UNIVEST CORPORATION OF PENNSYLVANIA AND SUBSIDIARIES**Notes to the Unaudited Condensed Consolidated Financial Statements****Note 1. Financial Information**

The accompanying unaudited condensed consolidated financial statements include the accounts of Univest Corporation of Pennsylvania (the "Corporation") and its wholly owned subsidiaries; the Corporation's primary subsidiary is Univest National Bank and Trust Co. (the "Bank"). The unaudited condensed consolidated financial statements included herein have been prepared without audit pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States have been condensed or omitted pursuant to such rules and regulations. The accompanying unaudited condensed consolidated financial statements reflect all adjustments which are of a normal recurring nature and are, in the opinion of management, necessary to present a fair statement of the results and condition for the interim periods presented. Operating results for the six-month period ended June 30, 2007 are not necessarily indicative of the results that may be expected for the year ending December 31, 2007. It is suggested that these unaudited condensed consolidated financial statements be read in conjunction with the financial statements and the notes thereto included in the registrant's Annual Report on Form 10-K for the year ended December 31, 2006, which has been filed with the SEC on March 8, 2007.

The Corporation previously disclosed in its financial statements for the year ended December 31, 2006, that it expected to make payments of \$1.7 million for its qualified and non-qualified retirement plans and \$92 thousand for its other postretirement benefit plans in 2007. As of June 30, 2007, \$895 thousand and \$49 thousand have been paid from its retirement plans and other postretirement plans, respectively. During the six months ended June 30, 2007, the Corporation contributed \$250 thousand and \$49 thousand to its non-qualified retirement plans and other postretirement plans, respectively. The Corporation presently anticipates making essentially equal payments for the remaining quarters in 2007 to fund the non-qualified retirement plan and other postretirement plans.

Note 7. SFAS No. 133, “Accounting for Derivative Instruments and Hedging Activities.”

At June 30, 2006, the total notional amount of the “Pay Floating, Receive Fixed” swap outstanding was \$20.0 million. The net payable or receivable from the interest-rate swap agreement was accrued as an adjustment to interest income. The \$20.0 million notional amount of interest-rate swap outstanding expired on November 2, 2006. There were no swaps outstanding at June 30, 2007 or December 31, 2006.

Note 8. Income Taxes

Effective January 1, 2007 the Corporation adopted Financial Interpretation No. 48, “Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109” (“FIN 48”). FIN 48 provides guidance on financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. According to FIN 48, a tax position is recognized if it is more-likely-than-not that the tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. If the tax position meets the more-likely-than-not recognition threshold, the position is measured to determine the amount of benefit to recognize and should be measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. FIN 48 also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

As of January 1, 2007 the Corporation had no material unrecognized tax benefits, accrued interest or penalties. Penalties are recorded in non-interest expense in the year they are assessed and are treated as a non-deductible expense for tax purposes. Interest is recorded in non-interest expense in the year it is assessed and is treated as a deductible expense for tax purposes. As of January 1, 2007, Tax Years 2003 through 2006 remain subject to Federal examination as well as examination by state taxing jurisdictions.

Note 9. Recent Accounting Pronouncements

In September 2006, the Emerging Issues Task Force (“EITF”) reach a conclusion on EITF No. 06-4, “Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements,” (“EITF 06-4.”) EITF 06-4 is effective for fiscal years beginning after December 15, 2007. Under EITF 06-4, if an agreement is to provide the employee with a death benefit in a postretirement/termination period, the

employer should recognize a liability for the future death benefit in accordance with either Statement of Financial Accounting Standard (“SFAS”) No. 106 or Accounting Principles Board Opinion No. 12. EITF 06-4 requires that recognition of the effects of adoption should be either by (a) a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption or (b) a change in accounting principle through retrospective application to all prior periods. The potential impact to Univest will be negative cumulative-effect adjustment to retained earnings of approximately \$1.6 million and would not be tax affected.

- 7 -

In September 2006, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 157, “Fair Value Measurements” (“SFAS 157”). SFAS 157 establishes a framework for measuring fair value in GAAP, and enhances disclosures about fair value measurements. SFAS 157 applies when other accounting pronouncement require fair value measurements; it does not require new fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and for interim periods within those years. The Corporation does not anticipate the adoption of SFAS 157 to have a material impact on its financial statements.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities (Including an amendment of FASB Statement No. 115)” (“SFAS 159.”) SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective of SFAS 159 is to improve financial reporting by allowing entities to minimize volatility in reported earnings caused by related assets and liabilities being measured differently. Most of the provisions of SFAS 159 apply only to entities that elect the fair value option. However, SFAS 159 includes an amendment to SFAS 115 which applies to all entities with available-for-sale and trading securities. Entities electing the fair value option will report unrealized gains and losses in earnings and recognize upfront costs and fees related to those items in earnings as they are incurred, not deferred. The following items are eligible for the fair value measurement option established by SFAS 159: 1) Recognized financial assets and financial liabilities, except (a) an investment in a subsidiary that is required to be consolidated, (b) an interest in a variable interest entity that is required to be consolidated, (c) obligations (or assets representing net over funded positions) for pension plans, other postretirement benefits, post employment benefits, employee stock option and stock purchase plans, and other forms of deferred compensation arrangements, (d) financial assets and liabilities recognized under leases, (e) demand deposit liabilities of financial institutions, and (f) financial instruments classified by the issuer as a component of shareholder’s equity; 2) firm commitments that would otherwise not be recognized at inception and that involve only financial instruments; 3) nonfinancial insurance contracts and warranties that the insurer can settle by paying a third party to provide those goods or services; and, 4) host financial instruments resulting from separation of an embedded nonfinancial derivative instrument from a nonfinancial hybrid instrument. The fair value option may be applied on an instrument-by-instrument basis, with a few exceptions, such as investments otherwise accounted for by the equity method or multiple advanced made to one borrower under a single contract. The fair value option is irrevocable unless a new election date occurs and applies only to entire instruments and not to portions of instruments. Entities are permitted to elect fair value option for any eligible item within the scope of SFAS 159 at the date they initially adopt the SFAS 159. The adjustment to reflect the difference between the fair value and the current carrying amount of the assets and liabilities for which an entity elects fair value option is reported as a cumulative-effect adjustment to the opening balance of retained earnings upon adoption. SFAS 159 is effective as of the beginning of an entity’s second fiscal year that begins after November 15, 2007. Early adoption is permitted as of the beginning of a fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of SFAS 157. The Corporation chose not to adopt SFAS 159 early. The Corporation does not anticipate the adoption of SFAS 159 to have a material impact on its financial statements.

General

Univest Corporation of Pennsylvania, (the "Corporation"), is a Financial Holding Company. It owns all of the capital stock of Univest National Bank and Trust Co. (the "Bank"), Univest Realty Corporation, Univest Delaware, Inc., and Univest Reinsurance Corporation.

The Bank is engaged in the general commercial banking business and provides a full range of banking services and trust services to its customers. Vanguard Leasing, Inc., a wholly owned subsidiary of the Bank, provides lease financing. Delview, Inc., a wholly owned subsidiary of the Bank, provides various financial services including financial planning, investment management, insurance products and brokerage services to individuals and businesses through its subsidiaries Univest Investments, Inc. and Univest Insurance, Inc.

Executive Overview

The Corporation recorded net income for the six months ended June 30, 2007 of \$12.3 million, a 0.8% increase over the June 30, 2006 period.

Average earning assets increased \$122.7 million and average interest-bearing liabilities increased \$116.5 million when comparing the six-month periods ended June 30, 2007 and 2006. Increased volume of commercial loans and lease financings and increased rates on commercial business loans and (commercial construction real estate loans), partially offset by increased rates and volume of money market savings and increased rates on certificates of deposits, contributed to a \$536 thousand increase in net interest income. The tax-equivalent net interest margin declined slightly to 3.74% for the six-month period ended June 30, 2007 compared to 3.98% for the same period in 2006.

Non-interest income grew 11.22%, when comparing the six-month periods ended June 30, 2007 to 2006, primarily due to increases in insurance commissions and fee income, investment advisory commissions and fee income, and other service fee income. Non-interest expense grew 5.99% primarily due to an increase in salary and employee

benefit expense slightly offset by a decrease in marketing and advertng expenses.

- 9 -

The Corporation earns its revenues primarily from the margins and fees it generates from the loan and lease and depository services it provides as well as from trust, insurance and investment commissions and fees. The Corporation seeks to achieve adequate and reliable earnings by growing its business while maintaining adequate levels of capital and liquidity and limiting its exposure to credit and interest rate risk to Board approved levels. As interest rates increase, fixed-rate assets that banks hold will tend to decrease in value while the margin impact will vary from bank to bank based upon the structure of its balance sheet. The Corporation maintains a relatively low interest rate risk profile and does not anticipate that an increase in interest rates would be adverse to its net interest margin.

The Corporation seeks to establish itself as the financial provider of choice in the markets it serves. It plans to achieve this goal by offering a broad range of high quality financial products and services and by increasing market awareness of its brand and the benefits that can be derived from its products. The Corporation operates in an attractive market for financial services but also is in intense competition with domestic and international banking organizations and other insurance and investment providers for the financial services business. The Corporation has taken initiatives to achieve its business objectives by acquiring banks and other financial service providers in strategic markets, through marketing, public relations and advertising, by establishing standards of service excellence for its customers, and by using technology to ensure that the needs of its customers are understood and satisfied.

Results of Operations – Three Months Ended June 30, 2007 Versus 2006

The Corporation's consolidated net income and earnings per share for the three months ended June 30, 2007 and 2006 were as follows:

(\$ in thousands, except per share data)	For the Three Months Ended		Change	
	June 30, 2007	2006	Amount	Percent
Net income	\$ 6,075	\$ 6,015	\$ 60	1.0%
Net income per share:				
Basic	\$ 0.47	\$ 0.47	—	—
Diluted	0.47	0.46	\$ 0.01	2.2%

Return on average shareholders' equity was 12.83% and return on average assets was 1.26% for the three months ended June 30, 2007 compared to 13.53% and 1.32%, respectively, for the same period in 2006.

Net Interest Income

Net interest income is the difference between interest earned on loans and leases, investments and other interest-earning assets and interest paid on deposits and other interest-bearing liabilities. Net interest income is the principal source of the Corporation's revenue. The following table presents a summary of the Corporation's average balances; the tax-equivalent yields earned on average assets, and the cost of average liabilities for the three months ended June 30, 2007 and 2006. Sensitivities associated with the mix of assets and liabilities are numerous and complex. The Asset/Liability Management and Investment committees work to maintain an adequate and reliable net interest margin for the Corporation.

Net interest income increased \$83 thousand for the three months ended June 30, 2007 compared to 2006 primarily due to increased volume on lease financings and increased volume and rates on commercial loans and commercial real estate and construction loans, partially offset by increased volume and rates on money market savings deposits and increased rates on certificates of deposit. The tax-equivalent net interest margin, which is tax-equivalent net interest income as a percentage of average interest-earning assets, was 3.71% and 3.95% for the three month period ended June 30, 2007 and 2006, respectively. The tax-equivalent net interest spread, which represents the difference between the weighted average tax-equivalent yield on interest-earning assets and the weighted average cost of interest-bearing

liabilities, was 3.13% for the three months ended June 30, 2007 compared to 3.47% for the same period in 2006. The effect of net interest free funding sources increased to 0.58% for the three month period ended June 30, 2007 compared to 0.48% for the same period in 2006; this represents the effect on the net interest margin of net funding provided by noninterest-earning assets, noninterest-bearing liabilities and shareholders' equity.

Certain amounts have been reclassified to conform to the current-year presentation.

Analysis of Changes in Net Interest Income

The rate-volume variance analysis set forth in the table below compares changes in tax-equivalent net interest for the periods indicated by their rate and volume components. The change in interest income/expense due to both volume and rate has been allocated to change in volume.

Notes: Tax-equivalent amounts have been calculated using the Corporation's federal applicable rate of 35 percent. Nonaccrual loan and lease unearned discounts have been included in the average loan and lease balances.

Interest Income

The growth in interest and fees on loans is due primarily to increased volume and rates on commercial business loans and commercial and construction real estate loans and increased volume of lease financings. The average interest yield on the commercial loan portfolio increased 51 basis points, primarily due to 36 basis point increase in the average prime rate, for the three months ended June 30, 2007 compared to the same period in 2006; which, along with average volume increases of \$35.0 million, contributed to a \$1.2 million increase in interest income. The average yield on commercial and construction real estate loans increased by 36 basis points; this along with average volume increases of \$13.9 million contributed to a \$643 thousand increase in interest income. Lease financing's growth in volume of \$43.0 million contributed to the \$956 thousand increase in interest income.

Interest on investments, interest-bearing deposits and federal funds sold increased primarily due to rate increases on U.S. Government agency obligations and average volume and rate increases in other securities.

Interest Expense

The Corporation's average rate on deposits increased 74 basis points for the three months ended June 30, 2007 compared to the same period in 2006. The average rate paid on money market savings increased 59 basis points due to new products and promotions offered to grow deposits in the Bank's competitive marketplace. Interest expense on certificates of deposit increased \$1.1 million, due to an 86 basis-point increase in average rate. Average rate increases along with the average volume growth of \$71.3 million, contributed to a \$2.9 million increase in interest expense on deposits.

- 12 -

Interest expense on short-term borrowings includes interest paid on federal funds purchased and short-term FHLB borrowings. In addition, the Bank offers an automated cash management checking account that sweeps funds daily into a repurchase agreement account (“sweep accounts”). Interest expense on federal funds purchased increased \$112 thousand due to average volume increase of \$8.2 million and a 18 basis point increase in the average rate paid.

Interest expense on long-term debt increased \$374 thousand due to an average volume increase of \$27.2 million and a 39 basis-point increase in the rate.

Provision For Loan and Lease Losses

The reserve for loan and lease losses is determined through a periodic evaluation that takes into consideration the growth of the loan and lease portfolio, the status of past-due loans, current economic conditions, various types of lending activities, policies, real estate and other loan commitments, and significant changes in charge-off activity. Loans are also reviewed for impairment based on discounted cash flows using the loans' initial effective interest rate or the fair value of the collateral for certain collateral dependent loans as provided for under SFAS No. 114. Any of the above criteria may cause the provision to fluctuate. The bank's primary regulators, as an integral part of their examination process, may require adjustments to the allowance. Continued growth in loan and lease volumes and current economic conditions indicated the need for an increase to the reserve in 2007. The provision for loan and lease losses for the three months ended June 30, 2007 and 2006 was \$653 thousand and \$515 thousand, respectively.
