Form 10-Q
January 24, 2013

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

- Quarterly Report pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934
For the Quarterly Period Ended December 31, 2012
- Transition Report pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934
For the Transition Period from _____ to _____.

Commission File No. 001-32632

UROPLASTY, INC.

(Exact name of registrant as specified in its Charter)

Minnesota, U.S.A.
(State or other jurisdiction of incorporation or
organization)

41-1719250
(I.R.S. Employer Identification No.)

5420 Feltl Road
Minnetonka, Minnesota, 55343
(Address of principal executive offices)

(952) 426-6140
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act)

YES NO

As of January 22, 2013 the registrant had 21,015,582 shares of common stock outstanding.

UROPLASTY, INC. AND SUBSIDIARIES

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Basis of Presentation

We have prepared our Condensed Consolidated Financial Statements included in this Form 10-Q, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in the consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted, pursuant to such rules and regulations, although we believe that our disclosures are adequate to make the information not misleading. The consolidated results of operations for any interim period are not necessarily indicative of results for a full year. These Condensed Consolidated Financial Statements should be read in conjunction with the audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended March 31, 2012.

The Condensed Consolidated Financial Statements presented herein as of December 31, 2012 and for the three- and nine- month periods ended December 31, 2012 and 2011 reflect, in the opinion of management, all material adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the consolidated financial position, results of operations and cash flows for the interim periods.

We have identified certain accounting policies that we consider particularly important for the portrayal of our results of operations and financial position and which may require the application of a higher level of judgment by our management, and as a result are subject to an inherent level of uncertainty. These are characterized as “critical accounting policies” and address revenue recognition, accounts receivable, inventories, foreign currency translation and transactions, impairment of long-lived assets, share-based compensation, defined benefit pension plans and income taxes, each of which is described in our Annual Report on Form 10-K for the year ended March 31, 2012. Based upon our review, we have determined that these policies remain our most critical accounting policies for the three and nine months ended December 31, 2012 and we have made no changes to these policies during fiscal 2013.

2. Newly Adopted Accounting Pronouncements

In June 2011, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) No. 2011-05, “Comprehensive Income (Topic 220): Presentation of Comprehensive Income” (ASU 2011-05), which is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. We adopted this guidance effective April 1, 2012. Since this standard impacts presentation and disclosure requirements only, this adopted guidance did not have an impact on our results of operations or financial position.

3. Fair Value Measurements

Estimates of fair value for financial assets and liabilities are based on the framework established in the accounting guidance for fair value measurements. The framework defines fair value, provides guidance for measuring fair value and requires certain disclosures. The framework prioritizes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The following three broad levels of inputs may be used to measure fair value under the fair value hierarchy:

- Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.
-

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

- Level 3: Significant unobservable inputs that cannot be corroborated by observable market data and reflect the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management's estimates of market participant assumptions.

If the inputs used to measure the financial assets and liabilities fall within more than one of the different levels described above, the categorization is based on the lowest level input that is significant to the fair value measurement of the instrument.

Index

The following table provides the assets carried at fair value measured on a recurring basis.

Asset Class	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2012				
Short-term investments:				
U.S. Government and Agency debt securities	\$3,514,000	\$ -	\$3,514,000	\$ -
Long-term investments:				
U.S. Government and Agency debt securities	1,200,000	-	1,200,000	-
March 31, 2012				
Short-term investments:				
U.S. Government and Agency debt securities	1,001,000	-	1,001,000	-
Long-term investments:				
U.S. Government and Agency debt securities	2,029,000	-	2,029,000	-

Our U.S. Government and U.S. Government Agency debt securities consist of bonds, notes and treasury bills with risk ratings of AAA/Aaa. The estimated fair value of these securities represents valuations provided by external investment managers.

Remeasurements to fair value on a nonrecurring basis relate primarily to our Property, plant and equipment and Intangible assets and occur when the derived fair value is below the carrying value on our Condensed Consolidated Balance Sheet. As of December 31, 2011 and March 31, 2012 we had no remeasurements of such assets to fair value.

The carrying amounts reported in the Condensed Consolidated Balance Sheets for Short-term and Long-term investments include certificates of deposit of \$6,100,000 for which, due to the negligible risk of changes in value resulting from changes in interest rates and the short-term nature of these investments, cost approximates fair market value.

The carrying amounts reported in the Condensed Consolidated Balance Sheets for Cash and cash equivalents, Accounts receivable, Inventories, Other current assets, Accounts payable and Accrued liabilities approximate fair market value.

4. Accounts Receivable

The allowance for doubtful accounts and sales returns was \$90,000 at December 31, 2012 and \$101,000 at March 31, 2012.

5. Inventories

Edgar Filing: UROPLASTY INC - Form 10-Q

Inventories are stated at the lower of cost (first-in, first-out method) or market (net realizable value). Inventories consist of the following:

	December 31, 2012	March 31, 2012
Raw materials	\$ 217,000	\$ 219,000
Work-in-process	25,000	1,000
Finished goods	593,000	479,000
	\$ 835,000	\$ 699,000

Index

6. Intangible Assets

Our Intangible assets are comprised of patents which we amortize on a straight-line basis over their estimated useful lives of six years.

	Gross carrying amount	Accumulated amortization	Net value
December 31, 2012	\$ 5,590,000	\$ 5,287,000	\$ 303,000
March 31, 2012	5,586,000	4,640,000	946,000

At December 31, 2012, we estimate the following annual Amortization for these assets in subsequent fiscal years:

Remainder of 2013	\$215,000
2014	24,000
2015	23,000
2016	21,000
2017 and beyond	20,000
	\$303,000

7. Net Loss per Common Share

The following potentially dilutive options to purchase shares of Common stock and unvested restricted Common stock at December 31, were excluded from Diluted net loss per common share because of their anti-dilutive effect, and therefore, Basic net loss per common share equals Dilutive net loss per common share for all periods presented in our Consolidated Statements of Operations:

	Number of options and unvested restricted stock	Range of stock option exercise prices
December 31, 2012	1,240,085	\$ 0.77 to \$3.19
December 31, 2011	1,221,333	\$ 0.77 to \$4.20

8. Share-based Compensation

As of December 31, 2012, we had one active plan (2006 Amended Stock and Incentive Plan) for Share-based compensation grants. Under the plan, if we have a change in control, all outstanding grants, including those subject to vesting or other performance targets, fully vest immediately. Under this plan, we had reserved 2,700,000 shares of our Common stock for share-based grants. As of December 31, 2012, we had 1,106,000 shares remaining that were available for grant. We grant option awards with an exercise price equal to the closing market price of our stock at the date of the grant. Options granted under this plan generally expire over a period ranging from five to seven years from date of grant and vest at varying rates ranging up to three years.

We recognize Share-based compensation expense in the statement of operations based on the fair value of the share-based payment over the requisite service period. We incurred approximately \$611,000 and \$503,000 in Share-based compensation and consulting expense (inclusive of \$2,000 and \$4,000, respectively, for option grants to consultants) for the nine months ended December 31, 2012 and 2011, respectively.

Index

We determined the fair value of our option awards using the Black-Scholes option pricing model. We used the following weighted-average assumptions to value the options granted during the nine months ended December 31:

	2012		2011	
Expected life in years	5.42		5.35	
Risk-free interest rate	0.93	%	1.59	%
Expected volatility	91.31	%	90.05	%
Expected dividend yield	0		0	
Weighted-average grant date fair value	\$ 2.60		\$ 4.76	

The expected life selected for options granted during the nine-months represents the period of time that we expect our options to be outstanding based on historical data of option holder exercise and termination behavior for similar grants. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury rate over the expected life at the time of grant. Expected volatilities are based upon historical volatility of our stock. We estimate a forfeiture rate for stock awards of up to 13.0% based on our historical experience.

The following table summarizes the activity related to our stock options during the nine months ended December 31, 2012:

	Number of shares	Weighted average exercise price	Weighted average remaining life in years	Aggregate intrinsic value
Outstanding at March 31, 2012	2,083,000	\$ 3.64		
Options granted	88,000	3.60		
Options exercised	(40,000)	3.75		
Options surrendered	(195,000)	4.34		
Outstanding at December 31, 2012	1,936,000	\$ 3.56	2.70	\$ 1,187,000
Exercisable at December 31, 2012	1,728,000	\$ 3.38	2.33	\$ 1,185,000

The total fair value of stock options that vested during the nine months ended December 31, 2012 and 2011 was \$472,000 and \$380,000 respectively.

Our 2006 Stock and Incentive Plan also allows our Compensation Committee to grant other stock-based benefits, including restricted shares. Restricted shares are subject to risk of forfeiture for termination of employment. The forfeiture risk generally lapses over a period of four years.

The following table summarizes the activity related to our restricted shares during the nine months ended December 31, 2012:

	Number of Shares	Weighted average grant date fair value	Weighted average remaining life in years	Aggregate intrinsic value
Balance at March 31, 2012	70,000	\$ 6.30		

Edgar Filing: UROPLASTY INC - Form 10-Q

Shares granted	167,000	3.61		
Shares vested	(20,000)	6.09	\$	127,000
Balance at December 31, 2012	217,000	\$ 4.25	1.19 \$	920,000

Page 12

Index

The aggregate intrinsic value shown above for the restricted shares represents the total pre-tax value based on the closing price of our Company's common stock on the grant date.

As of December 31, 2012, we had approximately \$1,209,000 of unrecognized Share-based compensation expense, net of estimated forfeitures, related to stock options and restricted shares that we expect to recognize over a weighted-average period of approximately 2.1 years.

9. Savings and Retirement Plans

We sponsor various plans for eligible employees in the United States, the United Kingdom (UK), and The Netherlands. Our retirement savings plan in the United States conforms to Section 401(k) of the Internal Revenue Code and participation is available to substantially all employees. We may also make discretionary contributions ratably to all eligible employees. We made discretionary contributions to the U.S. plan of \$164,000 and \$157,000 for the nine months ended December 31, 2012 and 2011, respectively.

Our international subsidiaries have defined benefit retirement plans for eligible employees. These plans provide benefits based on the employee's years of service and compensation during the years immediately preceding retirement, termination, disability, or death, as defined in the plans.

The cost for our defined benefit retirement plans in The Netherlands and the United Kingdom includes the following components for the three- and nine- month periods ended December 31:

	Three Months Ended December 31		Nine Months Ended December 31	
	2012	2011	2012	2011
Gross service cost	\$ 19,000	\$ 19,000	\$ 55,000	\$ 58,000
Interest cost	31,000	30,000	92,000	93,000
Expected return on assets	(5,000)	(5,000)	(14,000)	(15,000)
Amortization	1,000	1,000	4,000	5,000
Net periodic retirement cost	\$ 46,000	\$ 45,000	\$ 137,000	\$ 141,000

10. Business Segment Information

We aggregate our operating segments into one reportable segment in accordance with the objectives and principles of the applicable guidance.

Net sales to customers outside the United States for the three months ended December 31, 2012 and 2011 represented 27% and 33%, respectively, of our consolidated Net sales. Net sales to customers outside the United States for the nine months ended December 31, 2012 and 2011 represented 27% and 34%, respectively, of our consolidated Net sales. Information regarding Net sales to customers by geographic area for the three and nine months ended December 31 is as follows:

	United States	All Other Foreign Countries (1)	Consolidated
Three months ended December 31, 2012	\$ 4,105,000	\$ 1,485,000	\$ 5,590,000

Edgar Filing: UROPLASTY INC - Form 10-Q

Three months ended December 31, 2011	3,576,000	1,768,000	5,344,000
Nine months ended December 31, 2012	12,384,000	4,493,000	16,877,000
Nine months ended December 31, 2011	9,900,000	5,065,000	14,965,000

(1) No country accounts for 10% or more of the consolidated Net sales

Index

Information regarding geographic area in which we maintain long-lived assets is as follows:

	United States	All Other Foreign Countries (1)	Consolidated
December 31, 2012	\$ 445,000	\$ 630,000	\$ 1,075,000

(1) Substantially all maintained in The Netherlands

Accounting policies of the operations in the various geographic areas are the same as those described in Note 1. Net sales attributed to each geographic area are net of intercompany sales. No single customer represents 10% or more of our consolidated Net sales. Long-lived assets consist of Property, plant and equipment.

ITEM 2.MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We recommend that you read this Report on Form 10-Q in conjunction with our Annual Report on Form 10-K for the year ended March 31, 2012.

Forward-looking Statements

This Form 10-Q contains “forward-looking statements” relating to projections, plans, objectives, estimates, and other statements of future economic performance. These forward-looking statements are subject to known and unknown risks and uncertainties relating to our future performance that may cause our actual results, performance, or achievements, or industry results, to differ materially from those expressed or implied in any such forward-looking statements. Our business operates in highly competitive markets and our ability to achieve the results implied by our forward looking statements is subject to changes in general economic conditions, competition, reimbursement levels, customer and market preferences, government regulation, the impact of tax regulation, foreign exchange rate fluctuations, the degree of market acceptance of products, the uncertainties of potential litigation, as well as other risks and uncertainties detailed elsewhere herein and in our Annual Report filed on Form 10-K for the year ended March 31, 2012.

We do not undertake, nor assume any obligation, to update any forward-looking statement that we may make from time to time.

Critical Accounting Policies

We prepare our consolidated financial statements in accordance with U.S. generally accepted accounting principles, which require us to make estimates and assumptions in certain circumstances that affect amounts reported. In preparing these consolidated financial statements, we have made our best estimates and judgments of certain amounts, giving due consideration to materiality.

We have identified accounting policies that we consider particularly important for the portrayal of our results of operations and financial position and which may require the application of a higher level of judgment by our management, and as a result are subject to an inherent level of uncertainty. These are characterized as “critical accounting policies” and address revenue recognition, accounts receivable, inventories, foreign currency translation and transactions, impairment of long-lived assets, share-based compensation, defined benefit pension plans and income taxes, each of which is described in our Annual Report on Form 10-K for the year ended March 31, 2012. Based upon

our review, we have determined that these policies remain our most critical accounting policies for the three and nine months ended December 31, 2012, and we have made no changes to these policies during fiscal 2013.

Overview

We are a medical device company that develops, manufactures and markets innovative, proprietary products for the treatment of voiding dysfunctions. Our primary focus is on two products: the Urgent PC® Neuromodulation System, which we believe is the only FDA-cleared minimally invasive, office-based neuromodulation therapy for the treatment of overactive bladder (OAB) and associated symptoms of urinary urgency, urinary frequency, and urge incontinence; and Macroplastique® Implants, a urethral bulking agent for the treatment of adult female stress urinary incontinence primarily due to intrinsic sphincter deficiency (ISD). Outside of the U.S., our Urgent PC System is also approved for treatment of fecal incontinence, and Macroplastique is also approved for treatment of male stress incontinence and vesicoureteral reflux.

Index

Our sales during the past four years have been significantly influenced by the availability of third-party reimbursement for PTNS treatments. Sales of our Urgent PC System grew rapidly during fiscal 2007 and 2008 with rapid market acceptance of PTNS treatments that were reimbursed under a listed Current Procedure Technology (CPT®) code. However, during the first quarter of our fiscal 2009 the American Medical Association (AMA) advised the medical community that the previously recommended listed CPT code for reimbursement for PTNS treatments should be replaced with an unlisted CPT code. As a result, many third-party insurers delayed or denied reimbursement for PTNS treatments, and sales of our Urgent PC System in the U.S. declined from a peak of \$2.2 million in the first quarter of our fiscal 2009 to a range of \$0.9 million to \$1 million per quarter in the six subsequent fiscal quarters ended December 2010.

We responded by sponsoring several randomized, controlled clinical studies over the following two years, and supported by publication of these clinical studies in U.S. peer-reviewed journals, we applied for, and effective January 2011 the AMA granted, a Category 1 CPT code for PTNS treatments. Consistent with expanded reimbursement we have expanded our U.S. field sales and support organization from 15 employed sales representatives on April 1, 2010 to 43 employed sales representatives on December 31, 2012.

We also focused our efforts on expanding reimbursement coverage with the Medicare carriers and private payers by instituting a comprehensive program to educate their medical directors regarding the clinical effectiveness, cost effectiveness and patient benefits of PTNS treatments using our Urgent PC System. As of December 31, 2012, eleven regional Medicare carriers representing 39 states and the District of Columbia, with approximately 36 million covered lives, provide coverage for PTNS treatments. In addition, we estimate that private payers providing insurance to approximately 100 million lives cover PTNS treatments.

With the availability of a CPT Category 1 code and expanded reimbursement coverage from third-party payers, as well as an expanded sales organization, our U.S. Urgent PC sales of \$8.0 million during the nine-month period ended December 31, 2012 grew 45% over sales during the nine-month period ended December 31, 2011.

At December 31, 2012, two regional Medicare carriers representing 11 states, with approximately 12 million covered lives, continued to decline reimbursement coverage for PTNS treatments. We are participating with a Medicare beneficiary who filed an administrative appeal for reconsideration of the decision of one of those regional Medicare carriers. That appeal remains pending.

The Centers for Medicare and Medicaid Services expects to continue to consolidate the regional Medicare claims administrators and there is no guarantee that Medicare beneficiaries in a region with reimbursement coverage will continue to be reimbursed when consolidated into a regional Medicare carrier with a negative reimbursement policy, or, if reimbursed, that coverage will remain unchanged. We continue to work with the medical directors of both Medicare and private payers to expand coverage of PTNS treatments, and to ensure that coverage continues after the number of Medicare regions is decreased and regional Medicare administrators are transitioned.

In March 2010, significant U.S. healthcare reform legislation, the Patient Protection and Affordable Care Act (PPACA) along with the Health Care and Education Reconciliation Act of 2010, was enacted into law. As a U.S. headquartered company with sales in the United States, this health care reform law will impact us. Certain provisions of the health care reform are not effective for a number of years and there are many programs and requirements for which the details have not yet been fully established or consequences not fully understood, and it is unclear what the full impact will be from the legislation. The law does levy an excise tax on all U.S. medical device sales beginning in 2013. Our U.S. Net sales represented approximately 73% of our worldwide consolidated Net sales through nine months ended December 31, 2012 and we expect in the future the U.S. sales to continue to grow and become a greater proportion of our worldwide consolidated Net sales. We expect the new tax could affect our business, cash flows and results of operations. The law also focuses on a number of Medicare provisions aimed at improving quality and

decreasing costs. It is uncertain at this time what impact these provisions will have on patient access to new technologies. The Medicare provisions also include value-based payment programs, increased funding of comparative effectiveness research, reduced hospital payments for avoidable readmissions and hospital acquired conditions, and pilot programs to evaluate alternative payment methodologies that promote care coordination (such as bundled physician and hospital payments). Additionally, the law includes a reduction in the annual rate of inflation for hospitals that began in 2011 and the establishment of an independent payment advisory board to recommend ways of reducing the rate of growth in Medicare spending beginning in 2014. We cannot predict all healthcare programs and regulations that will be ultimately implemented at the federal or state level, or the effect of any future legislation or regulation. However, any changes that lower reimbursement for our products or reduce medical procedure volumes could adversely affect our business and results of operations.

Index

Results of Operations

Three and nine months ended December 31, 2012 compared to three and nine months ended December 31, 2011

Net Sales: During the three months ended December 31, 2012, consolidated Net sales of \$5.6 million represented a \$246,000, or a 5% increase, over Net sales of \$5.3 million for the three months ended December 31, 2011. During the nine months ended December 31, 2012, consolidated Net sales of \$16.9 million represented a \$1.9 million, or a 13%, increase over net sales of \$15.0 million for the nine months ended December 31, 2011.

The increase in consolidated Net sales for the three and nine months ended December 31, 2012 is attributed to the growth in U.S. sales.

Net sales to customers in the U.S. of \$4.1 million during the three months ended December 31, 2012, represented an increase of \$528,000, or 15%, over Net sales of \$3.6 million for the three months ended December 31, 2011. Net sales to customers in the U.S. of \$12.4 million during the nine months ended December 31, 2012, represented an increase of \$2.5 million, or 25%, over Net sales of \$9.9 million for the nine months ended December 31, 2011.

Net sales in the U.S. of our Urgent PC product increased 37% to \$2.7 million for the three months ended December 31, 2012, from \$2.0 million for the same period last year. Net sales in the U.S. of our Urgent PC product increased 45% to \$8.0 million for the nine months ended December 31, 2012, from \$5.5 million for the same period last year. Net sales increased because of expanded reimbursement coverage by third-party payers, and because of the impact of our expanded direct sales organization and programs to support continued use of our Urgent PC products.

In the fiscal third quarter ended December 31, 2012, we had 620 U.S. customers purchasing 3,501 lead set boxes, compared to 500 customers purchasing 2,531 lead set boxes in the third fiscal quarter of last year. The increase is attributed to an expanded customer base and the ramp-up in customers' practice in light of the decision by several Medicare carriers and private payers to cover PTNS treatments using our Urgent PC. The performance for fiscal third quarter ended December 31, 2012 was slightly down from the 648 active customers and 3,576 lead set boxes sold during the fiscal second quarter ended September 30. We believe the decrease reflects the seasonal slowdown in initiation of treatments by new patients.

Net sales in the U.S. of our Macroplastique product decreased 12% to \$1.4 million for the three months ended December 31, 2012, compared to \$1.6 million for the same period last year. Net sales in the U.S. of our Macroplastique product increased \$62,000, or 1%, to \$4.3 million for the nine months ended December 31, 2012, compared to the same period last year. The sales decrease is attributed primarily to the shift in sales focus from Macroplastique to Urgent PC.

Net sales to customers outside the U.S. for the three months ended December 31, 2012 decreased 16% to \$1.5 million compared to \$1.8 million for the three months ended December 31, 2011. Excluding the translation impact of fluctuations in foreign currency exchange rates, Net sales decreased by approximately 14%. Net sales to customers outside the U.S. for the nine months ended December 31, 2012 were \$4.5 million compared to \$5.1 million for the nine months ended December 31, 2011, a decrease of 11%. Excluding the translation impact of fluctuations in foreign currency exchange rates, Net sales decreased by approximately 5%. Macroplastique sales declined 24% to \$672,000 in the third fiscal quarter and declined 23% to \$2.1 million for the nine months ended December 31, 2012 over the corresponding year ago periods. The decline of the Macroplastique sales is primarily caused by the irregular ordering pattern of one of our main distributors.

Urgent PC sales to customers outside of the U.S. of \$556,000 for the three months ended December 31, 2012 decreased 4% from \$581,000 for the same period last year. The decrease in sales is mainly attributed to price

reduction in one geographic area due to reimbursement challenges as well as to local competition. In addition the last year quarter contained a one-time order for a third party funded clinical study. Urgent PC sales of \$1.6 million for the nine months ended December 31, 2012 increased 15% from \$1.4 million for the same period last year. Excluding the translation impact of fluctuations in foreign currency exchange rates, Urgent PC sales increased by approximately 21%. The increase in sales is attributed to the increase in adoption of the product by our customers, primarily in the United Kingdom.

Gross Profit: Gross profit was \$4.9 million, or 86.9%, of Net sales during the three months ended December 31, 2012, and \$4.6 million, or 85.5%, of Net sales for the three months ended December 31, 2011. The increase in the Gross profit percentage is attributed primarily to a favorable impact of approximately 0.3 percentage points from an increase in capacity absorption and reduced overhead costs, and favorable impact of approximately 1.0 percentage points from product mix

Index

Gross profit was \$14.6 million, or 86.6%, of Net sales during the nine months ended December 31, 2012, and \$12.7 million, or 85.0%, of Net sales for the nine months ended December 31, 2011. The increase in the Gross profit percentage is attributed primarily to a favorable impact of approximately 0.3 percentage points from an increase in capacity absorption and reduced overhead costs, and a favorable impact of approximately 1.2 percentage points from product mix.

General and Administrative Expenses (G&A): G&A expenses of \$1.1 million during the three months ended December 31, 2012, increased \$134,000 from \$925,000 during the same period in 2011. G&A expenses of \$3.2 million during the nine months ended December 31, 2012, increased \$289,000 from \$2.9 million during the same period in 2011. G&A expenses for both periods increased primarily because of an increase in compensation and travel costs.

Research and Development Expenses (R&D): R&D expenses of \$534,000 during the three months ended December 31, 2012, decreased \$53,000 from \$586,000 during the same period in 2011. R&D expenses of \$1.7 million during the nine months ended December 31, 2012, increased \$197,000 from \$1.5 million during the same period in 2011. The decrease for the three-month period is attributed primarily to a \$129,000 charge in the prior fiscal year for costs incurred by a third-party to develop tooling for a product we no longer planned to commercialize, offset by a \$32,000 increase in compensation costs. The increase for the nine-month period is attributed primarily to a \$340,000 charge for product testing and validation of the planned replacement of components for one of our products, an \$85,000 increase in consulting and clinical data validation, and a \$51,000 increase in compensation costs, offset by a \$182,000 decrease in human clinical study costs and a \$129,000 charge in the prior fiscal year for costs incurred by a third-party for the tooling development noted above.

Selling and Marketing Expenses (S&M): S&M expenses of \$3.7 million during the three months ended December 31, 2012 decreased \$177,000, from \$3.9 million, during the same period in 2011. S&M expenses during the three months ended December 31, 2012, decreased primarily because of a \$207,000 decrease in compensation-related costs, offset by a \$50,000 increase in travel costs. S&M expenses of \$11.4 million during the nine months ended December 31, 2012 increased \$57,000 compared to the same period last year. S&M expenses during the nine months ended December 31, 2012, increased primarily because of a \$255,000 increase in travel costs and a \$62,000 increase in marketing related costs to support the increase in personnel in our U.S field sales and support organization, offset by a \$317,000 decrease in compensation related costs as a result of reducing our bonus and incentive related costs by \$404,000.

Amortization of Intangibles: Amortization of intangibles was \$216,000 and \$215,000 for the three months ended December 31, 2012 and 2011, respectively. Amortization of intangibles was \$647,000 and \$642,000 for the nine months ended December 31, 2012 and 2011, respectively. We expect Amortization expense to decline to \$24,000 in Fiscal 2014.

Other Income (Expense): Other income (expense) includes Interest income, Interest expense and Foreign currency exchange gains and losses. Net Other income was \$13,000 and \$3,000 for the three months ended December 31, 2012 and 2011, respectively. Other income increased as a result of a favorable swing of \$11,000 in net foreign currency exchange gain during the three months ended December 31, 2012 over the same period last year, offset by a \$2,000 decrease in Interest income. Net Other income was \$32,000 and \$31,000 for the nine months ended December 31, 2012 and 2011, respectively. Other income increased as a result of an \$11,000 net Foreign currency exchange gain during the nine months ended December 31, 2012 over the same period last year, offset by a \$10,000 decrease in Interest income on lower cash balances and interest rates.

Income Tax Expense: During the three months ended December 31, 2012 and 2011, we recorded Income tax expense of \$13,000 and \$9,000, respectively. During the nine months ended December 31, 2012 and 2011, we recorded

Income tax expense of \$36,000 and \$32,000, respectively.

Non-GAAP Financial Measures: The following table reconciles our operating loss calculated in accordance with accounting principles generally accepted in the U.S. (GAAP) to Non-GAAP financial measures that exclude non-cash charges for share-based compensation, and depreciation and Amortization expenses from Gross profit, Operating expenses and Operating loss. The Non-GAAP financial measures used by management and disclosed by us are not a substitute for, or superior to, financial measures and consolidated financial results calculated in accordance with GAAP, and you should carefully evaluate our reconciliations to non-GAAP. We may calculate our Non-GAAP financial measures differently from similarly titled measures used by other companies. Therefore, our Non-GAAP financial measures may not be comparable to those used by other companies. We have described the reconciliations of each of our Non-GAAP financial measures described above to the most directly comparable GAAP financial measures.

Index

We use these Non-GAAP financial measures, and in particular non-GAAP operating loss, for internal managerial purposes and incentive compensation for senior management because we believe such measures are one important indicator of the strength and the operating performance of our business. Analysts and investors frequently ask us for this information. We believe that they use these measures to evaluate the overall operating performance of companies in our industry, including as a means of comparing period-to-period results and as a means of evaluating our results with those of other companies.

Our non-GAAP operating loss during the three months ended December 31, 2012 and 2011 was approximately \$135,000 and \$570,000, respectively. Our non-GAAP operating loss during the nine months ended December 31, 2012 and 2011 was approximately \$858,000 and \$2.3 million, respectively. The decrease in non-GAAP operating loss for the three months ended December 31, 2012 over the corresponding period a year ago is attributed to the increase in Net sales and Gross profit percent and the decrease in operating spending. The decrease in non-GAAP operating loss for the nine months ended December 31, 2012 over the corresponding period a year ago is attributed to the increase in Net sales and Gross profit percent, which more than offset the increase in operating spending.

Three-Months Ended December 31, 2012	GAAP	Expense Adjustments			Non-GAAP
		Share-based Expense	Depreciation	Amortization of Intangibles

Liquidity and Capital Resources

Cash Flows.

At December 31, 2012, our Cash and cash equivalents and Short-term investments balances totaled \$14.4 million. Our Long-term investments at December 31, 2012 were \$1.2 million.

At December 31, 2012, we had working capital of approximately \$15.4 million.

For the nine months ended December 31, 2012, we used \$632,000 of cash in operating activities, compared to \$2.7 million of cash used during the nine months ended December 31, 2011. We used this cash primarily to fund the Operating loss, net of non-cash charges, of \$841,000 during the nine months ended December 31, 2012, and \$2.3 million during the nine months ended December 31, 2011. We have continued to show an Operating loss because we have continued to invest, primarily in Selling and marketing and Research and development, to grow our U.S. business. We generated approximately \$209,000 of cash from changes in operating assets and liabilities in the nine months ended December 31, 2012, compared to cash used of \$378,000 in the nine months ended December 31, 2011.

For the nine months ended December 31, 2012, we used \$137,000 to purchase Property, plant and equipment compared with approximately \$223,000 for the same period a year ago.

For the nine months ended December 31, 2012, we generated \$150,000 of cash from exercise of stock options, compared with \$209,000 for the nine months ended December 31, 2011.

Sources of Liquidity.

Uroplasty BV, our subsidiary in the Netherlands, has an agreement with Rabobank of The Netherlands for a €150,000 (approximately \$198,000) credit line secured by our facility in Geleen, The Netherlands. The bank charges interest on the loan at the rate of one percentage point over the Rabobank base interest rate (4.0% base rate on December 31, 2012), subject to a minimum interest rate of 3.5% per annum. We had no borrowings outstanding on this credit line at December 31, 2012.

We believe we have sufficient liquidity to meet our needs for beyond the next twelve months. Although we have historically not generated cash from operations because we have yet to achieve profitability, we anticipate that we will become profitable and generate excess cash from operations prior to the full use of the current available cash and investments. To achieve this however, we must generate substantially more revenue than we have this year or in prior years.

Index

Our ability to achieve significant revenue growth will depend, in large part, on our ability to achieve widespread market acceptance for our products and successfully expand our business in the U.S., which in turn may be partially dependent upon re-establishing broader reimbursement for our Urgent PC product. We cannot guarantee that we will be entirely successful at this. If we fail to meet our projections of profitability and cash flow, or determine to use cash for matters we have not currently projected, we may need to again seek financing to meet our cash needs. We cannot assure you that such financing, if needed, will be available to us on acceptable terms, or at all.

Commitments and Contingencies.

We discuss our Commitments and contingencies in our Annual Report on Form 10-K for the year ended March 31, 2012. There have been no significant changes in our commitments for capital expenditure and contractual obligations since March 31, 2012.

We expect to continue to incur costs for clinical studies to support our ongoing marketing efforts and to meet regulatory requirements. We also expect to continue to incur significant expenses to support our U.S. sales and marketing organization, and for regulatory activities. In fiscal 2013 we started two multiyear studies: a pilot clinical study in the U.S. for the use of our Urgent PC for the treatment of fecal incontinence and a clinical study and product design for a minimally invasive implantable product for treatment of OAB. We estimate that in the remaining 3 months of the current fiscal year, we will spend approximately \$264,000 for these two clinical studies.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We discuss quantitative and qualitative disclosures about market risk in our Annual Report on Form 10-K for the year ended March 31, 2012. There have been no significant changes since March 31, 2012.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures.

Under the supervision and with the participation of our management, including, our President and Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e)) under the Securities Exchange Act of 1934 (the "Exchange Act"). Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective in ensuring that the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, in a manner that allows timely decisions regarding required disclosure.

Internal Control Over Financial Reporting.

There were no changes in our internal control over financial reporting during the quarter ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None.
