quarter of 2010, compared to $3.7 million during the same period in 2009. The decrease in the Traditional Banking segment provision for loan losses was primarily attributable to the stabilization of past due loan balances, non-performing loan balances and classified loans. During the first quarter of 2009, as a result of the economic recession, these metrics increased significantly leading to an increase in the Traditional Banking segment s provision for loan losses. At this time, management is unable to determine if the stabilization in the Traditional Bank s credit metrics will continue in the near-term due to the continued uncertainty in the economy.

As a percentage of total loans, the Traditional Banking allowance for loan losses increased to 1.07% at March 31, 2010 compared to 1.01% at December 31, 2009. The Company believes, based on information presently available, that it has adequately provided for loan losses at March 31, 2010. *See section titled Asset Quality for additional discussion of the Company s delinquent and non-performing loans.*

TRS segment

Losses associated with RALs result from the IRS not remitting taxpayer refunds to the Company associated with a particular tax return. This occurs for a number of reasons, including errors in the tax return, tax return fraud and tax debts not previously disclosed to the Company during its underwriting process.

Despite the increase in dollar volume of RALs processed during the first quarter 2010 tax season, the provision for loan losses associated with RALs decreased from $22.0 million during the first quarter of 2009 to $14.0 million during the first quarter of 2010. The decrease in the Company s provision for loan losses was due to improved underwriting criteria developed from the Company s 2009 tax season funding history from the IRS. RALs outstanding past their expected due date at quarter end March 31, 2010 and 2009 were $18.5 million, or 0.63% of total RALs originated during the first quarter 2010 season, compared to $33.9 million, or 1.38% of RALs originated during the first quarter 2009 season.

An analysis of the changes in the allowance for loan losses and selected ratios follows:

Non interest Income

Non interest income increased $29.4 million, or 96%, for the first quarter of 2010 compared to the same period in 2009. The most significant components comprising the total Company increase in non interest income were as follows:

Traditional Banking segment

Traditional Banking segment non interest income increased $2.7 million, or 94%, for the first quarter of 2010 compared to the same period in 2009.

The increase in non interest income was primarily the result of OTTI charges totaling $3.1 million that the Company incurred during the first quarter of 2009 for its private label mortgage backed security portfolio. During the first quarter of 2010, the Company recorded only $69,000 in OTTI charges.

Service charges on deposit accounts decreased $550,000, or 12%, during the first quarter of 2010 compared to the same period in 2009. The decrease was primarily due to the discontinuation of the Company s Currency Connection checking product, which was marketed to clients on a national basis through various third parties. The Company

discontinued the product because management did not believe that it would be able to grow revenue to a level which would achieve an acceptable profitability within the program given a substantial anticipated increase in cost of future product delivery.

In November 2009, the FRB announced its amendment of Regulation E, which implements the Electronic Funds Transfer Act (EFTA) effective for the third quarter of 2010. The EFTA prohibits financial institutions from charging consumers fees for paying overdrafts on automated teller machine and one-time debit card transactions, unless a consumer affirmatively consents, or opts in, to the overdraft service for those types of transactions. Before opting in, the consumer must be provided a notice that explains the financial institution s overdraft services, including the fees associated with the service, and the consumer s choices. The final rules, along with a model opt-in notice, are issued under Regulation E, which implements the EFTA. The final rules require institutions to provide consumers who do not opt in with the same account terms, conditions, and features (including pricing) that they provide to consumers who do opt in. For consumers who do not opt in, the institution would be prohibited from charging overdraft fees for any overdrafts it pays on ATM and one-time debit card transactions.

The Company earns a substantial majority of its fee income related to this program from the per item fee it assesses its customers for each insufficient funds check or electronic debit presented for payment. In addition, the Company estimates that it earns more than 60% of its overdraft related fees on the electronic debits presented for payment. Both the per item fee and the daily fee assessed to the account resulting from its overdraft status, if computed as a percentage of the amount overdrawn, results in a high rate of interest when annualized and are thus considered excessive by some consumer groups. The total net per item fees included in service charges on deposits for the first quarter of 2010 and 2009 were $2.6 million and $2.8 million. The total net daily overdraft charges included in interest income for the first quarter of 2010 and 2009 were $501,000 and $539,000. Management believes the EFTA will have a negative impact on the Company s overdraft related fee income beginning in the third quarter of 2010. Management, however, is currently unable to estimate the dollar amount of that negative impact as the substantial part of its program to notify clients of the new rules will begin in mid-April 2010.

TRS segment

Net ERC/ERD fees increased $30.3 million for the first quarter of 2010 compared to the same period in 2009 primarily attributable to the overall increase in volume at TRS during the tax season. ERC/ERD fee income was positively impacted by a 28% increase in the number of ERCs/ERDs processed and a 38% increase in the dollar volume of ERCs/ERDs processed. In addition, the Company increased ERCs/ERD fee income significantly through the previously mentioned reduction in third party rebates.

For additional discussion regarding TRS, see the following sections:

- *Part I Item 1A Risk Factors of the Company s 2009 Annual Report on Form 10-K*

Mortgage Banking

Within the Mortgage Banking segment, mortgage banking income decreased $3.2 million, or 76%, for the first quarter of 2010 compared to the same period in 2009. The majority of this decrease was in the gain on sale of loan category, as a meaningful decline in short-term interest rates during the first quarter of 2009 caused a dramatic increase in demand for 15 and 30 year fixed rate loans, which the Company sold into the secondary market. The Company sold $187 million in fixed rate loans into the secondary market during the first quarter of 2009 compared to $50 million during the first quarter of 2010.

Due to the significant reduction in long-term interest rates during December of 2008, the fair value of the Mortgage Servicing Rights (MSR) portfolio declined as pre-payment speed assumptions were adjusted upwards resulting in

Table of Contents

an impairment charge of $1.3 million for the fourth quarter and year ended December 31, 2008. During the first quarter of 2009, prepayment speed assumptions stabilized to levels last seen prior to December of 2008 and the Company reversed $1.1 million from the valuation allowance.

Non interest Expenses

Non interest expenses increased $7.5 million, or 17.2%, during the first quarter of 2010 compared to 2009. Approximately $5.6 million of the increase related to TRS while $1.9 million related to the Company s other operating segments. The most significant components comprising the increase in non interest expense were as follows:

Traditional Banking segment

Salaries and employee benefits increased $1.6 million for the first quarter of 2010 compared to the first quarter of 2009 due to annual merit increases, additional staffing and increased employee benefits expense.

Other real estate owned (OREO) expense decreased $1.4 million during the first quarter of 2010 primarily due to the significant prior year write downs related to two properties held in Florida.

During the first quarter of 2010, the Company prepaid $87 million in FHLB advances that were originally scheduled to mature between April 2010 and January 2011. These advances had a weighted average cost of 3.48%. The Company incurred a $1.5 million early terminations penalty in connection with this transaction. If short-term interest rates remain stable over the next 12 months, management anticipates this strategy will save the Company approximately $1.6 million in interest expense on its FHLB borrowings during that time period, netting the Company a combined overall savings of approximately $100,000 as a result of the transaction.

TRS segment

Salaries and employee benefits at TRS increased $1.3 million for the first quarter of 2010 compared to the first quarter of 2009. Approximately $882,000 of this increase related to higher bonus accruals, as TRS is expected achieve its maximum tier for its 2010 profitability goal. The remaining increase in salaries and benefits is due to annual merit increases, additional staffing and increased employee benefits expense.

Occupancy and equipment expense increased $703,000 during the first quarter of 2010 due primarily to expanded infrastructure and technology costs to accommodate the increased volume of the business.

Marketing and development expense decreased $2.5 million during the first quarter due to a reduction in expenses associated with the Program and Technology Agreements with JH. The decrease was the result of amended contract terms reached for the 2010 tax season.

FDIC insurance expense increased $58,000 during the first quarter related primarily to higher average balances of brokered certificates of deposits acquired by the Company to fund the first quarter 2010 tax business.

Communication and transportation expense increased $582,000 during the year, as client call volume and various product mailings increased consistent with the overall growth in the program.

Bank Franchise tax expense represents taxes paid to different state taxing authorities based on capital. The substantial majority of the Company s Bank Franchise expense is paid to the state of Kentucky. Bank Franchise expense related to the TRS segment increased $480,000 compared to the first quarter of 2009 primarily due to an increase in capital associated with higher earnings.

Charitable contribution expense totaled $4.7 million at TRS for the first quarter of 2010. Due to the financial success the Company achieved in the first quarter, Republic made a $5 million contribution to the new Republic Bank Foundation, which was formed to support charitable, educational, scientific and religious organizations throughout communities in Kentucky, Indiana, Ohio and Florida. The Company allocated the cost of this contribution to its operating segments using a formula based on gross profits.

Table of Contents

COMPARISON OF FINANCIAL CONDITION AT MARCH 31, 2010 AND DECEMBER 31, 2009

Cash and Cash Equivalents

Cash and cash equivalents include cash, deposits with other financial institutions with original maturities less than 90 days and federal funds sold. Republic had $322 million in cash and cash equivalents at March 31, 2010 compared to $1.1 billion at December 31, 2009. During the fourth quarter of 2009, the Company accumulated cash via brokered certificates of deposits totaling $921 million in preparation for the first quarter 2010 tax season. At March 31, 2010, the Company continued to have a significant sum of cash on hand from paydowns related to securities and portfolio loans. In addition, at March 31, 2010, the Company also had approximately $157 million in cash, which represented float on the Company s ERC/ERD products. The cash represented by float for ERC/ERD products is very short term in nature, and as such, the Company held these excess funds at the Federal Reserve for liquidity purposes.

Loan Portfolio

Net Traditional Banking segment loans, primarily consisting of secured real estate loans, decreased by $28 million during 2010 to $2.2 billion at March 31, 2010. The Company continued to experience a decline in most loan categories during 2010 due to several factors, including the current economic environment, stricter underwriting guidelines, decreasing borrower demand and higher pricing requirements for portfolio level loans. The Company currently expects to maintain these pricing and underwriting strategies until it sees improvement in these economic conditions. In addition, the Company continues to experience more borrowers opting for its long-term fixed rate secondary market loan over its portfolio adjustable rate mortgage products due to the historically low fixed rate environment.

Allowance for Loan Losses

Excluding loan loss reserves for TRS, the Company s allowance for loan losses as a percent of total loans increased to 1.07% at March 31, 2010 compared to 1.01% at December 31, 2009. In general, the increase in the allowance for loan losses as a percentage of total loans was due primarily to a greater emphasis on qualitative factors utilized by the Company in recognition of the current economic environment. In addition, while the allowance for loan losses increased during the quarter, the gross balance of loans outstanding, excluding RALs, decreased further increasing the allowance as a percent of total loans. The Company believes, based on information presently available, that it has adequately provided for loan losses at March 31, 2010.

Table 4 Classified Assets

(in thousands)	March 31, 2010	December 31, 2009
Loss	$	$
Doubtful		
Substandard	29,332	30,333

Special mention		55,437		57,036
Total	$	84,769	$	87,369

Asset Quality

The Company maintains a watch list of commercial and commercial real estate loans and reviews those loans on a regular basis. Generally, assets are designated as watch list loans to ensure more frequent monitoring. Watch list loans are reviewed to ensure proper earning status and management strategy. If it is determined that there is serious doubt as to performance in accordance with original terms of the contract, then the loan is generally downgraded and often placed on non-accrual status.

Management evaluates the loan portfolio by reviewing the historical loss rate for each respective loan type and assigns risk multiples to certain categories to account for qualitative factors including current economic conditions. The average five year, two year and current year loss rates are reviewed in the analysis, as well as comparisons to peer group loss rates. Management makes allocations within the allowance for loan losses for specifically classified

Table of Contents

loans regardless of loan amount, collateral or loan type. In addition, historical loss rates for non-accrual loans and loans that are past due 90 days or more and that are not specifically classified are analyzed and applied based on respective balances and loan types.

Loan categories are evaluated utilizing subjective factors in addition to the historical loss calculations to determine a loss allocation for each of those types. As this analysis, or any similar analysis, is an imprecise measure of loss, the allowance is subject to ongoing adjustments. Therefore, management will often take into account other significant factors that may be necessary or prudent in order to reflect probable incurred losses in the total loan portfolio.

Loans, including impaired loans under FASB ASC topic 310-10-35, *Receivables,* but excluding consumer loans, are typically placed on non-accrual status when the loans become past due 75 days or more as to principal or interest, unless the loans are adequately secured and in the process of collection. Past due status is based on how recently payments have been received. When loans are placed on non-accrual status, all unpaid interest is reversed from interest income and accrued interest receivable. These loans remain on non-accrual status until the borrower demonstrates the ability to become and remain current or the loan or a portion of the loan is deemed uncollectible and is charged off.

Consumer loans are reviewed periodically and generally charged off when the loans reach 120 days past due or at any earlier point the loan is deemed uncollectible. RALs undergo a review in March and those delinquent RALs deemed uncollectible are charged off against the allowance for loan losses. Substantially all remaining RALs are charged off at June 30th each year. Collections subsequent to June 30th each year are recorded as recoveries.

Non-performing Loans

Non-performing loans include loans on non-accrual status and loans 90 days or more past due and still accruing. The non-performing loan category includes impaired loans totaling approximately $11 million.

Non-performing loans to total loans decreased to 1.76% at March 31, 2010, from 1.90% at December 31, 2009, as the total balance of non-performing loans decreased by $3.2 million for the period. The following table details the Company s non-performing assets and select non-performing loan ratios:

Table 5 Non-performing Loans and Non-performing Assets

(dollars in thousands)	**March 31, 2010**	**December 31, 2009**
Loans on non-accrual status *(1)*	$ 39,955	$ 43,136
Loans past due 90 days or more and still on accrual	4	8
Total non-performing loans	39,959	43,144

Non-performing assets to total loans (including OREO)		2.03%		2.11%

---

(1) Loans on non-accrual status include impaired loans. See Footnote 3 Loans and Allowance for Loan Losses of Part I Item 1 Financial Statements for additional discussion regarding impaired loans.

Approximately $16 million of Republic s total non-performing loans are in the residential real estate category with the underlying collateral located in the Company s primary market area of Kentucky. The Company does not consider any of these loans to be sub prime . Residential real estate values in Kentucky have generally performed significantly better than the national average, and as a result, losses from these loans have been minimal in relation to the size of the Company s residential real estate portfolio despite the rise in delinquencies over the past twelve months.

Approximately $22 million of Republic s total non-performing loans are in the commercial real estate and real estate construction loan portfolio as of March 31, 2010. These loans had allocated loan loss reserves of $2.6 million or

Table of Contents

12% of their outstanding balances and were secured primarily by commercial properties. In addition to the primary collateral, the Company also obtained in many cases, at the time of origination, personal guarantees from the principal borrowers and secured liens on the guarantors primary residences. The following table details the Company s non-performing loan composition:

The composition of non-performing loans follows:

Table 6 Non-performing Loan Composition

(in thousands)	March 31, 2010	December 31, 2009
Residential real estate	$ 15,796	$ 14,832
Commercial real estate	12,540	16,850
Real estate construction	9,177	9,500
Commercial	481	647
Consumer	77	71
Home equity	1,888	1,244
Total non-performing loans	$ 39,959	$ 43,144

Based on the Company s review of the large individual non-performing commercial credits, as well as its migration analysis for its single 1-4 family residential real estate non-performing portfolio, management believes that its reserves as of March 31, 2010, are adequate to absorb probable losses on these loans.

Approximately $11 million in relationships classified as non-performing at December 31, 2009, were removed from the non-performing loan classification during 2010. Approximately $551,000 or 5%, of these loans were removed from the non-performing category because they were charged-off. Approximately $3 million in loan balances were transferred to other real estate owned (OREO), with $1 million refinanced at other financial institutions and the remaining $6 million returned to accrual status for performance reasons.

The following table details the activity of the Company s non-performing loans for the three months ended March 31, 2010.

Table 7 Rollforward of 2010 Non-performing Loan Activity

(in thousands)	
Non-performing loans at January 1, 2010	$ 43,144
Loans added to non-performing status	8,122
Loans removed from non-performing status	(10,572)
Principal paydowns	(735)

Non-performing loans at March 31, 2010	$	39,959

Delinquent Loans

As detailed in the table below, at March 31, 2010 the heaviest concentration of past due loans was in the real estate construction category which was primarily comprised of seven land development relationships. As a result of the increase in delinquency rates and non-performing loans over the past twelve months, the Company adjusted its estimated loss percentages within its loan loss allowance calculation by loan composition to give greater consideration to the current economic conditions. The annualized net charge-off ratio within the Traditional Banking segment remained relatively low at 0.31% for the quarter.

Table of Contents

Table 8 Past Due Loans to Total Loans by Loan Type *(1)*

	March 31, 2010	December 31, 2009
Residential real estate	1.60%	2.06%
Commercial real estate	1.86%	2.19%
Real estate construction	10.44%	4.91%
Commercial	0.13%	0.43%
Consumer	1.86%	2.17%
Home equity	0.64%	0.99%
Total portfolio	1.78%	1.98%

(1) Represents total loans over 30 days past due divided by total loans.

OREO

OREO increased $1.4 million at March 31, 2010 compared to December 31, 2009 primarily due to the addition of one commercial property and two commercial real estate properties.

Impaired Loans

Republic s policy is to charge off all or that portion of its investment in an impaired loan upon a determination that it is probable the full amount will not be collected. Impaired loans totaled $49 million at March 31, 2010 and December 31, 2009.

A TDR is the situation where, due to a borrower s financial difficulties, the Bank grants a concession to the borrower that the Bank would not otherwise have considered. The majority of the Bank s TDRs involve a restructuring of loan terms such as a temporary reduction in the payment amount to require only interest and escrow (if required) and/or extending the maturity date of the loan. TDRs are not reported as non-performing loans, unless the restructured loans are more than 90 days delinquent or on non-accrual. As of March 31, 2010, the Company had $38 million in TDRs, of which $11 million were on non accrual status.

Deposits

Total deposits decreased $703 million from December 31, 2009 to March 31, 2010 to $1.9 billion. Interest-bearing deposits decreased $858 million, or 38%, while non interest-bearing deposits increased $155 million, or 49%, from December 31, 2009 to March 31, 2010. The increase

in non interest bearing deposits was substantially all related to short-term float for tax refund checks issued to TRS clients.

Excluding the non interest bearing deposits associated with TRS, the Company still has a large portion of non interest-bearing deposits related to large commercial treasury management accounts, which shifted their funds into non interest-bearing products for the unlimited FDIC insurance currently available on those accounts. Management estimated these balances totaled approximately $40 million at March 31, 2010. Management believes these non interest-bearing deposits will likely shift back into an interest-bearing type deposit account or a repurchase agreement when the unlimited FDIC insurance expires on December 31, 2010, assuming mutually agreeable terms can reached. If mutually agreeable terms cannot be reached, the Company would be at risk of losing these deposit accounts.

The decrease in interest-bearing accounts was heavily concentrated in the brokered deposit category. Brokered deposits decreased $893 million during the first quarter of 2010 to $111 million. During the fourth quarter of 2009, the Company acquired approximately $921 million in brokered certificates of deposits to be utilized in the first quarter of 2010 to fund RALs. These deposits had a weighted average cost of 0.51% with an average life of three months. Also, during January of 2010, the Company obtained an additional $542 million in brokered certificates of deposits to fund additional RAL demand. These brokered certificates of deposits acquired in January had a weighted average life of 55 days and a weighted average interest rate of 0.56%.

Table of Contents

During March 2010, the Company obtained $25 million in brokered deposits to be utilized by the Traditional Bank for on-going funding needs. These deposits had a weighted average maturity of five years and a weighted average cost of 2.90%. Management chose to utilize long term brokered deposits for Traditional Bank funding needs for interest rate risk mitigation and because the cost of these deposits was cheaper than equivalent term FHLB borrowings and retail certificates of deposit.

Securities Sold Under Agreements to Repurchase and Other Short-term Borrowings

Securities sold under agreements to repurchase and other short-term borrowings declined $24 million, or 8%, during the first quarter of 2010. The majority of the repurchase accounts are large treasury management transaction relationships with normal recurring large fluctuations in account balances. All of these accounts require security collateral on behalf of Republic with the substantial majority of these accounts being indexed to immediately repricing indices such as the Fed Funds Target Rate. Approximately $21 million of the decline in balances for this category during the quarter was related to the expected withdrawal of funds from one large treasury management account.

Federal Home Loan Bank Advances

FHLB advances decreased $92 million during 2010 to $546 million. During the first quarter of 2010, the Company prepaid $87 million in FHLB advances that were originally scheduled to mature between April 2010 and January 2011 and had a weighted average rate of 3.48%. The Company incurred a $1.5 million prepayment penalty in connection with this transaction. The Company utilized excess cash to pay off these advances. If short-term interest rates remain stable over the next twelve months, management anticipates this strategy will save the Company approximately $1.6 million in interest expense on its FHLB borrowings during that time period, netting the Company a combined overall savings of approximately $100,000 as a result of the transaction.

Approximately $150 million of the FHLB advances at March 31, 2010 and December 31, 2009 were putable advances with original fixed rate periods ranging from one to five years and original maturities ranging from three to ten years if not put back to the Company earlier by the FHLB. At the end of their respective fixed rate periods and on a quarterly basis thereafter, the FHLB has the right to require payoff of the advances by the Company at no penalty. The weighted average coupon on all of the Company s putable advances at December 31, 2009 was 4.51%. Based on market conditions at this time, the Company does not believe that any of its putable advances are likely to be put back to the Company in the short-term by the FHLB.

Liquidity

The Company is significantly leveraged with a loan to deposit ratio (excluding brokered deposits) of 132% at March 31, 2010 and 148% at December 31, 2009. Historically, the Company has utilized secured and unsecured borrowing lines to supplement its funding requirements. At March 31, 2010 and December 31, 2009, Republic had available collateral to borrow an additional $193 million and $215 million, respectively from the FHLB. In addition to its borrowing line with the FHLB, Republic also had unsecured lines of credit totaling $216 million available through various other financial institutions as of December 31, 2009. If the Company were to lose a significant funding source, such as a few major depositors, or if any of its lines of credit were canceled, or if the Company cannot obtain brokered deposits, the Company would be forced to offer market leading deposit interest rates to meet its funding and liquidity needs.

Republic maintains sufficient liquidity to fund routine loan demand and routine deposit withdrawal activity. Liquidity is managed by maintaining sufficient liquid assets in the form of investment securities. Funding and cash flows can also be realized by the sale of securities available for sale, principal paydowns on loans and MBSs and proceeds realized from loans held for sale. The Company s liquidity is impacted by its ability to sell certain investment securities, which is limited due to the level of investment securities that are needed to secure public deposits, securities sold under agreements to repurchase and for other purposes, as required by law. At March 31, 2010 and December 31, 2009, these pledged investment securities had a fair value of $372 million and $427 million, respectively. Republic s banking centers and its website, www.republicbank.com, provide access to retail deposit markets. These retail deposit products, if offered at attractive rates, have historically been a source of additional funding when needed.

Table of Contents

At March 31, 2010, the Company had approximately $176 million in Premier First money market accounts, which is the Bank s primary deposit product offering for medium to large business customers. These accounts do not require collateral; therefore, cash from these accounts can generally be utilized to fund the loan portfolio. The ten largest Premier First relationships represent approximately $92 million of the total balance. If any of these balances are moved from the Bank, the Company would likely utilize overnight FHLB advances in the short-term to replace the balances. On a longer-term basis, the Company would likely utilize brokered deposits to replace withdrawn balances. Based on past experience utilizing brokered deposits, the Company believes it can quickly obtain brokered deposits if needed. The overall cost of gathering brokered deposits, however, could be substantially higher than the Traditional Bank deposits they replace, potentially decreasing the Company s earnings.

The Company s liquidity risk increases significantly during the first quarter of each year due to the RAL program. The Company has committed to its electronic filer and tax-preparer base that it will make RALs available to their customers under the terms of its contracts with them. This requires the Company to estimate liquidity, or funding needs for the RAL program, well in advance of the tax season. If management materially overestimates the need for funding during the tax season, a significant expense could be incurred without an offsetting revenue stream. If management materially underestimates its funding needs during the tax season, the Company could experience a significant shortfall of capital needed to fund RALs and could potentially be required to stop or reduce its RAL originations.

For additional discussion regarding RAL Provision for Loan Losses see Footnote 3 Loans and Allowance for Loans Losses.

The Parent Company s principal source of funds for dividend payments are dividends received from RB&T. Banking regulations limit the amount of dividends that may be paid to the Parent Company by the Bank without prior approval of the respective states banking regulators.

Under these regulations, the amount of dividends that may be paid in any calendar year is limited to the current year s net profits, combined with the retained net profits of the preceding two years. At March 31, 2010 RB&T could, without prior approval, declare dividends of approximately $67 million. The Company does not plan to pay dividends from its Florida subsidiary, Republic Bank, in the foreseeable future.

Capital

Total stockholders equity increased from $316 million at December 31, 2009 to $357 million at March 31, 2010. The increase in stockholders equity was primarily attributable to net income earned during the first quarter of 2010 reduced by cash dividends declared. In addition, stockholders equity also increased to a lesser extent from stock option exercises during the first quarter of 2010.

See Part II, Item 2. Unregistered Sales of Equity Securities and Use of Proceeds for additional detail regarding stock repurchases and buy back programs.

Regulatory Capital Requirements The Parent Company and the Bank are subject to various regulatory capital requirements administered by banking regulators. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on Republic s financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Parent Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company s assets, liabilities and certain off balance sheet items, as calculated under regulatory

accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Prompt corrective action regulations provide five classifications: well-capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and capital restoration plans are required. At March 31, 2010 and December 31, 2009, the most recent regulatory notifications categorized the Bank as well-capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that management believes have changed the institution s category.

Banking regulators have categorized the Bank as well-capitalized. To be categorized as well-capitalized, the Bank must maintain minimum Total Risk Based, Tier I Capital and Tier I Leverage Capital ratios. Regulatory agencies measure capital adequacy within a framework that makes capital requirements, in part, dependent on the individual risk profiles of financial institutions. Republic continues to exceed the regulatory requirements for Total Risk Based Capital, Tier I Capital and Tier I Leverage Capital. Republic and the Bank intend to maintain a capital position that meets or exceeds the well-capitalized requirements as defined by the FRB, FDIC and the OTS. Republic s average capital to average assets ratio was 7.52% at March 31, 2010 compared to 8.95% at December 31, 2009. Formal measurements of the capital ratios for Republic and the Bank are performed by the Company at each quarter end.

In 2004, the Company executed an intragroup trust preferred transaction, with the purpose of providing RB&T access to additional capital markets, if needed, in the future. On a consolidated basis, this transaction has had no impact on the capital levels and ratios of the Company. The subordinated debentures held by RB&T, as a result of this transaction, however, are treated as Tier 2 Capital based on requirements administered by the Bank s federal banking agency. If RB&T s Tier I Capital ratios should not meet the minimum requirement to be well-capitalized, the Company could immediately modify the transaction in order to maintain its well-capitalized status.

In 2005, Republic Bancorp Capital Trust (RBCT), an unconsolidated trust subsidiary of Republic Bancorp, Inc., was formed and issued $40 million in Trust Preferred Securities (TPS). The TPS pay a fixed interest rate for ten years and adjust with LIBOR + 1.42% thereafter. The TPS mature on September 30, 2035 and are redeemable at the Company s option after ten years. The subordinated debentures are treated as Tier I Capital for regulatory purposes. The sole asset of RBCT represents the proceeds of the offering loaned to Republic Bancorp, Inc. in exchange for subordinated debentures which have terms that are similar to the TPS. The subordinated debentures and the related interest expense, which are payable quarterly at the annual rate of 6.015%, are included in the consolidated financial statements. The proceeds obtained from the TPS offering have been and will continue to be utilized to fund loan growth (in prior years), support an existing stock repurchase program and for other general business purposes such as the acquisition of GulfStream Community Bank in October of 2006.

The following table sets forth the Company s risk based capital amounts and ratios as of March 31, 2010 and December 31, 2009:

Table of Contents

Table 9 Capital Ratios

(dollars in thousands)		As of March 31, 2010 Actual Amount	Ratio		As of December 31, 2009 Actual Amount	Ratio
Total Risk Based Capital (to Risk Weighted Assets)						
Republic Bancorp, Inc.	$	405,827	20.34%	$	360,997	18.37%
Republic Bank & Trust Co.		376,183	19.51		312,200	16.42
Republic Bank		18,637	28.54		19,066	30.94
Tier I Capital (to Risk Weighted Assets)						
Republic Bancorp, Inc.	$	381,155	19.11%	$	339,030	17.25%
Republic Bank & Trust Co.		328,877	17.06		267,553	14.07
Republic Bank		17,821	27.29		18,296	29.70
Tier I Leverage Capital (to Average Assets)						
Republic Bancorp, Inc.	$	381,155	8.64%	$	339,030	10.52%
Republic Bank & Trust Co.		328,877	7.59		267,553	8.55
Republic Bank		17,821	17.05		18,296	16.07

Asset/Liability Management and Market Risk

Asset/liability management control is designed to ensure safety and soundness, maintain liquidity and regulatory capital standards and achieve acceptable net interest income. Interest rate risk is the exposure to adverse changes in net interest income as a result of market fluctuations in interest rates. The Company, on an ongoing basis, monitors interest rate and liquidity risk in order to implement appropriate funding and balance sheet strategies. The Company considers interest rate risk to be Republic s most significant market risk.

The interest sensitivity profile of Republic at any point in time will be impacted by a number of factors. These factors include the mix of interest sensitive assets and liabilities, as well as their relative pricing schedules. It is also influenced by market interest rates, deposit growth, loan growth and other factors.

Republic utilized an earnings simulation model to analyze net interest income sensitivity. Potential changes in market interest rates and their subsequent effects on net interest income were evaluated with the model. The model projects the effect of instantaneous movements in interest rates of both 100 and 200 basis point increments equally across all points on the yield curve. These projections are computed based on various assumptions, which are used to determine the 100 and 200 basis point increments, as well as the base case (which is a twelve month projected amount) scenario. Assumptions based on growth expectations and on the historical behavior of Republic s deposit and loan rates and their related balances in relation to changes in interest rates are also incorporated into the model. These assumptions are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact of fluctuations in market interest rates on net interest income. Actual results will differ from the model s simulated results due to timing, magnitude and frequency of interest rate changes, as well as changes in market conditions and the application and timing of various management strategies. Additionally, actual results could differ materially from the model if interest rates do not move equally across all points on the yield curve.

The Company did not run a model simulation for declining interest rates as of March 31, 2010 and December 31, 2009, because the FOMC effectively lowered the FFTR between 0.00% to 0.25% in December 2008 and therefore, no further short-term rate reductions can occur. The primary reasons for the indicated change in net interest income in an up interest rate scenario are as follows: the large amount of immediately repricing cash at the FRB held by the Company at March 31, 2010, the large amount of FHLB advances with maturities extended during 2009, floating rate investment security purchases and declining fixed rate loan balances. If the Company implements strategies to mitigate the risk of rising interest rates in the future, these strategies will likely lessen the Company s forecasted base case net interest income in the event of no interest rate changes.

Table of Contents

The following tables illustrate Republic s projected net interest income sensitivity profile based on the asset/liability model as of March 31, 2010. The Company s interest rate sensitivity model does not include loan fees within interest income. During the three months ended March 31, 2010 and 2009, loan fees included in interest income were $51.2 million and $57.8 million, respectively.

Table 10 Interest Rate Sensitivity for 2010

		Increase in Rates	
(dollars in thousands)	**Base**	**100 Basis Points**	**200 Basis Points**
Projected interest income:			
Short-term investments	$ 850	$ 4,226	$ 7,582
Investment securities	14,774	17,387	19,930
Loans, excluding loan fees*(1)*	117,725	122,665	129,163
Total interest income, excluding loan fees	133,349	144,278	156,675
Projected interest expense:			
Deposits	12,543	20,872	28,351
Securities sold under agreements to repurchase	690	3,446	6,203
Federal Home Loan Bank advances and other long-term borrowings	19,634	20,433	21,370
Total interest expense	32,867	44,751	55,924
Net interest income, excluding loan fees	$ 100,482	$ 99,527	$ 100,751
Change from base		$ (955)	$ 269
% Change from base		-0.95%	0.27%

(1) Consideration was not given to the impact of increasing and decreasing interest rates on RALs, which are fee based and occur substantially all in the first quarter of the year.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Information required by this item is included under Part I, Item 2., Management s Discussion and Analysis of Financial Condition and Results of Operation.

Item 4. Controls and Procedures.

As of the end of the period covered by this report, an evaluation was carried out by Republic Bancorp, Inc. s management, with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Company s Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report. In addition, no change in the Company s internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the fiscal quarter covered by this report that has materially affected, or is reasonably likely to materially affect, the Company s internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

In the ordinary course of operations, Republic and the Bank are defendants in various legal proceedings. In the opinion of management, there is no proceeding pending or, to the knowledge of management, threatened litigation in which an adverse decision could result in a material adverse change in the business or consolidated financial position of Republic or the Bank.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Details of Republic s Class A Common Stock purchases during the first quarter of 2010 are included in the following table:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Programs
January 1 - January 31		$		
February 1 - February 28	2,893*	16.99		

March 1 - March 31	3,344	18.45	3,344	
Total	6,237	$ 17.77	3,344	340,901

** - Represents shares received by the Company in connection with stock option exercises.*

During the first quarter of 2010, the Company repurchased 3,344 shares and there were 2,893 shares exchanged for stock option exercises. During the fourth quarter of 2009, the Company s Board of Directors amended its existing share repurchase program by approving the repurchase of 300,000 shares from time to time, as market conditions are deemed attractive to the Company. The repurchase program will remain effective until the total number of shares authorized is repurchased or until Republic s Board of Directors terminates the program. As of March 31, 2010, the Company had 340,901 shares which could be repurchased under the current share repurchase programs.

During the first quarter of 2010, there were no shares of Class A Common Stock issued upon conversion of shares of Class B Common Stock by stockholders of Republic in accordance with the share-for-share conversion provision option of the Class B Common Stock. The exemption from registration of the newly issued Class A Common Stock relied upon was Section (3)(a)(9) of the Securities Act of 1933.

There were no equity securities of the registrant sold without registration during the quarter covered by this report.
