Harmony Gold Mining Company Limited

By: /s/ Graham Briggs

Name: Graham Briggs

Title: Chief Executive Officer

Table of Contents**HARMONY GOLD MINING COMPANY LIMITED**

Incorporated in the Republic of South Africa

Registration Number 1950/038232/06

(Harmony or Company)

JSE Share code: HAR

NYSE Share code: HMY

ISIN Code: ZAE 000015228

Results for the first quarter ended 30 September 2008

The quarter at a glance:

Total gold production up by 6% and grade increased by 4%

Good signs of operational improvement

Management restructuring and refocusing

Good progress with projects, particularly at Morobe JV

Rand/gold price marginally down, but likely to remain robust in medium to long term

Debt levels reduced, despite significant capex

Seven fatalities during quarter

Cash operating costs (R/kg) up by 9%, as input costs (electricity and labour) increase

Cash operating profit down by 19%

Harmony's Annual Report, Notice of Meeting, Sustainable Development Report and its Annual Report filed on a Form 20F with the United States Securities and Exchange Commission for the year ended 30 June 2008 are available on our website at www.harmony.co.za.

Chief executive officer's review

Overview

We made pleasing progress during the quarter under review towards fulfilment of our vision to create a sustainable company that generates earnings to fund dividends and growth.

Increased volumes, improved average grade and consequent higher gold production demonstrate clearly that the measures we have applied in implementing our 'back-to-basics' philosophy during our stabilisation phase of our strategy, have delivered the stability we need to implement the next phase of our strategy, being organic growth.

There is a very notable turn for the better in the morale of the greater Harmony team. Our people are getting excited about the business again and their particular roles in it, which is evidenced by our productivity figures.

Safety improvement remains a critical priority requiring immediate and decisive action. Despite our best efforts to ensure a safer workplace, seven work-related fatalities occurred during the quarter, compared with four in the previous quarter.

Safety

We are deeply saddened by the deaths of seven of our colleagues and I extend my heartfelt condolences to their families, friends and workmates.

Those who died were: Elandsrand employees Diago Vasco Bila, a winch driver, and Mpeo Moeti and Magatsela Mangaliso, both rock drill operators; Tshepong employees Nokanyo Gcasamba, a locomotive operator, and Zinikele Yam, a utility vehicle driver; Target employee Mokutu Amos Qondile, a load-haul-dumper operator and Unisel employee Kali Makase, a rock drill operator.

Although our Lost Time Injury Frequency Rate (LTIFR) for the quarter improved against that for the 2008 financial year, our Reportable Injury Frequency Rate (RIFR) and Fatality Injury Frequency Rate (FIFR) for the quarter both deteriorated.

Gold market

There was only a 3% drop in our average gold price received of R217 295/kg (\$869/oz), compared with R224 036/kg (\$897/oz) in June 2008, despite the turmoil in global financial markets during the quarter. Notwithstanding evidence to suggest that gold still fulfils its historic role as the investment of last resort for many nervous investors in these circumstances, it seems reasonable to assume that gold price volatility will continue until the

Table of Contents

financial storm starts to abate.

We remain bullish about the fundamentals for the metal in the medium and longer term. However, with economic deposits in mining locations harder to come by and exploration and development budgets under extreme pressure, supplies of new gold into the market are likely to continue to shrink.

Operating performance

Overall we have seen some good improvements. Total gold production for the quarter from continuing operations increased by 6% to 12 342 kg, reflecting a 1% increase in volumes to 4.6 million tonnes and a 4% improvement in the average recovered grade to 2.68 g/t.

Total underground gold production was 8% higher at 11 191 kg due to a 2% increase in tonnes milled from underground to 2.3 million tonnes and a 5% improvement in the average underground recovered grade to 4.79 g/t.

Tonnes milled for our surface operations remained fairly constant at 2.2 million tonnes for the quarter. The average grade was 12% lower from 0.58 g/t in June 2008 to 0.51 g/t, resulting in an 11% decline in surface gold production to 1 151 kg. The decrease in grade was mainly due to a reduction in the kilograms recovered from plant clean-ups.

Productivity has improved, but we need to remain focused on attaining ore reserve management excellence and quality mining throughout our operations to ensure that we meet our productivity targets.

It is no coincidence that operation-by-operation comparisons show that our best safety performers, notably Masimong, Bambanani and the Virginia operations, are emerging also as our best producers and that our worst safety performers, being Elandsrand and Target are under-performing in terms of production.

The lesson is obvious and we have not been slow to act. Elandsrand is now in intensive care. Chief Operating Officer, Alwyn Pretorius, has been re-assigned to lead Elandsrand's management in a safety and production turnaround strategy and until this assignment is completed, Bob Atkinson, Executive: Projects, will act as Chief Operating Officer of the remaining operations in the North Region. At Target, new management has been appointed from within and outside the Company to ensure that we turn the value of the orebody to account.

Financial performance

An increase in operating costs as well as a decrease in the gold price received for the quarter under review, resulted in a decrease in cash operating profit of R187.1 million when compared with the June 2008 quarter. Operating costs increased by R249.2 million, 15% higher when compared with the June 2008 quarter, mainly due to higher power costs (specifically Eskom's 20% general tariff increase effective from the beginning of July and higher winter tariffs), annual wage increases effective from July 2008 and stores price hikes of 16%. Quarter on quarter our power bill rose by 43% and our labour bill by 13% (which is inclusive of the holiday leave allowance). Power as a percentage of our total costs increased from 10% to 13%.

Capital expenditure for the quarter decreased by 25% from R1.3 billion in the

Table of Contents

June 2008 quarter to R993 million in the September 2008 quarter. The decrease was as a result of Newcrest Mining Limited funding the remaining capex requirements of the Hidden Valley project as prescribed by Stage 2 of the joint venture, as from August 2008 when the joint venture came into effect.

Cash costs and capital expenditure were both influenced by our decision to lift the ceiling on abnormal expenditure items from R50 000 to R250 000 and to allocate these to operating costs going forward, rather than to capital expenditure as in the past. This is another step, amongst many, we have taken in our drive to decentralise decision-making downward to general manager level.

Power

During the quarter, we engaged very constructively with Eskom and have secured the baseline power allocations for all of our current operations and undertakings to supply the additional power required for our Elandsrand, Phakisa and Doornkop projects. This will accommodate the build-up requirements on these operations as the projects come on line and are commissioned. We remain committed to partaking in as much power-saving efforts that are required.

Transactions

Cooke Assets

We announced on 19 December 2007 that our wholly-owned subsidiary, Randfontein Estates Limited (Randfontein), had entered into agreements with Pamodzi Resources Fund 1, LL.P (PRF), in terms of which certain uranium and gold assets of Randfontein (Cooke Assets) would be sold into Rand Uranium (Proprietary) Limited (Rand Uranium), for a purchase consideration of US\$420 million.

The delay in meeting the conditions precedent, Harmony benefiting from the cash flow during this period, the turmoil in the global financial markets and other market-related adjustments resulted in a renegotiation of the purchase consideration. A revised purchase consideration of US\$348 million for the Cooke Assets has been agreed. Harmony will receive a total purchase consideration of US\$209 million for 60% of the issued share capital of Rand Uranium. The majority of the conditions precedent, including the approvals from the Minister of Minerals and Energy and the issuance of a certificate of registration by the National Nuclear Regulator, have been fulfilled. It is anticipated that the remaining conditions precedent will be fulfilled on or before 20 November 2008 and the transaction will become effective on 21 November 2008.

In exchange for 60% of the issued share capital of Rand Uranium, Harmony will receive US\$40 million on the effective date of the transaction, a further US\$157 million, plus interest thereon at 5% per annum, on 22 April 2009 and the balance of the purchase consideration of approximately US\$12 million as soon as the second stage of the transaction (which relates to its Old Randfontein assets), is finalised. This is anticipated to be on or shortly after 22 April 2009. PRF's investors, affiliates of First Reserve and AMCI Capital, have provided Harmony with a guarantee in respect of the payment of the above amounts. In addition, PRF will pledge its shares in Rand Uranium to Harmony as security for PRF's obligation to pay the purchase consideration to Harmony.

Table of Contents

Since entering into the agreements with PRF, Rand Uranium has been formed as a stand-alone company, information on the building of a potential uranium plant has been compiled and consultants have been involved with feasibility, metallurgical and environmental studies in respect of the extraction of uranium. Management capacity under the leadership of John Munro has been built up. Harmony will supply certain corporate services for a limited period and an agreement has been entered into for milling of the underground ore.

We believe that the dual commodity (gold and uranium) mix should combine to make the Cooke Assets a viable, low-cost operation and look forward to a mutually beneficial partnership with PRF in developing the significant uranium resource base as a platform for future growth opportunities within the West Rand.

Mt Magnet

We have resumed our efforts to sell our Mount Magnet operation in Australia, following our termination of the sales agreement with Monarch Gold in August 2008. The operation is on care and maintenance, which we estimate will cost us some A\$5 million per year.

Exploration

Exploration in Papua New Guinea, under the auspices of our Morobe Joint Venture with Newcrest Mining Limited, focused primarily on the Wafi-Golpu Nambonga North brownfields prospect and the Morobe Consolidated Tenements Upper Bulolo brownfields prospect during the quarter. In respect of the former, work is on schedule to achieve a mineral resource estimate by the end of calendar 2008. At the latter, a significant and exciting new development, trenching is in progress and diamond drilling is scheduled to begin in December 2008.

Social and Labour Plans

We continue to make substantive progress in the implementation of our Social and Labour Plans. While this is essential to ensure retention of our licence to operate, it is also an enormously satisfying fulfilment of our commitment to be relevant to communities in which we do business.

During the quarter, we have contributed, with various other interested and affected parties, towards three major land development projects. These are: the Secunda West project, which will comprise 12 313 residential units covering all income levels, schools, community facilities, shops, sports amenities and green spaces; the Middelvlei/Droogeheuwel (Mohlakeng Ext 11) project, which will include all housing options, schools, social amenities and provisions for business development and the Phakisa Estate near Welkom, which envisages the establishment of a township comprising 6 500 residential units.

Looking ahead

While we remain mindful of the need to continue to apply the core principles of our 'back to basics' philosophy initiated in August 2007 most diligently in those of our operations that have been slower to turn around than we would have hoped I believe we are well embarked on the 'organic growth' phase of our three-phase growth plan to June 2012.

We now have sufficient latitude to focus more closely on delivery of our

Table of Contents

various organic growth projects in South Africa and of the Hidden Valley project in Papua New Guinea, also to clear our debt burden and strengthen our balance sheet, positioning to look towards the third organic-acquisition phase of our strategy from June 2009.

Note of thanks

I wish to thank each Harmony employee for her/his contribution in building a sustainable company.

Chief Executive Officer Graham Briggs

Table of Contents**NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2008**

1. Accounting policies

(a) Basis of accounting

The condensed consolidated interim financial statements for the period ended 30 September 2008 have been prepared using accounting policies that comply with International Financial Reporting Standards (IFRS), which are consistent with the accounting policies used in the audited annual financial statements for the year ended 30 June 2008. These condensed consolidated interim financial statements are prepared in accordance with IAS 34, Interim Financial Reporting, and should be read in conjunction with the financial statements for the year ended 30 June 2008.

2. Cost of sales

	September 2008 (Unaudited) R million	Quarter ended June 2008 (Unaudited) R million	September 2007 (Unaudited) R million
Production costs	1 874	1 625	1 843
Amortisation and depreciation	308	222	201
Impairment of assets		316	
Provision for rehabilitation costs	6	12	
Care and maintenance cost of restructured shafts	12	29	9
Employment termination and restructuring costs	12	50	
Share-based compensation	13	19	10
Provision for post-retirement benefits		11	
Total cost of sales	2 225	2 284	2 063

3. Other income/(expenses) net

Included in other income is R523 million profit on sale of 30.01% of Harmony's Papua New Guinea gold and copper assets to Newcrest Mining Limited, as previously announced.

4. Non-current assets held for sale and Discontinued operations

The assets and liabilities related to Mount Magnet (operations in Australia) have been presented as held for sale following approval of the Group's management and Board of Directors on 20 April 2007. During fiscal 2008, we entered into an agreement with Monarch Gold Mining Company (Monarch) for the sale of these operations. However, during July 2008 we were advised that Monarch had placed itself in voluntary administration and on 1 August 2008 the Administrator indicated that Monarch would not proceed with the proposed purchase and consequently the purchase agreement has been terminated. Management is still intent on the disposal of Mount Magnet despite the asset being classified as held for sale for more than 12 months.

The assets and liabilities relating to the Cooke 1, Cooke 2, Cooke 3, Cooke plant and relating surface operations (operations in the Gauteng area) have been presented as held for sale following the approval of the Group's management on 16 October 2007. These operations were also deemed to be discontinued operations.

Table of Contents

Included in (loss)/profit from discontinued operations is an impairment charge for the Mount Magnet assets for R152 million, relating to the decrease in the fair value less costs to sell at 30 September 2008.

5. Earnings/(loss) per ordinary share

Earnings/(loss) per ordinary share is calculated on the weighted average number of ordinary shares in issue for the quarter ended 30 September 2008: 403.1 million (30 June 2008: 402.8 million, 30 September 2007: 399.5 million).

The fully diluted earnings/(loss) per ordinary share is calculated on weighted average number of diluted ordinary shares in issue for the quarter ended 30 September 2008: 404.6 million (30 June 2008: 405.2 million, 30 September 2007: 402.8 million).

	September 2008 (Unaudited) R million	June 2008 (Unaudited) R million	September 2007 (Unaudited) R million

Total headline profit/(loss)	98	263	(169)

6. Investment in associate

On 27 February 2008, Pamodzi Gold Limited bought the Orkney operations from the

Table of Contents

Harmony Group for a consideration of 30 million Pamodzi Gold Limited shares. This resulted in Harmony Gold Mining Company owning 32.4% of Pamodzi Gold Limited. At 30 September 2008, management tested for impairment of the investment in associate. An additional amount of R112 million (June 2008: R91 million) was impaired and accounted for in the income statement. The book value at 30 September 2008, after taking impairment and loss from associate into account, was R34 million (June 2008: R145 million).

7. Borrowings

	September 2008 (Unaudited) R million	June 2008 (Audited) R million
Unsecured borrowings		
Convertible unsecured fixed rate bonds	1 649	1 626
Africa Vanguard Resources (Proprietary) Limited	32	32

Contracts for capital expenditure	512	1 164
Authorised by the directors but not contracted for	2 467	1 720
	2 979	2 884
This expenditure will be financed from existing resources and where appropriate, borrowings.		
Contingent liabilities		
Guarantees and suretyships	18	18
Environmental guarantees	303	171
	321	189

Contingent liability

On 18 April 2008, Harmony Gold Mining Company Limited was made aware that it has been named or may be named as a defendant in a lawsuit filed in the U.S. District Court in the Southern District of New York on behalf of certain purchasers and sellers of Harmony's American Depositary Receipts (ADRs). Harmony has retained legal counsel, who will advise Harmony on further developments in the U.S.

10. Subsequent events

Sale of Randfontein's Cooke Assets

The majority of the conditions precedent, have been fulfilled. It is anticipated that the remaining conditions precedent will be fulfilled on or before 20 November 2008 and the transaction will become effective on 21 November 2008.

A revised purchase consideration of US\$348 million for the Cooke Assets has been agreed. Harmony will receive a total purchase consideration of US\$209 million for 60% of the issued share capital of Rand Uranium.

In exchange for 60% of the issued share capital of Rand Uranium, Harmony will receive US\$40 million on the effective date of the transaction, a further US\$157 million, plus interest thereon at 5% per annum, by 22 April 2009 and the balance of the purchase consideration of approximately US\$12 million as soon as the second stage of the transaction, which relates to its Old Randfontein assets, is finalised, which is anticipated to be on or shortly after 22 April 2009. Pamodzi Resources Fund 1, LLP's (PRF) investors, affiliates of First Reserve and AMCI Capital, have provided Harmony with a guarantee in respect of the payment of the above amounts. In addition, PRF will pledge its shares in Rand Uranium to Harmony as security for RPF's obligation to pay the purchase consideration to Harmony.

11. Segment report

The Group early adopted IFRS 8 Operating Segments, in the 2008 financial year. The standard requires a management approach, under which segment information is presented on the same basis as that used for internal reporting to the chief operating decision-maker (CODM).

The Group has only one product, being gold. In order to determine operating and reportable segments, management reviewed various factors, including geographical location as well as managerial structure. It was determined that

Table of Contents

an operating segment consists of a shaft or a group of shafts managed by a single general manager and management team.

After applying the quantitative thresholds from the standard, the reportable segments were determined as:

Tshepong, Phakisa, Bambanani, Masimong, Target, Doornkop, Elandskraal, Evander operations, Virginia operations, Cooke operations (held for sale and discontinued) and Papua New Guinea. All other operating segments have been grouped together under Other underground or Other surface, under their classification as either continuing or discontinued.

The comparative segment reports have been restated for these changes.

When assessing profitability, the CODM considers the revenue and production costs of each segment. The net of these amounts is the cash operating or loss. Therefore, cash operating profit has been disclosed in the segment report as the measure of profit or loss.

The CODM does not consider depreciation or impairment and therefore these amounts have not been disclosed in the segment report.

The full set of the results for the first quarter ended 30 September 2008 is available on our website at www.harmony.co.za

Forward-looking statements

This quarterly report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 with respect to Harmony's financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. Statements in this quarter that are not historical facts are

forward-looking statements for the purpose of the safe harbor provided by Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and Section 27A of the U.S. Securities Act of 1933, as amended.

Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words expect, anticipates, believes, intends, estimates and similar expressions. These statements are only predictions. All forward-looking statements involve a number of risks, uncertainties and other factors and we cannot assure you that such statements will prove to be correct. Risks, uncertainties and other factors could cause actual events or results to differ from those expressed or implied by the forward-looking statements.

These forward-looking statements, including, among others, those relating to the future business prospects, revenues and income of Harmony, wherever they may occur in this quarterly report and the exhibits to this quarterly report, are necessarily estimates reflecting the best judgment of the senior management of Harmony and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in

Table of Contents

this quarterly report. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward looking statements include, without limitation:

overall economic and business conditions in South Africa and elsewhere;

the ability to achieve anticipated efficiencies and other cost savings;

increases or decreases in the market price of gold;

the occurrence of hazards associated with underground and surface gold mining; the occurrence of labour disruptions;

availability, terms and deployment of capital;

changes in Government regulation, particularly mining rights and environmental regulations;

fluctuations in exchange rates;

currency devaluations and other macro-economic monetary policies; and

socio-economic instability in South Africa and regionally.

This report was approved by the Board of Directors and is signed on their behalf by:
