**Prospectus SUPPLEMENT DATED APRIL 22, 2015
TO THE PROSPECTUS DATED SEPTEMBER 19, 2013**

Callable Step-Up Notes due April 30, 2030

US\$10,000,000

Nomura America Finance, LLC

Senior Global Medium-Term Notes, Series A

Fully and Unconditionally Guaranteed by Nomura Holdings, Inc.

Nomura America Finance, LLC is offering the callable step-up notes due April 30, 2030 (the “notes”) described below.
§ The notes are unsecured securities. All payments on the notes are subject to our credit risk and that of the guarantor of the notes, Nomura Holdings, Inc.

§ The notes feature an increasing, or “stepped up,” interest rate over time unless we redeem them before any such increase.

We have the right to redeem the notes, in whole or in part, for 100% of the principal amount plus any accrued and unpaid interest on January 30, April 30, July 30 and October 30 of each year, upon at least five business days’ prior notice, beginning on April 30, 2016 and ending on the maturity date.

§ **The notes are not ordinary debt securities, and you should carefully consider whether the notes are suited to your particular circumstances.**

KEY TERMS

Issuer: Nomura America Finance, LLC (“we” or “us”)

Guarantor: Nomura Holdings, Inc. (“Nomura”)

Principal Amount: US\$10,000,000 (the principal amount of the notes may be increased if we, in our sole discretion, decide to sell an additional amount of the notes on a date subsequent to the trade date)

Interest Rate: 3.25% from and including the original issue date to but excluding April 30, 2020;

4.00% from and including April 30, 2020 to but excluding April 30, 2024;

5.00% from and including April 30, 2024 to but excluding April 30, 2027;

6.00% from and including April 30, 2027 to but excluding April 30, 2029;

7.00% from and including April 30, 2029 to but excluding the maturity date.

Interest Payment Dates:

Semi-annually on April 30 and October 30 of each year, commencing on October 30, 2015, subject to the business day convention (as defined below) and ending on the maturity date.

Original Issue Date:

April 30, 2015

Stated Maturity Date:

April 30, 2030, subject to our early redemption right.

Early Redemption:

Redeemable at our option on each optional redemption date

Optional Redemption Dates:

Quarterly on January 30, April 30, July 30 and October 30 of each year, commencing on April 30, 2016,

and ending on the
maturity date.

Callable Step-Up Notes Due April 30, 2030

| Description and Terms of the Notes to Be Incorporated Into the Master Note: | All of the terms appearing on this cover page beginning with “ <i>Issuer</i> ” and ending with and including “ <i>Clearance and Settlement.</i> ” | | |
| Commissions and issue level: | Price to Public | Agent’s Commission | Proceeds to Issuer |
| Per Note | 100.00% | 1.50% | 98.50% |
| Total | \$10,000,000 | \$150,000 | \$9,850,000 |

Investing in the notes involves certain risks, including our and Nomura’s credit risk. You should carefully consider the risk factors under “Additional Risk Factors Specific to Your Notes” beginning on page PS-5 of this prospectus supplement, under “Risk Factors” beginning on page 7 in the accompanying prospectus, and any risk factors incorporated by reference into the accompanying prospectus before you invest in the notes.

The estimated value of your notes at the time the terms of your notes were set on the trade date (as determined by reference to pricing models used by Nomura Securities International, Inc.) is equal to approximately \$977.50 per \$1,000 face amount, which is less than the original issue price.

We expect delivery of the notes will be made against payment therefor on or about the original issue date specified above. Under Rule 15c6-1 under the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The notes will be our unsecured obligations. We are not a bank, and the notes will not constitute deposits insured by the U.S. Federal Deposit Insurance Corporation or any other governmental agency or instrumentality.

PS-2

Callable Step-Up Notes Due April 30, 2030

The distribution agent will purchase the notes from us at the price to public less the agent's commission. The price to public, agent's commission and proceeds to issuer listed above relate to the notes we sell initially. We may decide to sell additional notes after the trade date but prior to the original issue date, at a price to public, agent's commission and proceeds to issuer that differ from the amounts set forth above.

We will use this prospectus supplement in the initial sale of the notes. In addition, Nomura Securities International, Inc. or another of our affiliates may use this prospectus supplement in market-making transactions in the notes after their initial sale. *Unless we inform or our agent informs the purchaser otherwise in the confirmation of sale, this prospectus supplement is being used in a market-making transaction.*

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these securities or passed upon the accuracy or adequacy of this prospectus supplement. Any representation to the contrary is a criminal offense.

Nomura

Callable Step-Up Notes Due April 30, 2030

ADDITIONAL INFORMATION

You should read this prospectus supplement together with the prospectus, dated September 19, 2013 (the “prospectus”), relating to our Senior Global Medium-Term Notes, Series A, of which these notes are a part. **In the event of any conflict between the terms of this prospectus supplement and the terms of the prospectus, the terms of this prospectus supplement will control.**

This prospectus supplement, together with the prospectus, contains the terms of the notes. You should carefully consider, among other things, the matters set forth under “Risk Factors” in the accompanying prospectus, dated September 19, 2013, and under “Additional Risk Factors Specific to Your Notes” beginning on page PS-5 of this prospectus supplement. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the notes.

We have not authorized anyone to provide any information or to make any representations other than those contained or incorporated by reference in this prospectus supplement. We take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may provide. This prospectus supplement is an offer to sell only the securities offered hereby, but only under circumstances and in jurisdictions where it is lawful to do so. The information contained in this prospectus supplement is current only as of its date.

Our central index key, or “CIK,” on the SEC website is 0001383951. Alternatively, Nomura will arrange to send you these documents if you so request by calling (212) 667-1928 or e-mailing fidsalessupport@us.nomura.com.

You may access the prospectus on the SEC web site at www.sec.gov as follows:

<http://www.sec.gov/Archives/edgar/data/1163653/000119312513371180/d574488df3asr.htm>

Callable Step-Up Notes Due April 30, 2030

ADDITIONAL RISK FACTORS SPECIFIC TO YOUR NOTES

An investment in your notes is subject to the risks described below, as well as the risks described under “Risk Factors” in the accompanying prospectus, dated September 19, 2013. You should carefully consider whether the notes are suited to your particular circumstances. Your notes are not secured debt.

Please note that in this section entitled “Additional Risk Factors Specific to Your Notes,” references to “holders” mean those who own notes registered in their own names, on the books that we, Nomura or the trustee maintain for this purpose, and not those who own beneficial interests in notes registered in street name or in notes issued in book-entry form through The Depository Trust Company (“DTC”) or another depository. Owners of beneficial interests in the notes should read the section entitled “Legal Ownership and Book-Entry Issuance” in the accompanying prospectus.

This prospectus supplement should be read together with the accompanying prospectus. The information in the accompanying prospectus is supplemented by, and to the extent inconsistent therewith replaced and superseded by, the information in this prospectus supplement. We urge you to read all of the following information about all of the risks associated with the notes, together with the other information in this prospectus supplement and the accompanying prospectus before investing in the notes.

You Are Subject to Nomura’s Credit Risk, and the Value of Your Notes May Be Adversely Affected by Negative Changes in the Market’s Perception of Nomura’s Creditworthiness

By purchasing the notes, you are making, in part, a decision about Nomura’s ability to pay you the amounts you are owed pursuant to the terms of your notes. Substantially all of our assets consist of loans to and other receivables from Nomura and its subsidiaries. Our obligations under your notes are guaranteed by Nomura. Therefore, as a practical matter, our ability to pay you amounts we owe on the notes is directly or indirectly linked solely to Nomura’s creditworthiness. In addition, the market’s perception of Nomura’s creditworthiness generally will directly impact the value of your notes. If Nomura becomes or is perceived as becoming less creditworthy following your purchase of notes, you should expect that the notes will decline in value in the secondary market, perhaps substantially. If you sell your notes in the secondary market in such an environment, you may incur a substantial loss.

The Estimated Value of Your Notes at the Time the Terms of Your Notes Were Set on the Trade Date (as Determined by Reference to Our Pricing Models) Is Less Than the Original Issue Price of Your Notes

The original issue price for your notes exceeded the estimated value of your notes as of the time the terms of your notes were set on the trade date, as determined by reference to our pricing models. Such estimated value is set forth on the front cover of this prospectus supplement. After the trade date, the estimated value, as determined by reference to these pricing models, may be affected by changes in market conditions, our and Nomura’s creditworthiness and other relevant factors. If Nomura Securities International, Inc. buys or sells your notes it will do so at prices that reflect the estimated value determined by reference to such pricing models at that time. The price at which Nomura Securities

International, Inc. will buy or sell your notes at any time also will reflect, among other things, its then current bid and ask spread for similar sized trades of structured notes.

In estimating the value of your notes as of the time the terms of your notes were set on the trade date, as disclosed on the front cover of this prospectus supplement, our pricing models considered certain variables, including principally Nomura's internal funding rates, interest rates (forecasted, current and historical rates), volatility, price-sensitivity analysis and the time to maturity of the notes. These pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect. In addition, our internal funding rate used in our models generally results in a higher estimated value of your notes than would result if we estimated the value using our credit spreads for our conventional fixed rate debt. As a result, the actual value you would receive if you sold your notes in the secondary market may differ, possibly even materially, from the estimated value of your notes that was determined by reference to our pricing models as of the time the terms of your notes were set on the trade date due to, among other things, any differences in pricing models, third-parties' use of our credit spreads in their models, or assumptions used by other market participants.

The difference between the estimated value of your notes as of the time the terms of your notes were set on the trade date and the original issue price is a result of certain factors, including principally the underwriting discount and commissions, the expenses incurred in creating, documenting and marketing the notes, and an estimate of the difference between the amounts we pay to our affiliates and the amounts our affiliates pay to us in connection with their agreement to hedge our obligations on your notes.

PS-5

Callable Step-Up Notes Due April 30, 2030

Because Nomura Is a Holding Company, Your Right to Receive Payments on Nomura's Guarantee of the Notes is Subordinated to the Liabilities of Nomura's Other Subsidiaries

The ability of Nomura to make payments, as guarantor, on the notes, depends upon Nomura's receipt of dividends, loan payments and other funds from subsidiaries. In addition, if any of Nomura's subsidiaries becomes insolvent, the direct creditors of that subsidiary will have a prior claim on its assets, and Nomura's rights and the rights of Nomura's creditors, including your rights as an owner of the notes, will be subject to that prior claim.

Nomura's subsidiaries are subject to various laws and regulations that may restrict Nomura's ability to receive dividends, loan payments and other funds from subsidiaries. In particular, many of Nomura's subsidiaries, including its broker-dealer subsidiaries, are subject to laws and regulations, including regulatory capital requirements, that authorize regulatory bodies to block or reduce the flow of funds to the parent holding company, or that prohibit such transfers altogether in certain circumstances. For example, Nomura Securities Co., Ltd., Nomura Securities International, Inc., Nomura International plc and Nomura International (Hong Kong) Limited, Nomura's main broker-dealer subsidiaries, are subject to regulatory capital requirements that could limit the transfer of funds to Nomura. These laws and regulations may hinder Nomura's ability to access funds needed to make payments on Nomura's obligations.

The Notes Are Subject to Early Redemption at Our Option

Prospective purchasers should be aware that we have the right to redeem the notes on any optional redemption date, beginning on the first optional redemption date. As a result, the term of the notes could be as short as one year. If we exercise our right to redeem the notes, you will not receive the higher scheduled interest rates for any periods subsequent to our redemption. Unless general interest rates rise significantly, you should not expect to earn the higher scheduled interest rates set forth on the front cover of this prospectus supplement because the notes are likely to be called prior to maturity if interest rates remain the same or fall during the term of your notes.

When determining whether to invest in the notes, you should consider, among other things, the overall interest rates of the notes as compared to the interest rates of other equivalent investment alternatives of comparable term and credit quality rather than the higher scheduled interest rates of the notes or any potential interest payments you may receive after the first year following the issuance of the notes. It is more likely that we will redeem the notes prior to their stated maturity date to the extent that the interest payable on the notes is greater than the interest that would be payable on other instruments of comparable maturity, terms and credit rating trading in the market. If the notes are redeemed prior to their stated maturity date, you may have to re-invest the proceeds in a lower interest rate environment.

Longer Dated Notes May Be More Risky Than Shorter Dated Notes

By purchasing a note with a longer tenor, you are more exposed to fluctuations in interest rates than if you purchased a note with a shorter tenor. Specifically, you may be negatively affected if certain interest rate scenarios occur. For example, if interest rates begin to rise, the market value of your notes will decline because the likelihood of us calling your notes will decline and the interest rate you are receiving for that specific interest period may be less than you would receive on a note issued at such time. In addition, if interest rates rise faster than the incremental increases in the interest rates of the notes, the notes may have an interest rate that is significantly lower than the interest rates at that time and the secondary market value of the notes may be significantly lower than other instruments with a similar term but higher interest rates. In other words, you should only purchase the notes if you are comfortable receiving the scheduled interest rates set forth on the front cover of this prospectus supplement for the entire term of the notes regardless of any upward movements in interest rates in the future.

Trading or Hedging Activities by Us, Our Affiliates or Our Distributors May Negatively Impact Investors in the Notes

We or one or more of our affiliates may hedge our obligations under the notes by purchasing securities, futures, options or other derivative instruments with returns linked or related to changes in the level of the interest rate, and we or they may adjust these hedges by, among other things, purchasing or selling securities, futures, options or other derivative instruments at any time. In addition, we or one or more of our affiliates may hedge all or part of our obligations under the notes with one or more unaffiliated distributors of the notes, which we expect will undertake similar market activity. We, one or more of our affiliates or one or more unaffiliated distributors may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in the performance of the interest rate for your notes. By introducing competing products into the marketplace in this manner, we, one or more of our affiliates or one or more unaffiliated distributors could adversely affect the market value of the notes.

PS-6

Callable Step-Up Notes Due April 30, 2030

In addition, these transactions may cause us, our affiliates or unaffiliated distributors to have economic interests and incentives that do not align with, and that may be directly contrary to, those of an investor in the notes. Neither we nor any of our affiliates nor any unaffiliated distributor will have any obligation to take, refrain from taking or cease taking any action with respect to these transactions based on the potential effect on an investor in the notes, and we or they may receive substantial returns on hedging or other activities while the value of your notes declines. In addition, if any distributor from which you purchase notes is to conduct hedging activities in connection with the notes, that distributor may otherwise profit in connection with such hedging activities and such profit, if any, will be in addition to the compensation that the distributor receives for the sale of the notes to you. You should be aware that the potential to earn fees in connection with hedging activities may create a further incentive for the distributor to sell the notes to you, in addition to the compensation it would receive for the sale of the notes.

There May Not Be an Active Trading Market for the Notes—Sales in the Secondary Market May Result in Significant Losses

The notes will not be listed on any securities exchange, and there may be little or no secondary market for the notes. Nomura Securities International, Inc. and other affiliates of ours currently intend to make a market for the notes, although they are not required to do so. Nomura Securities International, Inc. or any other affiliate of ours may stop any such market-making activities at any time. Even if a secondary market for the notes develops, it may not provide significant liquidity and the notes may not trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your notes in any secondary market could be substantial.

Furthermore, if you sell your notes, you will likely be charged a commission for secondary market transactions, or the price will likely reflect a dealer discount.

If you sell your notes before the maturity date, you may have to do so at a substantial discount from the issue price and as a result you may suffer substantial losses.

The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors

In addition to our and Nomura's creditworthiness, a number of other economic and market factors will influence the value of the notes. The following factors, which are beyond our control, may influence the market value of your notes:

- supply and demand for the notes, including inventory positions with Nomura Securities International, Inc. or any other market-maker;

- the time to maturity of the notes;
- interest and yield rates in the market generally and expectations about future interest and yield rates; and
- economic, financial, political, regulatory or judicial events that affect the debt markets generally.

Each of these factors may influence the market value of your notes if you sell your notes before maturity. If you sell your notes prior to maturity, you may receive less than the principal amount of your notes.

Non-U.S. Investors May Be Subject to Certain Additional Risks

The notes will be denominated in U.S. dollars. If you are a non-U.S. investor who purchases the notes with a currency other than U.S. dollars, changes in rates of exchange may have an adverse effect on the value or price of, or income on, your investment.

The accompanying prospectus and this prospectus supplement contain a general description of certain U.S. tax considerations relating to the notes under “*United States Taxation*” and “*Supplemental Discussion of U.S. Federal Income Tax Consequences*,” respectively. If you are a non-U.S. investor, you should consult your tax advisors as to the consequences, under the tax laws of the country where you are resident for tax purposes, of acquiring, holding and disposing of the notes and receiving payments of principal or other amounts under the notes.

PS-7

Callable Step-Up Notes Due April 30, 2030
Certain Considerations for Insurance Companies and Employee Benefit Plans

Any insurance company or fiduciary of a pension plan or other employee benefit plan that is subject to the prohibited transaction rules of the Employee Retirement Income Security Act of 1974, as amended, which we call “ERISA,” or the Internal Revenue Code of 1986, as amended, including an IRA or a Keogh plan (or a governmental plan to which similar prohibitions apply), and that is considering purchasing the notes with the assets of the insurance company or the assets of such a plan, should consult with its counsel regarding whether the purchase or holding of the notes could become a “prohibited transaction” under ERISA, the Internal Revenue Code or any substantially similar prohibition in light of the representations a purchaser or holder in any of the above categories is deemed to make by purchasing and holding the notes. This is discussed in more detail under “*Employee Retirement Income Security Act*” below.

PS-8

Callable Step-Up Notes Due April 30, 2030

SUPPLEMENTAL DISCUSSION OF U.S. FEDERAL INCOME TAX CONSEQUENCES

You should carefully consider, among other things, the matters set forth under “*United States Taxation*” in the accompanying prospectus. The following discussion summarizes for U.S. holders (as defined in the accompanying prospectus) certain U.S. federal income tax consequences of the purchase, beneficial ownership, and disposition of the notes. This summary supplements the section “*United States Taxation*” in the accompanying prospectus and is subject to the limitations and exceptions set forth therein.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws.

Notwithstanding the fact that the interest rate on the notes is scheduled to step up over the term of the notes, the notes should not be treated as issued with original issue discount (“OID”), because the stated redemption price at maturity should not take into account the interest rate step-ups. This is the case because Treasury regulations generally deem an issuer to exercise a call option in a manner that minimizes the yield on the debt instrument for purposes of determining whether a debt instrument is issued with OID. We have determined that the yield on the notes would be minimized if we called the notes immediately before the increase in the interest rate on April 30, 2020, and therefore the notes should be treated for OID purposes as fixed-rate notes that will mature prior to the step up in interest rate for the notes. This assumption is made solely for U.S. federal income tax purposes of determining whether the notes are issued with OID and is not an indication of our intention to call or not to call the notes at any time. Accordingly, the notes should not be considered as issued with OID for the initial interest rate period.

If we do not call the notes prior to the step up in the interest rate on April 30, 2020 then, solely for OID purposes, the notes will be deemed to mature and be reissued at their adjusted issue price on April 30, 2020. This deemed issuance should not give rise to taxable gain or loss to holders. The analysis set forth in the prior paragraph should also apply to the step up in interest rate on April 30, 2024. Thus, any notes deemed reissued on April 30, 2020 should have a maturity date for OID purposes of April 30, 2024. Accordingly, the notes should not be considered issued with OID for the interest rate period beginning on April 30, 2020.

The same analysis in the preceding two paragraphs would apply to each scheduled interest rate step up on the notes. Therefore, subject to the following paragraph, the notes should not be considered issued with OID for any interest rate period.

If the notes are not called on or before the scheduled step up in interest rate on April 30, 2029, then the notes should be deemed reissued solely for OID purposes at such time. However, because the period between the date of such deemed reissuance and the final maturity date of the notes is one year or less, the notes, upon their deemed reissuance on such date, should be treated as short-term debt securities for OID purposes (but not for purposes of determining the

holding period of your notes). This deemed issuance should not give rise to taxable gain or loss to holders. If the notes are treated as short-term debt securities for such period, the primary consequence to a U.S. holder will generally be that it will be required to defer interest deductions with respect to any borrowings that are attributable to the notes to the extent of any accrued interest on the notes that the U.S. holder has not yet included in income.

Based on the discussion above, the coupon on the notes will be taxable to a U.S. holder as ordinary interest income at the time it accrues or is received in accordance with the U.S. holder's normal method of accounting for tax purposes (regardless of whether we call the notes).

Upon the disposition of notes by sale, exchange, redemption or retirement (i.e., if we exercise our right to call the notes or otherwise) or other disposition, a U.S. holder will generally recognize taxable gain or loss equal to the difference, if any, between (i) the amount realized on the disposition (other than amounts attributable to accrued but unpaid interest, which would be treated as such) and (ii) the U.S. holder's adjusted tax basis in the notes. A U.S. holder's adjusted tax basis in notes generally will equal the cost of the notes (net of accrued interest) to the U.S. holder, increased by any market discount previously included in income with respect to the notes less any bond premium that you have amortized with respect to the notes. Capital gain of individual taxpayers from the sale, exchange, redemption, retirement or other disposition of notes held for more than one year may be eligible for reduced rates of taxation. The deductibility of a capital loss realized on the sale, exchange, redemption, retirement or other disposition of notes is subject to significant limitations.

Depending on the purchase price of your notes, you may be subject to the rules governing market discount or amortizable bond premium described in greater detail in the accompanying prospectus under "*United States Taxation—United States Holders—Market Discount*" and "*United States Taxation—United States Holders—Debt Securities Purchased at a Premium*." The rules regarding market discount and the purchase of debt securities at a premium are complex and therefore individuals are urged to consult their tax advisors regarding these rules.

Callable Step-Up Notes Due April 30, 2030
EMPLOYEE RETIREMENT INCOME SECURITY ACT

This section is only relevant to you if you are an insurance company or the fiduciary of a pension plan or an employee benefit plan (including a governmental plan, an IRA or a Keogh Plan) proposing to invest in the notes.

The U.S. Employee Retirement Income Security Act of 1974, as amended (“ERISA”) and the U.S. Internal Revenue Code of 1986, as amended (the “Code”), prohibit certain transactions (“prohibited transactions”) involving the assets of an employee benefit plan that is subject to the fiduciary responsibility provisions of ERISA or Section 4975 of the Code (including individual retirement accounts, Keogh plans and other plans described in Section 4975(e)(1) of the Code) (a “Plan”) and certain persons who are “parties in interest” (within the meaning of ERISA) or “disqualified persons” (within the meaning of the Code) with respect to the Plan; governmental plans may be subject to similar prohibitions unless an exemption applies to the transaction. The assets of a Plan may include assets held in the general account of an insurance company that are deemed “plan assets” under ERISA or assets of certain investment vehicles in which the Plan invests. Each of Nomura and certain of its affiliates may be considered a “party in interest” or a “disqualified person” with respect to many Plans, and, accordingly, prohibited transactions may arise if the notes are acquired by or on behalf of a Plan unless those notes are acquired and held pursuant to an available exemption. The U.S. Department of Labor has issued five prohibited transaction class exemptions, or “PTCEs”, that may provide exemptive relief if required for direct or indirect prohibited transactions that may arise from the purchase or holding of the notes. These exemptions are PTCE 84-14 (for certain transactions determined by independent qualified professional asset managers), PTCE 90-1 (for certain transactions involving insurance company pooled separate accounts), PTCE 91-38 (for certain transactions involving bank collective investment funds), PTCE 95-60 (for transactions involving certain insurance company general accounts), and PTCE 96-23 (for transactions managed by in-house asset managers). In addition, ERISA Section 408(b)(17) and Section 4975(d)(20) of the Code provide an exemption for the purchase and sale of the notes, provided that neither Nomura nor any of its subsidiaries or affiliates have or exercise any discretionary authority or control or render any investment advice with respect to the assets of any Plan involved in the transaction, and provided further that the Plan pays no more and receives no less than “adequate consideration” in connection with the transaction. There can be no assurance that all of the conditions of any such exemptions will be satisfied.

The person making the decision on behalf of a Plan or a governmental plan shall be deemed, on behalf of itself and the plan, by purchasing and holding the notes, or exercising any rights related thereto, to represent that (a) the plan will receive no less and pay no more than “adequate consideration” (within the meaning of Section 408(b)(17) of ERISA and Section 4975(f)(10) of the Code) in connection with the purchase and holding of the notes, (b) none of the purchase, holding or disposition of the notes or the exercise of any rights related to the notes will result in a nonexempt prohibited transaction under ERISA or the Code (or, with respect to a governmental plan, under any similar applicable law or regulation), and (c) neither Nomura nor any of its affiliates is a “fiduciary” (within the meaning of Section 3(21) of ERISA) (or, with respect to a governmental plan, under any similar applicable law or regulation) with respect to the purchaser or holder in connection with such person’s acquisition, disposition or holding of the notes, or as a result of any exercise by Nomura or any of its affiliates of any rights in connection with the notes, and no advice provided by Nomura or any of its affiliates has formed a primary basis for any investment decision by or on behalf of such purchaser or holder in connection with the notes and the transactions contemplated with respect to the notes.

Edgar Filing: Nomura America Finance, LLC - Form 424B2

If you are an insurance company or the fiduciary of a pension plan or an employee benefit plan (including a governmental plan, an IRA or a Keogh plan), and propose to invest in the notes, you should consult your legal counsel.

PS-10

Callable Step-Up Notes Due April 30, 2030
SUPPLEMENTAL PLAN OF DISTRIBUTION

We have agreed to sell to Nomura Securities International, Inc. (the “distribution agent”), and the distribution agent has agreed to purchase from us, the aggregate principal amount of the notes specified on the front cover of this prospectus supplement. The distribution agent has agreed to purchase the notes from us at 98.50% of the principal amount, resulting in aggregate proceeds to us of \$9,850,000. The distribution agent’s commission is equal to 1.50%, or \$150,000 in the aggregate. The distribution agent will offer the notes to which this prospectus supplement relates to the public at the public offering price set forth on the front cover of this prospectus supplement and to certain dealers at such price less a concession not in excess of 1.50% of the principal amount of the notes. If all of the notes are not sold at the original issue price, the distribution agent may change the offering price and the other selling terms. We estimate that our share of the total offering expenses, excluding underwriting discounts and commissions, will be approximately \$15,000.

To the extent the distribution agent resells notes to a broker or dealer less a concession equal to the entire underwriting discount, such broker or dealer may be deemed to be an “underwriter” of the notes as such term is defined in the Securities Act of 1933, as amended.

In the future, the distribution agent may repurchase and resell the notes in market-making transactions. For more information about the plan of distribution, the distribution agreement (of which the terms agreement forms a part) and possible market-making activities, see “*Plan of Distribution*” in the accompanying prospectus.

The distribution agent is our affiliate and, as such, has a “conflict of interest” in this offering within the meaning of FINRA Rule 5121. The distribution agent is not permitted to sell notes in this offering to any account over which it exercises discretionary authority without the prior specific written approval of the account holder.

The distribution agent and/or its affiliates have performed, and in the future may provide, investment banking and advisory services for us from time to time for which they have received, and expect to receive, customary fees and commissions. The distribution agent and its affiliates may, from time to time, engage in transactions with, and perform services for, us in the ordinary course of business.

We expect delivery of the notes will be made against payment therefor on or about the original issue date specified above. Under Rule 15c6-1 under the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.
