The accompanying notes are an integral part of these condensed consolidated financial statements.

ALTIGEN COMMUNICATIONS, INC. AND SUBSIDIARY  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

AltiGen Communications, Inc. (“AltiGen,” “we” or the “Company”) is a leading provider of 100% Microsoft-based Voice over Internet Protocol (VoIP) business phone systems and Unified Communications solutions. We design, deliver and support VoIP phone systems and call center solutions that combine high reliability with integrated IP communications applications. As one of the first companies to offer VoIP solutions, AltiGen has been deploying systems since 1996. We have more than 10,000 customers worldwide with over 15,000 systems in use. Our telephony solutions are primarily used by small- to medium-sized businesses, companies with multiple locations, corporate branch offices, and call centers.

AltiGen’s systems are designed with an open architecture, built on industry standard Intel™ based servers, SIP™ compliant phones, and Microsoft Windows™ based IP applications. This adherence to widely used standards allows our solutions to both integrate with and leverage a company’s existing technology investment. AltiGen’s award winning, integrated IP applications suite provides customers with a complete business communications solution. Voicemail, Unified Messaging, Automatic Call Distribution, Call Recording, Call Activity Reporting, and Mobility solutions take advantage of the convergence of voice and data communications to achieve superior business results.

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with generally accepted accounting principles for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed, or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). These unaudited condensed consolidated financial statements reflect the operations of the Company and its wholly-owned subsidiary located in Shanghai, China. All significant intercompany transactions and balances have been eliminated. In our opinion, these unaudited condensed consolidated financial statements include all adjustments necessary (which are of a normal and recurring nature) for a fair presentation of the Company’s financial position, results of operations and cash flows for the periods presented. Certain immaterial amounts in prior periods have been reclassified to conform to current period presentation.

These financial statements should be read in conjunction with our audited consolidated financial statements for the fiscal year ended September 30, 2009, included in the Company’s 2009 Annual Report on Form 10-K filed with the SEC on December 28, 2009, as amended. The Company’s results of operations for any interim period are not necessarily indicative of the results of operations for any other interim period or for a full fiscal year.

CASH AND CASH EQUIVALENTS AND SHORT-TERM INVESTMENTS

The Company’s policy is to invest in highly-rated securities with strong liquidity and requires investments to be rated single-A or better. Our investment portfolio consists entirely of investment grade institutional money market funds and bank term deposits. We consider all highly liquid investments purchased with an initial maturity of three months or less to be cash equivalents. Short-term investments are highly liquid financial instruments with original maturities greater than three months but less than one year and are classified as “available-for-sale” investments. We classify our available-for-sale securities as current assets and report them at their fair value. Further, we recognize unrealized gains and losses related to these securities as an increase or reduction to shareholders’ equity as a component of other comprehensive income (loss). We evaluate our available-for-sale securities for impairment quarterly. The Company did not hold any short-term investments at September 30, 2009 and March 31, 2010.

## INVENTORIES

Inventories (which include costs associated with components assembled by third-party assembly manufacturers, as well as internal labor and allocable overhead) are stated at the lower of standard cost (which approximates actual cost on a first-in, first-out basis) or market value. Provisions, when required, are made to reduce excess and obsolete inventories to their estimated net realizable values. We regularly monitor inventory quantities on hand and record a provision for excess and obsolete inventories based primarily on our estimated forecast of product demand and production requirements for the next six months. We record a write-down for product and component inventories that have become obsolete or are in excess of anticipated demand or net realizable value. Raw materials inventory is considered obsolete and is fully reserved if it has not been used in 365 days. The components of inventories include (in thousands):

|                  | March 31,<br>2010 | September 30,<br>2009 |
|------------------|-------------------|-----------------------|
| Raw materials    | \$ 385            | \$ 450                |
| Work-in-progress | 63                | 29                    |
| Finished goods   | 591               | 787                   |
| Total            | \$ 1,039          | \$ 1,266              |

## REVENUE RECOGNITION

Revenue consists of direct sales to end-users, resellers and distributors. Revenue from sales to end-users and resellers is recognized upon shipment, when risk of loss has passed to the customer, collection of the receivable is reasonably assured, persuasive evidence of an arrangement exists, and the sales price is fixed and determinable. Net revenue consists of hardware and software revenue reduced by estimated sales returns and allowances. Sales to distributors are made under terms allowing certain rights of return and protection against subsequent price declines on the Company's products held by its distributors. Upon termination of such distribution agreements, any unsold products may be returned by the distributor for a full refund. These agreements may be canceled by either party without cause for convenience following a specified notice period. As a result of these provisions, the Company defers recognition of distributor revenue until such distributors resell our products to their customers. The amounts deferred as a result of this policy are reflected as "deferred revenue" in the accompanying consolidated balance sheets. The related cost of revenue is also deferred and reported in the consolidated balance sheets as inventory. We do not recognize revenue derived from sales to customers in Asia until both of the following elements are satisfied: customer has taken ownership upon shipment and AltiGen has received payment for the purchase.

## SERVICE SUPPORT PROGRAMS

Our Software Assurance Program provides our customers with the latest updates, new releases, and technical support for the applications they are licensed to use. Our Premier Service Plan includes software assurance and extended hardware warranty. These programs have an annual subscription and can range from one to three years. Sales from our service support programs are recorded as deferred revenue and recognized as service support revenue over the terms of their subscriptions.

Software components are generally not sold separately from our hardware components. Software revenue consists of license revenue that is recognized upon delivery of the application products or features. We provide software assurance consisting primarily of the latest software updates, patches, new releases and technical support. Revenue earned on software arrangements involving multiple elements is allocated to each element based upon the relative fair value of the elements. The revenue allocated to software support programs is recognized with the initial licensing fee on delivery of the software. This software assurance revenue is in addition to the initial license fee and is recognized

over a period of one to three years. The estimated cost of providing software assurance during the arrangement is insignificant and the upgrades and enhancements offered at no cost during software assurance arrangements have historically been, and are expected to continue to be, minimal and infrequent. All estimated costs of providing the services, including upgrades and enhancements, are spread over the life of the software assurance contract term.

#### STOCK-BASED COMPENSATION

The Company accounts for stock-based compensation, including grants of stock options, as an operating expense in the income statement at fair value. The Company has estimated the fair value of stock-based compensation for stock options at the date of the grant using the Black-Scholes option-pricing model. The Black-Scholes option-pricing model incorporates various assumptions including expected volatility, expected life and interest rate. The Company uses historical data to estimate option forfeitures. Expected volatility is based on historical volatility and the risk-free interest rate is based on U.S. Treasury yield in effect at the time of the grant for the expected life of the options. The Company does not anticipate paying any dividends in the foreseeable future and therefore used an expected dividend yield of zero in the option valuation model.

The underlying weighted-average assumptions used in the Black-Scholes model and the resulting estimates of fair value per share were as follows for options granted during the six months ended March 31, 2010 and 2009:

|                          | Employee Stock Option Plans<br>Six Months Ended March 31, |      | Employee Stock Purchase Plan<br>Six Months Ended March 31, |      |
|--------------------------|---|------|--|------|
|                          | 2010  | 2009 | 2010   | 2009 |
| Expected life (in years) | 6   | 6    | 0.5  | 0.5  |
| Risk-free interest rate  | 2.4%  | 1.6% | 0.2%   | 0.4% |
| Volatility               | 90%   | 141% | 90%  | 139% |
| Expected dividend        | 0.0%  | 0.0% | 0.0%   | 0.0% |

The following table summarizes stock-based compensation expense related to employee and director stock options, employee stock purchases and stock awards for the three and six months ended March 31, 2010 and 2009:

|                            | Three Months Ended<br>March 31, |        | Six Months Ended<br>March 31, |        |
|----------------------------|---------------------------------|--------|-------------------------------|--------|
|                            | 2010                            | 2009   | 2010                          | 2009   |
| Cost of goods sold         | \$ 2                            | \$ 2   | \$ 10                         | \$ 7   |
| Research and development   | 20                              | 27     | 148                           | 92     |
| Sales and marketing        | 14                              | 36     | 123                           | 121    |
| General and administrative | 16                              | 59     | 89                            | 190    |
| Total                      | \$ 52                           | \$ 124 | \$ 370                        | \$ 410 |

The following table summarizes the Company's stock option plan as of October 1, 2009 and changes during the six months ended March 31, 2010:

|   | Number of<br>Shares | Weighted-<br>Average<br>Exercise Price | Weighted<br>Average<br>Remaining<br>Contractual Life<br>(in years) |
|---|---------------------|--|--|
| Outstanding at October 1, 2009                | 4,362,891           | \$ 0.91                                |  |
| Granted                                       | 44,000              | 0.90                                   |  |
| Exercised                                     | (5,156)             | 0.68                                   |  |
| Forfeitures and cancellations                 | (120,416)           | 0.95                                   |  |
| Outstanding at March 31, 2010                 | 4,281,319           | \$ 0.91                                | 7.65   |
| Vested and expected to vest at March 31, 2010 | 3,388,855           | \$ 0.92                                | 7.21   |
| Exercisable at March 31, 2010                 | 1,981,932           | \$ 0.95                                | 5.71   |

On March 31, 2010, the aggregate intrinsic value of stock options outstanding was \$33,000. Total stock options vested and expected to vest at March 31, 2010 were 3.4 million shares with a weighted average exercise price of \$0.92, aggregate intrinsic value of \$32,000, and a weighted average remaining contractual term of 7.2 years. The total exercisable stock options as of March 31, 2010 were 1.9 million shares with an aggregate intrinsic value of \$32,000, weighted average exercise price of \$0.95, and a weighted average remaining contractual term of 5.7 years.

The Company has unamortized stock-based compensation expense relating to options outstanding of \$789,000, which will be amortized to expense over a weighted average period of 4 years.

On March 10, 2009, our 1999 Stock Plan and our 1999 Employee Stock Purchase Plan (the “1999 Purchase Plan”) expired. These plans will, however, continue to govern the securities previously granted under them. On April 21, 2009, our Board of Directors approved a 2009 Equity Incentive Plan and a 2009 Employee Stock Purchase Plan (the “2009 Purchase Plan”), which were both approved by our stockholders on June 18, 2009. The 2009 Purchase Plan allows eligible employees to purchase shares of Company stock at a discount through payroll deductions. The 2009 Purchase Plan consists of six-month offering periods commencing on June 1st and December 1st, each year. Employees purchase shares in the purchase period at 85% of the market value of the Company’s common stock at either the beginning of the offering period or the end of the offering period, whichever price is lower.

Participants under the 2009 Purchase Plan generally may not purchase shares on any exercise date to the extent that, immediately after the grant, the participant would own stock totaling 5% or more of the total combined voting power of all stock of the Company, or greater than \$25,000 worth of stock in any calendar year. The maximum number of shares of common stock that any employee may purchase under the 2009 Purchase Plan during any offering period is 10,000 shares.

The Company reserved 1.5 million shares of the Company's common stock for future issuance under the 2009 Purchase Plan. To date, 74,735 shares have been purchased by and distributed to employees under the 2009 Purchase Plan at a price of \$0.62 per share, and during the six months ended March 31, 2010, 74,735 shares were purchased by and distributed to employees under the 2009 Purchase Plan at a price of \$0.62 per share.

#### Issuance of Common Stock as Bonuses

In July 2009, our Board of Directors approved the issuance of our common stock to employees as bonuses. The stock bonuses would be granted in four quarterly installments based on the evaluation of the Company's overall financial performance for each respective quarter. The stock awards are immediately vested on the date of grant. We recorded stock-based compensation expense for these stock award bonuses based on the closing fair market value of the Company's common stock on the date of grant. During the six months ended March 31, 2010, we issued 162,274 shares of our common stock to employees and recorded total expense of \$146,046 for bonus awards earned in the fourth quarter of fiscal year 2009. During the first quarter of fiscal year 2010, our Board of Directors suspended further issuance of common stock as bonus under this program.

#### COMPUTATION OF BASIC AND DILUTED NET LOSS PER SHARE

The Company bases its basic net loss per share upon the weighted average number of common stock outstanding during the period. Basic net loss per common stock is computed by dividing the net loss by the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock.

The following table sets forth the computation of basic and diluted net loss per share (in thousands, except net loss per share amounts):

|  | Three Months Ended<br>March 31, |            | Six Months Ended<br>March 31, |            |
|--|---------------------------------|------------|-------------------------------|------------|
|  | 2010                            | 2009       | 2010                          | 2009       |
| Net loss   | \$ (340)                        | \$ (1,767) | \$ (810)                      | \$ (3,036) |
| Divided by: weighted average shares<br>outstanding—basic and diluted | 16,430                          | 15,862     | 16,361                        | 15,842     |
| Basic and diluted net loss per share                                 | \$ (0.02)                       | \$ (0.11)  | \$ (0.05)                     | \$ (0.19)  |

Options to purchase 4.3 million and 4.5 million shares of common stock were outstanding as of March 31, 2010 and 2009, respectively, and were excluded from the computation of diluted net earnings per share for these periods because their effect would have been antidilutive.

#### COMPREHENSIVE INCOME (LOSS)

Comprehensive income (loss) consists of two components—net income (loss) and other comprehensive income (loss). Other comprehensive income (loss) refers to revenue, expenses, gains, and losses that under U.S. generally accepted accounting principles are recorded as an element of stockholders' equity but are excluded from net income. The Company's other comprehensive income (loss) consists of unrealized gains and losses on marketable securities categorized as available-for-sale and foreign exchange gains and losses.

As of March 31, 2010, accumulated other comprehensive income consists of \$118,000 of accumulated foreign currency translation gains. The amounts comprising unrealized gains and losses on marketable securities and the related changes as of March 31, 2010 and 2009 were immaterial.

## FAIR VALUE MEASUREMENTS

In October 2008, the Company adopted FASB ASC 820-10, Fair Value Measurements and Disclosures – Overall (“ASC 820-10”) with respect to its financial assets and liabilities. In February 2008, the FASB issued updated guidance related to fair value measurements, which is included in the Codification in ASC 820-10-55, Fair Value Measurements and Disclosures – Overall – Implementation Guidance and Illustrations. The updated guidance provided a one year deferral of the effective date of ASC 820-10 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. The adoption did not have a material impact on the Company’s Condensed Consolidated Financial Statements as it relates only to disclosures.

In October 2009, the Company adopted the fair value disclosure provision that requires the reporting of interim disclosures about the fair value of financial instruments previously only disclosed on an annual basis. The adoption did not have any impact on the Company’s Condensed Consolidated Financial Statements as it relates only to disclosures.

The Company did not record an adjustment to retained earnings as a result of the adoption of this accounting standard, and the adoption did not have a material effect on the Company’s results of operations. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value under this standard must maximize the use of observable inputs and minimize the use of unobservable inputs. The standard describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

Level 1 – Financial instruments for which quoted market prices for identical instruments are available in active markets.

Level 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The adoption of this standard with respect to our financial assets and liabilities did not impact our consolidated results of operations and financial condition, but requires additional disclosure for assets and liabilities measured at fair value. The Company’s cash equivalents were held in money market funds (deemed to be Level 1) in the amount of \$4.6 million, both as of March 31, 2010 and September 30, 2009.

## SEGMENT REPORTING

The Company manages its business primarily on a geographic basis. Accordingly, the Company determined its operating segments, which are generally based on the nature and location of its customers, to be the Americas and International. The Company's two geographical segments sell the same products to the same types of customers. The Company's reportable operating segments are comprised of the Americas and International operations. The Americas segment includes the United States, Canada, Mexico, Central America and the Caribbean. The International segment is comprised of Asia, United Kingdom, Italy and Holland.

The following table shows our sales by geographic region as percentage of total sales for the periods indicated:

|               | Three Months Ended |      | Six Months Ended |      |
|---------------|--------------------|------|------------------|------|
|               | March 31,          |      | March 31,        |      |
|               | 2010               | 2009 | 2010             | 2009 |
| Americas      | 87%                | 86%  | 85%              | 86%  |
| International | 13%                | 14%  | 15%              | 14%  |
| Total         | 100%               | 100% | 100%             | 100% |

The following table sets forth a measure of profit (loss) for each operating segment for the periods indicated (in thousands):

|               | Three Months Ended |            | Six Months Ended |            |
|---------------|--------------------|------------|------------------|------------|
|               | March 31,          |            | March 31,        |            |
|               | 2010               | 2009       | 2010             | 2009       |
| Americas      | \$ (182)           | \$ (1,652) | \$ (546)         | \$ (2,891) |
| International | \$ (158)           | \$ (115)   | \$ (264)         | \$ (145)   |
| Total         | \$ (340)           | \$ (1,767) | \$ (810)         | \$ (3,036) |

The following table sets forth the total assets for each operating segment as of the periods indicated (in thousands):

|               | March 31, | September 30, |
|---------------|-----------|---------------|
|               | 2010      | 2009          |
| Americas      | \$ 7,850  | \$ 8,060      |
| International | \$ 3,161  | \$ 3,271      |
| Total         | \$ 11,011 | \$ 11,331     |

## CUSTOMERS

Our customers are primarily end-users, resellers and distributors. We have distribution agreements with Altisys Communications, Inc., and Synnex Corporation in the Americas. Our agreements with Altisys and Synnex have initial terms of one year. Each of these agreements are renewed automatically for additional one year terms, provided that each party has the right to terminate the agreement for convenience upon ninety (90) days' written notice prior to the end of the initial term or any subsequent term of the agreement. In addition, our agreements with Altisys and Synnex also provide for termination, with or without cause and without penalty, by either party upon thirty (30) days' written notice to the other party or upon insolvency or bankruptcy. For a period of sixty (60) days following termination of the agreement, Altisys and Synnex may distribute any products in their possession at the time of termination or, at their option, return any products to us that are in their inventories. Upon termination of the distribution agreement, all outstanding invoices for the products will become due and payable within thirty (30) days of the termination.

In the Americas, we have a reseller agreement with Fiserv Solutions, Inc. Our agreement with Fiserv has an initial term of ten years ending on August 28, 2019, and shall be renewed automatically for additional five year terms unless either party provides the other party with ninety (90) days' written notice of termination prior to the end of the initial term or any subsequent term of the agreement. The agreement can also be terminated for, among other things, material breach or insolvency of either party. Upon termination, AltiGen would continue to have support obligations for products that Fiserv distributed subject to Fiserv's obligation to remain current on maintenance fees.

The following table sets forth our net revenue by customers that individually accounted for more than 10% of our revenue in any period indicated:

|              | Three Months Ended<br>March 31, |            | Six Months Ended<br>March 31, |            |
|--------------|---------------------------------|------------|-------------------------------|------------|
|              | 2010                            | 2009       | 2010                          | 2009       |
| Synnex       | 37%                             | 28%        | 36%                           | 30%        |
| Altisys (1)  | —                               | —          | 10%                           | —          |
| Fiserv (2)   | 13%                             | 10%        | 11%                           | —          |
| Jenne (3)    | —                               | 14%        | —                             | 18%        |
| <b>Total</b> | <b>50%</b>                      | <b>52%</b> | <b>57%</b>                    | <b>48%</b> |

(1) For the three months ended March 31, 2010 and 2009, revenue generated from Altisys was less than 10% of our total revenue. For the six months ended March 31, 2009, revenue generated from Altisys was less than 10% of our total revenue.

(2) For the six months ended March 31, 2009, revenue generated from Fiserv was less than 10% of our total revenue.

(3) In September 2009, we terminated our distribution agreement with Jenne. The termination of our relationship with Jenne did not have a material impact on our business.

## 2. WARRANTY

The Company provides a warranty for hardware products for a period of one year following shipment to end users. We have historically experienced minimal warranty costs. Factors that affect our reserves for warranty liability include the number of installed units, historical experience and management's judgment regarding anticipated rates of warranty claims and cost per claim. We assess the adequacy of our reserves for warranty liability every quarter and make adjustments to those reserves if necessary.

Changes in the reserves for our warranty liability for the three and six months ended March 31, 2010 and 2009, respectively, are as follows (in thousands):

|   | Three Months Ended<br>March 31, |        | Six Months Ended<br>March 31, |        |
|---|---------------------------------|--------|-------------------------------|--------|
|   | 2010                            | 2009   | 2010                          | 2009   |
| Beginning balance                                   | \$ 111                          | \$ 128 | \$ 122                        | \$ 137 |
| Provision for warranty liability                    | 59                              | 25     | 102                           | 58     |
| Warranty cost including labor, components and scrap | (45)                            | (44)   | (99)                          | (86)   |
| Ending balance                                      | \$ 125                          | \$ 109 | \$ 125                        | \$ 109 |

## 3. COMMITMENTS AND CONTINGENCIES

### Commitments

We lease our facilities under various operating lease agreements expiring on various dates through December 2014. Generally, these leases have multiple options to extend for a period of years upon termination of the original lease term. We believe that our facilities are adequate for our present needs in all material respects.

In April 2009, the Company entered into a lease for a new corporate headquarters for a period of five years with an option to extend for an additional five years. This facility is leased through June 2014 and serves as our headquarters for corporate administration, research and development, manufacturing, and sales and marketing facility in San Jose, California. The terms of the lease include rent escalations and a tenant allowance for certain leasehold improvements. Under the terms of the lease agreement, total rent payment is approximately \$1.4 million for a period of five years commencing on June 12, 2009. Additionally, under the terms of the lease agreement, the Company received up to \$100,000 cash incentive as moving allowance. As of March 31, 2010, the Company recorded \$100,000 of this allowance as part of deferred rent liability to be amortized over the term of the lease. The Company reserved \$200,000 as collateral for an irrevocable and negotiable standby letter of credit (the "Letter of Credit") as security for the facility lease. The \$200,000 is restricted by the bank and recorded as part of the long-term deposit in our consolidated balance sheet as of March 31, 2010. Under the terms of the agreement, the Letter of Credit will expire in July 2014. We believe that the new facility will be suitable, adequate and sufficient to meet the needs of the Company through July 2014.

Rent expense for all operating leases totaled approximately \$190,000 and \$379,000 for the three and six months ended March 31, 2010, respectively, as compared to \$185,000 and \$360,000 for the three and six months ended March 31, 2009, respectively. We also lease certain equipment under capital lease arrangements, which are reflected as property and equipment in our balance sheets as of March 31, 2010 and September 30, 2009. The minimum future lease payments under all non-cancellable capital and operating leases as of March 31, 2010 are shown in the following table (in thousands):

|  | Capital<br>Leases | Operating<br>Leases |
|--|-------------------|---------------------|
| Fiscal Years Ending September 30,      |                   |                     |
| 2010                                   | \$ 11             | \$ 301              |
| 2011                                   | —                 | 302                 |
| 2012                                   | —                 | 302                 |
| 2013                                   | —                 | 318                 |
| 2014                                   | —                 | 248                 |
| Total contractual lease obligation     | \$ 11             | \$ 1,471            |
| Amount representing interest           | \$ —              |                     |
| Present value of minimum lease payment | \$ 11             |                     |

## Contingencies

From time to time, we may become party to litigation in the normal course of our business. Litigation in general and intellectual property and securities litigation in particular, can be expensive and disruptive to normal business operations. Moreover, the results of complex litigation are difficult to predict.

The Company has also agreed to indemnify its directors and executive officers for costs associated with any fees, expenses, judgments, fines and settlement amounts incurred by them in any action or proceeding to which any of them is, or is threatened to be, made a party by reason of his or her service as a director or officer, arising out of his or her services as the Company's director or officer. Historically, the Company has not been required to make payments under these obligations and the Company has recorded no liabilities for these obligations in its condensed consolidated balance sheets.

The Company typically warrants its hardware products for a period of one year following shipment to end users in a manner consistent with general industry standards that are reasonably applicable under normal use and circumstances. Historically, the Company has experienced minimal warranty costs. In addition, the Company provides distributors protection from subsequent price reductions.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING INFORMATION

This Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the accompanying condensed consolidated financial statements and related notes included elsewhere in this report. In addition to historical information, this Quarterly Report on Form 10-Q includes "forward-looking statements" within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. All statements other than statements of historical fact are "forward-looking statements" for purposes of these provisions, including any statements regarding: projections of revenues, future research and development expenses, future selling, general and administrative expenses, other expenses, gross profit, gross margin, or other financial items; the plans and objectives of management for future operations; our exposure to interest rate risk; future economic conditions or performance; and plans to focus on cost control; In some cases, forward-looking statements can be identified by the use of terminology such as "may," "will," "expects," "plans," "anticipates," "estimates," "potential," or "continue," or the negative thereof or other comparable terminology. Although we believe that the expectations reflected in the forward-looking statements contained herein are reasonable, there can be no assurance that such expectations or any of the forward-looking statements will prove to be correct, and actual results could differ materially from those projected or assumed in the forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to risks and uncertainties, including but not limited to the factors set forth below and elsewhere in this report. All forward-looking statements and reasons why results may differ included in this Quarterly Report are made as of the date hereof, and we assume no obligation to update any such forward-looking statement or reason why actual results may differ.

These statements are based on current expectations and assumptions regarding future events and business performance and involve known and unknown risks, uncertainties and other factors that may cause industry trends or our actual results, level of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these statements. These factors include, and you should also carefully review the cautionary statements contained in our Annual Report on Form 10-K for the year ended September 30, 2009, as amended, including those set forth in Item 1A "Risk Factors" of that report as well as in Item 1A "Risk Factors" of this report.

OVERVIEW

AltiGen Communications, Inc. ("AltiGen," "we" or the "Company") is a leading provider of 100% Microsoft-based Voice over Internet Protocol (VoIP) business phone systems and Unified Communications solutions. We design, deliver and support VoIP phone systems and call center solutions that combine high reliability with integrated IP communications applications. As one of the first companies to offer VoIP solutions, AltiGen has been deploying systems since 1996. We have more than 10,000 customers worldwide with over 15,000 systems in use. Our telephony solutions are primarily used by medium and enterprise sized businesses, companies with multiple locations, corporate branch offices, and call centers.

AltiGen's systems are designed with an open architecture, built on industry standard Intel™ based servers, SIP™ compliant phones, and Microsoft Windows™ based IP applications. This adherence to widely used standards allows our solutions to both integrate with and leverage a company's existing technology investment. AltiGen's award winning, integrated IP applications suite provides customers with a complete business communications solution. Voicemail, Unified Messaging, Automatic Call Distribution, Call Recording, Call Activity Reporting, and Mobility solutions take advantage of the convergence of voice and data communications to achieve superior business results. We believe this enables our customers to implement communication systems solutions that have an increased return on investment versus past technology investments.

We generated net revenue of \$4.4 million and \$8.6 million for the three and six months ended March 31, 2010, respectively, compared to net revenue of \$3.6 million and \$8.4 million for the three and six months ended March 31, 2009, respectively. As of March 31, 2010, we had an accumulated deficit of \$61.6 million. Net cash provided by operating activities was \$85,000 for the six months ended March 31, 2010, as compared to net cash used by operating activities of \$1.3 million for the six months ended March 31, 2009.

We derive our revenue from sales of our VoIP communications systems and call center solutions. Product revenue is comprised of direct sales to end-users and resellers and sales to distributors. Revenue from product sales to end users and resellers are recognized upon shipment. We defer recognition of revenue for sales to distributors until they resell our products to their customers. Upon shipment, we also provide a reserve for the estimated cost that may be incurred for product warranty. Under our distribution contracts, a distributor has the right, in certain circumstances, to return products it determines are overstocked, so long as it provides an offsetting purchase order for products in an amount equal to or greater than the dollar value of the returned products. In addition, we provide distributors protection from subsequent price reductions.

Our cost of revenue consists of component and material costs, direct labor costs, provisions for excess and obsolete inventory, warranty costs and overhead related to the manufacturing of our products. Several factors that have affected and will continue to affect our revenue growth are the state of the economy, the market acceptance of our products, our ability to add new resellers and our ability to design, develop, and release new products. We engage third-party assemblers, which in fiscal year 2009 and the six month period ended March 31, 2010 were All Quality Services in Fremont, California and ISIS Surface Mounting, Inc. in San Jose, California to insert the hardware components into the printed circuit board. We purchase fully-assembled chassis from Advantech Corporation, Internet protocol phones from BCM Communications, Inc., single board computers for our MAX product from AAEON Electronics, Inc. and raw material components from Avnet Electronics. We selected our manufacturing partners with the goals of ensuring a reliable supply of high-quality finished products and lowering per unit product costs as a result of manufacturing economies of scale. We cannot assure you that we will maintain the volumes required to realize these economies of scale or when or if such cost reductions will occur. The failure to obtain such cost reductions could materially adversely affect our gross margins and operating results.

We continue to focus on developing enhancements to our current products to provide greater functionality and increased capabilities, based on our market research, customer feedback and our competitors' product offerings, as well as creating new product offerings to both enhance our position in our target customer and geographical market segments and enter new customer and geographical market segments. Additionally, we intend to continue selling our products to small- to medium-sized businesses, enterprise businesses, multisite businesses, corporate and branch offices and call centers. Also, we plan to continue to recruit additional resellers and distributors to focus on selling phone systems to our target customers. We believe that the adoption rate for our telecommunications solution is much greater and faster with small- to medium-sized businesses because many of these businesses have not yet made a significant investment for a traditional phone system. Also, we believe that small- to medium-sized businesses are more likely to be looking for call center-type administration to increase the productivity and efficiency of their contacts with customers.

#### CRITICAL ACCOUNTING POLICIES

**Revenue Recognition.** Revenue consists of direct sales to end-users, resellers and distributors. Revenue from sales to end-users and resellers is recognized upon shipment, when risk of loss has passed to the customer, collection of the receivable is reasonably assured, persuasive evidence of an arrangement exists, and the sales price is fixed and determinable. We provide for estimated sales returns and allowances and warrant costs related to such sales at the time of shipment. Net revenue consists of product revenue reduced by estimated sales returns and allowances. Sales to distributors are made under terms allowing certain rights of return and protection against subsequent price declines on our products held by the distributors. Upon termination of such distribution agreements, any unsold products may be returned by the distributor for a full refund. These agreements may be canceled without cause for convenience following a specified notice period. As a result of these provisions, we defer recognition of distributor revenue until such distributors resell our products to their customers. The amounts deferred as a result of this policy are reflected as "deferred revenue" in the accompanying consolidated balance sheets. The related cost of revenue is also deferred and reported in the consolidated balance sheets as inventory. We do not recognize revenue derived from sales to customers in Asia until both of the following elements are satisfied: customer has taken ownership upon shipment and we have received payment for the purchase. Short-term deferred revenue was approximately \$2.6 million as of March 31, 2010 and September 30, 2009. Long-term deferred revenue was approximately \$176,000 and \$154,000 as of March 31, 2010 and September 30, 2009, respectively.

**Service Support Programs.** Our Software Assurance Program provides our customers with the latest updates, new releases, and technical support for the applications they are licensed to use. Our Premier Service Plan includes software assurance and extended hardware warranty. These programs have an annual subscription and can range from

one to three years. Sales from our service support programs are recorded as deferred revenue and recognized as revenue over the terms of their subscriptions. Service support deferred revenue was approximately \$2.4 million and \$2.2 million as of March 31, 2010 and September 30, 2009, respectively. Our service plan offering remains a growth opportunity as we continue to add new service customers.

Software components are generally not sold separately from our hardware components. Software revenue consists of license revenue that is recognized upon delivery of the application products or features. We provide Software Assurance consisting primarily of the latest software updates, patches, new releases and technical support. Revenue earned on software arrangements involving multiple elements is allocated to each element based upon the relative fair value of the elements. The revenue allocated on this element is recognized with the initial licensing fee on delivery of the software. This Software Assurance revenue is in addition to the initial license fee and is recognized over a period of one to three years. The estimated cost of providing Software Assurance during the arrangement is insignificant and unspecified upgrades and enhancements offered at no cost during Software Assurance arrangements have historically been, and are expected to continue to be, minimal and infrequent. All estimated costs of providing the services, including upgrades and enhancements, are spread over the life of the Software Assurance term.

**Cash and Cash Equivalent.** We consider all highly liquid investments purchased with an initial maturity of three months or less to be cash equivalents. Cash and cash equivalents are invested in various investment grade institutional money market accounts, U.S. Agency securities and commercial paper. The Company's investment policy requires investments to be rated single-A or better. As of March 31, 2010, our investment portfolio consists entirely of investment grade institutional money market funds and bank term deposits. We also hold a total of \$2.4 million in cash in Asia of which \$2.2 million is held in a bank term deposit account.

**Inventory.** Inventory is stated at the lower of cost (first-in, first-out method) or market. Our inventory balance for the six months ended March 31, 2010 was \$1.0 million compared to \$1.2 million as of September 30, 2009. We perform a detailed review of inventory each fiscal quarter, with consideration given to future customer demand for our products, obsolescence from rapidly changing technology, product development plans, and other factors. If future demand or market conditions for our products are less favorable than those projected by management, or if our estimates prove to be inaccurate due to unforeseen technological changes, we may be required to record additional inventory obsolescence provision which would negatively affect gross margins in the period when the write-downs were recorded. In prior periods, we had established a reserve to write off excess inventory that management believed would not be sold. During the six months ended March 31, 2010, we disposed of fully-reserved inventory with a carrying value of zero and an original cost at \$33,000. The disposal of such inventory had no material impact on our revenue, gross margins and net loss for the six months ended March 31, 2010. Inventory allowance was \$654,000 and \$692,000 as of March 31, 2010 and September 30, 2009, respectively.

**Warranty Cost.** We accrue for warranty costs based on estimated product return rates and the expected material and labor costs to provide warranty services. If actual products return rates, repair cost or replacement costs differ significantly from our estimates, then our gross margin could be adversely affected. The reserve for product warranties was \$125,000 and \$122,000 as of March 31, 2010 and September 30, 2009, respectively.

**Stock-Based Compensation.** The Company has estimated the fair value of stock-based compensation for stock options at the date of the grant using the Black-Scholes option-pricing model. The Black-Scholes option-pricing model incorporates various assumptions including expected volatility, expected life and interest rate. The Company uses historical data to estimate option forfeitures. Expected volatility is based on historical volatility and the risk-free interest rate is based on U.S. Treasury yield in effect at the time of the grant for the expected life of the options. The Company does not anticipate paying any dividends in the foreseeable future and therefore used an expected dividend yield of zero in the option valuation model.

## Results of Operations

The following table sets forth consolidated statements of operations data for the periods indicated as a percentage of net revenue:

|  | Three Months Ended |          | Six Months Ended |          |
|--|--------------------|----------|------------------|----------|
|  | March 31,          |          | March 31,        |          |
|  | 2010               | 2009     | 2010             | 2009     |
| <b>Consolidated Statements of Operations Data:</b> |                    |          |                  |          |
| Net revenue:                                       |                    |          |                  |          |
| Hardware   | 64.7%              | 68.8%    | 65.2%            | 71.4%    |
| Software   | 15.6               | 13.3     | 14.7             | 13.5     |
| Service support                                    | 19.7               | 17.9     | 20.1             | 15.1     |
| Total net revenue                                  | 100.0              | 100.0    | 100.0            | 100.0    |
| Cost of revenue:                                   |                    |          |                  |          |
| Hardware   | 33.7               | 41.0     | 33.5             | 39.8     |
| Software   | 0.1                | 0.1      | 0.1              | 0.1      |
| Service support (1)                                | —                  | —        | —                | —        |
| Total cost of revenue                              | 33.8               | 41.1     | 33.6             | 39.9     |
| Gross profit                                       | 66.2               | 58.9     | 66.4             | 60.1     |
| Operating expenses:                                |                    |          |                  |          |
| Research and development                           | 24.6               | 34.7     | 25.9             | 29.3     |
| Sales and marketing                                | 29.2               | 51.4     | 30.9             | 46.5     |

(1) Service support cost represents less than 1% of our total cost of revenue.

## Net Revenue

Net sales consist primarily of revenue from direct sales to end-users, resellers and distributors.

We are organized and operate as two operating segments, the Americas and International. The Americas segment is comprised of the United States, Canada, Mexico, Central America and the Caribbean. The International segment is comprised of Asia, the United Kingdom, Italy and Holland.

The following table sets forth percentages of net revenue by geographic region with respect to such revenue for the periods indicated:

|  | Three Months Ended |      | Six Months Ended |      |
|--|--------------------|------|------------------|------|
|  | March 31,          |      | March 31,        |      |
|  | 2010               | 2009 | 2010             | 2009 |

---

Net revenue by customers that individually accounted for more than 10% of our revenue for the three and six months ended March 31, 2010 and 2009, respectively, were as follows:

|             | Three Months Ended<br>March 31, |      | Six Months Ended<br>March 31, |      |
|-------------|---------------------------------|------|-------------------------------|------|
|             | 2010                            | 2009 | 2010                          | 2009 |
| Synnex      | 37%                             | 28%  | 36%                           | 30%  |
| Altisys (1) | —                               | —    | 10%                           | —    |
| Fiserv (2)  | 13%                             | 10%  | 11%                           | —    |
| Jenne (3)   | —                               | 14%  | —                             | 18%  |
| Total       | 50%                             | 52%  | 57%                           | 48%  |

- (1) For the three months ended March 31, 2010 and 2009, revenue generated from Altisys was less than 10% of our total revenue. For the six months ended March 31, 2009, revenue generated from Altisys was less than 10% of our total revenue.
- (2) For the six months ended March 31, 2009, revenue generated from Fiserv was less than 10% of our total revenue.
- (3) In September 2009, we terminated our distribution agreement with Jenne. The termination of our relationship with Jenne did not have a material impact on our business.

The following table sets forth percentages of net revenue by product type with respect to such revenue for the periods indicated:

|                       | Three Months Ended<br>March 31, |      | Six Months Ended<br>March 31, |      |
|-----------------------|---------------------------------|------|-------------------------------|------|
|                       | 2010                            | 2009 | 2010                          | 2009 |
| Hardware              | 65%                             | 69%  | 65%                           | 71%  |
| Software              | 15%                             | 13%  | 15%                           | 14%  |
| Service Support Plans | 20%                             | 18%  | 20%                           | 15%  |
| Total                 | 100%                            | 100% | 100%                          | 100% |

Net revenue for the three months ended March 31, 2010 was \$4.4 million as compared to \$3.6 million for the three months ended March 31, 2009. Revenue generated in the Americas segment accounted for \$3.8 million, or 87% of our total net revenue, as compared to \$3.1 million, or 86% of our total net revenue, for the three months ended March 31, 2010 and 2009, respectively. Revenue generated in the International segment accounted for \$568,000, or 13% of our total net revenue, as compared to \$489,000, or 14% of our total net revenue, for the three months ended March 31, 2010 and 2009, respectively. In the Americas segment, during the three months ended March 31, 2010 and 2009, we generated approximately \$957,000 and \$664,000, respectively, in non-system related revenue. Non-system related revenue is primarily comprised of revenue generated from our service support plans. In the Americas segment, the increase in net revenue excluding non-system related revenue was approximately 25%. This increase in net revenue in the Americas segment was primarily attributable to change in our product mix. The number of systems shipped was approximately 1% lower than the corresponding period in the previous year. However, the average revenue per system was higher by approximately 25% because sales of our smaller systems, with lower unit pricing, decreased by approximately 34% while sales of our larger systems, with higher unit pricing, increased by approximately 53%. Sales in all markets continued to be affected by the global economic recession. We will continue to focus our sales efforts on larger enterprise customers. To the extent we are successful in penetrating larger enterprise customer, we believe that that sales of our product will increase and this will allow us to take market share from our competitors.

Net revenue for the six months ended March 31, 2010 was \$8.6 million as compared to \$8.4 million for the six months ended March 31, 2009. Revenue generated in the Americas segment accounted for \$7.3 million, or 85% of our total

net revenue, as compared to \$7.2 million, or 86% of our total net revenue, for the six months ended March 31, 2010 and March 31, 2009, respectively. Revenue generated in the International segment accounted for \$1.3 million, or 15% of our total net revenue, as compared to \$1.2 million, or 14% of our total net revenue, for the six months ended March 31, 2010 and 2009, respectively.

#### Cost of Revenue

Our cost of product revenue consists primarily of component and material costs, direct labor costs, provisions for excess and obsolete inventory, warranty costs and overhead related to the manufacturing of our products. The majority of these costs vary with the unit volumes of product sold.

Cost of revenue was \$1.5 million for the three months ended March 31, 2010 and 2009. For the six months ended March 31, 2010, cost of revenue decreased to \$2.9 million, compared to \$3.4 million for the same period of the previous fiscal year. This decrease was primarily caused by a shift in our product mix in the period. Cost of goods sold for the six months ending March 31, 2010, decreased to 33% of net revenue, compared to 40% of net revenue for the six months ending March 31, 2009 as a result of an increase of our non-system related revenue.

#### Research and Development Expenses

Research and development expenses consist primarily of costs related to personnel and overhead expenses, consultant expenses and other costs associated with the design, development, prototyping and testing of our products and enhancements of our converged telephone system software. For the second quarter of fiscal year 2010, research and development expenses were \$1.1 million, or 25% of net revenue, compared to \$1.2 million, or 35% of net revenue, for the second quarter of fiscal year 2009. The decrease in absolute dollars was primarily attributable to \$81,000 of reduced personnel-related expenses. Research and development expenses decreased to \$2.2 million, or 26% of net revenue, for the six months ended March 31, 2010 from \$2.5 million, or 29% of net revenue, for the same period in fiscal year 2009. This \$234,000 expense reduction for the six month period ended March 31, 2010 as compared to the same period of the prior year is primarily attributable to \$118,000 of reduced personnel-related expenses, with reductions of \$89,000 in consulting related services. The decrease in both the three and six months ended March 31, 2010 compared to the same periods of the prior year is attributable to the Company's ongoing efforts to reduce operating expenses, including our April 2009 salary reduction program described below.

Notwithstanding the reductions to research and development expenses described above, we intend to continue to make investments in our research and development and we believe that focused investments in research and development are critical to the future growth and our ability to enhance our competitive position in the marketplace. We believe that our ability to develop and meet enterprise customer requirements is essential to our success. Accordingly, we have assembled a team of engineers with expertise in various fields, including voice and IP communications, unified communications network design, data networking and software engineering. Our principal research and development activities are conducted in San Jose, California and our subsidiary in Shanghai, China. Management continues to focus on cost control until business conditions improve. If business conditions deteriorate or the rate of improvement does not meet our expectations, we may implement additional cost-cutting actions.

#### Sales and Marketing Expenses

Sales and marketing expenses consist primarily of salaries, commissions and related expenses for personnel engaged in marketing, sales and customer support functions, as well as trade shows, advertising, and promotional expenses. For the second quarter of fiscal year 2010, sales and marketing expenses were \$1.3 million, or 29% of net revenue, compared to \$1.8 million, or 51% of net revenue, for the second quarter of fiscal year 2009. The decrease was primarily driven by \$218,000 of reduced personnel-related expenses, a reduction of \$77,000 in advertising and partner conference expenses, reduced consulting expenses of \$53,000 and reduced travel related expenses of \$104,000. Sales and marketing expenses decreased to \$2.7 million, or 31% of net revenue, for the six months ended March 31, 2010 from \$3.9 million, or 46% of net revenue, for the same period in fiscal year 2009. This decrease was attributable to \$567,000 in personnel-related and overhead expenses, a decrease of \$179,000 in service related expenses, a decrease of \$197,000 in travel related expenses, with a decrease of \$192,000 in advertising and partner conference expenses. The most significant factor in the decrease in both the three and six months ended March 31, 2010 compared to the same periods of the prior year is attributable to the Company's ongoing efforts to reduce operating expenses, including our April 2009 salary reduction program described below.

We anticipate that sales and marketing expenses will increase and will remain the largest category of our operating expenses in future periods over the long term. We plan to continue investing in our domestic and international

marketing activities to help build brand awareness and create sales leads for our channel partners. Management continues to focus on cost control until business conditions improve. If business conditions deteriorate or the rate of improvement does not meet our expectations, we may implement additional cost-cutting actions.

#### General and Administrative Expenses

General and administrative expenses consist of salaries and related expenses for executive, finance and administrative personnel, facilities, allowance for doubtful accounts, legal and other general corporate expenses. For the second quarter of fiscal year 2010, general and administrative expenses were \$887,000 or 20% of revenue, compared to \$811,000 or 23% of revenue for the second quarter of fiscal year 2009. The increase in absolute dollars in general and administrative was attributable to \$100,000 increase in legal expenses associated with corporate governance matters, partially offset by a \$41,000 decrease in personnel-related expenses. For the six months ended March 31, 2010 and 2009, general and administrative expenses were \$1.7 million and \$1.8 million, respectively. As a percentage of net revenue, general and administrative expenses decreased to 19% for the six months ended March 31, 2010 from 21% for the same period in the previous fiscal year. The \$100,000 expense reduction for the six month period ended March 31, 2010 as compared to the same period of the prior year is primarily attributable to \$126,000 decrease in non-cash stock-based compensation expenses, partially offset by an increase of \$25,000 in service related expenses. In April 2009, in an effort to reduce ongoing operating expenses and to conform our business to our objectives and opportunities, we implemented a mandatory salary reduction for all of our employees, including our executive officers. These salary reductions ranged between 5% and 15%, depending on several factors, including, but not limited to, participation in commission plans and the original base salary. The salaries of all of our executive officers were reduced by 15%.

Management continues to focus on cost control until business conditions improve. If business conditions deteriorate or the rate of improvement does not meet our expectations, we may implement additional cost-cutting actions.

#### Equity Investment in Common Stock of Private Company

In July 2004, we purchased common stock of a private Korean telecommunications company for approximately \$79,000. As a result of this investment, we acquired approximately 23% of the voting power of the company. This gives us the right to nominate and elect one of the three members of the investee's current board of directors. We are accounting for this investment using the equity method and record our minority interest in our results of operations. The Korean company is also a reseller for AltiGen. For the six months end March 31, 2010 and 2009, product sales revenue from this company was approximately \$4,000 and \$0, respectively. Our accounts receivable from this company was \$0 and \$18,000 as of March 31, 2010 and 2009, respectively.

#### Interest Expense and Other Income, Net

Interest expense primarily consists of interest incurred on our capital lease commitments and other income primarily consists of interest earned on cash, cash equivalents and short-term investments. Net interest and other income decreased to \$1,000 and \$23,000 for the three and six months ended March 31, 2010, respectively, from \$23,000 and \$59,000 for the same periods in fiscal year 2009. The decrease in interest and other income, net for the three and six month periods ended March 31, 2010 as compared with the same periods of the prior year, was a combination of lower invested balances, reduced cash balances and reduced rates of interest available for cash and investments in financial assets in fiscal year 2010. In the longer term, we may generate less interest income if our total invested balance decreases and these decreases are not offset by rising interest rates or increased cash generated from operations or other sources.

#### Liquidity and Capital Resources

We have historically financed our operations primarily through the sale of equity securities. Cash and equivalents as of March 31, 2010 were \$7.5 million, an increase of \$108,000 compared to the balance of \$7.4 million as of September 30, 2009. The Company's principle source of liquidity consists of cash equivalents held in liquid money market funds.

The following table shows the major components of our condensed consolidated statements of cash flows for the six months ended March 31, 2010 and 2009 (in thousands):

|  | Six Months Ended<br>March 31, |          |
|--|-------------------------------|----------|
|  | 2010                          | 2009     |
| Cash and equivalents, beginning of period                    | \$ 7,397                      | \$ 9,467 |
| Cash provided by (used in) operating activities              | 86                            | (1,295)  |
| Cash provided by (used in) investing activities              | 18                            | (2,261)  |
| Cash provided by financing activities                        | 51                            | 44       |
| Effect of exchange rate changes on cash and cash equivalents | (47)                          | —        |
| Cash and equivalents, end of period                          | \$ 7,505                      | \$ 5,955 |

During the six months ended March 31, 2010, our net cash provided by operating activities was \$86,000, as compared to net cash used in operating activities of \$1.3 million during the same period in fiscal year 2009. This was primarily attributable to our net loss of \$810,000, a decrease of \$276,000 in accounts receivable, a decrease of \$227,000 in net inventories, a decrease of \$121,000 in accrued liabilities and an increase of \$160,000 in deferred revenue and

long-term liabilities. The cash impact of the loss for the six months ended March 31, 2010 was partially offset by a non-cash expense of \$370,000 in stock-based compensation expense and \$98,000 in depreciation and amortization costs. Generally, as sales levels fall, we expect accounts receivable and accounts payable, and to a lesser extent inventories, to decrease. Inventories react more slowly because we outsource much of our production, and reduced demand takes time to be reflected back through our supply chain. Further, there will be routine fluctuations in these accounts from period to period that may be significant in amount. The decrease in accounts receivable was primarily due to lower shipments and good collections during the second quarter of fiscal year 2010. The increase in deferred revenue for the six months ended March 31, 2010 was primarily the result of continued growth of our recurring revenue programs. These plans include both the Software Assurance Program, which provides our customers with new software releases and support for an annual fee, and the Premier Service Plan, which includes software assurance and extended hardware.

Net accounts receivable decreased 18% from \$1.5 million at September 30, 2009 to \$1.2 million at March 31, 2010. Quarterly accounts receivable day of sales outstanding (DSO) decreased from 29 days as of September 30, 2009 to 26 days as of March 31, 2010. The net accounts receivable and DSO decrease was primarily due to lower shipments and good collections during the second quarter of fiscal year 2010.

Net inventories decreased 18% from \$1.2 million at September 30, 2009 to \$1.0 million at March 31, 2010. The decrease in net inventories during this period was the result of routine period to period fluctuations. Our annualized inventory turn rate, which represents the number of times inventory is replenished during the year, increased from 5.4 turns as of September 30, 2009 to 5.8 turns as of March 31, 2010. Inventory management will continue to be an area of focus as we balance the need to maintain strategic inventory levels to help ensure competitive lead times with the risk of inventory obsolescence due to rapidly changing technology and customer requirements.

We ended the second quarter of fiscal year 2010 with a cash conversion cycle of 14 days, as compared to 66 days for the first quarter of fiscal year 2010. The cash conversion cycle is the duration between purchase of inventories and services and the collection of the cash from the sale of our products and services and is a metric on which we have focused as we continue to try to efficiently manage our assets. The cash conversion cycle results from the calculation of (a) the days of sales outstanding added to (b) the days of supply in inventories and reduced by (c) the days of payable outstanding. The decrease in our cash conversion cycle was primarily due to good collections during the second quarter of fiscal year 2010.

For the six months ended March 31, 2010, net cash provided by investing activities was \$18,000, as compared to net cash used in investing activities of \$2.3 million during the same period in fiscal year 2009. For the six months ended March 31, 2010, the Company spent approximately \$73,000 on purchases of property and equipment compared to \$139,000 for the six month period ended March 31, 2009. Additionally, for the six month period ended March 31, 2010, we reclassified our Shanghai facilities-related deposit of \$92,000 from long-term deposit to short-term deposit.

Net cash provided by financing activities for the six months ended March 31, 2010 was approximately \$51,000, as compared to \$44,000 during the same period in fiscal year 2009. For the second quarter of fiscal year 2010, proceeds from issuance of common stock under employee stock plans represented approximately \$50,000 as compared to \$63,000 for the same period in fiscal year 2009. Additionally, during the second quarter of fiscal year 2009, repurchase of our treasury stock was approximately \$19,000.

We believe our existing balances of cash, cash equivalents and short-term investments, as well as cash expected to be generated from operating activities, will be sufficient to satisfy our working capital needs, capital expenditures and other liquidity requirements associated with our existing operations over the next 12 months.

Our cash needs depend on numerous factors, including market acceptance of and demand for our products, our ability to develop and introduce new products and enhancements to existing products, the prices at which we can sell our products, the resources we devote to developing, marketing, selling and supporting our products, the timing and expense associated with expanding our distribution channels, increases in manufacturing costs and the prices of the components we purchase, as well as other factors. If we are unable to raise additional capital or if sales from our new products or enhancements are lower than expected, we will be required to make additional reductions in operating expenses and capital expenditures to ensure that we will have adequate cash reserves to fund operations.

Additional financing, if required, may not be available on acceptable terms, or at all. We also may require additional capital to acquire or invest in complementary businesses or products or to obtain the right to use complementary technologies. If we cannot raise additional funds in the future if needed, on acceptable terms, we may not be able to further develop or enhance our products, take advantage of opportunities, or respond to competitive pressures or unanticipated requirements, which could seriously harm our business. Even if additional financing is available, we

may be required to obtain the consent of our stockholders, which we may or may not be able to obtain. In addition, the issuance of equity or equity-related securities will dilute the ownership interest of our stockholders and the issuance of debt securities could increase the risk or perceived risk of investing in our securities.

We did not have any material commitments for capital expenditures as of March 31, 2010. We had total outstanding commitments on noncancelable capital and operating leases of \$1.5 million as of March 31, 2010. Lease terms on our existing facility operating leases generally range from three to nine years. We believe that we have sufficient cash reserves to allow us to continue our current operations for more than a year.

## Contractual Obligations

The following table presents certain payments due by us under contractual obligations with minimum firm commitments as of March 31, 2010:

| Contractual Obligations            | Total    | Payments Due by Period           |                             |                             |                                   |
|------------------------------------|----------|----------------------------------|-----------------------------|-----------------------------|-----------------------------------|
|                                    |          | Payments Due in Less Than 1 Year | Payments Due in 1 - 3 Years | Payments Due in 3 - 5 Years | Payments Due in More Than 5 Years |
|                                    |          | (In thousands)                   |                             |                             |                                   |
| Operating leases obligation        | \$ 1,471 | \$ 301                           | \$ 922                      | \$ 248                      | \$ —                              |
| Capital leases obligation          | 11       | 11                               | —                           | —                           | —                                 |
| Total contractual lease obligation | \$ 1,482 | \$ 312                           | \$ 922                      | \$ 248                      | \$ —                              |

## Effects of Recently Issued Accounting Pronouncements

In September 2009, FASB issued ASU 2009-13, Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements. As summarized in ASU 2009-13, ASC Topic 605 has been amended (1) to provide updated guidance on whether multiple deliverables exist, how the deliverables in an arrangement should be separated, and the consideration allocated; (2) to require an entity to allocate revenue in an arrangement using estimated selling prices of deliverables if a vendor does not have vendor-specific objective evidence (“VSOE”) or third-party evidence of selling price; and (3) to eliminate the use of the residual method and require an entity to allocate revenue using the relative selling price method. The accounting changes summarized in ASU 2009-14 and ASU 2009-13 are both effective for fiscal years beginning on or after June 15, 2010, with early adoption permitted. Adoption may either be on a prospective basis or by retrospective application. The Company is currently assessing the impact of this guidance to its consolidated financial statements.

In October 2009, FASB issued ASU 2009-14, Software (Topic 985)—Certain Revenue Arrangements That Include Software Elements. This standard changes the accounting model for revenue arrangements that include both tangible products and software elements. Under this guidance, tangible products containing software components and non-software components that function together to deliver the tangible product's essential functionality are excluded from the software revenue guidance in Subtopic 985-605, Software-Revenue Recognition. In addition, hardware components of a tangible product containing software components are always excluded from the software revenue guidance. FASB Accounting Standards Updates 2009-14 is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The Company is currently assessing the impact of this guidance to its consolidated financial statements.

In October 2008, the Company adopted FASB ASC 820-10, Fair Value Measurements and Disclosures – Overall (“ASC 820-10”) with respect to its financial assets and liabilities. In February 2008, the FASB issued updated guidance related to fair value measurements, which is included in the Codification in ASC 820-10-55, Fair Value Measurements and Disclosures – Overall – Implementation Guidance and Illustrations. The updated guidance provided a one year deferral of the effective date of ASC 820-10 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. The adoption did not have a material impact on the Company’s Condensed Consolidated Financial Statements as it relates only to disclosures. The required disclosures are included in Note 1 of Notes to Condensed Consolidated Financial Statements.

In October 2009, the Company adopted the fair value disclosure provision that requires the reporting of interim disclosures about the fair value of financial instruments previously only disclosed on an annual basis. The adoption did not have any impact on the Company’s Condensed Consolidated Financial Statements as it relates only to

disclosures. The required disclosures are included in Note 1 of Notes to Condensed Consolidated Financial Statements.

In June 2009, the Company adopted FASB ASC 855-10, Subsequent Events – Overall (“ASC 855-10”). ASC 855-10 establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It required the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date – that is, whether that date represents the date the financial statements were issued or were available to be issued. This disclosure should alert all users of financial statements that an entity has not evaluated subsequent events after that date in the set of financial statements being presented. In February 2010, the FASB issued ASU 2010-09, Amendments to Certain Recognition and Disclosure Requirements (“ASU 2010-09”). ASU 2010-09 amended the guidance on subsequent events to remove the requirement for SEC filers to disclose the date through which an entity has evaluated subsequent events. Adoption of ASC 855-10, as amended, did not have a material impact on the Company’s results of operations, financial position or liquidity.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

#### Market Interest Rate Risk

At March 31, 2010, our investment portfolio consisted primarily of cash and cash equivalents of \$7.5 million. These securities are subject to interest rate risk and will decline in value if market interest rates increase. Our interest income and expense is most sensitive to fluctuations in the general level of U.S. interest rates. As such, changes in U.S. interest rates affect the interest earned on our cash, cash equivalents and short-term investments, and the fair value of those investments. Due to the short duration and conservative nature of these instruments, we do not believe that we have a material exposure to interest rate risk. For example, if market interest rates were to increase immediately and uniformly by 10% from levels as of March 31, 2010, the decline in the fair value of the portfolio would not have a material effect on our results of operations over the next fiscal year.

#### Foreign Currency Exchange Risk

We transact a portion of our business in non-U.S. currencies, primarily the Chinese Yuan (Renminbi). We bill a majority of our customers in U.S. dollars. Although the fluctuation of currency exchange rates may impact our customers, and thus indirectly impact us, we do not attempt to hedge this indirect and speculative risk. We monitor our foreign currency exposure; however, as of March 31, 2010, we believe our foreign currency exposure is not material enough to warrant foreign currency hedging. In the short term, we do not foresee foreign exchange currency fluctuations to pose a material market risk to us. In future periods over the long term, we anticipate we will be exposed to fluctuations in foreign currency exchange rates on accounts receivable from sales in these foreign currencies and the net monetary assets and liabilities of the related foreign subsidiary located in Shanghai, China. A hypothetical 10% favorable or unfavorable change in foreign currency exchange rates would not have a material impact on our results of operations.

### Item 4. Controls and Procedures

#### Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we recently implemented additional disclosure controls and procedures and carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rule 13a-15(e)) as of March 31, 2010. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of March 31, 2010.

#### Changes in Internal Control Over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting during the quarter ended March 31, 2010 that have materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting.

We believe that our present internal control program has been effective at a reasonable assurance level to ensure that our financial reporting has not been materially misstated. Nonetheless, we will continue to review, and where necessary, enhance our internal control design and documentation, ongoing risk assessment, and management review as part of our internal control program.

## PART II. OTHER INFORMATION

### Item 1. Legal Proceedings

From time to time, we may become party to litigation and subject to various routine claims and legal proceedings that arise in the ordinary course of our business. To date, these actions have not had a material adverse effect on our financial position, result of operations or cash flows. Although the results of litigation and claims cannot be predicted with certainty, we believe that the final outcome of such matters would not have a material adverse effect on our business, financial position, results of operation and cash flows.

### Item 1A. Risk Factors

#### CERTAIN FACTORS AFFECTING BUSINESS, OPERATING RESULTS, AND FINANCIAL CONDITION

In addition to other information contained in this Form 10-Q, investors should carefully consider the following factors that could adversely affect our business, financial condition and operating results as well as adversely affect the value of an investment in our common stock.

#### Risks Related to Ownership of our Common Stock

Our common stock no longer trades on the NASDAQ Capital Market

In March 2010, we voluntarily delisted our common stock from the NASDAQ Capital Market and moved our common stock listing to the OTCQX over-the-counter market. As a result, investors may find it more difficult to dispose of or obtain accurate quotations as to the market value of our common stock, and the ability of our stockholders to sell our securities in the secondary market may be materially limited.

Our stock price may be volatile.

The trading price of our common stock has been and may continue to be volatile and could be subject to wide fluctuations in response to various factors, some of which are beyond our control. Factors that could affect the trading price of our common stock could include:

- variations in our operating results;
- announcements of technological innovations, new products or product enhancements, strategic alliances or significant agreements by us or by our competitors;
- the gain or loss of significant customers;
- recruitment or departure of key personnel;
- the impact of unfavorable worldwide economic and market conditions, including the restricted credit environment impacting credit of our customers;
- changes in estimates of our operating results or changes in recommendations by any securities analysts who follow our common stock;
  - significant sales, or announcement of significant sales, of our common stock by us or our stockholders; and
  - adoption or modification of regulations, policies, procedures or programs applicable to our business.

In addition, the stock market in general, and the market for technology companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. Broad market and industry factors may seriously affect the market price of our common stock, regardless of our actual operating performance. In addition, in the past, following periods of volatility in the overall

market and the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. This litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and resources.

If securities or industry analysts do not publish research or reports about our business, or if they issue an adverse or misleading opinion regarding our stock, our stock price and trading volume could decline.

The trading market for our common stock will be influenced by the research and reports that industry or securities analysts publish about us or our business. If any of the analysts who cover us issue an adverse or misleading opinion regarding our stock, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

We may choose to raise additional capital. Such capital may not be available, or may be available on unfavorable terms, which would adversely affect our ability to operate our business.

We expect that our existing cash balances will be sufficient to meet our working capital and capital expenditure needs for the foreseeable future. If we choose to raise additional funds, due to unforeseen circumstances or material expenditures, we cannot be certain that we will be able to obtain additional financing on favorable terms, if at all, and any additional financings could result in additional dilution to our existing stockholders.

Provisions in our charter documents, Delaware law, employment arrangements with certain of our executive officers and Preferred Stock Rights Agreement could discourage a takeover that stockholders may consider favorable.

Provisions in our certificate of incorporation and bylaws may have the effect of delaying or preventing a change of control or changes in our management. These provisions include but are not limited to the following:

- our board of directors has the right to increase the size of the board of directors and to elect directors to fill a vacancy created by the expansion of the board of directors or the resignation, death or removal of a director, which prevents stockholders from being able to fill vacancies on our board of directors;
- our board of directors is staggered into three (3) classes and each member is elected for a term of 3 years, which prevents stockholders from being able to assume control of the board of directors;
- our stockholders may not act by written consent and are limited in their ability to call special stockholders' meetings; as a result, a holder, or holders, controlling a majority of our capital stock would be limited in their ability to take certain actions other than at annual stockholders' meetings or special stockholders' meetings called by the board of directors, the chairman of the board or the president;
- our certificate of incorporation prohibits cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;
- stockholders must provide advance notice to nominate individuals for election to the board of directors or to propose matters that can be acted upon at a stockholders' meeting, which may discourage or deter a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of our company; and
- our board of directors may issue, without stockholder approval, shares of undesignated preferred stock; the ability to issue undesignated preferred stock makes it possible for our board of directors to issue preferred stock with voting or other rights or preferences that could impede the success of any attempt to acquire us.

As a Delaware corporation, we are also subject to certain Delaware anti-takeover provisions. Under Delaware law, a corporation may not engage in a business combination with any holder of 15% or more of its capital stock unless the holder has held the stock for three years or, among other things, the board of directors has approved the transaction. Our board of directors could rely on Delaware law to prevent or delay an acquisition of us.

Certain of our executive officers may be entitled to accelerated vesting of their options pursuant to the terms of their employment arrangements upon a change of control of AltiGen. In addition to the arrangements currently in place with some of our executive officers, we may enter into similar arrangements in the future with other officers. Such arrangements could delay or discourage a potential acquisition of AltiGen.

Our board of directors declared a dividend of one (1) right for each share of Common Stock under the terms and conditions of a Preferred Stock Rights Agreement by and between AltiGen and Computershare Trust Company, N.A. dated April 21, 2009, which right is exercisable for shares of AltiGen's Preferred Stock after the date on which a hostile acquiror obtains, or announces a tender offer for, 15% or more of the Company's Common Stock. If an acquiror obtains 15% or more of the Company's Common Stock, each stockholder (except the acquiror) may purchase either our Common Stock or in certain circumstances, the acquiror's Common Stock, at a discount, resulting in

substantial dilution to the acquiror's interest. Such rights could delay or discourage a potential acquisition of AltiGen.

#### Risks Related to Our Business

Our business could be harmed by adverse global economic conditions in our target markets or reduced spending on information technology and telecommunication products.

Current uncertainty in global economic conditions pose a risk to the overall economy as consumers and businesses may defer purchases in response to tighter credit and negative financial news, which could negatively affect product demand and other related matters. Our business depends on the overall demand for information technology, and in particular for telecommunications systems. The market we serve is emerging and the purchase of our products involves significant upfront expenditures. In addition, the purchase of our products can be discretionary and may involve a significant commitment of capital and other resources. Weak economic conditions in our target markets, or a reduction in information technology or telecommunications spending even if economic conditions improve, would likely adversely impact our business, operating results and financial condition in a number of ways, including longer sales cycles, lower prices for our products and reduced unit sales.

We have had a history of losses and may incur future losses, which may prevent us from attaining profitability.

We have had a history of operating losses since our inception and, as of March 31, 2010, we had an accumulated deficit of \$61.6 million. We may incur operating losses in the future, and these losses could be substantial and impact our ability to attain profitability. We do not expect to significantly increase expenditures for product development, general and administrative expenses, and sales and marketing expenses; however, if we cannot maintain current revenue or revenue growth, we will not achieve or sustain profitability or positive operating cash flows. Even if we achieve profitability and positive operating cash flows, we may not be able to sustain or increase profitability or positive operating cash flows on a quarterly or annual basis.

Our operating results vary, making future operating results difficult to predict.

Our quarterly and annual operating results have varied significantly in the past and likely will vary significantly in the future. A number of factors, many of which are beyond our control, have caused and may cause our operating results to vary, including:

- our ability to respond effectively to competitive pricing pressures;
- our ability to establish or increase market acceptance of our technology, products and systems;
- our success in expanding our network of distributors, dealers and companies that buy our products in bulk, customize them for particular applications or customers, and resell them under their own names;
- market acceptance of products and systems incorporating our technology and enhancements to our product applications on a timely basis;
- our success in supporting our products and systems;
- our sales cycle, which may vary substantially from customer to customer;
- unfavorable changes in the prices and delivery of the components we purchase;
- the size and timing of orders for our products, which may vary depending on the season, and the contractual terms of the orders;
- the size and timing of our expenses, including operating expenses and expenses of developing new products and product enhancements;
- deferrals of customer orders in anticipation of new products, services or product enhancements introduced by us or by our competitors; and
- our ability to attain and maintain production volumes and quality levels for our products.

Our future projected budgets and commitments are based in part on our expectations of future sales. If our sales do not meet expectations, it will be difficult for us to reduce our expenses quickly and, consequently, our operating results may suffer.

Our dealers often require immediate shipment and installation of our products. As a result, we have historically operated with limited backlog, and our sales and operating results in any quarter primarily depend on orders booked and shipped during that quarter.

Any of the above factors could harm our business, financial condition and results of operations. We believe that period-to-period comparisons of our results of operations are not meaningful, and you should not rely upon them as indicators of our future performance.

Our market is highly competitive and we may not have the resources to adequately compete.

The market for our integrated, multifunction telecommunications systems is new, rapidly evolving and highly competitive. We expect competition to intensify in the future as existing competitors develop new products and new

competitors enter the market. We believe that a critical component to success in this market is the ability to establish and maintain strong partner and customer relationships with a wide variety of domestic and international providers. If we fail to establish or maintain these relationships, we will be at a serious competitive disadvantage.

We face competition from companies providing traditional private telephone systems. Our principal competitors that produce these telephone systems are Avaya Communications and Mitel Networks Corporation. We also compete against providers of multi-function telecommunications systems, including ShoreTel and Cisco Systems, as well as any number of future competitors. Many of our competitors are substantially larger than we are and have significantly greater name recognition, financial resources, sales and marketing teams, technical and customer support, manufacturing capabilities and other resources. These competitors also may have more established distribution channels and stronger relationships with service providers. These competitors may be able to respond more rapidly to new or emerging technologies and changes in customer requirements or to devote greater resources to the development, promotion and sale of their products. These competitors may enter our existing or future markets with products that may be less expensive, provide higher performance or additional features or be introduced earlier than our phone systems. We also expect that other companies may enter our market with better products and technologies. If any technology that is competing with ours is more reliable, faster, less expensive or has other advantages over our technology, then the demand for our products and services could decrease and harm our business.

We expect our competitors to continue to improve the performance of their current products and introduce new products or new technologies. If our competitors successfully introduce new products or enhance their existing products, our sales or market acceptance of our products and services could be reduced, price competition could be increased or our products could become obsolete. To remain competitive, therefore, we must continue to invest significant resources in research and development, sales and marketing and customer support. We may not have sufficient resources to make these investments or to make the technological advances necessary to be competitive, which in turn will cause our business to suffer.

We sell the majority of our products through dealers and distributors, which limits our ability to control the timing of our sales, and which makes it more difficult to predict our revenue.

We do not recognize revenue from the sale of our products to our distributors until these products are sold to either resellers or end-users. We have little control over the timing of product sales to resellers and end users. Our lack of control over the revenue that we recognize from our distributors' sales to resellers and end-users limits our ability to predict revenue for any given period. Our future projected budgets and commitments are based in part on our expectations of future sales. If our sales do not meet expectations, it will be difficult for us to reduce our expenses quickly, and consequently our operating results may suffer.

We rely on resellers to promote, sell, install and support our products, and their failure to do so or our inability to recruit or retain resellers may substantially reduce our sales and thus seriously harm our business.

We rely on resellers who can provide high quality sales and support services. As with our distributors, we compete with other telecommunications systems providers for our resellers' business as our resellers generally market competing products. If a reseller promotes a competitor's products to the detriment of our products or otherwise fails to market our products and services effectively, we could lose market share. In addition, the loss of a key reseller or the failure of resellers to provide adequate customer service could cause our business to suffer. If we do not properly train our resellers to sell, install and service our products, our business will suffer.

Software or hardware errors may seriously harm our business and damage our reputation, causing loss of customers and revenue.

Users expect telephone systems to provide a high level of reliability. Our products are inherently complex and may have undetected software or hardware errors. We have detected and may continue to detect errors and product defects in our installed base of products, new product releases and product upgrades. End users may install, maintain and use our products improperly or for purposes for which they were not designed. These problems may degrade or terminate

the operation of our products, which could cause end users to lose telephone service, cause us to incur significant warranty and repair costs, damage our reputation and cause significant customer relations problems. Any significant delay in the commercial introduction of our products due to errors or defects, any design modifications required to correct these errors or defects or any negative effect on customer satisfaction as a result of errors or defects could seriously harm our business, financial condition and results of operations.

Any claims brought because of problems with our products or services could seriously harm our business, financial condition and results of operations. We currently offer a one-year hardware guarantee to end-users. If our products fail within the first year, we face replacement costs. Our insurance policies may not provide sufficient or any coverage should a claim be asserted. In addition, our introduction of products and systems with reliability, quality or compatibility problems could result in reduced revenue, uncollectible accounts receivable, delays in collecting accounts receivable, warranties and additional costs. Our customers, end users or employees could find errors in our products and systems after we have begun to sell them, resulting in product redevelopment costs and loss of, or delay in, their acceptance by the markets in which we compete. Further, we may experience significant product returns in the future. Any of these events could have a material adverse effect on our business, financial condition and results of operations.

Our market is subject to changing preferences; failure to keep up with these changes would result in our losing market share, thus seriously harming our business, financial condition and results of operations.

Our customers and end users expect frequent product introductions and have changing requirements for new products and features. In order to be competitive, we need to develop and market new products and product enhancements that respond to these changing requirements on a timely and cost-effective basis. Our failure to do so promptly and cost effectively would seriously harm our business, financial condition and results of operations. Also, introducing new products could require us to write-off existing inventory as obsolete, which could harm our results of operations.

We depend on attracting and retaining qualified personnel to maintain and expand our business; our failure to promptly attract and retain qualified personnel may seriously harm our business, financial condition and results of operations.

We depend, in large part, on our ability to attract and retain highly skilled personnel, particularly engineers and sales and marketing personnel. We need highly trained technical personnel to design and support our server-based telecommunications systems. In addition, we need highly trained sales and marketing personnel to expand our marketing and sales operations in order to increase market awareness of our products and generate increased revenue. Competition for highly trained personnel can at times be intense, especially in the San Francisco Bay Area where most of our operations are located. We cannot be certain that we will be successful in our recruitment and retention efforts. If we fail to attract or retain qualified personnel or suffer from delays in hiring required personnel, our business, financial condition and results of operations may be seriously harmed.

Losing any of our key distributors would harm our business. We also need to establish and maintain relationships with additional distributors and original equipment manufacturers.

Sales through our distributors, Altisys Communications, Inc., Synnex Corporation and Fiserv Solutions, Inc. accounted for 57% of our net revenue during the six months ended March 31, 2010. Our business and operating results will suffer if any one of these distributors does not continue distributing our products, fails to distribute the volume of our products that it currently distributes or fails to expand our customer base. We also need to establish and maintain relationships with additional distributors and original equipment manufacturers. In September 2009, we terminated our distribution agreement with Jenne Distributors, Inc. We believe the termination of our relationship with Jenne Distributors, Inc. will not have a material impact on our business because we anticipate that revenue from other distributors will offset a portion of the lost revenue.

We may not be able to establish, or successfully manage, relationships with additional distribution partners. In addition, our agreements with distributors typically provide for termination by either party upon written notice to the other party. For example, our agreement with Synnex provides for termination, with or without cause, by either party upon 30 days' written notice to the other party, or upon insolvency or bankruptcy. Generally, these agreements are non-exclusive and distributors sell products that compete with ours. If we fail to establish or maintain relationships with distributors and original equipment manufacturers, our ability to increase or maintain our sales and our customer base will be substantially harmed.

We rely on sole-sourced components and third party technology and products; if these components are not available, our business may suffer.

We purchase technology that is incorporated into many of our products, including virtually all of our hardware products, from a single third-party supplier. We order sole-sourced components using purchase orders and do not have supply contracts for them. One sole-sourced component, a TI DSP chip, is particularly important to our business because it is included in virtually all of our hardware products. If we were unable to purchase an adequate supply of

these sole-sourced components on a timely basis, we would be required to develop alternative products, which could entail qualifying an alternative source or redesigning our products based on different components. Our inability to obtain these sole-sourced components, especially the TI DSP chip, could significantly delay shipment of our products, which could have a negative effect on our business, financial condition and results of operations.

Compliance with changing regulations of corporate governance and public disclosure may result in additional expenses.

Changing laws, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002 and new SEC regulations are creating uncertainty for companies such as ours. These new or changed laws, regulations and standards are subject to varying interpretations in many cases due to their lack of specificity, and as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies, which could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. As a result, our efforts to comply with evolving laws, regulations and standards have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. In particular, our efforts to comply with Section 404 of the Sarbanes-Oxley Act of 2002 and the related regulations regarding our required assessment of our internal controls over financial reporting and beginning with the year ended September 30, 2010, our external auditor's audit of the effectiveness of our internal controls over financial reporting has required the commitment of significant financial and managerial resources. We expect these efforts to require the continued commitment of significant resources. Further, our board members, chief executive officer, and chief financial officer could face an increased risk of personal liability in connection with the performance of their duties. As a result, we may have difficulty attracting and retaining qualified board members and executive officers, which could harm our business. If our efforts to comply with new or changed laws, regulations and standards differ from the activities intended by regulatory or governing bodies due to ambiguities related to practice, our reputation may be harmed.

Our facility is vulnerable to damage from earthquakes and other natural disasters and other business interruptions; any such damage could seriously or completely impair our business.

We perform final assembly, software installation and testing of our products at our facility in San Jose, California. Our facility is located on or near known earthquake fault zones and may be subject to rolling electrical blackouts and is vulnerable to damage or interruption from fire, floods, earthquakes, power loss, telecommunications failures and similar events. If such a disaster or interruption occurs, our ability to perform final assembly, software installation and testing of our products at our facility would be seriously, if not completely, impaired. If we were unable to obtain an alternative place or way to perform these functions, our business, financial condition and results of operations would suffer. The insurance we maintain may not be adequate to cover our losses against fires, floods, earthquakes and general business interruptions.

Our strategy to outsource assembly and test functions in the future could delay delivery of products, decrease quality or increase costs.

We may begin to outsource a substantial amount of our product assembly and test functions. This outsourcing strategy involves certain risks, including the potential lack of adequate capacity and reduced control over delivery schedules, manufacturing yield, quality and costs. In the event that any significant subcontractors were to become unable or unwilling to continue to manufacture or test our products in the required volumes, we would have to identify and qualify acceptable replacements. Finding replacements could take time and we cannot be sure that additional sources would be available to us on a timely basis. Any delay or increase in costs in the assembly and testing of products by third-party subcontractors could seriously harm our business, financial condition and results of operations.

Our expansion in international markets has been slow and steady. However, our plan is to accelerate this growth rate and will involve new risks that our previous domestic operations have not prepared us to address; our failure to address these risks could harm our business, financial condition and results of operations.

For the second quarter of fiscal year 2010, approximately 13% of our net revenue came from customers outside of the Americas. We intend to expand our international sales and marketing efforts. Our efforts are subject to a variety of risks associated with conducting business internationally, any of which could seriously harm our business, financial condition and results of operations. These risks include:

- tariffs, duties, price controls or other restrictions on foreign currencies or trade barriers, such as import or export licensing imposed by foreign countries, especially on technology;
  - potential adverse tax consequences, including restrictions on repatriation of cash or earnings;
- fluctuations in foreign currency exchange rates, which could make our products relatively more expensive in foreign markets; and
- conflicting regulatory requirements in different countries that may require us to invest significant resources customizing our products for each country.

Any failure by us to protect our intellectual property could harm our business and competitive position.

Our success depends, to a certain extent, upon our proprietary technology. We currently rely on a combination of patent, trade secret, copyright and trademark law, together with non-disclosure and invention assignment agreements, to establish and protect the proprietary rights in the technology used in our products.

Although we have been issued sixteen patents and expect to continue to file patent applications, we are not certain that our patent applications will result in the issuance of patents, or that any patents issued will provide commercially significant protection of our technology. In addition, other individuals or companies may independently develop

substantially equivalent proprietary information not covered by the patents to which we own rights, may obtain access to our know-how or may claim to have issued patents that prevent the sale of one or more of our products. Also, it may be possible for third parties to obtain and use our proprietary information without our authorization. Further, the laws of some countries, such as those in Japan, one of our target markets, may not adequately protect our intellectual property or such protection may be uncertain. Our success also depends on trade secrets that cannot be patented and are difficult to protect. If we fail to protect our proprietary information effectively, or if third parties use our proprietary technology without authorization, our competitive position and business will suffer.

If we are unable to raise additional capital when needed, we may be unable to develop or enhance our products and services.

We may seek additional funding in the future. If we cannot raise funds on acceptable terms, we may be unable to develop or enhance our products and services, take advantage of future opportunities or respond to competitive pressures or unanticipated requirements. We also may be required to reduce operating costs through lay-offs or reduce our sales and marketing or research and development efforts. If we issue equity securities, stockholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of our common stock.

We may face infringement issues that could harm our business by requiring us to license technology on unfavorable terms or temporarily or permanently cease sales of key products.

We may become parties to litigation in the normal course of our business. Litigation in general, and intellectual property and securities litigation in particular, can be expensive and disruptive to normal business operations. Moreover, the results of complex litigation are difficult to predict. We were previously a defendant in a patent infringement suit brought by Vertical Networks. On October 4, 2007, the parties entered into a stipulation dismissing the lawsuit in its entirety without prejudice. Consequently, Vertical Networks may reassert these or related claims in one or more separate proceedings.

More generally, litigation related to these types of claims may require us to acquire licenses under third party patents that may not be available on acceptable terms, if at all. We believe that an increasing portion of our revenue in the future will come from sales of software applications for our hardware products. The software market traditionally has experienced widespread unauthorized reproduction of products in violation of developers' intellectual property rights. This activity is difficult to detect, and legal proceedings to enforce developers' intellectual property rights are often burdensome and involve a high degree of uncertainty and substantial costs.

Our products may not meet the legal standards required for their sale in some countries; if we cannot sell our products in these countries, our results of operations may be seriously harmed.

The United States and other countries in which we intend to sell our products have standards for safety and other certifications that must be met for our products to be legally sold in those countries. We have tried to design our products to meet the requirements of the countries where we sell or plan to sell them. We also have obtained or are trying to obtain the certifications that we believe are required to sell our products in these countries. We cannot, however, guarantee that our products meet all of these standards or that we will be able to obtain any certifications required. In addition, there is, and will likely continue to be, an increasing number of laws and regulations pertaining to the products we offer and may offer in the future. These laws or regulations may include, for example, more stringent safety standards, requirements for additional or more burdensome certifications or more stringent consumer protection laws.

If our products do not meet a country's standards or we do not receive the certifications required by a country's laws or regulations, then we may not be able to sell our products in that country. This inability to sell our products may seriously harm our results of operation by reducing our sales or requiring us to invest significant resources to conform our products to these standards.

#### Risks Related to the Industry

Integrated, multifunction telecommunications systems may not achieve widespread acceptance.

The market for integrated, multifunction telecommunications systems is relatively new and rapidly evolving. Businesses have invested substantial resources in the existing telecommunications infrastructure, including traditional private telephone systems, and may be unwilling to replace these systems in the near term or at all. Businesses also may be reluctant to adopt integrated, multifunction telecommunications systems because of their concern about the current limitations of data networks, including the Internet. For example, end users sometimes experience delays in receiving calls and reduced voice quality during calls when routing calls over data networks. Moreover, businesses that begin to route calls over the same networks that currently carry only their data also may experience these problems if the networks do not have sufficient capacity to carry all of these communications at the same time.

Evolving standards may delay our product introductions, increase our product development costs or cause end users to defer or cancel plans to purchase our products, any of which could adversely affect our business.

The standards in our market are still evolving. These standards are designed to ensure that integrated, multifunction telecommunications products from different manufacturers can operate together. Some of these standards are proposed by other participants in our market, including some of our competitors, and include proprietary technology. In recent years, these standards have changed, and new standards have been proposed, in response to developments in our market. Our failure to conform our products to existing or future standards may limit their acceptance by market participants. We may not anticipate which standards will achieve the broadest acceptance in our market in the future, and we may take a significant amount of time and expense to adapt our products to these standards. We also may have to pay additional royalties to developers of proprietary technologies that become standards in our market. These delays and expenses may seriously harm our results of operations. In addition, customers and users may defer or cancel plans to purchase our products due to concerns about the ability of our products to conform to existing standards or to adapt to new or changed standards, and this could seriously harm our results of operations.

Future regulation or legislation could harm our business or increase our cost of doing business.

The Federal Communications Commission (FCC) has submitted a report to Congress stating that it may regulate certain Internet services if it determines that such Internet services are functionally equivalent to conventional telecommunications services. The increasing growth of the voice over data network market and the popularity of supporting products and services, heighten the risk that national governments will seek to regulate the transmission of voice communications over networks such as the Internet. In addition, large telecommunications companies may devote substantial lobbying efforts to influence the regulation of this market so as to benefit their interests, which may be contrary to our interests. These regulations may include, for example, assessing access or settlement charges, imposing tariffs or imposing regulations based on encryption concerns or the characteristics and quality of products and services. In February 2004, the FCC found that an entirely Internet based voice over Internet protocol service was an unregulated information service. At the same time, the FCC began a broader proceeding to examine what its role should be in this new environment of increased consumer choice and what can be done to meet its role of safeguarding the public interest. Future laws, legal decisions or regulations, as well as changes in interpretations of existing laws and regulations, could require us to expend significant resources to comply with them. In addition, these future events or changes may create uncertainty in our market that could reduce demand for our products.

Item 5. Other Information

On February 23, 2010, the Board of Directors of the Company unanimously approved a plan to voluntarily delist the Company's common stock from the NASDAQ Capital Market and to move its common stock listing to the OTCQX over-the-counter market. In connection therewith, the Company notified the NASDAQ Capital Market on March 5, 2010 of its intention to delist and filed a Form 25 with the SEC on March 15, 2010, which became effective ten (10) days following its filing.

Following delisting from the NASDAQ Capital Market, the Company's common stock is quoted on the OTCQX over-the-counter market, a centralized electronic quotation service for over-the-counter securities, operated by Pink OTC Markets, Inc. The Company intends to continue to comply with OTCQX alternate reporting standards, including annual audited financial statements and unaudited quarterly financial statements beginning on or after July 1, 2010. The Company expects that its common stock will continue to trade on OTCQX so long as market makers demonstrate an interest in trading in the common stock and the Company maintains compliance with applicable rules and regulations.

Item 6. Exhibits.
