BASF and Shell to Sell Their Stakes in Basell
to Consortium Led by Access Industries

LUDWIGSHAFEN, Germany & LONDON--(BUSINESS WIRE)--May 5, 2005--BASF and Shell Chemicals are to sell their 50-50 joint venture Basell, one of the world's leading manufacturers of polyolefins, to a consortium led by New York-based Access Industries together with The Chatterjee Group. A corresponding agreement was signed. The sale price will total EUR 4.4 billion, including debt.

The transaction is subject to approval by the relevant antitrust authorities and closing is expected in the second half of 2005.

BASF and Shell announced plans to review options for the joint venture in July 2004. The two companies established Basell as an independent company in 2000 to successfully consolidate their polyolefins businesses across the world. Basell achieved competitive advantages such as cost leadership through world-scale plants, and has developed into one of the world leaders in its industry.

"Basell's recent strong performance has shown that it was the right decision to form the joint venture," said Dr. John Feldmann, member of the Board of Executive Directors of BASF Aktiengesellschaft, and Chairman of Basell's Supervisory Board. "The strategic divestment

Edgar Filing: BASF AKTIENGESELLSCHAFT - Form 6-K

will now create additional value for the BASF Group as part of the company's ongoing portfolio management. In its Plastics segment, BASF will continue to focus its strategic position on styrenics, performance polymers, polyurethanes and their related value chains."

"Basell has successfully consolidated the portfolio of polyolefins assets of the two shareholders to become a major player in the industry," said Fran Keeth, Executive Vice President, Shell Chemicals. "The divestment enables Shell to optimize shareholder value and focus on our strategy of leveraging the synergies between oil products and chemicals activities, to strengthen our core portfolio in Europe and North America, and to grow in Asia and the Middle East."

"I'm very pleased that we are the successful bidder for Basell," said Len Blavatnik, Chairman of Access Industries. "We are experienced in industrial investments in companies that compete in large, cyclical markets, and we believe Basell is an attractively positioned global business with an excellent future. I am very impressed by Basell's track record, and by the company's highly professional and motivated management and workforce."

Dr. Chatterjee, Chairman of The Chatterjee Group, likewise praised Basell's "broad-based customer portfolio, premium market position and leading capability in product and process innovation. We look forward to consolidating Basell's global leadership position through enhanced commitments in technology."

Basell

Basell is headquartered in Hoofddorp, the Netherlands. The company has sales activities in more than 120 countries and operates production sites in 21 countries worldwide. Basell employs a workforce of 6,600 employees: about 5,200 in Europe and about 1,000 in North America. In 2004, Basell posted sales of EUR 6.7 billion.

Basell is the world's largest producer of polypropylene and advanced polyolefins, and is a leading supplier of polyethylene and catalysts. The company is a global leader in the development and licensing of polypropylene and polyethylene processes. These plastics are used in a wide number of applications, for example in the packaging and automotive industries and for consumer goods.

BASF

BASF is the world's leading chemical company: The Chemical Company. Its portfolio ranges from chemicals, plastics, performance products, agricultural products and fine chemicals to crude oil and natural gas. As a reliable partner to virtually all industries, BASF's intelligent solutions and high-value products help its customers to be more successful. BASF develops new technologies and uses them to open up additional market opportunities. It combines economic success with environmental protection and social responsibility, thus contributing to a better future. In 2004, BASF had approximately 82,000 employees and posted sales of more than EUR 37 billion. BASF shares are traded on the stock exchanges in Frankfurt (BAS), London (BFA), New York (BF), Paris (BA) and Zurich (AN). Further information on BASF is available on the Internet at www.basf.com.

Shell

Shell Chemicals collectively refers to the companies of the Royal Dutch/Shell Group engaged in the chemicals business. Shell chemicals companies manufacture and deliver petrochemical building blocks and polyolefins to industrial customers. These products are widely used in plastics, coatings and detergents.
