Form 10-Q
August 05, 2014

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
p ACT OF 1934**

FOR THE QUARTERLY PERIOD ENDED JUNE 30, 2014

OR

**..TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934**

FOR THE TRANSITION PERIOD FROM TO

COMMISSION FILE NUMBER: 814-00802

HORIZON TECHNOLOGY FINANCE CORPORATION

(Exact name of registrant as specified in its charter)

DELAWARE

27-2114934

Edgar Filing: Horizon Technology Finance Corp - Form 10-Q

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

312 Farmington Avenue

Farmington, CT

06032

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code (860) 676-8654

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer" and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller Reporting Company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of August 5, 2014, the Registrant had 9,622,420 shares of common stock, \$0.001 par value, outstanding.

- (1) All of the Company's investments are in entities which are domiciled in the United States and/or have a principal place of business in the United States.
- (2) Has been pledged as collateral under the Key Facility or 2013-1 Securitization.
- (3) All investments are less than 5% ownership of the class and ownership of the portfolio company. All interest is payable in cash due monthly in arrears, unless otherwise indicated, and applies only to the Company's debt investments. Interest rate is the annual interest rate on the debt investment and does not include ETP and any
- (4) additional fees related to the investments, such as deferred interest, commitment fees or prepayment fees. All debt investments are at fixed rates for the term of the loan, unless otherwise indicated. For each debt investment, the current interest rate in effect as of June 30, 2014 is provided.
- (5) Portfolio company is a public company.
- (6) For debt investments, represents principal balance less unearned income.
- (7) Preferred and common stock warrants, equity interests and other investments are non-income producing.
- (8) Debt is on non-accrual status at June 30, 2014 and is, therefore, considered non-income producing.
- (9) Value as a percent of net assets.
- The Company did not have any non-qualifying assets under Section 55(a) of the 1940 Act. Under the 1940 Act,
- (10) the Company may not acquire any non-qualifying assets unless, at the time the acquisition is made, qualifying assets represent at least 70% of the Company's total assets.
- ETPs are contractual fixed-interest payments due in cash at the maturity date of the applicable loan, including upon any prepayment, and are a fixed percentage of the original principal balance of the loan unless otherwise
- (11) noted. Interest will accrue during the life of the loan on each end-of-term payment and will be recognized as non-cash income until it is actually paid. Therefore, a portion of the incentive fee will be based on income that the Company has not yet received in cash.

(1) All of the Company's investments are in entities which are domiciled in the United States and/or have a principal place of business in the United States.

(2) Has been pledged as collateral under the Credit Facilities or 2013-1 Securitization.

(3) All investments are less than 5% ownership of the class and ownership of the portfolio company.

(4) All interest is payable in cash due monthly in arrears, unless otherwise indicated, and applies only to the Company's debt investments. Interest rate is the annual interest rate on the debt investment and does not include ETP and any additional fees related to the investments, such as deferred interest, commitment fees or prepayment fees. All debt

investments are at fixed rates for the term of the loan, unless otherwise indicated. For each debt investment, the current interest rate in effect as of December 31, 2013 is provided.

(5) Portfolio company is a public company .

(6) For debt investments, represents principal balance less unearned income.

(7) Preferred and common stock warrants, equity interests and other investments are non-income producing.

(8) Debt is on non-accrual status at December 31, 2013 and is, therefore, considered non-income producing.

(9) Value as a percent of net assets.

(10) The Company did not have any non-qualifying assets under Section 55(a) of the 1940 Act. Under the 1940 Act, the Company may not acquire any non-qualifying assets unless, at the time the acquisition is made, qualifying assets represent at least 70% of the Company's total assets.

(11) ETPs are contractual fixed-interest payments due in cash at the maturity date of the applicable loan, including upon any prepayment, and are a fixed percentage of the original principal balance of the loan unless otherwise noted. Interest will accrue during the life of the loan on each end-of-term payment and will be recognized as non-cash income until it is actually paid. Therefore, a portion of the incentive fee will be based on income that the Company has not yet received in cash.

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

Note 1. Organization

Horizon Technology Finance Corporation (the “Company”) was organized as a Delaware corporation on March 16, 2010 and is an externally managed, non-diversified, closed-end investment company. The Company has elected to be regulated as a business development company (“BDC”) under the Investment Company Act of 1940, as amended (the “1940 Act”). In addition, for tax purposes, the Company has elected to be treated as a regulated investment company (“RIC”) as defined under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). As a RIC, the Company generally is not subject to corporate-level federal income tax on the portion of its taxable income and capital gains the Company distributes to the stockholders. The Company primarily makes secured loans to development-stage companies in the technology, life science, healthcare information and services and cleantech industries. All of the Company’s debt investments consist of loans secured by all of, or a portion of, the applicable debtor company’s tangible and intangible assets.

On October 28, 2010, the Company completed an initial public offering (“IPO”) and its common stock trades on the NASDAQ Global Select Market under the symbol “HRZN.” The Company was formed to continue and expand the business of Compass Horizon Funding Company LLC (“CHF”), a Delaware limited liability company, which commenced operations in March 2008 and became the Company’s wholly owned subsidiary upon the completion of the IPO.

Horizon Credit I LLC (“Credit I”) was formed as a Delaware limited liability company on January 23, 2008, with CHF as the sole equity member. Credit I is a special purpose bankruptcy remote entity and is a separate legal entity from the Company and CHF. There has been no activity at Credit I during the six months ended June 30, 2014.

Horizon Credit II LLC (“Credit II”) was formed as a Delaware limited liability company on June 28, 2011, with the Company as the sole equity member. Credit II is a special purpose bankruptcy remote entity and is a separate legal entity from the Company. Any assets conveyed to Credit II are not available to creditors of the Company or any other entity other than Credit II’s lenders.

Horizon Credit III LLC (“Credit III”) was formed as a Delaware limited liability company on May 30, 2012, with the Company as the sole equity member. Credit III is a special purpose bankruptcy remote entity and is a separate legal entity from the Company. Any assets conveyed to Credit III are not available to creditors of the Company or any other entity other than Credit III’s lenders.

Longview SBIC GP LLC and Longview SBIC LP (collectively, “Horizon SBIC”) were formed as a Delaware limited liability company and Delaware limited partnership, respectively on February 11, 2011. Horizon SBIC are wholly owned subsidiaries of the Company and were formed in anticipation of obtaining a license to operate a small business investment company from the U. S. Small Business Administration (“SBA”). There has been no activity in Horizon SBIC since its inception.

The Company formed Horizon Funding 2013-1 LLC (“2013-1 LLC”) as a Delaware limited liability company on June 7, 2013 and Horizon Funding Trust 2013-1 (“2013-1 Trust” and, together with 2013-1 LLC, the “2013-1 Entities”) as a Delaware trust on June 18, 2013. The 2013-1 Entities are special purpose bankruptcy remote entities and are separate legal entities from the Company. The Company formed the 2013-1 Entities for purposes of securitizing \$189.3 million of secured loans and issuing fixed-rate asset-backed notes in an aggregate principal amount of \$90 million (the “Asset-Backed Notes”).

HPO Assets LLC (“HPO”) was formed as a Delaware limited liability company on January 21, 2014, with the Company as the sole equity member. HPO is a separate legal entity from the Company. HPO holds certain assets acquired in connection with the bankruptcy sale of the assets of PixelOptics, Inc.

HCP Assets LLC (“HCP”) was formed as a Delaware limited liability company on January 21, 2014, with the Company as the sole equity member. HCP is a separate legal entity from the Company. HCP was formed to take title to assets, if any, acquired by the Company in connection with the foreclosure or bankruptcy sale of the assets of Cereplast, Inc. and to then sell such assets. There has been no activity in HCP since its inception.

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

The Company's investment strategy is to maximize the investment portfolio's return by generating current income from the debt investments the Company makes and capital appreciation from the warrants the Company receives when making such debt investments. The Company has entered into an investment management agreement (the "Investment Management Agreement") with Horizon Technology Finance Management LLC ("HTFM" or the "Advisor"), under which the Advisor manages the day-to-day operations of, and provides investment advisory services to, the Company.

Note 2. Basis of Presentation and Significant Accounting Policies

The consolidated financial statements of the Company have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") and pursuant to the requirements for reporting on Form 10-Q and Article 6 or 10 of Regulation S-X. In the opinion of management, the consolidated financial statements reflect all adjustments and reclassifications that are necessary for the fair presentation of financial results as of and for the periods presented. All intercompany balances and transactions have been eliminated. The current period's results of operations are not necessarily indicative of results that ultimately may be achieved for the year. Therefore, the unaudited financial statements and notes should be read in conjunction with the audited financial statements and notes thereto for the year ended December 31, 2013.

Principles of Consolidation

As required under GAAP and Regulation S-X, the Company will generally consolidate its investment in a company that is an investment company subsidiary or a controlled operating company whose business consists of providing services to the Company. Accordingly, the Company consolidated the results of the Company's subsidiaries in its consolidated financial statements.

Use of Estimates

In preparing the consolidated financial statements in accordance with GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities, as of the date of the balance sheet and income and expenses for the period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the valuation of investments.

Fair Value

The Company records all of its investments at fair value in accordance with relevant GAAP, which establishes a framework used to measure fair value and requires disclosures for fair value measurements. The Company has categorized its investments carried at fair value, based on the priority of the valuation technique, into a three-level fair value hierarchy as more fully described in Note 5. Fair value is a market-based measure considered from the perspective of the market participant who holds the financial instrument rather than an entity specific measure. Therefore, when market assumptions are not readily available, the Company's own assumptions are set to reflect those that management believes market participants would use in pricing the financial instrument at the measurement date.

The availability of observable inputs can vary depending on the financial instrument and is affected by a wide variety of factors, including, for example, the type of product, whether the product is new, whether the product is traded on an active exchange or in the secondary market and the current market conditions. To the extent that the valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for financial instruments classified as Level 3.

See Note 5 for additional information regarding fair value.

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

Segments

The Company has determined that it has a single reporting segment and operating unit structure. The Company lends to and invests in portfolio companies in various technology, life science, healthcare information and services and cleantech industries. The Company separately evaluates the performance of each of its lending and investment relationships. However, because each of these loan and investment relationships has similar business and economic characteristics, they have been aggregated into a single lending and investment segment.

Investments

Investments are recorded at fair value. The Company's board of directors ("Board") determines the fair value of its portfolio investments. The Company has the intent to hold its loans for the foreseeable future or until maturity or payoff.

Interest on debt investments is accrued and included in income based on contractual rates applied to principal amounts outstanding. Interest income is determined using a method that results in a level rate of return on principal amounts outstanding. Generally, when a loan becomes 90 days or more past due, or if the Company otherwise does not expect to receive interest and principal repayments, the loan is placed on non-accrual status and the recognition of interest income is discontinued. Interest payments received on loans that are on non-accrual status are treated as reductions of principal until the principal is repaid. As of June 30, 2014, there was one investment on non-accrual status with a cost basis of \$3.0 million and a fair value of \$2.7 million. As of December 31, 2013, there were five investments on non-accrual status with an aggregate cost of \$23.2 million and an aggregate fair value of \$13.9 million.

The Company receives a variety of fees from borrowers in the ordinary course of conducting its business, including advisory fees, commitment fees, amendment fees, non-utilization fees, success fees and prepayment fees. In a limited number of cases, the Company may also receive a non-refundable deposit earned upon the termination of a transaction. Loan origination fees, net of certain direct origination costs, are deferred, and along with unearned income, are amortized as a level yield adjustment over the respective term of the loan. All other income is recorded

into income when earned. Fees for counterparty loan commitments with multiple loans are allocated to each loan based upon each loan's relative fair value. When a loan is placed on non-accrual status, the amortization of the related fees and unearned income is discontinued until the loan is returned to accrual status.

Certain loan agreements also require the borrower to make an end-of-term payment ("ETP") that is accrued into interest income over the life of the loan to the extent such amounts are expected to be collected. The Company will generally cease accruing the income if there is insufficient value to support the accrual or the Company does not expect the borrower to be able to pay all principal and interest due.

In connection with substantially all lending arrangements, the Company receives warrants to purchase shares of stock from the borrower. The warrants are recorded as assets at estimated fair value on the grant date using the Black-Scholes valuation model. The warrants are considered loan fees and are also recorded as unearned loan income on the grant date. The unearned income is recognized as interest income over the contractual life of the related loan in accordance with the Company's income recognition policy. Subsequent to loan origination, the fair value of the warrants is determined using the Black-Scholes valuation model. Any adjustment to fair value is recorded through earnings as net unrealized gain or loss on investments. Gains from the disposition of the warrants or stock acquired from the exercise of warrants are recognized as realized gains on investments.

Realized gains or losses on the sale of investments, or upon the determination that an investment balance or portion thereof is not recoverable, are calculated using the specific identification method. The Company measures realized gains or losses by calculating the difference between the net proceeds from the repayment or sale and the amortized cost basis of the investment. Net change in unrealized appreciation or depreciation reflects the change in the fair values of the Company's portfolio investments during the reporting period, including any reversal of previously recorded unrealized appreciation or depreciation, when gains or losses are realized.

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

Debt Issuance Costs

Debt issuance costs are fees and other direct incremental costs incurred by the Company in obtaining debt financing from its lenders and issuing debt securities. Debt issuance costs are recognized as assets and are amortized as interest expense over the term of the related debt financing. The unamortized balance of debt issuance costs as of June 30, 2014 and December 31, 2013, included in other assets, was \$3.1 million and \$5.1 million, respectively. The accumulated amortization balances as of June 30, 2014 and December 31, 2013 were \$2.3 million and \$2.0 million, respectively. The amortization expense for the six months ended June 30, 2014 and 2013 was \$2.0 million and \$0.4 million, respectively. On June 17, 2014, the Company terminated its term loan credit facility, the “Fortress Facility”, and accelerated \$1.1 million of unamortized debt issuance cost. The Company expects to incur no ongoing obligations or expenses in connection with the termination and prepayment of the Fortress Facility.

Income Taxes

As a BDC, the Company also has elected to be treated as a RIC under subchapter M of the Code and operates in a manner so as to qualify for the tax treatment applicable to RICs. In order to qualify as a RIC, among other things, the Company is required to meet certain source of income and asset diversification requirements and to timely distribute to its stockholders at least 90% of investment company taxable income, as defined by the Code, for each tax year. The Company, among other things, has made and intends to continue to make the requisite distributions to its stockholders, which will generally relieve the Company from U.S. federal income taxes.

Depending on the level of taxable income earned in a tax year, the Company may choose to carry forward taxable income in excess of current year dividend distributions into the next tax year and pay a 4% excise tax on such income, as required. To the extent that the Company determines that its estimated current year annual taxable income will be in excess of estimated current year dividend distributions, the Company accrues excise tax, if any, on estimated excess taxable income as taxable income is earned. For both the six months ended June 30, 2014 and 2013, \$0.1 million was recorded for U.S. federal excise tax.

The Company evaluates tax positions taken in the course of preparing the Company's tax returns to determine whether the tax positions are "more-likely-than-not" to be sustained by the applicable tax authority. Tax benefits of positions not deemed to meet the more-likely-than-not threshold, or uncertain tax positions, would be recorded as a tax expense in the current year. It is the Company's policy to recognize accrued interest and penalties related to uncertain tax benefits in income tax expense. The Company had no material uncertain tax positions at June 30, 2014 and December 31, 2013. The 2012, 2011 and 2010 tax years remain subject to examination by U.S. federal and state tax authorities.

Distributions

Distributions to common stockholders are recorded on the declaration date. The amount to be paid out is determined by the Board. Net realized long-term capital gains, if any, are distributed at least annually, although the Company may decide to retain such capital gains for investment.

The Company has adopted a dividend reinvestment plan that provides for reinvestment of cash distributions and other distributions on behalf of its stockholders, unless a stockholder elects to receive cash. As a result, if the Board authorizes, and the Company declares, a cash distribution, then stockholders who have not "opted out" of the dividend reinvestment plan will have their cash distributions automatically reinvested in additional shares of the Company's common stock, rather than receiving the cash distribution. The Company may use newly issued shares to implement the plan (especially if the Company's shares are trading at a premium to net asset value), or the Company may purchase shares in the open market to fulfill its obligations under the plan.

Transfers of Financial Assets

Assets related to transactions that do not meet Accounting Standards Codification ("ASC") Topic 860 — Transfers and Servicing requirements for accounting sale treatment are reflected in the Company's consolidated statements of financial condition as investments. Those assets are owned by special purpose entities that are consolidated in the Company's financial statements. The creditors of the special purpose entities have received security interests in such assets and such assets are not intended to be available to the creditors of the Company (or any affiliate of the Company).

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company — put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the transferor does not maintain effective control over the transferred assets through either (a) an agreement that both entitles and obligates the transferor to repurchase or redeem the assets before maturity or (b) the ability to unilaterally cause the holder to return specific assets, other than through a cleanup call.

New Accounting Pronouncement

In June 2013, FASB issued Accounting Standards Update 2013-08, *Financial Services — Investment Companies (Topic 946): Amendments to the Scope, Measurement and Disclosure Requirements*, or ASU 2013-08, containing new guidance on assessing whether an entity is an investment company, requiring non-controlling ownership interest in investment companies to be measured at fair value and requiring certain additional disclosures. This guidance is effective for annual and interim periods beginning on or after December 15, 2013. ASU 2013-08 did not have a material impact on the Company's consolidated financial position or disclosures.

Note 3. Related Party Transactions

Investment Management Agreement

On October 28, 2010, the Company entered into the Investment Management Agreement with the Advisor, which was renewed in August 2013, under which the Advisor manages the day-to-day operations of, and provides investment advisory services to, the Company. Under the terms of the Investment Management Agreement, the Advisor determines the composition of the Company's investment portfolio, the nature and timing of the changes to the investment portfolio and the manner of implementing such changes; identifies, evaluates and negotiates the structure of the investments the Company makes (including performing due diligence on the Company's prospective portfolio companies); and closes, monitors and administers the investments the Company makes, including the exercise of any

voting or consent rights.

The Advisor's services under the Investment Management Agreement are not exclusive to the Company, and the Advisor is free to furnish similar services to other entities so long as its services to the Company are not impaired. The Advisor is a registered investment adviser with the U.S. Securities and Exchange Commission (the "SEC"). The Advisor receives fees for providing services, consisting of two components, a base management fee and an incentive fee.

The base management fee under the Investment Management Agreement is calculated at an annual rate of 2.00% of the Company's gross assets, payable monthly in arrears. For purposes of calculating the base management fee, the term "gross assets" includes any assets acquired with the proceeds of leverage. The Advisor waived, \$0.1 million and \$0.2 million of base management fee, that the Advisor would have otherwise earned on cash held by the Company at the time of calculation, for the three and six months ended June 30, 2014, respectively. After giving effect of this waiver, the management fee payable at June 30, 2014 and December 31, 2013 was \$0.3 million and \$0.4 million, respectively. After giving effect to this waiver, the base management fee expense was \$1.1 million and \$1.3 million for the three months ended June 30, 2014 and 2013, respectively. After giving effect of this waiver, the base management fee expense was \$2.3 million and \$2.6 million for the six months ended June 30, 2014 and 2013, respectively.

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

The incentive fee has two parts, as follows:

The first part is calculated and payable quarterly in arrears based on the Company's pre-incentive fee net investment income for the immediately preceding calendar quarter. For this purpose, pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees (other than fees for providing managerial assistance), such as commitment, origination, structuring, diligence and consulting fees or other fees received from portfolio companies) accrued during the calendar quarter, minus operating expenses for the quarter (including the base management fee, expenses payable under the administration agreement (as defined below), and any interest expense and any dividends paid on any issued and outstanding preferred stock, but excluding the incentive fee). Pre-incentive fee net investment income includes, in the case of investments with a deferred interest feature (such as original issue discount, debt instruments with payment-in-kind interest and zero coupon securities), accrued income that the Company has not yet received in cash. The incentive fee with respect to the pre-incentive fee net income is 20.00% of the amount, if any, by which the pre-incentive fee net investment income for the immediately preceding calendar quarter exceeds a 1.75% (which is 7.00% annualized) hurdle rate and a "catch-up" provision measured as of the end of each calendar quarter. Under this provision, in any calendar quarter, the Advisor receives no incentive fee until the net investment income equals the hurdle rate of 1.75%, but then receives, as a "catch-up," 100.00% of the pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.1875%. The effect of this provision is that, if pre-incentive fee net investment income exceeds 2.1875% in any calendar quarter, the Advisor will receive 20.00% of the pre-incentive fee net investment income as if the hurdle rate did not apply.

Pre-incentive fee net investment income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Because of the structure of the incentive fee, it is possible that the Company may pay an incentive fee in a quarter in which the Company incurs a loss. For example, if the Company receives pre-incentive fee net investment income in excess of the quarterly minimum hurdle rate, the Company will pay the applicable incentive fee even if the Company has incurred a loss in that quarter due to realized and unrealized capital losses. The Company's net investment income used to calculate this part of the incentive fee is also included in the amount of the Company's gross assets used to calculate the 2.00% base management fee. These calculations are appropriately prorated for any period of less than three months and adjusted for any share issuances or repurchases during the current quarter.

The second part of the incentive fee is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Management Agreement, as of the termination date), and equals 20.00% of the Company's realized capital gains, if any, on a cumulative basis from the date of the election to be a BDC through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis through the end of such year, less all previous amounts paid in respect of the capital gain incentive fee.

There was no performance based incentive fee expense for the three months ended June 30, 2014. The performance based incentive fee expense was \$0.9 million for the three months ended June 30, 2013. The performance based incentive fee expense was \$0.4 million and \$1.6 million for the six months ended June 30, 2014 and 2013, respectively. There was no incentive fee payable as of June 30, 2014. The incentive fee payable as of December 31, 2013 was \$0.9 million. The entire incentive fee payable as of December 31, 2013 represents part one of the incentive fee.

Administration Agreement

The Company entered into an administration agreement (the "Administration Agreement") with the Advisor to provide administrative services to the Company. For providing these services, facilities and personnel, the Company will reimburse the Advisor for the Company's allocable portion of overhead and other expenses incurred by the Advisor in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions and the Company's allocable portion of the costs of compensation and related expenses of the Company's chief compliance officer and chief financial officer and their respective staffs. The administrative fee expense was \$0.3 million for both the three months ended June 30, 2014 and 2013. The administrative fee expense was \$0.5 million and \$0.6 million for the six months ended June 30, 2014 and 2013, respectively.

Note 5. Fair Value

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best determined based upon quoted market prices. However, in certain instances, there are no quoted market prices for certain assets or liabilities. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the asset or liability.

Fair value measurements focus on exit prices in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. If there has been a significant decrease in the volume and level of activity for the asset or liability, a change in valuation technique or the use of multiple valuation techniques may be appropriate. In such instances, determining the price at which willing market participants would transact at the measurement date under current market conditions depends on the facts and circumstances and requires the use of significant judgment.

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

The Company's fair value measurements are classified into a fair value hierarchy based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. The three categories within the hierarchy are as follows:

Level 1 Quoted prices in active markets for identical assets and liabilities.

Level 2 Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities in active markets, quoted prices in markets that are not active, and model-based valuation techniques for which all significant inputs are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Investments are valued at fair value as determined in good faith by the Board, based on input of management, the audit committee and independent valuation firms that have been engaged at the direction of the Board to assist in the valuation of each portfolio investment lacking a readily available market quotation at least once during a trailing twelve-month period under a valuation policy and a consistently applied valuation process. This valuation process is conducted at the end of each fiscal quarter, with 25% (based on fair value) of the Company's valuation of portfolio companies lacking readily available market quotations subject to review by an independent valuation firm.

Because there is not a readily available market value for most of the investments in its portfolio, the Company values substantially all of its portfolio investments at fair value as determined in good faith by the Board, as described herein. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of the Company's investments may fluctuate from period to period. Additionally, the fair value of the Company's investments may differ significantly from the values that would have been used had a ready market

existed for such investments and may differ materially from the values that the Company may ultimately realize. Further, such investments are generally subject to legal and other restrictions on resale or otherwise are less liquid than publicly traded securities. If the Company was required to liquidate a portfolio investment in a forced or liquidation sale, the Company could realize significantly less than the value at which the Company has recorded such portfolio investment.

Cash and interest receivable: The carrying amount is a reasonable estimate of fair value. These financial instruments are not recorded at fair value on a recurring basis and are categorized as Level 1 within the fair value hierarchy described above.

Money Market Funds: The carrying amounts are valued at their net asset value as of the close of business on the day of valuation. These financial instruments are recorded at fair value on a recurring basis and are categorized as Level 2 within the fair value hierarchy described above as these funds can be redeemed daily.

Debt Investments: For variable rate debt investments which re-price frequently and have no significant change in credit risk, carrying values are a reasonable estimate of fair values. The fair value of fixed rate debt investments is estimated by discounting the expected future cash flows using the year end rates at which similar debt investments would be made to borrowers with similar credit ratings and for the same remaining maturities. At June 30, 2014 and December 31, 2013, the hypothetical market yield used ranged from 9% to 18% and from 9% to 25%, respectively. Significant increases (decreases) in this unobservable input would result in a significantly lower (higher) fair value measurement. These assets are recorded at fair value on a recurring basis and are categorized as Level 3 within the fair value hierarchy described above.

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

Under certain circumstances, the Company may use an alternative technique to value debt investments that better reflects its fair value such as the use of multiple probability weighted cash flow models when the expected future cash flows contain elements of variability.

Warrant Investments: The Company values its warrants using the Black-Scholes valuation model incorporating the following material assumptions:

Underlying asset value of the issuer is estimated based on information available, including any information regarding the most recent rounds of borrower funding. Significant increases (decreases) in this unobservable input would result in a significantly higher (lower) fair value measurements.

Volatility, or the amount of uncertainty or risk about the size of the changes in the warrant price, is based on indices of publicly traded companies similar in nature to the underlying company issuing the warrant. A total of seven such indices are used. Significant increases (decreases) in this unobservable input would result in a significantly higher (lower) fair value investment.

The risk-free interest rates are derived from the U.S. Treasury yield curve. The risk-free interest rates are calculated based on a weighted average of the risk-free interest rates that correspond closest to the expected remaining life of the warrant.

Other adjustments, including a marketability discount on private company warrants, are estimated based on management's judgment about the general industry environment. Significant increases (decreases) in this unobservable input would result in significantly lower (higher) fair value measurement.

Historical portfolio experience on cancellations and exercises of the Company's warrants are utilized as the basis for determining the estimated time to exit of the warrants in each financial reporting period. Warrants may be exercised in the event of acquisitions, mergers or IPOs, and cancelled due to events such as bankruptcies, restructuring activities or additional financings. These events cause the expected remaining life assumption to be shorter than the contractual term of the warrants. Significant increases (decreases) in this unobservable input would result in significantly higher (lower) fair value measurement.

Under certain circumstances the Company may use an alternative technique to value warrants that better reflects the warrants' fair value, such as an expected settlement of a warrant in the near term or a model that incorporates a put feature associated with the warrant. The fair value may be determined based on the expected proceeds to be received from such settlement or based on the net present value of the expected proceeds from the put option.

The fair value of the Company's warrants held in publicly traded companies is determined based on inputs that are readily available in public markets or can be derived from information available in public markets. Therefore, the Company has categorized these warrants as Level 2 within the fair value hierarchy described above. The fair value of the Company's warrants held in private companies is determined using both observable and unobservable inputs and represents management's best estimate of what market participants would use in pricing the warrants at the measurement date. Therefore, the Company has categorized these warrants as Level 3 within the fair value hierarchy described above. These assets are recorded at fair value on a recurring basis.

Equity Investments: The fair value of an equity investment in a privately held company is initially the face value of the amount invested. The Company adjusts the fair value of equity investments in private companies upon the completion of a new third-party round of equity financing. The Company may make adjustments to fair value, absent a new equity financing event, based upon positive or negative changes in a portfolio company's financial or operational performance. Significant increases (decreases) in this unobservable input would result in a significantly higher (lower) fair value measurement. The Company has categorized these equity investments as Level 3 with the fair value hierarchy described above. The fair value of an equity investment in a publicly traded company is based upon the closing public share price on the date of measurement. Therefore, the Company has categorized these equity investments as Level 1 within the fair value hierarchy described above. These assets are recorded at fair value on a recurring basis.

Horizon Technology Finance Corporation and Subsidiaries**Notes to Consolidated Financial Statements****(In thousands, except shares and per share data)**

Other Investments: Other investments will be valued based on the facts and circumstances of the underlying agreement. The Company currently values one contractual agreement using a multiple probability weighted cash flow model as the contractual future cash flows contain elements of variability. Significant changes in the estimated cash flows and probability weightings would result in a significantly higher or lower fair value measurement. The Company has categorized this other investment as Level 3 within the fair value hierarchy described above. These assets are recorded at fair value on a recurring basis.

The following tables provide a summary of quantitative information about the Company's Level 3 fair value measurements of its investments as of June 30, 2014 and December 31, 2013. In addition to the techniques and inputs noted in the table below, according to the Company's valuation policy, the Company may also use other valuation techniques and methodologies when determining its fair value measurements.

The table below is not intended to be all-inclusive, but rather provides information on the significant Level 3 inputs as they relate to the Company's fair value measurements as of June 30, 2014:

June 30, 2014					
Investment Type	Fair Value	Valuation Techniques/ Methodologies	Unobservable Input	Range	Weighted Average
Debt investments	\$206,476	Discounted Expected Future Cash Flows	Hypothetical Market Yield	9% - 18%	11%
	2,721	Multiple Probability Weighted Cash Flow Model	Probability Weighting	33% - 67%	50%
Warrant investments	3,612	Black-Scholes Valuation Model	Price per share	\$0.0 – 63.98	\$10.24
			Average Industry Volatility		19%
			Marketability Discount	20%	11%

Edgar Filing: Horizon Technology Finance Corp - Form 10-Q

			Estimated Time to Exit	.25 to 9 years	2.56 years
Other investments	400	Multiple Probability Weighted Cash Flow Model	Discount Rate Probability Weighting	25% 100%	25% 100%
Equity investments	2,300	Most Recent Equity Investment	Price Per Share	\$0.19	\$0.19
	222	Market Comparable Companies	Price Per Share	\$0.57	\$0.57
Total Level 3 investments	\$215,731				

The table below is not intended to be all-inclusive, but rather provides information on the significant Level 3 inputs as they relate to the Company's fair value measurements as of December 31, 2013:

December 31, 2013					
Investment Type	Fair Value	Valuation Techniques/ Methodologies	Unobservable Input	Range	Weighted Average
Debt investments	\$199,815	Discounted Expected Future Cash Flows	Hypothetical Market Yield	9% - 25%	11%
	13,939	Multiple Probability Weighted Cash Flow Model	Probability Weighting	10% - 100%	67%
Warrant investments	4,579	Black-Scholes Valuation Model	Price per share Average Industry Volatility	\$0.0 – \$63.98 19%	\$5.64 19%
			Marketability Discount	20%	15%
			Estimated Time to Exit	1 to 10 years	3 years
Other investments	400	Multiple Probability Weighted Cash Flow Model	Discount Rate Probability Weighting	25% 100%	25% 100%
Equity investments	529	Most Recent Equity Investment	Price Per Share	\$1.09 – \$1.50	\$1.17
Total Level 3 investments	\$219,262				

Borrowings: The carrying amount of borrowings under the Credit Facilities (as defined in Note 6) approximates fair value due to the variable interest rate of the Credit Facilities and are categorized as Level 2 within the fair value hierarchy described above. Additionally, the Company considers its creditworthiness in determining the fair value of

such borrowings. The fair value of the fixed rate 2019 Notes (as defined in Note 6) is based on the closing public share price on the date of measurement. At June 30, 2014, the 2019 Notes were trading on the New York Stock Exchange for \$25.84 per note, or \$34.1 million. Therefore, the Company has categorized this borrowing as Level 1 within the fair value hierarchy described above. Based on market quotations on June 30, 2014, the Asset-Backed Notes (as defined in Note 6) were trading at par value, or \$64.5 million, and are categorized as Level 3 within the fair value hierarchy described above. These liabilities are not recorded at fair value on a recurring basis.

Horizon Technology Finance Corporation and Subsidiaries**Notes to Consolidated Financial Statements****(In thousands, except shares and per share data)**

Off-Balance-Sheet Instruments: Fair values for off-balance-sheet lending commitments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standings. Therefore, the Company has categorized these instruments as Level 3 within the fair value hierarchy described above.

The following tables detail the assets and liabilities that are carried at fair value and measured at fair value on a recurring basis as of June 30, 2014 and December 31, 2013 and indicate the fair value hierarchy of the valuation techniques utilized by the Company to determine the fair value:

	June 30, 2014			
	Total	Level 1	Level 2	Level 3
Money market funds	\$9,582	\$ —	\$9,582	\$—
Restricted investments in money market funds	\$4,840	\$ —	\$4,840	\$—

Level 3 assets, end of period	\$237,871	\$ 5,150	\$ 529	\$ 2,100	\$245,650

The Company's transfers between levels are recognized at the end of each reporting period. During the three months ended June 30, 2013, there were no transfers between Level 1 and Level 2. The transfer out of Level 3 relates to warrants held in one portfolio company, with a fair value of \$0.1 million, that were transferred into Level 2 due to the portfolio company becoming a public company during the three months ended June 30, 2013. Because the fair value of warrants held in publicly traded companies is determined based on inputs that are readily available in public markets or can be derived from information available in public markets, the Company has categorized the warrants as Level 2 within the fair value hierarchy described above as of June 30, 2013.

The following table shows a reconciliation of the beginning and ending balances for Level 3 assets measured at fair value on a recurring basis for the six months ended June 30, 2014:

	Six Months Ended June 30, 2014				Total
	Debt Investments	Warrant Investments	Equity Investments	Other Investments	
Level 3 assets, beginning of period	\$213,754	\$ 4,579	\$ 529	\$ 400	\$219,262

Level 3 assets, end of period	\$209,197	\$ 3,612	\$ 2,522	\$ 400	\$215,731

The Company's transfers between levels are recognized at the end of each reporting period. During the six months ended June 30, 2014, there were no transfers between Level 1 and Level 2. The transfer out of Level 3 relates to warrants held in two portfolio companies and equity held in one portfolio company, with an aggregate fair value of \$0.4 million, that were transferred into Level 2 upon the portfolio companies becoming public companies during the period. Because the fair value of warrants and equity held in publicly traded companies is determined based on inputs that are readily available in public markets or can be derived from information available in public markets, the Company has categorized the warrants and equity as Level 2 within the fair value hierarchy described above as of June 30, 2014. During the six months ended June 30, 2014, there was one transfer between debt investments and equity investments. The transfer out of debt investments relates to the settlement of one of the Company's debt investments for a cash payment of \$2.7 million and \$2.3 million in newly issued preferred stock of the applicable portfolio company.

Horizon Technology Finance Corporation and Subsidiaries**Notes to Consolidated Financial Statements****(In thousands, except shares and per share data)**

The change in unrealized appreciation included in the consolidated statement of operations attributable to Level 3 investments still held at June 30, 2014 includes \$0.1 million in unrealized appreciation for both loans and other investments, \$0.1 million in unrealized depreciation on warrants and \$0.2 million in unrealized depreciation on equity.

The following table shows a reconciliation of the beginning and ending balances for Level 3 assets measured at fair value on a recurring basis for the six months ended June 30, 2013:

	Six Months Ended June 30, 2013				Total
	Debt Investments	Warrant Investments	Equity Investments	Other Investments	
Level 3 assets, beginning of period	\$220,297	\$ 4,914	\$ 526	\$ 2,100	\$227,837

Level 3 assets, end of period	\$237,871	\$ 5,150	\$ 529	\$ 2,100	\$245,650

The Company's transfers between levels are recognized at the end of each reporting period. During the six months ended June 30, 2013, there were no transfers between Level 1 and Level 2. The transfer out of Level 3 relates to warrants held in one portfolio company, with a fair value of \$0.1 million, that were transferred into Level 2 due to the portfolio company becoming a public company during the six months ended June 30, 2013. Because the fair value of warrants held in publicly traded companies is determined based on inputs that are readily available in public markets or can be derived from information available in public markets, the Company has categorized the warrants as Level 2 within the fair value hierarchy described above as of June 30, 2013.

The Company discloses fair value information about financial instruments, whether or not recognized in the statement of assets and liabilities, for which it is practicable to estimate that value. Certain financial instruments are excluded from the disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

The fair value amounts have been measured as of the reporting date, and have not been reevaluated or updated for purposes of these financial statements subsequent to that date. As such, the fair values of these financial instruments subsequent to the reporting date may be different than amounts reported.

As of June 30, 2014 and December 31, 2013, the recorded balances equaled fair values of all the Company's financial instruments, except for the Company's 2019 Notes, as previously described.

Off-balance-sheet instruments

The Company assumes interest rate risk (the risk that general interest rate levels will change) as a result of its normal operations. As a result, the fair values of the Company's financial instruments will change when interest rate levels change, and that change may be either favorable or unfavorable to the Company. Management attempts to match maturities of assets and liabilities to the extent believed necessary to minimize interest rate risk. Management monitors rates and maturities of assets and liabilities and attempts to minimize interest rate risk by adjusting terms of new loans and by investing in securities with terms that mitigate the Company's overall interest rate risk.

Horizon Technology Finance Corporation and Subsidiaries**Notes to Consolidated Financial Statements****(In thousands, except shares and per share data)****Note 6. Borrowings**

A summary of the Company's borrowings as of June 30, 2014 and December 31, 2013 is as follows:

	June 30, 2014			December 31, 2013		
	Total Commitment	Balance Outstanding	Unused Commitment	Total Commitment	Balance Outstanding	Unused Commitment
Asset-Backed Notes	\$64,536	\$ 64,536	\$ —	\$79,343	\$ 79,343	\$ —
Fortress Facility	—	—	—	75,000	10,000	65,000
Key Facility	50,000	10,000	40,000	50,000	—	50,000
2019 Notes	33,000	33,000	—	33,000	33,000	—
Total	\$147,536	\$ 107,536	\$ 40,000	\$237,343	\$ 122,343	\$ 115,000

In accordance with the 1940 Act, with certain limited exceptions, the Company is only allowed to borrow amounts such that the Company's asset coverage, as defined in the 1940 Act, is at least 200% after such borrowings. As of June 30, 2014, the asset coverage ratio for borrowed amounts was 227%.

On November 4, 2013, the Company renewed and amended the revolving credit facility ("Wells Facility") previously administered by Wells Fargo Capital Finance LLC ("Wells") and facilitated the assignment of all rights and obligations of Wells under the Wells Facility to Key Equipment Finance ("Key") (referred to herein as the "Key Facility"). The Key Facility has an accordion feature which allows for an increase in the total loan commitment to \$150 million from the current \$50 million commitment provided by Key. The Key Facility is collateralized by all loans and warrants held by Credit II and permits an advance rate of up to 50% of eligible loans held by Credit II. The Key Facility contains covenants that, among other things, require the Company to maintain a minimum net worth and to restrict the loans securing the Key Facility to certain criteria for qualified loans and includes portfolio company concentration limits as defined in the related loan agreement. The Key Facility has a three-year revolving period followed by a two-year amortization period and matures on November 4, 2018. The interest rate is based upon the one-month London Interbank Offered Rate, or LIBOR, plus a spread of 3.25%, with a LIBOR floor of 0.75%. The rate at June 30, 2014 and December 31, 2013 was 4.00%. As of June 30, 2014, the Company had borrowing capacity of \$40.0 million of which \$30.0 million was available, subject to existing terms and advance rates.

On March 23, 2012, the Company issued and sold an aggregate principal amount of \$30 million of 7.375% senior unsecured notes due in 2019, and, on April 18, 2012, pursuant to the underwriters' 30 day option to purchase additional notes, the Company sold an additional \$3 million of such notes (collectively, the "2019 Notes"). The 2019 Notes will mature on March 15, 2019 and may be redeemed in whole or in part at the Company's option at any time or from time to time on or after March 15, 2015 at a redemption price of \$25 per security plus accrued and unpaid interest. The 2019 Notes bear interest at a rate of 7.375% per year payable quarterly on March 15, June 15, September 15 and December 15 of each year. The 2019 Notes are the Company's direct unsecured obligations and (i) rank equally in right of payment with the Company's future senior unsecured indebtedness; (ii) are senior in right of payment to any of the Company's future indebtedness that expressly provides it is subordinated to the 2019 Notes; (iii) are effectively subordinated to all of the Company's existing and future secured indebtedness (including indebtedness that is initially unsecured to which the Company subsequently grants security), to the extent of the value of the assets securing such indebtedness and (iv) are structurally subordinated to all existing and future indebtedness and other obligations of any of the Company's subsidiaries. As of June 30, 2014, the Company was in material compliance with the terms of the 2019 Notes. The 2019 Notes are listed on the New York Stock Exchange under the symbol "HTF."

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

The Company entered into its Fortress Facility (together with the Key Facility, the “Credit Facilities”) with Fortress Credit Co LLC (“Fortress”) effective August 23, 2012. The Fortress Facility was collateralized by all loans and warrants held by Credit III. The Fortress Facility contained covenants that, among other things, required the Company to maintain a minimum net worth and restricted the loans securing the Fortress Facility to certain criteria for qualified loans and includes portfolio company concentration limits as defined in the related loan agreement. The Fortress Facility, among other things, had a three-year term subject to two one-year extensions with a draw period of up to four years. The Fortress Facility required the payment of an unused line fee in an amount equal to 1.00% of unborrowed amounts available under the facility annually and had an effective advance rate of 66% against eligible loans. The Fortress Facility bore interest based upon the one-month LIBOR plus a spread of 6.00%, with a LIBOR floor of 1.00%. The rate at December 31, 2013 was 7.00%, and the average rate for the three and six months ended June 30, 2014 and 2013 was 7.00%.

Effective June 17, 2014, the Company terminated the Fortress Facility. In connection therewith, a loan and security agreement and other related documents governing the Fortress Facility were also terminated. As such, the Company had no borrowing capacity under the Fortress Facility as of June 30, 2014. Upon termination of the Fortress Facility, the Company accelerated into interest expense \$1.1 million of unamortized debt issuance costs and paid a \$0.8 million prepayment fee. The Company expects to incur no ongoing obligations or expenses in connection with the termination and prepayment of the Fortress Facility.

On June 28, 2013, the Company completed a \$189.3 million securitization of secured loans which it originated. 2013-1 Trust, a wholly owned subsidiary of the Company, issued \$90 million in the Asset-Backed Notes, which are rated A2(sf) by Moody’s Investors Service, Inc. The Company is the sponsor, originator and servicer for the transaction. The Asset-Backed Notes bear interest at a fixed rate of 3.00% per annum and have a stated maturity of May 15, 2018.

The Asset-Backed Notes were issued by 2013-1 Trust pursuant to a note purchase agreement (the “Note Purchase Agreement”), dated as of June 28, 2013, by and among the Company, 2013-1 LLC, as trust depositor, 2013-1 Trust and Guggenheim Securities, LLC (“Guggenheim Securities”), as initial purchaser, and are backed by a pool of loans made to certain portfolio companies of the Company and secured by certain assets of such portfolio companies. The pool of loans is to be serviced by the Company. In connection with the issuance and sale of the Asset-Backed Notes, the Company has made customary representations, warranties and covenants in the Note Purchase Agreement. The Asset-Backed Notes are secured obligations of 2013-1 Trust and are non-recourse to the Company.

As part of the transaction, the Company entered into a sale and contribution agreement, dated as of June 28, 2013 (the “Sale and Contribution Agreement”), with 2013-1 LLC, pursuant to which the Company has agreed to sell or has contributed to 2013-1 LLC certain secured loans made to certain portfolio companies of the Company (the “Loans”). The Company has made customary representations, warranties and covenants in the Sale and Contribution Agreement with respect to the Loans as of the date of the transfer of the Loans to 2013-1 LLC. The Company has also entered into a sale and servicing agreement, dated as of June 28, 2013 (the “Sale and Servicing Agreement”), with 2013-1 LLC and 2013-1 Trust pursuant to which 2013-1 LLC has agreed to sell or has contributed the Loans to 2013-1 Trust. The Company has made customary representations, warranties and covenants in the Sale and Servicing Agreement. The Company will also serve as administrator to 2013-1 Trust pursuant to an administration agreement, dated as of June 28, 2013, with 2013-1 Trust, Wilmington Trust, National Association, and U.S. Bank National Association. 2013-1 Trust also entered into an indenture, dated as of June 28, 2013, which governs the Asset-Backed Notes and includes customary covenants and events of default. In addition, 2013-1 LLC entered into an amended and restated trust agreement, dated as of June 28, 2013, which includes customary representations, warranties and covenants. The Asset-Backed Notes were sold through an unregistered private placement to “qualified institutional buyers” in compliance with the exemption from registration provided by Rule 144A under the Securities Act of 1933, as amended (the “Securities Act”), and to institutional “accredited investors” (as defined in Rule 501(a)(1), (2), (3) or (7) under the Securities Act) who, in each case, are “qualified purchasers” for purposes of Section 3(c)(7) under the 1940 Act.

On June 3, 2013, the Company and Guggenheim Securities entered into a promissory note (the “Promissory Note”) whereby Guggenheim Securities made a term loan to the Company in the aggregate principal amount of \$15 million (the “Term Loan”). The Company granted Guggenheim Securities a security interest in all of its assets to secure the Term Loan. On June 28, 2013, the Company used a portion of the proceeds of the private placement of the Asset-Backed Notes to repay all of its outstanding obligations under the Term Loan and the security interest of Guggenheim Securities was released.

Horizon Technology Finance Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(In thousands, except shares and per share data)

Under the terms of the Asset-Backed Notes, the Company is required to maintain a reserve cash balance, funded through principal collections from the underlying securitized debt portfolio, which may be used to make monthly interest and principal payments on the Asset-Backed Notes. The Company has segregated these funds and classified them as restricted investments in money market funds on the Consolidated Statement of Assets and Liabilities. The balance of restricted investments in money market funds was \$4.8 million and \$6.0 million as of June 30, 2014 and December 31, 2013, respectively.

Note 7. Financial Instruments with Off-Balance-Sheet Risk

In the normal course of business, the Company is party to financial instruments with off-balance-sheet risk to meet the financing needs of its borrowers. These financial instruments include commitments to extend credit and involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated statement of assets and liabilities. The Company attempts to limit its credit risk by conducting extensive due diligence and obtaining collateral where appropriate.

The balance of unfunded commitments to extend credit was \$9.0 million as of both June 30, 2014 and December 31, 2013. Commitments to extend credit consist principally of the unused portions of commitments that obligate the Company to extend credit, such as revolving credit arrangements or similar transactions. Commitments may also include a financial or non-financial milestone that has to be achieved before the commitment can be drawn. Commitments generally have fixed expiration dates or other termination clauses. Since commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

Note 8. Concentrations of Credit Risk

The Company's debt investments consist primarily of loans to development-stage companies at various stages of development in the technology, life science, healthcare information and services and cleantech industries. Many of these companies may have relatively limited operating histories and also may experience variation in operating results. Many of these companies conduct business in regulated industries and could be affected by changes in

government regulations. Most of the Company's borrowers will need additional capital to satisfy their continuing working capital needs and other requirements, and in many instances, to service the interest and principal payments on the loans.

The largest loans may vary from period to period as new loans are recorded and repaid. The Company's five largest loans represented 23% and 22% of total loans outstanding as of June 30, 2014 and December 31, 2013, respectively. No single loan represented more than 10% of the total loans as of June 30, 2014 and December 31, 2013. Investment income, consisting of interest and fees, can fluctuate significantly upon repayment of large loans. Interest income from the five largest loans accounted for 20% and 22% of total interest income on investments for the three months ended June 30, 2014 and 2013, respectively. Interest income from the five largest loans accounted for 18% and 23% of total interest income and fee income on investments for the six months ended June 30, 2014 and 2013, respectively.

Horizon Technology Finance Corporation and Subsidiaries**Notes to Consolidated Financial Statements****(In thousands, except shares and per share data)****Note 9. Distributions**

The Company's distributions are recorded on the record date. The following table summarizes the Company's distribution activity for the period ended June 30, 2014 and for the years ended December 31, 2013 and 2012:

8/7/12	8/17/12	8/31/12	0.450	4,105	11,608	193
5/3/12	5/17/12	5/31/12	0.450	3,402	2,299	37
3/12/12	3/23/12	3/30/12	0.450	3,378	3,517	58
			\$ 2.145	\$ 18,321	28,913	\$ 457

On August 1, 2014, the Board declared monthly distributions per share, payable as set forth in the table below.

Record Dates	Payment Dates	Distributions Declared
November 19, 2014	December 15, 2014	\$ 0.115
October 20, 2014	November 17, 2014	\$ 0.115
September 18, 2014	October 15, 2014	\$ 0.115

After paying second quarter distributions of \$0.345 per share and earning \$0.19 per share for the second quarter, the Company's undistributed spillover income carried over from 2013 is \$0.42 per share. Spillover income includes any ordinary income and net capital gains from the preceding years that were not distributed during such years.

Horizon Technology Finance Corporation and Subsidiaries**Notes to Consolidated Financial Statements****(In thousands, except shares and per share data)****Note 10. Financial Highlights**

Per share market value, end of period	\$ 14.62		\$ 13.74	
Total return based on market value ⁽²⁾	7.7	%	(3.3)%
Shares outstanding at end of period	9,621,636		9,580,446	
Ratios to average net assets:				
Expenses without incentive fees ⁽⁴⁾	16.7	% ⁽³⁾	11.3	% ⁽³⁾
Incentive fees	0.6	% ⁽³⁾	2.2	% ⁽³⁾
Total expenses ⁽⁴⁾	17.3	% ⁽³⁾	13.5	% ⁽³⁾
Net investment income with incentive fees ⁽⁴⁾	6.3	% ⁽³⁾	8.8	% ⁽³⁾
Net assets at the end of the period	\$ 136,935		\$ 142,687	
Average net assets value	\$ 136,850		\$ 144,139	
Average borrowings per share	\$ 12.11		\$ 10.38	
Portfolio turnover ratio	20.3	%	24.5	%

(1) Distributions are determined based on taxable income calculated in accordance with income tax regulations, which may differ from amounts determined under GAAP due to (i) changes in unrealized appreciation and depreciation,

(ii) temporary and permanent differences in income and expense recognition, and (iii) the amount of spillover income carried over from a given year for distribution in the following year. The final determination of taxable income for each tax year, as well as the tax attributes for distributions in such tax year, will be made after the close of the tax year.

The total return for the six months ended June 30, 2014 and 2013 equals the change in the ending market value (2) over the beginning of period price per share plus distributions paid per share during the period, divided by the beginning price.

(3) Annualized.

During the six months ended June 30, 2014, the Advisor waived \$0.2 million of base management fee and \$0.1 million of incentive fee. Had these expenses not been waived, the ratio of expenses without incentive fee to average net assets, the ratio of total expenses to average net assets and the ratio of net investment income with incentive fee to average net assets would have been 16.9%, 17.5% and 6.3%, respectively.

Note 11. Subsequent Events

On August 1, 2014, the Company and its Advisor, renewed the Investment Management Agreement dated October 28, 2010, by and between the Company and the Advisor, and amended the Investment Management Agreement, effective July 1, 2014. The amendments to the Investment Management Agreement (i) remove cash and cash equivalents from gross assets when calculating the base management fee payable to the Advisor under Section 3(a) of the Investment Management Agreement and (ii) place a fee cap and deferral mechanism on part one of the incentive fee payable to the Advisor under Section 3(b)(i) of the Investment Management Agreement.

On July 16, 2014, the Company filed a Management Assessment Questionnaire with the SBA as the first step in the Small Business Investment Company license process.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

In this quarterly report on Form 10-Q, except where the context suggests otherwise, the terms "we," "us," "our" and "Horizon Technology Finance" refer to Horizon Technology Finance Corporation and its consolidated subsidiaries. The information contained in this section should be read in conjunction with our consolidated financial statements and related notes thereto appearing elsewhere in this quarterly report on Form 10-Q. Amounts are stated in thousands, except shares and per share data and where otherwise noted.

Forward-Looking Statements

This quarterly report on Form 10-Q, including the Management's Discussion and Analysis of Financial Condition and Results of Operations, contains statements that constitute forward-looking statements, which relate to future events or our future performance or financial condition. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about our industry, our beliefs and our assumptions. The forward-looking statements contained in this quarterly report on Form 10-Q involve risks and uncertainties, including statements as to:

- our future operating results, including the performance of our existing loans and warrants;
- the introduction, withdrawal, success and timing of business initiatives and strategies;

• changes in political, economic or industry conditions, the interest rate environment or financial and capital markets, which could result in changes in the value of our assets;

• the relative and absolute investment performance and operations of our investment advisor, Horizon Technology Management LLC, or the Advisor;

• the ability of our Advisor to attract and retain highly talented professionals and to operate effectively at existing staffing levels;

- the impact of increased competition;
- the impact of investments we intend to make and future acquisitions and divestitures;

- the unfavorable resolution of legal proceedings;
- our business prospects and the prospects of our portfolio companies;
- the impact, extent and timing of technological changes and the adequacy of intellectual property protection;
 - our regulatory structure and tax status;
- our ability to qualify and maintain qualification as a RIC and as a business development company;
 - the adequacy of our cash resources and working capital;
 - the timing of cash flows, if any, from the operations of our portfolio companies;
- the impact of interest rate volatility on our results, particularly if we use leverage as part of our investment strategy;
 - the ability of our portfolio companies to achieve their objective;
- our ability to cause a subsidiary to become a licensed Small Business Investment Company;
- the impact of legislative and regulatory actions and reforms and regulatory supervisory or enforcement actions of government agencies relating to us or our Advisor;
 - our contractual arrangements and relationships with third parties;
 - our ability to access capital and any future financings by us; and
 - the impact of changes to tax legislation and, generally, our tax position.

We use words such as “anticipates,” “believes,” “expects,” “intends,” “seeks” and similar expressions to identify forward-looking statements. Undue influence should not be placed on the forward looking statements as our actual results could differ materially from those projected in the forward-looking statements for any reason, including the factors in “Risk Factors” and elsewhere in our annual report on Form 10-K for the year ended December 31, 2013, and elsewhere in this quarterly report on Form 10-Q.

We have based the forward-looking statements included in this report on information available to us on the date of this report, and we assume no obligation to update any such forward-looking statements. Although we undertake no obligation to revise or update any forward-looking statements in this quarterly report on Form 10-Q, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make directly to you or through reports that we in the future may file with the U.S. Securities and Exchange Commission, or the SEC, including, periodic reports on Form 10-Q and Form 10-K and current reports on Form 8-K.

Overview

We are a specialty finance company that lends to and invests in development-stage companies in the technology, life science, healthcare information and services and cleantech industries, which we refer to as our “Target Industries.” Our investment objective is to generate current income from the loans we make and capital appreciation from the warrants we receive when making such loans. We make secured loans, which we refer to as “Venture Loans,” to companies backed by established venture capital and private equity firms in our Target Industries, which we refer to as “Venture Lending.” We also selectively lend to publicly traded companies in our Target Industries.

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company, or BDC, under the Investment Company Act of 1940, as amended, or the 1940 Act. In addition, for U.S. federal income tax purposes, we have elected to be treated as a regulated investment company, or RIC, under Subchapter M of the Internal Revenue Code of 1986, as amended, or the Code. As a BDC, we are required to comply with regulatory requirements, including limitations on our use of debt. We are permitted to, and expect to, finance our investments through borrowings. However, as a BDC, we are only generally allowed to borrow amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after such borrowing. The amount of leverage that we employ depends on our assessment of market conditions and other factors at the time of any proposed borrowing. As a RIC, we generally do not have to pay corporate-level federal income taxes on our investment company taxable income and net capital gain that we distribute to our stockholders as long as we meet certain source-of-income, distribution, asset diversification and other requirements.

Compass Horizon Funding Company LLC, or Compass Horizon, our predecessor company, commenced operations in March 2008. We were formed in March 2010 for the purpose of acquiring Compass Horizon and continuing its business as a public entity.

Our investment activities, and our day-to-day operations, are managed by the Advisor and supervised by our board of directors, or the Board, of which a majority of the members are independent of us. Under an investment management agreement, or the Investment Management Agreement, we have agreed to pay the Advisor a base management fee and an incentive fee for its advisory services to us. We have also entered into an administration agreement, or the Administration Agreement, with the Advisor under which we have agreed to reimburse the Advisor for our allocable portion of overhead and other expenses incurred by the Advisor in performing its obligations under the Administration Agreement.

Portfolio Composition and Investment Activity

The following table shows our portfolio by asset class as of June 30, 2014 and December 31, 2013:

	June 30, 2014				December 31, 2013			
	# of Investments	Fair Value	Percentage of Total Portfolio		# of Investments	Fair Value	Percentage of Total Portfolio	
Term loans	48	\$197,263	90.0	%	48	\$201,846	91.2	%
Revolving loans	1	11,934	5.4		1	11,908	5.4	
Total loans	49	209,197	95.4		49	213,754	96.6	
Warrants	75	6,347	2.9		73	6,036	2.7	
Other investments	1	400	0.2		1	400	0.2	
Equity	4	3,351	1.5		3	1,094	0.5	
Total		\$219,295	100.0	%		\$221,284	100.0	%

Total portfolio investment activity for the three and six months ended June 30, 2014 and 2013 was as follows:

	For the Three Months Ended		For the Six Months Ended	
	June 30, 2014	2013	June 30, 2014	2013
Beginning portfolio	\$ 228,560	\$ 247,781	\$ 221,284	\$ 228,613
New loan funding	26,052	29,143	43,978	57,643
Less refinanced balances	—	—	—	—
Net new loan funding	26,052	29,143	43,978	57,643
Principal payments received on investments	(9,860)	(8,695)	(21,633)	(18,657)
Early pay-offs and recoveries	(25,856)	(19,278)	(25,856)	(19,278)
Accretion of loan fees	657	753	1,063	1,301
New loan fees	(325)	(368)	(505)	(688)
New equity	12	—	12	73
Sale of investments	(610)	(39)	(1,330)	(39)
Net realized loss on investments	(632)	(45)	(7,545)	(62)
Net unrealized appreciation (depreciation) on investments	1,297	(2,391)	9,827	(1,972)
Other	—	—	—	(73)
Ending Portfolio	\$ 219,295	\$ 246,861	\$ 219,295	\$ 246,861

We receive payments in our loan portfolio based on scheduled amortization of the outstanding balances. In addition, we receive repayments of some of our loans prior to their scheduled maturity date. The frequency or volume of these repayments may fluctuate significantly from period to period.

The following table shows our loan portfolio by industry sector as of June 30, 2014 and December 31, 2013:

	June 30, 2014		December 31, 2013		
	Loans at Fair Value	Percentage of Total Portfolio	Loans at Fair Value	Percentage of Total Portfolio	
Life Science					
Biotechnology	\$13,445	6.4	% \$16,376	7.7	%
Medical Device	19,392	9.3	14,765	6.9	
Technology					
Communications	19,323	9.2	9,359	4.4	
Consumer-Related Technologies	1,948	0.9	—	—	
Internet and Media	4,742	2.3	6,019	2.8	
Networking	983	0.5	963	0.5	
Power Management	—	—	13,044	6.1

Energy Efficiency	6,308	3.0	11,403	5.3	
Waste Recycling	—	—	680	0.3	
Healthcare Information and Services					
Diagnostics	14,875	7.1	12,140	5.7	
Other Healthcare Related Services	6,925	3.3	6,904	3.2	
Software	6,317	3.0	6,297	3.0	
Total	\$209,197	100.0	% \$213,754	100.0	%

The largest loans may vary from year to year as new loans are originated and existing loans are repaid. Our five largest loans represented 23% and 22% of total loans outstanding as of June 30, 2014 and December 31, 2013, respectively. No single loan represented more than 10% of our total loans as of June 30, 2014 and December 31, 2013.

Loan Portfolio Asset Quality

We use an internal credit rating system which rates each loan on a scale of 4 to 1, with 4 being the highest credit quality rating and 3 being the rating for a standard level of risk. A rating of 2 represents an increased level of risk and while no loss is currently anticipated for a 2-rated loan, there is potential for future loss of principal. A rating of 1 represents a deteriorating credit quality and increased risk. Our internal credit rating system is not a national credit rating system. The following table shows the classification of our loan portfolio by credit rating as of June 30, 2014 and December 31, 2013:

Edgar Filing: Horizon Technology Finance Corp - Form 10-Q

	June 30, 2014		December 31, 2013		
	Loans at	Percentage	Loans at	Percentage	
	Fair	of Loan	Fair	of Loan	
	Value	Portfolio	Value	Portfolio	
Credit Rating					
4	\$30,767	14.7	% \$30,385	14.2	%
3	165,386	79.1	167,231	78.3	
2	10,323	4.9	2,199	1.0	
1	2,721	1.3	13,939	6.5	
Total	\$209,197	100.0	% \$213,754	100.0	%

As of June 30, 2014 and December 31, 2013, our loan portfolio had a weighted average credit rating of 3.1 and 3.0, respectively. As of June 30, 2014, there was one investment with an internal credit rating of 1, with a cost of \$3.0 million and a fair value of \$2.7 million. As of December 31, 2013, there were five investments with an internal credit rating of 1, with an aggregate cost of \$23.2 million and an aggregate fair value of \$13.9 million.

The reduction in the number and value of 1-rated credits during the six-months ended June 30, 2014 was primarily due to the settlement of four investments, with an aggregate cost of \$22.5 million and an aggregate fair value of \$14.9 million.

As of June 30, 2014, there were two investments with an internal credit rating of 2, with an aggregate cost and fair value of \$10.3 million. As of December 31, 2013, there was one investment with an internal credit rating of 2, with a cost and fair value of \$2.2 million.

The increase in the number and value of 2-rated credits during the six months ended June 30, 2014 was primarily due to the downgrade of two investments, with an aggregate cost and fair value of \$10.3 million, from an internal credit rating of 3, partially offset by the upgrade of one investment, with a cost and fair value of \$2.2 million.

Consolidated Results of Operations

As a BDC and a RIC, we are subject to certain constraints on our operations, including limitations imposed by the 1940 Act and the Code. The consolidated results of operations described below may not be indicative of the results we report in future periods.

Consolidated results of operations for the three months ended June 30, 2014 and 2013 were as follows:

	For the Three Months Ended	
	June 30, 2014	2013
Total investment income	\$ 8,697	\$ 8,787
Total expenses	6,821	5,106
Net investment income before excise tax	1,876	3,681
Provision for excise tax	(40)	(80)
Net investment income	1,836	3,601
Net realized loss on investments	(630)	(62)
Net unrealized appreciation (depreciation) on investments	1,229	(2,391)
Net increase in net assets resulting from operations	\$ 2,435	\$ 1,148
Average debt investments, at fair value	\$ 211,582	\$ 241,655
Average borrowings outstanding	\$ 111,927	\$ 105,959

Net increase in net assets resulting from operations can vary substantially from period to period for various reasons, including the recognition of realized gains and losses and unrealized appreciation and depreciation. As a result, quarterly comparisons of net income may not be meaningful.

Comparison of the three months ended June 30, 2014 and 2013

Investment Income

Total investment income decreased by \$0.1 million, or 1.0%, for the three months ended June 30, 2014 as compared to the three months ended June 30, 2013. For the three months ended June 30, 2014, total investment income consisted primarily of \$7.7 million in interest income from investments, which included \$2.1 million in income from the accretion of origination fees and end-of-term payments, or ETPs, and \$1.0 million in fee income. Total investment income decreased due to a lower average size of the loan portfolio which was partially offset by higher fee income. Fee income was primarily comprised of loan prepayment fees collected from our portfolio companies and increased primarily due to a higher number of prepayments for the three months ended June 30, 2014. For the three months ended June 30, 2013, total investment income consisted primarily of \$8.4 million in interest income from investments, which included \$1.8 million in income from the accretion of origination fees and ETPs.

For the three months ended June 30, 2014 and 2013, our dollar-weighted average annualized yield on average loans was 16.4% and 14.5%, respectively. We calculate the yield on dollar-weighted average debt investments for any period measured as (1) total investment income during the period divided by (2) the average of the fair value of debt investments outstanding on (a) the last day of the calendar month immediately preceding the first day of the period and (b) the last day of each calendar month during the period. The dollar-weighted average annualized yield represents the portfolio yield and may be higher than what investors will realize because it does not reflect our expenses or any sales load paid by investors.

Investment income, consisting of interest income and fees on loans, can fluctuate significantly upon repayment of large loans. Interest income from the five largest loans accounted for 20% and 22% of investment income for the three months ended June 30, 2014 and 2013, respectively.

As of June 30, 2014 and December 31, 2013, interest receivable was \$5.7 million and \$4.2 million, respectively, which represents accreted ETPs and one month of accrued interest income on substantially all of our loans.

Expenses

Total expenses increased by \$1.7 million, or 33.6%, to \$6.8 million for the three months ended June 30, 2014 as compared to the three months ended June 30, 2013. Total operating expenses for each period consisted principally of interest expense, base management fee, incentive and administrative fees and, to a lesser degree, professional fees and general and administrative expenses.

Interest expense for the three months ended June 30, 2014 and 2013 was \$3.8 million and \$1.9 million, respectively. Interest expense for the three months ended June 30, 2014, which includes the amortization of debt issuance costs, increased primarily due to the acceleration of \$1.1 million of unamortized debt issuance costs and a \$0.8 million prepayment fee related to the termination of the term loan facility with Fortress Credit Co LLC, or the Fortress Facility. We do not expect any ongoing obligations or expenses associated with the termination and prepayment of the Fortress Facility.

Base management fee expense for the three months ended June 30, 2014 and 2013 was \$1.1 million and \$1.3 million, respectively. Base management fee expense for the three months ended June 30, 2014 decreased compared to the three months ended June 30, 2013, primarily due to a decrease in average total assets and a waiver of the base management fee of \$0.1 million that the Advisor would have otherwise earned during the three months ended June 30, 2014. The Advisor waived such fees associated with cash held at the time of calculation.

No performance based incentive fee was incurred for the three months ended June 30, 2014. The performance based incentive fee for the three months ended June 30, 2013 was \$0.9 million, and consisted entirely of incentive fee payable on pre-incentive fee net investment income. No performance based incentive fee was incurred for the three months ended June 30, 2014 primarily due to lower pre-incentive fee net investment income as a result of the one-time costs associated with the termination of the Fortress Facility, described above.

Professional fees and general and administrative expenses primarily include legal and audit fees and insurance premiums. These expenses for the three months ended June 30, 2014 increased compared to the three months ended June 30, 2013, due to increased legal fees and other costs associated with certain non-accrual investments and other assets.

Net Realized Losses and Net Unrealized Appreciation and Depreciation

Realized gains or losses on investments are measured by the difference between the net proceeds from the repayment or sale and the cost basis of our investments without regard to unrealized appreciation or depreciation previously recognized and includes investments charged off during the period, net of recoveries. The net change in unrealized appreciation or depreciation on investments primarily reflects the change in portfolio investment fair values during the reporting period, including the reversal of previously recorded unrealized appreciation or depreciation when gains or losses are realized.

During the three months ended June 30, 2014, we realized losses totaling \$0.6 million primarily due to the resolution of one debt investment that was on non-accrual status which was partially offset by realized gains on the sale of warrants in two of our portfolio companies. The debt investment was settled for a net cash payment of \$1.5 million, which resulted in a realized loss of \$0.7 million and unrealized appreciation of \$1.4 million. During the three months ended June 30, 2013, we realized losses totaling \$0.1 million primarily in connection with the disposal of a portfolio company's warrants.

During the three months ended June 30, 2014, net unrealized appreciation on investments totaled \$1.2 million which was primarily due to the reversal of previously recorded unrealized depreciation on one debt investment that was settled in the period, as described above. During the three months ended June 30, 2013, net unrealized depreciation on investments totaled \$2.4 million which was primarily due to the change in fair values of our investment portfolio during the period.

Consolidated results of operations for the six months ended June 30, 2014 and 2013 were as follows:

	For the Six Months Ended June 30,	
	2014	2013
Total investment income	\$16,232	\$16,156
Total expenses	11,832	9,701
Net investment income before excise tax	4,400	6,455
Provision for excise tax	(80)	(80)
Net investment income	4,320	6,375
Net realized loss on investments	(6,514)	(272)
Net unrealized appreciation (depreciation) on investments	9,759	(1,972)
Net increase in net assets resulting from operations	\$7,565	\$4,131
Average debt investments, at fair value	\$216,171	\$235,105
Average borrowings outstanding	\$116,473	\$99,349

Net increase in net assets resulting from operations can vary substantially from period to period for various reasons, including the recognition of realized gains and losses and unrealized appreciation and depreciation. As a result, quarterly comparisons of net income may not be meaningful.

Comparison of the six months ended June 30, 2014 and 2013

Investment Income

Total investment income increased by \$0.1 million, or 0.5%, for the six months ended June 30, 2014 as compared to the six months ended June 30, 2013. For the six months ended June 30, 2014, total investment income consisted primarily of \$14.9 million in interest income from investments, which included \$3.2 million in income from the accretion of origination fees, ETPs, and \$1.3 million of fee income. Total investment income increased due to higher fee income which was partially offset by a lower average size of the loan portfolio. Fee income was primarily comprised of loan prepayment fees collected from our portfolio companies and increased primarily due to a higher

number of prepayments for the six months ended June 30, 2014. For the six months ended June 30, 2013, total investment income consisted primarily of \$15.8 million in interest income from investments, which included \$3.0 million in income from the accretion of origination fees and ETPs.

For the six months ended June 30, 2014 and 2013, our dollar-weighted average annualized yield on average loans was 15.0% and 13.7%, respectively. We calculate the yield on dollar-weighted average debt investments for any period measured as (1) total investment income during the period divided by (2) the average of the fair value of debt investments outstanding on (a) the last day of the calendar month immediately preceding the first day of the period and (b) the last day of each calendar month during the period. The dollar-weighted average annualized yield represents the portfolio yield and may be higher than what investors will realize because it does not reflect our expenses or any sales load paid by investors.

Investment income, consisting of interest income and fees on loans, can fluctuate significantly upon repayment of large loans. Interest income from the five largest loans accounted for 18% and 23% of investment income for the six months ended June 30, 2014 and 2013, respectively.

Expenses

Total expenses increased by \$2.1 million, or 22.0%, to \$11.8 million for the six months ended June 30, 2014 as compared to the six months ended June 30, 2013. Total operating expenses for each period consisted principally of interest expense, base management fee, incentive and administrative fees and, to a lesser degree, professional fees and general and administrative expenses.

Interest expense for the six months ended June 30, 2014 and 2013 was \$5.8 million and \$3.7 million, respectively. Interest expense for the six months ended June 30, 2014, which includes the amortization of debt issuance costs, increased primarily due to the acceleration of \$1.1 million of unamortized debt issuance costs and a \$0.8 million prepayment fee related to the termination of the Fortress Facility. There will be no ongoing obligations or expenses associated with the termination and prepayment of the Fortress Facility.

Base management fee expense for the six months ended June 30, 2014 and 2013 was \$2.3 million and \$2.6 million, respectively. Base management fee expense for the six months ended June 30, 2014 decreased compared to the six months ended June 30, 2013, primarily due to a decrease in average total assets and our Advisor's waiver of base management fees of \$0.2 million, which our Advisor would have otherwise earned during the six months ended June 30, 2014. The Advisor waived such fees on cash held at the time of calculation.

The performance based incentive fee for the six months ended June 30, 2014 and 2013 was \$0.4 million and \$1.6 million, respectively, and consisted entirely of incentive fee payable on pre-incentive fee net investment income. The performance based incentive fee for the six months ended June 30, 2014 decreased compared to the six months ended June 30, 2013, primarily due to lower pre-incentive fee net investment income as a result of the one-time costs associated with the termination of our Fortress Facility, described above.

Professional fees and general and administrative expenses primarily include legal and audit fees and insurance premiums. These expenses for the six months ended June 30, 2014 increased compared to the six months ended June 30, 2013, due to increased legal fees and other costs associated with certain non-accrual investments and other assets.

Net Realized Losses and Net Unrealized Appreciation and Depreciation

Realized gains or losses on investments are measured by the difference between the net proceeds from the repayment or sale and the cost basis of our investments, without regard to unrealized appreciation or depreciation previously recognized. Realized gains or losses on investments includes investments charged off during the period, net of recoveries. The net change in unrealized appreciation or depreciation on investments primarily reflects the change in portfolio investment fair values during the reporting period, including the reversal of previously recorded unrealized appreciation or depreciation when gains or losses are realized.

During the six months ended June 30, 2014, we realized losses totaling \$6.5 million primarily due to the resolution of three debt investments that were previously on non-accrual status which was partially offset by realized gains on the sale of warrants in three of our portfolio companies. One debt investment was settled for a cash payment of \$2.7 million and \$2.3 million in newly issued preferred stock of the applicable portfolio company, which resulted in a realized loss of \$1.7 million and unrealized appreciation of \$1.8 million. One debt investment was settled for a net

cash payment of \$1.5 million, which resulted in a realized loss of \$0.7 million and unrealized appreciation of \$1.4 million. One debt investment resulted in the Company receiving substantially all of the assets of the applicable portfolio company through bankruptcy, which resulted in a realized loss of \$4.7 million and unrealized appreciation of \$4.4 million. During the six months ended June 30, 2013, we realized losses totaling \$0.3 million primarily in connection with the disposal of a portfolio company's warrants.

During the six months ended June 30, 2014, net unrealized appreciation on investments totaled \$9.8 million which was primarily due to the reversal of previously recorded unrealized depreciation on three debt investments that were settled in the period, as described above, and one debt investment that returned to accrual status which resulted in unrealized appreciation of \$1.3 million. During the six months ended June 30, 2013, net unrealized depreciation on investments totaled \$2.0 million which was primarily due to the change in fair values of our investment portfolio during the period.

Liquidity and Capital Resources

As of June 30, 2014 and December 31, 2013, we had cash and investments in money market funds of \$15.8 million and \$26.5 million, respectively. Cash and investments in money market funds are available to fund new investments, reduce borrowings, pay operating expenses and pay distributions. In addition, as of June 30, 2014 and December 31, 2013, we had \$4.8 million and \$6.0 million, respectively, of restricted investments in money market funds. Restricted investments in money market funds may be used to make monthly interest and principal payments on our asset-backed notes, or the Asset-Backed Notes. Our primary sources of capital have been from our private and public equity offerings, use of our revolving credit facilities, issuance of our 7.375% notes due 2019, or the 2019 Notes, and our Asset-Backed Notes.

As of June 30, 2014, the outstanding principal balance under our revolving credit facility with Key Equipment Finance, or the Key Facility, was \$10.0 million. As of June 30, 2014, we had borrowing capacity of \$40.0 million of which \$30.0 million was available, subject to existing terms and advance rates.

Our operating activities provided cash of \$2.2 million for the six months ended June 30, 2014, and our financing activities used cash of \$21.3 million for the same period. Our operating activities provided cash primarily from regular principal payments and early pay-offs received, partially offset by investments made in portfolio companies. Our financing activities used cash primarily to pay down our borrowings and pay our monthly distributions.

Our operating activities used cash of \$14.6 million for the six months ended June 30, 2013 and our financing activities provided cash of \$35.4 million for the same period. Our operating activities used cash primarily for investing in portfolio companies, partially offset by principal payments received. Our financing activities provided cash primarily from the issuance of our Asset-Backed Notes, partially offset by a net decrease in borrowings and our distributions paid in the period.

Our primary use of available funds is to make investments in portfolio companies and for general corporate purposes. We expect to raise additional equity and debt capital opportunistically as needed, and subject to market conditions, to support our future growth through future equity offerings, issuances of senior securities and/or future borrowings, to the extent permitted by the 1940 Act.

In order to satisfy the Code requirements applicable to a RIC, we intend to distribute to our stockholders all or substantially all of our investment company taxable income. In addition, as a BDC, we are required to meet a coverage ratio of 200%. This requirement limits the amount that we may borrow.

We believe that our current cash and investments in money market funds, cash generated from operations, and funds available from our Key Facility, will be sufficient to meet our working capital and capital expenditure commitments for at least the next 12 months.

Current Borrowings

A summary of our borrowings as of June 30, 2014 and December 31, 2013 is as follows:

Edgar Filing: Horizon Technology Finance Corp - Form 10-Q

	June 30, 2014			December 31, 2013		
	Total Commitment	Balance Outstanding	Unused Commitment	Total Commitment	Balance Outstanding	Unused Commitment
Asset-Backed Notes	\$64,536	\$ 64,536	\$ —	\$79,343	\$ 79,343	\$ —
Fortress Facility	—	—	—	75,000	10,000	65,000
Key Facility	50,000	10,000	40,000	50,000	—	50,000
2019 Notes	33,000	33,000	—	33,000	33,000	—
Total	\$147,536	\$ 107,536	\$ 40,000	\$237,343	\$ 122,343	\$ 115,000

We, through our wholly owned subsidiary, Horizon Credit II LLC, or Credit II, entered into the Wells Facility on July 14, 2011 and on November 4, 2013 we renewed and amended the Wells Facility, which among other things, assigned all rights and obligations of Wells Fargo Capital Finance LLC to Key Equipment Finance. The interest rate on the Key Facility is based upon the one-month London Interbank Offered Rate, or LIBOR, plus a spread of 3.25%, with a LIBOR floor of 0.75%. The interest rate was 4.00% as of June 30, 2014 and December 31, 2013.

The Key Facility has an accordion feature which allows for an increase in the total loan commitment to \$150 million from the current \$50 million commitment provided by Key Equipment Finance. The Key Facility is collateralized by loans held by Credit II and permits an advance rate of up to fifty percent (50%) of eligible loans held by Credit II. The Key Facility contains covenants that, among other things, require us to maintain a minimum net worth, to restrict the loans securing the Key Facility to certain criteria for qualified loans and to comply with portfolio company concentration limits as defined in the related loan agreement. We may request advances under the Key Facility through November 4, 2016, or the Revolving Period. After the Revolving Period, we may not request new advances, and we must repay the outstanding advances under the Key Facility as of such date, at such times and in such amounts as are necessary to maintain compliance with the terms and conditions of the Key Facility, particularly the condition that the principal balance of the Key Facility not exceed fifty percent (50%) of the aggregate principal balance of our eligible loans to our portfolio companies. All outstanding advances under the Key Facility are due and payable on November 4, 2018.

On March 23, 2012, we issued and sold aggregate principal amount of \$30 million 2019 Notes, and on April 18, 2012, pursuant to the underwriters' 30-day option to purchase additional notes, we sold an additional \$3 million of the 2019 Notes. The 2019 Notes will mature on March 15, 2019 and may be redeemed in whole or in part at our option at any time or from time to time on or after March 15, 2015 at a redemption price of \$25 per security plus accrued and unpaid interest. The 2019 Notes bear interest at a rate of 7.375% per year payable quarterly on March 15, June 15, September 15 and December 15 of each year. The 2019 Notes are our direct, unsecured obligations and (1) rank equally in right of payment with our future senior unsecured indebtedness; (2) are senior in right of payment to any of our future indebtedness that expressly provides it is subordinated to the 2019 Notes; (3) are effectively subordinated to all of our existing and future secured indebtedness (including indebtedness that is initially unsecured to which we subsequently grant security), to the extent of the value of the assets securing such indebtedness and (4) are structurally subordinated to all existing and future indebtedness and other obligations of any of our subsidiaries. As of June 30, 2014, we were in material compliance with the terms of the 2019 Notes. The 2019 Notes are listed on the New York Stock Exchange under the symbol "HTF".

We, through our wholly owned subsidiary Horizon Credit III LLC, or Credit III, entered into the Fortress Facility on August 23, 2012. The interest rate on the Fortress Facility was based upon the one-month LIBOR plus a spread of 6.00%, with a LIBOR floor of 1.00%. The interest rate was 7.00% as of December 31, 2013.

The Fortress Facility permitted advances through August 23, 2016, or the Draw Period. After the Draw Period, we would have been required to repay the outstanding advances under the Fortress Facility as of such date, at such times and in such amounts as were necessary to maintain compliance with the terms and conditions of the Fortress Facility, particularly the condition that the principal balance of the Fortress Facility not exceed sixty-six percent (66%) of the aggregate principal balance of our eligible loans to our portfolio companies. The unused line fee equaled 1.00% of any unborrowed amount available under the Fortress Facility annually. All outstanding advances under the Fortress Facility were due and payable on August 23, 2017.

The Fortress Facility was collateralized by loans and warrants held by Credit III and permitted an advance rate of up to 66% of eligible loans held by Credit III. The Fortress Facility contained covenants that, among other things, required us to maintain a minimum net worth, to restrict the loans securing the Fortress Facility to certain criteria for qualified loans and to comply with portfolio company concentration limits as defined in the related loan agreement.

Effective June 17, 2014, we terminated the Fortress Facility. In connection therewith, the Loan and Security Agreement and other related documents governing the Fortress Facility were also terminated. As such, we have no borrowing capacity under the Fortress Facility as of June 30, 2014. Upon termination of the Fortress Facility, we accelerated \$1.1 million of unamortized debt issuance cost and paid a \$0.8 million prepayment fee. We believe there will be no ongoing obligations or expenses associated with the termination and prepayment of the Fortress Facility.

On June 28, 2013, we completed a \$189.3 million securitization of secured loans which we originated. Horizon Funding Trust 2013-1, or 2013-1 Trust, a wholly owned subsidiary of ours, issued the Asset-Backed Notes, which are rated A2(sf) by Moody's Investors Service, Inc. We are the sponsor, originator and servicer for the transaction. The Asset-Backed Notes bear interest at a fixed rate of 3.00% per annum and have a stated maturity of May 15, 2018.

The Asset-Backed Notes were issued by 2013-1 Trust pursuant to a note purchase agreement, or the Note Purchase Agreement, dated as of June 28, 2013, by and among us, Horizon Funding 2013-1, LLC, or the Trust Depositor, as the trust depositor, 2013-1 Trust and Guggenheim Securities, LLC, or Guggenheim Securities, as initial purchaser, and are backed by a pool of loans, or the Loans, made to certain portfolio companies of ours and secured by certain assets of such portfolio companies. The Loans are serviced by us. In connection with the issuance and sale of the Asset-Backed Notes, we have made customary representations, warranties and covenants in the Note Purchase Agreement. The Asset-Backed Notes are secured obligations of 2013-1 Trust and are non-recourse to us.

As part of the transaction, we entered into a sale and contribution agreement, or the Sale and Contribution Agreement, dated as of June 28, 2013, with the Trust Depositor, pursuant to which we have agreed to sell or have contributed to the Trust Depositor the Loans. We have made customary representations, warranties and covenants in the Sale and Contribution Agreement with respect to the Loans as of the date of the transfer of the Loans to the Trust Depositor. We have also entered into a sale and servicing agreement, or the Sale and Servicing Agreement, dated as of June 28, 2013, with the Trust Depositor and 2013-1 Trust pursuant to which the Trust Depositor has agreed to sell or has contributed the Loans to 2013-1 Trust. We have made customary representations, warranties and covenants in the Sale and Servicing Agreement. We will also serve as administrator to 2013-1 Trust pursuant to an administration agreement, dated as of June 28, 2013, with 2013-1 Trust, Wilmington Trust, National Association, and U.S. Bank National Association. 2013-1 Trust also entered into an indenture, dated as of June 28, 2013, which governs the Asset-Backed Notes and includes customary covenants and events of default. In addition, the Trust Depositor entered into an amended and restated trust agreement, dated as of June 28, 2013, which includes customary representations, warranties and covenants. The Asset-Backed Notes were sold through an unregistered private placement to “qualified institutional buyers” in compliance with the exemption from registration provided by Rule 144A under the Securities Act and to institutional “accredited investors” (as defined in Rule 501(a)(1), (2), (3) or (7) under the Securities Act) who, in each case, are “qualified purchasers” for purposes of Section 3(c)(7) under the 1940 Act.

Under the terms of the Asset-Backed Notes, we are required to maintain a reserve cash balance, funded through principal collections from the underlying securitized debt portfolio, which may be used to make monthly interest and principal payments on the Asset-Backed Notes.

On June 3, 2013, we entered into a promissory note with Guggenheim Securities, or the Promissory Note, whereby Guggenheim Securities made a term loan to us in the aggregate principal amount of \$15 million, or the Term Loan. We granted Guggenheim Securities a security interest in all of our assets to secure the Term Loan. On June 28, 2013, we used a portion of the proceeds of the private placement of the Asset-Backed Notes to repay all of our outstanding obligations under the Term Loan and the security interest of Guggenheim Securities was released.

As of June 30, 2014 and December 31, 2013, other assets were \$4.1 million and \$5.7 million, respectively, which were primarily comprised of debt issuance costs.

Contractual Obligations and Off-Balance Sheet Arrangements

A summary of our significant contractual payment obligations and off-balance sheet arrangements as of June 30, 2014 is as follows:

Payments due by period

Edgar Filing: Horizon Technology Finance Corp - Form 10-Q

	Total	Less than 1 year	1 – 3 Years	3-5 Years	After 5 years
Borrowings	\$107,536	\$31,149	\$43,387	\$33,000	\$ —
Unfunded commitments	9,000	9,000	—	—	—
Total	\$116,536	\$40,149	\$43,387	\$33,000	\$ —

In the normal course of business, we are party to financial instruments with off-balance sheet risk. These consist primarily of unfunded commitments to extend credit, in the form of loans, to our portfolio companies. Unfunded commitments to provide funds to portfolio companies are not reflected on our balance sheet. Our unfunded commitments may be significant from time to time. As of June 30, 2014, we had unfunded commitments of \$9.0 million. These commitments will be subject to the same underwriting and ongoing portfolio maintenance as are the financial instruments that we hold on our balance sheet. Since these commitments may expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements.

In addition to the Key Facility, we have certain commitments pursuant to our Investment Management Agreement entered into with our Advisor. We have agreed to pay a fee for investment advisory and management services consisting of two components (1) a base management fee equal to a percentage of the value of our average gross assets and (2) a two-part incentive fee. We have also entered into a contract with our Advisor to serve as our administrator. Payments under the Administration Agreement are equal to an amount based upon our allocable portion of our Advisor's overhead in performing its obligations under the agreement, including rent, fees and other expenses inclusive of our allocable portion of the compensation of our Chief Financial Officer and Chief Compliance Officer and their respective staffs. See Note 3 to our Consolidated Financial Statements for additional information regarding our Investment Management Agreement and our Administration Agreement.

Distributions

In order to qualify as a RIC and to avoid corporate level tax on the income we distribute to our stockholders, we are required under the Code to distribute as dividends an amount generally at least equal to 90% of our investment company taxable income to our stockholders on an annual basis. Additionally, we must generally distribute or be deemed to have distributed by December 31 of each calendar year an amount at least equal to the sum of 98% of our ordinary income (taking into account certain deferrals and elections) for such calendar year, 98.2% of the excess of our capital gains over our capital losses (generally computed on the basis of the one-year period ending on October 31 of such calendar year) and 100% of any ordinary income and the excess of capital gains over capital losses for preceding years that were not distributed during such years and on which we previously paid no U.S. federal income tax to avoid a U.S. federal excise tax. We intend to make monthly distributions to our stockholders as determined by our Board.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of our distributions from time to time. In addition, we may be limited in our ability to make distributions due to the asset coverage requirements applicable to us as a BDC under the 1940 Act. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including the possible loss of our qualification as a RIC. We cannot assure stockholders that they will receive any distributions.

To the extent our taxable earnings fall below the total amount of our distributions for that fiscal year, a portion of those distributions may be deemed a return of capital to our stockholders for U.S. federal income tax purposes. Thus, the source of a distribution to our stockholders may be the original capital invested by the stockholder rather than our income or gains. Stockholders should read any written disclosure accompanying a distribution payment carefully and should not assume that the source of any distribution is our ordinary income or gains.

We have adopted an “opt out” dividend reinvestment plan, or DRIP, for our common stockholders. As a result, if we declare a distribution, then stockholders’ cash distributions will be automatically reinvested in additional shares of our common stock unless a stockholder specifically “opts out” of our DRIP. If a stockholder opts out, that stockholder will receive cash distributions. Although distributions paid in the form of additional shares of our common stock will generally be subject to U.S. federal, state and local taxes, stockholders participating in our DRIP will not receive any corresponding cash distributions with which to pay any such applicable taxes. If our common stock is trading at or below net asset value, a stockholder receiving distributions in the form of additional common stock will be treated as receiving a distribution in the amount of cash that they would have received if they had elected to receive the distribution in cash. If our common stock is trading above net asset value, a stockholder receiving distributions in the form of additional common stock will be treated as receiving a distribution in the amount of the fair market value of our common stock. We may use newly issued shares to implement the DRIP, or we may purchase shares in the open market in connection with our obligations under the DRIP.

Related Party Transactions

We have entered into a number of business relationships with affiliated or related parties, including the following:

We entered into the Investment Management Agreement with our Advisor. Mr. Robert Pomeroy, our Chief Executive Officer and Chairman, is a manager of the Advisor, and Mr. Gerald Michaud, our President, is a manager of our Advisor.

Our Advisor provides us with the office facilities and administrative services necessary to conduct day-to-day operations pursuant to our Administration Agreement.

- We have entered into a license agreement with the predecessor of the Advisor, pursuant to which it has granted us a non-exclusive, royalty-free license to use the name “Horizon Technology Finance.”

Our Advisor may manage other investment vehicles, which we refer to as Advisor Funds, with the same investment strategy as us. Our Advisor may provide us an opportunity to co-invest with the Advisor Funds. Under the 1940 Act, absent receipt of exemptive relief from the SEC, we and our affiliates may be precluded from co-investing in such investments. Accordingly, we may apply for exemptive relief which would permit us to co-invest subject to certain conditions, including, without limitation, approval of such investments by both a majority of our directors who have no financial interest in such transaction and a majority of directors who are not interested directors as defined in the 1940 Act.

Critical Accounting Policies

The discussion of our financial condition and results of operation is based upon our financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles, or GAAP. The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Changes in the economic environment, financial markets and any other parameters used in determining such estimates could cause actual results to differ. In addition to the discussion below, we describe our significant accounting policies in the notes to our consolidated financial statements.

We have identified the following items as critical accounting policies.

Valuation of Investments

Investments are recorded at fair value. Our Board determines the fair value of our portfolio investments. We apply fair value to substantially all of our investments in accordance with GAAP, which establishes a framework used to measure fair value and requires disclosures for fair value measurements. We have categorized our investments carried at fair value, based on the priority of the valuation technique, into a three-level fair value hierarchy. Fair value is a market-based measure considered from the perspective of the market participant who holds the financial instrument rather than an entity specific measure. Therefore, when market assumptions are not readily available, our own assumptions are set to reflect those that management believes market participants would use in pricing the financial instrument at the measurement date.

The availability of observable inputs can vary depending on the financial instrument and is affected by a wide variety of factors, including, for example, the type of product, whether the product is new, whether the product is traded on an active exchange or in the secondary market and the current market conditions. To the extent that the valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. The three categories within the hierarchy are as follows:

Level 1 Quoted prices in active markets for identical assets and liabilities.

Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities in active markets, quoted prices in markets that are not active and model-based valuation techniques for which all significant inputs are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of **Level** the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined **3** using pricing models, discounted cash flow methodologies or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Our Board determines the fair value of investments in good faith, based on the input of management, the audit committee and independent valuation firms that have been engaged at the direction of our Board to assist in the valuation of each portfolio investment without a readily available market quotation at least once during a trailing twelve-month period under our valuation policy and a consistently applied valuation process. The Board conducts this valuation process at the end of each fiscal quarter, with 25% (based on fair value) of our valuation of portfolio companies that do not have a readily available market quotations subject to review by an independent valuation firm.

Income Recognition

Interest on debt investments is accrued and included in income based on contractual rates applied to principal amounts outstanding. Interest income is determined using a method that results in a level rate of return on principal amounts outstanding. Generally, when a loan becomes 90 days or more past due, or if we otherwise do not expect to receive interest and principal repayments, the loan is placed on non-accrual status and the recognition of interest income is discontinued. Interest payments received on loans that are on non-accrual status are treated as reductions of principal until the principal is repaid.

We receive a variety of fees from borrowers in the ordinary course of conducting our business, including advisory fees, commitment fees, amendment fees, non-utilization fees, success fees and prepayment fees. In a limited number of cases, we may also receive a non-refundable deposit earned upon the termination of a transaction. Loan origination fees, net of certain direct origination costs, are deferred, and along with unearned income, are amortized as a level yield adjustment over the respective term of the loan. All other income is recorded into income when earned. Fees for counterparty loan commitments with multiple loans are allocated to each loan based upon each loan's relative fair value. When a loan is placed on non-accrual status, the amortization of the related fees and unearned income is discontinued until the loan is returned to accrual status.

Certain loan agreements also require the borrower to make an ETP that is accrued into income over the life of the loan to the extent such amounts are expected to be collected. We will generally cease accruing the income if there is insufficient value to support the accrual or if we do not expect the borrower to be able to pay all principal and interest due.

In connection with substantially all lending arrangements, we receive warrants to purchase shares of stock from the borrower. We record the warrants as assets at estimated fair value on the grant date using the Black-Scholes valuation model. We consider the warrants loan fees and record them as unearned loan income on the grant date. The unearned income is recognized as interest income over the contractual life of the related loan in accordance with our income recognition policy. Subsequent to loan origination, the warrants are also measured at fair value using the Black-Scholes valuation model. Any adjustment to fair value is recorded through earnings as net unrealized gain or loss on investments. Gains from the disposition of the warrants or stock acquired from the exercise of warrants are recognized as realized gains on investments.

Realized gains or losses on the sale of investments, or upon the determination that an investment balance, or portion thereof, is not recoverable, are calculated using the specific identification method. We measure realized gains or losses by calculating the difference between the net proceeds from the repayment or sale and the amortized cost basis of the investment. Net change in unrealized appreciation or depreciation reflects the change in the fair values of our portfolio investments during the reporting period, including any reversal of previously recorded unrealized appreciation or depreciation, when gains or losses are realized.

Income taxes

We have elected to be treated as a RIC under subchapter M of the Code and operate in a manner so as to qualify for the tax treatment applicable to RICs. In order to qualify as a RIC, among other things, we are required to meet certain source of income and asset diversification requirements, and we must timely distribute to our stockholders at least 90% of investment company taxable income, as defined by the Code, for each tax year. We, among other things, have made and intend to continue to make the requisite distributions to our stockholders, which will generally relieve us from U.S. federal income taxes.

Depending on the level of taxable income earned in a tax year, we may choose to carry forward taxable income in excess of current year dividend distributions into the next tax year and pay a 4% excise tax on such income, as required. To the extent that we determine that our estimated current year annual taxable income will be in excess of estimated current year dividend distributions, we will accrue excise tax, if any, on estimated excess taxable income as taxable income is earned.

We evaluate tax positions taken in the course of preparing our tax returns to determine whether the tax positions are “more-likely-than-not” to be sustained by the applicable tax authority in accordance with Topic 740, as modified by Topic 946, of the Financial Accounting Standards Board’s, or FASB’s, Accounting Standards Codification, as amended. Tax benefits of positions not deemed to meet the more-likely-than-not threshold, or uncertain tax positions, are recorded as a tax expense in the current year. It is our policy to recognize accrued interest and penalties related to uncertain tax benefits in income tax expense. We had no material uncertain tax positions at June 30, 2014 and December 31, 2013.

Recently Issued Accounting Standards

In June 2013, the FASB issued Accounting Standards Update (“ASU”) 2013-08, Financial Services – Investment Companies (Topic 946): Amendments to the Scope, Measurement and Disclosure Requirements (“ASU 2013-08”), containing new guidance on assessing whether an entity is an investment company, requiring non-controlling ownership interests in investment companies to be measured at fair value and requiring certain additional disclosures. This guidance is effective for annual and interim periods beginning on or after December 15, 2013. ASU 2013-08 did not have a material impact on our consolidated financial position or disclosures.

Item 3. *Quantitative And Qualitative Disclosures About Market Risk*

We are subject to financial market risks, including changes in interest rates. During the periods covered by our financial statements, the interest rates on the loans within our portfolio were mostly at fixed rates, and we expect that our loans in the future will primarily have floating interest rates with a floor and ceiling. The initial commitments to lend to our portfolio companies are usually based on a floating LIBOR index.

Assuming that the consolidated statement of assets and liabilities as of June 30, 2014 was to remain constant and no actions were taken to alter the existing interest rate sensitivity, a hypothetical immediate 1% change in interest rates may affect net income by more than 1% over a one-year horizon. Although management believes that this measure is indicative of our sensitivity to interest rate changes, it does not adjust for potential changes in the credit market, credit quality, size and composition of the assets on the consolidated statement of assets and liabilities and other business developments that could affect net increase in net assets resulting from operations, or net income. Accordingly, no assurances can be given that actual results would not differ materially from the statement above.

While our 2019 Notes and Asset-Backed Notes bear interest at a fixed rate, our Key Facility has a floating interest rate provision based on a LIBOR index which resets daily, and we expect that any other credit facilities into which we enter in the future may have floating interest rate provisions. We have used hedging instruments in the past to protect us against interest rate fluctuations and we may use them in the future. Such instruments may include swaps, futures, options and forward contracts. While hedging activities may insulate us against adverse changes in interest rates, they may also limit our ability to participate in the benefits of lower interest rates with respect to the investments in our portfolio with fixed interest rates.

Because we currently fund, and will continue to fund, our investments with borrowings, our net income is dependent upon the difference between the rate at which we borrow funds and the rate at which we invest the funds borrowed. Accordingly, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net income. In periods of rising interest rates, our cost of funds would increase, which could

reduce our net investment income.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of June 30, 2014, we, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended, or Exchange Act). Based on that evaluation, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective and provided reasonable assurance that information required to be disclosed in our periodic SEC filings is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. However, in evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of such possible controls and procedures.

(b) Changes in Internal Controls Over Financial Reporting.

There have been no material changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during our most recently completed fiscal quarter, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

Item 1: Legal Proceedings.

Neither we nor our Advisor are currently subject to any material legal proceedings, nor, to our knowledge, is any material legal proceeding threatened against us or against our Advisor.

Item 1A: Risk Factors.

In addition to other information set forth in this report, you should carefully consider the “Risk Factors” discussed in our annual report on Form 10-K for the year ended December 31, 2013, which could materially affect our business, financial condition and/or operating results. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially affect our business, financial condition and/or operating results. There have been no material changes during the six months ended June 30, 2014 to the risk factors set forth in “Item 1A. Risk Factors” of our annual report on Form 10-K for the year ended December 31, 2013.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds.

None.
