### **Production from FPSO Brasil halted**

---

(Rio de Janeiro, May 26, 2004). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA], a Brazilian international energy company, informs that in the afternoon of May 25, an abnormality was noted in the flare stack onboard FPSO BRASIL, operating in the Roncador field, and indicating an effective risk to its structure and, consequently, the safety of the platform and its crew.

Production was halted at 11:30 p.m. to allow an inspection of the flare stack and determine appropriate repairs. During today, May 26, the plant was inertized and depressurized to allow safe access to the flare stack. Due to weather conditions, it has still not been possible to identify the problem precisely or to assess the time necessary for repairs and resumption in oil and gas production.

Gas exports from FPSO BRASIL had been suspended since May 22 to enable work to take place on the linking of a new stretch of gas pipeline to the main network in the northern area of the Campos Basin and in line with the production program already notified to the National Oil Agency (Agência Nacional do Petróleo).

The FPSO BRASIL is a production unit owned by Single Buoy Moorings Inc. - SBM, and was chartered by Petrobras for lifting oil in the region known as Módulo 1A in the Roncador Field. FPSO BRASIL went into production in December 2002 and currently produces about 95,000 bpd of oil and 1.6 million m3/day of gas.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
