PRIOR FILINGS MODIFIED AND SUPERSEDED

The Registrants' Annual Report on Form 40-F for the year ended December 31, 2003, at the time of filing with the Securities and Exchange Commission, modifies and supersedes all prior documents filed pursuant to Sections 13, 14 and 15(d) of the Exchange Act for purposes of any offers or sales of any securities after the date of such filing pursuant to any Registration Statement under the Securities Act of 1933 of either Registrant which incorporates by reference such Annual Report, including without limitation the following: Form S-8 No. 333-13846 (Canadian Pacific Railway Limited); and Form S-8 No. 333-13962 (Canadian Pacific Railway Limited). The documents (or portions thereof) identified under the heading "Documents Filed as Part of This Report" below as forming part of this Form 40-F are incorporated by reference into the Registration Statement on Form F-9 No. 333-14014 (Canadian Pacific Railway Company) as exhibits thereto.

**CONSOLIDATED AUDITED ANNUAL FINANCIAL STATEMENTS AND
MANAGEMENT'S DISCUSSION AND ANALYSIS**

A. Audited Annual Financial Statements

For consolidated audited financial statements, including the report of the auditors with respect thereto, see pages 31 through 74 of the Registrants' 2003 Annual Report incorporated by reference and included herein. For a reconciliation of important differences between Canadian and United States generally accepted accounting principles, see Note 25 Supplementary Data of the Notes to Consolidated Financial Statements on pages 66 through 74 of such 2003 Annual Report.

B. Management's Discussion and Analysis

For management's discussion and analysis, see pages 1 through 30 of the Registrants' 2003 Annual Report incorporated by reference and included herein.

For the purposes of this Annual Report on Form 40-F, only pages 1 through 74 of the Registrants' 2003 Annual Report referred to above shall be deemed filed, and the balance of such 2003 Annual Report, except as it may be otherwise specifically incorporated by reference in the Registrants' Annual Information Form, shall be deemed not filed with the Securities and Exchange Commission as part of this Annual Report on Form 40-F under the Exchange Act.

DISCLOSURE CONTROLS AND PROCEDURES

As of December 31, 2003, an evaluation was carried out under the supervision of and with the participation of the Registrants' management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Registrants' disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective as of December 31, 2003.

CHANGES IN INTERNAL CONTROLS OVER FINANCIAL REPORTING

During the period covered by this Annual Report on Form 40-F no changes occurred in the Registrants' internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Registrants'

internal control over financial reporting.

Table of Contents

CODE OF BUSINESS ETHICS

The Registrants revised their general Code of Business Ethics in 2003, in part to update and clarify certain provisions and also to ensure that it was in compliance with the new corporate governance standards of the New York Stock Exchange (NYSE Standards). The revised Code, approved by the board of Canadian Pacific Railway Limited (CPRL) in December 2003, applies to all directors, officers and employees, both unionized and non-unionized, of the Registrants and their subsidiaries in Canada, the U.S. and elsewhere, and forms part of the terms and conditions of employment of all such individuals. Contractors engaged on behalf of the Registrants or their subsidiaries must undertake, as a condition of their engagement, to adhere to principles and standards of business conduct consistent with those set forth in the revised Code. The revised Code is available on the Registrants web site at www.cpr.ca and in print to any shareholder who requests it. All amendments to the revised Code, and all waivers of the revised Code with respect to any director or executive officer of the Registrants, will be posted on the Registrants web site and provided in print to any shareholder who requests them.

CODE OF ETHICS FOR CHIEF EXECUTIVE OFFICER AND SENIOR FINANCIAL OFFICERS

The Registrants have adopted a Code of Ethics for Chief Executive Officer and Senior Financial Officers. This code applies to the Registrants President and Chief Executive Officer, the Executive Vice-President and Chief Financial Officer and the Vice-President and Comptroller. It is available on the Registrants web site at www.cpr.ca and in print to any shareholder who requests it. All amendments to the code, and all waivers of the code with respect to any of the officers covered by it, will be posted on the Registrants web site and provided in print to any shareholder who requests them.

CORPORATE GOVERNANCE GUIDELINES

The Registrants have adopted corporate governance guidelines regarding such matters as, but not limited to: director qualification standards and responsibilities; access by directors to management and independent advisors; director compensation; director orientation and continuing education; management succession; and annual performance evaluations of the board. The guidelines are available on the Registrants web site at www.cpr.ca and in print to any shareholder who requests them.

COMMITTEE TERMS OF REFERENCE

The terms of reference of each of the following committees of the Registrants are available on the Registrants web site at www.cpr.ca and in print to any shareholder who requests them: the Audit, Finance and Risk Management Committee; the Corporate Governance and Nominating Committee; and the Management Resources and Compensation Committee.

DIRECTOR INDEPENDENCE

The boards of the Registrants have adopted the criteria for director independence and unrelatedness: (a) prescribed by the Sarbanes-Oxley Act of 2002, Section 10A(m)(3) of the Exchange Act and Rule 10A-3(b)(1) promulgated thereunder, for members of public company audit committees; and (b) set forth in the NYSE Standards and the Corporate Governance Guidelines of the Toronto Stock Exchange, as proposed to be amended in April and November 2002 (TSX Guidelines), in respect of public company directors. The boards also conducted a

comprehensive assessment of each of their members as against these criteria and determined that all current directors, except R.J. Ritchie, have no material relationship with the Registrants and are independent and unrelated. Mr. Ritchie is not independent or unrelated by virtue of the fact that he is the President and Chief Executive Officer of the Registrants.

Table of Contents

EXECUTIVE SESSIONS OF NON-MANAGEMENT DIRECTORS

The Corporate Governance and Nominating Committees of the boards of the Registrants are comprised of the same directors, being all the non-management directors on the boards. The Corporate Governance and Nominating Committees of the Registrant meet prior to every meeting of the Registrants' boards. They are chaired by Mr. J.E. Newall, who is also Chairman of the boards of the Registrants. Interested parties may communicate directly with Mr. Newall by writing to him at the following address, and all communications received at this address will be forwarded to him:

Office of the Corporate Secretary
Canadian Pacific Railway
Suite 2000, 401 - 9th Avenue, S.W.
Calgary, Alberta
Canada
T2P 4Z4

AUDIT COMMITTEE FINANCIAL EXPERTS

The following individuals comprise the entire membership of the Registrants' Audit, Finance and Risk Management Committees (Audit Committees), which have been established in accordance with Section 3(a)(58)(A) of the Exchange Act:

Stephen E. Bachand
John E. Cleghorn
Roger Phillips
Michael W. Wright

Each of the aforementioned directors has been determined by the boards of the Registrants to meet the audit committee financial expert criteria prescribed by the Securities and Exchange Commission and has been designated as an audit committee financial expert for the Audit Committees of the boards of both Registrants. Each of the aforementioned directors has also been determined by the boards of the Registrants to be independent within the criteria referred to above under the subheading Director Independence .

FINANCIAL LITERACY OF AUDIT COMMITTEE MEMBERS

The boards of the Registrants have determined that all members of the Audit Committees have accounting or related financial management expertise within the meaning of the NYSE Standards and accounting or related financial expertise within the meaning of the TSX Guidelines. The boards have also adopted the definition of financial literacy contained in the practice notes of the TSX Guidelines and has determined that all members of the Audit Committees are financially literate within that definition.

SERVICE ON OTHER PUBLIC COMPANY AUDIT COMMITTEES

Two members of the Registrants' Audit Committees, J.E. Cleghorn and R. Phillips, each serve on a total of four public company audit committees. The boards of the Registrants do not limit the number of public company audit committees on which the members of the Audit Committees serve.

The boards of the Registrants have determined that the service of Messrs. Cleghorn and Phillips on more than three public company audit committees does not impair their ability to effectively serve on the Audit Committees of the Registrants, for the following reasons:

Table of Contents

Two of the public company audit committees on which they serve are the Audit Committees of the Registrants. As Canadian Pacific Railway Company is a wholly-owned subsidiary of Canadian Pacific Railway Limited, and the latter company carries on no business operations and has no assets or liabilities of more than nominal value beyond its 100% shareholding in Canadian Pacific Railway Company, the workload of the Audit Committees is essentially equivalent to the workload of one public company audit committee;

Two of the public companies on whose audit committees Mr. Cleghorn serves have a holding company/operating company relationship similar to that between the Registrants. Consequently, the workload involved in such audit committees is essentially equivalent to the workload of one public company audit committee; and

Messrs. Cleghorn and Phillips are both retired chief executive officers of large public companies and qualify, and have been designated as, audit committee financial experts for the Registrants. As a result, they no longer have any day-to-day executive or managerial responsibilities and, in addition, bring to their roles on the Audit Committees of the Registrants considerable business experience and a highly-focused and effective approach to audit-related matters.

PRINCIPAL ACCOUNTING FEES AND SERVICES INDEPENDENT AUDITORS

Fees payable to the Registrants independent auditor, PricewaterhouseCoopers, LLP for the years ended December 31, 2003, and December 31, 2002, totaled \$1,501,000 and \$2,447,000, respectively, as detailed in the following table:

	Year ended December 31, 2003	Year ended December 31, 2002
Audit Fees	\$ 855,000	\$ 885,000
Audit Related Fees	\$ 329,000	\$ 245,000
Tax Fees	\$ 310,000	\$ 589,000
All Other Fees	\$ 7,000	\$ 728,000
TOTAL	\$ 1,501,000	\$ 2,447,000

The nature of the services provided by PricewaterhouseCoopers LLP under each of the categories indicated in the table is described below.

Audit Fees

Audit fees were for professional services rendered by PricewaterhouseCoopers LLP for the audit of the Registrants annual financial statements and services provided in connection with statutory and regulatory filings or engagements.

Audit-Related Fees

Audit-related fees were for assurance and related services reasonably related to the performance of the audit or review of the annual statements and are not reported under Audit Fees above. These services consisted of: special attest services as required by various government entities; accounting consultations and special audits in connection with acquisitions; the audit of financial statements of certain subsidiaries and of various pension and benefits plans of the Registrants; the audit of fuel indices; assistance with prospectus filings; and assistance with preparations for compliance with section 404 of the *Sarbanes-Oxley Act of 2002*.

Tax Fees

Tax fees were for tax compliance, tax advice and tax planning professional services. These services consisted of: tax compliance including the review of tax returns; assistance with questions regarding tax audits, the preparation of

Table of Contents

employee tax returns under the Registrants' expatriate tax services program and assistance in completing routine tax schedules and calculations; tax planning and advisory services relating to common forms of domestic and international taxation (i.e. income tax, capital tax, goods and services tax, and valued added tax); and, in 2002, assistance with tax filings in connection with the reorganization of the Registrants' former parent company, Canadian Pacific Limited.

All Other Fees

Fees disclosed under this category were for products and services other than those described under 'Audit Fees', 'Audit-Related Fees' and 'Tax Fees' above. In 2003, these services consisted of assistance in reviewing an agreement and proposed transaction, and in 2002 of: assistance with insurance claims; consultation on computer systems for human resources, freight handling, management reporting and budgeting; financial information systems design and implementation services, which services were completed before July 30, 2002, and assistance with financial forecasting for a proposed joint venture.

**PRE-APPROVAL OF AUDIT AND NON-AUDIT SERVICES PROVIDED BY
INDEPENDENT AUDITORS**

The Audit Committees pre-approve all audit services to be provided to the Registrants by their independent auditors. The Audit Committees' policy regarding the pre-approval of non-audit services to be provided to the Registrants by their independent auditors is that all such services shall be pre-approved by the Audit Committees or by the Chairman of the Audit Committees, who must report all such pre-approvals to the Audit Committees at their next meeting following the granting thereof. Non-audit services that are prohibited to be provided to the Registrants by their independent auditors may not be pre-approved. In addition, prior to the granting of any pre-approval, the Audit Committees or their Chairman, as the case may be, must be satisfied that the performance of the services in question will not compromise the independence of the independent auditors.

OFF-BALANCE SHEET ARRANGEMENTS

A description of the Registrants' off-balance sheet arrangements is set forth on page 19 of the Registrants' 2003 Annual Report incorporated by reference and included herein.

TABLE OF CONTRACTUAL COMMITMENTS

The table setting forth the Registrants' contractual commitments is set forth on page 20 of the Registrants' 2003 Annual Report incorporated by reference and included herein.

Table of Contents

UNDERTAKING AND CONSENT TO SERVICE OF PROCESS

A. Undertaking

Each Registrant undertakes to make available, in person or by telephone, representatives to respond to inquiries made by the Commission staff, and to furnish promptly, when requested to do so by the Commission staff, information relating to: the securities registered pursuant to Form 40-F; the securities in relation to which the obligation to file an annual report on Form 40-F arises; or transactions in said securities.

B. Consent to Service of Process

A Form F-X signed by Canadian Pacific Railway Limited and its agent for service of process was filed with the Commission together with Canadian Pacific Railway Limited's Annual Report on Form 40-F for the fiscal year ended December 31, 2000. A Form F-X signed by Canadian Pacific Railway Company and its agent for service of process was filed with the Commission together with Canadian Pacific Railway Company's Annual Report on Form 40-F for the fiscal year ended December 31, 1992.

SIGNATURES

Pursuant to the requirements of the Exchange Act, each Registrant certifies that it meets all of the requirements for filing on Form 40-F and has duly caused this Annual Report on Form 40-F to be signed on its behalf by the undersigned, thereto duly authorized, in the City of Calgary, Province of Alberta, Canada.

ITEM 2 CORPORATE STRUCTURE

Canadian Pacific Railway Limited

Canadian Pacific Railway Limited (the Company or CPR) was incorporated on June 22, 2001, as 3913732 Canada Inc. pursuant to the Canada Business Corporations Act (the CBCA). On July 20, 2001, CPR amended its Articles of Incorporation to change its name to Canadian Pacific Railway Limited . On October 1, 2001, Canadian Pacific Limited (CPL) completed an arrangement (the Arrangement) whereby it distributed to its common shareholders all of the shares of newly-formed corporations holding the assets of four of CPL 's five primary operating divisions. The Arrangement was effected as an arrangement pursuant to section 192 of the CBCA. On September 26, 2001, the Arrangement was approved by the shareholders of CPL and Canadian Pacific Railway Company (CPRC), previously a wholly-owned subsidiary of CPL, was transferred to CPR effective October 1, 2001. ***In this Annual Information Form, unless the context requires otherwise, CPR and the Company refers to Canadian Pacific Railway Limited and, where applicable, its subsidiaries, including CPRC.***

CPR 's registered office, executive offices and principal place of business are located at Suite 500, 401 9th Avenue S.W., Calgary, Alberta T2P 4Z4.

Table of Contents**ITEM 2 CORPORATE STRUCTURE**

Principal Subsidiaries

The table below sets out the Company's principal subsidiaries, including the jurisdiction of incorporation and the percentage of voting and non-voting securities currently owned directly or indirectly by the Company:

Principal Subsidiary	Incorporated under the laws of	Percentage of voting securities held directly or indirectly	Percentage of non-voting securities beneficially owned, or over which control or direction is exercised
Canadian Pacific Railway Company	Canada	100%	Not applicable.
Soo Line Corporation	Minnesota	100%	Not applicable.
Soo Line Railroad Company ⁽¹⁾	Minnesota	100%	Not applicable.
Delaware and Hudson Railway Company, Inc. ⁽¹⁾	Delaware	100%	Not applicable.

Notes:

- (1) Soo Line Railroad Company and Delaware and Hudson Railway Company, Inc. are wholly-owned subsidiaries of Soo Line Corporation.

Table of Contents

ITEM 3 GENERAL DEVELOPMENT OF THE BUSINESS

Significant Acquisition

Pursuant to the Arrangement, CPRC became a wholly-owned subsidiary of CPR effective October 1, 2001.

Development of CPR

CPRC was incorporated by Letters Patent in 1881 pursuant to an Act of the Parliament of Canada. CPRC is one of Canada's oldest corporations and was North America's first transcontinental railway. From its inception over 120 years ago, CPRC has developed into a fully-integrated and technologically-advanced Class 1 railway (a railroad earning revenues of US\$258.5 million annually) providing rail and intermodal freight transportation services over a 13,850-mile network serving the principal business centres of Canada, the U.S. Midwest and the U.S. Northeast.

Of the total mileage operated by CPR, approximately 6,900 miles are located in western Canada, 2,200 miles in eastern Canada, 3,250 miles in the U.S. Midwest and 1,500 miles in the U.S. Northeast. CPR owns 9,550 miles of track and an additional 4,300 miles of track are jointly owned, leased or operated under trackage rights.

CPR's business is based on funnelling traffic from network feeders and connectors, carrying railway traffic to and from the main rail lines, onto a 4,700-mile high-density, high-quality railway network. CPR has extended its network reach by establishing alliances and connections with other major Class 1 railways in North America, which allows CPR to provide competitive product offerings and access to markets across North America and, via the Port of Montreal, Québec, and the Port of Vancouver, British Columbia, to markets in Europe and the Pacific Rim, respectively.

CPR's network accesses the U.S. market directly through two wholly-owned subsidiaries: Soo Line Railroad Company (Soo Line), a Class 1 railway operating in the U.S. Midwest; and Delaware and Hudson Railway Company, Inc. (D&H), which operates between eastern Canada and major U.S. Northeast markets including New York City, New York; Philadelphia, Pennsylvania; and Washington, D.C.

Strategy

CPR's goals are to become the preferred business partner for rail-based transportation services in North America and to be at the forefront of the industry in operating profitability and return on capital employed. Its principal strategies to accomplish these goals include maximizing the strengths of its North American railway franchise by operating a low-cost scheduled railway, developing new products and services in cooperation with customers and partners, and extending the reach of the franchise through marketing and operating partnerships and alliances with other railroads and transport companies in North America. CPR's overall marketing and sales activities within each business group are focused on targeted growth, product efficiency and maximizing value from existing assets.

Recent History

Since 1997, CPR has focused on franchise renewal, increasing network efficiency, asset maintenance efficiency and asset utilization, train operations productivity and labour productivity. The following table summarizes the impact of these strategies on a number of industry recognized performance indicators:

Table of Contents**ITEM 3 GENERAL DEVELOPMENT OF THE BUSINESS**

Performance Indicators	Year ended December 31				
	2003	2002	2001	2000	1999
Traffic density (GTMs ⁽¹⁾ per mile of road operated, before track on which CPR has haulage rights (thousands))	15,884	15,107	15,326	15,183	13,453
Employee productivity (GTMs per average active employee (thousands))	13,640	13,005	12,535	11,798	10,080
Fuel efficiency (U.S. gallons of fuel per 1,000 GTMs)	1.25	1.24	1.25	1.29	1.37
Locomotive utilization (GTMs per active locomotive per day (thousands))	659	673	681	652	578
Total operating expenses per GTM (cents)*	1.33	1.34	1.34	1.33	1.42
Average train weights (tons)	5,492	5,473	5,580	5,418	5,127
Annual return on capital employed (after taxes)(%)(³)	7.3	9.1	8.7	9.5	9.1
Operating income (\$ millions)*(²)	740.6	856.5	841.0	845.2	762.3
Operating ratio (%)*	79.8	76.6	77.3	76.9	78.2

*Excludes other specified items.

Notes:

- (1) Gross Ton-Miles (GTM) of freight measure the movement of total train weight over one mile in a year. The total train weight is comprised of the weight of the freight cars, their contents and locomotives being returned to terminals.
- (2) For reconciliation to GAAP operating income see Income Statement Data table in Item 5.
- (3) Return on capital employed (after taxes) is calculated as income, before other specified items and FX on LTD, less interest expense, divided by average net-debt-plus-equity, and multiplied by one minus CPR's normalized tax rate for each respective period.

Network Efficiency

CPR continues to increase the capacity of its core franchise through infrastructure-sharing and joint-service programs with other railways, strategic capital investment programs, and operating plan strategies. Combined with the continued improvement of CPR's locomotive fleet, these strategies enable CPR to achieve more predictable and fluid train operations between major terminals.

CPR has expanded its physical network with the following infrastructure-sharing and joint-service programs:

CPR-CSX Transportation, Inc. (CSX) track connection at Detroit, Michigan reduces transit times and improves consistency of service between eastern Canada and the U.S. Midwest;

CPR-Union Pacific Corporation (Union Pacific) provides joint service from western Canada to the U.S. Pacific-Northwest, California and Arizona and to Texas/Mexico and Kansas/Missouri; and

CPR-Norfolk Southern Corporation joint intermodal service between the Port of New York/New Jersey and eastern Canada reduces transit times for import-export shippers. CPR constructed a new passing siding at Clarks Summit, Pennsylvania and granted Norfolk Southern Railway Company (NS) trackage rights between Sunbury, Pennsylvania and Mechanicville, New York in order to increase traffic and improve freight service to upstate New York, northern Pennsylvania and New England.

Table of Contents

ITEM 3 GENERAL DEVELOPMENT OF THE BUSINESS

In 2002 and 2003, CPR spent approximately \$25 million to extend the length of 16 rail sidings throughout northern and eastern Ontario in order to increase operating efficiency and reduce costs. A siding is a limited length of track parallel to the main line and linked to it at both ends by switches, enabling trains running in either direction to pass each other. Longer sidings permit the use of longer and fewer trains. It also permits fewer locomotives to be used to move the same amount of freight in a given rail corridor. CPR has identified other corridor bottlenecks on its network and a plan is in place to provide appropriate capacity in order to increase train density and fluidity on all its major routes.

In 2003, CPR sold a lower-density 12.6-km (7.8-mile) rail line in northern New Brunswick known as the Edmunston Spur to Canadian National Railway (CN). This line runs between Grand Falls and Cyr Junction, near St. Leonard, New Brunswick. CPR also sold a 32.5-mile rail line that runs from Madison to Watertown, Wisconsin to the Wisconsin & Southern Railroad.

Franchise Renewal

Franchise renewal is an integral part of CPR's multi-year capital program. From 2001 to 2003 the Company has invested approximately \$1.9 billion in its core assets. CPR continually refines its investment program in order to generally keep annual average capital spending at approximately 18% of revenues while also increasing funding of network maintenance programs to ensure its plant, property, and equipment assets are well maintained. Through its franchise renewal program, CPR continues to focus its capital spending on those assets that improve its capacity and productivity and the reliability of its services.

CPR's annual program to modernize and upgrade its core strategic assets typically includes track and facilities (including rail yards and intermodal terminals); locomotives; information technology; and freight cars and other equipment investments. Over the three-year period from 2001 to 2003, CPR invested approximately \$1.2 billion in track and facilities, about \$250 million in locomotives, and approximately \$446 million in information technology, growth initiatives, freight cars and other equipment.

Locomotive Fleet Modernization

CPR has upgraded its locomotive fleet with the acquisition of high-adhesion alternating current (AC) locomotives, which are more fuel efficient and reliable and have superior haulage capacity relative to standard direct current (DC) locomotives. CPR's locomotive fleet now includes 507 AC locomotives, representing approximately 47% of CPR's road-freight locomotive fleet, and handling about 65% of CPR's workload. This investment has improved CPR's service reliability and has produced cost savings in fuel, equipment rents and maintenance. It has also allowed CPR to remove from service 147 older DC locomotives in the last three years and enabled CPR to more efficiently utilize its repair and maintenance facilities.

Railcar Fleet Modernization

Starting in 1998, and continuing through 2003, CPR undertook a freight-car modernization program to fully leverage its rail network and locomotive fleet. The program's general aim included the following objectives:

1. increase the productivity and standardization of each car fleet;
2. secure lower lease costs by reducing CPR's reliance on short-term leasing; and
3. improve customer satisfaction through the introduction of higher-capacity cars.

Table of Contents**ITEM 3 GENERAL DEVELOPMENT OF THE BUSINESS**

In 2003, CPR introduced its Intermodal Fleet Renewal (IFR) initiative in order to increase the density of its intermodal trains and allow CPR to move more containers with fewer trains. The plan of the IFR is to bring on 5,500 new double-stack cars in 2003 and 2004 that will be a mix of both 53- and 40-foot equipment.

Freight cars owned and long-term leased

	<u>2003</u>	<u>2002</u>	<u>2001</u>
Covered Hoppers⁽¹⁾	25,100	23,200	23,800
Open Tops	4,600	5,500	4,000
Box Cars	7,000	7,800	7,900
Gondolas	2,500	2,500	2,500
Flats	2,700	2,000	1,400
Intermodal	2,600	3,100	3,500
Automotive	3,100	3,500	3,300
	<u> </u>	<u> </u>	<u> </u>
Total	<u>47,600</u>	<u>47,600</u>	<u>46,400</u>

(1) includes 9,000 government cars.

Strengthening Business Fundamentals*Yield Management*

CPR believes that its customers, many of whom compete in global markets, demand competitively priced transportation service. In order to offer competitive prices to its customers, CPR has redesigned its train operations and terminal processes and is continually working at increasing productivity through cost-reduction programs and improving asset utilization through initiatives aimed at targeted growth, product efficiency and maximizing value from existing resources. CPR has a Price and Yield management team to standardize price- and yield- business processes across the Company.

Train Operations Productivity

In 1999, CPR introduced a new operating plan to increase productivity, improve asset utilization and enhance service quality for customers. This means CPR is running longer, heavier trains more consistently to make connections and meet delivery commitments for less cost.

In December of 2003, CPR became the first railway in North America to operate intermodal freight trains with mid-train remote-control (Locotrol) locomotives. These remote-control units enable CPR to run intermodal trains approaching three kilometres in length through the winter. CPR extended the area of its Locotrol operation to encompass Moose Jaw, Saskatchewan to Toronto, Ontario and extended the use of Locotrol from exclusively bulk train operation to intermodal and mixed-manifest trains.

Asset Maintenance Efficiency

CPR has improved the efficiency of its repair facilities primarily through outsourcing arrangements and by reducing the costs of maintenance. CPR has improved the reliability of its locomotive fleet by entering into warranty service agreements with suppliers pursuant to which suppliers have made strict performance commitments.

In the second quarter of 2001, CPR entered into an agreement with Alstom Canada Inc. for the lease and operation of CPR's Ogden maintenance and repair shop in Calgary, CPR's primary rebuilding and heavy-repair facility.

In May 2002, CPR closed its Frog Shop in Lethbridge, Alberta. The shop produced second-hand frogs (a track component that allows trains to cross from one adjacent track to another) for use on CPR's network.

Table of Contents

ITEM 3 GENERAL DEVELOPMENT OF THE BUSINESS

In January 2003, coinciding with the purchase of 46 new AC locomotives, CPR announced an expansion of its warranty service agreements in eastern Canada, pursuant to which diesel locomotive manufacturers manage the ongoing servicing of CPR locomotives using CPR employees. As a result, approximately 70% of CPR's locomotive fleet is covered by service agreements containing strict performance commitments.

Information Technology

As a 24-hour-a-day, 7-day-a-week business, CPR relies heavily on its computer systems to schedule all components of its operations. Computer applications map out complex interconnections of freight cars, locomotives, facilities, track and train crews to meet more than 10,000 individual customer service commitments every day. CPR uses intricate automated traffic-forecasting systems, determines car routings and yard workloads using bypass and circuitry analysis software, and generates time-distance diagrams to examine track capacity.

CPR has substantially completed the implementation of a suite of new operating systems, collectively referred to as Service Excellence. This investment in information technology has assisted CPR in becoming a scheduled railway operation, by helping increase the productivity of CPR's asset base and improving customer service. The final step in the Service Excellence program is the implementation of the TYES software program in 2004. The TYES application is a rail-yard management system that manages shipment connections from train-to-train.

CPR is currently investing in a new application called TRIEX that will improve the efficiency and customer-service capabilities in its intermodal business. CPR is developing TRIEX in co-operation with a U.S.-based software firm. The Company expects TRIEX will be installed in early 2005. CPR is also updating its train-control system by moving it to a more current technological platform, thereby extending the life of this critical system by many years in line with the overall strategy of optimizing assets.

In late 2003, a transfer of assets to IBM Canada Ltd. was part of a seven-year, \$200-million agreement reached with IBM to operate and enhance CPR's computer infrastructure. CPR expects that this arrangement will reduce its costs over time and allow remaining information technology staff to focus on applications that improve efficiency and service.

Low-Cost Scheduled Railway Simplification of Processes

CPR invested \$3.3 billion in track infrastructure, terminals, rolling stock and information technology from 1997 through 2000 and a further \$1.9 billion between 2001 and 2003 to support the implementation of its scheduled railway operating philosophy. CPR believes improving its scheduled railway operations will further increase productivity, improve asset utilization and enhance service quality. This will be accomplished by continuing to refine the operating plan, making strategic capital investments aimed at reducing or eliminating existing train length and weight limitations while increasing traffic density and asset velocity, and entering into additional co-production initiatives with other Class 1 railway companies to more effectively utilize available networks.

Integrated Operating Plan

In May 1999, CPR launched its scheduled railway Integrated Operating Plan (IOP). Under the IOP, trains are scheduled to run consistently and at times agreed upon by CPR and the customer, thereby ensuring connections at intermediate terminals are made and delivery commitments are met. A plan is established for each rail car covering its entire trip from point of origin to final destination. Cars with similar destinations are consolidated into blocks, thus reducing delays at intermediate locations by simplifying processes for employees, eliminating the duplication of work

and helping to ensure fluid rail yards and terminals. These efficiencies help reduce transit times for shipments throughout CPR's network and increase car availability for customers. Since the implementation of the IOP, CPR has improved on-time performance of its premium intermodal train services and has increased terminal performance for its customers while delivering a significant reduction in the cost base of its operations.

CPR now operates a scheduled railway and strives to deliver high service quality to its customers and achieve a high level of efficiency through improved asset utilization. CPR is committed to further pursuing methods to improve the scheduling of trains with other railways and to develop systems designed to share advanced information, thereby improving service. In 2003, CPR's approach to scheduled-railway operations won the Franz Edelman Award for Achievement in Operations Research and the Management Sciences.

Table of Contents

ITEM 3 GENERAL DEVELOPMENT OF THE BUSINESS

Labour Productivity and Efficiency

CPR continually takes steps to increase the effectiveness of its organizational structure in order to increase its productivity and efficiency. Since 1996, the Company has centralized its management team to improve communication and decision-making, simplified the organization's management structure, and increased the responsibility given to management personnel. CPR regularly reviews its organizational processes, workforce needs and related organizational costs, thereby improving the productivity and efficiency of its workforce while reducing expenses. For example, CPR eliminated approximately 1,900 permanent positions in 2000 (representing approximately 10% of its workforce), including positions in management, administration, maintenance shops, train operations and track maintenance.

In 2001, CPR launched further cost-reduction initiatives, including the integration of the St. Lawrence & Hudson Railway Company Limited (previously a CPR subsidiary operating in eastern Canada), which have resulted in the elimination of approximately 800 positions. In addition, approximately 600 positions were transferred to service suppliers, who were able to improve utilization of CPR facilities through access to a larger customer base.

During 2002, CPR began new restructuring initiatives to reduce costs by eliminating an additional 85 positions. In the second quarter of 2003, CPR began a productivity program that will eliminate 820 positions by the end of 2005 through consolidation of administrative functions, applications of new information technology to improve the productivity of administrative functions and yard operations, and improvements in car and locomotive maintenance efficiency. The Company eliminated 360 positions under this new program by the end of 2003. Since January 1, 1996, CPR has reduced its total workforce by 30%.

In order to stimulate and reward employee participation in CPR's efficiency initiatives, CPR has implemented a number of incentive-based compensation programs designed to allow eligible employees, both unionized and non-unionized, to share in the savings they help generate for CPR.

North American Railway Franchise

CPR believes it is well positioned to achieve its goals because of its network and assets, its emphasis on customer service and its team of dedicated employees.

Network and Assets The competitive strengths of CPR's network and assets include the following:

CPR offers access to U.S. markets through 11 major interchanges and strong alliances with other Class 1 railways;

CPR handles the largest volume of intermodal containers through the Port of Montreal, a major North American gateway for European trade;

CPR has competitive access to new, state-of-the-art facilities at the Port of Vancouver, a major shipping gateway to and from Pacific Rim markets;

CPR offers the shortest rail route from the Port of Vancouver to the Chicago, Illinois rail hub;

CPR has made significant investments in efficient AC locomotives; and

CPR has invested strategically in new computer operating systems, enabling CPR to operate more effectively and efficiently for the benefit of its customers while further enhancing its scheduled-railway operations.

Customer-Oriented Initiatives CPR believes that its emphasis on customer service has differentiated CPR from its competitors and has allowed its customers to compete effectively in their respective markets, while permitting CPR to retain and enhance its customer base. Some of CPR's customer-oriented initiatives are as follows:

CPR has extended its rail lines directly to the new facilities of some of its key customers;

CPR has introduced services and acquired assets that are custom-designed for certain of its key customers;

Table of Contents

ITEM 3 GENERAL DEVELOPMENT OF THE BUSINESS

CPR's service quality has helped to motivate several of its significant intermodal customers to locate large distribution centres adjacent to CPR's intermodal terminals (for example, Sears, Canadian Tire and Consolidated Fastfrate); and

CPR has achieved a strong market position across a diversified base of customers and products through its cross-functional approach.

Dedicated Employees CPR considers its team of employees to be its most valued asset. Through results-sharing programs, CPR's employees have financial incentives to help CPR attain its goals.

Extending Franchise Reach

CPR aims to continue to increase revenue through initiatives designed to extend its business beyond the physical railway network, thereby providing the flexibility needed to capture market share from its competitors. CPR plans to extend its franchise reach by creating new markets and by concentrating on providing new products, expanded truck-rail transfer facilities and improved, value-added service through customer-relationship management.

New Product Offerings

CPR works with its customers to develop and introduce new products into the marketplace. For example, CPR introduced its Trans-Pacific initiative, a highly-efficient, freight-transportation service between the Port of Vancouver and Chicago for import-export intermodal containers. By working with the Port of Vancouver and the shipping lines to establish Vancouver, British Columbia as the preferred port for North America-bound deliveries from the Pacific Rim, CPR has created a competitive route for the movement of containers into the Chicago market. CPR continues to secure long-term agreements with customers in this corridor and has signed agreements with OOCL, Cosco, China Shipping, NYK, Columbus Lines and Lykes Lines Limited LLC, which are among, or are affiliated with, the world's largest container shipping companies.

Expanded Truck-Rail Transfer Facilities

CPR has also extended its franchise reach through the use of truck-rail transfer facilities, which it uses to gain competitive access to key resource production areas not directly served by the CPR network. This service will be provided through its logistics and supply chain division called Canadian Pacific Logistics Solutions (CPLS), which is further described below in the business categories.

Customer Relationship Management

The customer service team, located in Winnipeg, Manitoba; Calgary, Alberta; and Minneapolis, Minnesota, aims to provide value to customers through the use of technology, a formalized cross-functional approach to problem solving and the development of new opportunities for customers. CPR's customer service group also includes a damage-prevention team, which works with customers to ensure proper loading techniques are employed, enabling shipments to arrive in good condition.

CPR has put in place a customer relationship management (CRM) program directed at understanding and anticipating the needs of its current and potential customers. This program has better positioned CPR to:

understand customer needs and expectations;

deliver the expected product quality;

work with customers to generate new product ideas;

manage and improve the overall customer experience with CPR; and

continuously improve CPR's performance.

CPR will continue to build on this success through strengthened customer relationships and an increased focus on sustainable growth opportunities.

Table of Contents

ITEM 3 GENERAL DEVELOPMENT OF THE BUSINESS

Railway Partnerships and Alliances

In order for certain customers to transport their goods from their desired points of origin to their desired final destination points, goods may have to travel on more than one railway. Transfers of goods from railway to railway can cause delays and service interruptions. CPR's rail network connects to other North American rail carriers and in partnership continues to co-develop processes and products designed to provide seamless and efficient scheduled train service to these customers.

Recent Class 1 railway initiatives include:

a joint CPR-Union Pacific service from western Canada to the U.S. Pacific-Northwest, California and Arizona via Kingsgate, British Columbia;

a joint CPR-Union Pacific service from western Canada to the Texas/Mexico and Kansas/Missouri markets via Minneapolis;

a joint CPR-NS intermodal service between the Port of New York/New Jersey and eastern Canada;

CPR-NS trackage-rights agreement to handle NS traffic over CPR's D&H lines in the U.S. Northeast; and

a joint CPR-Union Pacific service from eastern Canada to the U.S. Gulf Coast and Mexico.

In addition, CPR also works with smaller (short-line or non-Class 1) railways to develop partnerships that benefit both parties.

Table of Contents

ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS

Network and Right of Way

CPR's network, shown in the map below, extends from the Port of Vancouver in Canada's west to the Port of Montreal in Canada's east and to the industrial centres of Chicago; New York City, New York; Newark, New Jersey; Buffalo, New York; Philadelphia and Washington, D.C. in the U.S.

The CPR network consists of four primary corridors: the Western Corridor, the Southern Corridor, the Central Corridor and the Eastern Corridor. Each of these corridors is complemented by a number of collector and feeder lines.

The Western Corridor: Vancouver-Moose Jaw

Overview The Western Corridor links Vancouver with Moose Jaw, which is the western-Canadian terminus of CPR's Southern and Central corridors. This corridor provides the shortest rail route for most bulk products transported from western Canada to the Port of Vancouver. It is also an important part of CPR's highly competitive service routes between Vancouver and the U.S. Midwest and between Vancouver and the major population centres in central and eastern Canada.

Products The Western Corridor is CPR's primary route for bulk and resource-products traffic from western Canada destined to the Port of Vancouver for export. Significant volumes of import-export intermodal containers and domestic general merchandise traffic are also handled over the Western Corridor. At its busiest location, the Western Corridor handles an average of approximately 33 trains per day.

Feeder Lines The Western Corridor is supported by two significant feeder lines, being the Coal Route, which connects the Western Corridor to coal producing centres in southeastern British Columbia and the Calgary-Edmonton Corridor which provides rail access to central Alberta's petrochemical industries, natural resources markets and Edmonton, Alberta.

Connections CPR's Western Corridor connects with Union Pacific at Kingsgate. This route forms part of the Pacific Can-Am Corridor, which provides direct rail service to locations in California. The Western Corridor also connects with the Burlington Northern Santa Fe Railway (BNSF) at Coutts, Alberta and New Westminster, British Columbia, and with BC Rail at North Vancouver, British Columbia.

Table of Contents

ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS

Yards and Repair Facilities Rail operations on the Western Corridor are supported by major rail yards at Vancouver, Calgary, Edmonton and Moose Jaw. In addition, CPR has significant intermodal terminals at Vancouver, Calgary and Edmonton, as well as locomotive and rail car repair facilities at Vancouver, Calgary and Moose Jaw.

The Southern Corridor: Moose Jaw-Chicago

Overview CPR's Southern Corridor connects with the Western Corridor at Moose Jaw and runs directly through Milwaukee, Wisconsin and the twin cities of Minneapolis and St. Paul, Minnesota, and south to Chicago providing a direct, single carrier route between western Canada and major population centres in the U.S. Midwest.

Products Predominant markets served on the Southern Corridor include import-export intermodal containers handled at the Port of Vancouver and Canadian fertilizers, chemicals, grain, automobiles and U.S. agricultural products. At its busiest location, the Southern Corridor handles an average of approximately 19 trains per day, excluding passenger and commuter trains.

Feeder Lines A significant feeder line connecting Glenwood, Minnesota and Winnipeg supports the Southern Corridor. This line is both a gathering network for U.S. grain as well as a route for Canadian fertilizers destined to the U.S.

CPR has operating rights over the BNSF line between Minneapolis and the twin ports of Duluth, Minnesota and Superior, Wisconsin. This line provides an outlet for grain from U.S. Midwest origins to the grain terminals located at Duluth and Superior.

Through a combination of operating rights and owned lines, CPR provides service from Chicago to Louisville, Kentucky. In addition to general merchandise traffic, a significant amount of coal traffic from southern Indiana coalmines is handled on this line.

Connections The Southern Corridor connects with all major railways at Chicago. Outside of Chicago, there are major connections with BNSF at Minneapolis and at Minot, North Dakota; with Union Pacific at St. Paul; and with CSX and NS at Louisville. The Southern Corridor is also linked to several short-line railways primarily serving grain-producing areas in the U.S.

Yards and Repair Facilities Rail operations on the Southern Corridor are supported by major rail yards located at Chicago, St. Paul and Glenwood. At Chicago, CPR has a 49% ownership interest in the Indiana Harbor Belt Railway Company, a switching railway serving the Greater Chicago and northwest Indiana areas. CPR has two significant intermodal terminals at Chicago and one at Minneapolis. In addition, CPR has a major locomotive repair facility at St. Paul and car repair facilities at St. Paul and Chicago.

The Central Corridor: Moose Jaw-Toronto

Overview The Central Corridor extends from Moose Jaw, through Winnipeg, and then to its eastern terminus at Toronto. The Central Corridor is complemented by a secondary route, leased and operated by Ottawa Valley Railway, which connects Sudbury, Ontario and Smiths Falls, Ontario and expedites the movement of CPR traffic between Montreal and western Canada. This corridor offers shippers direct rail service from Toronto and Montreal to Calgary and Vancouver via the Western Corridor – a key element of CPR's transcontinental intermodal and other competitive services.

Products Major traffic categories on the Central Corridor include Canadian grain, industrial products, intermodal containers, automobiles and general merchandise. The Central Corridor is critical to CPR's fast-growing intermodal business and it also provides access to the Port of Thunder Bay, Ontario, Canada's primary Great Lakes bulk terminal. At its busiest location, the Central Corridor handles an average of approximately 20 trains per day.

Feeder Lines The Central Corridor is supported by a significant feeder line connecting Edmonton with Winnipeg through Saskatoon, Saskatchewan. This is an important Canadian grain and fertilizer collector. As noted above, the line connecting Winnipeg with the Southern Corridor at Glenwood is both a gathering network for U.S. grain as well as a route for Canadian fertilizers destined to the U.S.

Connections The Central Corridor connects with BNSF at Emerson, Manitoba, as well as a number of short-line railways.

Table of Contents

ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS

Yards and Repair Facilities CPR's rail operations on the Central Corridor are supported by major rail yards at Thunder Bay, Ontario; Winnipeg; and Toronto. The intermodal facility in the northern Toronto suburb of Vaughan is the largest intermodal facility in the Canada. CPR also operates intermodal terminals at Saskatoon and Regina, Saskatchewan; Thunder Bay; and Winnipeg.

CPR has significant locomotive repair facilities in Winnipeg and Toronto, and has car-repair facilities at Winnipeg, Thunder Bay and Toronto.

The Eastern Corridor

Overview The Eastern Corridor provides CPR with an important link between the major population centres of eastern Canada, the U.S. Midwest and the U.S. Northeast. The Montreal-Chicago Corridor supports CPR's leading market position at the Port of Montreal by providing one of the shortest rail routes for European cargo destined to the U.S. Midwest. The Montreal-Chicago Corridor consists of a CPR-owned and maintained route between Montreal, Quebec and Detroit coupled with a long-term rail car haulage contract with CSX that links Detroit with the CPR-owned infrastructure at Chicago.

Products The predominant products handled by CPR over the Eastern Corridor are import-export intermodal containers, automobiles, industrial products and motor carrier trailers on CPR's roll-on/roll-off Expressway service. At its busiest location, the Eastern Corridor handles an average of approximately 20 trains per day, excluding passenger and commuter trains.

Feeder Lines The Eastern Corridor connects with a number of important feeder lines. The route between Sunbury, Pennsylvania and Montreal, in combination with trackage rights over other railways, provides CPR with direct access to New York City; Albany, New York; Philadelphia; Newark; and Washington, D.C. The line between Guelph Junction, Ontario and Binghamton, New York, including trackage rights over NS lines, links the southern Ontario industrial region with key U.S. connecting rail carriers at Buffalo, and with the Montreal to Sunbury line at Binghamton.

Connections The Eastern Corridor connects with all major railways at Chicago. Major connections with NS are also located at Detroit, Buffalo; Allentown, Pennsylvania and Harrisburg, Pennsylvania. Major connections with CSX are also located at Detroit, Buffalo, Albany and Philadelphia.

Yards and Repair Facilities In addition to yards and terminals already mentioned above at Toronto and Chicago, CPR's rail operations on the Eastern Corridor are supported by major rail yards at Montreal and Binghamton. Intermodal facilities are located at Montreal, Detroit, and Windsor, Ontario. There is also a second intermodal facility in Toronto dedicated to serving the Eastern Corridor. Expressway terminals are located at Montreal, Toronto, Windsor and Detroit.

In addition to repair facilities mentioned above at Toronto and Chicago, CPR has a locomotive-repair facility and a car-repair facility located at Montreal.

Other On June 18, 2003 CPR announced the restructuring of the D&H. CPR will restructure its northeastern U.S. operations to create a more cost-effective and flexible railway network and has begun discussions with a number of interested parties about ways to generate higher traffic volumes and greater earnings.

Right of Way

CPR's rail network is standard gauge, which is used by all of the major railways in Canada, the U.S. and Mexico. Continuous welded rail is used on over 96% of CPR's mainline. Virtually all of the network and primary feeder trackage is 100-pound rail or heavier, suitable for movements of 286,000-pound cars, the North American rail industry's preferred car size.

CPR uses different train control systems on different portions of its owned track, depending on the volume of rail traffic. Centralized traffic control (CTC) signals are used to authorize the movement of trains where traffic is heaviest. Approximately 3,450 miles of the network are controlled with CTC signals.

Where rail traffic is lightest, train movements are directed by written instructions transmitted electronically and by radio from rail traffic controllers to train crews. In areas of intermediate traffic density, CPR uses an automatic block signalling system (ABS) in conjunction with the written instructions from rail traffic controllers. Approximately 700 miles of the network have ABS in place.

Table of Contents**ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS****Rolling Stock**

The following table summarizes the locomotive fleet owned or leased by CPR, including the age distribution of the locomotive fleet:

Number of Locomotives
(owned and leased)

Age in Years	Road Freight		Road Switcher	Yard Switcher	Total
	AC	DC			
0-5	323				323
6-10	184				184
11-15		67			67
16-20		55	94	8	157
Over 20		464	170	257	891
Totals	507	586	264	265	1,622

In addition to its locomotive fleet, CPR owns or leases approximately 47,600 freight cars, of which approximately 20,700 cars are owned. Long-term leases on approximately 2,900 cars are scheduled to expire during 2004, and the leases on approximately 6,900 additional cars are scheduled to expire before the end of 2007. The above freight car count also includes 9,000 hopper cars owned by federal or provincial government agencies.

Business Categories

CPR provides the shortest rail route for most bulk products transported from western Canada to the Port of Vancouver. CPR also provides highly competitive service routes between Vancouver and the U.S. Midwest and between Vancouver and the major population centres in central and eastern Canada. The CPR network provides a strategic link between the Port of Montreal and the U.S. Midwest. CPR also serves the major eastern population centres of Montreal, Toronto, Newark, New York City, Buffalo, Philadelphia and Washington, D.C. CPR serves a wide range of customers, with no single customer accounting for more than 10% of total freight revenue.

The mix of products CPR transports has changed significantly over the past six years. The following table shows the comparison of the percentage of CPR's total freight revenue that it has derived from each of its major lines of business in 2003 versus 1998. CPR's business balance has changed as the needs of its customers have changed and the intermodal market has grown:

Business Category	2003	1998
--------------------------	-------------	-------------

Bulk	43%	50%
Merchandise	30%	30%
Intermodal	27%	20%

Table of Contents**ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS****Freight Revenues**

The following table summarizes CPR's freight revenues since 2001.

Business Category	Fiscal 2003	Fiscal 2003 Growth Rate as Compared to Fiscal 2002	Fiscal 2002	Fiscal 2002 Growth Rate as Compared to Fiscal 2001	Fiscal 2001	Fiscal 2001 Growth Rate as Compared to Fiscal 2000
(in \$ millions, except percentages)						
Bulk						
Grain	644	2.1%	631	(15.8)%	749	(0.8)%
Coal, sulphur and fertilizer	862	2.1%	844	(1.3)%	855	5.0%
Total bulk	1,506	2.1%	1,475	(8.0)%	1,604	2.2%
Merchandise						
Automotive	304	(8.7)%	333	9.5%	304	(0.3)%
Forest products	329	(8.6)%	360	1.7%	354	(3.3)%
Industrial products	400	(5.2)%	422	(2.0)%	431	(1.6)%
Total merchandise	1,033	(7.4)%	1,115	2.4%	1,089	(1.8)%
Intermodal	940	6.6%	882	9.7%	804	2.8%
Total freight revenues	3,479	0.2%	3,472	(0.7)%	3,497	1.1%

Bulk

CPR's bulk business, comprised of grain, coal, sulphur and fertilizers, represented approximately 43% of total freight revenues in 2003. CPR provides bulk transportation services along the shortest routes from major production areas in British Columbia, Alberta and Saskatchewan to the Port of Vancouver.

Grain

CPR's grain business comprised approximately 18% of total freight revenues in 2003. Canadian grain traffic consists of both grain (primarily wheat, barley and canola) and grain products grown or processed largely in western Canada and moved by rail to both domestic markets within North America and various export markets. Canadian grain intended for export is shipped primarily via the ports of Vancouver; Thunder Bay, and Prince Rupert, British Columbia.

Continued use of MaxTrax, CPR's order-fulfillment system for Canadian grain, allows CPR's grain shippers to pre-order the railcars they need, and has improved the planning and efficiency of grain movement, resulting in improved asset utilization and a reduced fleet size.

CPR's total revenues on Canadian grain shipments to Vancouver (for export) and to Thunder Bay (for export or domestic consumption) are subject to a revenue formula by virtue of amendments to the Canada Transportation Act (the CTA), which came into effect on August 1, 2000. The revenue formula for CPR, specified in the legislation, is

adjusted in each crop year to take into account changes in the volume of grain shipped, the average length of haul and the prices of railway input factors.

CPR ships grain from North Dakota, South Dakota and Minnesota primarily to mills located near populated U.S. centres and destined for various export ports including the U.S. Pacific Northwest, the twin ports of Duluth/Superior and the Gulf of Mexico.

Table of Contents

ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS

Coal

CPR's coal businesses represented approximately 13% of total freight revenues in 2003. In Canada, CPR transports metallurgical coal from mines in southeastern British Columbia to port terminals for export to world markets, particularly the Pacific Rim. The mines located on CPR's lines, some of the most efficient in North America, produce high-quality coal and have long-life reserves. The U.S. coal business handled by CPR consists mainly of thermal coal and petroleum coke, transported mainly within the Midwest U.S.

Sulphur and Fertilizers

Sulphur and fertilizers business represented approximately 12% of total freight revenues in 2003.

Sulphur

Sulphur is a by-product of the oil and gas industry that is used in the production of sulphuric acid, which is used in the production of phosphate fertilizers. CPR provides rail transportation services from the key production facilities in Canada to the U.S. and offshore markets—mainly China, Brazil, Australia, Mexico and South Africa—via the Port of Vancouver.

Fertilizers

The two main segments of the fertilizer business are potash and chemical fertilizers. CPR's potash business moves primarily from Saskatchewan to markets in the U.S. and offshore countries through the ports of Vancouver and Portland, Oregon. Chemical fertilizers are transported to Canadian and northern U.S. markets from key production areas in the Canadian Prairie provinces. Traffic is also received from U.S. railroads serving the southeastern U.S. phosphate fertilizer producers. CPR has long-term, inflation-protected contracts with most of its major fertilizer customers.

Merchandise

CPR's merchandise business represented approximately 30% of total freight revenues in 2003. Merchandise freight consists of finished vehicles and automotive parts, and forest and industrial products.

Automotive

CPR's automotive business represented approximately 9% of total freight revenues in 2003. CPR transports vehicles to and from several automotive plants in Ontario. Automotive business consists of the transportation of domestic and import vehicles, automotive parts and agricultural equipment from North American assembly plants and the Port of Vancouver to destinations in the Canadian and U.S. marketplace.

Forest Products

CPR's forest products business represented approximately 9% of total freight revenues in 2003, transporting a variety of forest products including wood pulp, lumber, newsprint, paper, panel board and fibreboard. CPR mainly moves wood pulp from British Columbia and eastern Canada, lumber from British Columbia and newsprint from eastern Canada, primarily destined for the U.S.

Industrial Products

CPR's industrial products business represented approximately 12% of freight revenues in 2003. The industrial products business line includes many input commodities, such as chemicals, plastics, aggregates, metals, steel and scrap and energy-related products. CPR transports chemicals such as glycol, styrene, methanol and ethanol to destinations within the domestic North American market and to export markets in the Pacific Rim.

Table of Contents

ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS

Intermodal

CPR's intermodal business accounted for approximately 27% of CPR's total freight revenues in fiscal 2003. This business line, which generally consists of high-value, time-sensitive shipments, has grown significantly in recent years. CPR also believes that the intermodal business has attractive, long-term growth prospects. To enhance competitiveness and prepare for continued growth, CPR has increased capacity at its intermodal terminals in Vancouver, Calgary, Chicago, Toronto and Montreal.

Import/Export Intermodal

The international segment handles mainly containers of consumer goods between the ports of Vancouver, Montreal, New York and Philadelphia and inland Canadian and U.S. destinations.

North American Intermodal

North American intermodal traffic, transporting mainly retail goods, moves between Toronto, Montreal, Chicago and several western Canadian cities. CPR has entered into co-location initiatives, under which major retailers have built regional distribution facilities adjacent to certain CPR intermodal terminals.

Expressway

CPR's expressway provides high-quality intermodal services in the short-haul market. Expressway works in partnership with the trucking industry by carrying standard, non-reinforced trailers between major urban centres. A number of major motor carriers serving the automotive, resource, food and retail sectors use Expressway.

Canadian Pacific Logistics Solutions

Canadian Pacific Logistics Solutions (CPLS) is a newly formed division of CPR which provides consulting services, logistics management, operations support and transloading (the transfer of a shipment from one mode of transportation to another).

Other Business

CPR earns additional revenues through the sale or lease of its assets. These arrangements include infrastructure and operating agreements with government-sponsored commuter rail authorities, the sale of CPR's rights to lay fibre-optic cable along its track right-of-way and contracts with passenger service operators. CPR also operates the Royal Canadian Pacific, a luxury train composed of CPR's historic business car fleet.

Safety

CPR's Safety and Health Management Committee, established in 1996, provides ongoing focus, leadership, commitment and support for efforts to improve the safety of CPR's operations, and the safety and health of all CPR employees. The Company's safety management process, called the Safety Framework, involves more than 1,000 employees in planning and implementing safety-related activities. This safety management process, combined with a planning process that encompasses all operational functions, ensures a continuous and consistent focus on safety.

In 2003, U.S. Federal Railroad Administration (FRA) personal injuries per 200,000 employee hours (100 employee years) were 3.1, down approximately 14% from 2002 and down 30% since 1999. FRA reportable train accidents per million train miles were 1.8, the same as in 2002, and are down approximately 14% since 1999.

Competition

CPR's primary competitors for freight transportation in Canada and the U.S. include other railways and trucking companies. In Canada and the U.S., CPR is subject to competition for freight traffic from other Class 1 railways, particularly BNSF, CN, NS, CSX and Union Pacific. Competition is based mainly on price, service and accessibility to markets. Competition with the trucking industry is generally focused on freight rates, flexibility of service and transit time performance.

Table of Contents

ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS

In 2002, CPR became the first railway in North America to be approved under a new Canada Border Services Agency program to streamline clearance at the border for imports from the U.S. Under the Customs Self-Assessment (CSA) program, goods and shippers approved as low risk have a virtual fast lane into Canada on CPR. Eligible goods include finished vehicles, parts for vehicles, food products and other common items frequently imported from the U.S.

The CSA program reduces the cost of compliance with Canada's import regulations. Under the program, approved importers can file monthly summary customs reports on their shipments instead of a report on each shipment. Approved importers also benefit from improved efficiencies, as their goods can be delivered directly to their facilities without stopping for inspection at the border or waiting for customs clearance. CPR benefits from improved freight car velocity, as shipments for customers approved under CSA can move more easily across the U.S. border.

Most recently, CPR and the Canadian and U.S. customs agencies signed a declaration of principles to further enhance security at the Canada-U.S. border and to ensure secure rail access to the U.S. The joint government-industry initiative to enhance the security of U.S.-bound rail shipments ensures trade continues to flow between the two countries. These discussions were part of the larger process of implementing the Smart Border Declaration adopted by Canada and the U.S. in December 2001.

CPR also secured accreditation under U.S. Customs and Border Protection (C&BP) Customs-Trade Partnership Against Terrorism (C-TPAT) program. C-TPAT is a joint government-business initiative designed to build cooperative relationships that strengthen overall supply chain and border security.

CPR and customs officials are working to implement the measures outlined in the declaration of principles.

Labour Relations

As at December 31, 2003, approximately 78% of CPR's workforce is unionized, with approximately 81% of CPR's workforce located in Canada. Unionized employees are represented by a total of 37 bargaining agents. Seven bargaining agents represent CPR employees in Canada and the remaining 30 represent employees in CPR's U.S. operations.

Labour Relations - Canada

Agreements are currently in place with four of the seven bargaining units in Canada. Of the collective agreements currently in effect, two expire at the end of 2004, the Canadian Auto Workers (CAW) and the International Brotherhood of Electrical Workers (IBEW), and two expire at the end of 2005, the Rail Canada Traffic Controllers (RCTC) and the Canadian Pacific Police Association (CPPA).

Collective agreements with freight car and locomotive repair employees (represented by the CAW) and signal maintenance employees (represented by the IBEW) provide for wage increases of 2% annually in 2001, 2002 and 2003 and 3% in 2004 and contain improvements to health plans, pension and life insurance benefits, as well as work-rule changes designed to increase flexibility and reduce costs.

In June 2003, members of the CPPA ratified a three-year agreement. In August 2003, the RCTC also ratified a three-year agreement. Both agreements are in effect until the end of 2005 and allow for wage increases for 2003, 2004 and 2005 of 2%, 3% and 2%, respectively. They include benefit plan, pension and work-rule changes designed to contain costs and maximize value for employees.

Train crew employees have elected the Teamsters Canada Rail Conference as their bargaining agent, replacing the Canadian Council of Railway Operating Unions (CCROU). CPR 's collective agreement with the CCROU expired on December 31, 2002, however, negotiations had been suspended pending the outcome of the representational vote by union members. CPR expects to begin negotiating a collective agreement in 2004.

A three-year collective agreement was ratified in January 2004 by members of the United Steel Workers of America (USWA). The agreement with the USWA, which represents clerical employees of CPR, extends to the end of 2006.

Negotiations with the Brotherhood of Maintenance of Way Employees (BMWWE) have been delayed due to an attempt by another union to represent the BMWWE membership. At this time, management is unable to predict when bargaining may resume with the union, which represents employees who maintain CPR 's track.

Table of Contents

ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS

Labour Relations U.S.

CPR is party to collective agreements with 30 bargaining units in the U.S. This includes 16 bargaining units representing employees of CPR's Soo Line and 14 bargaining units representing employees of CPR's D&H. In the U.S., Class 1 railroads negotiate collectively on a national basis, which impacts the duration of the negotiating process with CPR's Soo Line. At the national level, the bargaining units for the track maintainers, trainmen, yardmasters, boilermakers, locomotive engineers, clerks, and signalmen have ratified agreements that extend until the end of 2004. Although Soo Line does not participate at the national level, the parties traditionally incorporate many of the nationally negotiated terms into their settlements. As many of the national agreements were just finalized in the latter part of 2003, Soo Line negotiations are now progressing. The D&H is not a Class 1 railroad and therefore negotiates contracts independent of national negotiations.

Soo Line

Fifteen of the 16 collective agreements applicable to Soo Line employees expired at the end of 1999. The collective agreement with the track maintenance workers (BMWE) extends to the end of 2004. At December 31, 2003, Section VI notices indicating the intent to begin bargaining had been received from all of the remaining bargaining units. Negotiations continue with the bargaining units representing locomotive engineers, trainmen, yardmasters, clerks and signalmen. The bargaining unit representing train dispatchers is currently in mediation. Negotiations with the remaining bargaining units are being held in abeyance pending the resolution of national settlements.

D&H

At December 31, 2003, D&H had agreements in effect with four of its 14 bargaining units. Agreements with six of the bargaining units expired on January 1, 2003. Section VI notices have already been received from five of these six bargaining units. There are four agreements that expired at the end of 2001 and negotiations are ongoing with these bargaining units. This includes the bargaining unit for the carmen that is currently in mediation. The four remaining agreements with the trainmen, track maintainers, yardmasters and police extend to the end of 2004.

Environmental Protection

CPR is governed by legislation and regulations in Canada and the U.S. relating to waste and wastewater management, storage tanks, contaminated sites, spill reporting and emergency response, environmental assessment, and other environmental matters.

CPR has implemented and trained its employees in environmental protection policies and procedures and has improved its environmental infrastructure by upgrading diesel fuel storage and dispensing areas, wastewater treatment plants and waste storage areas. CPR also has procedures in place to minimize the impact of its operations on ecologically sensitive areas, such as fish habitat and national parks. CPR continues to focus on preventing spills and other incidents that may have a negative impact on the environment. As a precaution, CPR has established a Strategic Emergency Response Contractor network and has located spill equipment kits across Canada and the U.S. to ensure a rapid and efficient response to environmental incidents. The Company established the contractor network in the U.S. Midwest and the network has been able to respond within three hours to incidents anywhere on the 3,200 miles of track in the region. The Company has set this response time as the target for CPR's entire system. In addition, CPR regularly updates and tests its emergency preparedness and response plans to ensure rapid and effective action.

CPR undertakes environmental compliance audits or inspections of its operations to monitor environmental performance against federal, provincial, state and municipal regulations and against CPR's own environmental policies. In 2000, CPR's environmental audit program was benchmarked by an external consultant against the programs of Fortune 500 corporations from the automotive, utility and chemical industries. The consultant assessed CPR's programs, including documentation, to be superior in relation to the documentation and programs instituted by a number of other corporations in the Fortune 500 group.

Site investigation and characterization are ongoing at a U.S. location where environmental contamination has been identified at sites formerly leased to third parties by Soo Line. Soo Line is participating in the State of Minnesota's voluntary investigation and clean up program and the site is the subject of ongoing fieldwork that is being undertaken in conjunction with the appropriate State authorities, to determine the extent and magnitude of the contamination and the appropriate remediation plan.

Table of Contents

ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS

At this time, the investigative fieldwork has not been completed, the extent and magnitude of the contamination have not yet been determined and no remediation action plan has been developed. Soo Line has initiated civil litigation against its former lessees and expects to ultimately recover a substantial portion of its investigative and clean-up costs.

In 1995, CPR recorded a provision of \$144 million, before tax, to cover anticipated expenditures on environmental remediation programs. The Company re-evaluated its environmental liability needs in 1999 and as a result it increased expected remediation costs by \$50 million before tax. Other smaller adjustments to the environmental remediation program and related accruals are made by the Company annually, or as required, based on ongoing changes to, and analysis of, the remediation program and related costs.

CPR spent approximately \$38 million in 2003 for environmental management. Of this amount, \$15 million was spent on ongoing operations, including \$2.4 million for the disposal of derailment wastes, \$3 million was related to capital program upgrades and \$20 million was spent under remediation programs.

CPR became a Responsible Care® partner of the Canadian Chemical Producers Association in 1998. Responsible Care® is a chemical industry initiative that involves a public commitment to continually improve the industry's environmental, health and safety performance. CPR successfully completed its first Responsible Care® verification in June 2002 and was granted Responsible Care® practice-in-place status.

CPR also became a partner of the American Chemistry Council in 1999. As such, CPR is required to undergo verification every three years of its commitment to continuously improve its environmental, health and safety performance and community outreach efforts. The American Chemistry Council recently made verification mandatory for all member and partner companies. CPR is scheduled to be verified for the first time in the U.S. by 2006.

Regulation and Other Issues

CPR's rail operations in Canada are subject to regulation of service, rate setting, network rationalization and safety by the CTA, the Railway Safety Act (RSA) and certain other statutes. The Company's U.S. rail operations are subject to regulations administered by the U.S. Surface Transportation Board (STB) and the FRA.

Canadian Regulation

CPR's economic activities, including matters relating to rates, level of service obligations and line discontinuance, are subject to the provisions of the CTA.

The CTA contains shipper rate and service protections, including final-offer arbitration, competitive line rates, and compulsory interswitching (which allows a shipper to request a railway to move its traffic to the nearest competitive interchange point with another railway within a 30-kilometre radius for a regulated fee). However, to gain recourse to certain of these protections, shippers must establish that they would suffer substantial commercial harm if the relief sought were not granted. These shipper protections also extend to western grain transportation.

In 2000, the Minister of Transport (the Minister) initiated a review of the CTA to assess whether it provides Canadians with an efficient, flexible and affordable transportation system. The report of the panel appointed by the Minister to conduct the review was released on July 18, 2001. The report acknowledged there is a significant level of competition within the Canadian transportation industry, railways are entitled to adequate financial returns, and railways have improved their productivity and returned productivity improvements to customers. In addition, the panel recognized that the freight rail system works well for the vast majority of users in most markets.

On February 25, 2003, the federal government introduced a bill with miscellaneous changes to the CTA. The bill did not become legislation. It is not known whether the federal government will reintroduce the proposed changes in the current or any future Parliament.

During 2002, Ferroequus Railway Company Limited (Ferroequus), a company with no railway equipment or infrastructure, applied to the Canadian Transportation Agency (the Agency) to obtain running rights over the tracks of CN from a CN/CPR

Table of Contents

ITEM 4 NARRATIVE DESCRIPTION OF THE BUSINESS

interchange at Camrose, Alberta, to Prince Rupert, British Columbia, for the movement of grain shipments originating on CPR's railway lines. Following a public hearing, the Agency dismissed the application on the basis that it was not in the public interest. Ferroequus' appeal of the Agency's decision was dismissed by the Federal Court of Appeal.

Pursuant to the CTA, CPR and CN are subject to prescribed limits on revenue from transporting western Canadian grain. Penalties may be imposed if these limits are exceeded. In 2003, the Agency determined that CPR and CN revenues for the movement of grain in western Canada did not exceed their limits for the 2002 - 2003 crop year.

Canada's federally-regulated railways are also subject to the RSA, which governs safety and operational aspects of the industry, as well as the Canadian Transportation Accident Investigation and Safety Board Act. The RSA was amended in 1999, providing new regulation-making powers to Transport Canada. Significant new regulations have been proposed, including regulations relating to rail safety management systems, crossing standards, whistle bans and the prevention of unauthorized access to railway rights-of-way. The regulations respecting rail safety management systems were implemented in 2001. The remaining regulations took effect in 2003. CPR is also subject to legislation relating to the environment and the transportation of hazardous materials. Amendments to the Transportation of Dangerous Goods regulations were enacted in August 2002.

U.S. Regulation

There have been efforts in recent years to re-regulate certain aspects of the U.S. rail industry previously deregulated under the Staggers Rail Act of 1980. The rail industry opposes such re-regulation.

The STB regulates a variety of railway matters, including service levels, certain freight car rental payments, certain rail traffic rates, the terms under which railways may gain access to each other's facilities and traffic, mergers or acquisitions of railways and the abandonment, sale, and discontinuance of operations on rail lines.

In June 2001, the STB issued new regulations governing mergers and consolidation of Class 1 railways in the U.S. CPR believes these new regulations require applicants to demonstrate that a proposed transaction would be in the public interest and would enhance competition where necessary to offset any negative effects.

The FRA governs all safety-related aspects of railway operations within the U.S. and, therefore, has jurisdiction over CPR operations conducted within the U.S. State and local regulatory agencies may also exercise jurisdiction over certain safety and operational matters of local significance.

Insurance

CPR maintains insurance policies to protect its operations. CPR's insurance policies include, but are not limited to, liability insurance covering its railway operations, directors and officers liability insurance, automobile insurance and property insurance. The latter includes business interruption loss in the event of catastrophic damage to CPR's infrastructure. Only CPR's property coverage excludes terrorism, except for any relief provided by the U.S. Terrorism Risk Insurance Act. CPR believes that it has adequate insurance in place to protect the Company from known and unknown liabilities.

Related-party Transactions

In 2003, CPR provided no rail services to related parties.

CPR entered into agreements with former affiliate CP Ships Ltd. (CP Ships), a related party of CPR prior to completion of the Arrangement, for the transportation of CP Ships container rail traffic through the Port of Montreal. The agreements provide for the use of CPR rail services for all of CP Ships container rail traffic on specified routes to and from certain cities in Canada and the U.S. The agreements with CP Ships were to expire on January 31, 2004. However, the parties have entered into a new long-term agreement extending the arrangement to 2014. The terms of the new agreement do not differ materially from those contained in the agreements entered into prior to the completion of the Arrangement.

CPR has entered into an agreement with former affiliate Fording Inc. (Fording), a related party of CPR prior to completion of the Arrangement, for the transportation of all of the coal processed at Fording s mines in British Columbia to the Port of Vancouver. The initial term of the Fording agreement expires on March 31, 2005.

Table of Contents**ITEM 5 SELECTED CONSOLIDATED FINANCIAL AND OPERATING INFORMATION**

The following table presents selected financial and operating information for CPR for the years ended December 31, 1999 through 2003 for income statement data and December 31, 2000 through 2003 for all other financial and operating information presented.

	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
	(in millions, except per share data)				
INCOME STATEMENT DATA:					
Revenues	\$3,660.7	\$3,665.6	\$3,698.6	\$3,655.1	\$3,496.4

Notes:

- (1) Excludes other specified items which are described under the heading "Other Specified Items" in the Management's Discussion and Analysis incorporated by reference into Item 6 of this Annual Information Form. It should be noted that CPR's operating results, before FX on LTD and other specified items, as described in this AIF, have no standardized meanings prescribed by Canadian generally accepted accounting principles ("GAAP") and, therefore, are unlikely to be comparable to similar measures presented by other companies. In recent prior disclosure documents, CPR has referred to certain items excluded from non-GAAP earnings measures as "non-recurring items". However, in this AIF and accompanying documents, items (other than FX on LTD) excluded from non-GAAP earnings measures have been identified as "other specified items" in compliance with Revised Canadian Securities Administrators ("CSA") Staff Notice 52-306, as it is not possible to conclude that an item or items similar to one or more of those so designated will not occur within the next two years.
- (2) Excludes other specified items in 1999 of \$472.2 million (\$284.4 million after tax) in restructuring and environmental charges and \$28.4 million (\$17.1 million after tax) in charges related to Y2K remediation work.
- (3) Restated. Effective January 1, 2002, CPR was required to adopt retroactively, with restatement, the new Canadian Institute of Chartered Accountants accounting standard for the treatment of FX on LTD.
- (4) Return on capital employed (after taxes) is calculated as income, before other specified items and FX on LTD, less interest expense, divided by average net-debt-plus-equity, and multiplied by one minus CPR's normalized tax rate for each respective period.
- (5) Net-debt to net-debt-plus-equity has been calculated by dividing total debt (being long-term debt, including long-term debt maturing within one year, plus advances from affiliates) by total capitalization (being total debt plus total shareholders' equity).

Reference is made to the factors affecting the comparability of the foregoing financial data under the headings

"Summary of significant accounting policies", "New accounting policies" and "Future accounting changes" in Notes 1, 2

and 3, respectively, in the Notes to Consolidated Financial Statements included in the Company's 2003 Annual Report.

ITEM 5 SELECTED CONSOLIDATED FINANCIAL AND OPERATING INFORMATION

Declared Dividends and Dividend Policy

Quarterly dividends of \$0.1275 per Common Share were declared by the Board of Directors and were payable: on January 28, 2002, April 29, 2002, July 29, 2002, and October 28, 2002, to holders record on December 27, 2001, March 27, 2002, June 27, 2002 and September 27, 2002, respectively; and on January 27, 2003, April 28, 2003, July 28, 2003, and October 27, 2003 to holders of record on December 27, 2002, March 28, 2003, June 27, 2003, and September 26, 2003, respectively. In addition, a dividend of \$0.1275 was declared on December 10, 2003, payable on January 26, 2004, to holders of record on December 24, 2003. The aforementioned dividend payable on January 28, 2002, was declared by the Board of Directors on December 4, 2001, and was the first dividend declared following the initial listing of CPR's Common Shares on the Toronto and New York stock exchanges in October 2001.

The Board of Directors will give consideration on a quarterly basis to the payment of future dividends. The amount of any future quarterly dividends will be determined based on a number of factors that may include the results of operations, financial condition, cash requirements and future prospects of the Company. The Company is, however, under no obligation to declare dividends and the declaration of dividends is wholly within the Board of Directors discretion. Further, the Board of Directors may cease declaring dividends or may declare dividends in amounts that are different from those previously declared. Finally, restrictions in the credit or financing agreements entered into by the Company or the provisions of applicable law may preclude the payment of dividends in certain circumstances.

ITEM 9 ADDITIONAL INFORMATION

When the securities of the Company are in the course of a distribution pursuant to a short-form prospectus, or a preliminary short-form prospectus has been filed in respect of a distribution of its securities, copies of the following documents may be obtained upon request from the Corporate Secretary, Canadian Pacific Railway Limited, Suite 2000, 401-9th Avenue SW, Calgary, Alberta, T2P 4Z4:

- (i) this Annual Information Form, together with one copy of any document, or the pertinent pages of any document, incorporated by reference in this Annual Information Form,
- (ii) the Company's comparative financial statements for its most recently completed financial year for which financial statements have been filed, together with the accompanying report of the auditor and a copy of the most recent interim financial statements of the Company that have been filed, if any, for any period after the end of its most recently completed financial year,
- (iii) the Company's information circular in respect of its most recent annual meeting of shareholders that involved the election of directors; and
- (iv) any other documents that are incorporated by reference into the preliminary short-form prospectus or the short-form prospectus that are not required to be provided under paragraphs (i), (ii) or (iii).

At any other time, copies of any other documents referred to in paragraphs (i), (ii) and (iii) above may be obtained upon request from the Corporate Secretary. A person who is not a security holder of the Company may be required to pay a reasonable charge for such copies.

Additional information, including directors' and officers' remuneration and indebtedness, principal holders of the Company's securities, options to purchase securities and interests of insiders in material transactions, where applicable, is contained in the Company's information circular for its most recent annual meeting of shareholders that involved the election of directors. Additional information is provided in the Company's comparative financial statements for its most recently completed financial year.

management's discussion and analysis

February 19, 2004

This Management's Discussion and Analysis (MD&A) supplements the consolidated financial statements and related notes for the year ended December 31, 2003. Except where otherwise indicated, all financial information reflected herein is expressed in Canadian dollars.

business profile and strategy

BUSINESS PROFILE

Canadian Pacific Railway Limited and its subsidiaries (collectively CPR or the Company) operate a transcontinental railway in Canada and the United States. The Company provides rail and intermodal transportation services over a network of approximately 14,000 miles, serving the principal business centres of Canada, from Montreal to Vancouver, and the U.S. Northeast and Midwest regions. CPR feeds directly into America's heartland from the East and West coasts. Agreements and alliances with other carriers extend CPR's market reach east of Montreal in Canada, throughout the U.S. and into Mexico. CPR transports bulk commodities, merchandise freight, and intermodal traffic. Bulk commodities include grain, coal, sulphur and potash. Merchandise freight consists of finished vehicles and automotive parts, and forest and industrial products. Intermodal traffic consists largely of high-value, time-sensitive consumer products transported in overseas

containers that can be handled by train, ship and truck, and in domestic containers and trailers that can move by train and truck.

STRATEGY

CPR's goals are to become the preferred business partner for rail-based transportation services in North America and to be at the forefront of the railway industry in operating profitability and return on capital employed. Its principal strategies to accomplish these goals include maximizing the strengths of its North American railway franchise by operating a low-cost scheduled railway, developing new products and services in cooperation with customers and partners, and extending the reach of the franchise through marketing and operating partnerships and alliances with other railways and transport companies in North America. CPR's overall marketing and sales activities within each line of business are focused on targeted growth, product efficiency and maximizing value from existing assets.

ADDITIONAL INFORMATION

CPR files its Consolidated Financial Statements, MD&A, Annual Information Form, press releases and other required filing documents on SEDAR at www.Sedar.com in Canada and on EDGAR at www.sec.gov in the U.S.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG03

operating results

CPR's net income for the year ended December 31, 2003, was \$398.7 million, down \$97.3 million from \$496.0 million in 2002, and up \$26.2 million from \$372.5 million in 2001. When compared to 2002, net income in 2003 benefited from higher foreign exchange gains on long-term debt (LTD) as the Canadian dollar strengthened relative to the U.S. dollar (FX) but declined due to the net effect of FX on U.S. dollar-denominated revenues and expenses, a special charge (the special charge) taken in the second quarter of 2003 and a loss on the transfer of assets in the fourth quarter of 2003 (discussed further in the Non-GAAP Earnings section, under the subheading Other Specified Items). Net income in 2002 increased over 2001 due to higher foreign exchange gains on long-term debt and a decrease in operating expenses as a result of cost-cutting initiatives.

Operating income in 2003 was \$483.2 million, down \$373.3 million from \$856.5 million in 2002, and a decrease of \$333.3 million from \$816.5 million in 2001. Most of the decline in 2003, compared to 2002, was due to the net effect of FX on U.S. dollar-denominated revenues and expenses, the special charge and the loss on transfer of assets, described above. Operating income was also negatively affected by lower grain volumes in the first half of 2003 due to drought on the Canadian prairies, higher fuel prices and increased costs as a result of service disruptions in the first quarter of 2003 caused by severe winter weather conditions and derailments. CPR's operating income in 2002 increased over 2001 due mainly to costs included in 2001 expenses related to CPR's spin-off from Canadian Pacific Limited (CPL).

Diluted earnings per share (EPS) in 2003 were \$2.51, decreasing \$0.60 from \$3.11 in 2002, and improving \$0.17 from \$2.34 in 2001. Diluted EPS is calculated by dividing net income by the weighted average number of shares outstanding, adjusted for outstanding stock options.

Fluctuations in the value of the Canadian dollar affect CPR's results because U.S. dollar-denominated revenues and expenses are translated into Canadian dollars. A stronger Canadian dollar reduces U.S. dollar-denominated revenues and expenses. It also reduces operating income because a higher percentage of revenues than expenses is generated in U.S. dollars. However, this negative impact is largely offset by a reduction in the cost of long-term debt denominated in U.S. dollars. CPR has arranged a significant portion of its long-term debt in U.S. dollars as a currency hedge.

The Canadian dollar appreciated more than 11% in 2003, with the average annual foreign exchange rate for converting U.S. dollars to Canadian dollars increasing to \$0.7099 in 2003 from \$0.6368 in 2002. This reduced revenues in 2003 by approximately \$192 million and operating expenses by approximately \$137 million. The Canadian dollar's gain reduced operating income in 2003 by \$55 million and after-tax income before FX on LTD and other specified items by \$22 million.

non-gAAP earnings

CPR presents non-GAAP operating earnings to provide a basis for evaluating underlying earnings trends that can be compared with results in the prior periods. Non-GAAP earnings exclude foreign currency translation effects on long-term debt as well as other specified items that are not among CPR's normal ongoing revenues and operating expenses. The impact of volatile, short-term rate fluctuations on foreign-denominated debt is only realized when long-term debt matures or is settled. A reconciliation of income, before FX on LTD and other specified items, to net income as presented in the financial statements is detailed in the table on page 5.

It should be noted that CPR's operating results, before FX on LTD and other specified items, as described in this MD&A, have no standardized meanings prescribed by

Table of Contents

PG 04 | 2003 Canadian Pacific Railway Annual Report

Canadian generally accepted accounting principles (GAAP) and, therefore, are unlikely to be comparable to similar measures presented by other companies. In recent disclosure documents, CPR has referred to certain items excluded from non-GAAP earnings measures as non-recurring items . However, in this MD&A and accompanying documents, items (other than FX on LTD) excluded from non-GAAP earnings measures have been identified as other specified items in compliance with Revised Canadian Securities Administrators (CSA) Staff Notice 52-306, as it is not possible to conclude that an item or items similar to one or more of those so designated will not occur within the next two years.

NON-GAAP RESULTS

Income, before FX on LTD and other specified items, was \$336.2 million in 2003, down \$71.1 million from \$407.3 million in 2002, and decreasing \$44.1 million from \$380.3 million in 2001. The Company moved higher freight volumes in 2003, compared with 2002. However, additional income generated by this growth was more than offset by the negative effect of FX on U.S. dollar-denominated revenues and expenses, severe winter weather conditions, derailments and persistently high fuel prices. In 2002, a focus on containing costs and generating strong growth in several business sectors created higher income than in 2001.

NON-GAAP PERFORMANCE INDICATORS

For the year ended December 31	2003	2002	2001
Operating ratio, before other specified items ⁽¹⁾	79.8%	76.6%	77.3%

Income tax recovery		72.0	64.0

Net income	\$ 398.7	\$ 496.0	\$ 372.5
-------------------	-----------------	----------	----------

(1) These earnings measures have no standardized meanings prescribed by Canadian GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. Other specified items are described under the subheading Other Specified Items .

Operating income, before other specified items, was \$740.6 million in 2003, a decrease of \$115.9 million from \$856.5 million in 2002, and a decline of \$100.4 million from \$841.0 million in 2001. Most of the decline in 2003 from 2002 was due to the effect of FX on U.S. dollar-denominated revenues and expenses, severe winter weather conditions, derailments and higher fuel prices.

Operating income in 2002 increased from 2001 due to cost containment measures and growth in several business sectors.

Diluted EPS, before FX on LTD and other specified items, was \$2.11 in 2003, a decline of \$0.45 from \$2.56 in 2002, and a decrease of \$0.28 from \$2.39 in 2001. Diluted EPS,

Table of Contents

PG 06 | 2003 Canadian Pacific Railway Annual Report

before FX on LTD and other specified items, is calculated by dividing income, before FX on LTD and other specified items, by the weighted average number of shares outstanding, adjusted for outstanding stock options.

The Company's operating ratios, before other specified items, in 2003, 2002 and 2001 were 79.8 %, 76.6 % and 77.3 %, respectively. The operating ratio, before other specified items, is calculated by dividing total operating expenses, before other specified items, by total revenues. The operating ratio demonstrates the percentage of revenues used to operate the railway. A lower number indicates higher efficiency and, therefore, higher profitability.

FOREIGN EXCHANGE GAINS (LOSSES) ON LONG-TERM DEBT

These gains or losses are excluded to eliminate the impact of volatile short-term exchange rate fluctuations, which can only be realized when net U.S. dollar-denominated long-term debt matures or is settled.

Foreign exchange gains on long-term debt were \$209.5 million in 2003, an increase of \$196.1 million from \$13.4 million in 2002. Foreign exchange gains increased \$267.7 million in 2003 from a loss of \$58.2 million in 2001. The change was due to the effect of FX, net of hedging, on U.S. dollar-denominated long-term debt.

OTHER SPECIFIED ITEMS

Other specified items may include, but are not limited to, restructuring and asset impairment charges, gains and losses on non-routine sales of assets, unusual income tax adjustments, and other items that do not typify normal business activities.

Other specified items in 2003 included the special charge of \$150.1 million after tax (\$228.5 million before tax) to recognize the cost of a productivity program to eliminate 820 job positions by the end of 2005 and to reflect the fair market value of certain under-performing assets.

In the fourth quarter of 2003, CPR transferred assets to IBM Canada Ltd. as part of a seven-year, \$200-million agreement reached with IBM to operate and enhance CPR's computing infrastructure. The arrangement will reduce CPR's costs over time and allow remaining information technology staff to focus on applications that improve efficiency and service. The Company recognized a loss of \$18.4 million (\$28.9 million before tax) on the transfer of these assets. This loss is included in other specified items in 2003.

In December 2003, the Government of Ontario repealed previously announced future income tax rate reductions. The Company's future income taxes, which were previously based on these reduced rates, have been adjusted upwards by \$52.7 million to reflect the change.

CPR recognized a \$64-million decrease in future income tax expense in 2001 as a result of similar future corporate tax rate reductions instituted by various provincial governments in 2001 and a reduction in the apportioned provincial tax rate caused by the amalgamation on January 1, 2001, of Canadian Pacific Railway Company and its Canadian subsidiary, St. Lawrence & Hudson Railway Company Limited (StL&H).

Following a revaluation in 2003 of various other components that determine its future income tax liability, the Company reduced the estimate of its future income tax liability by \$59.3 million.

In 2002, there was one other specified item of \$72 million resulting from a favourable income tax ruling relating to prior years.

In 2001, CPR incurred expenses of \$23.6 million after tax (\$41.7 million before tax), including legal costs, incentive compensation charges and bridge financing fees, related to its spin-off from parent company CPL.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG07

volumes

Higher freight volumes result in increases in revenues and certain variable expenses such as fuel and crew costs. A 4% increase in carloads and 6% increase in revenue ton-miles (RTM) in 2003 were largely responsible for a 6% increase in freight revenues, excluding the effect of FX, and related variable expenses, compared with 2002.

RTMs were 114,599 million in 2003, up 6,910 million, or 6%, from 107,689 million in 2002, and up 3,977 million, or 4%, from

110,622 million in 2001. RTMs are defined as the movement of a revenue-producing ton of freight one mile.

CPR handled 2,539.2 thousand carloads in 2003, increasing 91.9 thousand, or 4%, in 2003 from 2,447.3 thousand in 2002, and increasing 116.3 thousand, or 5%, from 2,422.9 thousand in 2001. Carloads are comprised of revenue-generating shipments of containers, trailers and loaded freight cars.

For the year ended December 31	2003	2002	2001
Carloads (in thousands)			
Grain	308.7	291.1	342.8
Coal	359.6	351.8	379.2

PG 08 | 2003 Canadian Pacific Railway Annual Report

revenues

The Company's revenues are derived primarily from the transportation of freight. Other revenues are generated mainly from leasing of CPR track and other assets, container storage and terminal services fees, switching fees, land sales and income from business partnerships.

Total revenues, which consist of freight and other revenues, were \$3,660.7 million in 2003, decreasing

\$4.9 million from \$3,665.6 million in 2002, and declining \$37.9 million from \$3,698.6 million in 2001. Strong volume growth was achieved in 2003, compared to 2002. However, corresponding growth in freight revenues was significantly offset by a negative impact of approximately \$192 million from FX on U.S. dollar-denominated revenues.

For the year ended December 31 (in millions)	2003	2002	2001
Grain	\$ 644.4	\$ 631.4	\$ 749.3
Coal	444.0	442.5	474.1
Sulphur and fertilizers	417.4	401.3	380.7
Forest products	328.8	360.3	354.4
Industrial products	400.4	422.1	430.7
Intermodal	940.1	881.9	803.6
Automotive	304.2	332.4	303.9
Total freight revenues	\$3,479.3	\$3,471.9	\$3,496.7
Other revenues	181.4	193.7	201.9
Total revenues	\$3,660.7	\$3,665.6	\$3,698.6

FREIGHT REVENUES

Freight revenues, which are earned from transportation of bulk, merchandise and intermodal goods, were \$3,479.3 million in 2003, an increase of \$7.4 million from \$3,471.9 million in 2002, and a decrease of \$17.4 million from \$3,496.7 million in 2001. Volume growth in 2003, compared to 2002, helped to offset the approximately \$186-million negative effect of FX. In 2003, grain revenues improved as crop shipments began to recover from the drought-induced decline experienced throughout 2002 and the first half of 2003. Revenues increased in the intermodal

and sulphur and fertilizers businesses. Revenues decreased in 2002 from 2001 due mainly to the drought-induced drop in grain shipments and reduced coal shipments.

Grain

In 2003, Canadian grain products, consisting mainly of durum, spring wheat, barley, canola, flax and oats, were primarily transported to Canadian and U.S. markets for domestic consumption and to Canadian ports for export. U.S. grain products mainly include durum, spring wheat, corn, soybeans and barley shipped from the midwestern U.S. to other points in the Midwest, the Pacific Northwest and northeastern U.S. Grain revenues in 2003 were \$644.4 million, up \$13.0 million (increased \$51 million, excluding the effect of FX) from \$631.4 million in the same period in 2002, and down \$104.9 million from \$749.3 million in 2001. U.S. and Canadian grain shipments benefited in 2003 from a larger crop production and favourable market conditions in the second half of the

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG09

year. This growth was partially offset by a reduction in revenues as a result of the effect of FX, the effects of the drought on revenues in the first half of 2003 and the repercussions in the first quarter of 2003 of a labour disruption at the Port of Vancouver that was resolved in the fourth quarter of 2002. Revenues in 2002 were substantially lower than in 2001 due to drought conditions and the labour disruption at the Port of Vancouver.

Coal

CPR's Canadian coal business consists primarily of metallurgical coal transported from southeastern British Columbia to the Port of Vancouver, the eastern U.S. and eastern Canada. CPR transports U.S. coal, primarily thermal coal and petroleum coke, mainly within the U.S. Midwest. In 2003, coal revenues were \$444.0 million, increasing \$1.5 million (increased \$13 million, excluding the effect of FX) from \$442.5 million in 2002, and declining \$30.1 million from \$474.1 million in 2001. Revenues in 2003 increased over 2002 due to strong world demand for metallurgical coal in the fourth quarter, offset by reduced export rail shipments in the first three quarters of 2003 and the effect of FX. Coal revenues were lower in 2002 than in 2001 due to reduced shipments of metallurgical coal, partially offset by increased U.S. coke and thermal coal traffic.

Sulphur and Fertilizers

Sulphur and fertilizers include chemical fertilizers, potash and sulphur that are shipped mainly from western Canada to the ports of Vancouver and Portland, Oregon, as well as other Canadian and northern U.S. destinations. Revenues were \$417.4 million in 2003, rising \$16.1 million (increased \$33 million, excluding the effect of FX) from \$401.3 million in 2002 and increasing \$36.7 million from \$380.7 million in 2001. Higher sulphur transportation rates, which are tied to the market price, and stronger export volumes of potash resulted in higher revenues in 2003, compared to 2002. The increase was partially offset by the effect of FX and declines in the chemical fertilizers market during 2003. Revenues rose in 2002 over 2001 due to an increase in CPR's market share of export potash and higher demand for sulphur in domestic markets.

Forest Products

Forest products include lumber, wood pulp, paper products and panel transported from key producing areas in western Canada, Ontario and Quebec to various destinations in North America. Forest products revenues were \$328.8 million in 2003, decreasing \$31.5 million (decreased \$6 million, excluding the effect of FX) from \$360.3 million in 2002, and declining \$25.6 million from \$354.4 million in 2001. Revenues were lower in 2003 than in 2002 mainly as a result of the effect of FX and declines in the markets for wood pulp and newsprint. Revenues in 2002 were higher than in 2001 as a result of increased shipments of lumber and wood pulp, which were partially offset by reduced shipments of paper and newsprint.

Industrial Products

Industrial products include chemicals, plastics, aggregates, steel, and mine and energy-related products shipped throughout North America. In 2003, industrial products revenues were \$400.4 million, down \$21.7 million (increased \$10 million, excluding the effect of FX) from \$422.1 million in 2002, and down \$30.3 million from \$430.7 million in 2001. The decrease in revenues in 2003 from 2002 was due mainly to the effect of FX, partially offset by increased demand for aggregates and energy-related products in 2003. Revenues in 2002 were lower than in 2001 due to customer plant closures and reduced aggregates, glycol and styrene shipments.

Intermodal

Intermodal business consists of domestic and international (import-export) traffic. CPR's domestic segment handles primarily retail goods between eastern and western Canada. The international segment handles mainly containers of consumer goods between the ports of Vancouver, Montreal, New York/New Jersey and Philadelphia and inland Canadian and U.S. destinations. Intermodal revenues were \$940.1 million in 2003, increasing \$58.2 million (increased \$95 million, excluding the effect of FX) from \$881.9 million in 2002, and growing \$136.5 million from \$803.6 million in 2001. In 2003, CPR's

Table of Contents

PG 10 | 2003 Canadian Pacific Railway Annual Report

international business grew due mainly to increased volumes at the Port of Vancouver. Growth in the domestic intermodal market was due largely to the success of CPR's co-location initiative, under which major retailers have built regional distribution facilities adjacent to certain CPR intermodal terminals. In 2002, intermodal revenues grew relative to 2001 mainly as a result of higher traffic volumes in the domestic segment, and strong revenue growth in the international segment.

Automotive

Automotive business consists of the transportation of domestic and import vehicles, automotive parts and agricultural equipment from North American assembly plants and the Port of Vancouver to destinations in the Canadian and U.S. marketplace. In 2003, automotive revenues were \$304.2 million, down \$28.2 million (decreased \$4 million, excluding the effect of FX) from \$332.4 million in 2002, and increasing \$0.3 million from \$303.9 million in 2001. Revenues in 2003 were lower than in 2002 due to the effect of FX, power outages in eastern

Canada and the northeastern U.S. in the third quarter, and a decline in consumer demand. Automotive revenues in 2002 were higher than in 2001 due to increased demand for vehicles.

Other Revenues

Other revenues in 2003 were derived mainly from leasing of CPR track and other assets, switching fees, container storage and terminal services fees, land sales and income from business partnerships. Other revenues were \$181.4 million in 2003, a decrease of \$12.3 million (decreased \$6 million, excluding the effect of FX) from \$193.7 million in 2002, and a decline of \$20.5 million from \$201.9 million in 2001. Other revenues in 2003 were lower than in 2002 due to the effect of FX, lower switching fees and reduced income from business partnerships. In addition, there were favourable adjustments in 2002 as a result of a gain on a property sale from a previous period, partially offset by increased land sales and container storage fees.

performance indicators

For the year ended December 31	2003	2002 ⁽¹⁾	2001 ⁽¹⁾
Productivity indicators			
Gross ton-miles (GTM) of freight (millions)	219,961	209,596	212,928
Train-miles (thousands)	40,053	38,299	38,162
Average train weights (tons)	5,492	5,473	5,580
Efficiency and other indicators			
U.S. gallons of fuel per 1,000 GTMs	1.25	1.24	1.25
Average number of active employees	16,126	16,116	16,987
Miles of road operated at end of period	13,848	13,874	13,893
Freight revenue per RTM (cents)	3.04	3.22	3.16

Safety indicators

FRA personal injuries per 200,000 employee-hours	3.1	3.6	3.9
FRA train accidents per million train-miles	1.8	1.8	2.0

⁽¹⁾ Certain prior period figures have been restated to conform with presentation used in 2003.

Table of Contents**PRODUCTIVITY INDICATORS**

Productivity indicators reflect the Company's operational activity.

GTMs of freight measure the movement of total train weight over one mile in a year. The total train weight is comprised of the weight of the freight cars, their contents and locomotives being returned to terminals.

Train-miles measure the distance traveled between terminals or stations in a year.

Average train weight is the average total weight of all trains operated in a year, calculated by dividing GTMs by train-miles.

Fluctuations in these indicators normally drive corresponding fluctuations in certain variable costs such as fuel and crew costs.

EFFICIENCY AND OTHER INDICATORS

U.S. gallons of fuel per 1,000 GTMs is the total fuel consumed in freight and yard operations for every 1,000 GTMs traveled. This metric is calculated by dividing the total amount of fuel issued to CPR locomotives, excluding commuter and non-freight activities, by the total freight-related GTMs. The result indicates how efficiently the Company is using fuel. Despite improved efficiencies, this indicator remained relatively constant in 2003, compared to 2002, as a result of harsh operating conditions in the first quarter of 2003. Improvements in 2002 over 2001 were due mainly to the acquisition of new fuel-efficient locomotives.

Miles of road operated is the total length of all rail lines over which CPR operates, excluding track on which it has haulage rights. An increase in GTMs without a corresponding increase in miles of road operated indicates higher efficiency.

Average number of active employees is the average number of actively employed workers for the year. The number of actively employed workers includes employees who are taking vacation and statutory holidays and other forms of short-term paid leave,

and excludes individuals who have a continuing employment relationship with CPR but are not currently working. This indicator is calculated by adding the monthly average employee counts and dividing this total by 12. CPR's average number of active employees was flat in 2003, compared with 2002, as reductions made under restructuring initiatives were offset by hiring to handle business growth. The average number of employees decreased in 2002 from 2001 due primarily to earlier restructuring initiatives.

Freight revenue per RTM is the amount of freight revenue earned for every RTM moved, calculated by dividing the total freight revenue by the total RTMs in a year. This indicator decreased in 2003, compared to 2002, due mainly to changes in the mix of commodities moved and the effect of FX, partially offset by an increase in rates. An improvement in 2002 over 2001 also was a result of changes in the commodity mix.

SAFETY INDICATORS

Safety is a key priority for CPR's management and its Board of Directors. CPR uses two key safety indicators:

Federal Railroad Administration (FRA) personal injuries per 200,000 employee-hours is the number of personal injuries, multiplied by 200,000 and divided by total employee-hours. Personal injuries are defined as injuries that

require employees to lose time away from work, modify their normal duties or obtain medical treatment beyond minor first aid. Employee-hours are the total hours worked, excluding vacation and sick time, by all employees, excluding contractors.

FRA train accidents per million train-miles is calculated as the number of train accidents, multiplied by 1,000,000 and divided by total train-miles. Train accidents included in this metric are those that meet the FRA reporting threshold of US\$6,700.

A decrease in the above measures reflects an improvement in safety.

Table of Contents

PG 12 | 2003 Canadian Pacific Railway Annual Report

operating expenses, before other specified items

Operating expenses, before other specified items, were \$2,920.1 million in 2003, increasing \$111.0 million from \$2,809.1 million in 2002, and increasing \$62.5 million from \$2,857.6 million in 2001. In 2003, FX had a favourable impact of approximately \$137 million on operating expenses, which was offset by inflation, higher

depreciation and fuel prices, increases due to higher costs associated with larger freight volumes, and service disruptions in the first quarter of 2003 caused by severe winter weather conditions and derailments. Expenses in 2002 decreased from 2001 due to productivity improvement measures in 2002.

(in millions)	2003		2002		2001	
	Expense	% of revenue	Expense	% of revenue	Expense	% of revenue
Compensation and benefits	\$1,152.6	31.5%	\$1,131.1	30.9%	\$1,122.1	30.3%
Fuel	393.3	10.8	357.5	9.7	403.0	10.9
Materials	176.8	4.8	165.7	4.5	180.9	4.9
Equipment rents	238.2	6.5	255.0	7.0	272.1	7.4
Depreciation and amortization	381.5	10.4	348.4	9.5	334.4	9.1
Purchased services and other	577.7	15.8	551.4	15.0	545.1	14.7
Total	\$2,920.1	79.8%	\$2,809.1	76.6%	\$2,857.6	77.3%

COMPENSATION AND BENEFITS

Compensation and benefits expense includes employee wages, salaries and fringe benefits. In 2003, this expense was \$1,152.6 million, increasing \$21.5 million (increased \$58 million, excluding the effect of FX) from \$1,131.1 million in 2002, and rising \$30.5 million from \$1,122.1 million in 2001. Expenses in 2003 increased over 2002 as higher costs associated with inflation, severe winter conditions, pension expense and selective hiring to handle larger freight volumes were partially offset by lower variable incentive compensation costs, restructuring initiatives, expense adjustments during the first quarter of 2003 and the positive impact of FX. Expenses in 2002 increased over 2001 mainly as a result of inflation and higher fringe benefits and variable incentive costs in 2002, mostly offset by cost savings realized through restructuring initiatives.

FUEL

Fuel expense consists of the cost of fuel used by locomotives and includes provincial, state and federal fuel taxes. In 2003, fuel expense was \$393.3 million, up \$35.8 million (increased \$65 million, excluding the effect

of FX) from \$357.5 million in 2002, and a decrease of \$9.7 million from \$403.0 million in 2001. Fuel expense in 2003 was higher than in 2002 as a result of significantly higher fuel prices and greater consumption associated with increased freight volumes and severe winter operating conditions. These increases were partially offset by CPR's fuel-hedging program and the positive effect of FX. Fuel expense in 2002 declined from 2001 as a result of lower fuel prices in 2002, a successful hedging program and gains in fuel efficiency.

MATERIALS, PURCHASED SERVICES AND OTHER

Materials, purchased services and other expense encompasses a wide range of costs, including the cost of materials used for track, locomotive, freight car and building maintenance, and expenses for joint facilities, personal injury and damage, environmental, property and other taxes, contractor and consulting fees, and insurance. This expense was \$754.5 million in 2003, increasing \$37.4 million (increased \$78 million, excluding the effect of FX) from \$717.1 million in 2002, and

Table of Contents

increasing \$28.5 million from \$726.0 million in 2001. Expenses increased in 2003 over 2002 due to higher insurance premiums, derailment costs, volume-related expenses and favourable adjustments made in 2002. Costs in 2002 declined from 2001 as increased insurance and other expenses were more than offset by initiative savings and lower locomotive maintenance expenses.

EQUIPMENT RENTS

Equipment rents expense includes the cost to lease freight cars and locomotives from other railways and companies. In 2003, equipment rents expense was \$238.2 million, a decrease of \$16.8 million (increased \$6 million, excluding the effect of FX) from \$255.0 million in 2002, and a decline of \$33.9 million from \$272.1 million in 2001. The decrease in 2003 primarily resulted from the positive impact of FX, reduced compensation to private freight car owners and capitalization of rents associated with a variable-interest entity (refer to Note 2 of the Notes to Consolidated Financial Statements) in 2003. This was partially offset by higher expenses that resulted from weather-related service issues and higher traffic volumes. Expenses in 2002, compared to 2001, decreased due to improved asset utilization and other initiatives, which more than offset higher car hire payments that resulted from increased non-bulk traffic.

DEPRECIATION AND AMORTIZATION

Depreciation and amortization expense represents the charge associated with the use of track and roadway, buildings, locomotives, freight cars and other depreciable assets. This expense was \$381.5 million in 2003, increasing \$33.1 million (increased \$41 million, excluding the effect of FX) from \$348.4 million in 2002, and up \$47.1 million from \$334.4 million in 2001. The increase in 2003 over 2002 was due largely to additions to CPR's capital assets and increased depreciation rates on certain assets, mostly related to information systems hardware equipment. The increase was partially mitigated by the effect of FX. Expenses in 2002, compared to 2001, increased as a result of capital additions, partially offset by the favourable impact of depreciation rate revisions in 2002.

other income statement items

OTHER CHARGES

Other charges consist of amortization of long-term accruals, gains or losses due to the effect of FX on accounts receivable and accounts payable, various costs associated with financing, and interest and other miscellaneous income. Other charges were \$33.5 million in 2003, increasing \$11.7 million from \$21.8 million in 2002 and increasing \$7.1 million from \$26.4 million in 2001. The increase in 2003, compared to 2002, was due to a benefit in 2002 from interest income on a tax recovery and interest paid in 2003 on an income tax settlement. The decrease in expense in 2002 from 2001 was due to interest income recorded in 2002 from the tax recovery.

INTEREST EXPENSE

Interest expense includes interest on long-term debt and capital leases. Interest expense was \$218.7 million in 2003, a decrease of \$23.5 million (decreased \$1 million, excluding the effect of FX) from \$242.2 million in 2002, and an increase of \$9.1 million from \$209.6 million in 2001. The decrease in 2003 from 2002 was due to the replacement of higher-cost debt with lower-cost debt and the positive impact of FX and interest rate swaps. The decrease was partially offset by interest on a new \$350-million 4.9 % Medium Term Notes issuance in July 2003. Interest expense in 2002 was higher than in 2001 because the 2002 amount included a full year of interest on the increased debt

following the spin-off from CPL, partially mitigated by the early redemption of CPR's 8.85 % Debentures.

INCOME TAXES

The effective income tax rate for 2003 was 9.49 %, compared with a normalized rate (income tax rate based on income adjusted for FX on LTD and other specified items) of 31.16 %. The normalized rate for 2004 is expected to be 33 % to 35 %.

In December 2003, the Government of Ontario repealed previously announced future income tax rate reductions. The Company's future income tax liability, which was previously based on these reduced rates, has been

Table of Contents

PG 14 | 2003 Canadian Pacific Railway Annual Report

increased by \$52.7 million to reflect the change. This adjustment is also discussed in the section Non-GAAP Earnings , under the subheading Other Specified Items .

Following a revaluation in 2003 of various components used to determine its future income tax liability, the Company reduced the estimate of its future income tax liability by \$59.3 million. This adjustment is also discussed in the section Non-GAAP Earnings , under the subheading Other Specified Items .

In 2002, the Company reported an income tax recovery of approximately \$72.0 million stemming from a favourable tax decision by the Federal Court of Appeal. This decision resulted in an effective tax rate of 18%, compared with a normalized income tax rate of approximately 31%.

CPR recognized a \$64-million decrease in future income tax expense in 2001 as a result of future corporate tax rate reductions instituted by various provincial governments in 2001 and a reduction in the apportioned provincial tax rate caused by the amalgamation on January 1, 2001, of Canadian Pacific Railway Company and its Canadian subsidiary, StL&H. This resulted in an effective tax rate of 26% for 2001, compared to a normalized rate for the year of approximately 37%.

fourth-quarter summary

NON-GAAP EARNINGS

Income, excluding FX on LTD and other specified items, was \$115.0 million in fourth-quarter 2003, decreasing \$5.0 million from \$120.0 million in fourth-quarter 2002. The decline was due to a negative effect from FX of approximately \$24 million and an increase in fuel, depreciation and compensation and benefits expenses, largely offset by higher grain, intermodal and coal revenues.

OPERATING RESULTS

The Company reported net income of \$175.2 million in the fourth quarter of 2003, an increase of \$49.6 million from \$125.6 million in the same period of 2002. The

increase was due mainly to FX on LTD of \$44.3 million in 2003 a rise of \$38.2 million over FX on LTD of \$6.1 million in 2002.

Operating income for the three-month period ended December 31, 2003, was \$196.8 million in 2003, a decrease of \$41.2 million from \$238.0 million in the same period of 2002. The decrease was mainly attributable to a loss of \$18.4 million (\$28.9 million before tax) on assets transferred to IBM Canada Ltd. under an outsourcing agreement.

Diluted EPS were \$1.10 in the fourth quarter of 2003, an increase of \$0.31, compared with \$0.79 in the same period of 2002.

REVENUES

Total revenues were \$963.5 million in the fourth quarter of 2003, an increase of \$13.1 million (increased \$93 million, excluding the effect of FX) from \$950.4 million in fourth-quarter 2002. Grain revenues in the fourth quarter of 2003

were \$188.7 million, up \$26.6 million (increased \$44 million, excluding the effect of FX) from \$162.1 million in the same period of 2002 as a result of favourable market conditions and increased crop production. Coal revenues were \$116.2 million, up \$12.9 million (increased \$18 million, excluding the effect of FX) from \$103.3 million, reflecting stronger demand for coal. Forest products revenues were \$73.7 million, down \$15.3 million (decreased \$5 million, excluding the effect of FX) from \$89.0 million in 2002, due mainly to a decline in shipments of wood pulp, newsprint and lumber. Intermodal revenues grew in the fourth quarter of 2003 to \$246.4 million, an increase of \$9.8 million (increased \$26 million, excluding the effect of FX) from \$236.6 million in the same period of 2002, due mainly to increased volumes through the Port of Vancouver. Automotive revenues were \$75.9 million, down \$13.1 million (decreased \$3 million, excluding the effect of FX) from fourth-quarter 2002 revenues of \$89.0 million due to a decline in demand for automobiles. Industrial products revenues were \$104.2 million in the fourth quarter of 2003, a drop of \$4.5 million (increased

Table of Contents

\$9 million, excluding the effect of FX) from \$108.7 million in 2002 as the effect of FX more than offset increased volumes. Sulphur and fertilizers revenues were unchanged (increased \$7 million, excluding the effect of FX) in the fourth quarter at \$98.5 million as a result of high sulphur rates and a strong export potash market in 2003, offset by the effect of FX.

EXPENSES

Operating expenses in the fourth quarter of 2003 were \$766.7 million, up \$54.3 million (increased \$81 million, excluding the effect of FX) from \$712.4 million in the same period of 2002. Compensation and benefits expense in fourth-quarter 2003 was \$302.8 million, an increase of \$22.6 million (increased \$37 million, excluding the effect of FX), compared with \$280.2 million in the fourth quarter of 2002. The increase was largely due to inflation, higher pension and incentive compensation expenses and selective hiring to handle business growth, partially offset by cost savings from workforce reductions. Materials, purchased services and other expenses were \$183.4 million, down marginally (increased \$17 million, excluding the effect of FX) from \$184.1 million in 2002, as equipment repair costs in 2003 and favourable adjustments taken in 2002 were offset by the effect of FX. Depreciation and amortization expense was \$99.0 million in 2003, up \$11.5 million (increased \$15 million, excluding the effect of FX), compared with \$87.5 million in the fourth quarter of 2002 due mostly to investments in new assets. Fuel expense was \$98.0 million, compared with \$98.2 million in 2002 (increased \$12 million, excluding the effect of FX), as higher fuel prices and increased consumption associated

with volume growth were offset by the effect of FX. Equipment rents expense was \$54.6 million in the fourth quarter of 2003, down \$7.8 million (increased \$1 million, excluding the effect of FX) from \$62.4 million in 2002, as increased rentals to accommodate higher volumes and lower receipts for CPR freight car use were more than offset by FX and the capitalization of rents associated with a variable-interest entity (refer to Note 2 of the Notes to Consolidated Financial Statements) in 2003.

Also affecting operating income in the fourth quarter of 2003 was a loss of \$18.4 million (\$28.9 million before tax) on the transfer of computing infrastructure assets to IBM Canada Ltd., discussed under the subheading Other Specified Items on page 6.

OTHER INCOME STATEMENT ITEMS

FX on LTD grew to \$44.3 million (\$72.0 million after tax) in fourth-quarter 2003, up \$38.2 million from \$6.1 million (\$5.6 million after tax) in the same period of 2002. The increase was due to the effect of FX on U.S. dollar-denominated debt. Other charges grew to \$13.4 million in 2003, increasing \$5.8 million from \$7.6 million in 2002, due mainly to interest income resulting from an income tax settlement in 2002. Interest expense was \$50.3 million in fourth-quarter 2003, a decrease of \$7.2 million (increased \$2 million, excluding the effect of FX) from \$57.5 million in 2002, due to the favourable effect of FX and reduced interest expense as CPR replaced higher-cost debt with lower-cost debt, offset by interest on new debt issued in 2003.

This information is in Canadian dollars and has been prepared in accordance with Canadian GAAP.

QUARTERLY TRENDS

Volumes of and, therefore, revenues from certain goods are stronger during different periods of the year. Revenues are strongest in the fourth quarter primarily as a result of the movement of grain after the harvest and the transportation of consumer goods. First-quarter revenues can be lower due mainly to winter weather conditions and reduced transportation of consumer goods. Second-and third-quarter revenues improve as fertilizer volumes are highest during the second quarter and demand for construction-related goods is highest in the third quarter.

Operating income is also affected by seasonal fluctuations. Operating income is typically lowest in the first quarter due to higher operating costs as a result of winter weather.

The special charge in the second quarter of 2003 and the loss on transfer of assets in the fourth quarter of 2003 also affected operating and net income. The special charge and the loss on transfer of assets are discussed in the section **Non-GAAP Earnings** under the subheading **Other Specified Items** .

Net income is influenced by seasonal fluctuations, including weather-related costs, as well as the other specified items discussed in the section **Non-GAAP Earnings** under the subheading **Other Specified Items** .

changes in accounting policy

Changes in accounting policy are discussed in detail in Note 2 of the Notes to Consolidated Financial Statements for the year ended December 31, 2003, under the heading "New Accounting Policies". Discussion of potential or forthcoming changes in accounting policies is also included in Note 3 under the heading "Future Accounting Changes".

liquidity and capital resources

CPR believes that adequate amounts of cash and cash equivalents are available in both the short term and the long term to provide for ongoing operations and planned growth. CPR is not aware of any trends or expected fluctuations in its liquidity that would create any

Table of Contents

deficiencies. The following discussion of operating, investing and financing activities describes CPR's indicators of liquidity and capital resources.

OPERATING ACTIVITIES

Cash provided by operating activities was \$325.9 million in 2003, a decrease of \$458.3 million from \$784.2 million in 2002, and a decrease of \$432.6 million from \$758.5 million in 2001. The decrease in 2003 from 2002 was due mainly to additional pension funding of \$300 million in the fourth quarter of 2003 and lower net income in 2003. The increase in cash in 2002 from 2001 was due mainly to higher net income and reduced payments for restructuring initiatives in 2002.

Cash payments in 2003 related to severance under all restructuring initiatives, discussed in this MD&A under the subheading "Restructuring", and CPR's environmental remediation program, described in this MD&A under the subheading "Critical Accounting Estimates", amounted to \$107.0 million, compared with \$119.3 million in 2002 and \$132.4 million in 2001. The total accrued restructuring and environmental liability at December 31, 2003, was \$462.2 million, of which \$117.1 million is included in current liabilities.

There are no specific or unusual requirements relating to CPR's working capital. In addition, there are no unusual restrictions on any subsidiary's ability to transfer funds to CPR.

INVESTING ACTIVITIES

Cash used in investing activities was \$720.5 million in 2003, increasing \$148.8 million from \$571.7 million in 2002, and up \$130.9 million from \$589.6 million in 2001. The increase in 2003 was due to higher capital spending on track projects, the purchase of new locomotives and increased funding to a joint venture. Cash used in 2002 was lower than in 2001 due to decreased capital spending and higher track-related salvage proceeds.

Capital spending in 2004 is projected to be \$670 million to \$710 million for track projects and locomotive and freight car acquisitions. CPR expects to finance locomotives with new debt. Other capital spending will be financed with cash from operations.

FINANCING ACTIVITIES

Cash provided by financing activities was \$244.4 million in 2003, compared with cash used in financing activities of \$484.5 million in 2002. Cash provided by financing activities in 2001 was \$267.7 million. The increase in 2003 over 2002 was due to the issuance of debt in 2003, partially offset by the redemption of debt in 2003, as described below, and the repayment of US\$250 million of debt in the second quarter of 2002. The decrease in 2002 from 2001 was due to the early redemption of US\$250 million of debt in the second quarter of 2002, and the issuance of approximately \$1.2 billion of debt in 2001, partially offset by a return of capital of \$700 million to CPL in 2001.

CPR completed two unsecured debt offerings in 2003: 5.75% US\$250 million issued March 2003, maturing March 2033, and 4.9% \$350 million issued July 2003, maturing June 2010. The former was to refinance CPR's 6.875% US\$250-million Notes that matured in April 2003. The latter was to take advantage of the low interest rate environment and provide funds for general operating purposes.

During 2003, CPR entered into cross-currency, fixed-to-floating interest rate swap agreements concurrent with the issuance of its \$350-million Medium Term Notes, due June 2010, which resulted in \$105 million of fixed-rate debt being exchanged for US\$77.3 million of floating-rate U.S. dollar-denominated debt. The Company also entered into fixed-to-floating interest rate swap agreements totalling US\$150 million, which will convert a portion of its US\$400-million 6.25% Notes to floating-rate debt.

In December 2003, CPR signed a letter of intent to acquire approximately US\$68.4 million of equipment in September and October 2004.

Table of Contents

PG 18 | 2003 Canadian Pacific Railway Annual Report

At the end of 2003, CPR's net-debt to net-debt-plus-equity ratio improved to 46.8%, compared with 47.3% and 51.8% at December 31, 2002 and 2001, respectively. Net debt is the sum of long-term debt, long-term debt maturing within one year and short-term borrowing, less cash and short-term investments. This is divided by the sum of net debt plus total shareholders' equity as presented on CPR's Balance Sheet.

Management is committed to maintaining its net-debt to net-debt-plus-equity ratio at an acceptable level and will continue to seek lower-cost term financing so that the Company retains solid investment-grade credit.

CPR has available, as sources of financing, credit facilities of up to \$505 million. CPR believes it can raise capital in excess of these amounts, if required, while maintaining its credit quality in international debt markets. CPR's unsecured long-term debt securities are rated Baa2, BBB and BBB by Moody's Investors Service, Inc., Standard and Poor's Corporation and Dominion Bond Rating Service, respectively.

FREE CASH

The Company had negative free cash, after dividends, of \$475.4 million in 2003, compared with positive free cash of \$131.7 million in 2002 and \$18.9 million in 2001. Free cash, after dividends, is calculated as cash provided by operating activities, less cash used in investing activities and dividends. Negative free cash in 2003 resulted mainly from an extra pension funding payment of \$300 million in the fourth quarter of 2003, and lower net income and increased capital expenditures in 2003, compared with 2002. CPR expects to have a moderately positive free cash balance in 2004, achieved mainly with higher earnings and lower pension contributions than in 2003.

DIVIDENDS PER SHARE

Quarterly dividends of \$0.1275 per Common Share were declared by the Board of Directors and were payable on January 27, 2003, April 28, 2003, July 28, 2003, and October 27, 2003, to holders of record on December 27, 2002, March 28, 2003, June 27, 2003,

and September 26, 2003, respectively. In addition, a dividend of \$0.1275 was declared on December 10, 2003, payable on January 26, 2004, to holders of record on December 24, 2003. The Board of Directors will give consideration on a quarterly basis to the payment of future dividends. The amount of any future quarterly dividends will be determined based on a number of factors that may include the results of operations, financial condition, cash requirements and future prospects of the Company. The Company is, however, under no obligation to declare dividends and the declaration of dividends is wholly within the Board of Directors' discretion. Further, the Board of Directors may cease declaring dividends or may declare dividends in amounts that are different from those previously declared. Finally, restrictions in the credit or financing agreements entered into by the Company or the provisions of applicable law may preclude the payment of dividends in certain circumstances.

balance sheet

Assets totalled \$9,957.1 million at December 31, 2003, compared with \$9,660.8 million at December 31, 2002, and \$9,661.1 million at the end of 2001. The increase in assets in 2003, compared to 2002, was due mainly to capital additions for locomotives and track replacement programs, and a larger pension asset from additional funding during 2003. The decline in 2002, compared to 2001, was a result of a decrease in cash held in temporary investments, mostly offset by certain capital additions.

CPR's combined short-term and long-term liabilities were \$6,281.9 million at December 31, 2003, compared with total liabilities of \$6,274.4 million and \$6,688.7 million at December 31, 2002 and 2001, respectively. The changes in liabilities year over year were due mainly to increases or decreases in long-term debt, as discussed in the section Liquidity and Capital Resources under the subheading Financing Activities .

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG 19

At December 31, 2003, the Company's Balance Sheet reflected \$3,675.2 million in equity, compared with equity balances of \$3,386.4 million and \$2,972.4 million at December 31, 2002 and 2001, respectively. The increase in equity was due mainly to CPR's growth in retained income in 2002 and 2003.

SHARE CAPITAL

The Company's Articles of Incorporation authorize for issuance an unlimited number of Common Shares and an unlimited number of First Preferred Shares and Second Preferred Shares. At December 31, 2003, 158.7 million Common Shares and no Preferred Shares had been issued.

financial instruments

The Company's policy is to not utilize derivative financial and commodity instruments for trading or speculative purposes. CPR's policy with respect to hedging of risk exposure is to selectively reduce volatility associated with interest rates, foreign exchange fluctuations and fluctuations in the price of diesel fuel. A portion of the U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in self-sustaining foreign subsidiaries. Unrealized foreign exchange gains and losses on a portion of the U.S. dollar-denominated long-term debt are offset against foreign exchange gains and losses arising from translation of self-sustaining foreign subsidiaries accounts.

off-balance sheet arrangements

The Company has entered into one off-balance sheet arrangement as part of its normal course of business.

SALE OF ACCOUNTS RECEIVABLE

CPR sold a portion of its accounts receivable to a financing institution in order to raise funds through the monetization of receivables. At December 31, 2003, the receivables sold amounted to \$132 million under a securitization program that involves the non-recourse sale of accounts receivable on a revolving basis. Cash proceeds on this revolving arrangement affecting receivables were \$120 million, with \$12 million having been held back as a reserve to be released to the Company upon termination of the agreement.

The Company uses this arrangement as a cost-efficient secondary source of financing its operations. Charges related to this agreement, included in Other Charges on CPR's Statement of Consolidated Income, amounted to \$4.1 million in 2003, compared with \$3.5 million in 2002 and \$5.7 million in 2001.

The program is subject to standard reporting and credit-rating requirements and includes provisions such as the revolving transfer of receivables satisfying certain pre-established criteria such as an acceptable credit standing. Failure to comply with these provisions would trigger termination of the program. In the event the program is terminated prior to maturity, CPR expects to have sufficient liquidity remaining in its revolving credit facility to meet its payment obligations. The securitization program will expire in August 2004. The Company intends to renew or replace the program upon its expiration.

contractual commitments

The following table indicates CPR's known contractual obligations and commitments to make future payments for contracts such as debt, capital lease arrangements and commercial commitments:

Table of Contents

PG 20 | 2003 Canadian Pacific Railway Annual Report

CONTRACTUAL COMMITMENTS

At December 31, 2003 (in millions)	Total	Payments due by period			
		< 1 year	1 - 3 years	3 - 5 years	> 5 years
Long-term debt	\$2,995.8	\$ 9.5	\$279.8	\$189.3	\$2,517.2
Capital lease obligations	367.0	4.4	12.2	17.6	332.8
Operating lease obligations ⁽¹⁾	461.0	113.4	178.7	98.0	70.9
Supplier purchase obligations	760.6	135.9	154.7	139.1	330.9
Other long-term liabilities reflected on the Company's Balance Sheet ⁽²⁾	900.1	150.3	236.1	195.7	318.0
Total contractual obligations	\$5,484.5	\$413.5	\$861.5	\$639.7	\$3,569.8

⁽¹⁾ CPR has guaranteed residual values on certain leased equipment with a maximum exposure of \$118.4 million primarily in 2006 and beyond. Management estimates that CPR will have no net payments under these residual guarantees and, as such, has not included any amounts with respect to these guaranteed residual values in the minimum payments shown above.

⁽²⁾ Includes expected cash payments for restructuring, environmental remediation, post-retirement benefits and workers' compensation benefits. Projected payments for post-retirement benefits and workers' compensation benefits include the anticipated payments for years 2004 to 2013.

foreign exchange

The Company is exposed to foreign exchange fluctuations in the U.S. dollar. A stronger Canadian dollar reduces U.S. dollar-denominated revenues and expenses. Operating income is also reduced because a higher percentage of revenues than expenses is generated in U.S. dollars. The Company has arranged a significant portion of its long-term debt in U.S. dollars as a hedge against a stronger Canadian dollar, as the negative impact on operating income is largely offset by a reduction in U.S. dollar-denominated interest cost.

During 2003, the Canadian dollar strengthened by more than 11 % year over year against the U.S. dollar. The impact of this foreign exchange rate fluctuation on the Company's financial results is reflected in the Statement of Consolidated Income and the Consolidated Balance Sheet.

FOREIGN EXCHANGE EFFECT ON INCOME STATEMENT

The Company has U.S. dollar-denominated revenues and expenses in both its Canadian and foreign subsidiaries. Foreign currency revenues and expenses are translated at the exchange rate in effect on the dates of the related transactions, with all gains and losses included immediately in income. On average, a one-cent change in the Canadian dollar affects operating income by approximately \$3.0 million.

FOREIGN EXCHANGE EFFECT ON BALANCE SHEET

U.S. dollar-denominated Balance Sheet accounts of the Canadian operations are translated into Canadian dollars at the year-end exchange rate for monetary items such as working capital, long-term debt and cash, and at historical exchange rates for non-monetary items. Unrealized gains and losses arising from the translation of the monetary items are included in income immediately as Other Charges , and as Foreign Exchange Gains (Losses) on Long-term Debt for U.S. dollar-denominated long-term debt.

TRANSLATION OF FOREIGN SUBSIDIARIES

The accounts of the Company s foreign subsidiaries are translated into Canadian dollars using the year-end exchange rate for assets and liabilities and the average exchange rates in effect during the year for revenues and expenses. Unrealized foreign exchange gains and losses arising from translation of foreign subsidiaries accounts are included as a separate component of Shareholders Equity on the Consolidated Balance Sheet. The Company has designated a portion of its U.S. dollar-denominated long-term debt as a hedge against its net investment in self-sustaining subsidiaries. As such, gains and losses on translation of foreign subsidiaries partially offset the foreign exchange gains and losses on long-term debt held in Canada.

Table of Contents

business risks and critical accounting estimates

FUTURE TRENDS, COMMITMENTS AND RISKS

In 2004, CPR will continue its focus on revenue growth and cost reduction as well as improved utilization of its asset base. Targeted initiatives and price improvements are expected to drive revenue growth, including growth from value-added services provided by Canadian Pacific Logistics Solutions, CPR's logistics and supply chain division. CPR anticipates continued gains in bulk commodities, assuming global demand remains strong.

Continuing cost-containment programs are vital to CPR achieving its financial performance targets. Cost-reduction initiatives announced during the second quarter of 2003 resulted in the elimination of 360 job positions through consolidation and rationalization of administrative functions, redesign of yard processes and more efficient maintenance of freight car and locomotive fleets. CPR plans to eliminate an additional 330 positions in 2004. CPR will continue to selectively hire in specific areas of the business as required by growth or changes in traffic patterns.

Improved asset utilization is expected to result from further railcar modernization and from recent investments in information technology. Overall, the rail industry is continuing to leverage information technology to facilitate its dealings with suppliers and shippers. CPR's ongoing strategy is to apply information technology to improve its competitive position.

CPR remains committed to maintaining its current high level of plant quality and renewing its franchise. At December 31, 2003, CPR had committed to future multi-year capital expenditures amounting to \$493.9 million, which are expected to be financed by cash generated from operations.

CPR has a substantial investment in fixed plant and equipment, and has limited flexibility to adjust output levels and expenditures in response to short-term declines in traffic, potentially resulting in a cyclical

adverse impact on future earnings levels. However, CPR actively manages its processes and resources to control variable costs, increase efficiency and mitigate the negative effects of declines in freight traffic.

Infrastructure capacity is an increasing business risk for CPR, especially in western Canada and the U.S., due largely to significant increases in traffic volumes in a number of business segments. Capacity could be strained in certain corridors where shipping peaks occur in a number of business segments at the same time. To address this risk, CPR continues to increase the capacity of its core franchise through infrastructure sharing and joint service programs with other railways, operating plan strategies, and strategic capital investment programs.

CPR's traffic volumes and revenues are largely dependent upon the health and growth of the North American and global economies, exchange rates, and other factors affecting the volume and patterns of international trade. CPR's future grain transportation revenues may be negatively affected if there is a recurrence of drought conditions that existed in its grain collection areas in 2001 and 2002. CPR will attempt to mitigate the effects of any downward pressure on transportation revenues primarily through cost-containment measures.

Oil prices, which increased during the latter half of 2002, escalated further in early 2003 and remain an uncertainty due to such matters as low inventories and political unrest and ongoing military conflict in the Middle East. CPR will continue to mitigate increases in fuel prices through its fuel-hedging programs and fuel-efficiency initiatives.

CPR works closely with Canadian and U.S. officials as well as other railways to ensure the safe and secure movement of goods between Canada and the U.S. In 2003, several new regulatory security frameworks were initiated as a result of the terrorist attacks in the U.S. in 2001. CPR is fully automated with both Canada Border

Table of Contents

PG 22 | 2003 Canadian Pacific Railway Annual Report

Services Agency (CBSA) and U.S. Customs and Border Protection (C&BP) and provides cargo information electronically well in advance of border arrival. Under the joint Declaration of Principles signed in April 2003, CPR committed to work with CBSA and C&BP to install sophisticated cargo-screening systems designed to scan U.S.-bound rail shipments at five of CPR 's border crossings. Four of these systems, called the Vehicle and Cargo Inspection System, are now fully operational. The remaining installation is expected to be completed in 2005. This joint government-industry initiative was the culmination of several months of discussion and is expected to enhance the security of U.S.-bound rail shipments while helping ensure uninterrupted access to the U.S. market for CPR customers.

CPR is a certified carrier with C&BP 's Customs-Trade Partnership Against Terrorism (C-TPAT) and CBSA 's Partners in Protection (PIP) programs. C-TPAT and PIP are partnership programs of government and business that seek to strengthen overall supply chain and border security. CPR is also an approved carrier under CBSA 's Customs Self-Assessment program.

CPR reached a negotiated contract settlement with members of the Rail Canada Traffic Controllers union following a seven-week strike during the summer of 2003. The striking traffic controllers, who manage the movement of trains across CPR 's network in Canada, were replaced by non-unionized employees and rail traffic was unaffected by the strike. The new three-year contract extends to the end of 2005.

Train crew employees have elected the Teamsters Canada Rail Conference as their bargaining agent, replacing the Canadian Council of Railway Operating Unions (CCROU). CPR 's collective agreement with the CCROU expired on December 31, 2002, however, negotiations had been suspended pending the outcome of the representational vote by union members. CPR expects to begin negotiating a collective agreement in 2004.

A three-year collective agreement was ratified in January 2004 by members of the United Steel Workers of America (USWA). The agreement with the USWA, which represents clerical employees of CPR, extends to the end of 2006.

Negotiations with the Brotherhood of Maintenance of Way Employees (BMWE) have been delayed due to an attempt by another union to represent the BMWE membership. At this time, management is unable to predict when bargaining may resume with the union, which represents employees who maintain CPR 's track.

A final decision was made in the U.S. Department of Commerce anti-dumping and countervailing duty cases with respect to Canadian grain. A previous ruling on Canadian durum was overturned and the duty on durum was removed. The U.S. re-filed its complaint against the Government of Canada and the Canadian Wheat Board (CWB) at the World Trade Organization (WTO). In February 2004, the WTO found that CWB is operating within international trading rules but was critical of some aspects of Canadian grain transportation regulation, including the legislated cap on revenues that can be charged and earned by Canadian railways for the carriage of western Canadian grain.

The Province of British Columbia announced on November 25, 2003, its intention to sell most of the freight operations of BC Rail to Canadian National Railway Company. The sale of BC Rail, which serves northern British Columbia, requires approval of the Competition Bureau. CPR is taking steps to protect its market position and presence in northern British Columbia and does not expect a material adverse impact on the Company should the sale be completed.

A seven-year, \$200-million agreement reached with IBM Canada Ltd. in December 2003 to operate and enhance CPR's computing infrastructure included a transfer of CPR's existing computing assets to IBM. The arrangement will reduce CPR's costs over time and allow remaining information technology staff to focus on applications that improve efficiency and service.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG23

The Company is investigating environmental contamination at a property in the U.S. that had been leased by CPR to third parties and is still owned by the Company. The cost of remediation at this site cannot be reasonably estimated at this time and may be material. The Company believes that the environmental condition was substantially caused by the former lessees and not by the Company. The Company has filed a claim against the former lessees seeking to recover all or substantially all of the costs of remediation.

FINANCIAL COMMITMENTS

In addition to the financial commitments of the Company mentioned previously under the headings Off-Balance Sheet Arrangements and Contractual Commitments, the Company is party to certain other financial commitments discussed below.

Certain Other Financial Commitments

At December 31, 2003 (in millions)	Total	Amount of commitment per period			
		< 1 year	1 - 3 years	3 - 5 years	> 5 years
Letters of credit	\$314.1	\$314.1	\$	\$	\$
Capital commitments ⁽¹⁾	493.9	209.3	47.9	58.6	178.1
Surety bonds	25.0	25.0			
Offset financial liability	150.5				150.5
Interest rate swaps and bond forward on long-term debt unrealized gain	(10.2)	(10.2)			
Crude oil futures unrealized gain	(26.8)	(17.0)	(8.6)	(1.2)	
Total commitments	\$946.5	\$521.2	\$39.3	\$57.4	\$328.6

(1) The Company has several contracts outstanding with termination payments ranging from \$nil to \$26.4 million per contract, and resulting in a minimum exposure of \$4.3 million and a maximum exposure of \$28.9 million, depending on the date of termination. These contracts terminate between 2006 and 2013.

Letters of Credit and Surety Bonds

Letters of credit and surety bonds are obtained mainly to provide security to third parties as part of agreements. The Company is liable for these contract amounts in the case of non-performance under third-party agreements. As a result, CPR's available line of credit is adjusted for the contract amounts currently included within the revolving credit facility.

Capital Commitments

The Company is obligated to make various capital purchases for track programs, locomotive acquisitions and

overhauls, and freight car and land purchases. At December 31, 2003, CPR had multi-year capital commitments of \$493.9 million, mainly for locomotive overhaul agreements, in the form of signed contracts or letters of intent. Payments for these commitments are due in 2004 through 2016.

Offset Financial Liability

The Company entered into a bank loan in 2003 to finance the acquisition of certain equipment. At December 31, 2003, the loan had a balance of \$154.5 million, which was offset by a financial asset of \$150.5 million with the same financial institution. The remainder is included in Long-term Debt on CPR's Consolidated Balance Sheet.

Interest Rate Swaps

The Company enters into interest rate hedging transactions to manage exposure to fluctuations in interest rates, to hedge against increases in interest rates in anticipation of future debt issuances, and to convert a portion of its fixed-rate long-term debt to floating-interest-rate debt. The Company uses interest rate swaps, bond forwards and treasury locks as part of its interest rate risk management strategy.

Table of Contents

PG 24 | 2003 Canadian Pacific Railway Annual Report

The Company enters into interest rate swaps to convert fixed-rate debt to floating-rate debt. At December 31, 2003, CPR had entered into six separate swaps on which it pays an average floating rate that fluctuates quarterly based on the London Interbank Offered Rate (LIBOR). The swaps will expire in 2010 and 2011.

The Company uses bond forwards and treasury locks to fix the benchmark interest rate of future debt issuances. The Company entered into six treasury lock transactions, expiring March 2004, for a future debt issuance totalling US\$124 million, with an average term of 14.5 years.

The unrealized gain shown above was calculated based on the fair value of the swaps or locks at December 31, 2003. Swap, currency and basis spread curves from Reuters.com were utilized to establish the fair market value of the swaps. Values may vary marginally due to either the terms of the contract or because of minor variations in the time of day when the data was collected.

In 2003, interest expense was reduced by \$5.2 million due to the above-mentioned interest rate swaps. At December 31, 2003, Other Assets and Deferred Charges on the Consolidated Balance Sheet included a \$21.7-million loss from an interest rate lock settled in July 2003 on \$200 million of long-term debt. This loss is being amortized over seven years, which is the life of the debt. Interest Expense on the Statement of Consolidated Income included \$1.6 million for amortization of this loss. No unrealized gains or losses have been included in the Statement of Consolidated Income or the Consolidated Balance Sheet.

Crude Oil Futures

CPR sells and purchases crude oil futures to hedge its exposure against the possibility of fuel price increases. The Company's exposure is represented by the unrealized gains or losses on these futures.

The unrealized gain shown in the Certain Other Financial Commitments table was calculated based on the fair value of the futures, which was the market settle price of West Texas Intermediate (WTI) on the New York Mercantile Exchange (NYMEX) at December 31, 2003. Fair market value of collars is included in the calculation

of the unrealized gain or loss if the weighted average future settle price is greater than the ceiling price or less than the floor price of the collars. At December 31, 2003, the price of WTI was greater than the ceiling price of the collars. As a result, the gains associated with the collars have been included in the unrealized gain. No unrealized gains or losses have been included in the Statement of Consolidated Income or the Consolidated Balance Sheet.

In 2003, fuel expense was reduced by \$28.3 million as a result of gains and losses arising from settled futures and collars.

Pension Plan Deficit

The deficit of the Company's defined benefit pension plans declined to \$753.7 million at December 31, 2003, from \$863.5 million at December 31, 2002. The Company complies with the applicable funding requirements, which are federally regulated. A plan surplus or deficit is calculated as the difference between an actuarially estimated future obligation for pension payments and the fair market value of the assets available to pay this liability. The pension obligation is discounted using a discount rate that is a blended interest rate of high-quality corporate bonds. The discount rate is one of the factors that can influence a plan's deficit. Other factors include the actual return earned on the assets and rates used, based on management's best estimates, for future salary increases and inflation. For example, every 1.0 percentage point the actual discount rate varies above (or below) the estimated discount rate can cause the

deficit to decrease (or increase) by approximately \$590 million. Similarly, every 1.0 percentage point the actual return on assets varies above (or below) the estimated return for the year can cause the deficit to decrease (or increase) by approximately \$60 million. There would eventually be significant increases to funding and pension expense if current conditions persist.

The Company made a voluntary extra pension contribution of \$300 million in December 2003 as a pre-payment of contributions anticipated to be made in 2004 and 2005. The remaining deficit will fluctuate according to future market conditions and funding will be revised as necessary to reflect such fluctuations. The Company will

Table of Contents

continue to make contributions towards this deficit that, as a minimum, meet requirements as prescribed by the Pension Benefits Standards Act. CPR estimates that it will be required to contribute \$122 million in 2004.

The last actuarial valuation of CPR's main pension plan was completed as at January 1, 2002. The Company is currently undergoing an updated actuarial valuation of this plan as at January 1, 2004, which will be completed by June 2004. The Company took into account the estimated impact of this valuation, along with other factors, in deriving the expected funding contribution of \$122 million in 2004. While a similar level of contribution is expected for 2005, the actual amount required to be contributed will depend on CPR's actual experience in 2004 with such variables as investment returns, interest rate fluctuations and demographic changes.

SPECIAL CHARGE

In the second quarter of 2003, CPR recorded a special charge in the amount of \$228 million to recognize the cost of a productivity program to eliminate 820 job positions by the end of 2005 and to reflect the fair market value of certain under-performing assets.

The special charge included: \$105 million to accrue for labour liabilities resulting from a company-wide productivity-driven job-reduction initiative and the future rental payments for leased space no longer being used by the Company as a result of downsizing; a \$116-million write-down to fair value of the assets of CPR's northeastern U.S. subsidiary, Delaware and Hudson Railway Company, Inc. (D&H), including a \$22-million accrual for the impact of labour restructuring; and a write-off totalling \$7 million related to two non-beneficial investments—the assets of a supply chain management subsidiary and an investment in an industry-wide procurement entity.

The second-quarter charge of \$105 million consisted of \$103 million for the elimination of 820 job positions, including 370 in 2003, 330 in 2004 and 120 in 2005, as well as \$2 million for the future rental payments for a property that has ceased to be used by CPR as a result of staff

reduction initiatives. Payments of termination benefits and property rents are expected to occur until 2009. CPR eliminated 360 positions by the end of 2003, with elimination of the remaining 10 positions for the year delayed until the end of 2005.

Productivity improvements stemming from eliminating the 820 job positions are expected to reduce compensation and benefits expense by approximately \$38 million in 2004, \$53 million in 2005 and \$56 million in future years. The job reductions contributed \$10 million in savings by the end of 2003, slightly less than the \$11 million in projected savings as timing of certain reductions was delayed.

Cash payments, including restructuring costs for the D&H, are expected to be \$45 million in 2004, \$19 million in 2005, \$17 million in 2006 and a total of \$28 million in the remaining years to 2009. CPR expects to fund these payments from general operations.

The special charge included a \$94-million write-down of D&H assets to more accurately reflect the current fair value of its operations. This asset impairment charge will be followed by a restructuring of the D&H to improve its economic performance.

A write-off of CPR's investments in two under-performing assets amounted to \$7 million. Administrative costs will be reduced following CPR's absorption of its supply chain management subsidiary.

RESTRUCTURING

CPR's restructuring liabilities at December 31, 2003, included labour liabilities related to job reductions planned for 2003 to 2005 that are discussed above under the subheading "Special Charge".

The liabilities also included residual payments to protected employees for previous restructuring plans that are substantially complete. These payments are expected to continue in decreasing amounts until 2025 and will be funded from CPR's general operations.

Table of Contents

PG 26 | 2003 Canadian Pacific Railway Annual Report

At December 31, 2003, CPR's labour liabilities, including those recorded as part of the special charge discussed above, totalled \$358 million, compared with \$310 million at December 31, 2002. Payments in 2003 relating to these liabilities were \$78 million, compared with \$95 million in the same period of 2002.

Also included in the restructuring liabilities are accruals for costs associated with the rental of properties no longer being used by the Company. Cash payments for these liabilities are anticipated to be \$3 million in 2004, and \$0.3 million annually thereafter until 2009. At December 31, 2003, total restructuring liabilities, including the accrual recorded as part of the special charge in the second quarter of 2003, were \$367 million, compared with \$326 million at December 31, 2002. Payments made in 2003 relating to these items were \$86.8 million, compared with \$99.3 million in 2002.

CRITICAL ACCOUNTING ESTIMATES

To prepare financial statements that conform with Canadian GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Using the most current information available, management reviews its estimates on an ongoing basis, including those related to environmental liabilities, pensions and other benefits, property, plant and equipment, future income taxes and legal and personal injury liabilities.

The development, selection and disclosure of these estimates, as well as this MD&A, have been reviewed by the Board of Directors' Audit, Finance and Risk Management Committee, which is comprised entirely of independent directors.

ENVIRONMENTAL LIABILITIES

Management estimates the probable costs to be incurred in the remediation of property sites contaminated by past railway use. Sites are screened and classified according to

typical activities and scale of operations conducted, and remediation strategies are developed for each property based on the nature and extent of the contamination as well as the location of the property and surrounding areas that may be adversely affected by the presence of contaminants. Management also considers available technologies, treatment and disposal facilities and the acceptability of site-specific plans based on the local regulatory environment. Site-specific plans range from containment and risk management of the contaminants through to the removal and treatment of the contaminants and affected soils and ground water. The details of the estimates reflect the environmental liability at each property. CPR is committed to fully meeting its regulatory and legal obligations with respect to environmental matters.

In 1995, following several years of environmental investigations by CPR at various properties across Canada and the U.S., the Company recorded a before-tax environmental provision of \$144 million for 10 years of a program to manage environmental liabilities from historical operations. This provision was increased by \$50 million in 1999, at which time the net amount accrued, after payments, was \$164 million.

At December 31, 2003, the accrual for environmental remediation amounted to \$95 million, of which the long-term portion amounting to \$70 million was included in deferred liabilities and the short-term portion amounting to \$25 million was included in accrued liabilities. Total payments in 2003 were \$20 million. The U.S. dollar-denominated portion of the liability was affected by FX, resulting in a decrease in environmental liabilities of

\$6 million in 2003. Costs incurred under CPR's environmental remediation program are charged against the accrual.

PENSIONS AND OTHER BENEFITS

The Company has defined benefit and defined contribution pension plans. Other benefits include post-retirement medical and life insurance for pensioners, and post-employment workers' compensation benefits. Workers' compensation benefits are included in the "Legal and Personal Injury Liabilities" section of this MD&A.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG27

Pension and post-retirement benefits expenses (excluding workers' compensation benefits) are included in Compensation and Benefits in CPR's Statement of Consolidated Income. For the year ended December 31, 2003, pension expense was \$12.5 million, consisting of defined benefit pension expense of \$9.5 million plus defined contribution pension expense (equal to contributions) of \$3.0 million. Post-retirement benefits expense in 2003 was \$32.0 million, resulting in combined pension and post-retirement benefits expenses of \$44.5 million for the year.

On the December 31, 2003, Consolidated Balance Sheet, the provision for prepaid pension costs and other benefits (excluding workers' compensation benefits) accruals totalled \$562.2 million. Other Assets and Deferred Charges include prepaid pension costs of \$693.9 million offset by accrued pension costs of \$3.8 million and post-retirement benefits accruals of \$127.9 million included in Deferred Liabilities.

PROPERTY, PLANT AND EQUIPMENT

CPR follows the group depreciation method and depreciates the cost of properties, net of salvage, on a straight-line basis over the estimated useful life of the property group.

CPR undertakes regular depreciation studies to establish the estimated useful life of each property group. These studies establish the weighted average estimated useful life by property group, taking into consideration current and historical information about the asset lives.

Considerations include but are not limited to: historical useful lives of similar assets; historical incidence of early retirements (e.g. as a result of train accidents); anticipated future uses of assets; and net salvage values at retirement.

Regulatory standards in Canada require depreciation studies to be completed and submitted for approval at least every seven years. Standards in the U.S. require studies to be completed and submitted for approval every three years for equipment and every six years for track.

The estimated useful lives of properties have a direct impact on the amount of depreciation expense charged by the Company and the amount of accumulated depreciation recorded as a component of Net Properties on the Consolidated Balance Sheet. Depreciation expense relating to properties amounted to \$381.5 million in 2003. At December 31, 2003, accumulated depreciation was \$4,300.4 million.

Revisions to the estimated useful lives and net salvage projections for properties constitute a change in accounting estimate and are dealt with prospectively by amending depreciation rates. It is anticipated that there will be changes in the weighted average useful life and salvage estimate for each property group as assets are acquired, used and retired. Significant changes in either the useful lives of properties or the salvage assumptions could result in material changes to depreciation expenses.

CPR completed depreciation reviews of certain properties in 2003 that resulted in changes to the estimated useful lives and salvage rates of certain assets. The impact of these reviews resulted in a depreciation expense increase of \$9 million, compared with 2002.

FUTURE INCOME TAXES

Effective January 1, 2001, CPR adopted the Canadian Institute of Chartered Accountants (CICA) Section 3465 Income Taxes with respect to the accounting of future income taxes, which is based on the liability method. This method focuses on a company's balance sheet and the temporary differences otherwise calculated from the comparison of book versus tax values. It is assumed that such temporary differences will be settled in the future at the

substantively enacted tax rates. This valuation process determines the future income tax assets and liabilities at the balance sheet date.

In determining its future income taxes, the Company makes estimates and assumptions regarding future tax matters, including estimating the timing of the realization and settlement of future income tax assets (including the

Table of Contents

PG 28 | 2003 Canadian Pacific Railway Annual Report

benefit of tax losses) and liabilities. The substantively enacted federal and provincial future income tax rates may differ in each future period. The timing and realization of future income taxes at the balance sheet date are determined with reference to management's long-term income and capital investment forecasts developed as part of the Company's planning and budgeting processes.

Future income tax expense totalling \$32.0 million was included in income taxes for 2003. At December 31, 2003, future income tax liabilities of \$1,307.2 million were recorded as a long-term liability, comprised largely of temporary differences related to accounting for properties. Future income tax benefits of \$87.4 million realizable within one year were recorded as a current asset. The Company believes that its future income tax provisions are adequate.

As discussed in the section "Other Income Statement Items", under the subheading "Income Taxes", future income tax expense and liability were adjusted by \$52.7 million in 2003 to reflect the new Government of Ontario income tax rates, and by \$59.3 million as a result of the revaluation of several components of the future income tax liability.

With the passage of legislation to reduce federal income tax rates by 7% over time, CPR recorded in 2000 a \$132-million reduction of future income tax liability. During 2001, CPR recorded a further \$45-million reduction of future income tax liability on substantively enacted reductions in provincial tax rates.

LEGAL AND PERSONAL INJURY LIABILITIES

CPR and its subsidiaries are involved in litigation in both Canada and the U.S. related to their businesses. Management is required to establish estimates of potential liability arising from incidents, claims and pending litigation, including personal injury claims, certain occupation-related claims and claims relating to property damage.

These estimates are determined on a case-by-case basis. They are based on CPR's assessment of the actual damages incurred, current legal advice with respect to the expected outcome of the legal action, and actuarially determined assessments with respect to settlements in other similar cases. CPR employs experienced claims adjusters who investigate and assess the validity of individual claims made against the Company and estimate the damages incurred.

A provision for incidents, claims or litigation is recorded, based on the facts and circumstances known at the time. CPR accrues for likely claims when the facts of an incident become known and investigation results provide a reasonable basis for estimating the liability. The lower end of the range is accrued if the facts and circumstances permit only a range of reasonable estimates and no single amount in that range is a better estimate than any other. Additionally, for administrative expediency, the Company keeps a general provision for lesser-value injury cases. Facts and circumstances related to asserted claims can change, and a process is in place to monitor accruals for changes in accounting estimates.

With respect to claims related to occupational health and safety in the provinces of Quebec, Ontario, Manitoba and British Columbia, estimates administered through the Workers' Compensation Board (WCB) are actuarially determined. In the provinces of Saskatchewan and Alberta, CPR is assessed for an annual WCB contribution. As a result, this amount is not subject to estimation by management.

Railway employees in the U.S. are not covered by a workers' compensation program. CPR manages workers' compensation claims in the U.S. using a case-by-case comprehensive approach, rather than the statistical estimate approach used by some Class 1 railways.

Provisions for incidents, claims and litigation charged to income are included in Purchased Services and Other on CPR's Statement of Consolidated Income and amounted to \$78.1 million in 2003.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG29

Accruals for incidents, claims and litigation, including WCB accruals, totalled \$161.8 million, net of insurance recoveries, at December 31, 2003. The total accrual includes: \$103.3 million in Deferred Liabilities and \$100.1 million in Accounts Payable and Accrued Liabilities, offset by \$33.7 million in Other Assets and Deferred Charges and \$7.9 million in Accounts Receivable.

systems, procedures and controls

Management is responsible for establishing appropriate information systems, procedures and controls to ensure that all financial information disclosed externally,

including this MD&A, and used internally by management is complete and reliable. These procedures include a review of the financial statements and associated information, including this MD&A, by the Audit, Finance and Risk Management Committee of the Board of Directors. The Company's Chief Executive Officer and Chief Financial Officer have a process to evaluate the applicable systems, procedures and controls and are satisfied they are adequate for ensuring that complete and reliable financial information is produced.

Table of Contents

PG 30 | 2003 Canadian Pacific Railway Annual Report

forward-looking information

This MD&A contains certain forward-looking statements within the meaning of the *Private Securities Litigation Reform Act of 1995* (United States) relating but not limited to CPR's operations, anticipated financial performance, business prospects and strategies. Forward-looking information typically contains statements with words such as anticipate, believe, expect, plan or similar words suggesting future outcomes.

Readers are cautioned to not place undue reliance on forward-looking information because it is possible that predictions, forecasts, projections and other forms of forward-looking information will not be achieved by CPR. In addition, CPR undertakes no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

By its nature, CPR's forward-looking information involves numerous assumptions, inherent risks and uncertainties, including but not limited to the following factors: changes in business strategies; general global economic and business conditions; the availability and price of energy commodities; the effects of competition and pricing pressures; industry overcapacity; shifts in market demands; changes in laws and regulations, including environmental and regulatory laws; potential increases in maintenance and operating costs; uncertainties of litigation; labour disputes; timing of completion of capital and maintenance projects; currency and interest rate fluctuations; effects of changes in market conditions on the financial position of pension plans; various events that could disrupt operations, including severe weather conditions; and technological changes.

The performance of the North American and global economies remains uncertain. Grain production and yield in Canada improved in the most recent crop year, after a period of significant drought-induced decline. However, factors over which CPR has no control, such as weather conditions and insect populations, affect crop production and yield in CPR's grain collection areas. Fuel prices also remain uncertain, as they are influenced by many factors,

including worldwide oil demand, international politics, and the ability of major oil-producing countries to comply with agreed-upon production quotas.

The sustainability of recent increases in the value of the Canadian dollar relative to the U.S. dollar is unpredictable, as the value of the Canadian dollar is affected by a number of domestic and international factors, including, among other things, economic performance and government monetary policy.

There is also continuing uncertainty with respect to security issues involving the movement of goods in populous areas of the U.S. and Canada and the protection of North America's rail infrastructure, including the movement of goods across the Canada-U.S. border.

New rules governing railway mergers were established by the U.S. Surface Transportation Board (STB) in 2001. The new rules have broadened the scope of competition-enhancing conditions that the STB may impose in connection with railway mergers and will likely result in increased scrutiny by the STB of proposed railway mergers.

In Canada, draft legislation prepared following the federal government's 2001 review of the *Canada Transportation Act* did not proceed when Parliament terminated its session in late 2003. The legislative review did affirm the importance of market forces in achieving a viable, sustainable rail industry. Although there is no visible indication that the government is focused on amending transportation legislation, there could be some measures advanced that could

affect the competitive capability and commercial strategies of Canadian railways.

In addition to the foregoing general factors, there are more specific factors that could cause actual results to differ from those described in the forward-looking statements contained in this MD&A. These more specific factors are identified and discussed elsewhere in this MD&A with the particular forward-looking statement in question.

2003 Canadian Pacific Railway Annual Report | PG31

management's responsibility for financial reporting

The information in this Annual Report is the responsibility of management. The consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles and include some amounts based on management's best estimates and careful judgment.

Management maintains a system of internal accounting controls to provide reasonable assurance that assets are safeguarded and that transactions are authorized, recorded and reported properly. The internal audit department reviews these accounting controls on an ongoing basis and reports its findings and recommendations to management and the Audit, Finance and Risk Management Committee of the Board of Directors.

The Board of Directors carries out its responsibility for the consolidated financial statements principally through its Audit, Finance and Risk Management Committee, consisting of four members, all of whom are outside directors. This Committee reviews the consolidated financial statements with management and the independent auditors prior to submission to the Board for approval. It also reviews the recommendations of both the independent and internal auditors for improvements to internal controls, as well as the actions of management to implement such recommendations.

auditors' report

**TO THE SHAREHOLDERS OF
CANADIAN PACIFIC RAILWAY LIMITED**

We have audited the consolidated balance sheets of Canadian Pacific Railway Limited as at December 31, 2003 and 2002, and the consolidated statements of income, retained income and cash flows for each of the three years in the period ended December 31, 2003. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards in Canada. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of Canadian Pacific Railway Limited as at December 31, 2003 and 2002, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2003, in accordance with generally accepted accounting principles in Canada.

**COMMENTS BY AUDITORS FOR U.S. READERS
ON CANADA-U.S. REPORTING DIFFERENCE**

In the United States, reporting standards for auditors require the addition of an explanatory paragraph (following the opinion paragraph) when there is a change in accounting principles that has a material effect on the comparability of the Company's financial statements, such as the changes described in Note 2 and 25 to the consolidated financial statements. Our report to the shareholders dated February 6, 2004, is expressed in accordance with Canadian reporting standards, which do not require a reference to such a change in accounting principles in the Auditors' Report when the change is properly accounted for and adequately disclosed in the financial statements.

notes to consolidated financial statements
December 31, 2003

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**Principles of Consolidation**

These consolidated financial statements include the accounts of Canadian Pacific Railway Limited (CPRL) and all of its subsidiaries (collectively referred to as CPR , or the Company). These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP). The Company 's accounts have been adjusted to reflect an accounting basis that is more comparable with that employed by other Class 1 railways in North America. The railway 's principal subsidiaries present unconsolidated financial statements in accordance with generally accepted accounting practices for railways as prescribed in the regulations of the Canadian Transportation Agency in Canada and the Surface Transportation Board in the United States.

These consolidated financial statements are expressed in Canadian dollars, except where otherwise indicated. The preparation of these financial statements in conformity

with Canadian GAAP requires management to make estimates and assumptions that affect the reported amounts of revenues and expenses during the period, the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements. On an ongoing basis, management reviews its estimates, including those related to environmental liabilities, pensions and other benefits, depreciable lives of properties, future income tax assets and liabilities as well as legal and personal injury liabilities based upon currently available information. Actual results could differ from these estimates.

Principal Subsidiaries

The following list sets out CPRL 's principal railway operating subsidiaries, including the jurisdiction of incorporation and the percentage of voting securities owned directly or indirectly by CPRL as of the date hereof.

Principal subsidiary	Incorporated under the laws of	Percentage of voting securities held directly or indirectly by the Company
Canadian Pacific Railway Company	Canada	100 %
Soo Line Railroad Company	Minnesota	100 %
Delaware and Hudson Railway Company, Inc.	Delaware	100 %

Variable-interest Entities

The Company consolidates variable-interest entities (VIE) when it is the primary beneficiary, as described in the Canadian Institute of Chartered Accountants (CICA) Accounting Guideline 15 Consolidation of Variable-Interest Entities . At December 31, 2003, CPR was the primary beneficiary of one VIE, which holds rail cars and meets the criteria for consolidation (see Note 2).

Revenue Recognition

Railway freight revenues are recognized based on the percentage of completed service method. Other revenue is recognized as service is performed or contractual obligations are met.

Cash and Short-term Investments

Cash and short-term investments include marketable investments that are readily convertible to cash. Short-term investments are stated at cost, which approximates market value.

Table of Contents

PG 38 | 2003 Canadian Pacific Railway Annual Report

Foreign Currency Translation

Foreign currency assets and liabilities of the Company's operations, other than through foreign subsidiaries, are translated into Canadian dollars at the year-end exchange rate for monetary items and at the historical exchange rates for non-monetary items. Foreign currency revenues and expenses are translated at the exchange rate in effect on the dates of the related transactions. All foreign currency gains and losses are included immediately in income.

The accounts of the Company's foreign subsidiaries are translated into Canadian dollars using the year-end exchange rate for assets and liabilities and the average exchange rates in effect for the year for revenues and expenses. Exchange gains and losses arising from translation of foreign subsidiaries' accounts are included in Note 18 Shareholders' Equity as foreign currency translation adjustments. A portion of the U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in self-sustaining foreign subsidiaries. Unrealized foreign exchange gains and losses on a portion of the U.S. dollar-denominated long-term debt are offset against foreign exchange gains and losses arising from translation of self-sustaining foreign subsidiaries' accounts.

Pensions and Other Benefits

Pension costs are actuarially determined using the projected-benefit method prorated over the credited service periods of employees. This method incorporates management's best estimate of expected plan investment performance, salary escalation and retirement ages of employees. Market-related values are used to calculate the expected return on plan assets. The discount rate used to determine the benefit obligation is based on market interest rates on high-quality corporate debt instruments with matching cash flows. Unrecognized actuarial gains and losses in excess of 10 % of the greater of the benefit obligation and the market-related value of plan assets are amortized over the expected average remaining service period of active employees expected to receive benefits under the plan (approximately 12 years). The transitional asset and obligation arising from implementing the CICA

Accounting Standard Section 3461 Employee Future Benefits effective January 1, 2000, is being amortized over the expected average remaining service period of active employees who were expected to receive benefits under the plan at January 1, 2000 (approximately 13 years).

Benefits other than pensions, including health care, workers' compensation in Canada and life insurance, are actuarially determined and accrued on a basis similar to pension costs.

Materials and Supplies

Inventories of materials and supplies are valued at the lower of average cost and replacement value.

Properties

Fixed asset additions and major renewals are recorded at cost. The Company capitalizes computer system development costs on major new systems, including the related variable indirect costs. In addition, CPR capitalizes the cost of major overhauls and large refurbishments. When depreciable property is retired or otherwise disposed of in the normal course of business, the book value, less salvage, is charged to accumulated depreciation. The Company will review the carrying amounts of its properties whenever changes in circumstances indicate that such carrying amounts may not be recoverable based on future undiscounted cash flows. When assets are determined to be impaired, recorded asset values will be revised to the fair value and an impairment loss will be recognized.

Depreciation is calculated on the straight-line basis at rates based on the estimated service life, taking into consideration the projected annual usage of depreciable property, except for rail and other track material in the U.S.,

which is based directly on usage. Usage is based on volumes of traffic.

Assets to be disposed of would be presented separately in the Balance Sheet. They would be reported at the lower of the carrying amount or fair value less costs to sell, and would no longer be depreciated. At December 31, 2003, there were no material items to be disposed of.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG39

Equipment under capital lease is included in Properties and depreciated over the period of expected use.

Estimated service life used for principal categories of properties is as follows:

Assets	Years
Diesel locomotives	28 to 32
Freight cars	23 to 47
Ties	35 to 45
Rails in first position	21 to 30
in other than first position	54
Computer system development costs	5 to 15

Derivative Financial and Commodity Instruments

Derivative financial and commodity instruments may be used from time to time by the Company to manage its exposure to price risks relating to foreign currency exchange rates, interest rates and fuel prices. The Company's policy is to not utilize derivative financial and commodity instruments for trading or speculative purposes.

The Company enters from time to time into forward exchange contracts to hedge anticipated sales in U.S. dollars, the related accounts receivable as well as future capital acquisitions. Foreign exchange translation gains and losses on foreign currency-denominated derivative financial instruments used to hedge anticipated U.S. dollar-denominated sales are recognized as an adjustment of the revenues when the sale is recorded. Those used to hedge future capital acquisitions are recognized as an adjustment of the property amount when the acquisition is recorded.

The Company enters into interest rate swaps to manage the risk related to interest rate fluctuations. These swap agreements require the periodic exchange of payments without the exchange of the principal amount on which the payments are based. Interest expense on the debt is adjusted to include the payments owing or receivable under the interest rate swaps.

The Company has a fuel-hedging program under which CPR acquires future crude oil contracts for a percentage of its diesel fuel purchases to reduce the risk of price volatility affecting future cash flows. The gains or losses on the hedge contracts are applied against the corresponding fuel purchases in the period during which the hedging contracts mature.

Restructuring Accrual and Environmental Remediation

Restructuring liabilities are recorded at their present value with the related discount being amortized over the payment period. Environmental remediation accruals cover site-specific remediation programs. Provisions for labour restructuring and environmental remediation costs are recorded in *Deferred Liabilities* except for the current portion, which is recorded in *Accounts Payable and Accrued Liabilities* .

Income Taxes

The Company follows the liability method of accounting for income taxes. Future income tax assets and liabilities are determined based on differences between the financial reporting and tax basis of assets and liabilities using substantively enacted tax rates and laws that will be in effect when the differences are expected to reverse. The effect of a change in income tax rates on future income tax assets and liabilities is recognized in income in the period during which the change occurs.

Table of Contents

PG 40 | 2003 Canadian Pacific Railway Annual Report

Earnings Per Share

Basic earnings per share are calculated using the weighted average number of Common Shares outstanding during the year. Diluted earnings per share are calculated using the treasury stock method for determining the dilutive effect of options.

Stock-based Compensation

In the fourth quarter of 2003, the Company prospectively adopted the fair value-based approach to accounting for stock-based compensation applying to options issued for years beginning in 2003. Compensation expense is recognized for stock options over their vesting period based on their estimated fair values on the date of grants, as determined by using the Black-Scholes option-pricing model. Prior to 2003, no compensation expense was recognized when the exercise price equalled the market price at the date when stock options were issued to employees under the Company's authorized stock-based compensation plans. The Company provides pro forma basis net income and earnings per share information in Note 20 "Stock-based Compensation" for the fair value of options granted between January 1, 2002, and December 31, 2002.

Any consideration paid by employees on exercise of stock options and the fair value of the options is credited to share capital when the option is exercised. Compensation expense is also recognized for stock appreciation rights (SAR), deferred share units (DSU) and employee share purchase plans by amortizing the cost over the vesting period, with the liability for SARs and DSUs marked-to-market until exercised.

2. NEW ACCOUNTING POLICIES**Variable-interest Entities**

Effective April 1, 2003, the Company early adopted on a prospective basis the CICA Accounting Guideline 15 "Consolidation of Variable-Interest Entities". The guideline requires the primary beneficiary of a VIE to consolidate the VIE when the majority equity owner has not provided the VIE with sufficient funding through equity to allow it to finance its activities without relying on financial support from other parties with an interest

in the VIE. The primary beneficiary is the enterprise that will absorb or receive the majority of the VIE's expected losses, expected residual returns, or both. CPR is the primary beneficiary of one VIE, which holds rail cars and meets the criteria for consolidation. The impact of consolidating the VIE on April 1, 2003, was an increase in net properties of \$193.5 million and an increase in long-term debt of \$193.5 million. The effect on net income of adopting this standard in 2003 was an increase in net income of \$23.8 million. This included a \$22.4-million foreign exchange gain on long-term debt.

Stock-based Compensation

In the fourth quarter of 2003, CPR adopted the fair value-based approach of the CICA's Handbook Section 3870 "Stock-based Compensation and Other Stock-based Payments". The Company adopted the new accounting rules effective January 1, 2003, on a prospective basis for options issued for years beginning in 2003. The compensation expense related to options issued after January 1, 2003, included in "Compensation and Benefits", was \$3.5 million in 2003.

Guarantees

In February 2003, the CICA adopted Accounting Guideline 14 (AcG 14) "Disclosure of Guarantees". The guideline requires disclosure of key information about certain types of guarantee contracts that require payments contingent on specified types of future events, and is effective for periods beginning on or after January 1, 2003 (see Note 22).

Impairment of Long-lived Assets

In 2003, CPR adopted the CICA's Handbook Section 3063 Impairment of Long-lived Assets on a prospective basis. Previously, if the carrying amount of an asset was not recoverable, the asset was written down to the related undiscounted cash flow value. Under this new section, an impairment loss on long-lived assets is recognized when the carrying amount is not recoverable and exceeds its fair value. An impairment loss is the excess of the carrying amount over the fair value and the fair value of the asset becomes the new cost basis and is not reversed

Table of Contents

if the fair value subsequently increases. As a result of the new standard, the special charge taken in the second quarter of 2003 was \$72.5 million greater than it would have been under the old standard.

Severance and Termination Benefits

In the second quarter of 2003, the Company adopted on a prospective basis the CICA Accounting Standard, Emerging Issues Committee (EIC) 134 Accounting for Severance and Termination Benefits . The effect on net income of adopting this standard was immaterial. The standard also requires increased disclosure of severance and termination benefit liabilities.

Foreign Currency Translation

Effective January 1, 2002, the Company adopted retroactively with restatement the CICA accounting standard for the treatment of foreign exchange gains and losses. The result of this restatement was to reduce opening retained income at January 1, 2000, by \$97.5 million, decrease other assets and deferred charges at January 1, 2000, by \$120.0 million and decrease future income taxes at January 1, 2000, by \$22.5 million. The restatement also reduced net income by \$29.7 million and \$37.9 million and reduced basic and fully diluted earnings per share by 18 cents and 24 cents for the years ended December 31, 2000 and 2001, respectively.

Under the new standard, foreign exchange gains and losses on long-term debt can no longer be deferred and amortized to income. As a result, long-term debt of approximately CDN\$2.1 billion denominated in U.S. dollars is translated into Canadian dollars using the period-end exchange rate, with the effect of the change from the previous period-end rate reflected in income. Approximately CDN\$0.6 billion of the long-term debt is designated as a hedge of the net investment in self-sustaining U.S. subsidiaries.

3. FUTURE ACCOUNTING CHANGES**Hedging Transactions**

In November 2001, the CICA issued Accounting Guideline 13 (AcG 13) Hedging Relationships , which will be effective for years beginning on or after

July 1, 2003. In April 2003, the CICA approved certain revisions to AcG 13. The guideline addresses the identification, designation, documentation and effectiveness of hedging transactions for the purpose of applying hedge accounting. It also establishes conditions for applying and deals with the discontinuance of hedge accounting and the required hedge effectiveness testing.

Any derivative financial instruments that fail to meet the hedging criteria will be accounted for in accordance with EIC-128 Accounting for Trading, Speculative or Non-Hedging Derivative Financial Instruments . These instruments will be recorded on the Balance Sheet at fair value and changes in fair value will be recognized in income in the period in which the change occurs. The effect on net income of adopting this guideline is expected to be immaterial.

Asset Retirement Obligations

The CICA approved Handbook Section 3110 Asset Retirement Obligations to replace the current guidance on future removal costs included in the CICA Accounting Standard 3061 Property, Plant and Equipment . The new standard is effective for years beginning on or after January 1, 2004. It requires recognition of a liability at its fair value for any legal obligation associated with the retirement of property, plant and equipment when those obligations result from the acquisition, construction, development or normal operation of the assets. A corresponding asset retirement cost would be added to the carrying amount of the related asset and amortized to expense on a systematic and rational basis. The

standard does not allow the Company's current practice of recognizing removal costs in excess of salvage proceeds over the life of the asset when the removal costs are not legal obligations. The effect of adopting this standard on January 1, 2004, will be to reduce retained earnings on January 1, 2004, by \$22.0 million and properties by \$1.0 million, and increase deferred liabilities by \$31.0 million and future income tax assets by \$10.0 million. It will not have a material impact on net income.

PG 42 | 2003 Canadian Pacific Railway Annual Report

4. SPECIAL CHARGE FOR LABOUR RESTRUCTURING AND ASSET IMPAIRMENT

In the second quarter of 2003, CPR recorded a special charge of \$228.5 million for restructuring and write-down of unproductive assets. The special charge was comprised of: \$105.5 million to accrue for labour liabilities resulting from a company-wide productivity-driven job reduction initiative; a \$116.1-million write-down to fair value, based on estimated future discounted cash flows, of the assets of CPR's northeastern U.S. subsidiary, Delaware and Hudson Railway Company, Inc. (D&H), arising from management taking action to restructure its interest in the D&H; and a total \$6.9-million write-down of two non-beneficial investments – the assets in a supply chain

management subsidiary and an investment in an industry-wide procurement entity. The \$105.5-million accrual includes \$2.0 million for future rental payments for leased space no longer being used by the Company as a result of downsizing. The \$116.1-million write-down includes a \$21.8-million accrual for the impact of labour restructuring (see Note 12).

The job reductions will be completed by the end of 2005, however, ongoing payments of termination benefits to certain employees are expected to continue to 2009.

5. OTHER CHARGES

(in millions)	2003	2002	2001
Amortization of discount on accruals recorded at present value	\$ 20.3	\$ 19.3	\$ 26.7
Other exchange losses (gains)	0.4	(1.6)	(14.8)
Charges on sale of accounts receivable (Note 9)	4.1	3.5	5.7
Other	8.7	0.6	8.8
Total other charges	\$ 33.5	\$ 21.8	\$ 26.4

Included in "Other" above in 2002 are charges related to the early redemption of CPR's 8.85% Debentures – specifically, a call premium of \$17.5 million (see Note 14) and accelerated amortization of deferred financing

charges of \$2.5 million, which are offset by \$27.0 million of interest income on an income tax settlement related to prior years (see Note 7).

6. INTEREST EXPENSE

(in millions)	2003	2002	2001
Interest expense	\$ 226.4	\$ 254.2	\$ 229.5
Interest income	(7.7)	(12.0)	(19.9)
Total interest expense	\$ 218.7	\$ 242.2	\$ 209.6
Cash interest payments	\$ 221.9	\$ 245.5	\$ 197.9

No interest was paid to former affiliates during 2003 (2002 \$nil; 2001 \$2.1 million).

7. INCOME TAXES

The following is a summary of the major components of the Company's income tax expense:

(in millions)	2003	2002	2001
Canada (domestic)			
Current income tax expense	\$ 9.2	\$ 9.9	\$ 10.3
Future income tax expense			
Origination and reversal of temporary differences	114.2	149.5	139.6
Effect of tax rate increases (reductions)	52.6		(64.0)
Recognition of previously unrecorded tax losses	(59.1)	(8.8)	
Other	(59.6)	(81.0)	(4.6)
Total future income tax expense	48.1	59.7	71.0
Total income taxes (domestic)	\$ 57.3	\$ 69.6	\$ 81.3
Other (foreign)			
Current income tax expense	\$ 0.6	\$ 1.0	\$ (8.5)
Future income tax expense			
Origination and reversal of temporary differences	5.2	54.8	53.9
Recognition of previously unrecorded tax losses	(22.7)	(15.5)	
Other	1.4		5.9
Total future income tax expense	(16.1)	39.3	59.8
Total income taxes (foreign)	\$ (15.5)	\$ 40.3	\$ 51.3
Total			
Current income tax expense	\$ 9.8	\$ 10.9	\$ 1.8
Future income tax expense	32.0	99.0	130.8

Total income taxes (domestic and foreign)	\$ 41.8	\$ 109.9	\$ 132.6
---	----------------	----------	----------

Table of Contents

PG 44 | 2003 Canadian Pacific Railway Annual Report

The provision for future income taxes arises from temporary differences in the carrying values of assets and liabilities for financial statement and income tax

purposes. The temporary differences comprising the future income tax assets and liabilities are as follows:

(in millions)	2003	2002
Future income tax assets		
Restructuring liability	\$ 158.2	\$ 145.6
Amount related to tax losses carried forward	286.2	150.8
Capital assets tax basis in excess of carrying value	9.2	
Liabilities carrying value in excess of tax basis	54.9	142.9
Future environmental remediation costs	14.4	18.7
Other	39.6	77.1
Total future income tax assets	562.5	535.1
Future income tax liabilities		
Capital assets carrying value in excess of tax basis	1,470.3	1,494.0
Prepaid expenses	255.4	118.0
Other	56.6	50.7
Total future income tax liabilities	1,782.3	1,662.7
Total net future income tax liabilities	1,219.8	1,127.6
Net current future income tax assets	87.4	72.5
Net long-term future income tax liabilities	\$1,307.2	\$1,200.1

The Company's consolidated effective income tax rate differs from the expected statutory tax rates. Expected income tax expense at statutory rates is reconciled to income tax expense as follows:

(in millions)	2003	2002	2001
Expected income tax expense at Canadian statutory tax rates	\$ 166.7	\$ 227.3	\$ 190.9
Increase (decrease) in taxes resulting from:			
Large corporations tax	11.1	10.0	10.3
Gains not subject to tax	(50.5)	(19.4)	10.4
Foreign tax rate differentials	19.3	3.7	(10.4)
Effect of tax rate increases (reductions)	52.6		(64.0)
Recognition of previously unrecorded tax losses	(81.8)	(24.3)	
Other	(75.6)	(87.4)	(4.6)
 Total income tax expense	 \$ 41.8	 \$ 109.9	 \$ 132.6

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG45

The Company has \$488.0 million of capital losses (2002 \$800.0 million) available indefinitely for Canadian tax purposes for which no future income tax asset has been recognized.

In determining its future income taxes, the Company makes estimates and assumptions regarding future tax matters. During 2003, the Company revalued various components of its future income tax liability and reduced the estimate of its future income tax liability by \$59.3 million. The Company believes that its future income tax provision is adequate.

During 2002, as a result of a favourable decision by the Federal Court of Appeal (*the Queen v. Canadian Pacific Limited* (legally renamed Canadian Pacific Railway Company in 1996)), the Company reported a recovery of income taxes of approximately \$72.0 million.

8. EARNINGS PER SHARE

At December 31, 2003, the number of shares outstanding was 158.7 million (2002 158.5 million).

Basic earnings per share have been calculated using net income for the year divided by the weighted average number of CPRL shares outstanding during the year. For the year ended December 31, 2001, the weighted average number of shares was calculated using the number of shares issued as a result of the corporate reorganization for the first nine months of 2001 (see Note 18) and the actual number of shares outstanding for the last three months of the year.

Diluted earnings per share have been calculated using the treasury stock method, which gives effect to the dilutive value of outstanding options. At December 31, 2003, there were 0.5 million replacement options outstanding that had been exchanged after the spin-off for Canadian Pacific Limited (CPL) stock options held by CPL employees (2002 0.7 million replacement options). In 2003, 1.6 million stock options were issued to CPR employees (2002 1.6 million new options; 2001 2.7 million new options).

The number of shares used in the earnings per share calculations is reconciled as follows:

(in millions)	2003	2002	2001
Weighted average shares outstanding	158.5	158.5	158.3
Dilutive effect of stock options	0.6	0.8	0.5
Weighted average diluted shares outstanding	159.1	159.3	158.8
(in dollars)	2003	2002	2001

Basic earnings per share	\$ 2.51	\$ 3.13	\$ 2.35
--------------------------	----------------	---------	---------

Diluted earnings per share	\$ 2.51	\$ 3.11	\$ 2.34
----------------------------	----------------	---------	---------

9. SALE OF ACCOUNTS RECEIVABLE

The Company has a securitization agreement involving the non-recourse sale of accounts receivable on a revolving basis, which at December 31, 2003, amounted to \$132.0 million (2002 \$132.0 million). Cash proceeds on these receivables were \$120.0 million (2002 \$120.0 million) with \$12.0 million (2002 \$12.0 million) having been held back as a reserve to be released to the Company upon termination of the agreement.

Discounts on the revolving sales and program fees of \$4.1 million in 2003 (2002 \$3.5 million; 2001 \$5.7 million) were included in the Income Statement as part of Other Charges (see Note 5). The reserve is valued on the Company's books at an amount equal to the undiscounted expected future cash flows. The Company acts as the collector of the receivables but has no claim against the proceeds of collection of the securitized receivables.

10. CHANGE IN NON-CASH WORKING CAPITAL BALANCES RELATED TO OPERATIONS

(in millions)	2003	2002	2001
Source (use) of cash:			
Accounts receivable	\$ 47.3	\$ 21.1	\$ 31.2
Materials and supplies	2.5	(6.6)	28.7
Accounts payable and accrued liabilities	(77.2)	(20.4)	3.1
Income and other taxes payable	(79.1)	(10.8)	(54.7)
Change in non-cash working capital	(106.5)	(16.7)	8.3
Exclude amounts reported elsewhere on the Statement of Consolidated Cash Flows:			
Decrease (increase) in current portion of restructuring provisions included in accounts payable and accrued liabilities	13.3	(4.4)	(2.4)
(Increase) decrease in accounts payable and accrued liabilities resulting from additions to properties	(12.4)	7.4	3.7
Other changes in non-cash working capital balances (reclassification to (from) long-term liabilities from (to) current liabilities)	54.1	13.7	(7.6)
Other changes in non-cash working capital balances (reclassification (to) from long-term asset to (from) current assets)	(2.1)		
Change in non-cash working capital balances related to operations	\$ (53.6)	\$	\$ 2.0

11. INVESTMENTS

(in millions)	2003	2002
Rail investments accounted for on an equity basis	\$ 77.6	\$ 61.2
Other investments accounted for on a cost basis	28.0	31.0
Total investments	\$ 105.6	\$ 92.2

Table of Contents

12. NET PROPERTIES

(in millions)	Cost	Accumulated depreciation	Net book value
2003			
Track and roadway	\$ 7,388.7	\$ 2,382.1	\$ 5,006.6
Buildings	314.9	110.1	204.8
Rolling stock	3,277.6	1,284.7	1,992.9
Other	1,539.3	523.6	1,015.7
Total net properties	\$12,520.5	\$ 4,300.5	\$ 8,220.0
2002			
Track and roadway	\$ 7,315.2	\$ 2,245.6	\$ 5,069.6
Buildings	348.1	123.8	224.3
Rolling stock	3,067.7	1,277.5	1,790.2
Other	1,590.0	524.8	1,065.2
Total net properties	\$12,321.0	\$ 4,171.7	\$ 8,149.3

At December 31, 2003, net properties included \$387.9 million (2002 \$399.3 million) of assets held under capital lease at cost and related accumulated depreciation of \$70.1 million (2002 \$57.8 million).

During the year, capital assets were acquired under the Company's capital program at an aggregate cost of \$699.0 million (2002 \$551.1 million), none of which were acquired by means of capital leases (2002 \$nil). At April 1, 2003, the Company consolidated \$193.5 million in net properties of a VIE for which it is the primary beneficiary (see Note 2). Cash payments related to capital purchases were \$686.6 million in 2003 (2002 \$558.5 million).

At December 31, 2003, \$12.4 million (2002 \$nil) remained in accounts payable related to the above purchases.

Included in the special charge recorded in the second quarter of 2003 was a \$116.1-million write-down to fair market value of the assets of the D&H, including a \$21.8-million accrual for the impact of labour restructuring.

In the fourth quarter of 2003, CPR and IBM Canada Ltd. (IBM) entered into a seven-year agreement under which IBM will operate and enhance the Company's computing infrastructure. CPR incurred a loss of \$28.9 million on the transfer of computer assets to IBM at the start of the arrangement.

13. OTHER ASSETS AND DEFERRED CHARGES

(in millions)	2003	2002
Prepaid pension costs	\$ 693.9	\$ 335.6
Other	213.4	174.4
Total other assets and deferred charges	\$ 907.3	\$ 510.0

		3,362.8	3,322.9
Less: Long-term debt maturing within one year		13.9	400.8
		\$3,348.9	\$2,922.1

At December 31, 2003, long-term debt denominated in U.S. dollars was CDN\$2,351.2 million (2002 CDN\$2,661.2 million).

Interest on each of the following instruments is paid semi-annually: 6.250 % Notes and 7.125 % and 6.875 % Debentures on April 15 and October 15 of each year; 9.450 % Debentures on February 1 and August 1 of each year. The final interest payment and principal repayment for the 6.875 % Debentures occurred on April 15, 2003. All of these notes and debentures are unsecured but carry a negative pledge.

The 5.750 % Debentures are unsecured but carry a negative pledge. Interest is payable semi-annually on March 15 and September 15 of each year.

CPR's 8.850 % Debentures were called in June 2002. As a result of the early redemption, CPR was required to pay a call premium of \$17.5 million and accelerate the amortization of the related remaining deferred financing charges of \$2.5 million. Both these items are included in Other Charges (see Note 5).

The 7.20 % Medium Term Notes due 2005 are unsecured but carry a negative pledge. Interest is paid semi-annually in arrears on June 28 and December 28 of each year.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG49

The 4.90 % Medium Term Notes due 2010 are unsecured but carry a negative pledge. Interest is paid semi-annually in arrears on June 15 and December 15 of each year.

The 6.91 % Secured Equipment Notes are full recourse obligations of the Company secured by a first charge on specific locomotive units with a carrying value at December 31, 2003, of \$261.8 million. The Company makes semi-annual payments of interest in the amount of \$8.1 million on April 1 and October 1 of each year, up to and including October 1, 2004. Thereafter, the Company will pay on April 1 and October 1 of each year, commencing April 1, 2005, up to and including October 1, 2024, equal blended semi-annual payments of principal and interest of \$10.9 million.

The 7.49 % Equipment Trust Certificates are secured by specific locomotive units with a carrying value at December 31, 2003, of \$178.7 million. Semi-annual interest payments of US\$4.5 million are made on January 15 and July 15 of each year, up to and including January 15, 2005. Thereafter, semi-annual payments will vary in amount and will be interest-only payments or blended principal and interest payments. Final payment of principal is due January 15, 2021.

The Secured Equipment Loan due 2004 - 2007 is secured by specific units of rolling stock with a carrying value at December 31, 2003, of \$199.4 million. The interest rate is floating and is calculated based on a blend of one-month and three-month average LIBOR plus a spread (2003 - 1.95 %). The Company makes blended payments of interest and principal quarterly on February 20, May 20, August 20 and November 20 of each year.

The Secured Equipment Loan due 2004-2015 is secured by specific locomotive units with a carrying value at December 31, 2003, of \$211.7 million. The interest rate is floating and is calculated based on a six-month average CDOR (calculated based on an average of Bankers' Acceptance rates) plus 53 basis points (2003 - 3.56 %; 2002 - 3.13 %). The Company makes blended payments of interest and principal semi-annually on February 1 and August 1 of each year.

The bank loan payable on demand matures in the year 2010 and carries an interest rate of 5.883 %. The amount of the loan at December 31, 2003, was \$154.5 million. The Company has offset against this loan a financial asset of \$150.5 million with the same financial institution.

The Consolidated Debenture Stock, created by an Act of Parliament of 1889, constitutes a first charge upon and over the whole of the undertaking, railways, works, rolling stock, plant, property and effects of the Company, with certain exceptions.

Annual maturities and sinking fund requirements, excluding those pertaining to capital leases, for each of the five years following 2003 are (in millions): 2004 - \$9.5; 2005 - \$263.7; 2006 - \$16.1; 2007 - \$174.2; 2008 - \$15.1.

Table of Contents

PG 50 | 2003 Canadian Pacific Railway Annual Report

At December 31, 2003, capital lease obligations included in long-term debt were as follows:

(in millions)	Year	Capital leases
Minimum lease payments in:	2004	\$ 30.6
	2005	30.6
	2006	32.1
	2007	33.3
	2008	33.3
	Thereafter	515.0
Total minimum lease payments		674.9
Less: Imputed interest		307.9
Present value of minimum lease payments		367.0
Less: Current portion		4.4
Long-term portion of capital lease obligations		\$ 362.6

The carrying value of the assets securing the capital lease obligations at December 31, 2003, was \$317.8 million.

15. FINANCIAL INSTRUMENTS**Forward Foreign Currency Exchange Contracts**

Exposure to changes arising from fluctuations in exchange rates between Canadian and U.S. dollars on future revenue streams and certain U.S. dollar expenditures has been managed by selling or purchasing forward U.S. dollars at fixed rates in future periods, which are accounted for as cash flow hedges. At December 31, 2003, the Company had no outstanding foreign exchange contracts to purchase U.S. dollars (2002 contracts to purchase approximately US\$40.0 million at an effective exchange rate of 1.56). At December 31, 2003, the unrealized gain on forward foreign currency exchange contracts was CDN\$nil (2002 CDN\$0.9 million).

Commodity Contracts

Exposure to fluctuations in fuel prices has been managed by selling or purchasing crude oil futures. At December 31, 2003, the Company had entered into

futures contracts, which are accounted for as cash flow hedges, to purchase approximately 2,951,000 barrels (2002 5,116,000 barrels) over the years 2004 to 2008 at average annual prices ranging from US\$24.65 to US\$20.83 per barrel (2002 US\$22.20 to US\$20.83 over the years 2003 to 2007). At December 31, 2003, the unrealized gain on

crude oil futures was CDN\$26.8 million (2002 CDN\$26.3 million).

Interest Rate Contracts

At December 31, 2003, the Company had outstanding cross-currency interest rate swap agreements, accounted for as a hedge, for a nominal amount of CDN\$105.0 million, which converts a portion of its fixed-interest-rate liability into a variable-rate liability for the 4.90 % Medium Term Notes. At December 31, 2003, the unrealized gain on these cross-currency interest rate swap agreements was CDN\$2.2 million (2002 \$nil).

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG51

The following table discloses the terms of the swap agreements at December 31, 2003:

Expiration	June 15, 2010
Principal swapped (paying CDN\$ millions)	\$ 105.0
Principal swapped (receiving US\$ millions)	\$ 77.3
Fixed receiving rate	4.90 %
Variable paying rate ⁽¹⁾	1.7 %

⁽¹⁾ Based on U.S. three-month LIBOR.

At December 31, 2003, the Company had outstanding interest rate swap agreements, accounted for as a hedge, for a nominal amount of US\$150.0 million, which converts a portion of its fixed-interest-rate liability into a variable-rate liability for the 6.250 % Notes. At December 31, 2003,

the unrealized gain on these interest rate swap agreements was CDN\$8.4 million (2002 \$nil).

The following table discloses the terms of the swap agreements at December 31, 2003:

Expiration	October 15, 2011
Notional amount of principal (in CDN\$ millions)	\$ 194.5
Fixed receiving rate	6.250 %
Variable paying rate ⁽¹⁾	2.4 %

⁽¹⁾ Based on U.S. three-month LIBOR.

The Company is also party to agreements that have established the borrowing rate on US\$124.0 million of long-term debt, expected to be issued in the first three months of 2004. Unrealized losses on this arrangement, which is accounted for as a cash flow hedge, are CDN\$0.4 million at December 31, 2003, and are expected to be amortized over the life of the issue.

During 2003, the Company recorded a CDN\$23.3-million loss paid to settle interest rate locks on CDN\$200.0 million of long-term debt. The interest rate locks were accounted for as a cash flow hedge and are being amortized over the seven-year life of the issue.

At December 31, 2002, the Company had outstanding interest rate swap agreements, accounted for as a hedge, for a nominal amount of CDN\$40.8 million. These interest rate swap agreements expired on November 3, 2003.

Credit Risk Management

The Company is exposed to credit losses in the event of non-performance by counterparties to financial instruments. However, the Company does not anticipate such non-performance as dealings have been with counterparties of high credit quality. In addition, the Company believes there are no significant concentrations of credit risk.

Interest Rate Exposure and Fair Values

The Company's exposure to interest rate risk along with the total carrying amounts and fair values of its financial instruments is summarized in the following table:

Table of Contents

PG 52 | 2003 Canadian Pacific Railway Annual Report

(in millions)	At floating interest rates	Fixed interest rate maturing in			Total carrying value	Fair value
		2004	2005 to 2008	2009 and after		
Financial assets						
Cash and short-term investments 2003	\$ 134.7	\$	\$	\$	\$ 134.7	\$ 134.7
Cash and short-term investments 2002	\$ 284.9	\$	\$	\$	\$ 284.9	\$ 284.9

Bank loan payable on demand		4.0			4.0	4.0
Other		0.2	0.4		0.6	0.6
Crude oil futures						26.8
Interest rate swaps	299.5			(299.5)		10.6
Interest rate locks						(0.4)
Total financial liabilities 2003					\$ 3,362.8	\$3,801.9
Total financial liabilities 2002					\$ 3,322.9	\$3,787.6

The Company has determined the estimated fair values of its financial instruments based on appropriate valuation methodologies. However, considerable judgment is necessary to develop these estimates. Accordingly, the estimates presented herein are not necessarily indicative of what the Company could realize in a current market exchange. The use of different assumptions or methodologies may have a material effect on the estimated fair value amounts.

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Short-term financial assets and liabilities are valued at their carrying amounts as presented in the Balance Sheet, which are reasonable estimates of fair value due to the relatively short period to maturity of these instruments.

The fair value of publicly traded long-term debt is determined based on market prices at December 31, 2003. The fair value of other long-term debt is estimated based on rates currently available to the Company for long-term borrowings, with terms and conditions similar to those borrowings in place at the Balance Sheet date.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG53

The fair value of derivative instruments is estimated as the unrealized gain or loss calculated based on market prices or rates at December 31, 2003, which generally

reflects the estimated amounts the Company would receive or pay to terminate the contracts at the Balance Sheet date.

16. DEFERRED LIABILITIES

(in millions)	2003	2002
Provision for restructuring and environmental remediation (Note 17)	\$462.2	\$441.8
Deferred workers' compensation	181.3	179.1
Accrued employee benefits	127.6	115.8
Fibre optics rights-of-way deferred revenue	54.7	61.0
Other	48.2	75.9
	874.0	873.6
Less: Amount payable/realizable within one year	202.8	219.2
	\$671.2	\$654.4

Fibre optics rights-of-way deferred revenue is being amortized to income on a straight-line basis over the related lease terms.

17. RESTRUCTURING ACCRUAL AND ENVIRONMENTAL REMEDIATION

At December 31, 2003, the provision for restructuring and environmental remediation was \$462.2 million (2002 \$441.8 million). The provision was primarily for labour liabilities for restructuring plans, including those

discussed in Note 4 "Special Charge for Labour Restructuring and Asset Impairment". Payments are expected to continue in diminishing amounts until 2025. The environmental remediation liability includes the cost of a multi-year soil remediation program.

Set out below is a reconciliation of CPR's liabilities associated with its restructuring and environmental remediation programs:

(in millions)	Opening balance Jan. 1, 2003	Accrued	Payments	Amortization of discount	Foreign exchange impact	Closing balance Dec. 31, 2003
Labour liability for terminations and severances	\$ 313.0	126.5	(78.4)	12.5	(15.4)	\$ 358.2
Other non-labour liabilities for exit plans	13.3	1.9	(8.4)	0.5	1.9	9.2
Total restructuring liability	326.3	128.4	(86.8)	13.0	(13.5)	367.4
Environmental remediation program	115.5	5.5	(20.2)		(6.0)	94.8
Total restructuring and environmental remediation liability	\$ 441.8	133.9	(107.0)	13.0	(19.5)	\$ 462.2

Table of Contents

PG 54 | 2003 Canadian Pacific Railway Annual Report

(in millions)	Opening balance Jan.1, 2002	Accrued	Payments	Amortization of discount	Foreign exchange impact	Closing balance Dec. 31, 2002
Total restructuring and environmental remediation liability	\$ 551.0	(0.8)	(119.3)	11.6	(0.7)	\$ 441.8

During 2002, CPR began new restructuring initiatives to reduce costs by eliminating 85 positions, mostly in administrative areas. These initiatives required the provision be increased by \$6.8 million. This change was offset by a net reduction of \$3.9 million of previously accrued initiatives due to net experience gains and by an additional \$2.3 million in present-value discount due to a delay in expected payments.

18. SHAREHOLDERS EQUITY**Reorganization**

For the periods prior to October 1, 2001, Canadian Pacific Railway Company (CPRC) was a wholly owned subsidiary of CPL. On October 1, 2001, as part of a corporate Plan of Arrangement, CPL distributed its interests in CPRC to a newly created, publicly held company, CPRL. As a result, CPRC is now a wholly owned subsidiary of CPRL. As CPRL, CPRC and CPRC's subsidiaries (collectively referred to as CPR, the Company or Canadian Pacific Railway) were under the control of CPL, the transaction was accounted for in a manner similar to a pooling-of-interests, and the historical financial information of CPRC became the historical financial information of newly formed CPRL. At December 31, 2001, CPR had recorded charges of \$24.5 million due to the spin-off and related incentive compensation and \$17.2 million in a spin-off related bridge financing fee.

During 2001, as part of the corporate reorganization, CPRL Common Shares were issued at a ratio of 1:2 for each CPL share outstanding. There were 158.3 million CPRL shares outstanding on October 5, 2001, the date on which former shareholders of CPL became shareholders of CPRL. The CPRC Ordinary Shares outstanding at the time of reorganization are now wholly owned by CPRL.

Authorized and Issued Share Capital

The Company's Articles of Incorporation authorize for issuance an unlimited number of Common Shares and an unlimited number of First Preferred Shares and Second Preferred Shares. At December 31, 2003, no Preferred Shares had been issued.

An analysis of Common Share balances is as follows:

(in millions)	2003		2002	
	Number	Amount	Number	Amount
Balance, January 1	158.5	\$1,116.1	158.4	\$1,114.1
Common Shares issued under stock option plans	0.2	2.0	0.1	2.0
Balance, December 31	158.7	\$1,118.1	158.5	\$1,116.1

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG55

Contributed Surplus

During 2003, the Company recorded \$3.5 million in stock compensation expense to contributed surplus (see Note 2).

During 2001, the Company paid net capital contributions totalling \$8.3 million to former affiliates.

Foreign Currency Translation Adjustments

Included in equity are the following cumulative foreign currency translation adjustments:

(in millions)	2003	2002
Balance, January 1	\$ 122.3	\$ 125.5
Change in foreign currency translation rates on foreign subsidiaries	(188.9)	(8.3)
Other		(3.2)
Balance, December 31, before designated hedge	\$ (66.6)	\$ 114.0
Designated hedge, net of tax	154.3	8.3
Balance, December 31, including designated hedge	\$ 87.7	\$ 122.3

For the year ended December 31, 2003, the Company recorded future income taxes of \$34.6 million on the designated hedge (2002 \$nil).

19. PENSIONS AND OTHER BENEFITS**Pensions and Other Benefits, Excluding Post-employment Restructuring Benefits**

The Company has both defined benefit (DB) and defined contribution (DC) pension plans.

The DB plans provide for pensions based principally on years of service and compensation rates near retirement. Annual employer contributions to the DB plans, which are

actuarially determined, are made on the basis of not less than the minimum amounts required by federal or provincial pension supervisory authorities.

Other benefits include post-retirement health and life insurance for pensioners, and post-employment workers compensation benefits, which are based on Company-specific claims.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 40-F

At December 31, the net benefit expense (credit) for DB pension plans and other benefits included the following components:

(in millions)	Pensions		Other benefits	
	2003	2002	2003	2002
Current service cost (benefits earned by employees in the year)	\$ 64.4	\$ 61.7	\$ 15.3	\$ 14.6
Interest cost on benefit obligation	395.0	387.1	26.7	25.6
Expected return on pension fund assets	(448.6)	(450.0)		
Amortization of:				
Transitional (asset) obligation	(15.6)	(15.6)	13.4	13.4
Prior year service cost	9.8	11.8		
Net actuarial loss (gain)	4.2	0.3	(2.3)	0.8
Net benefit expense (credit)	\$ 9.2	\$ (4.7)	\$ 53.1	\$ 54.4

Table of Contents

PG 56 | 2003 Canadian Pacific Railway Annual Report

Information about the Company's DB pension plans and other benefits, in aggregate, is as follows:

(in millions)	Pensions		Other benefits	
	2003	2002	2003	2002
Change in benefit obligation:				
Benefit obligation at January 1	\$5,993.1	\$5,844.5	\$ 423.8	\$ 379.2
Current service cost	64.4	61.7	15.3	14.6
Interest cost	395.0	387.1	26.7	25.6
Employee contributions	47.3	46.4		
Benefits paid	(361.5)	(364.8)	(32.7)	(32.9)
Foreign currency changes	(30.9)	(1.1)	(16.9)	(0.4)
Plan amendments	14.2	(4.5)	(2.6)	(5.1)
Inclusion of provincial Workers' Compensation Board account			17.2	
Actuarial loss	403.7	23.8	19.6	42.8
Benefit obligation at December 31	\$6,525.3	\$5,993.1	\$ 450.4	\$ 423.8
Change in fund assets:				
Fair value of fund assets at January 1	\$5,129.6	\$5,484.7	\$	\$
Actual return on fund assets	604.7	(95.6)		
Employer contributions	371.8	59.9	32.7	32.9
Employee contributions	47.3	46.4		
Benefits paid	(361.5)	(364.8)	(32.7)	(32.9)
Inclusion of provincial Workers' Compensation Board account			17.2	
Foreign currency changes	(20.3)	(1.0)		
Fair value of fund assets at December 31	\$5,771.6	\$5,129.6	\$ 17.2	\$
Funded status plan deficit				
Unamortized prior service cost	\$ (111.2)	\$ (107.8)	\$ (433.2)	\$ (423.8)
Unamortized net transitional (asset) obligation	(145.1)	(160.7)	117.1	133.1
Unamortized experience losses:				
Deferred investment losses due to use of market-related value to determine pension expense	358.0	600.8		
Unamortized net actuarial loss	1,119.7 ⁽¹⁾	641.8 ⁽¹⁾	89.5	74.4

Accrued benefit asset (liability) in the Consolidated Balance Sheet	\$ 690.1	\$ 326.2	\$(226.6)	\$(216.3)
---	-----------------	----------	------------------	-----------

⁽¹⁾ The amount by which these losses exceed the 10 % corridor (representing 10 % of the benefit obligation) is equal to \$467.2 million at December 31, 2003 (2002 \$42.5 million). Any such excess is amortized, commencing in the following year, over the expected average remaining service period of active employees expected to receive benefits under the plan (approximately 12 years).

The measurement date used to determine the plan assets and the accrued benefit obligation is December 31. The most recent actuarial valuation for pension funding purposes was performed at January 1, 2002.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG57

Included in the benefit obligation and fair value of fund assets at year end were the following amounts in respect of plans where the benefit obligation exceeded the fund assets:

(in millions)	Pensions		Other benefits	
	2003	2002	2003	2002
Benefit obligation	\$(6,525.3)	\$(5,993.1)	\$(450.4)	\$(423.8)
Fair value of fund assets	5,771.6	5,129.6	17.2	
	\$ (753.7)	\$ (863.5)	\$(433.2)	\$(423.8)

Actuarial assumptions used at December 31 were approximately:

(percentage)	2003	2002	2001
Discount rate for plan obligation	6.25	6.75	6.75
Projected future salary increases	3.00	3.00	3.00
Expected rate of return on fund assets for the year ended December 31	8.00	8.00	8.00
Health care cost trend rate ⁽¹⁾	9.00	6.90	7.50

⁽¹⁾ The health care cost trend rate is projected to decrease by 0.5 % per year to approximately 4.5 % per year.

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in the assumed health care cost trend rate would have the following effects:

(in millions)	One percentage point increase	One percentage point decrease
Effect on the total of service and interest costs ⁽¹⁾	\$ (1.5)	\$ 1.7
Effect on post-retirement benefit obligation ⁽¹⁾	(14.9)	15.9

(1) Favourable (unfavourable).

Plan Assets

The Company's pension plan asset allocation at December 31, 2003 and 2002, and the current weighted average permissible range for each major asset class were as follows:

Asset allocation	Current permissible range	Percentage of plan assets at December 31	
		2003	2002
Equity securities	48 - 60%	54.2%	46.9%
Debt securities	36 - 44	41.2	47.8
Real estate and other	4 - 8	4.6	5.3
Total		100.0%	100.0%

Table of Contents

PG 58 | 2003 Canadian Pacific Railway Annual Report

The Company's investment strategy is to achieve a long-term (five- to 10-year period) real rate of return of 5.5 %, net of all fees and expenses. The Company's best estimate of long-term inflation of 2.5 % yields a long-term nominal target of 8.0 %, net of all fees and expenses. In identifying the above asset allocation ranges, consideration was given to the long-term nature of the underlying plan liabilities, the solvency and going-concern financial position of the plan, long-term return expectations and the risks associated with key asset classes as well as the relationships of their returns with each other, inflation and interest rates. When advantageous and with due consideration, derivative instruments may be utilized, provided the total value of the underlying asset represented by financial derivatives is limited to 20 % of the market value of the fund.

An 8 % expected rate of return on the market-related value of assets is being used for 2004.

At December 31, 2003, fund assets consisted primarily of listed stocks and bonds, including 285,000 CPRL Common Shares (2002 760,000) at a market value of \$10.4 million (2002 \$23.7 million) and 6.91 % Secured Equipment Notes issued by CPRL at par value of \$1.4 million (2002 \$nil) and at market value of \$1.5 million (2002 \$nil).

Cash Flows

Information about the actual and expected cash flows from the pension and other benefits plans is as follows:

Employer contributions (in millions)	Pension benefits	Other benefits
2002	\$ 59.9	\$ 32.9
2003	371.8	32.7
2004 (expected)	122.0	33.0

Of the \$371.8 million contributed in 2003, \$71.8 million was needed to satisfy minimum funding requirements, and an additional \$300.0 million was contributed at the Company's discretion and is included in Other Operating Activities, Net, in the Statement of Consolidated Cash Flows.

Expected benefit payments (in millions)	Pension benefits	Other benefits
2004	\$ 369.0	\$ 33.2
2005	376.9	34.2
2006	384.4	35.2
2007	398.7	36.2

2008		413.7	37.4
2009	2013	2,362.2	218.9

The above table reflects the total benefits expected to be paid from the plans' trustee assets or from the Company's assets, including both the Company's share of the benefit cost and the participants' share of the cost, which is funded by participant contributions to the plans. Virtually

all of the expected benefit payments with respect to pension benefits will come from the plans' trustee assets, while all of the expected benefit payments with respect to other benefits will be paid from the Company's assets.

Table of Contents

2003 Canadian Pacific Railway Annual Report | PG59

Defined Contribution Plan

Effective January 1, 2001, Canadian non-unionized employees have the option to participate in the DC plan. The DC plan provides a pension based on total employee and employer contributions plus investment income earned on those contributions. Employee contributions are based on a percentage of salary. The Company matches employee contributions to a maximum percentage each year. In 2003, the net expense of this plan, which generally equals the employer's required contribution, was \$3.1 million (2002 \$2.6 million).

Post-employment Restructuring Benefits

The Company accrues post-employment labour liabilities as part of its restructuring accruals (see Note 17). The labour portion of the Company's accrued restructuring liability was as follows:

(in millions)	2003	2002
---------------	------	------

Change in liability:
