Approximate date of commencement of proposed sale to the public: As soon as practicable after this registration statement becomes effective and upon completion of the merger described in the enclosed proxy

statement/prospectus.

If the securities being registered on this Form are to be offered in connection with the formation of a holding company and there is compliance with General Instruction G, check the following box.

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

CALCULATION OF REGISTRATION FEE

Title of each Class of Securities to be Registered	Amount to be Registered (1)	Proposed Maximum Offering Price Per Share	Proposed Maximum Aggregate Offering Price (2)	Amount of Registration Fee (3)
Common Stock, \$0.0001 par value per share	N/A	N/A	\$511,127,610	\$54,690.65

(1) In accordance with Rule 457(o) under the Securities Act of 1933, the number of shares is not set forth herein.

(2) Estimated solely for the purpose of calculation of the registration fee. Pursuant to Rule 457(o), the registration fee has been computed on the basis of the maximum aggregate offering price of the shares of the Registrant's common stock expected to be issued. The registration fee has been computed pursuant to Rule 457(f)(2) based on the aggregate book value of the limited liability company interests, without par value, of NextWave Wireless LLC, as of July 1, 2006 (\$511,127,610).

(3) The registration fee for the securities registered hereby has been calculated pursuant to Section 6(b) of the Securities Act.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. The securities being offered by the use of this prospectus may not be issued until the registration statement filed with the Securities and Exchange Commission, of which this prospectus is a part, is declared effective. This prospectus is not an offer to sell these securities nor a solicitation of any offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED SEPTEMBER 15, 2006

PROSPECTUS

NEXTWAVE WIRELESS INC.

The Board of Managers of NextWave Wireless LLC have unanimously approved the conversion of NextWave Wireless LLC from a Delaware limited liability company to a Delaware corporation. The corporate conversion will be effected through the merger of a wholly-owned subsidiary of NextWave Wireless Inc., a newly formed Delaware corporation with and into NextWave Wireless LLC. A majority in interest of the holders of NextWave Wireless LLC's membership units have also approved the corporate conversion merger.

When the corporate conversion merger is completed, NextWave Wireless LLC will become a wholly-owned subsidiary of NextWave Wireless Inc. The terms of the merger agreement provide for NextWave Wireless Inc. to issue shares of its common stock to holders of NextWave Wireless LLC's membership units in exchange for all of the outstanding membership units of NextWave Wireless LLC, with NextWave Wireless LLC unitholders receiving of a share of NextWave Wireless Inc. common stock for each membership unit of NextWave Wireless LLC that they hold.

NextWave Wireless Inc. anticipates that shortly after the closing of the corporate conversion merger, NextWave Wireless Inc. shares will be listed for trading on the Nasdaq Global Market under the symbol "WAVE." NextWave Wireless Inc. will apply for listing on the Nasdaq Global Market and, in order to be listed, will be required to meet the initial listing requirements established by Nasdaq.

This prospectus provides you with detailed information about NextWave Wireless Inc., NextWave Wireless LLC and the corporate conversion merger. Please see "*Where You Can Find More Information*" on page 99 for additional information about NextWave Wireless Inc. and NextWave Wireless LLC.

Consider carefully the "Risk Factors" beginning on page 12 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of this transaction or the NextWave common stock to be issued in the merger or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The prospectus is dated September 15, 2006.

IMPORTANT

This document constitutes a prospectus of NextWave Wireless Inc. for the shares of NextWave common stock that NextWave will issue to unitholders of NextWave Wireless LLC in the corporate conversion merger. NextWave has filed a registration statement on Form S-4 to register the shares of NextWave's common stock to be issued to unitholders of NextWave Wireless LLC in the corporate conversion merger. This prospectus is part of the registration statement, but does not contain all of the information set forth in the registration statement, certain portions of which have been omitted as permitted by the rules and regulations of the Securities and Exchange Commission. Such additional information may be obtained, without charge, from the SEC's principal office in Washington, D.C. or from the website maintained by the SEC at <http://www.sec.gov>. In accordance with the rules of the SEC, this prospectus incorporates important business and financial information about NextWave Wireless LLC that is contained in documents filed with the SEC. The information incorporated by reference is deemed to be part of this prospectus, except for any information superseded by information in this prospectus. See the section entitled "Where You Can Find More Information" beginning on page 99 of this prospectus.

We are not incorporating the contents of the websites of the SEC or any other person into this document. We are only providing the information about how you can obtain certain documents that are incorporated by reference into this prospectus at such websites for your convenience.

Appendix A Agreement and Plan of Merger

EXPLANATORY NOTE

NextWave Wireless Inc. (“Old NextWave Wireless”) was formed in 1996 as a wholly owned operating subsidiary of NextWave Telecom, Inc. (“NTI”), which sought to develop a nationwide CDMA-based personal communication services (“PCS”) network. In 1998, Old NextWave Wireless, together with NTI and its other subsidiaries (the “NextWave Telecom group”), filed for protection under Chapter 11 of the United States Bankruptcy Code. In December 2004, Old NextWave Wireless was converted from a corporation to a limited liability company.

On March 1, 2005, the Bankruptcy Court confirmed the plan of reorganization of the NextWave Telecom group. The cornerstone of the plan was the sale of NTI and its subsidiaries, excluding Old NextWave Wireless, to Verizon Wireless for approximately \$3.0 billion. With the proceeds of the Verizon Wireless sale, as well as proceeds of prior PCS spectrum license sales to Cingular Wireless, Verizon Wireless and MetroPCS, all creditors of the NextWave Telecom group were paid in full and the NTI equity holders received an aggregate cash distribution of approximately \$2.6 billion. In addition, the plan provided for the capitalization and distribution to the NTI equity holders of a new wireless technology company that would bear the NextWave name. Pursuant to the plan, on April 13, 2005, the NextWave Telecom group abandoned substantially all of its PCS assets other than the spectrum licenses, all remaining non-PCS assets and liabilities were contributed to Old NextWave Wireless, and Old NextWave Wireless was capitalized with \$550 million in cash. Immediately thereafter, membership interests in our company were distributed to the NTI equity holders. Through this process, Old NextWave Wireless was reconstituted as a company with a new capitalization and a new wireless technology business plan.

Unless the context indicates otherwise, all references in this registration statement to NextWave, the Company, we, us and our refer to NextWave Wireless Inc. and its direct and indirect subsidiaries after giving effect to the corporate conversion merger. References to Old NextWave Wireless refer to our existence as a company conducting a separate line of business prior to April 13, 2005.

Since our emergence as a new wireless technology company, we have made several strategic investments and acquisitions, most significantly the acquisition of PacketVideo Corporation, a developer of embedded multimedia software products for mobile phones. We have also consummated transactions to acquire licensed spectrum rights and have accumulated a spectrum footprint across the U.S. covering a population of over 206 million people, or POPs.

To enable our planned listing on The Nasdaq Global Market, NextWave Wireless LLC’s board of managers and a majority in interest of NextWave Wireless LLC’s members have approved the conversion of the Company from a Delaware limited liability company to a Delaware corporation. The corporate conversion will be effected through the merger of a wholly-owned subsidiary of ours with and into NextWave Wireless LLC. We expect to effectuate the corporate conversion merger prior to our planned listing on Nasdaq. In the merger, NextWave Wireless LLC’s equity holders will receive a number of shares of our common stock based on an exchange ratio to be determined by the Board of Managers of NextWave Wireless LLC. Each holder of NextWave Wireless LLC’s limited liability interests will own the same percentage of the outstanding equity of the Company before and immediately after giving effect to the corporate conversion merger. We are filing this registration statement on Form S-4 to register the issuance of our shares of common stock in the corporate conversion merger.

The organizational chart below provides a summary depiction of our structure after giving effect to the reorganization, our organizational activities and acquisitions and the corporate conversion merger. For more information on the history of our company see “Business-Our History.”

This registration statement contains certain technical terms relating to the wireless industry. For an explanation of such technical terms, see “Glossary of Selected Wireless Terminology” beginning on page 100.

An investment in our securities involves risks. See “Risk Factors” beginning on page 12.

“NextWave Wireless”, “PacketVideo”, “CYGNUS Communications”, “IBridge” and the NextWave, CYGNUS and PacketVideo logos are our trademarks. Other service marks, trademarks and trade names referred to in this registration statement are the property of their respective owners. As indicated in this registration statement, we have included market data and industry information and forecasts that were obtained from industry publications.

INDUSTRY AND MARKET DATA

In this registration statement, we rely on and refer to information regarding market data obtained from internal surveys, market research, publicly available information and industry publications. Unless otherwise noted, data relating to persons of population, or POPs, is derived from information provided by Applied Geographic Solutions Inc. Industry publications, surveys and forecasts generally state that the information contained therein has been obtained from sources believed to be reliable, but there can be no assurance as to the accuracy or completeness of included information. Although we believe the information is reliable, we cannot guarantee the accuracy or completeness of the information and have not independently verified it.

SPECIAL NOTE REGARDING FORWARD LOOKING STATEMENTS

This registration statement and other reports, documents and materials we will file with the Securities and Exchange Commission (the "SEC") contain, or will contain, disclosures that are forward-looking statements that are subject to risks and uncertainties. All statements other than statements of historical facts are forward-looking statements. These statements, which represent our expectations or beliefs concerning various future events, may contain words such as "may," "will," "expects," "anticipates," "intends," "plans," "believes," "estimates," or other words of similar meaning in connection with any discussion of the timing and value of future results or future performance. These forward-looking statements are based on the current plans and expectations of our management and are subject to certain risks, uncertainties (some of which are beyond our control) and assumptions that could cause actual results to differ materially from historical results or those anticipated. These risks include, but are not limited to:

- our limited relevant operating history;
- our ability to manage growth or integrate recent or future acquisitions;
- competition from alternative wireless technologies and other technology companies;
- our ability to develop and commercialize mobile broadband products and technologies;
- the ability of vendors to manufacture commercial WiMAX equipment and devices;
- consumer acceptance of WiMAX technology;
- the success of our WiMAX network launch in Henderson, Nevada;
- our ability to enter into and maintain network partner relationships;
- PacketVideo's reliance on a limited number of mobile phone and device manufacturers and wireless carriers as customers;
- changes in government regulations;
- changes in capital requirements;
- any loss of our key executive officers; and
- the other risks described under "Risk Factors."

There may also be other factors that cause our actual results to differ materially from the forward looking statements.

Because of these factors, we caution you that you should not place any undue reliance on any of our forward-looking statements. These forward-looking statements speak only as of the date of this registration statement and you should understand that those statements are not guarantees of future performance or results. New risks and uncertainties arise from time to time, and it is impossible for us to predict those events or how they may affect us. Except as required by law, we have no duty to, and do not intend to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

PROSPECTUS SUMMARY

This summary highlights key aspects of our business that are described in more detail elsewhere in this registration statement. This summary does not contain all of the information that you should consider before making a future investment decision with respect to our securities. You should read this entire registration statement carefully, including the “Risk Factors”, the combined audited financial statements and the notes thereto included elsewhere in this registration statement.

Business Overview

We are an early-stage wireless technology company engaged in the development of next-generation mobile broadband and wireless multimedia products, technologies and services. We believe that mobile broadband represents the next logical step in the evolution of the Internet and that demand for mobile broadband will transform the global \$500 billion wireless communications industry from one driven primarily by voice to one driven by broadband connectivity. We expect that mobile WiMAX, a wireless broadband system utilizing a cellular architecture to deliver fully mobile and high quality fixed voice and data services, will play a major role in enabling the widespread delivery of mobile broadband services. We intend to focus our business activities on developing WiMAX certified products and other technologies to extend the broadband experience beyond the home or office and allow people to remain connected to the information and content they need wherever they go.

We have organized our product, technology and service development activities into three major initiatives:

WiMAX Technology Development. Led by the Advanced Technology Group, a part of our NextWave Broadband subsidiary, we are developing WiMAX certified chipsets, base station components and terminal device reference designs to enable integrated local communications networks (commonly called local area networks, or LANs) and geographically dispersed communications networks (commonly called wide area networks, or WANs) wireless broadband solutions. A key design objective of our products and technologies is to improve the ability of mobile WiMAX to cost effectively handle the large volume of network traffic that we believe Voice Over Internet Protocol (“VoIP”) telephony and next-generation wireless multimedia applications such as high resolution streaming video will generate. By enabling mobile WiMAX networks to simultaneously operate over multiple frequency bands, and by implementing a layered network architecture, we expect that our product line will significantly improve the performance and economics of fixed and mobile WiMAX networks. We intend to sell and/or license our WiMAX certified products and technologies to network infrastructure and device manufacturers and network operators worldwide.

Mobile WiMAX Network Solutions. To stimulate demand for our products, we have accumulated a spectrum footprint across the U.S. covering a population of over 206 million people, or POPs. Led by the Network Solutions Group, which operates within our NextWave Broadband subsidiary, we intend to work with network partners who are interested in funding the deployment of shared mobile WiMAX networks that operate on our licensed spectrum and utilize network and device equipment which incorporate our products and technologies. Potential network partners include wireless service providers, cable operators, Internet service providers, and content distributors. To demonstrate the features and capabilities of our network solutions, we are currently building a 28 site mobile WiMAX trial network in Henderson, Nevada.

Wireless Multimedia Software. Through our PacketVideo subsidiary, we intend to be a leading provider of the next generation of device embedded multimedia software needed to enable the efficient capture, transmission and manipulation of multimedia content by fourth generation (4G) broadband-enabled mobile devices. At present, PacketVideo is a global provider of embedded multimedia software for mobile phones. PacketVideo licenses its multimedia software to some of the largest wireless handset manufacturers and wireless carriers in the world, who use it to transform a mobile phone into a feature-rich multimedia device that provides people with the ability to stream,

download and play video and music, receive live TV broadcasts and engage in two-way video telephony. We also expect that global deployments of mobile broadband networks will create a unique opportunity for software developers such as PacketVideo to create innovative multimedia software applications optimized for the mobile environment.

We believe the combination of our products and technologies, our device embedded multimedia software products, and our spectrum assets represent a unique platform to provide advanced wireless broadband solutions to the market.

Competitive Strengths

A highly accomplished team of wireless technology professionals. Our technology development efforts are led by a team of highly skilled senior engineers with an average of 19 years experience in the development of wireless communications technologies and solutions. Team members have led major development initiatives at leading technology companies, such as Intel, Motorola, Nokia, QUALCOMM and Texas Instruments. Together they have been instrumental in developing some of today's dominant wireless technologies. Several members of our team, including our Chief Executive Officer, Allen Salmasi, played key roles at QUALCOMM in the development and successful commercialization of the CDMA wireless technology standard used worldwide today. In addition, our senior team has extensive experience in building and operating wireless networks for companies such as Airtouch, AT&T Wireless, McCaw Cellular, Nextel and SprintPCS.

Significant capital resources. As of July 1, 2006, we had \$340.4 million of cash, cash equivalents and short-term investments. While we anticipate that the costs of our research and development activities will increase as we approach the commercial deployment of our wireless broadband products and technologies, we believe our working capital position provides us with significant flexibility to continue funding our research and development activities and our operating losses. In addition, we have recently completed a private placement of senior secured notes that has provided us with net cash proceeds of \$295.1 million available for the sole purpose of financing spectrum acquisitions and leases. After giving effect to our recent acquisition of WCS Wireless, Inc. for \$160.5 million and the acquisition of two new EBS leases for \$22.1 million, the remaining net proceeds of the senior secured notes are approximately \$110.0 million. The purchasers were investment funds and other institutional investors, including affiliates of Avenue Capital Group, among others. Robert T. Symington, a member of our Board of Managers, is a Portfolio Manager at Avenue Capital Group. Neither Mr. Symington nor Avenue Capital Group or its affiliates received any compensation in connection with the financing. Concurrently with the notes placement, we paid a \$142.8 million deposit to the Federal Communication Commission to qualify for the Advanced Wireless Spectrum auction, of which \$110.0 million was funded with the remaining proceeds of the notes placement. Amounts not used to purchase spectrum in the auction will be returned to us after the auction is completed. To the extent that other attractive opportunities to acquire complimentary businesses or additional spectrum arise, we may need to raise additional funds to capitalize on such opportunities.

Attractive wireless spectrum portfolio, well-suited to support mobile WiMAX. To date, we have acquired licensed spectrum and entered into long-term leases that provide us with exclusive leasehold access to licensed spectrum throughout the U.S. We have compiled a spectrum portfolio covering approximately 206 million persons, or POPs, across the country, with 10MHz or more of spectrum in markets covering 182 million persons. We believe that our spectrum footprint, which will include nine of the top ten and 15 of the top 20 markets in the U.S., makes us attractive to potential network partners. Our spectrum resides in the 2.3GHz and 2.5GHz bands and offers propagation and other characteristics suitable for use with mobile WiMAX.

Acquisitions and Strategic Investments

Since our emergence as a wireless technology company, we have completed several acquisitions and strategic investments, including the acquisition of PacketVideo Corporation for \$46.6 million in July 2005, and transactions to acquire licensed spectrum rights, including subsequent lease obligations for amounts totaling \$261.7 million, including our recent acquisition of WCS Wireless Inc., which holds spectrum covering 188.8 million persons, or POPs, in the Central, Western, and Northeastern United States, for \$160.5 million. Our recent acquisitions and investments are described in this registration statement in greater detail under the heading "Business - Our History".

At the time of our emergence on April 13, 2005, we had cash and investment balances of \$555.1 million. As of July 1, 2006, our cash and investment balances were \$340.4 million, reflecting the use of \$101.2 million for the acquisition of wireless spectrum licenses and subsequent lease obligations, \$57.3 million for business acquisitions and a joint venture investment, \$14.4 million for the acquisition of property and equipment, and \$40.3 million primarily for operating activities, including research and development costs. As noted above, on July 17, 2006, we issued senior secured notes due 2010 in the aggregate principal amount of \$350.0 million. The notes were issued at a fifteen percent (15%) original issue discount, resulting in gross proceeds of \$297.5 million. We will be obligated to pay the secured notes at their full face value of \$350.0 million, and the original issue discount will provide the note purchasers with a yield that is in addition to the coupon rate upon repayment of the notes. In connection with the notes placement, NextWave Wireless Inc. agreed to issue warrants, at an exercise price of \$0.01, to purchase an aggregate of 5% of the outstanding shares of common stock of NextWave Wireless Inc. as of the date of the corporate conversion merger and before giving effect to the exercise of any warrant. The notes placement provided us with net cash proceeds of \$295.1 million available for the sole purpose of financing spectrum acquisitions and leases, including our recent acquisition of WCS Wireless Inc. for \$160.5 million. In addition, concurrently with the notes placement, we paid a \$142.8 million deposit to the Federal Communication Commission to qualify for the AWS auction, of which \$110.0 million was funded with the remaining proceeds of the notes placement. Amounts not used to purchase spectrum in the auction will be returned to us after the auction is completed.

Risks Affecting Us

We are an early stage company that recently emerged from Chapter 11 with a new wireless technology business plan and have limited relevant operating history. With the exception of our PacketVideo subsidiary, we have never generated any material revenues and have limited commercial operations. We operate in an extremely competitive environment. If WiMAX technology fails to gain acceptance, we will not be successful in selling WiMAX products and technologies. Our wireless broadband products and technologies are in the early stages of development and will require a substantial investment before they may become commercially viable. We are currently unable to project when our wireless broadband products and technologies will be commercially deployed and generate revenue. We have made numerous acquisitions and investments since our emergence. We must successfully manage our growth and integrate these recent and any future acquisitions and investments. We are subject to a number of other risks of which you should be aware before making a future investment decision with respect to our securities. These risks are discussed more fully under the heading "Risk Factors."

Summary Historical Financial Data

You should read the following summary historical financial data together with the information under "Management's Discussion and Analysis of Financial Condition and Results of Operations," our unaudited condensed consolidated financial statements and our audited consolidated financial statements and the notes to those financial statements included elsewhere in this registration statement.

Set forth below is summary historical financial data, at the dates and for the periods indicated, for NextWave Wireless LLC, which holds all of our operating subsidiaries and will be an indirect subsidiary of NextWave Wireless Inc. following the corporate conversion merger. This prospectus does not include financial statements of NextWave Wireless Inc. because it has only been formed recently for the purpose of effecting the corporate conversion merger, will hold no material assets and will not engage in any operations.

The following summary consolidated statement of operations data for the three and six months ended July 1, 2006 and for the period from the date of our inception as a new wireless technology company pursuant to the plan of reorganization of Old NextWave Wireless (April 13, 2005) to June 30, 2005, and the summary consolidated balance sheet data as of July 1, 2006 was derived from our unaudited condensed consolidated financial statements and should be read in conjunction with our unaudited condensed consolidated financial statements and Management's Discussion

and Analysis of Financial Condition and Results of Operations included elsewhere in this registration statement. Our unaudited condensed consolidated financial statements have been prepared on the same basis as the audited consolidated financial statements and notes thereto, which include, in the opinion of our management, all adjustments (consisting of normal recurring adjustments), necessary for a fair presentation of the information for the unaudited interim period. Our historical results for any prior or interim period are not necessarily indicative of results to be expected for a full fiscal year or for any future period.

The following summary consolidated statement of operations data for the period from the date of our inception (April 13, 2005) to December 31, 2005 and summary consolidated balance sheet data as of December 31, 2005 was derived from our audited consolidated financial statements and should be read in conjunction with our audited consolidated financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this registration statement.

- (1) Our Board of Managers approved a change, effective January 1, 2006, in our fiscal year end and quarterly reporting periods from quarterly calendar periods ending on December 31 to a 52-53 week fiscal year ending on the Saturday nearest to December 31 of the current calendar year or the following calendar year. The three and six month periods ended July 1, 2006 includes 13 and 26 weeks, respectively.
- (2) On April 13, 2005, pursuant to the plan of reorganization of the NextWave Telecom group, the equity securities of NextWave Wireless LLC were distributed to the NTI equity holders and we were reconstituted as a company with a new capitalization and a new wireless technology business plan. A summary of the assets and liabilities contributed to NextWave on April 13, 2005 is provided in the Notes to Consolidated Financial Statements included elsewhere in this registration statement. For more information on our emergence as a new wireless technology company, see "Business-Our History."
- (3) The results of operations of PacketVideo Corporation and Inquam Broadband Holding, Inc. are included as of July 19, 2005 and January 6, 2006, the respective dates of the acquisitions, which affects the comparability of the Summary Historical Financial Data. During 2006, we also completed other acquisitions that were not material and their results of operations have been included from their respective dates of acquisition. See Note 3 to the Notes to Condensed Consolidated Financial Statements included elsewhere in this registration statement.
- (4) On July 17, 2006, we consummated our secured notes private placement, the terms of which require us to retain \$75.0 million of our cash, cash equivalents and investments from funds other than the proceeds of the notes in a restricted collateral account.

Corporate Conversion Merger

To enable our planned listing on The Nasdaq Global Market, NextWave Wireless LLC's board of managers and a majority in interest of NextWave Wireless LLC's members has approved the conversion of the Company from a Delaware limited liability company to a Delaware corporation. The corporate conversion will be effected through the merger of a wholly owned subsidiary of ours with and into NextWave Wireless LLC. We expect to effectuate the corporate conversion merger prior to our planned listing on Nasdaq. In the merger, NextWave Wireless LLC's equity holders will receive a number of shares of our common stock based on an exchange ratio to be determined by the Board of Managers of NextWave Wireless LLC. Each holder of NextWave Wireless LLC's limited liability interests will own the same percentage of the outstanding equity of the Company before and immediately after giving effect to the corporate conversion merger. In addition, we will assume NextWave Wireless LLC's obligations under all stock option plans of the Company and its subsidiaries.

Material U.S. Federal Income Tax Consequences of the Corporate Conversion Merger

The following discussion sets forth the material U.S. federal income tax consequences of the corporate conversion merger to NextWave Wireless LLC and the United States Holders (as defined below) of LLC interests. The discussion is based on the Internal Revenue Code of 1986, as amended (the “Tax Code”), Treasury regulations promulgated and proposed thereunder, judicial decisions and published administrative rules and pronouncements of the Internal Revenue Service (the “Service”), all as in effect on the date hereof. Changes in these authorities or new interpretations thereof may have retroactive effect and could significantly affect the federal income tax consequences described below. You should be aware that NextWave Wireless LLC has not requested a ruling from the Service and that no published guidance has been issued with respect to the tax treatment of partnership transactions precisely in the form of the corporate conversion merger. Accordingly, the Service might take a view of the tax consequences of the corporate conversion merger that is contrary to that set forth below.

This discussion does not address all of the federal income tax consequences of the corporate conversion merger that may be applicable to you in light of your particular circumstances or that may be applicable to you if you are subject to special treatment under the Tax Code (such as persons who acquired their interests in compensatory transactions, banks, broker-dealers, insurance companies, other financial institutions, tax-exempt organizations, holders subject to the alternative minimum tax provisions of the Tax Code, holders who hold their LLC interests as part of a hedge, straddle, constructive sale or conversion transaction, persons who are not residents of the United States, foreign corporations or investors in pass-through entities). In addition, the estate, gift, state, local and foreign tax consequences of the corporate conversion merger are not discussed. Further, the discussion is addressed to existing holders of LLC interests that have held their interests as capital assets (*i.e.*, generally as investments).

As used in this section, the term “United States Holder” means a beneficial owner of LLC interests who is a citizen or resident of the United States, a U.S. domestic corporation, any estate the income of which is subject to federal income tax regardless of the source of its income or any trust if (i) a court within the United States is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust or (ii) the trust has a valid election in effect under applicable Treasury regulations to be treated as a “United States person”. If a partnership or other entity taxable as a partnership is a beneficial owner of LLC interests, the federal income tax treatment of a partner will generally depend on the status of the partner and upon the activities of the partnership. Partners in partnerships holding LLC interests should consult their tax advisors.

General

Based upon representations contained in a representation letters provided by NextWave Wireless LLC and NextWave Wireless, Inc. and on certain customary factual assumptions, the corporate conversion merger will be a tax-free incorporation under Section 351 of the Tax Code.

Prior to the corporate conversion merger, holders of LLC interests were taxable on their pro-rata share of the income, gains, losses and deductions of NextWave Wireless LLC -- whether or not distributed -- computed without taking into account any of the income, gains, losses or deductions of NextWave Broadband, Inc. and its subsidiaries. As a result of the corporate conversion merger, holders will cease being partners in a partnership (NextWave Wireless LLC) for federal income tax purposes and become shareholders in a corporation (NextWave Wireless, Inc.). Accordingly, as a shareholder, you will only be taxed on our actual distributions, if any (*e.g.*, distributions to the extent of our earnings and profits for federal income tax purposes will be taxable as dividends).

As a result of the corporate conversion merger, unlike NextWave Wireless LLC, we will be subject to federal income tax. Such tax will be based upon the earnings of us and all of our domestic subsidiaries, as we will be the “common parent” of a consolidated group filing a consolidated federal income tax return.

Holders of LLC Interests

By reason of the corporate conversion merger qualifying under Section 351 of the Tax Code, holders of LLC interests will not recognize gain or loss in the corporate conversion merger as a result of their deemed contribution of LLC interests to NextWave Wireless, Inc. in exchange for common stock of NextWave Wireless, Inc., except to the extent of any cash received in lieu of a fractional share of NextWave Wireless, Inc. common stock.

The tax basis of the stock of NextWave Wireless, Inc. received by you (including any fractional share that you are deemed to receive and exchange for cash) will equal the tax basis in your Company interest exchanged therefore less your pro-rata share of the Company's liabilities assumed by NextWave Wireless, Inc. Likewise, your holding period in your NextWave Wireless, Inc. common stock received in the corporate conversion merger should include your holding period in the Company interest surrendered.

Cash in lieu of Fractional Shares

You will recognize capital gain or loss on any cash received in lieu of a fractional share of NextWave Wireless, Inc.'s common stock equal to the difference between the amount of cash received and the basis allocated to such fractional share. That capital gain or loss should constitute long-term capital gain or loss if your holding period in the LLC interests surrendered in the corporate conversion merger is greater than 12 months as of the date of the corporate conversion merger.

Reporting Requirements

You will be required to retain records pertaining to the corporate conversion merger and to file with your federal income tax return for the year in which the corporate conversion merger occurs a statement setting forth certain facts relating to the corporate conversion merger.

Holders of Warrants

Persons holding unexercised warrants to acquire LLC interests (not including options granted under NextWave Wireless LLC's 2005 Unit Plan) will recognize gain or loss in the corporate conversion merger equal to the difference between the fair market value of the warrants to acquire common stock of NextWave Wireless, Inc. on the date of the corporate conversion merger and their tax basis in NextWave Wireless LLC's warrants. The tax basis in the warrants to acquire common stock in NextWave Wireless, Inc. received in the corporate conversion merger will equal such warrants' fair market value as of the date of the corporate conversion merger and the holding period in such warrants will begin on the day following the date of the corporate conversion merger.

NextWave Wireless, Inc. and NextWave Wireless LLC

Neither NextWave Wireless, Inc. nor NextWave Wireless LLC will recognize gain or loss as a result of the corporate conversion merger.

Our basis in the assets received in the corporate conversion merger will equal the aggregate of the Holders' bases in their LLC interests prior to the corporate conversion merger, allocated among such assets in accordance with the provisions of the Tax Code.

This discussion of the material federal income tax consequences does not address the tax consequences that may vary with, or are contingent upon, the individual circumstances of each holder of LLC interests. Accordingly, it is recommended that you consult your own tax advisors to determine the particular federal, state, local and other tax consequences to you of the corporate conversion merger.

Appraisal Rights

Pursuant to NextWave Wireless LLC's limited liability company agreement and Delaware law, holders of NextWave Wireless LLC's membership units are not entitled to appraisal rights.

Surrender of LLC Interest Certificates and Issuance of Shares of Common Stock

Following the effective time of the merger, we will cause a letter of transmittal to be mailed to all holders of NextWave Wireless LLC's membership interests containing instructions for surrendering their certificates. Certificates should not be surrendered until the letter of transmittal is received, fully completed and returned as instructed in the letter of transmittal. Your shares of NextWave Wireless Inc. will be issued to you in book-entry form, unless you provide a written request to the Company for certificated shares.

Capital Stock

Our authorized capital stock consists of 400,000,000 shares of common stock, par value \$0.001 per share and 25,000,000 shares of preferred stock, par value \$0.001 per share. The number of shares of our common stock to be outstanding immediately after the corporate conversion merger will depend on the exchange ratio to be determined by our Board of Managers.

As of September 12, 2006, NextWave Wireless LLC had 492,064,046 limited liability company interests ("LLC interests") outstanding held by approximately 1,400 holders of record. As of September 12, 2006, there were 77,166,317 LLC interests reserved for future issuance, of which 60,771,661 are granted and outstanding options and warrants and 16,394,656 are available for future option grants. NextWave Wireless LLC's authorized share capital is unlimited.

We have applied to have our common stock quoted on The Nasdaq Global Market under the ticker symbol "WAVE".

Our principal executive offices are located at 12670 High Bluff Drive, San Diego, California 92130, and our telephone number is (858) 480-3100. NextWave's website address is www.nextwave.com. Our website, and the information contained in the website, is not a part of this prospectus.

SELECTED FINANCIAL DATA

Set forth below is selected financial data, at the dates and for the periods indicated, for NextWave Wireless LLC, which holds all of our operating subsidiaries and will be an indirect subsidiary of NextWave Wireless Inc. following the corporate conversion merger. This prospectus does not include financial statements of NextWave Wireless Inc. because it has only been formed recently for the purpose of effecting the corporate conversion merger, will hold no material assets and will not engage in any operations.

The following selected consolidated statement of operations data for the three and six months ended July 1, 2006 and for the period from the date of our inception as a new wireless technology company pursuant to the plan of reorganization of Old NextWave Wireless described below (April 13, 2005) to June 30, 2005 and the selected consolidated balance sheet data as of July 1, 2006 was derived from our unaudited condensed consolidated financial statements and should be read in conjunction with our unaudited condensed consolidated financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this registration statement. Our unaudited condensed consolidated financial statements have been prepared on the same basis as the audited consolidated financial statements and notes thereto, which include, in the opinion of our management, all adjustments (consisting of normal recurring adjustments), necessary for a fair presentation of the information for the unaudited interim period. Our historical results for any prior or interim period are not necessarily indicative of results to be expected for a full fiscal year or for any future period

The following selected consolidated statement of operations data for the period from the date of our inception (April 13, 2005) to December 31, 2005 and selected consolidated balance sheet data as of December 31, 2005 was derived from our audited consolidated financial statements and should be read in conjunction with our audited consolidated financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this registration statement.

	Three Months Ended July 1, 2006⁽¹⁾	Inception (April 13, 2005) to June 30, 2005⁽²⁾	Six Months Ended July 1, 2006⁽¹⁾	Inception (April 13, 2005) to December 31, 2005
<i>(in thousands)</i>				
Consolidated Statement of Operations Data⁽³⁾:				
Revenues	\$ 8,331	\$ 148	\$ 14,004	\$ 4,144
Loss from operations	(23,795)	(6,137)	(41,146)	(55,687)
Net loss	(20,534)	(2,948)	(34,232)	(45,952)

	July 1, 2006	December 31, 2005
Consolidated Balance Sheet Data⁽³⁾:		
Cash, cash equivalents and investments ⁽⁴⁾	\$ 340,437	\$ 459,231
Wireless spectrum licenses, net	130,374	45,467
Goodwill	32,936	24,782
Other intangible assets, net	16,846	18,100
Total assets	557,815	579,774
Long-term obligations, less current portion	15,661	14,934
Total members' equity	511,127	539,364

- (1) Our Board of Managers approved a change, effective January 1, 2006, in our fiscal year end and quarterly reporting periods from quarterly calendar periods ending on December 31 to a 52-53 week fiscal year ending on the Saturday nearest to December 31 of the current calendar year or the following calendar year. The three and six month periods ended July 1, 2006 includes 13 and 26 weeks, respectively.
- (2) On April 13, 2005, pursuant to the plan of reorganization of the NextWave Telecom group, the equity securities of NextWave Wireless LLC were distributed to the NTI equity holders and we were reconstituted as a company with a new capitalization and a new wireless technology business plan. A summary of the assets and liabilities contributed to NextWave on April 13, 2005 is provided in the Notes to Consolidated Financial Statements included elsewhere in this registration statement. For more information on our emergence as a new wireless technology company, see “Business-Our History.”

- (3) The results of operations of PacketVideo Corporation and Inquam Broadband Holding, Inc. are included as of July 19, 2005 and January 6, 2006, the respective dates of the acquisitions, which affects the comparability of the Selected Financial Data. During 2006, we also completed other acquisitions that were not material and their results of operations have been included from their respective dates of acquisition. See Note 3 to the Notes to Condensed Consolidated Financial Statements included elsewhere in this registration statement.
- (4) On July 17, 2006, we consummated our secured notes private placement, the terms of which require us to retain \$75.0 million of our cash, cash equivalents and investments from funds other than the proceeds of the notes in a restricted collateral account.

MARKET PRICE AND DIVIDEND INFORMATION

Holders

Our authorized capital stock consists of 400,000,000 shares of common stock, par value \$0.001 per share and 25,000,000 shares of preferred stock, par value \$0.001 per share. The number of shares of our common stock to be outstanding immediately after the corporate conversion merger will depend on the exchange ratio to be determined by our Board of Managers. In addition, following our corporate conversion, shares of our common stock may become issuable pursuant to the CYGNUS Plan and the PacketVideo Corporation 2005 Equity Incentive Plan.

As of September 12, 2006, NextWave Wireless LLC had approximately 1,400 record holders of its LLC interests. This number does not include the number of persons whose LLC interests are held in nominee or in “street name” accounts through brokers. As of such date, 492,064,046 LLC interests were issued and outstanding, and an additional 77,166,317 LLC interests were reserved for future issuance, of which 3,000,000 and 57,771,661 are granted and outstanding warrants and options, respectively, and 16,394,656 are available for future option grants.

Historical Market Price Data

NextWave Wireless LLC’s membership interests are not listed for trading on any securities exchange. Our common stock is not listed for trading on any securities exchange, and we do not currently file reports with the SEC. Upon completion of the corporate conversion merger, it is anticipated that our common stock will be listed for trading on the Nasdaq Global Market and we will be an SEC reporting company.

Dividends

We have never paid any cash dividends on our equity securities. We anticipate that we will retain earnings, if any, to finance the growth and development of our business. Therefore, we do not expect to pay cash dividends on our equity securities for the foreseeable future. Any future determination to pay cash dividends will be at the discretion of our Board of Directors and will depend upon our financial condition, operating results, capital requirements and whatever other factors that our Board of Directors may deem relevant.

Shares Eligible for Future Sale

After the corporate conversion merger, an aggregate of shares of our common stock, or % of shares outstanding, will be freely tradable without restriction in the public market unless the shares are held by “affiliates,” as that term is defined in Rule 144(a)(1) under the Securities Act of 1933, as amended (the “Securities Act”). For purposes of Rule 144, an “affiliate” of an issuer is a person that, directly or indirectly through one or more intermediaries, controls, or is controlled by or is under common control with, the issuer.

The remaining shares of common stock outstanding will be “restricted securities” under the Securities Act of 1933 and may be sold in the public market upon the expiration of the holding periods under Rule 144, described below, subject to the volume, manner of sale and other limitations of Rule 144, as applicable.

In general, under Rule 144 as currently in effect, a person who has beneficially owned shares for at least one year, including an “affiliate,” is entitled to sell, within any three-month period, a number of shares that does not exceed the greater of:

1% of the then outstanding shares of common stock; or

the average weekly trading volume during the four calendar weeks preceding filing of notice of the sale of shares of common stock.

Sales under Rule 144 are also subject to certain manner of sale provisions, notice requirements and the availability of current public information about the Company. A stockholder who is deemed not to have been an “affiliate” of the Company at any time during the 90 days preceding a sale, and who has beneficially owned restricted shares for at least two years, would be entitled to sell shares under Rule 144(k) without regard to the volume limitations, manner of sale provisions or public information requirements.

RISK FACTORS

Our business involves a high degree of risk. You should carefully consider the following risks together with all of the other information contained in this registration statement before making a future investment decision with respect to our securities. If any of the following risks actually occurs, our business, financial condition and results of operations could be materially adversely affected, and the value of our securities could decline.

Risks Relating to Our Business

We are an early-stage company and have limited relevant operating history and history of losses.

We emerged from our reorganization in April 2005 with a new business plan and have made several recent acquisitions and investments. As a result, we are at an early stage of our development and have had a limited relevant operating history and, consequently, limited historical financial information. Other than through our PacketVideo business, which we acquired in July 2005, we have never generated any material revenues and have limited commercial operations. We are currently unable to project when our wireless broadband products and technologies will be commercially deployed and generate revenue. In addition, we, along with the companies we have acquired, have a history of losses. Other than our PacketVideo business, we will not have the benefit of any meaningful operations, and we will incur significant expenses in advance of generating significant revenues, particularly from our WiMAX products and network solutions, and are expected to realize significant operating losses for the next few years. We are therefore subject to all risks typically associated with a start-up entity.

We are in the early stages of the implementation of our business plan. If we are not able to successfully implement all key aspects of our business plan, including licensing, developing and deploying the technologies required to provide WiMAX services to network operators, we may not be able to provide the type and quality of services required to achieve our business objectives. In addition, we may not be able to develop a customer base sufficient to generate adequate revenues. If we are unable to successfully implement our business plan and grow our business, either as a result of the risks identified in this section or for any other reason, we may never achieve profitability, in which event our business would fail.

If we fail to effectively manage growth in our business, our ability to develop and commercialize our products will be adversely affected.

Our business and operations have expanded rapidly since the completion of our reorganization in April 2005. For example, from April 13, 2005 through September 13, 2006, the number of our employees has increased from 50 to 424 as a result of organic growth and acquisitions. We acquired PacketVideo in July 2005 and CYGNUS Communications in February 2006 and we are still in the process of integrating these businesses. To support our expanded research and development activities for our mobile WiMAX business and the growth in our PacketVideo business, we must continue to successfully hire, train, motivate and retain our employees. We expect that significant further expansion of our operations and employee base will be necessary. In addition, in order to manage our expanded operations, we will need to continue to expand our management, operational and financial controls and our reporting systems and procedures. We will also need to retain management, key employees and business partners of PacketVideo and CYGNUS. All of these measures will require significant expenditures and will demand the attention of management. Failure to fulfill any of the foregoing requirements could result in our failure to successfully manage our intended growth and development, and successfully integrate PacketVideo and CYGNUS, which would adversely affect our ability to develop and commercialize our products and achieve profitability.

We operate in an extremely competitive environment which could materially adversely affect our ability to win market acceptance of our products and achieve profitability.

We operate in an extremely competitive market and we expect such competition to increase in the future. Set forth below is a brief description of the competitive environment for each of our divisions and PacketVideo:

Advanced Technology Group - As providers of mobile WiMAX product and technologies, we will be competing with well established, international companies that are engaged in the development, manufacture and sale of products and technologies that support alternative wireless standards such as GSM, CDMA2000 and UMTS. Companies that support these alternative wireless technologies include well established industry leaders such as Alcatel, Ericsson, Huawei, LGE, Lucent, Motorola, Nokia, Nortel, QUALCOMM, Samsung and Siemens.

In addition, we will be competing with numerous companies that are currently developing or marketing WiMAX products and technologies including Beceem, Fujitsu, Intel, Motorola, Nortel, RunCom, Samsung, Sequans and WaveSat. Some of these companies have significantly greater financial, technical development, and marketing resources than we do, are already marketing commercial WiMAX semiconductor products, and have established a significant time to market advantage. These companies are also our potential customers and partners and may not be available to us if they develop competing products. In addition, we expect additional competition to emerge in the WiMAX semiconductor and components market including well-established companies such as Samsung and Broadcom.

Network Solutions Group - The mobile WiMAX networks that we intend to build in partnership with service providers will be designed to provide end-user services that directly compete with some of the largest incumbent wireless operators in the world. These operators have already achieved high levels of market penetration, have established broad product and service distribution networks, and have developed high levels of brand recognition. Our shared network partners will also have to compete with commercial 802.11 Wi-Fi networks as well the growing number of municipal wireless broadband networks being sponsored by some major cities across the country such as San Francisco and Philadelphia. These municipal networks, which are often based on the popular 802.11 Wi-Fi standard, are expected to offer individuals with low-cost, nomadic Internet access that would compete with the fully mobile wireless broadband services our networks are intended to provide. Finally, our shared network partners may need to compete against emerging wireless multimedia broadcast networks such as Crown Castle's Modeo and QUALCOMM's Media Flow networks.

In addition, a growing number of incumbent wireless network operators, such as Sprint Nextel, are developing MVNO business relationships with service provider companies such as Internet service providers and cable operators. These pre-existing MVNO relationships could prevent some of these service provider companies from entering into shared network arrangements.

PacketVideo - At present, the primary competitors for PacketVideo's multimedia software products are the internal multimedia design teams at the OEM handset manufacturers to whom PacketVideo markets its products and services. Importantly, these OEMs represent some of PacketVideo's largest customers. In addition several companies, including Flextronics/Emuzed, Hantro, Nextreaming, Philips Software, Sasken and Thin Multimedia also currently provide software products and services that directly or indirectly compete with PacketVideo. As the market for embedded multimedia software evolves, we anticipate that additional competitors may emerge including Apple Computer, Real Networks and OpenWave.

Some of our competitors have significantly greater financial, technological development, marketing and other resources than we do, are already marketing commercial products and technologies and have established a significant time to market advantage. Our ability to generate earnings will depend, in part, upon our ability to effectively compete with these competitors.

We intend to expand our business through additional acquisitions that could result in diversion of resources and extra expenses, which could disrupt our business and increase our expenses.

Part of our strategy is to pursue acquisitions of and investments in businesses and technologies to expand our business and enhance our technology development capabilities. In addition to our CYGNUS and PacketVideo acquisitions, we have made investments in a number of companies including Hughes Systique and Inquam Broadband. The negotiation of potential acquisitions and investments, as well as the integration of acquired businesses or technologies, could divert our management's time and resources. Acquired businesses and technologies may not be successfully integrated with our products and operations. In addition, our investments, particularly minority investments, may not give us access to new technologies or provide us with business relationships with the other company. We may not realize the intended benefit of any acquisition or investment. Our acquisitions could result in substantial cash expenditures, potentially dilutive issuances of equity securities, the incurrence of debt and contingent liabilities, a decrease in our

profit margins and amortization of intangibles and potential impairment of goodwill. In addition, our investments could result in substantial cash expenditures, fluctuations in our results of operations resulting from changes in the value of the investments and diversion of management's time and attention. If acquisitions disrupt our operations or if our investments are not successful, our business, financial condition and results of operations may suffer.

If WiMAX technology fails to gain acceptance, we will not be successful in selling WiMAX products and technologies.

Our business plan is reliant on the deployment and market acceptance of mobile WiMAX networks and WiMAX enabled handsets and devices. WiMAX and the market for WiMAX networks and services have only recently begun to develop and is continuing to evolve. We plan to generate most of our revenue from the sale of WiMAX products and the licensing of mobile WiMAX broadband technologies. There are currently no mobile WiMAX networks in commercial operation and there can be no assurance that commercial mobile WiMAX networks will prove to be commercially viable. Mobile WiMAX will compete with several third generation (3G) and fourth generation (4G) wireless air interface technologies that are currently being deployed or developed to enable the delivery of mobile broadband services to the market, including CDMA2000 and UMTS. In order for WiMAX to gain significant market acceptance among consumers, network operators and telecommunications service providers will need to deploy WiMAX networks. However, many of the largest wireless telecommunications providers have made significant expenditures in technologies that have the potential to be competitive with WiMAX and may choose to continue to develop these technologies rather than utilize WiMAX. Certification standards for WiMAX are controlled by the WiMAX Forum, an industry group. Accordingly, standard setting for WiMAX is beyond our control. If standards for WiMAX change, the commercial viability of mobile WiMAX may be delayed or impaired and our development efforts may also be delayed or impaired or become more costly. The development of mobile WiMAX networks is also dependent on the availability of spectrum. Access to spectrum suitable for mobile WiMAX is highly competitive. We currently contemplate using multiple frequencies for our mobile WiMAX networks. This multi-spectrum approach is technologically challenging and will require the development of new software, integrated circuits and equipment, which will be time consuming and expensive and may not be successful. In order for our business to continue to grow and to become profitable, mobile WiMAX technology and related services must gain acceptance among consumers, who tend to be less technically knowledgeable and more resistant to new technology or unfamiliar services. If consumers choose not to adopt mobile WiMAX technology, we will not be successful in selling WiMAX products and technologies and our ability to grow our business will be limited.

Our wireless broadband products and technologies are in the early stages of development and will require a substantial investment before they may become commercially viable.

Our wireless broadband products and technologies are in the early stages of development and will require a substantial investment before they may become commercially viable. We are currently unable to project when our wireless broadband products and technologies will be commercially deployed and generate revenue. While we intend to continue to make substantial investments in development for the foreseeable future, it is possible that our development efforts will not be successful and that our wireless broadband products and technologies will not result in meaningful revenues. In addition, unexpected expenses and delays in development could adversely affect our liquidity. Our wireless broadband products and technologies have not been tested, even on a pre-commercial basis. Even if our products and technologies function when tested, they may not produce sufficient performance and economic benefits to justify full commercial development efforts, or to ultimately attract customers. Failure to commercially deploy our wireless broadband products and technologies will adversely affect our ability to achieve profitability.

Our future WiMAX products may not receive the certification we expect, which may affect our ability to sell our WiMAX products and services.

If our mobile WiMAX technologies and products do not receive WiMAX industry certification, we may not be able to successfully market, license or sell our mobile WiMAX products or technologies. Our WiMAX-based products may not receive the necessary certification in the time frame we expect, or at all, and may therefore not achieve the wide acceptance that we are seeking. In addition, we expect industry standards for WiMAX to evolve and if we are not able to adapt our products and technologies to any such changes, our ability to license or sell our products and technologies would be impaired.

The launch of our WiMAX network in Henderson, Nevada may be delayed or may not be successful, which could harm our business.

We are in the process of building an 802.16e WiMAX compliant trial network in Henderson, Nevada. We expect this trial network to be operational in late 2006 and intend to utilize the network to showcase our advanced IP core network, next generation IP backhaul, NMS and back office system capabilities and to provide potential network partners an opportunity to evaluate the performance of mobile WiMAX technology. We plan to seek network partners to expand this network into a commercial mobile WiMAX network that will cover the greater Las Vegas metropolitan region and serve as a platform to support the initial deployment of our products. The trial network and the commercial network development may not be successful or may be delayed or more costly than anticipated. If either launch is delayed or not successful, the commercial roll-out of our wireless broadband technologies and products may be delayed, sales and licenses of our WiMAX network technologies and products may be harmed and our ability to attract a network partner could be adversely affected. In addition, we may need to dedicate substantial additional resources and management time and attention to the launch of the trial and commercial networks, which could limit or delay our ability to execute other aspects of our business plan.

The business plan of our Network Solutions Group is dependent on entering into or maintaining network partner relationships.

Our Network Solutions Group intends to build and operate WiMAX compliant networks in partnership with wireless service providers, cable operators, multimedia content distributors, applications service providers and Internet service providers. We have not entered into any of these strategic relationships to date and we may not be able to negotiate these relationships on acceptable terms, or at all. If we are unable to establish and maintain these strategic relationships, we may have to modify our plans for the Network Solutions Group and seek another source of value for our spectrum licenses.

The dependence of our Network Solutions Group on future strategic relationships is subject to a number of risks, including:

- the inability to control the amount and timing of resources that our strategic partners devote to their activities;
- the possibility that our strategic relationship partners could separately move forward with competing products and services developed either independently or with one of our competitors;
 - the possibility that our strategic relationship partners may experience financial or technical difficulties;
- business combinations or other changes in our strategic relationship partners business strategy may impact their willingness or ability to complete its obligations under any such relationship; and
- changes in regulations could negatively impact the business environment in which such strategic relationship partners operate.

We may require significant capital to implement our business plan, but we may not be able to obtain additional financing on favorable terms or at all.

While we estimate that our working capital will be sufficient to fund our research and development activities and our operating losses at least through 2007, we may need to secure significant additional capital in the future to implement changes to, or expansions of, our business plan and to become cash flow positive. We may also require additional cash resources to pursue investments or acquisitions, including investments in or acquisitions of other technologies, businesses or spectrum licenses. Sources of additional capital may include public or private debt and equity financings. In addition, we have recently completed a private placement of senior secured notes that has provided us with net cash proceeds of \$295.1 million available for the sole purpose of financing spectrum acquisitions and leases. After giving effect to our recent acquisition of WCS Wireless, Inc. for \$160.5 million and the acquisition of two new EBS leases for \$22.1 million, the remaining net proceeds of the senior secured notes are approximately \$110.0 million. Concurrently with the notes placement, we paid a \$142.8 million deposit to the Federal Communication Commission to qualify for the Advanced Wireless Spectrum auction, of which \$110.0 million was funded with the remaining proceeds of the notes placement. Amounts not used to purchase spectrum in the auction will be returned to us after the auction is completed. To the extent that other attractive opportunities to acquire complimentary businesses or additional spectrum arise, we may need to raise additional funds to capitalize on such opportunities.

Risks Related to Our PacketVideo Business.

Since our inception in April 2005, substantially all of our revenues have been generated by our PacketVideo subsidiary, which we acquired in July 2005, and we believe that PacketVideo will account for a substantial portion of our revenues until we complete the development and commercialization of our wireless broadband products and technologies. Our PacketVideo business is subject to a number of risks, including:

Reliance on a limited number of mobile phone and device manufacturers and wireless carriers. For the six months ended July 1, 2006, PacketVideo's sales to Verizon Wireless, Nokia and Mitsubishi accounted for 45%, 12% and 10%, respectively, of our revenues. For the period from our inception (April 13, 2005) through December 31, 2005 PacketVideo's sales to Verizon Wireless, Fujitsu and Nokia accounted for 22%, 14% and 11%, respectively, of our revenues. Aggregated accounts receivable from SEMC, Nokia and Alcatel accounted for 23%, 18% and 10%, respectively, of total gross accounts receivable at July 1, 2005. We expect that our PacketVideo subsidiary will continue to generate a significant portion of its revenues through a limited number of mobile phone and device manufacturers and wireless carriers for the foreseeable future, although these amounts may vary from period-to-period. If any of these customers decides not to embed PacketVideo software into their mobile phones and devices or otherwise reduces the amount of PacketVideo software they embed in their mobile phones or devices generally, our PacketVideo revenues and results of operations could be materially adversely affected.

Our agreements with mobile phone and device manufacturers are not exclusive and many contain no minimum purchase requirements. Accordingly, mobile phone and device manufacturers may effectively terminate these agreements by no longer embedding PacketVideo's software into their products. In addition, PacketVideo has indemnified these manufacturers from certain claims that PacketVideo's software infringes third-party intellectual property rights. Our carrier agreements are not exclusive and generally have a limited term of one or two years with evergreen, or automatic renewal, provisions upon expiration of the initial term. These agreements set out the terms of our distribution relationships with the carriers but generally do not obligate the carriers to market or distribute any of our applications. In addition, the carriers can terminate these agreements early, and in some instances, at any time, without cause.

Many factors outside our control could impair PacketVideo's ability to generate revenues from mobile phone and device manufacturers and wireless carriers, including the following:

- a preference for embedded software licensed by one of PacketVideo's competitors;

· competing applications;

- a decision to discontinue embedding our PacketVideo software, or mobile broadband embedded software altogether;
- a carrier's decision not to provide mobile broadband applications or content thereby reducing the need for PacketVideo's applications;

- a carrier's network encountering technical problems that disrupt the delivery of content for our applications;
- a manufacturer's decision to increase the cost of mobile phones and devices embedded with PacketVideo's software;
- a manufacturer's decision to reduce the price it is willing to pay for embedded software such as PacketVideo's; and
- consolidation among manufacturers or wireless carriers or the emergence of new manufacturers or wireless carriers that do not license PacketVideo software.

If wireless subscribers do not increase their use of their mobile phones to access multimedia content, our PacketVideo business may suffer. Our PacketVideo business is reliant on the continued and increased use of mobile phones to access multimedia content by consumers. The market for multimedia content delivery through mobile phones is relatively new. If the market does not continue to develop or develops more slowly than anticipated, mobile phone manufacturers may cease to embed PacketVideo's software in their handsets and wireless carriers may limit or stop the delivery of multimedia content and the demand for mobile phones with embedded multimedia software may decline. If this occurs, our PacketVideo business would be harmed and our revenues would decline.

If we fail to deliver our PacketVideo applications to correspond with the commercial introduction of new mobile phone models, our sales may suffer. PacketVideo's business is tied, in part, to the commercial introduction of new mobile phones with enhanced features. Many new mobile phone models are released in the final quarter of the year to coincide with the holiday shopping season. We cannot control the timing of these mobile phone launches. Our PacketVideo software must be modified for each new mobile phone model. If we are unable to release new versions of our PacketVideo software to coincide with these new mobile phone launches, our sales of our PacketVideo software may suffer. In addition, if new mobile phone launches are delayed or if we miss the key holiday selling season, our sales may suffer.

PacketVideo may experience difficulties in the introduction of new or enhanced products, which could result in reduced sales, unexpected expenses or delays in the launch of new or enhanced products. The development of new or enhanced embedded multimedia software products is a complex and uncertain process. We may experience design, manufacturing, marketing and other difficulties that could delay or prevent our development, introduction, commercialization or marketing of new products or product enhancements. The difficulties could result in reduced sales, unexpected expenses or delays in the launch of new or enhanced products, which may adversely affect our results or operations.

We do not have any manufacturing capabilities and will depend on third-party manufacturers and suppliers to manufacture, assemble and package our semiconductor products.

We are currently designing and developing semiconductor products including digital baseband ASICs and multi-band RFICs. If we are successful in our design and development activities and a market for these products develops, these products will need to be manufactured. Due to the expense and complexity associated with the manufacturer of digital baseband ASICs and multi-band RFICs, we intend to depend on third-party manufacturers to manufacture these products. The dependence on third-parties to manufacture, assemble and package these products involves a number of risks, including:

- a potential lack of capacity to meet demand;
- reduced control over quality and delivery schedules;
- risks of inadequate manufacturing yield or excessive costs;

difficulties in selecting and integrating subcontractors;

limited warranties in products supplied to us;

price increases; and

potential misappropriation of our intellectual property.

We may not be able to establish manufacturing relationships on reasonable terms or at all. The failure to establish these relationships on a timely basis and on attractive terms could delay our ability to launch these products or reduce our revenues and profitability.

Defects or errors in our products and services or in products made by our suppliers could harm our relations with our customers and expose us to liability. Similar problems related to the products of our customers or licensees could harm our business.

Our WiMAX products and technologies that we are developing will be inherently complex and may contain defects and errors that are detected only when the products are in use. Further, because our products and technologies that we are developing will be responsible for critical functions in our customers' products and/or networks, such defects or errors could have a serious impact on our customers, which could damage our reputation, harm our customer relationships and expose us to liability. Defects in our products and technologies or those used by our customers or licensees, equipment failures or other difficulties could adversely affect our ability and that of our customers and licensees to ship products on a timely basis as well as customer or licensee demand for our products. Any such shipment delays or declines in demand could reduce our revenues and harm our ability to achieve or sustain desired levels of profitability. We and our customers or licensees may also experience component or software failures or defects which could require significant product recalls, reworks and/or repairs which are not covered by warranty reserves and which could consume a substantial portion of the capacity of our third-party manufacturers or those of our customers or licensees. Resolving any defect or failure related issues could consume financial and/or engineering resources that could affect future product release schedules. Additionally, a defect or failure in our products and technologies that we are developing or the products of our customers or licensees could harm our reputation and/or adversely affect the growth of mobile WiMAX markets.

Because mobile WiMAX is an emerging technology that is not fully developed, there is a risk that still unknown persons or companies may assert proprietary rights to the various technology components that will be necessary to operate a WiMAX network.

As a technology company, we expect to incur expenditures to create and protect our intellectual property and, possibly, to assert infringement by others of our intellectual property. We also expect to incur expenditures to defend against claims by other persons asserting that the technology that will be used and sold by our Company infringes upon the right of such other persons. Because mobile WiMAX is an emerging technology that is not fully developed, there may be a greater risk that persons or entities unknown to us will assert proprietary rights to technology components that are necessary to operate WiMAX networks or products. More than 20 companies have submitted letters of assurance related to IEEE 802.16 and amendments stating that they may hold or control patents or patent applications, the use of which would be unavoidable to create a compliant implementation of either mandatory or optional portions of the standard. In such letters, the patent holder typically asserts that it is prepared to grant a license to its essential IP to an unrestricted number of applicants on a worldwide, non-discriminatory basis and on reasonable terms and conditions. If any companies asserting that they hold or control patents or patent applications necessary to implement mobile WiMAX do not submit letters of assurance, or state in such letters that they do not expect to grant licenses, this could have an adverse effect on the implementation of mobile WiMAX networks and the sale of our mobile WiMAX products and technologies. In addition, we can not be certain of the validity of the patents or patent applications asserted in the letters of assurance submitted to date, or the terms of any licenses which may be demanded by the holders of such patents or patent applications. If we were required to pay substantial license fees to

implement our mobile WiMAX products and technologies, this could adversely affect the profitability of these products and technologies.

18

As the number of competitors in our market increases and the functionality of our products is enhanced, we may become subject to claims of infringement or misappropriation of the intellectual property rights of others. Any claims, with or without merit, could be time consuming to address, result in costly litigation, divert the efforts of our technical and management personnel or cause product release or shipment delays, any of which could have a material adverse effect upon our ability to commercially launch our products and technologies and on our ability to achieve profitability. If any of our products were found to infringe on another company's intellectual property rights or if we were found to have misappropriated technology, we could be required to redesign our products or license such rights and/or pay damages or other compensation to such other company. If we were unable to redesign our products or license such intellectual property rights used in our products, we could be prohibited from making and selling such products. In any potential dispute involving other companies' patents or other intellectual property, our customers could also become the targets of litigation. Any such litigation could severely disrupt the business of our customers, which in turn could hurt our relations with our customers and cause our revenues to decrease.

We anticipate that we will develop a patent portfolio related to our WiMAX products and technologies. However, there is no assurance that we will be able to obtain patents covering WiMAX products. Litigation may be required to enforce or protect our intellectual property rights. As a result of any such litigation, we could lose our proprietary rights or incur substantial unexpected operating costs. Any action we take to license, protect or enforce our intellectual property rights could be costly and could absorb significant management time and attention, which, in turn, could negatively impact our operating results. In addition, failure to protect our trademark rights could impair our brand identity.

Other companies or entities also may commence actions or respond to an infringement action that we initiate by seeking to establish the invalidity or unenforceability of one or more of our patents or to dispute the patentability of one or more of our pending patent applications. In the event that one or more of our patents or applications are challenged, a court may invalidate the patent or determine that the patent is not enforceable or deny issuance of the application, which could harm our competitive position. If any of our key patent claims are invalidated or deemed unenforceable, or if the scope of the claims in any of these patents is limited by court decision, we could be prevented from licensing such patent claims. Even if such a patent challenge is not successful, it could be expensive and time consuming to address, divert management attention from our business and harm our reputation.

We are dependent on a small number of individuals, and if we lose key personnel upon whom we are dependent, our business will be adversely affected.

Our future success depends largely upon the continued service of our board members, executive officers and other key management and technical personnel, particularly Allen Salmasi, our Chairman and Chief Executive Officer. Mr. Salmasi has been a prominent executive and investor in the technology industry for over 20 years, and the Company has benefited from his industry relationships in attracting key personnel and in implementing acquisitions and strategic plans. In addition, in order to develop and achieve commercial deployment of our WiMAX products and technologies in competition with well-established companies such as Intel, QUALCOMM and others, we must rely on highly specialized engineering and other talent. Our key employees represent a significant asset, and the competition for these employees is intense in the wireless communications industry. We continue to anticipate significant increases in human resources, particularly in engineering resources, through the remainder of 2006. If we are unable to attract and retain the qualified employees that we need, our business may be harmed.

As a start-up company, we may have particular difficulty attracting and retaining key personnel in periods of poor operating performance given the significant use of incentive compensation by well-established competitors. We do not have employment agreements with our key management personnel and do not maintain key person life insurance on any of our personnel. We also have no covenants against competition or nonsolicitation agreements with certain of our key employees. The loss of one or more of our key employees or our inability to attract, retain and motivate qualified personnel could negatively impact our ability to design, develop and commercialize our products and technology.

We may be liable for certain indemnification payments pursuant to the Plan of Reorganization.

In connection with the sale of NTI and its subsidiaries other than Old NextWave Wireless to Verizon Wireless, we agreed to indemnify NTI and its subsidiaries against all pre-closing liabilities of NTI and its subsidiaries and against any violation of the Bankruptcy Court injunction against persons having claims against NTI and its subsidiaries, with no limit on the amount of such indemnity. We are not currently aware of any such liabilities that remain following the plan of reorganization and Verizon Wireless has not made any indemnity claims. To the extent that we are required to fund amounts under the indemnification, our results of operations and our liquidity and capital resources could be materially adversely affected. In addition, we may not have sufficient cash reserves to pay the amounts required under the indemnification if any amounts were to become due.

Risks Relating to Government Regulation

Government regulation could adversely impact our development of wireless broadband products and services, our offering of products and services to consumers, and our business prospects.

The regulatory environment in which we operate is subject to significant change, the results and timing of which are uncertain. The FCC has jurisdiction over the grant, renewal, lease, assignment and sale of our wireless licenses, the use of wireless spectrum to provide communications services, and the resolution of interference between users of various spectrum bands. Other aspects of our business, including construction and operation of our wireless systems, and the offering of communications services, are regulated by the FCC and other federal, state and local governmental authorities. States may exercise authority over such things as billing practices and consumer-related issues.

Various governmental authorities could adopt regulations or take other actions that would adversely affect the value of our assets, increase our costs of doing business, and impact our business prospects. Changes in the regulation of our activities, including changes in how wireless, mobile, IP-enabled services are regulated, changes in the allocation of available spectrum by the United States and/or exclusion or limitation of our technology or products by a government or standards body, could have a material adverse effect on our business, operating results, liquidity and financial position.

Changes in legislation or regulations may affect our ability to conduct our business or reduce our profitability.

Future legislative, judicial or other regulatory actions could have a negative effect on our business. Some legislation and regulations applicable to the wireless broadband business, including how wireless, mobile, IP-enabled services are regulated, are the subject of ongoing judicial proceedings, legislative hearings and administrative proceedings that could change the manner in which our industry is regulated and the manner in which we operate. We cannot predict the outcome of any of these matters or their potential impact on our business.

If, as a result of regulatory changes, we become subject to the rules and regulations applicable to telecommunications providers, commercial mobile service providers or common carriers at the federal level or in individual states, we may incur significant litigation and compliance costs, or we may have to restructure our service offerings, exit certain markets or raise the price of our services, any of which could cause our services to be less attractive to customers. In addition, future regulatory developments could increase our cost of doing business and limit our growth.

We may not have complete control over our transition of EBS and BRS spectrum, which could impact compliance with FCC rules.

The FCC's rules require transition of EBS and BRS spectrum to the new band plan on a Basic Trading Area ("BTA") basis. See "Government Regulation-BRS-EBS License Conditions." We do not hold all of the EBS and BRS spectrum in the BTAs in which we hold spectrum. Consequently, we will need to coordinate with other EBS and BRS licensees in order to transition spectrum we hold or lease. Disagreements with other EBS or BRS licensees about how the spectrum should be transitioned may delay our efforts to transition spectrum, could result in increased costs to transition the spectrum, and could impact our efforts to comply with applicable FCC rules. On April 27, 2006, the FCC implemented new, amended rules related to transition of the spectrum, and it adopted rules that will permit us to self-transition to the reconfigured band plan if other spectrum holders in our BTAs do not timely transition their spectrum.

Our use of EBS spectrum is subject to privately negotiated lease agreements. Changes in FCC rules governing such lease agreements, contractual disputes with EBS licensees, or failures by EBS licensees to comply with FCC rules could impact our use of the spectrum.

All commercial enterprises are restricted from holding licenses for EBS spectrum. Eligibility for EBS spectrum is limited to accredited educational institutions, governmental organizations engaged in the formal education of enrolled students (e.g. school districts), and nonprofit organizations whose purposes are educational. Access to EBS spectrum can only be gained by commercial enterprises through privately-negotiated EBS lease agreements. FCC regulation of EBS leases, private interpretation of EBS lease terms, private contractual disputes, and failure of an EBS licensee to comply with FCC regulations all could impact our use of EBS spectrum and the value of our leased EBS spectrum. On April 27, 2006, the FCC released new rules governing EBS lease terms. EBS licensees are now permitted to enter into lease agreements with a maximum term of 30 years; lease agreements with terms longer than 15 years must contain a “right of review” by the EBS licensee every five years beginning in year 15. The right of review must afford the EBS licensee with an opportunity to review its educational use requirements in light of changes in educational needs, technology, and other relevant factors and to obtain access to such additional services, capacity, support, and/or equipment as the parties shall agree upon in the spectrum leasing arrangement to advance the EBS licensee’s educational mission. A spectrum leasing arrangement may include any mutually agreeable terms designed to accommodate changes in the EBS licensee’s educational use requirements and the commercial lessee’s wireless broadband operations. In addition, the terms of EBS lease agreements are subject to contract interpretation and disputes could arise with EBS licensees. There can be no assurance that EBS leases will continue for the full lease term, or be renewed, or be extended beyond the current term, on terms that are satisfactory to us. Similarly, since we are not eligible to hold EBS licenses, we must rely on EBS licensees with whom we contract to comply with FCC rules. The failure of an EBS licensee from whom we lease spectrum to comply with the terms of their FCC authorization or FCC rules could result in termination, forfeiture or non-renewal of their authorization, which would negatively impact the amount of spectrum available for our use.

If we do not comply with FCC build-out requirements relating to our spectrum licenses, such licenses could be subject to forfeiture.

Certain build-out or “substantial service” requirements apply to our licensed wireless spectrum, which generally must be satisfied as a condition of license renewal. In particular, the renewal deadline and the substantial service build-out deadline for our WCS spectrum is July 21, 2007. Failure to make the substantial service demonstration, without seeking and obtaining an extension from the FCC, would result in license forfeiture.

We are participating with other WCS band license holders in a waiver process with the FCC to move the substantial service dates for this license band from July 2007 to the later of July 2010 or three years from FCC adoption of certain technical rules for the WCS band. Extensions of time to meet substantial service demonstrations are not routinely granted by the FCC. If the substantial service dates are not extended, in order to meet the current substantial service date of July 2007, we estimate that an expenditure of approximately \$40 million would be required over the next 12 months. The expenditure of this amount would reduce the amount of our cash and cash equivalents available for research and development unless we obtain additional financing.

We have no guarantee that the licenses we hold or lease will be renewed.

The FCC generally grants wireless licenses for terms of ten years which are subject to renewal and revocation. FCC rules require all wireless licensees to comply with applicable FCC rules and policies and the Communications Act of 1934 in order to retain their licenses. For example, licensees must meet certain construction requirements, including making substantial service demonstrations, in order to retain and renew FCC licenses. Failure to comply with FCC requirements with respect to any license could result in revocation or non-renewal of a license. There is no guarantee that licenses we hold or lease will remain in full force and effect or be renewed.

New FCC concepts impacting spectrum use could affect our use of wireless spectrum.

The FCC has initiated a number of proceedings to evaluate its rules and policies regarding spectrum licensing and usage. For example, it is considering new concepts that might permit unlicensed users to “share” our licensed spectrum to the extent the FCC believes harmful interference will not occur. These new uses could adversely impact our utilization of our licensed spectrum and our operational costs.

Interference could negatively impact our use of wireless spectrum we hold, lease or use.

Under applicable FCC rules, users of wireless spectrum must comply with technical rules that are intended to eliminate or diminish harmful electrical interference between wireless users. Licensed spectrum is generally entitled to interference protection, subject to technical rules applicable to the radio service, while unlicensed spectrum has no interference protection rights and must accept interference caused by other users.

Wireless devices utilizing WCS, BRS and EBS spectrum may be susceptible to interference from Satellite Digital Audio Radio Services (“SDARS”).

Since 1997, the FCC has considered a proposal to permanently authorize terrestrial repeaters for SDARS adjacent to the C and D blocks of the WCS band; the FCC has permitted a large number of these SDARS terrestrial repeaters to operate on a special temporary authorization since 2001. Permanently authorizing SDARS repeaters adjacent to the WCS band could cause interference to WCS, BRS and EBS receivers. The extent of the interference from SDARS repeaters is unclear and is subject to the FCC’s final resolution of pending proceedings. Because WCS C and D block licenses are adjacent to the SDARS spectrum, the potential for interference to this spectrum is of greatest concern. There is a lesser magnitude concern regarding interference from SDARS to WCS A and B block licenses, and EBS and BRS licenses. Central to the FCC’s evaluation of this proposal has been the technical specification for the operation of such repeaters. Final technical rules will determine the potential interference conditions and requirements for mitigation. If SDARS repeaters result in interference certain portions of our network coverage may become unserviceable with our WCS spectrum and consequently, our ability to offer that licensed spectrum to potential network partners could be adversely affected and our ability to realize value from this spectrum may be impaired.

Increasing regulation of the tower industry may make it difficult to deploy new towers and antenna facilities.

The FCC, together with the FAA, regulates tower marking and lighting. In addition, tower construction and deployment of antenna facilities is impacted by federal, state and local statutes addressing zoning, environmental protection and historic preservation. The FCC adopted significant changes to its rules governing historic preservation review of new tower projects, which makes it more difficult and expensive to deploy towers and antenna facilities. The FCC is also considering changes to its rules regarding when routine environmental evaluations will be required to determine compliance of antenna facilities with its RF radiation exposure limits. If adopted, these regulations could make it more difficult to deploy facilities. In addition, the FAA has proposed modifications to its rules that would impose certain notification requirements upon entities seeking to (i) construct or modify any tower or transmitting structure located within certain proximity parameters of any airport or heliport, and/or (ii) construct or modify transmission facilities using the 2500-2700 MHz radio frequency band, which encompasses virtually all of the BRS/EBS frequency band. If adopted, these requirements could impose new administrative burdens upon use of BRS/EBS spectrum.

Risks Relating to An Investment in Our Common Stock

Our operating results are subject to substantial quarterly and annual fluctuations and to market downturns.

We believe that our future operating results over both the short- and long-term will be subject to annual and quarterly fluctuations due to several factors, some of which are outside management's control. These factors include:

- significant research and development costs;
- research and development issues and delays;
- the timing and costs of our Las Vegas launch;
- the financial results of our PacketVideo subsidiary;
- the timing of entering into network partner arrangements and the success of these partnerships;
- spectrum acquisition costs;
- manufacturing issues and delays;
- fluctuating market demand for WiMAX services;
- impact of competitive products, services and technologies;
- changes in the regulatory environment;
- the cost and availability of network infrastructure; and
- general economic conditions.

These factors affecting our future operating results are difficult to forecast and could harm our quarterly or annual operating results and the prevailing market price of our securities. If our operating results fail to meet the financial guidance we provide to investors or the expectations of investment analysts or investors in any period, securities class action litigation could be brought against us and/or the market price of our securities could decline.

There has been no prior market for our common stock and you may not be able to resell your stock, or may have to sell it at a discount.

There is no public market for our common stock. Although we intend for our common stock to be quoted on The Nasdaq Global Market, we cannot predict the timing of the commencement of such quotation or the extent to which a trading market will develop or how liquid that market may become. If an active trading market does not develop or is not sustained, holders of our common stock may have difficulty selling any of their shares of our common stock.

Substantially all of our stock is or will be eligible for future sale which could depress the price of our stock.

Sales of substantial amounts of our common stock, or the perception that a large number of shares will be sold, could depress the market price of our common stock. Most of our stockholders are former stockholders of NextWave Telecom Inc. that received shares of our stock in connection with our emergence from bankruptcy. Accordingly, these stockholders may wish to sell their shares of stock upon receipt or shortly thereafter and may not be long-term

investors in the company. After the effectiveness of this registration statement, shares, representing % of the issued and outstanding shares as of September 12, 2006, will be freely tradeable, subject to the volume and other restrictions of Rule 144 under the Securities Act of 1933, as amended (the "Securities Act") imposed upon stockholders deemed to be our affiliates.

If the ownership of our common stock continues to be highly concentrated, it may prevent you and other stockholders from influencing significant corporate decisions and may result in conflicts of interest that could cause the price of our common stock to decline.

Allen Salmasi, our executive officers and others members of our Board of Directors will beneficially own or control approximately 51.4% of our common stock. Accordingly, Mr. Salmasi and the other members of the Board of Directors will be able to significantly influence matters that require stockholder approval, including the election of directors, any merger, consolidation or sale of all or substantially all of our assets or other significant corporate transactions. Our controlling stockholders may have interests that differ from your interests and may vote in a way with which you may disagree and which may be adverse to your interests. Corporate action may be taken even if other stockholders oppose them. These stockholders may also delay or prevent a change of control of us, even if that change of control would benefit our other stockholders, which could deprive our stockholders of the opportunity to receive a premium for their shares. The significant concentration of ownership of our common stock may adversely affect the trading price of our common stock due to investors' perception that conflicts of interest may exist or arise.

If securities or industry analysts do not publish research or reports about our business, if they change their recommendations regarding our shares adversely or if our operating results do not meet their expectations, the price of our common stock could decline.

The trading market for our common stock will be influenced by the research and reports that industry and securities analysts publish about us or our business. If these analysts fail to publish reports about us or if one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause the price of our common stock to decline. Moreover, if one or more analysts who cover us downgrade our common stock or if our operating results do not meet their expectations, the price of our common stock could decline.

The market price for our common stock may be volatile, which could cause the value of your investment to decline.

The stock market in general, and the stock prices of technology and wireless communications companies in particular, have experienced volatility that often has been unrelated to the operating performance of any specific public company. Factors that may have a significant impact on the market price of our common stock include:

- announcements concerning us or our competitors, including the selection of mobile WiMAX wireless communications technology by telecommunications providers and the timing of the roll-out of those systems;
- receipt of substantial orders or order cancellations for integrated circuits and system software products for mobile WiMAX networks by us or our competitors;
- quality deficiencies in technologies, products or services;
- announcements regarding financial developments or technological innovations;
- international developments, such as technology mandates, political developments or changes in economic policies;
- lack of capital to invest in WiMAX networks;
- new commercial products;

- changes in recommendations of securities analysts;
- government regulations, including FCC regulations governing spectrum licenses;
- earnings announcements;
- proprietary rights or product or patent litigation;
- strategic transactions, such as acquisitions and divestitures; or
- rumors or allegations regarding our financial disclosures or practices.

Our share price may be subject to volatility, particularly on a quarterly basis. Shortfalls in our revenues or earnings in any given period relative to the levels expected by securities analysts could immediately, significantly and adversely affect the trading price of our common stock.

From time to time, we may repurchase our common stock at prices that may later be higher than the market value of the share on the repurchase date. This could result in a loss of value for stockholders if new shares are issued at lower prices.

In the past, securities class action litigation has often been brought against a company following periods of volatility in the market price of its securities. Due to changes in the volatility of the price of our common stock, we may be the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources.

Provisions of our charter documents could delay or prevent an acquisition of our company, even if the acquisition would be beneficial to holders of our common stock, and could make it more difficult for you to change management.

Our Certificate of Incorporation and Bylaws contain provisions that could depress the trading price of our common stock by acting to discourage, delay or prevent a change of control of our company or changes in management that holders of our common stock might deem advantageous. Specific provisions in our Certificate of Incorporation and Bylaws include:

- our directors serve staggered, three-year terms;
- no action can be taken by stockholders except at an annual or special meeting of the stockholders called in accordance with our bylaws, and stockholders may not act by written consent;
- our board of directors will be expressly authorized to make, alter or repeal our bylaws, and our stockholders will be able to make, alter or repeal our bylaws by a vote of 66-2/3% of the issued and outstanding voting shares;
- members of our board of directors can be removed without cause by a vote of 66-2/3% of the issued and outstanding voting shares;
- any vacancies on the board of directors would be filled by a majority vote of the board;
- our board of directors will be authorized to issue preferred stock without stockholder approval; and

we will indemnify officers and directors against losses that they may incur in investigations and legal proceedings resulting from their services to us, which may include services in connection with takeover defense measures.

As a result of the provisions of our Certificate of Incorporation and Bylaws, the price investors may be willing to pay in the future for our common stock may be limited.

The issuance of a significant amount of additional common stock would result in dilution to our existing stockholders and could reduce our earnings per share, which in turn could negatively affect the market price of our common stock.

We may need to raise additional funds to fund our operations, to pay for an acquisition or to enter into a strategic alliance, and we might use equity securities, debt, cash, or a combination of the foregoing. If we use equity securities, our stockholders may experience dilution. A significant amount of our common stock coming on the market at any given time could result in a decline in the price of our common stock or increased volatility.

Once we become a public company, we will need to comply with Section 404 of the Sarbanes-Oxley Act of 2002, and if we fail to achieve and maintain adequate internal controls over financial reporting, our business, results of operations and financial condition could be materially adversely affected.

As a public company, our systems of internal controls over financial reporting will be required to comply with the standards adopted by the Public Company Accounting Oversight Board. We are presently evaluating our internal controls for compliance. During the course of our evaluation, we may identify areas requiring improvement and may be required to design enhanced processes and controls to address issues identified through this review. This could result in significant delays and cost to us and require us to divert substantial resources, including management time, from other activities. We have commenced a review of our existing internal control structure and plan to hire additional personnel. Although our review is not complete, we have taken steps to improve our internal control structure by hiring dedicated, internal Sarbanes-Oxley Act compliance personnel to analyze and improve our internal controls, to be supplemented periodically with outside consultants as needed. However, we cannot be certain regarding when we will be able to successfully complete the procedures, certification and attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002. If we fail to achieve and maintain the adequacy of our internal controls, we may not be able to conclude that we have effective internal controls over financial reporting in accordance with the Sarbanes-Oxley Act. Moreover, effective internal controls are necessary for us to produce reliable financial reports and are important to help prevent fraud. As a result, our failure to satisfy the requirements of Section 404 on a timely basis could result in the loss of investor confidence in the reliability of our financial statements, which in turn could harm the market value of our common stock. Any failure to maintain effective internal controls also could impair our ability to manage our business and harm our financial results.

As a result of being a public company, we will incur increased costs that may place a strain on our resources or divert our management's attention from other business concerns.

As a public company, we will incur additional legal, accounting and other expenses that we do not incur as a private company. The Exchange Act will require us to file annual, quarterly and current reports with respect to our business and financial condition, which will require us to incur legal and accounting expenses. The Sarbanes-Oxley Act will require us to maintain effective disclosure controls and procedures and internal controls for financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. We expect the corporate governance rules and regulations of the SEC will increase our legal and financial compliance costs and make some activities more costly and time consuming. These requirements may place a strain on our systems and resources and may divert our management's attention from other business concerns, which could have a material adverse effect on our business, financial condition and results of operations. In addition, we are hiring and will continue to hire additional legal, accounting and financial staff with appropriate public company experience and technical accounting knowledge, which will increase our operating expenses in future periods.

We also expect these rules and regulations to make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, it may be more difficult for us to attract and retain qualified persons to serve on our board of directors or as executive officers.

If the price of our common stock declines significantly, then our common stock may be deemed to be penny stock, which could adversely affect the liquidity of, and market for, our shares.

If our shares are considered penny stock, they would be subject to rules that impose additional sales practices on broker-dealers who sell our securities. Penny stocks generally are equity securities with a price of less than \$5.00, other than securities registered on some national securities exchanges or quoted on Nasdaq. In this event, some brokers may be unwilling to effect transactions in our shares because of the additional obligations imposed. This could adversely affect the liquidity of our common stock and the ability of investors to sell our common stock. For instance, broker-dealers must make a special suitability determination for the purchaser and have received the purchaser's written consent to the transaction prior to the sale. Also, a disclosure schedule must be prepared prior to any transaction involving a penny stock, and disclosure is required about sales commissions payable to both the broker-dealer and the registered representative and current quotations for the securities. Furthermore, monthly statements are required to be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stock.

THE CORPORATE CONVERSION MERGER

This section of the prospectus describes material aspects of the corporate conversion merger. While we believe that the description covers the material terms of the corporate conversion merger, this summary may not contain all of the information that is important to you. For a more complete understanding of the corporate conversion merger, you should carefully read this entire prospectus, the attached appendixes, including the merger agreement attached hereto as Appendix A, and the other documents referred to in this prospectus.

General Description of the Corporate Conversion Merger

To enable our planned listing on The Nasdaq Global Market, NextWave Wireless LLC's board of managers and a majority in interest of NextWave Wireless LLC's members has approved the conversion of NextWave Wireless LLC from a Delaware limited liability company to a Delaware corporation. The corporate conversion will be effected through the merger of a wholly owned subsidiary of ours with and into NextWave Wireless LLC. We expect to effectuate the corporate conversion merger prior to our planned listing on Nasdaq. In the merger, unitholders of the LLC interests will receive a number of shares of our common stock based on an exchange ratio to be determined by the board of managers of NextWave Wireless LLC. Each holder of LLC interests will own the same percentage of the outstanding equity of the company before and immediately after giving effect to the corporate conversion merger. In addition, we will assume NextWave Wireless LLC's obligations under its stock option plan and the plans of its subsidiaries.

Reasons for the Corporate Conversion Merger

We believe that the corporate conversion merger and our planned listing on The Nasdaq Global Market will contribute to our future success through the following positive factors:

- by providing our equityholders, who currently hold LLC interests in a private company, with shares of common stock in a publicly traded company, which would provide greater liquidity to our equityholders;
- by increasing our visibility and credibility within the global investing public; and
- by making available an additional currency we can use for future acquisitions.

Accounting Treatment

At the time of the corporate conversion merger, members' equity will be reclassified into common stock and additional paid-in-capital, and the retained deficit as of that date will also be reclassified into additional paid-in-capital. The conversion of all outstanding stock options under the CYGNUS 2004 Stock Option Plan to our stock options will be accounted for as a modification under Statement of Financial Accounting Standards No. 123 (Revised 2004), "Share-Based Payment," which could result in additional compensation expense.

Material U.S. Federal Income Tax Consequences of the Corporate Conversion Merger

The following discussion sets forth the material U.S. federal income tax consequences of the corporate conversion merger to the Company and the United States Holders (as defined below) of Company interests. The discussion is based on the Internal Revenue Code of 1986, as amended (the "Tax Code"), Treasury regulations promulgated and proposed thereunder, judicial decisions and published administrative rules and pronouncements of the Internal Revenue Service (the "Service"), all as in effect on the date hereof. Changes in these authorities or new interpretations thereof may have retroactive effect and could significantly affect the federal income tax consequences described below. You should be aware that the Company has not requested a ruling from the Service and that no published

guidance has been issued with respect to the tax treatment of partnership transactions precisely in the form of the corporate conversion merger. Accordingly, the Service might take a view of the tax consequences of the corporate conversion merger that is contrary to that set forth below.

This discussion does not address all of the federal income tax consequences of the corporate conversion merger that may be applicable to you in light of your particular circumstances or that may be applicable to you if you are subject to special treatment under the Tax Code (such as persons who acquired their interests in compensatory transactions, banks, broker-dealers, insurance companies, other financial institutions, tax-exempt organizations, holders subject to the alternative minimum tax provisions of the Tax Code, holders who hold their Company interests as part of a hedge, straddle, constructive sale or conversion transaction, persons who are not residents of the United States, foreign corporations or investors in pass-through entities). In addition, the estate, gift, state, local and foreign tax consequences of the corporate conversion merger are not discussed. Further, the discussion is addressed to existing holders of Company interests that have held their interests as capital assets (*i.e.*, generally as investments).

As used in this section, the term “United States Holder” means a beneficial owner of Company interests who is a citizen or resident of the United States, a U.S. domestic corporation, any estate the income of which is subject to federal income tax regardless of the source of its income or any trust if (i) a court within the United States is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust or (ii) the trust has a valid election in effect under applicable Treasury regulations to be treated as a “United States person”. If a partnership or other entity taxable as a partnership is a beneficial owner of Company interests, the federal income tax treatment of a partner will generally depend on the status of the partner and upon the activities of the partnership. Partners in partnerships holding Company interests should consult their tax advisors.

General

Based upon representations contained in a representation letters provided by the Company and NextWave Wireless, Inc. and on certain customary factual assumptions, the corporate conversion merger will be a tax-free incorporation under Section 351 of the Tax Code.

Prior to the corporate conversion merger, holders of Company interests were taxable on their pro-rata share of the income, gains, losses and deductions of the Company -- whether or not distributed -- computed without taking into account any of the income, gains, losses or deductions of NextWave Broadband, Inc. and its subsidiaries. As a result of the corporate conversion merger, holders will cease being partners in a partnership (the Company) for federal income tax purposes and become shareholders in a corporation (NextWave Wireless, Inc.). Accordingly, as a shareholder, you will only be taxed on actual distributions, if any, by NextWave Wireless, Inc. (*e.g.*, distributions to the extent of NextWave Wireless, Inc.’s earnings and profits for federal income tax purposes will be taxable as dividends).

As a result of the corporate conversion merger, NextWave Wireless, Inc., unlike the Company, will itself be subject to federal income tax. Such tax will be based upon the earnings of NextWave Wireless, Inc. and all of its domestic subsidiaries, as NextWave Wireless, Inc. will be the “common parent” of a consolidated group filing a consolidated federal income tax return.

Holders of Company Interests

By reason of the corporate conversion merger qualifying under Section 351 of the Tax Code, holders of Company interests will not recognize gain or loss in the corporate conversion merger as a result of their deemed contribution of Company interests to NextWave Wireless, Inc. in exchange for common stock of NextWave Wireless, Inc., except to the extent of any cash received in lieu of a fractional share of NextWave Wireless, Inc. common stock.

The tax basis of the stock of NextWave Wireless, Inc. received by you (including any fractional share that you are deemed to receive and exchange for cash) will equal the tax basis in your Company interest exchanged therefore less your pro-rata share of the Company’s liabilities assumed by NextWave Wireless, Inc. Likewise, your holding period in your NextWave Wireless, Inc. common stock received in the corporate conversion merger should include your

holding period in the Company interest surrendered.

30

Cash in lieu of Fractional Shares

You will recognize capital gain or loss on any cash received in lieu of a fractional share of NextWave Wireless, Inc.'s common stock equal to the difference between the amount of cash received and the basis allocated to such fractional share. That capital gain or loss will constitute long-term capital gain or loss if your holding period in the Company interests surrendered in the corporate conversion merger is greater than 12 months as of the date of the corporate conversion merger.

Reporting Requirements

You will be required to retain records pertaining to the corporate conversion merger and to file with your federal income tax return for the year in which the corporate conversion merger occurs a statement setting forth certain facts relating to the corporate conversion merger.

Holders of Warrants

Persons holding unexercised warrants to acquire Company interests (not including options granted under the Company's 2005 Unit Plan) will recognize gain or loss in the corporate conversion merger equal to the difference between the fair market value of the warrants to acquire common stock of NextWave Wireless, Inc. on the date of the corporate conversion merger and their tax basis in the Company's warrants. The tax basis in the warrants to acquire common stock in NextWave Wireless, Inc. received in the corporate conversion merger will equal such warrants' fair market value as of the date of the corporate conversion merger and the holding period in such warrants will begin on the day following the date of the corporate conversion merger.

NextWave Wireless, Inc. and the Company

Neither NextWave Wireless, Inc. nor the Company will recognize gain or loss as a result of the corporate conversion merger.

NextWave Wireless, Inc.'s basis in the assets received in the corporate conversion merger will equal the aggregate of the Holders' bases in their Company interests prior to the corporate conversion merger, allocated among such assets in accordance with the provisions of the Tax Code.

This discussion of the material federal income tax consequences does not address the tax consequences that may vary with, or are contingent upon, the individual circumstances of each holder of Company interests. Accordingly, it is recommended that you consult your own tax advisors to determine the particular federal, state, local and other tax consequences to you of the corporate conversion merger.

Appraisal Rights

Pursuant to NextWave Wireless LLC's limited liability company agreement and Delaware law, holders of NextWave Wireless LLC's membership units are not entitled to appraisal rights.

Federal Securities Laws Consequences

This prospectus does not cover any resales of the our common stock received in the merger, and no person is authorized to make any use of this prospectus in connection with any such resale.

All shares of our common stock received by unitholders of NextWave Wireless LLC in the corporate conversion merger should be freely transferable, except that if a stockholder is deemed to be an "affiliate" of NextWave Wireless LLC under the Securities Act at the time of the conversion, the stockholder may resell those shares only in transactions permitted by Rule 145 under the Securities Act or as otherwise permitted under the Securities Act.

Persons who may be considered “affiliates” under the Securities Act generally include individuals or entities that control, are controlled by, or are under common control with, NextWave Wireless LLC, and generally would not include stockholders who are not our officers, directors or principal stockholders.

THE MERGER AGREEMENT

The following summary describes certain material provisions of the merger agreement. The full text of the merger agreement is attached as Appendix A to this prospectus and is incorporated herein by reference. This summary may not contain all of the information that is important to you, and you are encouraged to read carefully the entire merger agreement. The following description is subject to, and is qualified in its entirety by reference to, the merger agreement.

The merger agreement has been included to provide you with information regarding its terms. It is not intended to provide any other factual information about NextWave Wireless Inc. or NextWave Wireless LLC. Such information can be found elsewhere in this document and in the other public filings NextWave Wireless LLC makes with the SEC, which are available without charge at www.sec.gov.

Structure of the Corporate Conversion Merger

In accordance with the merger agreement and Delaware law, NextWave Wireless LLC will merge with and into NW Merger LLC, a wholly-owned subsidiary of NextWave Wireless Inc. As a result of the corporate conversion merger, the separate corporate existence of NW Merger LLC will cease, and NextWave Wireless LLC will survive as a wholly owned subsidiary of us.

Upon completion of the corporate conversion merger, each outstanding LLC interest of NextWave Wireless LLC, other than LLC interests held by NextWave Wireless LLC as treasury securities or by subsidiaries of NextWave Wireless LLC, will be canceled and converted into the right to receive shares of our common stock. We refer to this ratio herein as the exchange ratio. In addition, each outstanding share of common stock of CYGNUS not held by NextWave Wireless LLC will be exchanged for shares of common stock of NextWave Wireless Inc.

No fractional shares of our common stock will be issued in connection with the corporate conversion merger. Instead, holders of LLC interests will receive an amount of cash (rounded to the nearest whole cent) in lieu of a fraction of a share of our common stock equal to \$1.00 per fractional share to which such holder would otherwise be entitled.

Upon completion of the corporate conversion merger, all options, warrants and similar rights to purchase NextWave Wireless LLC membership units will be assumed by us and will be converted into the right to purchase shares of our common stock, preserving the economics of the award effective immediately prior to the completion of the corporate conversion merger. Each substitute option or warrant will be exercisable for, and represent the right to acquire, that whole number of shares of our common stock (rounded down to the next whole share) equal to the number of LLC interests subject to such award multiplied by exchange ratio. The per share exercise price of each substitute option will be determined by dividing the per share exercise price (being rounded up to the next 100th of a cent) applicable to the option to purchase LLC interests immediately prior to the merger by the exchange ratio. The per share exercise price of each substitute warrant will be determined in accordance with the terms of the applicable warrant agreement.

In addition, upon completion of the merger, we have agreed to assume all rights and obligations of NextWave Wireless LLC in respect of the 2004 Stock Option Plan of CYGNUS and the 2005 Equity Incentive Plan of PacketVideo.

Effective Time of the Transaction

The merger will become effective at the time at which the certificate of merger has been duly filed with the Secretary of State of the State of Delaware, or at such other time as specified in the certificate of merger. We expect to file the merger certificate promptly after this registration statement is declared effective by the Securities and Exchange Commission.

Officers and Directors

Following the corporate conversion merger, the officers and directors of NextWave Wireless Inc. will be the same persons as the current officers and managers of NextWave Wireless LLC.

Conversion of NextWave Wireless LLC Membership Units

Each LLC interest issued and outstanding immediately prior to the effective time will be automatically converted into the right to receive a number of shares of our common stock equal to the exchange ratio and cash in lieu of fractional shares.

The Exchange Ratio

The exchange ratio is .

Fractional Shares

No fractional shares of our common stock will be issued in connection with the corporate conversion merger. Instead, holders of LLC interests will receive an amount of cash (rounded to the nearest whole cent) in lieu of a fraction of a share of our common stock equal to \$1.00 per fractional share to which such holder would otherwise be entitled.

Surrender of NextWave Wireless LLC Certificates

Following the effective time of the corporate conversion merger, the exchange agent, Computershare Trust Company, N.A., will mail to each unitholder of NextWave Wireless LLC a letter of transmittal and instructions regarding the details of the exchange. The holders will use the letter of transmittal to exchange LLC interests for the shares of our common stock and cash in lieu of fractional shares to which the unitholders of NextWave Wireless LLC are entitled to receive in connection with the corporate conversion merger. Your shares of NextWave Wireless Inc. will be issued to you in book-entry form, unless you provide a written request to the Company for certificated shares.

After the effective time of the corporate conversion merger and until so surrendered, outstanding certificates representing LLC interests will be deemed to be evidence of the right to receive our common stock, and the right to receive an amount of cash in lieu of the issuance of any fractional shares to which the record unitholders of NextWave Wireless LLC are entitled to receive in connection with the corporate conversion merger. No interest will be payable on cash distributed to unitholders in lieu of any fractional shares of our common stock.

BUSINESS

We are an early-stage wireless technology company engaged in the development of next-generation mobile broadband and wireless multimedia products, technologies and services. For a description of our formation, our emergence from Chapter 11 and our recent investments and acquisitions please see the section entitled “Our History.”

We are developing proprietary chipsets and related network and device products based on the Institute of Electrical and Electronic Engineers 802.16e mobile WiMAX standards. Mobile WiMAX is a wireless broadband system utilizing a cellular architecture to deliver fully mobile and high quality fixed voice and data services. WiMAX, an earlier generation of standards from the Institute of Electrical and Electronic Engineers, refers to a wireless broadband system designed to support fixed terminals. For more information about the fixed and mobile WiMAX standards please see “IEEE 802.16 WiMAX Standard” below.

A key design objective of our products and technologies is to improve the ability of mobile WiMAX to cost effectively handle the large volume of network traffic that we believe Voice Over Internet Protocol (“VoIP”) telephony, high speed web-surfing and next-generation wireless multimedia applications such as high resolution streaming video, high fidelity streaming audio and interactive real-time gaming will generate. We intend to market our 802.16e WiMAX compliant products and technologies to network infrastructure and device manufacturers as well as network operators worldwide. To stimulate demand for our products, we plan to partner with service providers to build and operate 802.16e WiMAX compliant networks that operate on our licensed spectrum and utilize network and device equipment which incorporate our products and technologies. In addition, through our PacketVideo subsidiary, we are a global provider of embedded multimedia software for mobile phones. We believe our enhanced network and subscriber solutions, combined with our wireless multimedia software products and our spectrum assets, will offer wireless service providers, cable operators, multimedia content distributors, applications service providers and Internet service providers a platform to provide advanced wireless broadband services to their customers. To stimulate demand for our products, we have accumulated a spectrum footprint across the U.S. covering a population of over 206 million people, or POPs.

Mobile Broadband Market

The Internet has evolved into a global system that over one billion people depend on every day. For many, the Internet has become an essential part of their business and personal lives and is the primary means in which they communicate and access information. We believe that a major driver of Internet usage is the rapidly growing adoption of DSL and cable/satellite broadband services that enable people to access the Internet at very high data speeds. Due to broadband connectivity, dependency on the Internet is increasing rapidly. Millions of people now use the Internet as a primary source for multimedia content such as music and movies, as a virtual store to purchase products and services, as a social networking tool, and to engage in bandwidth intensive activities such as high-speed web surfing, VoIP telephony, and interactive real-time gaming. However, while dependency on the Internet continues to grow, these types of critical Internet services and applications often become inaccessible to most people whenever they leave their home or business. This is because widespread deployment of wireless networks capable of providing mobile or nomadic broadband service, with data rates and connection quality comparable to DSL and cable, has not yet occurred.

We believe that market demand for mobile broadband services will transform the global \$500 billion wireless communications industry from one driven primarily by voice to one driven by broadband connectivity. This transformation is already starting to occur and according to Yankee Group, an independent market research firm, by 2009, 63% of all wireless phones globally will be used for some sort of mobile data with data revenue accounting for 22% of total wireless revenue.

We believe that mobile broadband will do for the Internet what cellular technology did for wireline telephony -- extend high-speed connectivity outside the home or office and enable people to remain connected to the information and content they need, wherever they go. We call this the "Living in Motion" lifestyle. We are developing our products and technologies to help make "Living in Motion" a reality and to provide people the ability to use a next-generation mobile device to:

34

- Find, purchase, download and listen to their favorite music or audio titles;
 - View high resolution broadcasts of their favorite TV shows;
 - Participate in interactive, real-time gaming;
- Easily access the full richness of the World Wide Web, including Mobile Web 2.0 services;
 - Remotely access their personal Digital Video Recorders and watch recorded television;
 - Remotely view real-time images from home or office security cameras;
 - Conduct two-way video conferences;
- Capture and transmit high resolution digital photos or video to friends, family members, and business associates;
 - Download and view movies and other types of video content;
- Engage in a wide-range of multimedia shopping services customized via location based services;
 - Conduct a broad range of financial transactions; and
 - Make “landline quality”, VoIP telephone calls.

While the mobile broadband transformation of the wireless communications market is still in an early stage of development, we believe it is already having a profound effect on service providers, network infrastructure manufacturers, device manufacturers and content distributors who will need to adapt their businesses to an industry model based on delivering mobile broadband services. Such adaptations will require network operators to make major investments in new wireless broadband network infrastructure equipment and technologies, will require the introduction of new classes of mobile broadband handsets, the development of next-generation device embedded multimedia software, and new techniques to maximize the use of available spectrum. We intend to focus our business activities to capitalize on these market trends.

We believe that several factors are already beginning to drive global market demand for fourth generation (4G) mobile broadband services like mobile WiMAX:

- Increased demand by cellular phone users around the world for the ability to easily access the Internet and multimedia content on a fully mobile basis;
- A growing awareness of the limitations of 802.11 Wi-Fi and existing third generation (3G) wireless networks;
 - Broader availability of high-quality, multimedia content optimized for mobile/portable devices;
 - Mandates by public safety agencies for reliable mobile broadband services;
- The deployment of wireless technologies such as WiMAX to serve as a cost-effective way to deliver broadband to millions of homes in the U.S. and abroad with no or limited (e.g., dial-up) Internet connectivity; and
- Market demand for fully integrated wireless local area network (LAN) and wide area network (WAN) solutions that utilize both 802.11 Wi-Fi and 802.16e WiMAX technologies.

To complement WiMAX’s ability to provide fully mobile broadband service, we believe that WiMAX can also serve as a cost-effective “last mile” technology suitable to provide stationary broadband service to millions of homes in the U.S. and abroad that have no or limited (e.g., dial-up) Internet connectivity. According to Gartner, an independent market research firm, in the United States alone, there were close to 31 million households that still used a dial-up connection to reach the Internet and nearly 45 million households that had no Internet connection at all in 2005 (“Forecast: Consumer Telecommunications and Internet Access, United States, 2004-2010,” June 2006). We believe that WiMAX may provide a cost-effective option for such households.

The introduction of affordable, high-speed Internet service via DSL and cable broadband provided software developers with a unique opportunity to develop entire new categories of software applications. Many of these applications focused on the capture, manipulation, and transmission of multimedia content such as music, images, and video. Several, such as iTunes, Windows Media Player, Google Video, and peer-to-peer applications such as Napster and BitTorrent have achieved extremely high levels of popularity and, in some cases, spawned businesses with market valuations that exceed those of the companies that actually provide broadband connections to end-users. We expect a similar software opportunity to arise with the wide-scale introduction of affordable mobile broadband services and believe that PacketVideo is well positioned to help develop the next generation of innovative mobile software.

IEEE 802.16 WiMAX Standard

WiMAX is an acronym that stands for Worldwide Interoperability for Microwave Access and is a certification mark established by the WiMAX Forum for products that are compliant with the Institute of Electrical and Electronic Engineers (“IEEE”) 802.16 set of standards. WiMAX, which has now become synonymous with the set of IEEE 802.16 standards, specifies an air interface for wireless Metropolitan Area Networks (MANs). Published in April of 2002, the original 802.16 standard specified equipment operating in the 10-66 GHz frequency band which required tall transmission towers and line-of-sight connectivity making the standard most suitable to provide high-bandwidth wireless backhaul services. Subsequently, the IEEE published a series of amendments to the standard to support lower radio frequencies in the 2-11 GHz range, to allow non line-of-sight connectivity, and to address interoperability issues. In 2004, the IEEE consolidated these amendments into a new standard called IEEE 802.16-2004 which is often referred to as IEEE 802.16d.

In December of 2005, the IEEE published the 802.16e standard, often referred to as mobile WiMAX, which specified a system to support mobile broadband services via portable devices such as laptops, personal digital assistants (PDA), mobile phones, and other converged devices. The 802.16e standard includes several enhancements to improve mobile system performance including support for inter-cell handoff, sleep modes to support low-power mobile devices and support for broadcast/multicast services. In parallel, in a coordinated effort with the IEEE and the WiMAX Forum, the Telecommunications Technology Association (TTA) in Korea developed WiBro, an 802.16-based standard, which includes support for mobility based on the 802.16e amendment. Efforts supported by TTA and IEEE 802.16 to harmonize the WiBro standard with the IEEE 802.16e standard were successful.

Mobile WiMAX is one of several wireless air interface technologies that are currently being deployed or developed to enable the delivery of mobile broadband services to the market. These alternative technologies include CDMA2000, UMTS (Universal Mobile Telecommunications System) and 802.20 (Mobile-Fi). Some of these technologies, such as CDMA 2000 and UMTS, have already been deployed by major wireless carriers and have achieved significant levels of market penetration. We believe that mobile WiMAX will also become a major, global wireless broadband standard and will achieve a significant level of global adoption for the following reasons:

- Mobile WiMAX enjoys broad support from wireless industry leaders. Members of the WiMAX Forum, an industry organization dedicated to promoting and certifying WiMAX products, include Alcatel, AT&T, Bell Canada, British Telecom, Broadcom, Cisco, Deutsche Telekom, Ericsson, Intel, Korea Telecom, LG Electronics, Lucent, Motorola, NEC, Nokia, Nortel, Samsung, Siemens, Sprint Nextel and Texas Instruments.
- Companies such as Intel, who are interested in seeing mobile WiMAX integrated into laptops and other mobile computing platforms, are actively working to drive the market adoption of WiMAX and the deployment of WiMAX networks.

- International support by network operators for WiMAX is growing. At present, numerous WiMAX networks based on the 802.16-2004 standard are currently being deployed by numerous operators in Europe, Asia, South America, and the Middle East.
- Deployments of 802.16e compliant mobile broadband networks by companies such as Korea Telecom who expect to launch commercial service in 2006 using the WiBro derivative of mobile WiMAX.
- Mobile WiMAX economics, including network construction and operating costs, are expected to be competitive with those of alternative mobile broadband technologies.
- Mobile WiMAX incorporates quality of service capabilities that are required to efficiently handle quality of service dependent applications such as VoIP telephony, video conferencing and real-time, interactive gaming.
- Mobile WiMAX network performance, including the ability to handle the high volumes of traffic associated with VoIP, high speed web-surfing and next-generation wireless multimedia applications, is expected to be competitive with alternative mobile broadband technologies.

Competitive Strengths

Accomplished team of wireless technology development professionals. Our technology development efforts are led by a team of highly skilled senior engineers with an average of 19 years experience in the development of wireless communications technologies and solutions. Team members have led major development initiatives at leading technology companies, such as Intel, Motorola, Nokia, QUALCOMM and Texas Instruments. Together they have been instrumental in developing some of today's dominant wireless technologies. Our founder and Chief Executive Officer, Allen Salmasi, was a member of the original QUALCOMM executive team and played a key role in the development and successful commercialization of the CDMA wireless technology standard used worldwide today. Many members of our development team worked with Mr. Salmasi at QUALCOMM on this technology initiative and have re-joined him at NextWave to pursue the development of mobile WiMAX technologies and products.

Significant capital resources. As of July 1, 2006, we had \$340.4 million of cash, cash equivalents and short-term investments. While we anticipate that the costs of our research and development activities will increase as we approach the commercial deployment of our wireless broadband products and technologies, we believe our working capital position provides us with significant flexibility to continue funding our research and development activities and our operating losses. In addition, we have recently completed a private placement of senior secured notes that has provided us with net cash proceeds of \$295.1 million available for the sole purpose of financing spectrum acquisitions and leases. After giving effect to our recent acquisition of WCS Wireless, Inc. for \$160.5 million and the acquisition of two new EBS leases for \$22.1 million, the remaining net proceeds of the senior secured notes are approximately \$110.0 million. In addition, concurrently with the notes placement, we paid a \$142.8 million deposit to the Federal Communication Commission to qualify for the Advanced Wireless Spectrum auction, of which \$110.0 million was funded with the remaining proceeds of the notes placement. Amounts not used to purchase spectrum in the auction will be returned to us after the auction is completed. To the extent that other attractive opportunities to acquire complimentary businesses or additional spectrum arise, we may need to raise additional funds to capitalize on such opportunities.

Attractive wireless spectrum portfolio, well-suited to support mobile WiMAX. To date, we have acquired licensed spectrum and entered into long-term leases that provide us with exclusive leasehold access to licensed spectrum throughout the U.S. We have compiled a spectrum portfolio covering approximately 206 million persons, or POPs, across the country, with 10MHz or more of spectrum in markets covering 182 million persons. We believe that our spectrum footprint, which will include nine of the top ten and 15 of the top 20 markets in the U.S., makes us attractive to potential network partners. Our spectrum resides in the 2.3GHz and 2.5GHz bands and offers propagation and other

characteristics suitable for use with mobile WiMAX.

37

Unique combination of silicon, software, systems engineering and spectrum. Unlike most other wireless technology development companies, we have assembled a unique combination of assets, including a world class semiconductor design and wireless technology development team, one of the world's leading providers of device embedded multimedia software, an experienced network design and operations team, and an attractive portfolio of licensed spectrum. We believe that the combination of these assets will enable us to efficiently develop and market mobile broadband products and positions us well to deliver fully integrated, mobile WiMAX network solutions to potential network partners.

Integrated business model. We believe that our technology development business, our network solutions business and our multimedia software business each represent standalone business opportunities. We expect these initiatives to be mutually supportive and highly complementary to each other and believe that our multi-initiative business model will provide us with the ability to adapt our business and allocate resources to address rapidly evolving industry trends.

Well established industry position. Our PacketVideo subsidiary has established strong commercial relationships with the wireless industry's leading device manufacturers, infrastructure manufacturers and network operators. Its customers include leading handset manufacturers such as LGE, Motorola, Nokia and Samsung as well as some of the world's largest network operators including NTT DoCoMo, Orange, T-Mobile and Verizon Wireless. While some of these customers are also some of PacketVideo's competitors, we believe that these relationships will be highly valuable as we pursue strategic partnerships and begin to market our products, technologies and network solutions.

Extensive experience in building and operating wireless networks. Our senior team has extensive experience in building and operating wireless networks for companies such as Airtouch, AT&T Wireless, McCaw Cellular, Nextel and SprintPCS. Members of our Network Solutions Group have spent the last several years conducting extensive field trials of numerous wireless broadband technologies, including 1xEV-DO, TD-CDMA, and Flash-OFDM. In addition, our team has led the development of a next-generation IP core network and back office system ("BOSS") designed specifically to enable the delivery of highly-differentiated mobile broadband network services.

Business Strategy

Our strategy is focused on the rapid development of our mobile broadband technologies and solutions, and includes:

Develop the key elements of an end-to-end mobile WiMAX system. In order to achieve our network performance improvement objectives, we intend to develop the key elements of an end-to-end mobile WiMAX network solution that includes proprietary chipsets and related network and device products compliant with the 802.16e WiMAX standard. We anticipate that by incorporating our proprietary technologies on both sides of the radio connection, we will be better positioned to commercialize our network performance technologies. To date, we have made significant progress in our development efforts and we anticipate that we will begin field testing elements of our product line in 2007. These field testing activities will be part of a comprehensive technical field trial of 802.16e WiMAX technology in Henderson, Nevada, that will combine our advanced IP core and back-office systems with a 28 site mobile WiMAX network. We expect to implement this trial with vendor partners who are interested in working with us to develop our end-to-end WiMAX system, and believe that the trial will be a critical step towards successful commercialization of our end-to-end WiMAX system solution and the development of our wireless broadband products and technologies.

Market our products and technologies to third parties. We intend to market our products and technologies worldwide to network equipment and device manufacturers and to wireless broadband service providers. We expect that our marketing efforts will benefit from growing worldwide demand for fully-mobile access to the Internet and the delivery of rich-media content to mobile devices. Similar to other proprietary wireless technologies, we believe that the sale or licensing of our chipsets, network components and device technologies will generate a long-term, recurring revenue stream for our company.

Form strategic relationships with network partners interested in offering wireless broadband services. We intend to implement a shared network model under which NextWave will seek network partners to fund the cost of building and operating a mobile WiMAX network utilizing our licensed spectrum and our products and technologies. Potential network partners include wireless service providers, cable operators, multimedia content distributors, applications service providers and Internet service providers that wish to provide advanced wireless broadband services to their customers. We believe that our shared network model will be attractive to potential network partners as it will allow them to operate as facility-based service providers at a lower cost than building and operating a network on their own.

Grow and extend PacketVideo's multimedia software business. We believe that the number of multimedia enabled smartphones as a percentage of global handsets shipped annually will rise significantly over the next several years. We will seek to maintain PacketVideo's strong position in this growing market through the growth and extension of its existing multimedia software business. At present, the primary competitors for PacketVideo's multimedia software products are the internal multimedia design teams at the OEM handset manufacturers to whom PacketVideo markets its products and services. Furthermore, we believe that the deployment of mobile broadband networks will spawn the development of entire new categories of software applications that can take full advantage of the distinctive mobility features inherent in mobile broadband systems. While we expect the competition from the OEM internal multimedia design teams and other independent multimedia software providers to increase in the next few years, we expect PacketVideo will be able to leverage its industry position and help develop these types of next-generation mobile broadband software applications.

Identify and pursue acquisitions and investments to accelerate and improve the development of our end-to-end wireless broadband solutions. We believe there are a number of companies participating in the WiMAX technology, wireless broadband and wireless multimedia sectors that could be attractive acquisition or investment candidates. We continue to monitor these opportunities and may pursue those which we believe will enhance our capabilities and product offerings.

Acquire additional wireless spectrum to complement our existing portfolio. We believe that expanding our spectrum footprint will make us more attractive to potential network partners. As such, we are actively evaluating spectrum acquisition and leasing opportunities and will pursue those which allow us to obtain complementary spectrum at prices that we believe to be attractive. We also believe that there may exist opportunities to obtain spectrum internationally which we will continue to monitor.

Our Technologies and Products

WiMAX Products and Technologies

Based in San Diego, California, our Advanced Technology Group, a part of our NextWave Broadband subsidiary, is developing 802.16e WiMAX compliant chipsets, network components and device technologies designed to enhance the capabilities and economics of fixed and mobile WiMAX networks. NextWave Broadband was formed as a Delaware corporation in 2004 and did not have any significant operating history prior to our emergence as a new wireless technology company in April 2005. Our Advanced Technology Group includes the historical operations of CYGNUS Communications Inc., a company we acquired in February 2006. CYGNUS was formed as a Delaware corporation in 2004 and operated as a research and development company. We owned approximately 50% of the outstanding equity of CYGNUS from its formation until the 2006 acquisition.

Our Advanced Technology Group's 802.16e compliant products are expected to reduce network capital and spectrum costs by enabling fixed and mobile WiMAX to more efficiently handle bandwidth-intensive and quality of service dependent applications such as VoIP telephony, streaming audio and video, video conferencing and real-time gaming. Our Advanced Technology Group's products and technologies are intended to enhance the scalability and performance of WiMAX networks by enabling managed quality of service on multiple frequency bands. We believe that enabling WiMAX to operate over multiple frequency bands will significantly improve the economics of WiMAX network

deployments for the following reasons:

39

- WiMAX network operators will have the ability to assemble a licensed spectrum footprint using multiple frequency bands as opposed to having to acquire scarce spectrum in a single frequency band;
- carriers will have the ability to address network coverage and capacity issues via the acquisition of low-cost spectrum as opposed to costly cell splitting; and
- the ability of frequency-agile WiMAX devices to roam between multiple WiMAX networks will be facilitated.

We believe that to fully optimize mobile WiMAX for the efficient delivery of bandwidth intensive multimedia applications requires a total system development strategy that includes all of the key elements of the 802.16e WiMAX air interface. By adopting this approach, we expect to offer network infrastructure and device manufacturers a comprehensive suite of products including low-power 802.16e compliant digital baseband ASICs and RFICs, software defined radio platforms, base station channel card reference designs and innovative terminal device reference designs.

Our Advanced Technology Group, which now includes the employees of our recently merged CYGNUS subsidiary, is comprised of over 173 employees and is led by a highly accomplished team of senior engineers with an average of 19 years experience in the development of advanced wireless communications technologies and products, such as digital baseband ASICs, radio frequency technologies including multi-band RFICs, advanced antenna systems, SDR, mobile terminal designs and device enabled application software. Our Advanced Technology Group team members have led major technology development initiatives at companies such as Intel, Motorola, Nokia, QUALCOMM and Texas Instruments and have been instrumental in developing some of today's dominant wireless technologies. Our founder and Chief Executive Officer, Allen Salmasi, was a member of the original QUALCOMM executive team and played a key role in the development and successful commercialization of the CDMA wireless technology standard used worldwide today. Many members of our development team worked with Mr. Salmasi at QUALCOMM on the CDMA technology development and have re-joined him at NextWave to pursue the development of next-generation wireless broadband technologies based on WiMAX.

Our wireless broadband products and technologies are in the early stages of development and will require a substantial investment before they may become commercially viable. We are currently unable to project when our wireless broadband products and technologies will be commercially deployed and generate revenue. Our wireless broadband products currently under development include:

WiMAX Semiconductor Products

Digital Baseband Application Specific Integrated Circuits (ASICs): An ASIC is an integrated circuit or chip customized for a specific purpose. Our family of 802.16e compliant digital baseband ASICs represent the core of our system architecture and product line. All of our 802.16e compliant, low-power mobile subscriber station (MSS) ASICs are being designed to perform physical layer (PHY) and media access control (MAC) functions and will include optimized scheduling and the ability to support multiple frequency bands.

Radio Frequency Integrated Circuits (RFICs): An RFIC is part of the front-end of a radio system that receives a radio frequency signal, converts it to a lower frequency and modifies it for further processing. Designed to utilize multiple spectral bands to achieve high throughput performance, our RFICs are part of an advanced radio frequency subsystem that is matched to our family of baseband ASICs and is expected to enable a mobile device to operate over a wide range of operational frequencies without sacrificing overall performance.

WiMAX Network Products

Software Defined Radio (SDR): A SDR system is a radio communication system which uses software to modulate and demodulate radio signals. In a wireless radio network, the design goal of an SDR is to provide for a capability to improve the performance of the baseband portion of the radio sub-system, incorporated into a Base Transceiver Station (BTS) by simply upgrading the SDR's software. This eliminates the need for costly and time-consuming hardware upgrades. Designed to complement our planned line of ASICs, our SDR platform will include 802.16e compliant MAC and PHY layer software suitable for both macro and microcell base station deployments and is intended to provide improved operational flexibility and cost-effectiveness by leveraging a design platform that combines programmability as well as ASIC-level performance.

Channel Card: Our channel card reference designs will specify a complete WiMAX base station transceiver unit that can be easily installed in third party base station platforms. We intend to incorporate leading-edge architecture and algorithms throughout our channel card design to enable the most cost-effective and high-performance mobile WiMAX network deployment.

Microcell Base Transceiver Station (BTS): A BTS, also known as a wireless base station, includes equipment needed to transmit and receive radio signals (transceiver), antennas, and the electronics required to communicate with other network elements. Unlike a conventional BTS which can provide radio coverage over a radius of several miles, a microcell BTS is much smaller in size and is designed to serve very small geographic areas such as a street corner or a building complex. Our microcell BTS is an important component of our multi-tiered system architecture. Designed to complement macro-base station deployments, our microcell BTS is intended to provide low-cost capacity and coverage relief where required. We are designing our microcell BTS to operate as a fully functional single-sector base station that can be installed on utility poles, side-mounted on buildings, or installed in other unconventional locations.

WiMAX Subscriber Products

Mobile Terminal Reference Designs and Software Development Kits (SDK): Our reference designs and SDKs are intended to accelerate volume sales of our semiconductor products by enabling mobile device manufacturers to reduce the time required to develop and launch compliant products including handsets and portable computing platforms.

Other Systems Initiatives

Home Gateway Reference Designs: Our 802.16e compliant home gateway reference designs are intended to provide gateway manufacturers with a specification for an integrated WAN/LAN platform that can simplify the management of and enable multi-platform access to personal multimedia content such as music and audio files.

Advanced Antenna Systems: To improve spectral efficiency and network performance, we are developing an advanced antenna system incorporating technologies such as beamforming and MIMO. These technologies are being designed to work on both the infrastructure and mobile device side of our network solution.

WiMAX Network Solutions

Based in Henderson, Nevada, our Network Solutions Group, a part of our NextWave Broadband subsidiary, intends to build and operate WiMAX compliant networks in partnership with wireless service providers, cable operators, multimedia content distributors, applications service providers and Internet service providers that wish to provide advanced wireless broadband products and services to their customers. We expect these networks to be deployed over our licensed spectrum, to take advantage of our advanced back-office systems, to utilize third party network infrastructure equipment that incorporate our products and technologies, and to be compatible with mobile devices

that utilize the family of chipsets that we are currently developing.

Our Network Solutions Group's 37 employees have extensive backgrounds in building and operating wireless networks and in designing and implementing back-office systems. Since 2003, our Network Solutions Group's engineers have been operating a test-bed facility in Henderson, Nevada, to evaluate the capabilities of various wireless technologies including 1xEV-DO, TD-CDMA and Flash-OFDM. These technical evaluations included in-depth assessments of key performance criteria including link budgets, spectral efficiencies, service quality, data rates, connection reliability, mobile capabilities, data link security and cost-per-bit economics.

In parallel to its technology assessment initiatives, our Network Solutions Group has also developed and implemented an advanced IP core network designed to support end-to-end IP connectivity, reduce IP core network costs, quickly enable new services and facilitate easy interconnection between a Network Solutions Group operated network and the existing network infrastructure of our network partners. During the same period, our Network Solutions Group also completed the design and has begun implementation of an advanced back-office system architecture consisting of billing, operational support systems (e.g., Mediation, LDAP and RADIUS) and customer care systems and has implemented a network operations center that will enable our Network Solutions Group to efficiently monitor the performance of its managed networks.

We intend to implement a shared network model under which NextWave will seek network partners to fund the cost of building and operating a mobile WiMAX network utilizing our licensed spectrum and our products and technologies. We believe that this model will be attractive to potential network partners as it will allow them to operate as facility-based service providers at a lower cost than building and operating a network on their own.

To support our shared network business, our Network Solutions Group will be responsible for providing the following services:

- RF design;
- Network construction;
- Network optimization;
- Network operations center implementation;
- IP core network including security integration;
- Core network integration;
- Billing and operational support systems;
- Customer support systems; and
- Network operations and maintenance, including Network Management Systems (NMS).

Las Vegas Trial Network

To demonstrate the features and capabilities of our end-to-end network solutions, our Network Solutions Group is currently building an 802.16e WiMAX compliant trial network in Henderson, Nevada, that will utilize our licensed frequencies and is expected to become operational in 2006. We intend to use this trial network to conduct a comprehensive technical field trial of 802.16e WiMAX technology that will combine our advanced IP core and back-office systems with a 28 site radio access network. We expect to implement this trial with vendor partners who are interested in working with us to develop our end-to-end WiMAX system and believe that the trial will be a critical step towards successful commercialization of our end-to-end WiMAX system solution and the development of our products and technologies. In addition, to accelerate industry development of WiMAX technologies, we intend to make our trial network facilities available to others in the WiMAX industry for the purpose of conducting product evaluations and compatibility testing.

We believe that Las Vegas represents an ideal market for a mobile WiMAX network for the following reasons:

- Las Vegas is one of the fastest growing metropolitan areas in the country, with demographics that are conducive to the marketing of wireless broadband services;
 - Existing tower inventory and flexible zoning procedures will reduce the time required to deploy a network;
- As the current operational headquarters for our Network Service Group, most of our network engineering and resources needed to design, build, and operate a mobile WiMAX network are already located in the market; and
 - Las Vegas represents a highly attractive market for the prospective network and service provider partners.

PacketVideo Multimedia Software Products

Based in San Diego, our PacketVideo subsidiary has 156 employees and is a global provider of embedded multimedia software products for mobile devices. PacketVideo was formed as a Delaware corporation in August 1998 and was privately held prior to its acquisition by NextWave in July 2005.

We expect that global deployments of mobile broadband networks will create a unique opportunity for software developers such as PacketVideo to create innovative multimedia software applications optimized for the mobile environment, and believe that PacketVideo is ideally positioned to help develop these types of next-generation, mobile broadband software applications.

PacketVideo's software, which it licenses to the world's leading mobile device manufacturers and wireless carriers, transforms a mobile phone or other mobile device into a feature-rich multimedia device that allows people to stream, download, and play video and music, receive live TV, or engage in two way video telephony. PacketVideo's innovations and engineering leadership have led to breakthroughs in content encoding, content delivery systems, and advanced handset development around the world.

For mobile device manufacturers, shorter product cycles and increasing demand for advanced technologies are driving collaboration with third party solution providers, such as PacketVideo, to aid their product development. We believe that PacketVideo's technical capabilities and depth of knowledge are key reasons why PacketVideo has been chosen by the world's largest device manufacturers and wireless carriers to help them quickly develop and introduce new multimedia enabled handsets and multimedia services to the market. Tens of millions of handsets containing PacketVideo software have been shipped worldwide by device manufacturers including LGE, Motorola, Nokia and Samsung. In addition, PacketVideo provides multimedia software solutions to some of the world's largest wireless carriers including NTT DoCoMo, Orange, T-Mobile and Verizon Wireless. According to IDC, high-end mobile phones and converged mobile devices represented 20% of all mobile phones shipped in 2005. This percentage is expected to increase to 45% of the more than one billion handsets forecasted to be shipped in 2008. We believe that this trend, combined with forthcoming software from PacketVideo that contains major enhancements, will enable PacketVideo to maintain its strong market share position.

PacketVideo's current suite of device embedded software solutions are based on a modular architecture to enable rapid integration with the industry's leading hardware platforms and operating systems and support the following set of mobile multimedia applications:

· Video streaming media applications;

· Electronic program guide;

· Content catalog - integrated media navigation;

- Digital camcorder - Video recorder;
- Two-way video telephony communications;
- Digital media broadcast receiver/player;
- Multi-format multimedia player/recorder;
- Digital music download/streaming playback;
- Digital still camera and image organizer;
- Live camera surveillance; and
- Streaming radio player.

Current PacketVideo Embedded Software Products

pv2way™ - PacketVideo Two Way Video Communicator: The pv2way Two Way Video Communicator software enables synchronous two-way voice and video conversations, video conferencing with picture-in-picture, call recording options, and is extendable to IP and SIP-based VoIP, PoC and Push-to-View.

pvPlayer™ - PacketVideo Media Player: The pvPlayer software is built on PacketVideo's industry leading video engine and supports streaming, progressive download and playback with support available for all major mobile content types. It can be configured as separate audio and video applications or as a single integrated media player.

pvCamcorder™ - PacketVideo Camcorder & Digital Camera: The PacketVideo pvCamcorder & Digital Camera software lets users record audio and videos directly on their phone using PacketVideo's optimized encoder libraries. Users can play recorded files locally or send them to others. pvCamcorder uses PacketVideo's author engine and optimized codecs to provide smoother, improved quality recording of audio, video and digital photos.

Future PacketVideo Software Products

The introduction of affordable, high-speed Internet service via DSL and cable broadband provided software developers with a unique opportunity to develop entire new categories of software applications. Many of these applications focused on the capture, manipulation, and transmission of multimedia content such as music, images, and video. Several, such as iTunes, Windows Media Player, Google Video, and peer-to-peer applications such as Napster and BitTorrent have achieved extremely high levels of popularity and, in some cases, spawned businesses with market valuations that exceed those of the companies that actually provide broadband connections to end-users. We believe that a similar opportunity to develop innovative software applications, optimized for the mobile environment, exists with the wide scale introduction of affordable mobile broadband services.

The emergence of mobile broadband will necessitate the development of new categories of software applications optimized to take full advantage of the distinctive mobility features inherent in mobile broadband systems. To be successful, developers of these new software applications must accommodate the complexities (e.g., variable connection rates) and unique capabilities (e.g., mobile positioning) associated with wireless broadband and will need to overcome mobile device (e.g., smartphones) design restrictions such as limited memory and on-board processing capabilities. In addition, mobile application software developers will need to fully understand underlying wireless broadband network technologies such as WiMAX to ensure optimal performance of their multimedia software

applications in a challenging wireless environment. We expect that global deployments of mobile broadband networks will create a unique opportunity for software developers such as PacketVideo to create innovative multimedia software applications optimized for the mobile environment.

We believe that PacketVideo is well positioned to help develop these types of next-generation, mobile broadband software applications for the following reasons:

- PacketVideo is already a global provider of device embedded, mobile multimedia software and has broad experience in developing software for memory and processor limited mobile devices.
- As part of NextWave, PacketVideo will have full access to the company’s WiMAX technology development activities and will be able to develop new multimedia software applications that take full advantage of the unique capabilities we are designing into our products and technologies.
- Unlike the aforementioned PC software environment, there are no dominant mobile device operating systems and, in fact, over two dozen such operating systems are currently in use by mobile handset manufacturers worldwide. PacketVideo’s software has been engineered to work with virtually all of the most popular mobile device operating systems in use today. By maintaining this flexible approach, we expect that PacketVideo’s next generation of mobile broadband software will continue to enjoy wide scale industry adoption.

Spectrum Portfolio

We are actively engaged in obtaining rights to licensed spectrum across the United States as part of our plan to partner with service providers and deploy mobile WiMAX networks. To date, we have acquired spectrum and entered into long-term leases that provide us with exclusive leasehold access to licensed spectrum throughout the U.S. We have compiled a spectrum portfolio covering approximately 206 million persons, or POPs, across the country, with 10MHz or more of spectrum in markets covering 182 million persons. We are focused on acquiring authorizations to use licensed spectrum in the top 100 U.S. markets, which have population densities and demographics most suitable to drive adoption of wireless broadband. We believe that our spectrum footprint, which will include nine of the top ten and 15 of the top 20 markets in the U.S., makes us attractive to potential network partners. We have also acquired licenses to use spectrum in smaller markets and plan to continue to acquire licenses in these markets to improve our overall coverage footprint.

To date, we have focused our efforts on obtaining licenses or other rights to use 2.3 GHz Wireless Communication Service (“WCS”) spectrum and 2.5 GHz Broadband Radio Service (“BRS”) and Educational Broadband Service (“EBS”) spectrum. We believe these spectrum bands are suitable for the deployment of mobile WiMAX networks and we are engineering our products and technologies to take advantage of the acquired licenses. We believe that additional spectrum bands are also attractive for the deployment of mobile WiMAX networks, including the 1.7GHz/2.1GHz band (known as the Advanced Wireless Service, or AWS, spectrum band) and in the future we may obtain spectrum in those bands. Through our subsidiary, AWS Spectrum Inc., we are participating in the AWS spectrum auction. Summary information about our current spectrum holdings is set forth below.

<u>Geographic Service Area Designation</u>	<u>Market Name/Coverage Area (1)</u>	<u>Spectrum Band (2)</u>	<u>POPs (mm)</u>
REAG 06	West region	WCS	53.9
REAG 01	Northeast region	WCS	51.4
REAG 05	Central region	WCS	43.7
MEA 44	Los Angeles - San Diego, CA	WCS	24.6
---		EBS	16.7

	New York, NY metropolitan area (3)		
MEA 18	Chicago, IL	WCS	14.1
MEA 16	Detroit, MI	WCS	10.9
MEA 01	Boston, MA	WCS	9.3
MEA 31	Houston, TX	WCS	7.1
MEA 20	Minneapolis, MN	WCS	6.8

MEA 40	Phoenix, AZ	WCS	5.4
MEA 33	Denver, CO	WCS	5.4
MEA 15	Cleveland, OH	WCS	5.2
MEA 17	Milwaukee, WI	WCS	5.1
MEA 46	Seattle, WA	WCS	5.1
MEA 30	St. Louis, MO	WCS	4.9
MEA 38	San Antonio, TX	WCS	4.0
MEA 45	Portland, OR	WCS	4.0
---	Los Angeles, CA (Orange County) (4)	EBS	3.3
MEA 29	Kansas City, KS/MO	WCS	3.3
MEA 21	Des Moines, IA	WCS	2.9
MEA 9	Jacksonville, FL	WCS	2.8
MEA 34	Omaha, NE	WCS	1.8
---	Las Vegas, NV	BRS	1.7
MEA 03	Buffalo, NY	WCS	1.5
MEA 48	Hawaii	WCS	1.3
---	Albuquerque, NM	BRS	0.8
	Poughkeepsie/Otsego, NY	EBS	0.6
	Total (excluding overlaps)		205.1

- (1) WCS licenses are assigned by the FCC according to MEAs or REAGs (see further explanation below in “WCS Spectrum”). MEAs are named for the largest metropolitan area contained within the licensed geographic service area. An MEA is significantly larger than the metropolitan area for which it is named. REAGs are named for the geographic region the license covers.
- (2) Our WCS and BRS spectrum is held directly through FCC licenses. Our EBS spectrum has been leased on a long-term basis from current license holders.
- (3) We lease EBS spectrum from multiple parties in the greater New York, NY metropolitan area, including geographic areas in New York, New Jersey and Connecticut. These leases give us access to different amounts of spectrum in specific parts of the market area. The term of these leases range from 20 to up to 60 years when their renewal options are included
- (4) We lease EBS spectrum from The Orange Catholic Foundation in the Los Angeles, CA (Orange County) area. This lease has an initial 10 year term and contains five renewal options for 10 years each to extend the term of the lease.

WCS Spectrum

We have acquired WCS spectrum from third parties pursuant to privately negotiated purchase agreements. The 2.3 GHz WCS band is divided into four frequency blocks, A through D. Blocks A and B have 10MHz of spectrum each and blocks C and D have 5 MHz each We have acquired WCS licenses in the A, B, C and D frequency blocks. The WCS A and B blocks are licensed in 52 individual geographic regions covering the United States, including the Gulf of Mexico, and are called Major Economic Areas (MEA). The WCS C and D blocks are licensed in six larger geographic regions, also covering the United States and are called Regional Economic Area Groupings (REAGs). Both MEAs and REAGs are of various sizes in terms of population and geographic coverage.

WCS licenses are allocated by the FCC for “flexible use.” This means that the spectrum can be used to provide any type

of fixed, portable, mobile (except aeronautical mobile) or radiolocation services to individuals and businesses, including the wireless broadband services we intend to offer. Any such offerings must be consistent with international agreements concerning spectrum allocations, and are subject to compliance with technical rules in Part 27, Title 47 of the Code of Federal Regulations.

BRS and EBS Spectrum

We have acquired BRS spectrum licenses from third parties pursuant to privately negotiated purchase agreements. In the future, licenses for vacant BRS spectrum may also be obtained through third parties and FCC auctions. Rights to lease and use EBS spectrum are acquired by commercial interests like us from educational entities through privately negotiated lease agreements. Our long-term leases make available to us exclusive leasehold access to the leased EBS spectrum for a total period of time ranging from 20 to up to 60 years when renewal options are included. On April 27, 2006, the FCC released new rules governing EBS lease terms. EBS licensees are now permitted to enter into lease agreements with a maximum term of 30 years; lease agreements with terms longer than 15 years must contain a “right of review” by the EBS licensee every five years beginning in year 15.

Under current regulations, after giving effect to an FCC-mandated transition of the spectrum to a new band configuration, which must occur in the next 3-4 years, the total spectrum bandwidth licensed by the FCC for EBS and BRS spectrum is 194 MHz. Approximately 75% of this spectrum is licensed for the Educational Broadband Service and 25% is licensed for the Broadband Radio Service. Under FCC rules, regulations and policies (“FCC rules”), up to 95% of the spectrum dedicated to each EBS license can be leased for commercial purposes subject to compliance with FCC rules. After transitioning the EBS and BRS spectrum to the new band plan, individual channels and channel groups of EBS and BRS spectrum will range from 5.5 MHz to 23.5 MHz of spectrum. Most, but not all, EBS and BRS channel groups contain 23.5 MHz of spectrum.

Until 1996, BRS spectrum was licensed according to Geographic Service Areas with a 35-mile radius. These “incumbent” licenses continue to exist today. In 1996, the FCC conducted an auction and assigned licenses for available BRS spectrum according to Basic Trading Areas or BTAs of various sizes. These BTA licenses were granted subject to the prior rights of the incumbent BRS license holders. We have acquired licenses for incumbent BRS licenses, licensed for 35-mile Geographic Service Areas. We may in the future acquire BRS spectrum licensed for BTAs.

EBS spectrum is licensed only for Geographic Service Areas with a 35-mile radius. In the future, vacant EBS spectrum may be assigned by BTAs. EBS spectrum is licensed exclusively to accredited educational institutions, governmental organizations engaged in the formal education of enrolled students (e.g., school districts), and nonprofit organizations whose purposes are educational.

The FCC’s rules for BRS and EBS spectrum were substantially revised in 2004 to provide more flexibility in how the spectrum is licensed and used; proceedings to revise the rules continue today. Use of the spectrum has evolved to include fixed and mobile, digital, two-way systems capable of providing high-speed, high-capacity broadband service, including two-way Internet access service via low-power, cellularized communication systems and single-cell high-power systems. On April 27, 2006, the FCC released additional orders to reform FCC rules related to BRS and EBS spectrum. The new, amended rules will not become effective until July 19, 2006; certain rules will be subject to petitions for reconsideration. For a more detailed description of these new rules, see “Government Regulation - BRS/EBS License Conditions.”

International Investments

We have made international investments to leverage our development activities and to potentially serve as a vehicle to market our WiMAX products in international markets. These investments include a 51% interest in Inquam Broadband, a joint venture seeking spectrum licenses located in Germany and a 33% interest in Hughes Systique, an offshore development company located in India. In addition, we have opened a liaison office in Korea, the location of the world’s first commercial metropolitan-area wireless broadband network.

Inquam Broadband

We acquired 51% of the equity of Inquam Broadband Limited, a Cayman Islands corporation, for 1.3 million Euros, or approximately \$1.6 million. Inquam Broadband was formed in January 2006 as a joint venture with Inquam-BMR GP, a private investment partnership. We invested in Inquam Broadband for the purpose of investing in and potentially operating broadband telecommunications assets in Germany. Inquam Broadband and its subsidiary have not yet conducted any significant operating activities.

In connection with the formation of Inquam Broadband, we received an option to acquire a 51% equity interest in Inquam Deutschland GmbH for an exercise price of EUR 9,690,000, subject to certain adjustments. Inquam Deutschland, an affiliate of Inquam-BMR GP, holds a nationwide spectrum award of 2x1.25 MHz from the German telecommunications regulatory agency. We may exercise our option to purchase 51% of Inquam Deutschland and Inquam Broadband may implement and operate a pilot network in Cologne, Germany, together with Netcologne, using the existing spectrum in Inquam Deutschland.

Hughes Systique

In October 2005, we acquired a 33% equity interest in Hughes Systique Corporation for approximately \$4.5 million. The remaining equity is owned by Hughes Communications, Inc., the parent company of Hughes Network Systems, and the employees of Systique. Systique is a newly formed offshore development company that specializes in providing software development services to the telecommunications industry using engineers and software developers in India. The President and CEO of Systique, Pradeep Kaul, has more than 33 years of experience in the wireless industry, including as an executive at Hughes Network Systems, and previously formed a successful offshore development company that was sold to Flextronics International. We entered into the relationship with Systique to facilitate and expedite the development of software modules and applications required in connection with our broadband development activities. We have entered into a 24 month service agreement with Systique pursuant to which we have agreed to contract for a minimum level of programmers during the term of the agreement.

Korea Liaison Office

In January 2006, we obtained the necessary governmental approvals to open a corporate liaison office in Korea limited to five employees. Our country manager, Dr. Hyock Jo Kwon, was President and CEO of Shinsegi Telecom Company, which launched the world's first commercial wireless network based on CDMA technology. Our Korea liaison office occupies leased office space in Seoul's Korea Stock Exchange Building. The goal of the office is to establish, develop and pursue mutually beneficial business opportunities and technology relationships in wireless communications with Korean corporations and research organizations addressing advance wireless products and services for global markets.

Korea has become a global leader in the wireless broadband industry. Korea Telecom is currently deploying the world's first mobile broadband network based on the WiBro standard, scheduled for commercial development in June 2006. WiBro was developed by Korea's Electronics and Telecommunications Research Institute (ETRI) and industry players and has been harmonized to the IEEE 802.16e standard. South Korea's Telecommunications Technology Association (TTA) was recently named as the world's second WiMAX Forum certification laboratory to provide testing and certifying services for WiMAX.

Sales and Marketing

WiMAX Products & Technologies

We intend to market our 802.16e WiMAX compliant products and technologies to network infrastructure and device manufacturers as well as network operators worldwide. We plan to utilize a company-owned direct sales organization and third party outlets to license our technologies and will utilize third party sales representatives and stocking distributors as additional channels to market our chipsets. In addition, we also intend to utilize a direct sales organization and third party outlets to market and/or license our network products and technologies to network infrastructure manufacturers who intend to market WiMAX network equipment to wireless broadband service providers.

We intend to promote industry awareness of our products and technologies via the deployment of our Las Vegas trial network, and through industry trade shows, public relations initiatives, trade advertising and our company web site. In

addition, we intend to actively work with leading trade publications and industry analysts to educate potential customers on the benefits of our products and technologies.

WiMAX Network Solutions

We intend to provide network design, deployment, and management services primarily to our service provider partners who will help finance the construction and operation of networks based on our technologies. Because our network services will be provided in connection with our shared network activities, we do not envision the need to develop a separate sales channel to market our network services.

We expect that marketing of the mobile broadband services shared network will be performed by our network partners. We anticipate our network partners to include wireless service providers, cable operators, multimedia content distributors, applications service providers and Internet service providers that have mature retail distribution and customer service capabilities.

In connection with our Las Vegas market trial which is scheduled for later this year, we intend to generate market awareness and promote our network services through print and broadcast advertising, supported by direct marketing, internet sales channels and event marketing initiatives.

Multimedia Software Products

Our PacketVideo subsidiary utilizes a team of strategic account managers to market its multimedia software products to device manufacturers and service provider customers in North America, Asia and Europe. At present, PacketVideo's customers include BenQ-Siemens, Fujitsu, LGE, Mitsubishi, Motorola, NEC, Nokia, Orange, Panasonic, Samsung, Sanyo, Sony-Ericsson, T-Mobile and Verizon Wireless.

To promote its suite of software products and services, PacketVideo exhibits at high profile wireless trade events including 3GSM World Congress, CTIA, and CTIA Wireless IT & Entertainment.

Geographic Breakdown of Revenues

For the period from inception (April 13, 2005) to December 31, 2005, we have generated \$1.9 million of revenues (44.8%) in the United States, \$1.3 million (31.9%) in Japan, \$0.6 million (13.3%) in Europe and \$0.4 million (10.0%) in other regions of the world.

Competition

Advanced Technology Group

We expect the market for our products and services to be highly competitive and expect that competition will increase in the future. The principal competitive factors include:

- Industry adoption of wireless standards that compete with mobile WiMAX; and
- Mobile WiMAX semiconductors and related products offered by our competitors.

Competing Wireless Broadband Standards

Mobile WiMAX will compete with third generation (3G), CDMA based wireless technologies and fourth generation (4G), Orthogonal Frequency Division Multiple Access (OFDMA) based wireless air-interface technologies that are intended to provide mobile broadband services to the market. Major alternative wireless broadband technologies include:

CDMA2000: CDMA2000 is a registered trademark of the Telecommunications Industry Association and describes a family of 3G mobile telecommunications standards based on the 3GPP2 telecommunications specification. CDMA2000 includes the 1xEV-DO standards which have achieved high levels of industry support in the United States and abroad, including nationwide deployments by Verizon Wireless and Sprint Nextel. It is expected that CDMA2000 may be harmonized with the 802.20 Mobile Broadband Wireless Access OFDMA that is currently under development.

UMTS: Universal Mobile Telecommunications System (UMTS) is a 3G wireless technology, based on the 3GPP specification, that uses W-CDMA (Wideband - Code Division Multiple Access) as its underlying air-interface standard. UMTS has achieved a high level of industry acceptance and has the support of some of the largest GSM wireless network operators in the world. To enhance network performance, UMTS network operators are currently deploying a new WCDMA protocol called High Speed Downlink Packet Access (HSDPA) that is expected to significantly improve downstream network data rates. In the future, it is expected that network operators will also deploy High Speed Uplink Packet Access (HSUPA) that is expected to significantly improve upstream network data rates. In addition, LTE, or Long Term Evolution, is the trade name for research and development work that is underway to identify future OFDMA technologies and capabilities needed to help ensure that 3GPP remains a highly competitive technology in the future.

As providers of mobile WiMAX product and technologies, we may compete indirectly with some or all of well-established, international companies that are engaged in the development, manufacture and sale of products and technologies that support alternative wireless broadband standards, including Alcatel, Ericsson, Huawei, LGE, Lucent, Motorola, Nokia, Nortel, QUALCOMM, Samsung and Siemens.

Competing WiMAX Products and Technology Providers

We will be competing with numerous companies that are developing or marketing WiMAX products and technologies that will directly compete with our products and technologies including Beceem, Fujitsu, Intel, Motorola, Nortel, RunCom, Samsung, Sequans and WaveSat. Some of these companies have significantly greater financial, technical development, marketing and other resources than we do, are already marketing commercial WiMAX semiconductor products, and have established a significant time to market advantage. In addition, we expect additional competition to emerge in the WiMAX semiconductor and components market from well-established companies, such as Broadcom and Samsung.

Network Solutions

We intend to partner with service providers to build and operate wireless broadband networks that operate over our licensed spectrum and incorporate our technologies. These networks will be utilized to provide mobile VoIP and broadband services to consumers and businesses in direct competition to some of the largest incumbent wireless operators in the world. These operators have already achieved high levels of market penetration, have established broad product and service distribution networks, and have developed very high levels of brand recognition. Our shared network partners will also have to compete with commercial 802.11 Wi-Fi networks as well as the growing number of municipal wireless broadband networks being sponsored by some major cities across the country such as San Francisco and Philadelphia. These municipal networks, which are often based on the popular 802.11 Wi-Fi standard, are expected to offer individuals with very low cost and nomadic Internet access that would compete with the mobile wireless broadband services our networks are intended to provide. Finally, our shared network partners may compete against emerging wireless multimedia broadcast networks such as Crown Castle's Modeo and QUALCOMM's Media Flow networks.

In addition, some incumbent wireless network operators, such as Sprint Nextel, have already announced mobile virtual network operator (MVNO) business relationships with service provider companies such as Internet service providers and cable operators. In some cases these pre-existing MVNO relationships could prevent some of these service providers from entering into shared network arrangements.

Multimedia Software Products

At present, the primary competitors for PacketVideo's multimedia software products are the internal multimedia design teams at the OEM handset manufacturers to whom PacketVideo markets its products and services. Importantly, these OEMs represent some of PacketVideo's largest customers. In addition several companies, including

Flextronics/Emuzed, Hantro, Nextreaming, Philips Software, Sasken and Thin Multimedia also currently provide software products and services that directly or indirectly compete with PacketVideo. As the market for embedded multimedia software evolves, we anticipate that additional competitors may emerge including Apple Computer, Real Networks and OpenWave.

Intellectual Property

In order to protect our proprietary rights in our products and technologies, we rely primarily upon a combination of patent, trademark, trade secret and copyright law as well as confidentiality, non-disclosure and assignment of inventions agreements. We have five U.S. patents, one of which is the subject of extensive foreign filing. We have eight patent applications pending in the United States as well as six U.S. provisional patent applications. We have eight pending intent-to-use U.S. trademark applications as well as four U.S. trademark registrations. Due to the early development stage of our WiMAX technology development business, our registered PacketVideo trademark is the only trademark that is currently material to our business.

In addition, we have typically entered into nondisclosure, confidentiality and assignment of inventions agreements with our employees, consultants and with some of our suppliers and customers who have access to sensitive information. We cannot assure you that the steps taken by us to protect our proprietary rights will be adequate to prevent misappropriation of our technology or independent development and/or the sale by others of products with features based upon, or otherwise similar to, those of our products.

Given the rapid pace of technological development in the communications industry, we also cannot assure you that our products do not or will not infringe on existing or future proprietary rights of others. Specifically, more than 20 companies have submitted letters of assurance related to IEEE Standard 802.16 and amendments stating that they may hold or control patents or patent applications, the use of which would be unavoidable to create a compliant implementation of either mandatory or optional portions of the standard. In such letters, the patent holder typically asserts that it is prepared to grant a license to its essential IP to an unrestricted number of applicants on a worldwide, non-discriminatory basis and on reasonable terms and conditions. If any companies asserting that they hold or control patents or patent applications necessary to implement mobile WiMAX do not submit letters of assurance, or state in such letters that they do not expect to grant licenses, this could have an adverse effect on the implementation of mobile WiMAX networks and the sale of our mobile WiMAX products and technologies. In addition, we can not be certain of the validity of the patents or patent applications asserted in the letters of assurance submitted to date, or the terms of any licenses which may be demanded by the holders of such patents or patent applications. If we were required to pay substantial license fees to implement our mobile WiMAX products and technologies, this could adversely affect the profitability of these products and technologies.

Although we believe that our technology has been independently developed and that none of our intellectual property infringes on the rights of others, we cannot assure you that third parties will not assert infringement claims against us or seek an injunction on the sale of any of our products in the future. If an infringement were found to exist, we may attempt to acquire the requisite licenses or rights to use such technology or intellectual property. However, we cannot assure you that such licenses or rights could be obtained on terms that would not have a material adverse effect on us, if at all.

We license and will continue to seek licenses to certain technologies from others for use in connection with some of our technologies. The typical duration of our license agreements is one year with the opportunity for renewal. While none of our current license agreements are material at the time of this registration statement, the inability to obtain such licenses or loss of these licenses could impair our ability to develop and market our products. If we are unable to obtain or maintain the licenses that we need, we may be unable to develop and market our products or processes, or we may need to obtain substitute technologies of lower quality or performance characteristics or at greater cost.

Participation in the WiMAX Standardization Process

The standardization of a wireless broadband technology such as WiMAX is driven by professional associations consisting of experts employed by companies who have an interest in developing the relevant technology. We believe that our participation in these associations is important in order to influence the development of standards and in order to keep up to date with the latest technological developments in our industry.

The most important technological standards in our industry are developed by the Institute of Electrical and Electronics Engineers (IEEE). WiMAX is based on the IEEE standard 802.16e for broadband wireless access. The 802.16e mobile WiMAX standard is the latest generation of the IEEE 802.16 Air Interface standard, which is the state-of-the-art standard for wireless multimedia distribution. It was initially designed for multimedia distribution for outdoor fixed broadband wireless access (BWA) markets where it addresses the “Last Mile” problem for the extension of fiber, cable and DSL networks. It takes the best features from earlier proprietary wireless access systems and combines them to provide a flexible wireless network solution capable of meeting the most stringent requirements for reliable multimedia communications.

NextWave has actively participated in the development of the IEEE 802.16 standard. Ken Stanwood, the CEO of NextWave’s CYGNUS subsidiary has participated in IEEE 802.16 from the very start, and is responsible for much of the core Media Access Control (MAC) layer technology in the standard. He recently finished a three year term as vice chair of IEEE 802.16. In addition, we recently hired Dr. Roger Marks as a Senior Vice President - Industry Relations of our Advanced Technology Group. Dr. Marks currently serves as chairman of IEEE 802.16. Many additional NextWave personnel support the process as task group officers and participants.

Even with the development of the IEEE 802.16 standard, the interoperability of wireless broadband devices and networks is not guaranteed. For example, two vendors could pick the same profile but implement it differently. The companies involved in the development of IEEE 802.16 decided to create another voluntary industry organization, known as the WiMAX Forum that would certify devices and technologies that meet a uniform standard. In April 2001, the WiMAX Forum was established, with Mr. Stanwood as one of the founders. The WiMAX Forum creates and monitors the test specifications for wireless broadband systems and components based on the IEEE 802.16 standard.

The WiMAX Forum now has hundreds of industry participants as members, including AT&T, Cisco, Intel, Motorola, Nokia, Nortel and Samsung. The WiMAX Forum is in the process of certifying fixed WirelessMAN-OFDM systems through independent laboratory conformance testing and plug-fests. Plug-fests are events at which participating companies have the opportunity to test and demonstrate the interoperability of their products based on a set of standards. The WiMAX Forum is embarking on test specifications and plug-fests for WirelessMAN-OFDMA scalable OFDMA mobile systems, commonly referred to as 802.16e systems.

In parallel with efforts by the IEEE and the WiMAX Forum, the Telecommunications Technology Association (TTA) in Korea developed WiBro, an 802.16-based standard, which emphasizes support for mobility based on the 802.16e amendment. Efforts supported by TTA and IEEE 802.16 to harmonize the WiBro standard with the IEEE 802.16e standard were successful. WiBro was converted from a wireless standard to a service requiring WiMAX certified equipment in the 2.3 GHz band.

Government Regulation

Overview

Communications industry regulation changes rapidly, and such changes could adversely impact us. The following discussion describes some of the major communications-related regulations that affect us, but numerous other substantive areas of regulation not discussed here also may influence our business.

Communications services are regulated to varying degrees at the federal level by the Federal Communications Commission (“FCC”) and at the state level by public utilities commissions (“PUCs”). NextWave’s suite of wireless broadband products and services is subject to federal regulation in a number of areas, including the licensing and use of spectrum, and the technical parameters, certification, marketing, operation and disposition of wireless devices. Applicable consumer protection regulations also are enforced at the federal and state levels.

The following summary of applicable regulation does not describe all present and proposed federal, state and local legislation and regulations affecting the communications industry. Some legislation and regulations are the subject of ongoing judicial proceedings, legislative hearings and administrative proceedings that could change the manner in which our industry is regulated and the manner in which we operate. We cannot predict the outcome of any of these matters or their potential impact on our business. See “Risks Relating to Government Regulation.”

Licensing and Use of Wireless Spectrum

The FCC regulates the licensing, construction, use, renewal, revocation, acquisition and sale of our licensed wireless spectrum holdings. Our wireless spectrum holdings currently include licensed spectrum in the WCS and BRS bands, and leased spectrum in the EBS band. We intend to use this spectrum to provide our suite of WiMAX wireless broadband products and services to our network partners.

Certain general regulatory requirements apply to all licensed wireless spectrum. For example, certain build-out or “substantial service” requirements apply to our licensed wireless spectrum, which generally must be satisfied as a condition of license renewal. The Communications Act and FCC rules also require FCC prior approval for the acquisition, assignment or transfer of control of FCC licenses. In addition, FCC rules permit spectrum leasing arrangements for a range of wireless licenses with FCC oversight. Approval from the Federal Trade Commission and the Department of Justice, as well as state or local regulatory authorities, also may be required if we sell or acquire spectrum.

The FCC sets rules, regulations and policies to, among other things:

- grant licenses in the WCS, BRS and EBS bands;
- regulate the technical parameters and standards governing wireless services, the operation and marketing of radio frequency devices and the placement of certain transmitting facilities;
- impose build-out or performance requirements as a condition to license renewals;
- rule on applications for license renewals;
- rule on assignments and transfers of control of FCC licenses;
- approve leases covering use of FCC licenses held by other persons and organizations;
- resolve harmful electrical interference between users of various spectrum bands;
- impose fines, forfeitures and license revocations for violations of FCC rules; and
- impose other obligations that it determines to be in the public interest.

Additional, more specific regulatory requirements apply to WCS, BRS and EBS spectrum, and are described below. Compliance with all of the foregoing regulatory requirements, and those listed below, increases our cost of doing business. For a description of an interference issue which may impact use of WCS, BRS and EBS spectrum, see “Risks Relating to Government Regulation-Wireless Devices utilizing WCS, BRS and EBS Spectrum May Be Susceptible to Interference from Satellite Digital Audio Radio Services (“SDARS”).”

WCS License Conditions

WCS licensees must comply with all applicable legal and technical rules imposed by the FCC, including those found in Part 27, Title 47 of the Code of Federal Regulations. WCS licenses are granted for ten-year license terms, and licensees are required to demonstrate that they are providing “substantial service” in their license area within the initial ten-year license term. Substantial service is defined as “service which is sound, favorable, and substantially above a level of mediocre service which just might minimally warrant renewal.” For virtually all WCS licensees, the renewal deadline and the substantial service build-out deadline is July 21, 2007. Failure to make the substantial service demonstration, without seeking and obtaining an extension from the FCC, would result in license forfeiture.

Extensions of time to meet substantial service demonstrations are not routinely granted by the FCC.

A coalition of WCS licensees who hold WCS spectrum licensed by the FCC, including us, filed a consolidated request for extension of the WCS substantial service deadline. If granted, WCS licensees would have until the later of July 21, 2010, or three years after the FCC adopts an order addressing potential SDARS interference issues, to demonstrate substantial service. If the FCC determines not to grant the extension request, we expect to satisfy the substantial service requirement for each of our WCS licenses before the July 21, 2007 deadline.

BRS-EBS License Conditions

Like WCS licenses, EBS and BRS licenses are granted for ten-year license terms, and licensees must comply with all applicable legal and technical rules imposed by the FCC, including those found in Part 27, Title 47 of the Code of Federal Regulations. Unlike WCS licenses, BRS and EBS licenses were granted at different times and, therefore, do not have a uniform expiration date. BRS and EBS licensees must also demonstrate that they are providing “substantial service” in their license areas. On April 27, 2006, the FCC released an order in which the substantial service deadline for EBS and BRS spectrum was set at May 1, 2011.

From 2004 to 2006, the FCC adopted a number of rule changes which created more flexible BRS/EBS spectrum rules to facilitate the growth of new and innovative wireless technologies and services, including fixed and mobile wireless broadband services. Although the proceedings to reform BRS/EBS rules have largely been completed, they remain subject to legal challenges and, thus, are subject to additional revisions. The FCC replaced the site-based licensing regime with a geographic service area “blanket” licensing regime, and it ordered the 2.5 GHz band to be reconfigured into three segments: upper- and lower-band segments for low-power operations, and a middle-band segment for high-power operations. The new BRS/EBS band configuration also eliminates the use of interleaved channels by licensees in favor of contiguous channel blocks. By creating contiguous channel blocks, and grouping high- and low-power users into separate portions of the BRS/EBS band, the new band plan reduces the likelihood of interference caused by incompatible uses and creates incentives for the development of low-power, cellularized broadband operations, which were inhibited by the prior band plan. The new BRS/EBS band plan will allow licensees to use the 2496-2690 MHz spectrum in a more economically efficient manner and will support the introduction of next-generation wireless technologies. The new rules preserve the operations of existing licensees, including educational institutions currently offering instructional television programming, but require that licensees transition to the new band plan by October 19, 2010 (barring disputes in the transition process), which includes relocating licensees from their current channel assignments to new spectrum designations in the band.

Given the recent adoption of new, amended FCC rules regarding transition to the reconfigured band plan, no transitions have been effected, but planning for this work has commenced. For each EBS and BRS licensee, the deadline for filing initial plans for the transition is January 19, 2009. After the initial plan is filed with the FCC, licensees will have a 90-day transition planning period, followed by an additional eighteen months to complete the transition. We and other parties intend to transition the 2.5 GHz band to the new configuration on a market-by-market basis, in a process that may require several years to complete nationally. When the transition is complete, which should occur by October 19, 2010, we believe that the 2.5 GHz band will be more suitable for providing NextWave’s suite of wireless broadband products and services. See, “Risks Relating to Government Regulation-We Will Not Have Complete Control Over our Transition of EBS and BRS Spectrum, Which Could Impact Compliance With FCC Rules.”

Point-to-Point Microwave License Conditions

We hold a number of 18 GHz and 23 GHz point-to-point microwave licenses in Las Vegas that we intend to use as part of our network to transmit or “backhaul” wireless broadband communications traffic to our cell sites and network operations center. These licenses are granted based upon applications that demonstrate that the applicant is legally and technically qualified and that the proposed station will not cause impermissible interference to other stations or proposed stations that are entitled to interference protection. These licenses also have license terms of 10 years, and are subject to satisfying construction deadlines that occur 18 months after the licenses are granted. Point-to-point microwave licensees must also comply with certain technical rules contained in Part 101, Title 47 of the Code of Federal Regulations.

New Spectrum Opportunities and Spectrum Auctions

Several FCC proceedings and initiatives are underway that may affect the availability of spectrum for commercial wireless services. These proceedings may make more wireless spectrum available to us and other new wireless competitors. We believe that additional spectrum bands may also be attractive for the deployment of mobile WiMAX networks, including the 1.7GHz/2.1GHz band (known as the Advanced Wireless Service, or AWS, spectrum band). In the future we may obtain spectrum in those bands through secondary markets acquisitions and leases and whatever mechanisms the FCC may establish including participation in FCC auctions. Through our subsidiary, AWS Wireless Inc., we are participating in the AWS spectrum auction.

Other FCC Requirements

Internet Access Services

Internet access services are generally considered “information services,” not “telecommunications services,” and are therefore exempt from common carrier regulation by the FCC. Such services are not, however, without regulatory requirements. Providers of facilities-based broadband Internet access services, and providers of interconnected VoIP services, are required to comply with the Communications Assistance for Law Enforcement Act (“CALEA”). Providers of interconnected VoIP services are also required to comply both with Enhanced 911 (“E911”) regulations, which require routing of 911 calls to geographically appropriate public safety answering points based on the caller’s location, as well as certain Universal Service Fund (“USF”) contribution, reporting and registration obligations. Certain consumer protection regulations may also apply at the state and federal levels. The regulatory treatment of other IP-enabled services, including the remainder of NextWave’s wireless broadband products and services, is presently under consideration by the FCC.

Voice over Internet Protocol

The FCC has and continues to consider the regulatory status of various forms of VoIP. In 2004, the FCC issued decisions in which it found that: (i) a computer-to-computer VoIP service for which no charge is assessed and conventional telephone numbers are not used, is an unregulated “information service,” rather than a telecommunications service; and (ii) long distance offerings in which calls originate from and terminate to the ordinary public switched telephone network, using regular telephones, but are transmitted in part through the use of IP, are “telecommunications services,” thereby rendering such services subject to the payment of access charges. The FCC also preempted states from exercising entry and related economic regulation of VoIP services that require the use of specialized end user equipment to send/receive calls over a broadband connection to the Internet, and use North American Numbering Plan (NANP) numbers as the identification mechanism for the user’s IP address (such that the NANP number is not necessarily tied to the user’s physical location for either assignment or use). This ruling did not address specifically whether this form of VoIP is an “information service” or a “telecommunications service,” or what regulatory obligations, such as intercarrier compensation, should apply. In 2005, as detailed herein, the FCC subjected “interconnected VoIP” service providers to Enhanced 911 and Communications Assistance for Law Enforcement Act obligations. In 2006, also detailed herein, the FCC subjected “interconnected VoIP” service providers to certain USF contribution, reporting, registration and contribution obligations. Issues surrounding whether or how VoIP offerings should be regulated, including whether they should pay access charges, along with the regulatory treatment of other IP-enabled services, is presently under consideration by the FCC.

E911 Services

The FCC has adopted E911 obligations that apply to broadband service providers that offer interconnected VoIP service to end users. E911 systems route 911 calls to a geographically appropriate public safety answering point based on the caller’s location. Unlike basic 911, which merely connects the caller with public safety entities, E911 provides public safety entities with the caller’s call back number and in many cases location information. The FCC order establishing this obligation was not clear as to whether the obligation, which has been effective since November 28, 2005, applies to both wholesale and retail providers of interconnected VoIP service. The obligation can be met through contracting with third parties or purchasing tariffed E911 services from local exchange carriers. There is also pending an FCC proceeding in which the FCC is examining whether to apply a range of additional E911 requirements to interconnected VoIP providers.

CALEA Requirements

Providers of interconnected VoIP and facilities-based broadband Internet access providers are subject to the requirements set forth in CALEA. CALEA requires that our equipment, facilities and services allow for lawfully

authorized electronic surveillance by law enforcement agencies based on either industry or FCC standards. In September 2005, the FCC extended CALEA obligations to facilities-based broadband Internet access providers and to interconnected VoIP providers, whether wireline or wireless. The FCC has pending a range of issues involving CALEA, including CALEA compliance extensions and exemptions, cost recovery issues, identification of future services and entities subject to CALEA, and enforcement matters.

Universal Service Fund

In 2006, the FCC established USF contribution, reporting and registration obligations for providers of interconnected VoIP. The USF contribution obligation is based upon the portion of revenues derived from “telecommunications” service and the end-user telecommunications revenues derived from interstate and international traffic. The FCC rules provide various mechanisms for determining the contribution figure. Some aspects of these contribution rules, as applied to providers of interconnected VoIP service, are the subject of a pending challenge in federal court. Interconnected VoIP service providers also will be subject to the same USF reporting procedures that apply to all other providers of interstate and international telecommunications. These reporting procedures involve quarterly reporting of the gross projected billed and collected end-user interstate and international revenues as well as annual reporting of actual gross-billed and collected end-user interstate and international revenues. Under the FCC rules, providers of interstate and international telecommunications whose annual USF contribution are expected to be less than \$10,000 are not required to contribute to the USF, or file quarterly or annual USF reports. All interconnected VoIP providers that have not already registered with the FCC (and designated an agent for service of process) must complete certain registration requirements.

Consumer-Related Regulations

The FCC is considering whether Internet access services, regardless of the technology used, should be subject to FCC consumer protection regulations. Various states may also exercise authority over terms and conditions of Internet access services, such as certain billing practices and other consumer-related matters. Compliance with additional consumer-related obligations will result in significant additional costs for us.

Privacy-Related Regulations

In providing NextWave’s suite of wireless broadband products and services to consumers, we may be required to comply with FCC-mandated rules that limit how customer proprietary network information, or CPNI, can be used for marketing purposes, and what we must do to safeguard CPNI. It has recently been reported that the call detail records of both wireline and wireless telephone customers are available from certain Internet-based vendors. Both Congress and state legislatures are considering legislation to criminalize the sale of call detail records and to further restrict the manner in which carriers make such information available. The FCC is investigating these practices and is examining whether existing regulations with respect to CPNI require revision or expansion, which could result in additional costs to us, including administrative or operational burdens on our customer care, sales, marketing and IT systems.

Equipment Certification

Our equipment must conform to a variety of federal regulations that require compliance with administrative and technical requirements as a condition to marketing devices that emit radio frequency energy.

Tower Siting

Wireless systems must comply with various federal, state and local regulations that govern the siting, marking, lighting and construction of transmitter towers and antennas, including regulations promulgated by the FCC and Federal Aviation Administration, or FAA. FCC rules subject certain tower locations to environmental and historic preservation statutory requirements. To the extent governmental agencies impose additional requirements on the tower siting process, the time and cost to construct and deploy towers could be negatively impacted. The FAA has proposed modifications to its rules that would impose certain notification requirements upon entities seeking to (i) construct or modify any tower or transmitting structure located within certain proximity parameters of any airport or heliport, and/or (ii) construct or modify transmission facilities using the 2500-2700 MHz radiofrequency band, which encompasses virtually all of the BRS/EBS frequency band. If adopted, these requirements could impose new

administrative burdens upon users of BRS/EBS spectrum.

56

E-waste legislation

Electronics waste laws, also known as “E-waste” laws, went into effect July 1, 2006 in California, China, Japan and the European Union (“EU”) and require electronics developers, manufacturers and distributors to eliminate hazardous substances, such as lead and mercury, in their products and to participate in, and finance, the recycling of E-waste. Congress is considering national legislation that would override state E-waste laws and provide for more consistent application of E-waste standards.

Employees

As of September 13, 2006 we had 424 full-time employees, including 173 in our Advanced Technology Group, 37 in our Network Solutions Group, 156 in PacketVideo and 58 in corporate operations and administration. We are not subject to any collective bargaining agreements and believe that our relationship with our employees is good.

Our History

NextWave Telecom and the PCS Business

Old NextWave Wireless was formed in 1996 as a wholly owned operating subsidiary of NextWave Telecom, Inc. (“NTI”), which sought to develop a nationwide CDMA-based PCS network. In 1998, Old NextWave Wireless, together with NTI and its other subsidiaries (the “NextWave Telecom group”), filed for protection under Chapter 11 of the United States Bankruptcy Code. During the seven-year pendency of the Chapter 11 case, Old NextWave Wireless continued its involvement in the build-out of NTI’s PCS network. Substantially all of the related assets, except the PCS licenses, were abandoned when NTI was sold to Verizon Wireless as part of the plan of reorganization of the NextWave Telecom group described below.

Wireless Broadband Development

Although a commercial wireless broadband business was not developed during the pendency of the Chapter 11 case, the vision for our company was created at that time. Beginning in 2003, NTI began to explore opportunities to create the technology for a broadband wireless network utilizing BRS spectrum in the 2.5 GHz frequency range. In late 2003, NTI received authority from the Bankruptcy Court to construct and test a wireless broadband network in the Las Vegas, Nevada metropolitan area. Old NextWave Wireless acquired the rights to 24 MHz of BRS spectrum in Las Vegas and began work on the test network. In 2004, Old NextWave Wireless acquired preferred stock representing a 50% equity interest in CYGNUS Communications, Inc., a company engaged in the development of wireless communications hardware. Among other reasons, to separate the new prospective BRS spectrum wireless technology business from the PCS business of the rest of the NextWave Telecom group, NTI formed a new subsidiary, NextWave Broadband, to be the operating company for the BRS business. The capitalization of a new wireless technology company was discussed with the stakeholders of the NextWave Telecom group and was made part of the plan of reorganization described below.

Plan of Reorganization and Verizon Wireless Transaction

On March 1, 2005, the Bankruptcy Court confirmed the plan of reorganization of the NextWave Telecom group, including Old NextWave Wireless. In December 2004, Old NextWave Wireless was converted from a corporation to a limited liability company. The plan of reorganization was funded with the proceeds from the sale of NextWave Telecom and its subsidiaries (other than Old NextWave Wireless) to Verizon Wireless for \$3.0 billion, in addition to previous PCS spectrum sales to Cingular Wireless, Verizon Wireless and MetroPCS. The plan of reorganization provided for the payment in full of all the creditors of the NextWave Telecom group and the funding of Old NextWave Wireless as a new wireless broadband technology company to be distributed to equityholders, together with an aggregate distribution of \$2.6 billion in cash and \$149 million principal amount of our Non-Recourse Secured

Notes. Prior to the consummation of the plan of reorganization, NTI and its subsidiaries entered into a global settlement agreement with the FCC resolving all outstanding claims of the FCC.

57

In connection with the sale of NextWave Telecom and its subsidiaries to Verizon Wireless, we agreed to indemnify NextWave Telecom and its subsidiaries against all pre-closing liabilities of NextWave Telecom and its subsidiaries and against any violation of the Bankruptcy Court injunction against persons having claims against NextWave Telecom and its subsidiaries, with no limit on the amount of such indemnity. We are not currently aware of any such liabilities that remain following the plan of reorganization and Verizon Wireless has not made any indemnity claims. All claims made in connection with the Chapter 11 case have been resolved except for *Finney v. NextWave*, which is described under "Item 8. Legal Proceedings-Finney v. NextWave."

A total of \$165 million is currently held in escrow (the "Escrow Amount") in order to satisfy any amounts due to Verizon Wireless in the event that the consolidated net loss of the NextWave Telecom group for the taxable year commencing on January 1, 2005, and ending on April 13, 2005 is, subject to certain adjustments, less than \$1.362 billion, to cover any tax deficiencies for the pre-closing tax period, and to cover other indemnifiable losses relating to NextWave Telecom and its subsidiaries, as described above. The Escrow Amount will be released in accordance with the escrow agreement upon the expiration of the applicable statute of limitations (including extensions thereof) relating to the tax matters addressed above. In addition, if at any time the Escrow Amount exceeds the amount, in the reasonable judgment of Verizon Wireless of the potential remaining indemnifiable losses described above, or if we have a final resolution with the IRS with respect to certain tax matters, such excess will be released.

To the extent that we are entitled to receive more than \$80,810,000 of the Escrow Amount, the FCC will, in accordance with the terms of the global settlement agreement referred to above, be entitled to a sharing payment equal to 20% of any such additional amounts, up to a total potential sharing payment of \$16,838,000. The first \$800,000 of the sharing payment will be paid to the FCC from a separate sharing payment escrow previously established for the benefit of the FCC. Any Escrow Amount that is distributed in excess of amounts payable to the FCC must be applied to redeem, pro rata, our \$149 million of Non-Recourse Secured Notes issued as part of the plan of reorganization and described below. Accordingly, we will not receive any of the Escrow Amount.

As part of the plan of reorganization, we issued \$149 million of Non-Recourse Secured Notes to the former equityholders of NextWave Telecom. The notes bear no interest and mature on April 13, 2055. Any claims under the notes will only be satisfied by any released Escrow Amount, net of payments due to the FCC. In the event the escrow is terminated before the maturity date and all released amounts have been paid to the note holders, any notes then outstanding will be null, void and of no effect. No holder of any notes will have any recourse against the Company or its assets or its affiliates, except to the extent that the Company receives any portion of the released Escrow Amount or otherwise does not comply with the indenture governing the notes or the related agreements.

Inception of a Wireless Technology Company

The following steps were taken to organize Old NextWave Wireless as a new wireless technology company as part of the plan of reorganization:

- The NextWave Telecom group abandoned substantially all of its PCS networks, technology and fixed assets, except the PCS spectrum licenses to be acquired by Verizon Wireless.
- NTI and its subsidiaries transferred all of their remaining non-PCS assets to NextWave Broadband, except cash and the PCS spectrum licenses to be acquired by Verizon Wireless. The assets contributed primarily consisted of property and equipment not desired by Verizon Wireless, having a fair market value of less than \$10 million.

· NextWave Broadband was transferred to Old NextWave Wireless.

- Old NextWave Wireless retained its investment in CYGNUS preferred stock and convertible notes, as well as wireless licenses useful for its new technology broadband business with a value of approximately \$33.6 million.

·NTI and its subsidiaries, including Old NextWave Wireless, obtained an order providing a release of claims pursuant to Section 1141 of the Bankruptcy Code. To the extent that such release did not eliminate all liabilities of the NextWave Telecom group, NextWave Wireless assumed and agreed to indemnify Verizon Wireless against such liabilities.

- NTI and its subsidiaries (other than Old NextWave Wireless) were sold to Verizon Wireless for \$3.0 billion.
- Membership units of NextWave were distributed to the former stockholders of NTI, which distribution was exempt from registration under the Securities Act pursuant to Section 1145 of the Bankruptcy Code. Upon this distribution, on April 13, 2005, Old NextWave Wireless emerged as NextWave Wireless.
- Simultaneously with the distribution, NextWave was capitalized with \$550 million of cash proceeds from the sale to Verizon Wireless and prior PCS spectrum license sales.
- Pursuant to the plan, the NTI stockholders received the undivided interests in the underlying assets of Old NextWave Wireless as part of their consideration for the redemption of their NTI shares, which was followed by the deemed contribution of these undivided interests to NextWave in return for membership interests in NextWave.

Our Recent and Pending Acquisitions

Since our emergence as a new wireless technology company, we have made several strategic investments and acquisitions, including most significantly:

- In July 2005 we acquired all of the outstanding shares of PacketVideo Corporation for approximately \$46.6 million in cash.
- Since our emergence as a wireless technology company, we have consummated transactions to acquire licensed spectrum rights, including subsequent lease obligations, for amounts totaling \$261.7 million, including our recent acquisition of WCS Wireless Inc., which holds spectrum covering 188.8 million persons, or POPs, in the Central, Western, and Northeastern United States, for \$160.5 million.

Corporate Conversion Merger

To enable our planned listing on The Nasdaq Global Market, NextWave Wireless LLC's board of managers and a majority in interest of NextWave Wireless LLC's members has approved the conversion of the Company from a Delaware limited liability company to a Delaware corporation. The corporate conversion will be effected through the merger of a wholly owned subsidiary of ours with and into NextWave Wireless LLC. We expect to effectuate the corporate conversion merger prior to our planned listing on Nasdaq. In the merger, NextWave Wireless LLC's equity holders will receive a number of shares of our common stock based on an exchange ratio to be determined by the Board of Managers of NextWave Wireless LLC. Each holder of NextWave Wireless LLC's limited liability interests will own the same percentage of the outstanding equity of the Company before and immediately after giving effect to the corporate conversion merger. In addition, we will assume NextWave Wireless LLC's obligations under all stock option plans of the Company and its subsidiaries.

Legal Proceedings

Proceedings Under Chapter 11 of the Bankruptcy Code

On June 8, 1998, NextWave Personal Communications Inc., NextWave Power Partners Inc., NextWave Partners Inc. and Old NextWave Wireless, all direct and indirect wholly-owned subsidiaries of NextWave Telecom Inc., filed a voluntary petition for relief under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the Southern District of New York. On December 23, 1998, NextWave Telecom Inc. filed its voluntary petition, in order to implement an overall corporate restructuring. On March 1, 2005, the Bankruptcy Court confirmed the Third Joint Plan of Reorganization dated January 21, 2005. The cornerstone of the Plan of Reorganization was the sale of NextWave Telecom and its subsidiaries, excluding Old NextWave Wireless, to Verizon Wireless for approximately

\$3.0 billion. Pursuant to the Plan of Reorganization, on April 13, 2005, all non-PCS assets and liabilities of the NextWave Telecom group were contributed to Old NextWave Wireless, and Old NextWave Wireless was capitalized with \$550 million in cash. Through this process, Old NextWave Wireless was reconstituted as a company with a new capitalization and a new wireless technology business plan. All claims made in connection with the Chapter 11 case have been resolved except for Finney v. NextWave, which is described below. See “Item 1. Business-Our History”

Finney v. NextWave

United States ex rel. Finney v. NextWave Telecom Inc. is a qui tam action filed in federal court in the Southern District of New York, with a corresponding administrative claim in bankruptcy court. Finney (the relator) alleges principally that NextWave Telecom and other defendants, including NextWave Wireless, failed to disclose the existence of a federal statute - the Federal Credit Reform Act - to various agencies of the federal government and to the federal courts. She asserts that decisions issued by the bankruptcy court, the U.S. Court of Appeals for the D.C. Circuit, and the Supreme Court of the United States in connection with the NextWave Telecom group's reorganization efforts were all flawed because they overlooked the relevance of that statute. She alleges that NextWave Telecom and the other defendants should be held liable because it failed to bring the statute to the attention of these government agencies and courts and seeks damages of more than \$9 billion.

The defendants filed a motion to dismiss on numerous grounds, including that the government was well aware of the existence of the Act, that it is not a false claim to fail to inform the government of the existence of a federal statute, that Finney's claim was effectively a collateral challenge to the decisions of the bankruptcy court and the Supreme Court, and that the action is barred by virtue of the global settlement with the FCC and the consummation of the Verizon Wireless acquisition and the bankruptcy reorganization.

On February 24, 2006, the district court issued an order adopting the defendants' principal arguments and proposing to dismiss the complaint in its entirety. Prior to dismissing, the district court asked the United States for its consent, and, on March 2, 2006, the United States consented to dismissal. On April 21, 2006, the District Court ruled that defendants were entitled to an award of legal fees. The court has referred the matter to a Magistrate to fix the amount of the fee award.

Finney has now filed a notice of appeal to the United States Court of Appeals for the Second Circuit. We expect to join with the other defendants to promptly file a motion to have the appeal dismissed or the decision below affirmed. We believe that the claims made by Finney are meritless and in fact frivolous and expect that we will prevail on appeal.

Other Litigation

We are currently a party to various other legal proceedings that arise in the ordinary course of our business. While management presently believes that the ultimate outcome of these proceedings, individually and in the aggregate, will not have a material adverse effect on our financial position, cash flows or overall trends in results of operations, litigation is subject to inherent uncertainties, and unfavorable rulings could occur. For example, we are currently engaged in a dispute relating to a lease of EBS spectrum covering approximately 1 million POPs in the Toms River, New Jersey geographic area. The lessor has claimed that we are in breach of the terms of the lease and that the lease has been terminated. We believe that these claims are without merit, and, in any event, any adverse resolution would not have a material adverse effect on our business, results of operations or financial condition.

Properties

We lease three facilities in the San Diego area, including our principal executive offices, containing an aggregate of 92,347 square feet. The terms of two of these leases include options to extend and the third does not expire until 2010. We also lease two locations in Henderson, Nevada. We plan to replace those leased facilities with an owned 30,000 square foot facility that is currently being constructed. We maintain other leased offices in various locations that are not material.

We believe that our properties are adequate for our business as presently conducted.

Available Information

We will be a reporting registrant under the Securities Exchange Act of 1934, as amended, on the effective date of this Registration Statement. Our principal executive offices are located at 12670 High Bluff Drive, San Diego, California 92130. The telephone number of our principal executive offices is (858) 480-3100. Our website address is <http://www.nextwave.com>. The information included on our website is not included as a part of, or incorporated by reference into, this registration statement.

We will make available through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after we have filed or furnished such material to the Securities and Exchange Commission.

You may read and copy any materials we file with the SEC at the SEC's Public Reference room at 100 F Street., NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by call the SEC at 1-800-SEC-0330. The SEC also maintains an Internet site that contains reports, proxy and formation statements, and other information regarding issuers that file electronically with the SEC at <http://www.sec.gov>.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In addition to historical information, the following discussion contains forward-looking statements that are subject to risks and uncertainties. Actual results may differ substantially from those referred to herein due to a number of factors, including but not limited to risks described in the section entitled Risk Factors and elsewhere in this registration statement. Additionally, the following discussion and analysis should be read in conjunction with the consolidated financial statements and the notes thereto included elsewhere in this registration statement and Management's Discussion and Analysis of Financial Condition and Results of Operations for the period from inception (April 13, 2005) to December 31, 2005 contained in our Amended Form 10, filed with the Securities and Exchange Commission on September 12, 2006.

OVERVIEW

Our Inception

NextWave Wireless Inc. ("Old NextWave Wireless") was formed in 1996 as a wholly-owned subsidiary of NextWave Telecom Inc. ("NTI") which sought to develop a nationwide CDMA-based personal communication services ("PCS") network. Pursuant to the plan of reorganization of NTI and its subsidiaries, NTI and its subsidiaries, excluding Old NextWave Wireless, were sold to Verizon Wireless for approximately \$3.0 billion. Prior to this sale, on April 13, 2005, the NextWave Telecom Group abandoned substantially all of its PCS assets other than the spectrum licenses and all remaining non-PCS assets and liabilities were contributed to Old NextWave Wireless. Immediately thereafter, membership interests in NextWave Wireless LLC (together with its subsidiaries, "NextWave") were distributed to the NTI equity holders and Old NextWave Wireless was capitalized with \$550.0 million in cash. Through this process, Old NextWave Wireless was reconstituted as a company with a new capitalization and a new wireless technology business plan.

Prior to the corporate conversion merger, we conducted our business through NextWave Wireless LLC and its direct and indirect subsidiaries. Prior to the effectiveness of the registrations statement of which this prospectus is a part, NW Merger LLC, a newly formed Delaware limited liability company and a wholly-owned subsidiary of NextWave Wireless Inc., will merger with and into NextWave Wireless LLC. In the merger, NextWave Wireless LLC's equity holders will receive a number of shares of our common stock based on an exchange ratio to be determined by the Board of Managers of NextWave Wireless LLC. As a result, NextWave Wireless Inc. will own all of the outstanding member interests of NextWave Wireless LLC. NextWave Wireless Inc. will be a Delaware "C" corporation, and as such will be subject to federal and state income taxes. NextWave Wireless LLC was a limited liability company not subject to federal income taxes, and as such, the historical financial data included in this prospectus do not reflect what our financial position and results of operations would have been had we been a taxable corporation.

This prospectus does not include financial statements of NextWave Wireless Inc. because it has only been formed recently for the purpose of effecting the corporate conversion merger, will hold no material assets and will not engage in any operations.

Our Business

We are an early stage wireless technology company engaged in the development of next-generation mobile broadband and wireless multimedia products, technologies and services. At present, nearly all of our revenues are derived from the sale of device embedded multimedia software solutions by our PacketVideo subsidiary, which was acquired in July 2005. While we expect to continue to grow and expand our multimedia software business, we expect that following the development of our WiMAX products and technologies the majority of our revenues will ultimately be derived from the sale and licensing of our WiMAX compliant chipsets, network components and device technologies

to network infrastructure and mobile terminal manufacturers on a global basis.

62

Our revenues for the second quarter and first six months of 2006 totaled of \$8.3 million and \$14.0 million, respectively, compared to NextWave contract service revenue of \$0.1 million that was recognized during the period from inception (April 13, 2005) to June 30, 2005. Our net losses for the second quarter and first six months of 2006 totaled \$20.5 million and \$34.2 million, respectively, compared to our net loss for the period from inception (April 13, 2005) to June 30, 2005 which totaled \$2.9 million. Our net losses for the second quarter and first six months of 2006 included \$2.1 million and \$2.6 million, respectively, of stock-based compensation expense related to the adoption of SFAS 123R on January 1, 2006 and non-employee stock based compensation.

At present, the majority of our employees are directly engaged in the design, development, and commercialization of a suite of WiMAX compliant products, including 802.16e compliant digital baseband ASICs and multi-band RFICs, software defined radio platforms, base station channel card reference designs and innovative terminal device reference designs. Our development team is also focused on developing technologies such as advanced antenna systems and advanced cognitive radios that we believe will help stimulate sales of our suite of WiMAX compliant products. All of our WiMAX semiconductor product and technologies are in an early stage of development.

To conserve capital we intend to outsource the production of our semiconductors to third-party chip manufacturers that can rapidly scale production volumes to meet our future needs. We plan to license our reference designs to third party vendors. By adopting this approach, we will be able to continue investing in the research and development needed over the next several years to fully commercialize our WiMAX technologies and semiconductor designs. Although we expect most of our WiMAX semiconductors and products to incorporate the proprietary, performance improving technologies we are currently developing, we intend our products to be WiMAX Forum certified to ensure full interoperability with WiMAX certified products and systems being developed by other companies.

The success of our WiMAX semiconductor and product business will be reliant on market acceptance of WiMAX as a competitive wireless broadband technology and on our ability to differentiate our WiMAX products from those offered by competitors. To help accelerate global market adoption of WiMAX and to showcase the competitive strength of our WiMAX mobile broadband and wireless multimedia products, we intend to make our significant spectrum holdings available to Internet service providers, cable operators, satellite television companies, content developers, existing wireless service providers and other companies interested in funding, on a shared network basis, the deployment of WiMAX networks that utilize our WiMAX mobile broadband and wireless multimedia technologies. We expect these shared networks, which will operate on our spectrum, to represent a major opportunity for us to sell our WiMAX certified semiconductors and products.

Our PacketVideo subsidiary supplies device embedded multimedia software to many of the largest manufacturers of high-end mobile phones in the world including LGE, Motorola, Nokia and Samsung. PacketVideo's software enables a mobile handset to stream, download, and play video and music, receive live TV, or engage in two way video telephony. PacketVideo's continued growth will be reliant on its ability to continue offering superior software solutions to its customers and on the continued growth of the global market for high-end mobile phones and other converged devices. PacketVideo's revenues are currently generated from royalties associated with the licensing of its software products and by providing its customers with customized software development services on a contract basis. During the first six months of 2006, 68% of PacketVideo's revenues were royalty based. We expect this percentage to increase over time based on the anticipated growth in the global market for devices having multimedia capabilities.

Change in Fiscal Year End

Our Board of Managers approved a change, effective January 1, 2006, in our fiscal year end and quarterly reporting periods from quarterly calendar periods ending on December 31 to a 52-53 week fiscal year ending on the Saturday nearest to December 31 of the current calendar year or the following calendar year. Normally, each fiscal year consists of 52 weeks, but every five or six years the fiscal year consists of 53 weeks. Fiscal year 2006 will be a 52-week year and the first 53-week year will occur in 2009. The three and six month periods ended July 1, 2006 include 13 and 26 weeks, respectively.

Second Quarter and First Six Months of Fiscal 2006 Compared to the Period From Inception (April 13, 2005) to June 30, 2005

Revenues. Revenues for the second quarter of 2006 of \$8.3 million were from \$5.8 million and \$2.5 million in royalties and contract services, respectively. Revenues for the first six months of 2006 of \$14.0 million were from \$9.5 million and \$4.5 million in royalties and contract services, respectively. In general, the financial consideration received from wireless carriers and mobile phone and device manufacturers is derived from a combination of technology development contracts and royalties.

Revenues of \$0.1 million that were recognized during the period from inception (April 13, 2005) to June 30, 2005 were from NextWave contract services. Since our inception in April 2005, substantially all of our revenues have been generated by our PacketVideo subsidiary, which we acquired in July 2005. We believe that PacketVideo will continue to account for a substantial portion of our revenues until we complete the development and commercialization of our wireless broadband products and technologies by the Advanced Technology Group of NextWave. Following the development and commercialization of our wireless broadband products and technologies, we believe that the sale or licensing of our proprietary chipsets, network components and device technologies will become an additional source of recurring revenue for us.

We expect that future revenues will be affected by, among other things, new product and service introductions, competitive conditions, customer marketing budgets for introduction of new subscriber products, the rate of expansion of our customer base, price increases, subscriber device life cycles, demand for wireless data services and acquisitions or dispositions of businesses or product lines.

Cost of Revenues. Cost of revenues for the second quarter of 2006 totaled \$3.0 million from PacketVideo, inclusive of \$0.4 million of amortization on the purchase of intangible assets related to the acquisition of PacketVideo. Cost of revenues for the first six months of 2006 totaled \$5.6 million from PacketVideo, inclusive of \$0.8 million of amortization on the purchase of intangible assets related to the acquisition of PacketVideo. Cost of revenues includes direct engineering labor expenses, allocated overhead costs and other direct costs related to the execution of technology development contracts as well as costs associated with offshore development contract costs, amortization of acquired software and other costs.

Cost of revenues for the period from inception (April 13, 2005) to June 30, 2005 totaled \$0.1 million from NextWave. Cost of revenues includes direct engineering labor expenses, allocated overhead costs and other direct costs related to the execution of technology development contracts.

We believe that cost of services as percentage of revenue for future periods will be affected by, among other things, the integration of acquired businesses in addition to sales volumes, competitive conditions, royalty payments on licensed technologies, changes in average selling prices, and our ability to make productivity improvements.

Engineering, Research and Development. Engineering, research and development expenses for the second quarter of 2006 were \$11.7 million and primarily consisted of compensation and associated costs for the internal and external development of our PacketVideo software of \$1.2 million and \$10.5 million for our wireless broadband products and technologies, including our chipsets. Share-based compensation for the second quarter of 2006 totaled \$0.6 million.

Engineering, research and development expenses for the first six months of 2006 were \$21.6 million and primarily consisted of compensation and associated costs for the internal and external development of our PacketVideo software of \$2.4 million and \$19.2 million for our wireless broadband products and technologies, including our chipsets. Share-based compensation for the first six months of 2006 totaled \$0.7 million.

Engineering, research and development expenses for the period from inception (April 13, 2005) to June 30, 2005 were \$2.9 million and primarily consisted of compensation and associated costs for the internal and external development

of our wireless broadband products and technologies, including our chipsets.

Largely due to our planned increase in engineering personnel to further our WiMAX technology development initiatives, we expect our engineering, research and development expenses to increase over the next twelve months.

64

General and Administrative. General and administrative expenses for the second quarter of 2006 were \$13.6 million, consisting of \$11.1 million and \$2.5 million from NextWave and PacketVideo, respectively. Our general and administrative expenses primarily consist of compensation and associated costs of general and administrative personnel of \$10.0 million, professional fees of \$1.8 million, share-based compensation of \$0.8 million, spectrum lease amortization of \$0.6 million and losses incurred by our strategic investment of \$0.4 million. In addition to our principal executive offices in San Diego, California, we maintain significant operating facilities in Henderson, Nevada.

General and administrative expenses for the first six months of 2006 were \$22.5 million, consisting of \$18.9 million and \$3.6 million from NextWave and PacketVideo, respectively. Our general and administrative expenses primarily consisted of compensation and associated costs of general and administrative personnel of \$16.7 million, professional fees of \$2.5 million, spectrum lease amortization of \$1.2 million, share-based compensation of \$0.8 million, loss on disposal of assets of \$0.6 million and losses incurred by our strategic investment of \$0.7 million.

General and administrative expenses for the period from inception (April 13, 2005) to June 30, 2005 were \$3.3 million and consist primarily of compensation and associated costs of general and administrative personnel of \$2.3 million, professional fees of \$0.6 million and spectrum lease amortization expense of \$0.4 million.

We expect that general and administrative costs will increase in absolute terms as we hire additional personnel and incur costs related to the anticipated growth of our business and our operations as a public company. As our business continues to grow, we expect to incur increased expenses from the addition of general and administrative personnel. We also expect an increase in our general and administrative expenses to occur as a result of our efforts to develop and protect intellectual property rights, including expenses associated with the identification and documentation of intellectual property, and the preparation and prosecution of patent applications. In addition, we expect our general and administrative expenses to increase as we incur additional expenses associated with being a publicly traded company, including expenses associated with comprehensively analyzing, documenting and testing our system of internal controls and maintaining our disclosure controls and procedures as a result of the regulatory requirements of the Sarbanes-Oxley Act.

Sales and Marketing. Sales and marketing expenses for the second quarter of 2006 totaled \$2.2 million, consisting of \$1.5 million and \$0.7 million from PacketVideo and NextWave, respectively. Sales and marketing expenses during the second quarter of 2006 consisted of compensation and associated costs for marketing and sales personnel of \$1.7 million, share-based compensation of \$0.2 million, expenses associated with marketing and promotional activities of \$0.1 million, and amortization expenses related to intangible assets of \$0.2 million.

Sales and marketing expenses for the first six months of 2006 totaled \$3.8 million, consisting of \$3.0 million and \$0.8 million from PacketVideo and NextWave, respectively. Sales and marketing expenses for the first six months of 2006 consisted of compensation and associated costs for marketing and sales personnel of \$3.0 million, share-based compensation of \$0.2 million, expenses associated with marketing and promotional activities of \$0.2 million, and amortization expenses related to intangible assets of \$0.4 million.

We expect sales and marketing expenses to increase in absolute terms with the growth of our business, primarily from our PacketVideo business, in the upcoming year. Additionally, as we achieve full commercial deployment of our wireless broadband technologies and products, we will increase sales and marketing expenses both in absolute terms, and as a percentage of revenues at NextWave Broadband.

Purchased In-Process Research and Development Costs. In conjunction with one of our immaterial acquisitions during the second quarter of 2006, we purchased in-process research and development projects valued at \$1.6 million that were expensed upon the date of acquisition.

Interest Income. Interest income for the second quarter and first six months of 2006 was \$3.2 million and \$6.4 million, respectively, and consisted of interest earned on our cash and investment balances, which totaled \$340.4 million at July 1, 2006.

Interest income for the period from inception (April 13, 2005) to June 30, 2005 was \$3.5 million and consisted of interest earned on our cash and investment balances, which totaled \$551.9 million at June 30, 2005.

Interest income in the future will be affected by changes in short-term interest rates and changes in our cash and investment balances, which may be materially impacted by development plans, acquisitions and other financial activities.

Interest Expense. Interest expense for the second quarter and first six months of 2006 and for the period from inception (April 13, 2005) to June 30, 2005 was \$0.4 million, \$0.7 million and \$0.3 million, respectively, and consisted primarily of the accretion of discounted wireless spectrum license lease liabilities.

Other Expense, Net. Other income, net, for the second quarter and first six months of 2006 totaled \$0.2 million and \$0.1 million, respectively, and includes \$0.1 million in a gain on disposal of non-operating fixed assets, with the remainder due to net realized and unrealized foreign currency exchange gains. Other income, net, for the period from inception (April 13, 2005) to June 30, 2005 totaled \$0.1 million and represents net realized and unrealized foreign currency exchange gains.

Provision for Income Taxes. NextWave Wireless LLC is classified as a partnership for U.S. federal and state income tax purposes. Therefore, its income is not subject to federal or state income tax at the entity level. Its income passes through to its members, where it is subject to income tax at the member level. Our corporate subsidiaries or controlled corporations are subject to federal, state and foreign income taxes on corporations.

During the first six months of 2006 these corporate subsidiaries and controlled corporations all had net losses for tax purposes, and, therefore, no income tax provision or benefit was recognized during the first six months of 2006. Our income tax benefit of \$0.2 million for the first six months of 2006 is comprised primarily a reversal of an accrual for federal personal holding company taxes for NextWave Broadband Inc. offset by foreign withholding tax on royalty payments received from PacketVideo customers.

Minority Interest. Minority interest for the second quarter and first six months of 2006 totaled \$0.2 million and \$0.9 million, respectively, and primarily represented our minority partner's share of losses in the newly formed INQUAM joint venture formed in January 2006.

Liquidity And Capital Resources

Since our inception (April 13, 2005), we had incurred operating losses and negative cash flows and had a retained deficit of \$49.2 million at December 31, 2005, consisting of \$34.8 million and \$14.4 million from NextWave and PacketVideo, respectively. We have funded our operations primarily with the \$550.0 million in cash received in our initial capitalization. Our total cash, cash equivalents and short-term investments at December 31, 2005 were \$459.2 million. Cash and cash equivalents were \$93.6 million at December 31, 2005, consisting of \$92.1 million and \$1.5 million at NextWave and PacketVideo, respectively, a decrease of \$461.5 million from our inception balance of \$555.1 million at April 13, 2005. Of this decrease, \$365.6 million is the result of our investment in liquid marketable securities that offered a more favorable investment return than if held in cash. We held short-term investments of \$365.6 million at December 31, 2005.

During the three and six months ended July 1, 2006, we incurred operating losses of \$20.5 million and \$34.2 million, respectively, and our retained deficit at July 1, 2006 totaled \$80.2 million, consisting of \$63.4 million and \$16.8 million, from NextWave and PacketVideo, respectively. Our total cash, cash equivalents and short-term investments at July 1, 2006 were \$340.4 million. The following table presents working capital, cash, cash equivalents and short-term investments:

<i>(in thousands)</i>	Increase (Decrease) for the Three Months Ended		Increase (Decrease) for the Six Months Ended		December 31, 2005
	July 1, 2006	July 1, 2006	July 1, 2006	April 1, 2006	
Working capital	\$ 334,957	\$ (22,169)	\$ (121,461)	\$ 357,126	\$ 456,418
Cash and cash equivalents	30,643	(69,228)	(63,006)	99,871	93,649
Short-term investments	309,794	43,078	(55,788)	266,716	365,582
Total cash, cash equivalents and short-term investments	\$ 340,437	\$ (26,150)	\$ (118,794)	\$ 366,587	\$ 459,231

The following table presents our utilization of cash, cash equivalents and short-term investments for the three and six months ended July 1, 2006 compared to the periods from inception (April 13, 2005) to June 30, 2005 and July 1, 2006:

<i>(in thousands)</i>	Three Months Ended		From Inception (April 13, 2005) to From Inception (April 13, 2005) to	
	July 1, 2006	July 1, 2006	June 30, 2005	July 1, 2006

Ending cash, cash equivalents and short-term investments	\$ 340,437	\$ 340,437	\$ 551,912	\$ 340,437

The decrease in cash, cash equivalents and short-term investments of \$26.2 million during the three months ended July 1, 2006, primarily reflects cash used in operating activities of \$16.7 million, consisting of \$14.9 million used by NextWave and our joint venture and \$1.8 million used by PacketVideo, \$4.8 million paid to acquire businesses, \$2.3 million paid for wireless spectrum licenses and subsequent lease obligations and \$1.6 million paid for capital expenditures.

The decrease in cash, cash equivalents and short-term investments of \$118.8 million during the six months ended July 1, 2006, primarily reflects cash used in operating activities of \$23.2 million, consisting of \$22.8 million used by NextWave and our joint venture, and \$0.4 million used by PacketVideo, \$4.9 million paid to acquire businesses and \$82.4 million paid for wireless spectrum licenses and subsequent lease obligations and \$7.2 million paid for capital expenditures.

The decrease in cash, cash equivalents and short-term investments of \$3.2 million during the period from inception (April 13, 2005) to June 30, 2005, primarily reflects cash used in NextWave operating activities of \$2.0 million and \$1.2 million paid for capital expenditures.

The decrease in cash, cash equivalents and short-term investments of \$214.7 million during the period from inception (April 13, 2005) to July 1, 2006, primarily reflects the use of \$101.2 million for the acquisition of wireless spectrum licenses and subsequent lease obligations, \$57.3 million for business acquisitions and a joint venture investment, \$14.4 million for the acquisition of property and equipment, and \$40.3 million primarily for operating activities, including research and development costs.

In July 2005, we completed our acquisition of PacketVideo for cash of \$46.6 million, which includes cash of \$0.4 million paid for in closing costs, less cash acquired of \$0.3 million.

In July 2005, we entered into a purchase agreement for an office building in Henderson, Nevada for \$8.2 million, plus related interior construction, fixtures and furniture costs of approximately \$3.6 million, to accommodate our facility requirements and to consolidate current operations from two leased facilities into one. The interior construction costs are payable in the fourth quarter of 2006. Construction is expected to be completed during first quarter of 2007, at which time we expect to occupy the facility and the purchase price will be due and payable.

Since our emergence as a wireless technology company, we have consummated transactions to acquire licensed spectrum rights, including subsequent lease obligations, for amounts totaling \$261.7 million, including our acquisition of WCS licenses from Bal-Rivgam, LLC for \$56.9 million and our recent acquisition of WCS Wireless Inc., which holds spectrum covering 188.8 million persons, or POPs, in the Central, Western, and Northeastern United States, for \$160.5 million. The Bal-Rivgam acquisition agreement provides that \$21.9 million of the proceeds of the purchase would be deposited into escrow until January 2008 to cover any liabilities stemming from Bal-Rivgam's ownership of the licenses prior to closing, claims resulting from breaches of representations or warranties and certain claims under the spectrum licenses.

In August 2006, we acquired WCS Wireless Inc., which holds spectrum covering 188.8 million persons, or POPs, in the Central, Western, and Northeastern United States, for \$160.5 million. The acquisition agreement provides that \$8.0 million of the sale proceeds would be deposited into an escrow fund to cover liabilities resulting from breaches of representations and warranties, breaches of covenants and certain pre-closing tax losses. The escrow fund will remain in place until February 2007. The \$160.5 million purchase price for WCS will be funded with a portion of the proceeds from our recently completed secured notes financing. Wireless licenses that are purchased from third parties or in spectrum auctions held by the FCC are initially recorded at fair value, which is the purchase price paid for the license at the time of acquisition plus legal costs incurred to acquire the intangible asset. NextWave has determined that its WCS wireless spectrum licenses meet the definition of indefinite-lived intangible assets under SFAS No. 142, "Goodwill and Other Intangible Assets," and, accordingly, the licenses will not be amortized to expense, but, rather, reviewed for impairment on an annual basis.

Since April 1, 2006, we have entered into two lease agreements for wireless spectrum, covering a period of 30 years (including extensions), for aggregate upfront lease payments of approximately \$22.1 million, plus monthly payments of \$12,600. We have paid \$1.5 million into an escrow account, and upon final approval of the lease applications by the FCC, we anticipate paying the balance of \$20.6 million prior to year end. The entire \$22.1 million upfront lease payments will be funded from our recently completed secured notes financing described below.

We are participating with other WCS band license holders in a waiver process with the FCC to move the substantial service dates for this license band from July 2007 to the later of July 2010 or three years from FCC adoption of certain technical rules for the WCS band. If the substantial service dates are not extended, in order to meet the current substantial service date of July 2007, we estimate that an expenditure of approximately \$40 million would be required over the next 12 months.

As of July 1, 2006, we had \$340.4 million of cash, cash equivalents and short-term investments, leaving approximately \$265.4 million of unrestricted funding after giving effect to the \$75.0 million cash required to be reserved under our senior secured notes financing. These amounts do not include remaining net proceeds of \$110.0 million available solely for financing spectrum acquisitions and leases from our senior secured notes financing (completed on July 17, 2006), after giving effect to our recent acquisition of WCS Wireless, Inc. for \$160.5 million and the acquisition of two new EBS leases for \$22.1 million. The remaining net proceeds of \$110.0 million are currently on deposit with the FCC as part of our total \$142.8 million deposit paid to qualify for the AWS auction. Any amounts not used to purchase spectrum in the auction will be returned to us after the auction is completed.

We are currently unable to project when our wireless broadband products and technologies will commercially deployed and generate revenue. However, we believe that our current revenues, cash and short-term investments and financing activities will be sufficient to fund our operating activities at least through 2007, even if the \$40 million expenditure relating to the current WCS substantial service date is required over the next 12 months.

- We plan to fund our WiMAX technology development activities with our \$265.4 million of unrestricted cash and investments until such point that we begin sales of our chipsets and network component products and enter into licensing arrangements for our wireless broadband technologies. Our wireless broadband products and technologies are in the early stages of development and will require a substantial investment before they may become commercially viable. Our research and development expenses for our wireless broadband products and technologies, including our chipsets were \$10.5 million in the second quarter. Largely due to our planned increase in engineering personnel, we expect our WiMAX development expenses to increase by approximately 50% over the next twelve months. Because we are adopting a strategy of licensing our technology and selling chipsets to third party equipment manufacturers, we do not anticipate that the license and sale of our products and technologies will require significant additional capital.
- Our mobile WiMAX network solutions offerings will involve a service business and are not expected to require significant additional capital expenditures beyond what is necessary to complete our Henderson, Nevada office building and our trial network. With the exception of our trial network in Henderson, Nevada, we will not build-out wireless networks, but will provide our technologies, services and spectrum to our network partners who are engaged in these activities. In 2006, we expect to expend \$5.0 million on the deployment of our trial network in Henderson, Nevada. If that trial network is successful, we anticipate that we will seek a network partner to expand the trial network to cover most of the Las Vegas metropolitan region.
- Our PacketVideo operations are currently operating cash flow positive and we believe that PacketVideo's operating cash flows will continue to be adequate to cover its operating costs at least through 2007. However, expansions of PacketVideo's current operations or future acquisitions could require additional funding.

We may need to secure significant additional capital in the future to implement changes to, or expansions of, our business plan and to become cash flow positive. We may also require additional cash resources for other future developments, including any investments or acquisitions we may pursue, including investments or acquisitions of other business or technologies. If our existing working capital resources are insufficient to satisfy our cash requirements, we may seek to sell debt securities or additional equity securities or to obtain a credit facility. Our senior secured notes prohibit our incurrence of additional indebtedness, subject to certain exceptions. The sale of equity securities or convertible debt securities could result in additional dilution to our stockholders. The incurrence of indebtedness would result in debt service obligations and the requirement that we comply with operating and financial covenants that would restrict our operations. In addition, there can be no assurance that any additional financing will be available on acceptable terms, if at all.

In July 2006, we issued senior secured notes due 2010 in the aggregate principal amount of \$350.0 million. The notes were issued at a fifteen percent (15%) original issue discount, resulting in gross proceeds of \$297.5 million. We will be obligated to pay the secured notes at their full face value of \$350.0 million on July 17, 2010 and interest of 7% per annum, or \$24.5 million, is payable semiannually in January and July each year commencing January 15, 2007. The original issue discount will provide the note purchasers with a yield that is in addition to the coupon rate upon repayment of the notes. After the payment of transaction related expenses, we received net proceeds of \$295.1 million available for the sole purpose of financing spectrum acquisitions and leases. As noted above, after giving effect to our recent acquisition of WCS Wireless, Inc. for \$160.5 million and the acquisition of two new EBS leases for \$22.1 million, the remaining net proceeds of the senior secured notes are approximately \$110.0 million. Concurrently with the notes placement, we paid a \$142.8 million deposit to the FCC to qualify for the AWS auction, of which \$110.0 million was funded with the remaining proceeds from the notes placement. Amounts not used to purchase spectrum in the auction will be returned to us after the auction is completed.

The purchasers of the senior secured notes were investment funds and other institutional investors, including affiliates of Avenue Capital Group, among others. Robert T. Symington, a member of our Board of Managers, is a Portfolio Manager at Avenue Capital Group. Neither Mr. Symington nor Avenue Capital Group or its affiliates received any compensation in connection with the financing. The notes were guaranteed by certain of our subsidiaries, including NextWave Broadband and PacketVideo. In addition, after our anticipated corporate conversion merger with and into a wholly owned limited liability company subsidiary of NextWave Wireless Inc., a new corporation formed under the laws of the State of Delaware, the notes will be guaranteed by NextWave Wireless Inc. No scheduled principal payments will be due on the notes before the maturity date of July 15, 2010. The notes are pre-payable at our option at specified premiums to the principal amount that will decline over the term of the notes from 105% to 100%, plus a make-whole amount applicable until July 17, 2008. The obligations under the notes are secured by first priority liens on certain pledged equity interests, FCC licenses, spectrum leases, securities accounts and proceeds of any of the foregoing. We are required to maintain \$75.0 million in cash or cash equivalents from funds other than the proceeds of the notes in a restricted collateral account at all times while the notes remain outstanding. The purchase agreement contains representations and warranties, affirmative and negative covenants (including, without limitation, (i) our obligation to maintain in full force and effect our FCC licenses and spectrum leases, (ii) our obligation to use the note proceeds for the acquisition of spectrum, not to exceed \$0.25 per MHz-POP, (iii) our obligation not to become liable to any additional indebtedness, subject to certain exceptions including the ability to enter into spectrum leases or to incur \$25.0 million of acquired company debt or purchase money indebtedness and (iv) our obligation not to make restricted payments to holders of subordinated debt or equity securities, including dividends) that are customary in similar types of transactions. The purchase agreement also contains customary events of default and additional events of default including, (i) our failure to consummate the corporate conversion merger by December 31, 2006, (ii) our failure to file a shelf registration statement with the SEC within 30 days of the consummation of the corporate conversion merger, and (iii) upon the termination, cancellation or rescission of any FCC license owned or leased by us and necessary for our operation of a wireless communications system). If we do not complete our anticipated corporate conversion merger on or prior to November 14, 2006, then the per annum interest rate on the notes shall be equal to 12% during the period from November 14, 2006 to the date on which the corporate conversion merger actually occurs.

In connection with the senior secured notes financing described above, NextWave Wireless Inc. entered into a warrant agreement with the purchasers of the senior secured notes, which will become operative after the corporate conversion merger, whereby NextWave Wireless Inc. will issue common stock purchase warrants to purchase an aggregate of 5% of NextWave Wireless Inc.'s shares of common stock, as of the date of the corporate conversion merger and before giving effect to the exercise of any warrant. The warrants will have an exercise price of \$0.01 per share (subject to certain adjustments as set forth in the warrant agreement) and are exercisable at any time from the date of issuance until July 15, 2009, and have anti-dilution protection provisions. The shares of NextWave Wireless Inc. underlying the warrants are also entitled to registration rights that obligate NextWave Wireless Inc. to file a shelf registration statement within 30 days following the corporate conversion merger, and use its commercially reasonable efforts to have the shelf registration statement become or declared effective within 60 days from its filing. The holders of warrants will be entitled to continuous shelf registration rights for a period of two years from the date that such shelf registration is declared effective by the SEC. NextWave Wireless Inc. is required to bear the expenses of the shelf registration.

Critical Accounting Policies and Estimates

Our discussion and analysis of our results of operations and liquidity and capital resources are based on our consolidated financial statements which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, valuation of intangible assets and investments, and litigation. We base our estimates on historical and anticipated results and trends and on various other assumptions that we believe are reasonable under the

circumstances, including assumptions as to future events. These estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. By their nature, estimates are subject to an inherent degree of uncertainty. Actual results that differ from our estimates could have a significant adverse effect on our operating results and financial position. We believe that the following significant accounting policies and assumptions may involve a higher degree of judgment and complexity than others.

Revenue Recognition. We derive revenue principally from contracts to provide embedded multimedia software products for mobile phones and related license fees. The timing of revenue recognition and the amount of revenue actually recognized in each case depends upon a variety of factors, including the specific terms of each arrangement and the nature of our deliverables and obligations. Determination of the appropriate amount of revenue recognized involves judgments and estimates that we believe are reasonable, but it is possible that actual results may differ from our estimates.

For software arrangements with multiple elements, such as those that include rights to software products, customer support, and training services, we allocate revenue to each component of the arrangement based on objective evidence of its fair value, which is specific to us. The objective evidence for each element is based on the sale price of each element when sold or offered for sale separately.

Revenues from software products are generally recognized when the products are delivered. Revenues from customer support and training services are recognized on a straight-line basis over the life of the contract. For engineering design contracts, we recognize revenue pursuant to the American Institute of Certified Public Accountants Statement of Position 81-1, "Accounting for Performance of Construction-Type and Certain Production-Type Contracts" and specifically follow guidance under Percentage of Completion ("POC"). Under the POC method, revenues are recognized on the basis of contract completion to-date or using actual costs incurred to total expected costs under the contract, resulting in the recognition of unbilled receivables or the deferral of costs or profit on these contracts. Deferred costs include all direct material and labor costs and those indirect costs related to contract performance and are reported as deferred contract costs in the consolidated balance sheet. We regularly review project profitability and underlying estimates. Revisions to the estimates at completion are reflected in results of operations as a change in accounting estimate in the period in which the facts that give rise to the revision become known by us. Provisions for estimated losses, if any, are recognized in the period in which the loss is determined. Amounts received from customers in excess of revenues earned under the POC method are recorded as advance payments from customers and reported as unearned revenue in the consolidated balance sheet.

Revenues from time and material contracts are recorded at agreed-upon billing rates at the time services are provided.

We earn royalties on licensed embedded multimedia software incorporated into products sold worldwide by our licensees at the time that the licensees' sales occur. Our licensees, however, do not report and pay royalties owed for sales in any given quarter until after the conclusion of that quarter. Royalty revenues are recognized when reported by licensees to us and totaled \$5.8 million and \$9.5 million during the three and six months ended July 1, 2006, respectively.

Valuation of Intangible Assets and Investments. In accordance with Statement of Financial Accounting Standards No. 142, or SFAS No. 142, "Goodwill and Other Intangible Assets," we do not amortize goodwill and certain spectrum licenses. In lieu of amortization, we are required to perform an annual review for impairment or more frequently if impairment indicators arise. Goodwill and intangible assets not subject to amortization are considered to be impaired if we determine that the carrying value of the asset exceeds its fair value.

We will test goodwill for impairment at a reporting unit level using a two-step process. As of December 31, 2005, we had two reporting units as defined by SFAS 142, NextWave and PacketVideo. The first step of the impairment test involves comparing the fair values of the applicable reporting units with their aggregate carrying values, including goodwill. If the carrying amount of a reporting unit exceeds the reporting unit's fair value, we then perform the second step of the goodwill impairment test to determine the amount of the impairment loss. The second step of the goodwill impairment test involves comparing the implied fair value of the affected reporting unit's goodwill with the carrying value of that goodwill. If the carrying amount of goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess.

We also evaluate the remaining useful life of our intangible assets that are not subject to amortization on an annual basis to determine whether events and circumstances continue to support an indefinite useful life. If an intangible asset that is not being amortized is subsequently determined to have a finite useful life, that asset is tested for impairment and then amortized prospectively over its estimated remaining useful life and accounted for in the same manner as other intangible assets that are subject to amortization. Additionally, if the carrying amount of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess.

At October 1, 2005, our goodwill and intangible assets not subject to amortization were evaluated for impairment and we determined that no impairment existed at that date.

At December 31, 2005, intangible assets subject to amortization were evaluated for impairment as required by SFAS No. 144, "Accounting for Impairment or Disposal of Long-Lived Assets," which requires the recognition of an impairment loss when the carrying amount of an intangible asset is not recoverable and its carrying amount exceeds its fair value, and we determined that no impairment existed at that date.

Any required impairment loss would be recorded as a reduction in the carrying value of the related asset and charged to results of operations.

The determination of the fair value of certain acquired assets and liabilities is subjective in nature and often involves the use of significant estimates and assumptions. Determining the fair values and useful lives of intangible assets requires the exercise of judgment. Upon initially recording intangible assets that are acquired through business combinations we may use an independent valuation firm to assist us in determining the appropriate values for those assets. While there are a number of different generally accepted valuation methods to estimate the value of intangible assets acquired, we primarily use the undiscounted cash flows expected to result from the use of the assets. This method requires significant management judgment to forecast the future operating results used in the analysis. In addition, other significant estimates are required such as residual growth rates and discount factors. The estimates we use are consistent with the plans and estimates that we use to manage our business and are based on available historical information and industry averages.

The recorded value of goodwill and other intangible assets may become impaired in the future. As of July 1, 2006, our goodwill and intangible assets, net of accumulated amortization, were \$32.9 million and \$147.2 million, respectively. If the estimates of fair values or their related assumptions change in the future, we may be required to record an impairment charge on all or a portion of our goodwill and intangible assets. We also cannot predict the occurrence of future impairment-triggering events nor the impact such events might have on our reported asset values. Future events could cause us to conclude that impairment indicators exist and that goodwill or other intangible assets associated with our acquired businesses is impaired. Any resulting impairment loss could have an adverse impact on our results of operations.

Share-Based Payments and Pro forma Stock Based Compensation. We grant options and warrants to purchase our membership interests and common stock of our PacketVideo and CYGNUS subsidiaries to our employees, directors and consultants under our unit and stock option plans. The benefits provided by these plans qualify as share-based compensation under the provisions of Statement of Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payment" ("SFAS 123R"), which requires us to recognize compensation expense based on the estimated fair values of the share-based awards determined on the date of grant for all awards granted, modified or cancelled as of January 1, 2006 (the effective date).

Prior to the effective date, we did not recognize any compensation cost in our income statements for share-based awards granted with an option price equal to the fair market value of respective units or common stock on the date of grant as we accounted for them under the recognition and measurement principles of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"), and its related interpretations and adopted the disclosure only provisions of Statement of Financial Accounting Standards No. 123, "Stock-Based Compensation" ("SFAS 123"). We provided pro forma net income in accordance with the disclosure only provision of SFAS 123. The stock based compensation expense used in these pro forma amounts is based on the minimum value method option-pricing model. This method required us to use several assumptions to estimate the fair value including the expected life of the option.

We adopted the provisions of SFAS 123R using the prospective transition method, whereby we will continue to account for nonvested equity awards to employees outstanding at December 31, 2005 using APB 25, and apply SFAS

123R to all awards granted or modified after that date. In accordance with the transition rules of SFAS 123R, we no longer provide the pro forma disclosures in reports issued for periods ending after December 31, 2005 as SFAS 123R precludes companies that use the minimum value method for pro forma disclosure from continuing to provide those pro forma disclosures for outstanding awards accounted for under the intrinsic value method of APB 25. For the three and six months ended July 1, 2006, we recognized \$1.7 million, in compensation expense for employee stock options. At July 1, 2006, there was \$4.8 million remaining in unrecognized compensation cost related to employee stock options which is expected to be recognized over a weighted average period of 3.7 years.

We believe it is important for investors to be aware of the high degree of subjectivity involved when using option pricing models to estimate share-based compensation under SFAS 123R and SFAS 123. Option-pricing models were developed for use in estimating the value of traded options that have no vesting or hedging restrictions, are fully transferable and do not cause dilution. Because our share-based payments have characteristics significantly different from those of freely traded options, and because changes in the subjective input assumptions can materially affect our estimates of fair values, in our opinion, existing valuation models, including the Black-Scholes, may not provide reliable measures of the fair values of our share-based compensation. Consequently, there is a risk that our estimates of the fair values of our share-based compensation awards on the grant dates may bear little resemblance to the actual values realized upon the exercise, expiration, early termination or forfeiture of those share-based payments in the future. Certain share-based payments, such as employee stock options, may expire worthless or otherwise result in zero intrinsic value as compared to the fair values originally estimated on the grant date and reported in our financial statements. Alternatively, value may be realized from these instruments that is significantly in excess of the fair values originally estimated on the grant date and reported in our financial statements. There is currently no market-based mechanism or other practical application to verify the reliability and accuracy of the estimates stemming from these valuation models, nor is there a means to compare and adjust the estimates to actual values. Although the fair value of employee share-based awards is determined in accordance with SFAS 123R and the Securities and Exchange Commission's Staff Accounting Bulletin No. 107 (SAB 107) using an option-pricing model, that value may not be indicative of the fair value observed in a willing buyer and willing seller market transaction. If factors change and we employ different assumptions in the application of SFAS 123R in future periods than those currently applied under SFAS 123R and those previously applied under SFAS 123 in determining our pro forma amounts, the compensation expense that we record in the future under SFAS 123R may differ significantly from what we have reported during the first quarter of 2006 and what we have reported as our pro forma expense during the period from inception (April 13, 2005) to December 31, 2005 under SFAS 123.

Litigation. We are currently involved in certain legal proceedings. Although there can be no assurance that unfavorable outcomes in any of these matters would not have a material adverse effect on our operating results, liquidity or financial position, we believe the claims are without merit and intend to vigorously defend the actions. We estimate the range of liability related to pending litigation where the amount and range of loss can be estimated. We record our best estimate of a loss when the loss is considered probable. Where a liability is probable and there is a range of estimated loss with no best estimate in the range, we record the minimum estimated liability related to the claim. As additional information becomes available, we assess the potential liability related to our pending litigation and revise our estimates. We have not recorded any accrual for contingent liability associated with our legal proceedings based on our belief that a liability, while possible, is not probable. Further, any possible range of loss cannot be estimated at this time. Revisions in our estimates of the potential liability could materially impact our results of operations.

Recent Accounting Pronouncements

We adopted SFAS 123R effective January 1, 2006, which requires us to expense the estimated fair value of employee stock options and similar awards. As a nonpublic entity, we have adopted the provisions of SFAS 123R using the prospective transition method, whereby we will continue to account for nonvested equity awards to employees outstanding at December 31, 2005 using APB 25, and apply SFAS 123R to all awards granted or modified after that date. We will no longer provide the pro forma disclosures in reports issued for periods ending after December 31, 2005 as SFAS 123R also precludes nonpublic companies that use the minimum value method for pro forma disclosure from continuing to provide those pro forma disclosures for outstanding awards accounted for under the intrinsic value method of APB 25. We use the Black-Scholes valuation model as the method for determining the fair value of our equity awards that are issued after January 1, 2006 and will incur expense during 2006 and future years for new awards granted during those periods that cannot yet be quantified. For the three and six months ended July 1, 2006, we recognized \$1.7 million in compensation expense for employee stock options. At July 1, 2006, there was \$4.8 million remaining in unrecognized compensation cost related to employee stock options which is expected to be recognized over a weighted average period of 3.7 years.

In November 2005, the Financial Accounting Standards Board (“FASB”) issued staff position 115-1, “The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments” (“FSP 115-1”). FSP 115-1 address the determination as to when an investment is considered impaired, whether that impairment is other than temporary and the measurement of an impairment loss. FSP 115-1 also includes accounting considerations subsequent to the recognition of an other-than-temporary impairment and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments. The guidance in FSP 115-1 amends FASB Statements No. 115, Accounting for Certain Investments in Debt and Equity Securities, and APB Opinion No. 18, “The Equity Method of Accounting for Investments in Common Stock.”

FSP 115-1 replaces the impairment evaluation guidance of Emerging Issues Task Force (“EITF”) Issue No. 03-1, “The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments” (“EITF 03-1”), with references to existing other-than-temporary impairment guidance. EITF 03-1’s disclosure requirements remain in effect, and are applicable for year-end reporting and for interim periods if there are significant changes from the previous year-end. FSP 115-1 also supersedes EITF Topic No. D-44, “Recognition of Other-Than-Temporary Impairment upon the Planned Sale of a Security Whose Cost Exceeds Fair Value,” and clarifies that an investor should recognize an impairment loss no later than when the impairment is deemed other-than-temporary, even if a decision to sell an impaired security has not been made. FSP 115-1 applies to reporting periods beginning after December 15, 2005. FSP 115-1 did not have a material impact on our results of operations, or cash flows for the three or six months ended July 1, 2006.

In May 2005, the FASB issued Statement of Financial Accounting Standard No. 154, “Accounting Changes and Error Corrections” (“SFAS 154”). SFAS 154 replaces Accounting Principles Board Opinion No. 20, “Accounting Changes” (“APB 20”), and Statement of Financial Accounting Standard No. 3, “Reporting Accounting Changes in Interim Financial Statements.” SFAS 154 requires retrospective application to prior periods’ financial statements for reporting a voluntary change in accounting principle, unless impracticable. APB 20 previously required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle. This standard also distinguishes between retrospective application and restatement. It redefines restatement as the revising of previously issued financial statements to reflect the correction of an error. The provisions of SFAS 154 are effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. Adoption of SFAS No. 154 did not have a significant effect on our consolidated financial statements.

In June 2006, the FASB Issued Interpretation No. 48, “Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109” (“FIN 48”), effective for our fiscal year beginning December 31, 2006, with earlier application permitted. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in financial statements in accordance with FASB Statement No. 109, “Accounting for Income Taxes,” and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. We believe that adoption of this interpretation is not expected to have a material impact on our financial statements.

Contractual Obligations

The following table summarizes our contractual obligations at July 1, 2006, and the effect such obligations are expected to have on our liquidity and cash flows in future periods.

<i>(in thousands)</i>	Payments Due by Period ⁽¹⁾				
	Total	Remainder of 2006	Years 2007-2008	Years 2009-2010	Years 2011 and Thereafter

Edgar Filing: NextWave Wireless Inc. - Form S-4

Long-term obligations	\$ 28,053	\$ 402	\$ 5,365	\$ 4,350	\$ 17,936
Operating leases	21,818	2,598	11,513	7,658	49
Services and other purchase agreements	16,223	4,130	12,093	—	—
Capital expenditures	10,675	10,675	—	—	—
Total	\$ 76,769	\$ 17,805	\$ 28,971	\$ 12,008	\$ 17,985
Contractual Obligations entered into subsequent to July 1, 2006:					
7% Senior Secured Notes	\$ 350,000	\$ —	\$ —	\$ 350,000	\$ —
Spectrum purchase and lease	176,500	176,500	—	—	—
Spectrum bid deposit	142,800	142,800	—	—	—

74

(1) In August 2006, we acquired WCS Wireless Inc., which holds spectrum covering 188.8 million persons, or POPs, in the Central, Western, and Northeastern United States, for \$160.5 million. The acquisition agreement provides that \$8.0 million of the sale proceeds would be deposited into an escrow fund to cover liabilities resulting from breaches of representations and warranties, breaches of covenants and certain pre-closing tax losses. The escrow fund will remain in place until February 2007.

In the second quarter of 2006, we entered into a lease agreement for wireless spectrum, covering a period of 30 years (including extensions), for a total lease payment of \$16.0 million, payable in advance. We have paid \$1.5 million into an escrow account, and upon approval of the license transfer application by the FCC, we anticipate paying the balance of \$14.5 million in the third quarter of 2006. The entire \$16.0 million lease payment will be funded from our recently completed secured notes financing.

In July 2006, we issued senior secured notes due 2010 in the aggregate principal amount of \$350.0 million. The notes were issued at a fifteen percent (15%) original issue discount, resulting in gross proceeds of \$297.5 million. We will be obligated to pay the secured notes at their full face value of \$350.0 million on July 17, 2010, and interest of 7% per annum, or \$24.5 million, is payable semiannually in January and July each year commencing January 15, 2007. The original issue discount will provide the note purchasers with a yield that is in addition to the coupon rate upon repayment of the notes. In connection with the notes placement, NextWave Wireless Inc. agreed to issue warrants, at an exercise price of \$0.01, to purchase an aggregate of 5% of the outstanding shares of common stock of NextWave Wireless Inc. as of the date of the corporate conversion merger and before giving effect to the exercise of any warrant. The notes placement provided us with net cash proceeds of \$295.1 million available for the sole purpose of financing spectrum acquisitions and leases, including our recent acquisition of WCS Wireless Inc. for \$160.5 million. In addition, concurrently with the notes placement, we paid a \$142.8 million deposit to the FCC to qualify for the AWS auction, of which \$110.0 million of the deposit was funded with the proceeds from the notes placement. Amounts not used to purchase spectrum in the auction will be returned to us after the auction is completed.

We are participating with other WCS band license holders in a waiver process with the FCC to move the substantial service dates for this license band from July 2007 to the later of July 2010 or three years from FCC adoption of certain technical rules for the WCS band. If the substantial service dates are not extended, in order to meet the current substantial service date of July 2007, we estimate that an expenditure of approximately \$40 million would be required over the next 12 months.

Qualitative and Quantitative Disclosures about Market Risks

Interest Rate Risk

At July 1, 2006, our investment portfolio included short-term investment securities with a fair value of \$309.8 million. These securities are subject to interest rate risk and will decline in value if interest rates increase. Interest income earned on our investments is affected by changes in the general level of U.S. interest rates. These income streams are generally not hedged.

Due to the relatively short duration of our investment portfolio, an immediate ten percent change in interest rates (e.g. 3.00% to 3.30%) would have no material impact on our financial condition or results of operations.

Foreign Currency Risk

We conduct our business through subsidiaries in Europe, Asia-Pacific and North America. Substantially all of our sales to customers located in foreign countries are denominated in U.S. dollars, minimizing foreign currency risks related to those transactions. Our foreign subsidiaries use the U.S. dollar as their functional currency. Accordingly, monetary assets and liabilities are translated into U.S. dollars at the exchange rate in effect at the balance sheet date. Revenues, expenses, gains and losses associated with monetary assets and liabilities are translated at the rates of exchange that approximate the rates in effect at the transaction date. Non-monetary assets and liabilities and related elements of revenues, expenses, gains and losses are translated at historical rates. Resulting exchange gains or losses of these foreign investees are recognized in the consolidated statements of operations. Changes in currency exchange rates have affected, and will continue to affect our operating costs and net income.

PRINCIPAL STOCKHOLDERS

The following table sets forth certain information regarding the beneficial ownership of our outstanding common stock as of September 12, 2006, as adjusted to reflect the completion of the corporate conversion merger, by:

· each person or entity known to beneficially own more than 5% of our outstanding common stock;

· each of our directors and executive officers; and

· all of our directors and executive officers as a group.

Beneficial ownership of shares is determined under rules of the SEC and generally includes any shares over which a person exercises sole or shared voting or investment power. The table also includes the number of shares underlying options and warrants that are exercisable within 60 days. Shares subject to these options and warrants are deemed to be outstanding for the purpose of computing the ownership percentage of the person holding such options or warrants, but are not deemed to be outstanding for the purpose of computing the ownership percentage of any other person. As of September 12, 2006, there were shares outstanding held by approximately 1,400 holders of record.

Except as otherwise indicated, the persons named in the table below have sole voting and investment power with respect to all shares held by them. Unless otherwise indicated, the address for each executive officer and director listed below is *c/o* NextWave Wireless Inc., 12670 High Bluff Drive, San Diego, California 92130.

Securities Beneficially Owned

- (1) The address for Navation, Inc. is c/o Mr. Alain Tripod, 15, rue Général-Dufour, Case Postale 5556, CH - 1211 Genève 11, Switzerland.
- (2) The address for Manchester Financial Group LP is One Market Place, 33rd Floor, San Diego, California 92101.
- (3) Represents shares owned by funds and accounts managed by, or invested side by side with, Resurgence Asset Management, L.L.C. ("RAM"), Resurgence Asset Management International, LLC ("RAMI"), and Re/Enterprise Asset Management, LLC ("REAM", and together with RAM and RAMI, the "Resurgence Companies"). In their capacity as investment advisors and/or general partners, each of the Resurgence Companies exercises voting and investment power over the shares owned by the funds and accounts managed by each of them, respectively. Each of the Resurgence Companies is owned by M.D. Sass Investors Services, Inc. ("MD Sass"). Martin D. Sass serves as Chairman and Chief Executive Officer of MD Sass and each of the Resurgence Companies. Each of the Resurgence Companies and Mr. Sass disclaim beneficial ownership of the securities owned by the entities they advise. The address of the Resurgence Companies is 10 New King Street, White Plains, NY 10604.
- (4) Mr. Thomas L. Kempner, Jr. , Marvin H. Davidson, Stephen M. Dowicz, Scott E. Davidson, Michael J. Leffell, Timothy I. Levart, Robert J. Brivio, Eric P. Epstein, Anthony A. Yoseloff and Avram Z. Friedman have voting and/or investment control over the shares held by Midtown Acquisition LLC. The address for Midtown Acquisition LLC is c/o MH Davidson & Co., 885 Third Avenue, Suite 3300, New York, New York 10022.
- (5) Allen Salmasi is Chief Executive Officer of Navation, Inc. Mr. Salmasi may be deemed to beneficially own the shares of common stock held or record by Navation, Inc. Represents shares held by Allen Salmasi directly and indirectly through Navation, Inc. Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (6) Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (7) Represents shares held by George C. Alex directly and indirectly through each of George C Alex Grantor Retained Annuity Trust and The Alex Family Foundation. Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (8) Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (9) Represents shares held by Kevin M. Finn directly and indirectly through KFMMF Co. Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.

- (10) Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (11) Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (12) Represents shares held by Jim Madsen directly and indirectly through Jarrah Inc. Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (13) Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (14) Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (15) Represents shares held by Kenneth Stanwood directly and indirectly through The K&G Stanwood Family Trust. Includes shares underlying options to purchase CYGNUS common stock, which upon our planned listing on The Nasdaq Global Market, will convert into shares underlying options to purchase our common stock. Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (16) Represents shares held by Douglas F. Manchester directly and indirectly through each of Manchester Financial Group, LP and Manchester Grand Resorts, LP. Includes shares underlying options to purchase CYGNUS common stock, which upon our planned listing on The Nasdaq Global Market, will convert into shares underlying options to purchase our common stock. Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (17) Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (18) Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.
- (19) Includes shares underlying options that are exercisable to purchase restricted stock, which are subject to forfeiture prior to their vesting.

MANAGEMENT**Our Directors and Executive Officers**

The following table sets forth names, ages and positions of the persons who are our directors and executive officers as of September 13, 2006:

Name	Age	Position
Allen Salmasi	52	Chairman of the Board of Director, Chief Executive Officer and President
Frank A. Cassou	49	Executive Vice President - Corporate Development and Chief Legal Counsel, Secretary, Director
George C. Alex	46	Executive Vice President - Chief Financial Officer
Roy D. Berger	48	Executive Vice President - Chief Marketing Officer
Kevin M. Finn	65	Executive Vice President - Chief Compliance Officer, Director
Mark Kelley	45	Executive Vice President - Chief Division Officer
Richard Kornfeld	45	Executive Vice President - Chief Strategy Officer
Jim Madsen	46	Executive Vice President - Chief Business Development Officer
David B. Needham	49	President, Network Solutions Group
R. Andrew Salony	54	Executive Vice President - Chief Administration Officer
Kenneth Stanwood	45	President and Chief Executive Officer - CYGNUS Communications
Lindsay A. (Butch) Weaver, Jr.	53	Executive Vice President and Fellow
Douglas F. Manchester	64	Director
Jack Rosen (3)	60	Director
Robert T. Symington	42	Director
William H. Webster	82	Director

(1) Member of the Audit Committee.

(2) Member of the Compensation Committee.

(3) Member of the Nominating and Corporate Governance Committee.

Following the corporate conversion merger, the persons named above will serve as the directors and executive officers of NextWave Wireless Inc. We expect that the board of directors of NextWave Wireless Inc. will be divided into three classes with the members of each class serving staggered three-year terms. The allocation of directors into the three classes will be determined by our board of directors in connection with the corporate conversion.

Allen Salmasi has served as our Chairman of the Board, Chief Executive Officer and President since our inception. Previously, Mr. Salmasi served as Chairman and CEO of NTI, which he founded in 1995 and subsequently sold to Verizon Wireless in 2005. Prior to NTI, Mr. Salmasi was a member of the Board of Directors, President of the Wireless Telecommunications Division, and Chief Strategic Officer of QUALCOMM Inc. He joined QUALCOMM in 1988 as a result of the merger of QUALCOMM and Omninet Corporation, which Mr. Salmasi founded in 1984. He initiated and led the development of CDMA technologies, standards and the associated businesses at QUALCOMM until 1995. At Omninet, he conceived and led the development of the first OmniTRACS system, which provides two-way messaging and position reporting services to mobile users. From 1979 to 1984, Mr. Salmasi held several technical and management positions at the National Aeronautics and Space Administration Jet Propulsion Laboratory. Mr. Salmasi received two B.S. degrees in Electrical Engineering and Management Economics from Purdue University in 1977. He received his M.S. degrees in Electrical Engineering from Purdue University in 1979 and Applied Mathematics from the University of Southern California in 1983, respectively. He completed his course work at the University of Southern California towards a Ph.D. degree in Electrical Engineering.

Frank A. Cassou is our Executive Vice President, Corporate Development and Chief Legal Counsel and our Secretary. Mr. Cassou held similar positions at NTI, which he joined in 1996. Mr. Cassou has served as a Director since our inception. Prior to joining NextWave, Mr. Cassou was a partner at the law firm of Cooley Godward LLP, where he practiced corporate law representing telecommunications and technology companies. He was outside corporate counsel to QUALCOMM from June 1991 through February 1996, representing the company in its public financing and acquisition transactions, licensing agreements and the formation of strategic partnerships.

George C. Alex serves as our Chief Financial Officer. Mr. Alex joined NextWave Telecom in 2001 as Senior Vice President, Finance. Formerly, he was Chief Financial Officer of Network Plus Corp., an integrated communications provider and a Managing Director of Prudential Securities, where he headed the telecommunications practice. During his career as an investment banker, Mr. Alex completed transactions that raised more than \$20 billion for his clients and executed M&A assignments in excess of \$6 billion.

Roy D. Berger serves as our Chief Marketing and Corporate Communications Officer. Mr. Berger joined NTI in 1996 as Vice President, Business Planning and subsequently served in a number of executive marketing and business development positions. Prior to joining NextWave, Mr. Berger spent ten years at NYNEX, where he held senior management positions in both the telecommunications and computer retailing/distribution divisions, including Vice President-Personal Communication Services and Vice President-Marketing for NYNEX Mobile Communications. Before joining NYNEX, Mr. Berger held senior management positions with several leading companies in the personal computer retailing industry.

Kevin M. Finn serves as our Chief Compliance Officer and as a Director. Mr. Finn joined NTI in 1995 where he was formerly Senior Vice President, Special Projects. From 1992 until 1995, Mr. Finn served as President of Marin-Finn Industries, Inc. Prior to that, he served as Vice President and General Manager of Densitron Technology plc., and from 1986 to 1988, Mr. Finn was Executive Vice President of Omninet Inc. Mr. Finn was a Vice President of Sony Corporation of America and General Manager of its Component Products Division from 1983 to 1987.

Mark Kelley serves as the Chief Division Officer of NextWave Broadband's Advanced Technology Group. Mr. Kelley has more than 25 years experience in engineering, communication systems planning and analysis. Prior to joining NextWave in 2005, Mr. Kelley was Chief Technical Officer of Leap Wireless. Formerly, he served as Vice President of Wireless System Design for QUALCOMM, where he was responsible for all wireless infrastructure system design activities, including radio and fixed network system planning, project engineering and the development of QUALCOMM's commercial CDMA network planning software product. As a Director of Planning for Wireless Design Firm LLC, Mr. Kelley led the design of the world's first GSM system in Germany. Earlier in his career, Mr. Kelley developed custom ASICs at Hughes Microelectronics. Mr. Kelley holds a Bachelor of Science degree in Electrical Engineering from San Diego State University.

Richard Kornfeld serves as our Chief Strategy Officer. Before joining us, Mr. Kornfeld was the CEO of Staccato Communications, Inc. Prior to this, Mr. Kornfeld was the Vice President and General Manager of Texas Instruments' Wireless Center responsible for the Wireless Chipset Business. He joined Texas Instruments through the acquisition of Dot Wireless, Inc., which he co-founded and served as the Chairman, CEO and President. Prior to founding Dot Wireless, Mr. Kornfeld had been a founding member of NTI, where he was the Senior Vice President and General Manager of the Consumer Products division. Previously, Mr. Kornfeld was Vice President of Engineering at QUALCOMM, Inc. During his 10-year tenure, he helped QUALCOMM grow from a 20-person startup to a world leader in telecommunications, currently employing more than 7,000 people. Prior to QUALCOMM, Mr. Kornfeld held various technical positions at M/A-Com Linkabit. Mr. Kornfeld is a graduate from the School of Engineering, University of California.

Jim Madsen serves as our Chief Business Development Officer. Formerly, Mr. Madsen held several executive management positions at NTI which he co-founded in 1995. From 1989 to 1995, at QUALCOMM, Mr. Madsen headed CDMA Business Development where he led the company's PCS business development, marketing and sales

initiatives, and also served as Director of Marketing for OmniTRACS' satellite data communications business and was responsible for worldwide VLSI components business development and marketing. Mr. Madsen earned his S.B. in mechanical engineering from the Massachusetts Institute of Technology and his M.B.A. from Stanford University.

David B. Needham is the President of NextWave Broadband's Network Solutions Group. He was formerly the Chief Operating Officer for NTI and has been with NextWave since 1996. Prior to joining NextWave, Mr. Needham served as President and Chief Operating Officer of GE Capital-ResCom. From 1992 to 1994, Mr. Needham served as President of MetroCel Cellular Telephone Company, a joint-venture cellular telecommunications company owned by AT&T Wireless and Airtouch Communications serving the Dallas-Fort Worth area. While at MetroCel, Mr. Needham led the development and commercial launch of Voice Touch, the wireless industry's first voice-activated switch product, and MetroCel Connect, one of the first wireless direction and information services. From 1989 to 1991, Mr. Needham served as District General Manager for the California Valley and Nevada cellular operations of McCaw Cellular Communications. Mr. Needham earned a Bachelor of Arts degree from Harvard University and a Masters in Business Administration from Harvard Business School.

R. Andrew Salony is our Chief Administrative Officer and is responsible for Corporate Planning, Administration and Human Resources. Since joining NTI in 1996, Mr. Salony has served in numerous executive management roles, including Senior Vice President of Marketing, Strategy, Business Development and Human Resources. Prior to his tenure at NextWave, Mr. Salony was a Senior Partner and Managing Director of the wireless division at Warren, Morris and Madison Ltd., a leading boutique executive search firm specializing in telecommunications and entertainment. He began his wireless telecommunications career in 1982 with Communication Industries, where he held executive positions in sales, marketing and general management in the company's cellular and paging operations. Mr. Salony remained with the company—which was sold to US West in 1986—until 1993, serving as General Manager of the Southern California Region.

Kenneth Stanwood serves as President and Chief Executive Officer of CYGNUS Communications. He was previously CTO of Ensemble Communications which produced LMDS equipment and provided key technology to 802.16 and WiMAX. As a representative of Ensemble, he was one of the founders of the WiMAX Forum and served on its board of directors. Ken served as vice-chair of IEEE 802.16 for three years and has been involved with 802.16 and ETSI BRAN for over 7 years. He was a primary designer of the 802.16 MAC layer. He holds 13 patents and numerous patent applications, all related to broadband wireless access. He received his MS degree from Stanford University.

Lindsay A. (Butch) Weaver, Jr. serves as Executive Vice President and Fellow. Mr. Weaver joined QUALCOMM in January 1986. Immediately prior to joining NextWave, Butch Weaver served as Executive Vice President - Engineering of QUALCOMM and one of five QUALCOMM Fellows. Over the last twenty years, his responsibilities at QUALCOMM included leading the development of the OmniTRACS system, leading the development of the CDMA-based wireless technology, and co-leading the overall Engineering Department. Prior to joining QUALCOMM, Mr. Weaver held positions of Engineer through Assistant Vice President at Linkabit. While at Linkabit, he led many developments including the VideoCipher system that enabled the first retail satellite TV distribution in the U.S. He holds over 50 U.S. Patents in areas ranging from CDMA cellular system design to digital frequency synthesizers. Mr. Weaver graduated from MIT with his Bachelors and Masters Degrees in Electrical Engineering and Computer Science.

Douglas F. Manchester has served on our Board of Directors since our inception. He is also chairman of Manchester Financial Group, LP. Douglas Manchester (Papa Doug) is one of San Diego's leading private developers.

Jack Rosen has served on our Board of Directors since our inception. Mr. Rosen is chief executive of several commercial and residential real estate firms and the current Chairman of the American Jewish Congress. In addition, Mr. Rosen oversees a wide array of healthcare, cosmetic and telecommunications business ventures throughout the US, Europe and Asia. Active in international government and political affairs, Mr. Rosen has participated in numerous commissions and councils for President Bush and former President Clinton. Mr. Rosen is currently a member of the Council on Foreign Relations and the U.S.-Israel Bi-National Commission on Housing and Community Development.

Robert T. Symington has served on our Board of Directors since our inception. Mr. Symington is a Portfolio Manager at Avenue Capital Group. Mr. Symington, through his prior management positions at M.D. Sass and Resurgence Asset

Management, was an early investor in NTI. He earned his Bachelor of Arts in English Literature from Dickinson College and his M.B.A. in Finance and Accounting from Cornell University's Johnson Graduate School of Management.

William H. Webster has served on our Board of Directors since our inception. Judge Webster is a consulting partner in Milbank, Tweed, Hadley & McCloy LLP's Washington office, where he specializes in arbitration, mediation and internal investigation. Prior to joining Milbank in 1991, Judge Webster began a long and illustrious career in public service. Judge Webster was U.S. Attorney for the Eastern District of Missouri, then a member of the Missouri Board of Law Examiners. In 1970, he was appointed a judge of the U.S. District Court for the Eastern District of Missouri, and then elevated to the U.S. Court of Appeals for the Eighth Circuit. Judge Webster resigned the judgeship to head the Federal Bureau of Investigation. In 1987, he was sworn in as Director of the Central Intelligence Agency. He led the CIA until his retirement from public office in 1991. Judge Webster has received numerous awards for public service and law enforcement and holds honorary degrees from several colleges and universities. Judge Webster currently serves as Vice Chairman of the Homeland Security Advisory Council.

Indemnification of Directors and Officers

We have adopted provisions in our certificate of incorporation and bylaws that limit the liability of our directors and officers for any loss, claim or damage incurred by reason of any act or omission performed or omitted by such person on our behalf and in good faith and in a manner reasonably believed to be within the scope of the authority conferred on such person by our bylaws. However, a director or officer will be liable (i) for any breach of such individual's duty of loyalty to the corporation or its stockholders; (ii) for acts or omissions not performed or omitted in good faith or involved intentional misconduct or a knowing violation of the law; (iii) for unlawful payments of a dividend or unlawful stock purchases or redemptions under Section 174 of the General Corporation Law of the State of Delaware or (iv) for any transaction from which such person received an improper personal benefit.

To the extent not prohibited by law, we will advance the costs incurred by or on behalf of any director or officer in connection with any indemnified loss within 20 days after we receive a detailed statement providing reasonable documentation of such costs and providing a written undertaking stating that such person will repay all advanced costs if it is later determined that such individual was entitled to indemnification by us. We believe that the limitation of liability provision in our bylaws will facilitate our ability to continue to attract and retain qualified individuals to serve as managers and officers.

Family Relationships

There are no family relationships between or among any of our directors and executive officers.

Committees of the Board of Directors

Our board of directors has three standing committees: the audit committee, the nominating and corporate governance committee and the compensation committee.

The primary purpose of the audit committee is to:

assist the board's oversight of:

the integrity of our financial statements;

our compliance with legal and regulatory requirements;

the application of our codes of conduct and ethics as established by the board of directors;

our independent auditors' qualifications, engagement, compensation and performance, their conduct of the annual audit of our financial statements, and their engagement to provide any other services; and

- the performance of our system of internal controls;
- prepare the report required to be prepared by the committee pursuant to SEC rules; and
- maintain and oversee procedures for addressing complaints about accounting matters.

Messrs. Manchester, Symington and Webster serve on the audit committee. Mr. Manchester serves as chairman of the audit committee. Mr. Symington qualifies as an independent “audit committee financial expert” as such term has been defined by the SEC in Item 401(h)(2) of Regulation S-K. In accordance with the rules of Nasdaq and the relevant federal securities laws and regulations, each member of our audit committee is independent within the meaning of such rules.

The primary purpose of the nominating and corporate governance committee is to:

- identify and to recommend to the board individuals qualified to serve as directors of our company and on committees of the board;
- review corporate governance on a regular basis;
- review and recommend changes to the size of the Board;
- review the manner in which conflicts of interest are addressed; and
- recommend to the Board any changes in director compensation.

Messrs. Manchester, Rosen and Webster serve on the nominating and corporate governance committee. Mr. Webster serves as the chairman of the nominating and corporate governance committee. Each member of the nominating and corporate governance committee is independent within the meaning of the rules of Nasdaq and the relevant federal securities laws and regulations.

The primary purpose of the compensation committee is to:

- review CEO and other executive officer compensation at least annually;
- review and approve any annual performance objectives;
- review and recommend to the Board equity based plans and review all grants under such plans;
- review any employee retirement or other benefit plans and recommend any desired changes to the Board; and
- prepare the annual report on compensation to be included in the proxy statement.

Messrs. Manchester, Symington and Webster serve on the compensation committee. Mr. Symington serves as chairman of the compensation committee. Each member of the compensation committee is independent within the meaning of the rules of Nasdaq and the relevant federal securities laws and regulations.

EXECUTIVE COMPENSATION

The following table presents information regarding compensation paid by us from inception (April 13, 2005) during the fiscal year ended December 31, 2005 to our Chief Executive Officer and each of our other six most highly compensated executive officers during our most recently completed fiscal year. These executives, together with Allen Salmasi, are referred to as the “named executive officers” elsewhere in this registration statement.

Name and Principal Position	Year	Annual Compensation			Long-Term Compensation
		Salary (\$)	Bonus (\$)	Other Annual Compensation (\$)(1)	Awards Securities Underlying Options/SARs (#)
Allen Salmasi, Chief Executive Officer	2005	399,577	--	--	2,500,000
Frank A. Cassou, Chief Legal Counsel	2005	274,095	--	--	2,000,000
George C. Alex, Chief Financial Officer	2005	193,008	--	--	1,500,000
R. Andrew Salony, Chief Administration Officer	2005	188,237	--	26,281	1,500,000
Roy D. Berger, Chief Marketing Officer	2005	186,287	--	--	1,500,000
Jim Madsen, Chief Business Development Officer	2005	186,287	--	--	1,500,000
David B. Needham, Chief Division Officer	2005	186,287	--	26,048	1,500,000

(1) Amounts shown in this column represent housing and car allowances paid to the named executive officers in connection with temporary relocations.

Stock Option Grants in Fiscal 2005

The following table sets forth information regarding stock options granted for the named executive officers during the fiscal year ended December 31, 2005.

Individual Grants

Name	Number of Securities Underlying Options/SARs Granted (#) (1)	% of Total Options/SARs Granted to Employees in Fiscal 2005	Exercise or Base Price (\$/Sh)	Expiration Date	Grant Date Present Value (\$) (2)
Allen Salmasi	2,500,000	6.9	\$1.00	4/12/15	259,500
Frank A. Cassou	2,000,000	5.5	\$1.00	4/12/15	207,600

(1) The options granted to the named executive officers vest in equal monthly installments over four years, with the first monthly vesting occurring May 13, 2005. The options will fully vest on April 13, 2009. In the event of certain changes in control, including in the event we are acquired by merger or asset sale, each option will vest and become exercisable unless the option is assumed or replaced by the acquiring entity. The options are exercisable only by the named executive officers during their lifetime, or by the person to whom their rights pass by will or the laws of descent and distribution. The options are exercisable to purchase shares of NextWave restricted stock, which are subject to forfeiture prior to their vesting.

(2) Based on the grant date present value of \$0.1038 per option share which was derived using the Black-Scholes option model, which is not intended to forecast future appreciation of our common share price. The Black-Scholes model was used with the following assumptions: dividend yield of 0%; expected volatility of 0%; risk-free interest rate of 3.71%; and expected lives of 2.9 years.

Option Exercises in 2005 and Year-End Option Values

The following table sets forth the number of shares of common stock subject to stock options and/or SARs and the value of such options held by each of our named executive officers as of December 31, 2005.

**Aggregated Option/SAR Exercises in Last Fiscal Year
and FY-End Option/SAR Values**

Equity Incentive Plans

Below is a summary of NextWave Wireless LLC's equity incentive plans. In connection with the corporate conversion merger, we will assume NextWave Wireless LLC's obligations under all the stock option plans of it and its subsidiaries.

2005 Units Plan

Purpose

The NextWave Wireless LLC 2005 Units Plan (the “Plan”) is intended to promote the interests of our company by encouraging our officers, employees, non-employee directors and consultants by providing them with opportunities to acquire or increase their equity interests and to develop a sense of proprietorship in our development and financial success.

86

Shares Available

The Plan makes available for Awards an aggregate of 75,000,000 LLC interests, subject to certain adjustments. If an Award is cancelled, expires, reacquired by the Company pursuant to any forfeit or otherwise terminated, in whole or in part, any rights to acquire the shares allocable to the unexercised or unvested portion of such Award will again be available for the purposes of the Plan. If a participant pays for any Award through the delivery of previously acquired shares, the number of shares available shall be increased by the number of shares delivered by the participant. Any shares delivered pursuant to an Award may only be authorized and unissued shares and, unless permitted under Delaware law, may not be treasury shares. No fractional shares shall be issued under the Plan.

Eligibility for Participation

Employees, directors and consultants to us or any of our affiliates are eligible to participate in the Plan. The selection of participants is within the sole discretion of our Compensation Committee.

Administration

The Plan is administered by the Compensation Committee. Grants of Awards to members of the Compensation Committee must be ratified by the board of directors. The Compensation Committee has full power and authority under the plan to: (i) designate participants; (ii) determine the type of Awards to be granted to a participant; (iii) determine the number of shares to be covered by in connection with an Award; (iv) determine the terms and conditions of any Award; (v) determine under what circumstances Awards may be settled, exercised, canceled or forfeited; (vi) determine whether other amounts payable with respect to an Award should be deferred either automatically, at the election of the holder or of the Compensation Committee; (vii) interpret and administer the Plan; (viii) establish or waive such rules and regulations and appoint agents for the proper administration of the Plan; and (ix) make any other determination and take any other action it deems necessary or desirable for the administration of the Plan.

Types of Awards

The Plan provides for the grant of any or all of the following types of benefits: (1) options, including nonqualified stock options; (2) restricted shares; (3) performance awards; (4) bonus shares; (5) phantom shares; and (6) other share-based awards (collectively, "Awards"). Awards may be granted singly or in combination as determined by the Compensation Committee. As of the date of this registration statement, the Compensation Committee has only granted options to purchase common stock under the Plan and has not utilized any other form of equity-based grant.

Under the Plan, the Compensation Committee may grant Awards in the form of options to purchase shares of common stock, which may be nonqualified options. The Compensation Committee has discretion to determine the participants and number of shares subject to the option, the time and method of the option's exercise, and the exercise price per share subject to the option; however, the exercise price shall not be less than 100% of the "Fair Market Value" of a share of common stock on the date the option is granted. For purposes of the Plan, "Fair Market Value" means the closing sale price of a share of common stock on the applicable date (or on the last preceding trading date if the shares were not traded on such date) as reported in The Wall Street Journal, or other reporting service approved by the Compensation Committee. If our common stock is not publicly tradable at the time a determination of its Fair Market Value is required to be made, Fair Market Value shall be determined in good faith by the Compensation Committee.

The Plan also authorizes the Compensation Committee to grant restricted shares. A restricted share is a common stock award prior to the lapse of restriction thereon, which shall not be less than three years. Except as otherwise determined by the Compensation Committee or the terms of the award that created the restricted share, if a participant's employment is terminated during the applicable restricted period, all restricted shares will be forfeited by the participant and reacquired by the company. Once the applicable restrictions have lapsed or otherwise been satisfied, the Compensation Committee shall promptly issue the holder of the restricted shares unrestricted shares.

The Compensation Committee has the authority to grant performance awards, which are denominated as a cash amount, upon the achievement of certain performance objectives as the Committee shall establish with respect to the award. The Compensation Committee may determine the performance objectives to be achieved, the length of any performance period, the amount of any performance award and the amount of any payment or transfer to be made pursuant to the award. Performance awards can be payable in cash and/or in shares of common stock.

The Compensation Committee is authorized to grant bonus shares to participants, constituting a transfer of an unrestricted share of common stock as additional compensation to the participant for services to the company. Bonus shares are distributed in lieu of a cash bonus that would otherwise be granted.

The Compensation Committee is also authorized to grant awards of phantom stock. Phantom shares that are vested on the date of grant are distributed in lieu of a cash bonus that otherwise would have been granted. Each phantom share award constitutes an agreement by us and the participant to issue or transfer a specified number of shares or to pay an amount of cash equal to a specified number of shares, or a combination, subject to any restricted period fulfillment or any other period set by the Compensation Committee. During the restricted period, the participant does not have any right to vote or right of ownership in the phantom shares. A phantom share award may provide that an amount equal to a any distribution made during the restricted period be credited to an account.

The Compensation Committee may, in its discretion grant other equity-based awards.

Other Terms of Awards

Subject to the terms of the Plan and any applicable Award agreement, any grant of Awards by us may be in any form the Compensation Committee shall determine. The Plan provides that Awards shall not be transferable other than by will and the laws of descent and distribution. An option Award is transferable pursuant to a domestic relations order. No Award or right under an Award may be assigned, alienated, pledged, attached, sold or otherwise transferred by a participant, and any such attempted transfer is void and unenforceable. The Compensation Committee has discretion to permit an Award of options to be transferred to immediate family members or related family trusts.

No Award shall be granted under the Plan more than ten years after the date it is granted. All certificates for shares delivered under the Plan pursuant to an Award are subject to stop transfer orders and other restrictions that the Compensation Committee deems advisable under the Plan or the rules and regulations of the SEC, and the Compensation Committee may require a legend to be put on such certificates to make appropriate reference to such restrictions.

No shares may be delivered until payment in full is paid pursuant to the Plan or the applicable Award agreement.

Notwithstanding any other provision of the Plan to the contrary, any Award granted under the Plan contains will contain terms that (i) are designed to avoid application of Section 409A of the Internal Revenue Code or (ii) are designed to avoid adverse tax consequences under Section 409A of the Internal Revenue Code.

Amendments and Termination

The Plan may be amended or terminated by our board of directors or the Compensation Committee without the consent of any shareholder or participant, unless such consent is required by law or by the exchange or market on which the shares are listed. The Compensation Committee may waive any conditions or rights under any Award granted. The Compensation Committee is authorized to make adjustments in the terms and conditions of Awards pursuant to unusual events affecting us or our affiliates or our financial statements, or of changes in applicable laws or accounting principles whenever the Compensation Committee determines that adjustments are appropriate to prevent dilution or enlargement of the benefits intended to be made available under the Plan.

Change of Control

If the shares subject to the Plan are changed without the receipt of consideration by us, the Plan and outstanding Awards will be adjusted in the class(es) and maximum number of shares subject to the Plan. In the event of a change in control, if we do not survive as an independent entity, the surviving entity will assume the Awards outstanding under the Plan or substitute similar awards. If we continue as an independent entity or organization, the Awards will continue in full force and effect. Upon a change of control, all Awards will become fully vested immediately prior to such event.

Term of the Plan

The Plan will expire on the tenth anniversary of the date of its adoption unless it is terminated earlier. Any award granted prior to such expiration or termination will extend beyond such expiration or termination date.

CYGNUS 2004 Stock Option Plan

Purpose

CYGNUS Communications, Inc.'s 2004 Stock Option Plan (the "CYGNUS Plan") is intended to provide a means by which employees, directors and consultants of CYGNUS are given an opportunity to own its common stock, to secure and retain the services of persons capable of filling such positions and to provide incentives for such persons to exert maximum efforts for CYGNUS' success.

Shares Available

The CYGNUS Plan makes available an aggregate of 9,966,501 shares of common stock of CYGNUS that may be sold pursuant to an exercise of options. When a stock award expires or is terminated before it is exercised, it is forfeited back to the CYGNUS Plan. To the extent that the aggregate Fair Market Value (as defined below) of the common stock, determined at the time of grant, with respect to which incentive stock options are exercisable for the first time by any option holder exceeds \$100,000, the options or portions above \$100,000 will be treated as nonstatutory stock options. Upon the effectiveness of this registration statement, and our listing on The Nasdaq Global Market, the CYGNUS options will be converted into options to purchase shares of our common stock using a ratio of per share of our common stock for each CYGNUS share, subject to adjustments for stock splits and similar events. Following such conversion, the terms of awards under the CYGNUS Plan will continue to be governed by the terms of that plan.

Administration

The CYGNUS Plan is administered by CYGNUS's board of directors, unless and until its board delegates administration to a committee. The CYGNUS board has the power to select the eligible persons to whom options will be made, determine when and how each option is granted, the type of option, the provisions of each grant and the amount of shares for which an option will be granted to each person. CYGNUS's board also has the power to construe and interpret the CYGNUS Plan, place restrictions on the sale or disposition of the options shares and to establish, amend and revoke rules and regulations for its administration and to make it fully effective.

Eligibility for Participation

The CYGNUS Plan permits its board to grant incentive stock options to employees and nonstatutory stock options to employees, directors and consultants. A written option agreement specifies the capacity for option grants in the event one is both an employee and a director or a director and consultant.

Types of Benefits

Under the CYGNUS Plan, the CYGNUS board grants options through a written option agreement. No option may be exercisable after the expiration of ten years from the date it was granted. The exercise price per share of an incentive stock option shall not be less than 100% of the “Fair Market Value” of the CYGNUS common stock subject to the option on the date the option is granted. For purposes of the CYGNUS Plan, “Fair Market Value” means the amount determined in good faith by CYGNUS’s board as the fair market value of the common stock. The CYGNUS board has discretion to determine the consideration to be paid for the options and an option agreement may allow for a delay in payment and payment in whole or in part through cash or any other method of cashless exercise. The CYGNUS board may require an option holder to provide written assurance of securities law compliance. The CYGNUS Plan also provides for the exercise of options upon termination of employment or consulting relationship.

Other Provisions

We will assume NextWave Wireless LLC's obligations under the CYGNUS Plan.

CYGNUS must keep available at all times the number of shares of its common stock required to satisfy the outstanding options during their terms. CYGNUS will use its reasonable efforts to comply with each regulatory commission or agency that has jurisdiction over the option plan, provided that this undertaking shall not require CYGNUS to register the CYGNUS Plan or any option under the Securities Act.

If any change is made to the common stock subject to the CYGNUS Plan without CYGNUS receiving consideration, the plan and all outstanding options will be appropriately adjusted in the class and maximum amount of shares. Upon an asset sale, merger, consolidation or reverse merger, the surviving entity must either assume or substitute the options. In the event the surviving entity does not assume or substitute these outstanding options, then the vesting of outstanding options will accelerate prior to the event.

Each year, CYGNUS will provide to each option holder a copy of the annual financial report prepared by its independent certified public accountant.

CYGNUS's board may amend the CYGNUS Plan. If the CYGNUS board seeks an amendment which will increase the number of shares reserved for options under the CYGNUS Plan or modify the requirements as to eligibility for participation, the board must obtain the approval of CYGNUS's shareholders within twelve months before or after the adoption of the amendment. The CYGNUS board may also suspend or terminate the CYGNUS Plan at anytime, provided consent is obtained from the option holder if the rights and obligations under any option are altered or impaired by its suspension. Unless sooner terminated, the CYGNUS Plan will terminate on August 15, 2014.

Director Compensation

Each of our non-employee directors receives compensation in the amount of \$2,000 for each meeting of the board of directors he attends in person and \$1,000 for each meeting he attends by telephone. Each non-employee director also receives \$1,000 for each committee meeting he attends in person and \$750 for each committee meeting he attends by telephone. The outside directors are also reimbursed for expenses incurred in attending any board or committee meetings. In 2005, we granted each of our outside directors 200,000 options to purchase shares of our LLC interests as additional compensation for service on the board and, to the extent applicable, 50,000 options in consideration for service provided to each committee of the board. The exercise price per interests for these options, which were granted under our 2005 Units Plan, is the fair market value of a unit on the date of grant. The options vest in equal monthly installments over two years and have a term of 10 years measured from the vesting commencement date.

Compensation Committee Interlocks and Insider Participation

Our compensation committee is comprised of Messrs. Manchester, Symington and Webster. None of the members of our compensation committee have at any time been one of our officers or employees. None of our executive officers currently serves, or in the past fiscal year has served, as a member of the board of directors or compensation committee of any entity that has one or more executive officers serving on our board of directors or compensation committee. Mr. Symington was appointed to the compensation committee on April 27, 2006, replacing Mr. Salmasi, who resigned in connection with the Company's registration of its securities under this registration statement. From our inception on April 13, 2005 to April 27, 2006, Allen Salmasi, our Chairman and Chief Executive Officer, was a member of the compensation committee.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

On July 18, 2005, NextWave issued options to purchase 500,000 LLC interests to Manchester Financial Group LP ("Manchester Financial") as consideration for services rendered in connection with NextWave's acquisition of certain licensed spectrum leases. The options were exercised on July 10, 2006 at an exercise price of \$1.00 per interest. Douglas (Papa Doug) Manchester, a member of our Board of Directors, is the controlling shareholder of the general partner of Manchester Financial.

Code of Business Conduct and Ethics

Our Board of Directors has adopted a Code of Business Conduct and Ethics that applies to our directors, officers and employees. A copy of our Code of Business Conduct and Ethics is available on our website at www.nextwave.com. We will also provide a copy of our Code of Business Conduct and Ethics, without charge, to any stockholder who so requests in writing.

DESCRIPTION OF CAPITAL STOCK

To enable our planned listing on The Nasdaq Global Market, NextWave Wireless LLC's board of managers and a majority in interest of the members of NextWave Wireless LLC has approved the conversion of the Company from a Delaware limited liability company to a Delaware corporation. The corporate conversion will be effected through the merger of our wholly-owned subsidiary with and into NextWave Wireless LLC. We expect to effectuate the corporate conversion merger prior to our planned listing on Nasdaq. In the merger, NextWave Wireless LLC's equity holders will receive a number of shares of our common stock based on an exchange ratio to be determined by NextWave Wireless LLC's Board of Managers. Each holder of limited liability interests will own the same percentage of the outstanding equity of the Company before and immediately after giving effect to the corporate conversion merger. In addition, we will assume the obligations of NextWave Wireless LLC under all stock option plans of the Company and its subsidiaries. We are filing this registration statement on Form S-4 to register the issuance of our shares of common stock in the corporate conversion merger.

General

As of September 12, 2006, NextWave Wireless LLC had 492,064,046 LLC interests outstanding held by approximately 1,400 holders of record. The number of shares of common stock outstanding after giving effect to our corporate conversion will depend on the reverse split ratio to be determined by our board of managers. After our corporate conversion merger, the authorized capital stock of NextWave Wireless Inc. will consist of 400,000,000 shares of common stock, par value \$0.001 per share and 25,000,000 shares of preferred stock, par value \$0.001 per share. NextWave Wireless LLC's membership interests are, and the outstanding shares of our common stock will be, fully paid and non-assessable. As of September 12, 2006, there were 77,166,317 LLC interests reserved for future issuance, of which 60,771,661 are granted and outstanding options and warrants and 16,394,656 are available for future option grants. In addition, following the corporate conversion merger, shares of our common stock may become issuable pursuant to the CYGNUS Plan and the PacketVideo Corporation 2005 Equity Incentive Plan (the "PacketVideo Plan"). See "Subsidiary Option Plans" below.

A description of our common stock appears below.

Common Stock

Dividend Rights. Holders of outstanding shares of our common stock are entitled to receive dividends out of assets legally available at the times and in the amounts that our board of directors may determine from time to time

Voting Rights. Each holder of common stock is entitled to one vote for each share of common stock held on all matters submitted to a vote of stockholders. We have not provided for cumulative voting for the election of directors in our certificate of incorporation. This means that the holders of a majority of the shares voted can elect all of the directors then standing for election.

No Preemptive, Conversion or Redemption Rights. Our common stock is not entitled to preemptive rights and is not subject to conversion or redemption.

Right to Receive Liquidation Distributions. Upon our liquidation, dissolution or winding-up, the holders of our common stock are entitled to share in all assets remaining after payment of all liabilities and the liquidation preferences of any outstanding preferred stock. Each outstanding share of common stock is fully paid and nonassessable.

Anti-Takeover Effects of Delaware Law and the Certificate of Incorporation and Bylaws of NextWave Wireless Inc.

The provisions of Delaware law, as well as our certificate of incorporation and bylaws described below may have the effect of delaying, deferring or discouraging another party from acquiring control of our company.

Delaware Law

Effective upon the listing of our common stock on The Nasdaq Global Market, our company will be subject to the provisions of Section 203 of the Delaware General Corporation Law regulating corporate takeovers. In general, those provisions prohibit a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years following the date that the stockholder became an interested stockholder, unless: the transaction is approved by the board of directors before the date the interested stockholder attained that status; upon consummation of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced; or on or after the date the business combination is approved by the board of directors and authorized at a meeting of stockholders by at least two-thirds of the outstanding voting stock that is not owned by the interested stockholder.

Section 203 defines business combination to include the following: any merger or consolidation involving the corporation and the interested stockholder; any sale, transfer, pledge or other disposition of 10% or more of the assets of the corporation involving the interested stockholder; subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder; any transaction involving the corporation that has the effect of increasing the proportionate share of the stock of any class or series of the corporation beneficially owned by the interested stockholder; or the receipt by the interested stockholder of the benefit of any loans, advances, guarantees, pledges or other financial benefits provided by or through the corporation.

In general, Section 203 defines an interested stockholder as any entity or person beneficially owning 15% or more of the outstanding voting stock of the corporation and any entity or person affiliated with or controlling or controlled by any of these entities or persons. A Delaware corporation may opt out of this provision either with an express provision in its original certificate of incorporation or in an amendment to its certificate of incorporation or bylaws approved by its stockholders. However, we have not opted out, and do not currently intend to opt out of this provision. The statute could prohibit or delay mergers or other takeover or change in control attempts and, accordingly, may discourage attempts to acquire us.

Certificate of Incorporation and Bylaws

Our certificate of incorporation and bylaws will provide that:

- our directors serve staggered, three-year terms and accordingly, pursuant to Delaware law, can only be removed with cause;
- no action can be taken by stockholders except at an annual or special meeting of the stockholders called in accordance with our bylaws, and stockholders may not act by written consent;
- our board of directors will be expressly authorized to make, alter or repeal our bylaws, and our stockholders will be able to make, alter or repeal our bylaws by a vote of 66-2/3% of the issued and outstanding voting shares;
 - any vacancies on the board of directors would be filled by a majority vote of the board;
 - our board of directors will be authorized to issue preferred stock without stockholder approval; and
- we will indemnify officers and directors against losses that they may incur in investigations and legal proceedings resulting from their services to us, which may include services in connection with takeover defense measures.

Subsidiary Option Plans

Upon the effectiveness of this registration statement, and our listing on The Nasdaq Global Market, up to 9,966,501 options issued under the CYGNUS Plan will be converted into options to purchase shares of our common stock using a ratio of 0.30584 per share of our common stock for each CYGNUS share, subject to adjustment for stock splits and similar events.

In connection with our acquisition of PacketVideo, PacketVideo adopted the PacketVideo Plan. The PacketVideo Plan makes up to 9,250,000 shares of PacketVideo common stock available for option and other awards to employees and consultants of PacketVideo. These awards allow employees and consultants of PacketVideo to retain incentives linked directly to PacketVideo's equity value prior to our consummation of a public offering of our common stock by filing a registration statement on Form S-1 or an equivalent replacement form (an "IPO"). If we consummate an IPO, then each outstanding option issued under the PacketVideo Plan, exercised or not, will be automatically converted into an option to purchase shares of our common stock on a one-for-one basis, subject to adjustment for stock splits and similar events. The shares available for award under the PacketVideo Plan represent up to 16.5% of the fully diluted share capitalization of PacketVideo. If any options awarded under the PacketVideo Plan are exercised prior to the conversion of these options, PacketVideo would no longer be a wholly owned subsidiary. Following an IPO, the terms of converted awards under the PacketVideo Plan will continue to be governed by that plan based on the corporate conversion merger exchange ratio ultimately determined by our board of managers.

Nasdaq Global Market Listing

We have applied for the listing of our common stock on The Nasdaq Global Market under the symbol "WAVE."

Transfer Agent and Registrar

The transfer agent and registrar for NextWave Wireless LLC's limited liability company interests, and, following the corporate conversion merger, our common stock, is Computershare Trust Company, N.A.

COMPARISON OF RIGHTS

The rights of NextWave Wireless LLC’s interest holders are governed by the Limited Liability Company Act of the State of Delaware and NextWave Wireless LLC’s limited liability company agreement. On completion of the corporate conversion merger, the rights of our stockholders will be governed by the General Corporation Law of the State of Delaware and our certificate of incorporation and by-laws. The following is a summary of the material differences between the current rights of NextWave Wireless LLC’s interest holders and those of our future stockholders. For a discussion of the material tax consequences of the corporate conversion merger, see “Business-Corporate Conversion Merger.”

The following summary of the material differences between NextWave Wireless LLC’s limited liability company agreement and our certificate of incorporation and bylaws may not contain all the information that is important to you. To review all provisions and differences of such documents in full detail, please read the full text of these documents, the General Corporation Law of the State of Delaware and the Limited Liability Company Act of the State of Delaware. Copies of NextWave Wireless LLC’s limited liability company agreement and our certificate of incorporation and bylaws are filed as exhibits to this registration statement.

Summary Comparison of Terms of LLC Units of NextWave Wireless LLC and Shares of NextWave Wireless Inc. Common Stock

LLC Interests	Shares
Liquidity and Marketability	
<p>NextWave Wireless LLC’s limited liability company agreement prohibits the transfer of interests if such transfer would:</p> <ul style="list-style-type: none"> · subject it to the reporting requirements of the Securities and Exchange Act of 1934; · cause it to lose its status as a partnership for U.S. federal income tax purposes; or · cause it to be classified as a “publicly traded partnership” within the meaning of Section 7704 of the United States Internal Revenue Code of 1986. <p>Subject to the requirements above, a holder of NextWave Wireless LLC’s membership interests may transfer his, her or its interests in each of the following cases:</p> <ul style="list-style-type: none"> · As part of a public sale of NextWave Wireless LLC’s securities; or · To an affiliate of the holder (including (i) any partner or member of the holder, (ii) any person controlling, controlled or under common control with such holder, (iii) any 	<p>Our shares will be generally freely transferable. The shares will be listed on The Nasdaq Global Market upon official notice of issuance.</p>

spouse, child, grandchild, parent, grandparent or sibling or (iv) a trust or other entity for such holder's benefit); provided the transferee holds such interests in the same manner as transferor and such transferee executes a joinder agreement.

The restrictions on transfer contained in NextWave Wireless LLC's limited liability company agreement will terminate upon the earlier to occur of (i) the closing of an underwritten public offering pursuant to an effective registration statement, (ii) the closing of a merger or similar transaction whereby those persons who own 100% of NextWave Wireless LLC's membership interests immediately prior to such transaction do not hold more than 50% of the voting power after giving effect to such transaction, or (iii) the closing of a sale of all or substantially all of NextWave Wireless LLC and its subsidiaries assets, taken as a whole, in a transaction or series of related transactions.

Voting Rights and Amendments	
<p>NextWave Wireless LLC’s limited liability company agreement provides that any action by its interest holders requires a vote or consent of at least a majority in interest of its interest holders. Consent of interest holders may be obtained at any meeting of interest holders as long as there is an affirmative vote of interest holders holding a majority of the number of votes which could be cast by all interest holders entitled to vote who are present in person or by proxy at a meeting of interest holders (i.e., majority of the quorum). Consent may also be obtained by a written consent of a majority of the interest holders provided that a copy of such consent is sent to all interest holders as soon as reasonably practicable thereafter.</p> <p>NextWave Wireless LLC’s limited liability company agreement may be amended by the written consent of the corporate governance committee of the Board of Managers and the consent of the holders of a majority of the interests. However, the corporate governance committee may amend NextWave Wireless LLC’s limited liability company agreement without the consent of the holders of a majority of the interests to cure any ambiguity or to correct any inconsistent or incomplete provisions.</p>	<p>Our certificate of incorporation and bylaws will provide that (i) our stockholders may act only at annual or special meetings of stockholders and not by written consent, (ii) we will hold an annual meeting each calendar year at which our stockholders will elect one class of directors and transact other business properly before them and (iii) special meetings of stockholders may be called only by the Chairperson of the Board, the President or a majority of the board of directors and shall be limited to the purpose or purposes for which the meeting was called, except as otherwise determined by the board of directors or the chairperson of the meeting. Generally, each common stockholder entitled to vote at a meeting of stockholders shall be entitled to one vote for each share of stock.</p> <p>Our by-laws may be amended or repealed, or new by-laws may be adopted, by the affirmative vote of the holders of two-thirds of the issued and outstanding shares of our stock entitled to vote or by the affirmative vote of a majority of the directors at a duly held meeting. When electing directors, each director shall be elected by a plurality of the votes cast. Our board will be divided into three classes, with directors in each class serving for three years and until their successors are duly qualified. Therefore, in general, the replacement of a majority of our board will take at least two years. Directors can be removed without cause by a vote of two thirds of the issued and outstanding of our stock entitled to vote.</p>
Tax Information	
<p>As a limited liability company without freely transferable units, NextWave Wireless LLC was not a taxable entity for federal income tax purposes. As a result, interest holders have been required to take into account, regardless of whether they received any cash distributions, their share of NextWave Wireless LLC’s income, gains, deductions, losses and credits. However, in computing such amounts, the income, gains, deductions, losses and credits of NextWave Broadband,</p>	<p>As a corporation, we will be taxable on our income, gains, deductions, losses and credits, although those will generally be computed on a consolidated basis with our domestic subsidiaries. Stockholders, in turn, will only recognize taxable income on amounts actually distributed to them by us. Distributions made by us out of current or accumulated earnings and profits will be taxed as dividend income (which currently is taxed at the preferential capital gain tax rates, provided certain holding</p>

<p>Inc. and its subsidiaries were not taken into account by interest holders.</p>	<p>period and other requirements are satisfied). Distributions in excess of current or accumulated earnings and profits will be treated as a non-taxable return of basis to the extent of stockholder's adjusted basis in his or her shares, with any excess taxed as capital gain.</p>
---	---

Dividend or Distribution Policy in Profits and Losses	
<p>Distributions to interest holders will be apportioned among them in proportion of their ownership of interests. Distributions may not be made selectively to one interest holder or to a group of interest holders. Payment of any future distributions on NextWave Wireless LLC's interests will depend upon its earnings and capital requirements and any other factors its Board of Managers considers appropriate.</p> <p>NextWave Wireless LLC's limited liability company agreement requires its Board of Managers to distribute quarterly an amount designed to assist its interest holders in satisfying their tax liability attributable to allocations of income, gain, loss, deduction and credit in any fiscal year for which such an allocation is required.</p>	<p>Shares of our common stock will constitute equity interests in us. Each stockholder will be entitled to his pro rata share of the dividends made with respect to our common stock. The dividends payable to the stockholders are not fixed in amount and are only paid if, as and when declared by our board of directors.</p>
Dissolution	
<p>Voluntary dissolution of NextWave Wireless LLC may be effected by either (i) the approval of a majority of its Board of Managers and (ii) the entry of a decree of judicial dissolution.</p>	<p>The General Corporation Law of the State of Delaware permits the voluntary dissolution of us by the affirmative vote of a majority of the outstanding stock entitled to vote on a resolution passed by a majority of the whole board at a meeting called for the purpose of deciding whether to dissolve us. Dissolution may also be authorized without action of the board of directors if all the stockholders entitled to vote shall consent in writing to the dissolution.</p>
Liquidation	
<p>After paying all liabilities due to its creditors and establishing reserves to provide for any contingent liabilities that may arise, a final allocation of all of NextWave Wireless LLC's remaining assets will be made to interest holders in accordance with their percentage ownership.</p>	<p>Holders of common stock are entitled to share ratably in any assets remaining after satisfaction of obligations to creditors and any liquidation preferences on any series of preferred stock that may then be outstanding.</p>

EXPERTS

Ernst & Young LLP, independent registered public accounting firm, has audited NextWave Wireless LLC's consolidated financial statements and schedule at December 31, 2005, and for the period from April 13, 2005 (inception) to December 31, 2005, as set forth in their report. We have included NextWave Wireless LLC's financial statements and schedule in the prospectus and elsewhere in the registration statement in reliance on Ernst & Young LLP's report, given on their authority as experts in accounting and auditing.

The consolidated balance sheets of PacketVideo Corporation as of December 31, 2004 and 2003 and the related statements of operations, changes in stockholders' equity, and cash flows for the years then ended., have been included herein and in the registration statement in reliance upon the report of Moss Adams LLP, independent registered public accounting firm, appearing elsewhere herein, and upon the authority of said firm as experts in accounting and auditing.

CHANGE IN INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Not applicable.

LEGAL MATTERS

The validity of the shares of NextWave Wireless Inc. common stock offered hereby and certain tax matters will be passed upon for NextWave Wireless Inc. by Weil, Gotshal & Manges LLP, New York, NY.

WHERE YOU CAN FIND MORE INFORMATION

NextWave Wireless LLC has filed reports and other information with the Securities and Exchange Commission. Copies of NextWave Wireless LLC's reports and other information may be inspected and copied at the public reference facilities maintained by the SEC at SEC Headquarters, Public Reference Section, 100 F Street, N.E., Washington D.C. 20549. The public may obtain information on the operation of the SEC's public reference facilities by calling the SEC at 1-800-SEC-0330.

Copies of these materials can also be obtained by mail at prescribed rates from the Public Reference Section of the SEC at SEC Headquarters or by calling the SEC at 1-800-SEC-0330. The SEC maintains a website that contains reports and other information regarding NextWave Wireless LLC. The address of the SEC website is <http://www.sec.gov>.

You should rely only on the information contained in this prospectus or on information to which NextWave has referred you. We have not authorized anyone else to provide you with any information.

NextWave has filed a registration statement under the Securities Act with the SEC with respect to NextWave common stock to be issued to NextWave Wireless LLC unitholders in the merger. This prospectus constitutes the prospectus of NextWave filed as part of the registration statement. This prospectus does not contain all of the information set forth in the registration statement because certain parts of the registration statement are omitted as provided by the rules and regulations of the SEC. You may inspect and copy the registration statement at any of the addresses listed above.

Glossary of Selected Wireless Terminology

802.11 - a.k.a. Wi-Fi

802.11, commonly called Wi-Fi, refers to a set of wireless local area network standards developed by working group 11 of the IEEE. 802.11 technologies use an over-the-air interface to connect a device (e.g., Wi-Fi enabled laptop) to a Wi-Fi access point.

Access Point

A network device, or communication hub, that connects wireless devices to a wired LAN.

ASIC

Application Specific Integrated Circuit. A chip that is custom designed for a specific application rather than a general-purpose chip such as a microprocessor.

Bandwidth

In wireless communications, the width or capacity of a communications channel. Analog bandwidth is measured in hertz (Hz). Digital bandwidth is the volume of data that a channel can carry and is measured in bits per second (bps).

Base Station - a.k.a. Base Transceiver Station (BTS)

Often called a cell tower or a cell site, a base station is a location that establishes and manages radio links between the wireless network and the wireless devices. The base station includes equipment needed to transmit and receive radio signals (transceiver), antennas, and the electronics required to communicate with other network elements

Beamforming

Beamforming is a signal processing technique that uses arrays of transmitters or receivers to control the directionality of, or sensitivity to, a radio signal in order to improve the performance of a communications channel.

Broadband

Generic term for a high-speed digital connection. DSL, cable modems, and WiMAX are examples of broadband technologies.

CDMA

Code Division Multiple Access. A digital wireless technology that works by converting analog information, such as speech, into digital information, which is then transmitted as a radio signal over a wireless network.

Channel Card

A channel card is the digital basis for a Mobile WiMAX base station (BTS), providing functionality in the air-interface baseband (MAC and PHY) as well as the network-layer protocols required for mobility, security, radio-resource management, quality of service and service-flow management.

Digital

A form of transmission that transforms analog signals, such as voice, into a series of electrical or optical pulses that represent the binary digits 0 and 1. This numerical data is then converted into various forms depending on the type of network, such as radio waves for wireless transmission, electronic pulses for a wired network or optical light waves for fiber optics.

FCC

Federal Communications Commission. The U.S. government agency responsible for regulation of the communications industry.

Frequency

The rate at which an electromagnetic waveform alternates. Usually measured in hertz (Hz), megahertz (MHz) or gigahertz (GHz).

GHz

Gigahertz. A measure of frequency equal to a billion hertz or a thousand megahertz (MHz). Gigahertz is often used to measure UHF (ultra-high frequency) or to express microprocessor clock speed in some computers.

Hot Spot

A location, such as a coffee shop, airport or bookstore, where an individual can establish a Wi-Fi connection. Hot spots offer limited coverage and generally require the individual to be within 100 yards in order to establish a connection. Hot spots may be provided by commercial Wi-Fi network operators or by local municipalities.

IEEE

Institute of Electrical and Electronics Engineers. A standards body responsible for developing computing and electronics standards. The IEEE developed the 802.11 standards for WLANs (wireless local area networks) that are widely followed today as well as the 802.16 (WiMAX) standards.

LAN

Local Area Network. A small communication network covering a limited area such as a portion of a building or a group of buildings.

MAC

Media Access Control Layer. Software that controls multiple access to shared radio spectrum and other resources. In WiMAX the design of the MAC was made to permit both high throughput as well as high quality of service simultaneous operation of multiple users. The MAC layer controls the scheduling of traffic, prioritization, bandwidth allocation, authentication, and security functions.

MHz

Megahertz. One million hertz or cycles per second. A measurement often used to describe the speed of digital and analog signals.

MIMO

Multiple-Input-Multiple-Output. MIMO refers to a communication technique that uses multiple-antenna systems to improve channel throughput.

102

OEM

Original Equipment Manufacturer. A company that manufactures a device (often a consumer electronics product) that is sold to another company, which in turn sells the device to the end consumer under its own name.

OFDM

Orthogonal Frequency Division Multiplexing. A wireless communications technology and modulation technique that divides available spectrum into multiple radio frequency (RF) channels. In OFDM, a single transmitter transmits on many different, independent frequencies, which typically results in a signal with high resistance to interference.

OSI

Open Systems Interconnection. A reference model established by the ISO to provide a network design framework that allows equipment from different vendors to be able to communicate.

Packet

A digital “package” of data that enables efficient use of radio spectrum and routing over a network, such as the Internet or wireless networks. Each packet is numbered separately and includes the Internet address of the destination.

PCS

Personal Communications Services. Refers to the 1900 MHz cellular frequency band. More commonly used as a marketing term to describe digital wireless services regardless of the particular frequency band being used.

PHY

Physical Layer. Transmits raw bits of data by establishing and terminating connections to a networked communications resource. Refers to network hardware, physical cabling or a wireless connection. Considered layer one of the seven-layer OSI (Open Systems Interconnection) model of data communications.

POP

Persons of Population. POPs refers to the total population that resides within the geographic boundaries of one or more spectrum licenses.

Protocol

Within the context of data communications, a specific set of rules related to data transmission between two devices. Protocols set standard procedures that enable different types of data devices to recognize and communicate with each other.

Quality of service

A measure of network transmission reliability and efficiency. Quality of service is commonly used by network operators to indicate a higher level of service guarantee to customers.

RFIC

Radio Frequency Integrated Circuits. Part of the front-end of the radio system that receives a digital radio signal, converts it in frequency and modifies it for further processing.

103

Service Provider

A “carrier” or “network operator” that provides mobile telecommunication services.

SDR

Software Defined Radio. A base station silicon product that performs the same functions as a mobile ASIC, but at the base station side of a wireless network. It functions as the heart of a base station system by granting access to hundreds of simultaneous users and managing their operation.

VoIP

Voice Over Internet Protocol. The routing of voice conversations, sent as digital packets of data, over the Internet or other IP network.

WAN

Wide Area Network. A geographically dispersed telecommunications network. A WAN may be privately owned or rented, but the term usually refers to a public network.

Wi-Fi

Short for “Wireless Fidelity” and another name for WLAN (wireless local area network). Normally associated with the IEEE 802.11 set of wireless local area network standards. Allows a mobile user to connect to a local area network (LAN) through a wireless connection. Wi-Fi has been deployed in airports, universities, bookstores, coffee shops, office campuses and private residences.

WiMAX

Wireless Interoperability for Microwave Access. The term WiMAX is used to indicate products based on the 802.16 set of standards adopted by the Institute of Electrical and Electronic Engineers (“IEEE”). .

Wireless Spectrum

A band of frequencies in which wireless signals travel carrying voice and data.

WLAN

Wireless Local Area Network. Allows a mobile user to connect to a local area network (LAN) through a wireless connection. The most popular WLAN technology is Wi-Fi which has been deployed in airports, universities, bookstores, coffee shops, office campuses and private residences.

NEXTWAVE WIRELESS LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. NextWave, Summary of Significant Accounting Policies and Significant Accounts

NextWave Wireless LLC (together with its subsidiaries, “NextWave”) is an early-stage wireless technology company engaged in the development of next-generation mobile broadband and wireless multimedia products, technologies and services. We are developing proprietary chipsets and related network and device products based on the IEEE 802.16e WiMAX standard that we believe will significantly improve the performance and economics of fixed and mobile wireless broadband networks. A key design objective of our products and technologies is to improve the ability of mobile WiMAX to cost effectively handle the large volume of network traffic that we believe Voice Over Internet Protocol (“VoIP”) telephony, high speed web-surfing and next-generation wireless multimedia applications such as high resolution mobile TV, high fidelity streaming audio and interactive real-time gaming will generate. We intend to market our 802.16e WiMAX compliant products and technologies to network infrastructure and device manufacturers and network operators worldwide. To stimulate demand for our products, we plan to partner with service providers to build and operate 802.16e WiMAX compliant networks that operate on our licensed spectrum and utilize network and device equipment which incorporate our products and technologies. In addition, through our PacketVideo subsidiary, we are a global provider of embedded multimedia software for mobile phones. We believe our enhanced network and subscriber solutions, combined with our wireless multimedia software products and our spectrum assets, will offer wireless service providers, cable operators, multimedia content distributors, applications service providers and Internet service providers a platform to provide advanced wireless broadband services to their customers. To facilitate the deployment of our network solutions, we have accumulated a spectrum footprint across the U.S. covering a population of approximately 206 million people, or POPs, that includes nine of the top ten and 15 of the top 20 markets in the U.S.

Inception of NextWave Wireless LLC

NextWave Wireless Inc. (“Old NextWave Wireless”) was formed in 1996 as a wholly-owned operating subsidiary of NextWave Telecom, Inc. (“NTI”), which sought to develop a nationwide CDMA-based personal communication services (“PCS”) network. In 1998, Old NextWave Wireless, together with NTI and its other subsidiaries (the “NextWave Telecom group”), filed for protection under Chapter 11 of the United States Bankruptcy Code. In December 2004, Old NextWave Wireless was converted from a corporation to a limited liability company. On March 1, 2005, the Bankruptcy Court confirmed the plan of reorganization of the NextWave Telecom group. The cornerstone of the plan was the sale of NTI and its subsidiaries, excluding Old NextWave Wireless, to Verizon Wireless for approximately \$3.0 billion. With the proceeds of the Verizon sale, as well as the proceeds of prior PCS spectrum license sales to Cingular Wireless, Verizon Wireless and MetroPCS, all creditors of the NextWave Telecom group were paid in full and the NTI equity holders received an aggregate cash distribution of approximately \$2.6 billion. In addition, the plan provided for the capitalization and distribution to the NTI equity holders of a new wireless technology company that would bear the NextWave name. Pursuant to the plan, on April 13, 2005, the NextWave Telecom group abandoned substantially all of its PCS assets other than the spectrum licenses and all remaining non-PCS assets and liabilities were contributed to Old NextWave Wireless. Immediately thereafter limited liability company interests (“LLC Interests”) in NextWave were distributed to the NTI equity holders and NextWave was capitalized with \$550.0 million in cash. Through this process, Old NextWave Wireless was reconstituted as a company with a new capitalization and a new wireless technology business plan. The significant underlying assets contributed to NextWave included NTI’s residual cash referred to above, the common stock of NextWave Broadband Inc., the convertible Series A Preferred Stock and notes receivable from CYGNUS Communications, Inc. (“CYGNUS”), and wireless spectrum licenses from the Federal Communications Commission (“FCC”) useful to NextWave or its new wireless technology business. Pursuant to the plan, the NTI shareholders received undivided interests in the underlying assets of NextWave as part

of their consideration for the redemption of their NTI shares, which was followed by the deemed contribution of these undivided interests to NextWave in return for unit membership interests in NextWave.

Financial Statement Preparation

The unaudited condensed consolidated financial statements have been prepared by NextWave according to the rules and regulations of the Securities and Exchange Commission (SEC), and therefore, certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted.

F-6

In the opinion of management, the accompanying unaudited condensed consolidated financial statements for the periods presented reflect all adjustments, which are normal and recurring, necessary to fairly state the financial position, results of operations and cash flows. These unaudited condensed consolidated financial statements should be read in conjunction with the audited financial statements for the period from inception (April 13, 2005) to December 31, 2005, included in NextWave's Amended Form 10 filed with the United States Securities and Exchange Commission on August 10, 2006.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Principles of Consolidation and Strategic Investments

NextWave's consolidated financial statements include the assets, liabilities and operating results of its wholly-owned and majority-owned subsidiaries as of July 1, 2006. NextWave's operating results through January 2006 also include those of a variable interest entity in which NextWave was the primary beneficiary until February 2006, when NextWave acquired all of the remaining ownership interests of the entity and it became a wholly-owned subsidiary. All significant intercompany accounts and transactions have been eliminated in consolidation.

Change in Fiscal Year End

NextWave's Board of Managers approved a change, effective January 1, 2006, in NextWave's fiscal year end and quarterly reporting periods from quarterly calendar periods ending on the Saturday nearest to December 31 of the current calendar year or the following calendar year. Normally, each fiscal year consists of 52 weeks, but every five or six years the fiscal year consists of 53 weeks. Fiscal year 2006 will be a 52-week year and the first 53-week year will occur in 2009. The three and six month periods ended July 1, 2006 include 13 and 26 weeks, respectively.

Accumulated Other Comprehensive Loss

Accumulated other comprehensive income includes unrealized gains and losses that are excluded from the consolidated statement of operations and are reported as a separate component in members' equity. These unrealized gains and losses represent those on marketable securities that are classified as available-for-sale, and totaled \$1.1 million and \$0.8 million in unrealized losses at July 1, 2006 and December 31, 2005, respectively.

Recent Accounting Pronouncements

NextWave adopted Statement of Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payment" ("SFAS 123R"), effective January 1, 2006. SFAS 123R requires companies to expense the estimated fair value of employee stock options and similar awards. NextWave has adopted the provisions of SFAS 123R using the prospective transition method, whereby it will continue to account for unvested equity awards to employees outstanding at December 31, 2005 using Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"), and apply SFAS 123R to all awards granted or modified after that date. In accordance with the transition rules of SFAS 123R, NextWave no longer provides the pro forma disclosures in reports issued for periods ending after December 31, 2005 as SFAS 123R precludes companies that use the minimum value method for pro forma disclosure from continuing to provide those pro forma disclosures for outstanding awards accounted for under the intrinsic value method of APB 25. Refer below to Employee Unit- and Share-Based Compensation for more discussion of the adoption of SFAS 123R.

In November 2005, the Financial Accounting Standards Board (“FASB”) issued staff position 115-1, “The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments” (“FSP 115-1”). FSP 115-1 address the determination as to when an investment is considered impaired, whether that impairment is other than temporary and the measurement of an impairment loss. FSP 115-1 also includes accounting considerations subsequent to the recognition of an other-than-temporary impairment and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments. The guidance in FSP 115-1 amends FASB Statements No. 115, Accounting for Certain Investments in Debt and Equity Securities, and APB Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock.

F-7

FSP 115-1 replaces the impairment evaluation guidance of Emerging Issues Task Force Issue No. 03-1, "The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments" ("EITF 03-1"), with references to existing other-than-temporary impairment guidance. EITF 03-1's disclosure requirements remain in effect, and are applicable for year-end reporting and for interim periods if there are significant changes from the previous year-end. FSP 115-1 also supersedes EITF Topic No. D-44, "Recognition of Other-Than-Temporary Impairment upon the Planned Sale of a Security Whose Cost Exceeds Fair Value," and clarifies that an investor should recognize an impairment loss no later than when the impairment is deemed other-than-temporary, even if a decision to sell an impaired security has not been made. FSP 115-1 applies to reporting periods beginning after December 15, 2005. FSP 115-1 did not have a material impact on NextWave's results of operations, or cash flows for the six months ended July 1, 2006.

In June 2006, the FASB Issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109" ("FIN 48"), effective for NextWave's fiscal year beginning December 31, 2006, with earlier application permitted. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in financial statements in accordance with FASB Statement No. 109, "Accounting for Income Taxes," and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. NextWave's management believes that adoption of this interpretation is not expected to have a material impact on its financial statements.

Employee Unit- and Share-Based Compensation

NextWave adopted SFAS 123R on January 1, 2006. SFAS 123R requires the recognition of the fair value of unit- and share-based compensation in net income. NextWave recognizes unit- and share-based compensation expense over the requisite service period of the individual grants, which generally equals the vesting period. Prior to January 1, 2006, NextWave accounted for employee equity awards using APB 25 and related interpretations in accounting for unit- and share-based compensation.

NextWave has adopted the provisions of FAS 123R using the prospective transition method, whereby it will continue to account for nonvested equity awards to employees outstanding at December 31, 2005 using APB 25, and apply FAS 123R to all awards granted or modified after that date. In accordance with the transition rules of SFAS 123R, NextWave no longer provides the pro forma disclosures in reports issued for periods ending after December 31, 2005 as FAS 123R precludes companies that used the minimum value method for pro forma disclosure from continuing to provide those pro forma disclosures for outstanding awards accounted for under the intrinsic value method of APB 25.

Under the provisions of SFAS 123R, NextWave recognized \$1.7 million of stock compensation expense for the three and six months ended July 1, 2006. NextWave utilized the Black-Scholes valuation model for estimating the fair value of stock awards issued during the six months ended July 1, 2006, to employees at the date of grant, with the following weighted-average assumptions for each of three separate option plans administered by NextWave and two of its subsidiaries for the six months ended July 1, 2006:

	NextWave Wireless LLC 2005 Units Plan	CYGNUS Communications, Inc. 2004 Stock Option Plan	PacketVideo Corporation 2005 Equity Incentive Plan
Weighted average risk-free interest rate	4.32%	4.37%	3.43%
Weighted average expected life (in years)	2.9	4.1	3.6
Expected stock price volatility	50%	50%	50%

Edgar Filing: NextWave Wireless Inc. - Form S-4

Expected dividend yield	0%	0%	0%
Annualized forfeiture rate	10%	10%	10%
Weighted average fair value of options granted	\$ 0.36	\$ 0.13	\$ 0.39

F-8

The risk-free interest rates are based on the implied yield available on U.S. Treasury constant maturities in effect at the time of the grant with remaining terms equivalent to the respective expected terms of the options. As none of the plans have sufficient history for estimating the term from grant date to full exercise of the option, NextWave has considered expected terms applied, in part by peer companies to determine the expected life of each grant. Expected volatility is based on an average of peer companies' expected volatilities due to lack of trading history of NextWave membership units or its subsidiaries' shares. The dividend yield of zero is based on the fact that NextWave has never paid cash dividends and has no present intention to pay cash dividends.

NextWave has assumed an annualized forfeiture rate of 10% for its options based on a combined review of industry and employee turnover data, as well as an analytical review performed of historical pre-vesting forfeitures occurring over the previous year. Under the true-up provisions of SFAS 123R, NextWave will record additional expense if the actual forfeiture rate is lower than estimated, and will record a recovery of prior expense if the actual forfeiture is higher than estimated.

The Black-Scholes option-pricing model was developed for use in estimating the fair value of traded options that have no restrictions and are fully transferable and negotiable in a free trading market. This model does not consider the employment, transfer or vesting restrictions that are inherent in NextWave's employee unit and stock options. Use of an option valuation model, as required by SFAS 123R, includes highly subjective assumptions based on long-term predictions and average life of each unit and stock option grant. Because NextWave's unit- and share-based payments have characteristics significantly different from those of freely traded options, and because changes in the subjective input assumptions can materially affect NextWave's estimate of the fair values, in NextWave's opinion, existing valuation models may not be reliable single measures of the fair values of NextWave's unit- and share-based payments.

Total compensation cost of options granted since January 1, 2006 but not yet vested, as of July 1, 2006, was \$4.8 million, which is expected to be recognized over a weighted average period of 3.7 years.

Share-based compensation expense of \$0.2 million was recognized during the three and six months ended July 1, 2006 for membership interests issued to employee shareholders of one of the CYGNUS subsidiaries, stemming from a prior acquisition, for the attainment of certain product development milestones. The share based payments were recognized as compensation expense in accordance with EITF 95-8, "Accounting for Contingent Consideration Paid to the Shareholders of an Acquired Enterprise in a Purchase Business Combination."

2. Composition of Certain Financial Statement Items

Marketable Securities

Available-for-sale marketable securities consist of the following:

<i>(in thousands)</i>	July 1, 2006	December 31, 2005
Municipal securities	\$ 229,376	\$ 280,734
U.S. Treasury and Agency obligations	54,635	54,666
Corporate notes	25,783	30,182
Total short-term investments	\$ 309,794	\$ 365,582

Property and Equipment

Property and equipment, net, consist of the following:

Estimated Useful life (in years)	July 1, 2006	December 31, 2005

			17,833		11,789
Less accumulated depreciation			(3,201)		(697)
Total property and equipment, net		\$	14,632	\$	11,092

F-9

Wireless Licenses, Goodwill and Other Intangible Assets

Intangible assets consist of the following:

<i>(dollars in thousands)</i>	Weighted Average Life	July 1, 2006		Weighted Average Life	December 31, 2005	
		Gross Carrying Amount	Accumulated Amortization		Gross Carrying Amount	Accumulated Amortization
Amortized intangible assets:						
Leased wireless spectrum licenses	14 years	\$ 35,137	\$ 2,676	15 years	\$ 31,347	\$ 1,510
Purchased technology	7 years	8,600	1,169	7 years	8,600	555
Purchased customer base	8 years	5,700	678	8 years	5,700	321
Non-compete agreements	4 years	2,800	865	4 years	2,800	537
Other	3 years	63	5	3 years	16	3
		\$ 52,300	\$ 5,393		\$ 48,463	\$ 2,926
Intangible assets not subject to amortization:						
Wireless spectrum licenses		\$ 97,913			\$ 15,630	
Goodwill		32,936			24,782	
Purchased tradenames and trademarks		2,400			2,400	
		\$ 133,249			\$ 42,812	

The \$8.2 million increase in goodwill in the consolidated balance sheets from December 31, 2005 to July 1, 2006, resulted from current year acquisitions.

Estimated aggregate amortization expense is expected to be \$2.6 million for the remainder of 2006, and \$5.1 million, \$5.1 million, \$4.8 million, \$4.5 million and \$24.8 million for the years ending December 31, 2007, 2008, 2009, 2010 and thereafter, respectively.

3.**Business Combinations****Investment in Inquam Broadband Holding, Inc.**

On January 6, 2006, NextWave acquired 51% of the equity securities of newly formed Inquam Broadband Holding, Ltd. ("INQUAM") for 1.3 million Euros, or \$1.6 million. NextWave also has the right to designate three of the five members of the board of directors. The primary reason for the investment is to provide NextWave with an entry into the wireless broadband telecommunications market in Germany. Under the subscription and shareholder agreement, NextWave has agreed to provide additional funding up to 1.4 million Euros, or approximately \$1.6 million. NextWave also has the option to acquire a 51% interest in a subsidiary of Inquam BMR GP, the holder of the remaining 49% interest in INQUAM, for 9.7 million Euros, or approximately \$11.7 million, subject to adjustment for changes in liabilities or subsequent funding provided to the subsidiary by INQUAM. The option expires six months after the date of a final court decision as to the validity of a spectrum award made to such subsidiary by the German regulatory authority.

INQUAM and its wholly-owned subsidiary are included in NextWave's consolidated financial statements from the date of the acquisition.

Acquisition of CYGNUS

On February 2, 2006, NextWave acquired all of the outstanding shares of common stock of CYGNUS and the minority interests of one of its subsidiaries, which are already included in the consolidated financial statements as NextWave is deemed to be the primary beneficiary in accordance with FIN 46(R). The total cost of the acquisition was determined as follows:

F-10

(in thousands)

Advances to CYGNUS, including interest	\$	18,145
Accumulated CYGNUS losses while consolidated in accordance with FIN 46R		(8,550)
Conversion of convertible preferred stock into common stock		1,884
Membership interests issued		1,558
Cash paid		53
Less cash acquired		(4,190)
Total acquisition cost	\$	8,900

Under the purchase method of accounting, the purchase price was preliminarily allocated to the assets acquired and liabilities assumed based upon their estimated fair values at the date of acquisition as follows:

(in thousands)

Accounts receivable	\$	196
Prepaid expenses and other current assets		511
Property and equipment		704
Goodwill		8,223
Deposits and other noncurrent assets		658
Accounts payable, accrued expenses and other current liabilities		(613)
Unfavorable lease liability		(692)
Long-term obligations		(87)
Total acquisition cost	\$	8,900

The excess of the purchase price over the acquired net tangible assets of \$8.2 million has been preliminarily allocated to goodwill in the consolidated balance sheet and will be allocated between goodwill and identifiable intangible assets once NextWave has completed a purchased intangible asset valuation. The related impact from value assigned to in-process research and development costs or to amortization expense, if any, will be adjusted on a prospective basis.

In connection with the acquisition of the minority interests of one of CYGNUS' subsidiaries, NextWave agreed to issue \$0.4 million and \$0.5 million in cash, and 0.2 million and 0.2 million in membership interests to certain employee shareholders in December 2006 and December 2007, respectively, or earlier if certain product development milestones are attained. These payments are amortized as compensation expense over the period earned in accordance with EITF 95-8, "Accounting for Contingent Consideration Paid to the Shareholders of an Acquired Enterprise in a Purchase Business Combination." Compensation expense totaled \$0.2 million and \$0.4 million during the three and six months ended July 1, 2006, respectively. The remaining cash portion of \$0.6 million is recorded as deferred compensation and is included in prepaid and other current assets and other noncurrent assets in the consolidated balance sheet at July 1, 2006. The fair value of the membership interests will be remeasured at the end of each reporting period until issued, when the final fair value is determined. Unamortized estimated stock-based compensation totaled \$0.3 million at July 1, 2006, and will be charged to the results of operations with an offsetting increase to membership interests in the consolidated balance sheet over the remaining service periods.

Acquisitions

During the three months ended July 1, 2006, NextWave completed two acquisitions. The results of operations have been included in the accompanying condensed consolidated financial statements from the respective dates of the acquisitions.

The aggregate purchase price of these acquisitions was \$6.2 million, consisting of \$4.8 million in cash, including acquisition costs of \$0.1 million, future earnout and holdback payments totaling \$1.0 million and the assumption of debt totaling \$0.3 million. The excess of purchase price over the acquired net tangible assets was \$6.2 million at July 1, 2006, of which \$4.6 million and \$1.6 million has been preliminarily allocated to goodwill and expensed as in-process research and development costs, respectively, during the three and six months ended July 1, 2006. The excess of the purchase price over the acquired net tangible assets will be allocated between goodwill and identifiable intangible assets once NextWave has completed its purchased intangible asset valuations. The related impact from the final value assigned to in-process research and development costs or to amortization expense, if any, will be adjusted on a prospective basis.

F-11

4. Long-Term Obligations

Long-term obligations consist of the following at July 1, 2006 and December 31, 2005:

<i>(in thousands)</i>	July 1, 2006	December 31, 2005
Wireless spectrum lease, imputed interest at 8%, due 2019, net of unamortized discounts of \$8,580 and \$9,353, respectively, with three renewal options for 15 years each	\$ 15,620	\$ 17,047
Wireless spectrum lease, imputed interest at 8%, due 2015, net of an unamortized discount of \$990, with five renewal options for 10 years each	2,402	—
Research and development funding due to Tekes, the National Technology Agency of Finland, interest at European Central Bank refinancing rate (2.75% at July 1, 2006) plus 3%, due annually in December through 2008	320	—
Industrial research assistance contribution from the Canadian government, due 2010	141	87
	18,483	17,134
Less current portion	(2,822)	(2,200)
	\$ 15,661	\$ 14,934

Future payments due on these obligations at July 1, 2006, are as follows:

<i>(in thousands)</i>	
Fiscal Years Ending,	
2006 (remaining six months)	\$ 402
2007	2,680
2008	2,685
2009	2,175
2010	2,175
Thereafter	17,936
	28,053
Less unamortized discount	(9,570)
Less current portion	(2,822)
Total long-term obligations	\$ 15,661

In addition to the lease obligations, beginning in 2009, the first lease agreement in the table above provides for the payment of royalties based on .25% of NextWave's gross revenues, subject to an annual cap of \$1.8 million. The second lease agreement in the table above, beginning in 2007 and extending through any renewal periods, provides for the payment of royalties based on 0.25% of gross revenues, subject to a cap of 100% of the annual rent for years 2006-2020, a cap of 150% of the annual rent for years 2021-2035 and no cap during any remaining lease years.

5. Commitments and Contingencies

Acquisitions of Wireless Spectrum

On May 9, 2006, NextWave entered into a binding acquisition agreement to purchase all of the outstanding shares of common stock of WCS Wireless, Inc. (WCS). The total cost of the WCS acquisition is expected to be approximately \$160.5 million in cash. The assets of WCS are comprised almost entirely of wireless spectrum. NextWave obtained FCC approval of the license transfer application and expects to consummate this transaction in the third quarter of

2006.

F-12

In the second quarter of 2006, NextWave entered into a lease agreement for wireless spectrum, with an initial period of ten years, with two ten-year extension options, for a total initial period lease payment of \$16.0 million, payable in advance. NextWave has paid \$1.5 million into an escrow account and will pay the balance of \$14.5 million upon finality of the license transfer application by the FCC, which is anticipated in September 2006.

Services and Other Agreements

NextWave enters into non-cancelable software license agreements and agreements for the purchase of software development and engineering services to facilitate and expedite the development of software modules and applications required in its WiMAX development activities. The services agreements contain provisions for minimum commitments based on the number of team members and their respective billing rates. Amounts paid under these contracts, which expire on various dates through 2008, totaled \$0.8 million and \$1.4 million during the three and six months ended July 1, 2006, respectively. Estimated future minimum payments due under the terms of these agreements at July 1, 2006, are as follows:

(in thousands)

Fiscal Years		
Ending,		
2006		
(remaining six		
months)	\$	4,130
2007		4,972
2008		7,121
Total	\$	16,223

Capital Expenditures

In July 2005, NextWave entered into a purchase agreement for an office building in Henderson, Nevada for \$8.2 million, plus related interior construction costs of approximately \$2.5 million. The interior construction costs are payable in the third quarter of 2006. Construction is estimated to be completed during the fourth quarter of 2006, at which time NextWave expects to occupy the facility and the total purchase price will be due and payable.

Operating Leases

NextWave leases its office and research facilities, cell sites and certain office equipment under noncancelable operating leases expiring on various dates through 2011. NextWave recognizes rent expense on a straight-line basis over the respective lease terms. As a result, any differences between recognized rent expense and required upfront rental payments upon execution that reduce future rental payments is recorded as unapplied prepaid rent and any difference between rent expense and rent payments that are reduced by cash or rent abatements is recognized as deferred rent. At July 1, 2006, unapplied prepaid rent totaled \$0.4 million and is included in prepaid expenses and other current assets in the consolidated balance sheet and deferred rent totaled \$0.6 million, of which \$0.1 million is included in other current liabilities and \$0.5 million is included in long-term deferred credits and reserves in the consolidated balance sheet.

Certain commitments have renewal options extending through the year 2013. Rent expense under these operating leases was \$1.9 million and \$3.2 million for the three and six months ended July 1, 2006. Sublease income totaled \$0.4 million and \$0.8 million for the three and six months ended July 1, 2006.

Edgar Filing: NextWave Wireless Inc. - Form S-4

Future minimum lease payments under noncancellable operating leases, net of sublease rentals at July 1, 2006, are as follows:

<i>(in thousands)</i>	Lease		
Fiscal Years Ending,	Commitments	Sublease Rentals	Net
2006 (remaining six months)	\$ 2,598	\$ (761)	\$ 1,837
2007	5,947	(893)	5,054
2008	5,566	-	5,566
2009	4,697	-	4,697
2010	2,961	-	2,961
Thereafter	49	-	49
	\$ 21,818	\$ (1,654)	\$ 20,164

F-13

Indemnification of NextWave Telecom Inc. and Verizon Wireless Corp.

In connection with the sale of NTI and its subsidiaries to Verizon Wireless Inc. (“Verizon”), NextWave agreed to indemnify NTI and its subsidiaries against all pre-closing liabilities of NTI and its subsidiaries and against any violation of the Bankruptcy Court injunction against persons having claims against NTI and its subsidiaries, with no limit on the amount of such indemnity. NextWave is not currently aware of any such liabilities that remain following the plan of reorganization and Verizon has not made any indemnity claims.

A total of \$165.0 million is currently held in escrow (the “Escrow Amount”) in order to satisfy any amounts due to Verizon in the event that the consolidated net loss of the NextWave Telecom group for the taxable year commencing on January 1, 2005, and ending on April 13, 2005 is, subject to certain adjustments, less than \$1.362 billion, to cover any tax deficiencies for the pre-closing tax period, and to cover other indemnifiable losses relating to NTI and its subsidiaries, as described above. The Escrow Amount will be released in accordance with the escrow agreement upon the expiration of the applicable statute of limitations (including extensions thereof) relating to the tax matters addressed above. In addition, if at any time the Escrow Amount exceeds the amount, in the reasonable judgment of Verizon of the potential remaining indemnifiable losses described above, or if former equity holders of NTI have a final resolution with the IRS with respect to certain tax matters, such excess will be released. Verizon has a first-priority perfected security interest in the Escrow Amount.

To the extent that former equity holders of NTI are ultimately entitled to receive \$80.8 million of the Escrow Amount, the FCC will, in accordance with the terms of the global settlement agreement entered into in connection with the plan of reorganization, be entitled to a sharing payment equal to 20% of any additional amounts to be released thereafter, up to a total potential sharing payment of \$16.8 million. The first \$0.8 million of the sharing payment will be paid to the FCC from a separate sharing payment escrow previously established for the benefit of the FCC. Any Escrow Amount that former equity holders of NTI are entitled to receive in excess of amounts payable to the FCC must be applied to redeem, pro rata, the \$149.0 million of Non-Recourse Secured Notes issued as part of the plan of reorganization and described below. Accordingly, NextWave is merely a conduit to distribute amounts, if any, to the former equity holders of NTI and the FCC and will not receive any of the Escrow Amount.

As part of the plan of reorganization, NextWave issued \$149.0 million of Non-Recourse Secured Notes to the former equity holders of NTI. The notes bear no interest and mature on April 13, 2055. Any claims under the notes will only be satisfied by any released Escrow Amount, net of payments due to the FCC. In the event the escrow is terminated before the maturity date and all released amounts have been paid to the note holders, any notes then outstanding will be null, void and of no effect. No holder of any notes will have any recourse against NextWave or its assets or its affiliates, except to the extent that NextWave receives any portion of the released Escrow Amount or otherwise does not comply with the indenture governing the notes or the related agreements.

NextWave has not included in the accompanying financial statements any amounts related to the Notes and the Escrow Amount due to their contingent nature and the inability to estimate the amount, if any, that will be released from escrow or paid to redeem the Notes.

Legal Proceedings

Finney v. NextWave

United States ex rel. Finney v. NextWave Telecom Inc. is a qui tam action filed in federal court in the Southern District of New York, with a corresponding administrative claim in bankruptcy court. Finney (the relator) alleges principally that NTI and other defendants, including NextWave Wireless, failed to disclose the existence of a federal statute - the Federal Credit Reform Act - to various agencies of the federal government and to the federal courts. She asserts that decisions issued by the bankruptcy court, the U.S. Court of Appeals for the D.C. Circuit, and the Supreme

Court of the United States in connection with the NextWave Telecom group's reorganization efforts were all flawed because they overlooked the relevance of that statute. She alleges that NTI and the other defendants should be held liable because it failed to bring the statute to the attention of these government agencies and courts and seeks damages of more than \$9 billion.

F-14

The defendants filed a motion to dismiss on numerous grounds, including that the government was well aware of the existence of the Act, that it is not a false claim to fail to inform the government of the existence of a federal statute, that Finney's claim was effectively a collateral challenge to the decisions of the bankruptcy court and the Supreme Court, and that the action is barred by virtue of the Global Settlement with the FCC and the consummation of the Verizon acquisition and the bankruptcy reorganization.

On February 24, 2006, the district court issued an order adopting the defendants' principal arguments and proposing to dismiss the complaint in its entirety. Prior to dismissing, the district court asked the United States for its consent, and, on March 2, 2006, the United States consented to dismissal. On April 21, 2006, the District Court ruled that defendants were entitled to an award of legal fees. The court has referred the matter to a Magistrate to fix the amount of the fee award.

Finney has now filed a notice of appeal to the United States Court of Appeals for the Second Circuit. NextWave expects to join with the other defendants to promptly file a motion to have the appeal dismissed or the decision below affirmed. NextWave believes that the claims made by Finney are meritless and in fact frivolous and expects that it will prevail on appeal.

Other Disputes

NextWave currently is a party to various other legal proceedings that arise in the ordinary course of NextWave's business. While management presently believes that the ultimate outcome of these proceedings, individually and in the aggregate, will not have a material adverse effect on NextWave's financial position, cash flows or overall trends in results of operations, litigation is subject to inherent uncertainties, and unfavorable rulings could occur. For example, NextWave is currently engaged in two separate disputes relating to leases of EBS spectrum covering approximately 1 million POPs in the Tom's River, New Jersey geographic area. In each case, the lessor has claimed that NextWave is in breach of the terms of the lease and, in one case, has claimed that the lease has been terminated. While NextWave believes these claims are without merit, any adverse resolution would not have a material adverse effect on NextWave's business, results of operations or financial condition.

6. Equity Compensation Plans

NextWave Wireless LLC 2005 Units Plan

NextWave's 2005 Units Plan provides for the issuance of nonqualified unit options, or restricted, performance-based, bonus, phantom or other unit-based awards to board managers, employees and consultants to NextWave. Each common unit represents one membership interest in NextWave. The prices, terms and conditions of the options and awards are established by the compensation committee of the board of managers at the time of each grant. Outstanding options generally vest over four years and have a maximum term of 10 years. In June 2006, the NextWave board of managers and members holding a majority of NextWave's membership interests approved an amendment to the plan to provide an additional 20 million interests for awards under the plan. At July 1, 2006, NextWave may issue up to 74,688,000 membership units under this plan, of which 56,176,000 are granted and outstanding options and 18,512,000 are available for future grants.

The following table summarizes the status of the NextWave plan at July 1, 2006 and activity during the six months ended July 1, 2006:

	Options (in thousands)	Weighted Average Exercise Price per Unit	Weighted Average Remaining Contractual Term (in Years)	Aggregate Intrinsic Value (in thousands)
Outstanding at December 31, 2005	37,383	\$ 1.00		
Granted	20,964	\$ 1.00		
Exercised	(312)	\$ 1.00		
Forfeited	(1,859)	\$ 1.00		
Outstanding at July 1, 2006	56,176	\$ 1.00	9.1	\$ —
Exercisable at July 1, 2006	56,176	\$ 1.00	9.1	\$ —

The following table summarizes the status of NextWave's unvested options as of July 1, 2006 and changes during the six months ended July 1, 2006:

	Options (in thousands)	Weighted Average Grant Date Fair Value per Unit ⁽¹⁾
Unvested at December 31, 2005	31,310	\$ —
Granted	20,964	\$ 0.37
Vested	(10,190)	\$ 0.15
Forfeited	(1,839)	\$ 0.06
Early exercise of unvested options	(39)	\$ —
Unvested at July 1, 2006	40,206	\$ 0.15

(1) The weighted average grant date fair value per unit includes options granted prior to January 1, 2006 which have no grant date fair value assigned as NextWave has adopted the provisions of FAS 123R using the prospective transition method, whereby it continues to account for unvested equity awards to employees outstanding at December 31, 2005 using APB 25, and apply FAS 123R to all awards granted or modified after that date.

NextWave received cash from the exercise of stock options under this plan of \$0.3 million, with no related tax benefits, during the six months ended July 1, 2006. Upon option exercises under this plan, NextWave issues new NextWave Wireless LLC membership units.

CYGNUS Communications, Inc. 2004 Stock Option Plan

The CYGNUS 2004 stock option plan provides for the granting of stock options to eligible employees, directors and consultants of CYGNUS. The prices, terms and conditions of the options are determined by the board of directors of CYGNUS at the time of each grant. Outstanding options generally vest over four years and have a maximum term of 10 years. At July 1, 2006, CYGNUS may issue up to 8,594,000 shares of common stock of CYGNUS under this plan, of which 6,708,000 are granted and outstanding options and 1,886,000 are available for future grants.

The following table summarizes the status of the CYGNUS plan at July 1, 2006 and activity during the six months ended July 1, 2006:

Weighted

	Options (in thousands)	Weighted Average Exercise Price per Share	Average Remaining Contractual Term (in Years)	Aggregate Intrinsic Value (in thousands)
Outstanding at December 31, 2005	7,465	\$ 0.11		
Granted	30	\$ 0.31		
Exercised	(186)	\$ 0.10		
Forfeited	(601)	\$ 0.11		
Outstanding at July 1, 2006	6,708	\$ 0.11	6.6	\$ 759
Exercisable at July 1, 2006	4,691	\$ 0.11	7.3	\$ 538

The following table summarizes the status of CYGNUS' unvested options as of July 1, 2006 and changes during the six months ended July 1, 2006:

	Options (in thousands)	Weighted Average Grant Date Fair Value per Share ⁽¹⁾
Unvested at December 31, 2005	5,963	\$ —
Granted	30	\$ 0.13
Vested	(1,036)	\$ —
Forfeited	(601)	\$ —
Unvested at July 1, 2006	4,356	\$ —

(1)The weighted average grant date fair value per share includes options granted prior to January 1, 2006 which have no grant date fair value assigned as NextWave has adopted the provisions of FAS 123R using the prospective transition method, whereby it continues to account for unvested equity awards to employees outstanding at December 31, 2005 using APB 25, and apply FAS 123R to all awards granted or modified after that date.

NextWave received cash from the exercise of stock options under this plan of \$19,000, with no related tax benefits during the six months ended July 1, 2006. Upon option exercises under this plan, NextWave issues new shares of CYGNUS stock. The CYGNUS 2004 Stock Option Plan was amended in February 2006 to provide for the conversion of each CYGNUS option into .30584 shares of NextWave upon the occurrence of a conversion event which includes the U.S. Securities and Exchange Commission's declaration of a Form 10 effective in conjunction with an effective listing on a public securities exchange, or the sale, public offering or liquidation of NextWave ownership interests. At the time of conversion, the exchange will be accounted for as a modification under SFAS 123R and could result in additional compensation expense.

PacketVideo 2005 Equity Incentive Plan

The PacketVideo 2005 Equity Incentive Plan provides for the issuance of stock options, stock bonuses or restricted stock to employees, directors and consultants of PacketVideo or its affiliates. Outstanding options generally vest over four years, and have a maximum term of 10 years. At July 1, 2006, PacketVideo may issue up to 9,250,000 shares of common stock of PacketVideo under this plan, of which 8,879,000 are granted and outstanding options and 371,000 are available for future grants.

The following table summarizes the status of the PacketVideo plan at July 1, 2006 and activity during the six months ended July 1, 2006:

	Options (in thousands)	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term (in Years)	Aggregate Intrinsic Value (in thousands)
Outstanding at December 31, 2005	8,225	\$ 1.00
