FOR IMMEDIATE RELEASE

**NETASQ STANDARDIZES ON SILICOM**

*Following Successful Utilization of Silicom's 6-Port Gigabit Ethernet Adapters, NETASQ Begins Using Quad and Dual Port Models*

**KFAR SAVA, Israel September 13, 2004 Silicom Ltd. (NASDAQ:SILCF)** today announced that NETASQ, the leading European manufacturer of IPS-Firewall appliances, has standardized on Silicom's Multiport Gigabit Ethernet adapters to achieve high-speed multiport connectivity for its high-end state-of-the-art firewall and VPN security appliances. The decision followed NETASQ's successful utilization of Silicom's unique 6-port Gigabit Ethernet adapters and its evaluation and qualification of Silicom's Quad-Port and Dual-Port models.

NETASQ accompanied its decision to standardize on Silicom's adapters with an initial purchase order for Silicom's Dual-Port Fiber and Dual-Port copper Gigabit Ethernet adapters.

Our use of Silicom's 6-port adapters during the last few months has given us the high-speed connectivity we were looking for, said Matthieu Bonenfant, Product Manager at NETASQ. Our evaluation demonstrates equally impressive multiport connectivity performance for Silicom's other solutions.

NETASQ designs and markets a full range of firewall and VPN appliances used to provide real-time security in high-traffic mission critical networks. Its security appliances use a multi-layered approach that stops network and content-based threats at the edge of the network without compromising performance.

Our relationship with NETASQ demonstrates the long-term promise of the design win mechanism, said Shaiké Orbach, Silicom's President and CEO. After awarding us a modest design win for just one product, NETASQ has now standardized on our adapters for all of its multiport Gigabit Ethernet connectivity needs, and has begun to place purchase orders. As such, each new design win represents the potential to build into a steady stream of sales of our Server/Storage/Security products.

**About NETASQ**

Created in 1998, NETASQ is a European company which develops and markets innovative IPS firewall and VPN security solutions for all types of companies: small-to-medium sized firms, large enterprises and government agencies. NETASQ has full control over its proprietary in-line Intrusion Prevention technology: ASQ (Active Security Qualification), thereby ensuring its customers the longevity required for best-of-breed security appliances which adapt to the ever-changing risks faced by information systems. NETASQ distributes its products via a network of partners, including distributors, ISPs, approved VARs, retailers and integrators. Over 600 partners have been trained and certified by the NETASQ Institute. For more information, please visit: [www.netasq.com](http://www.netasq.com)

**About Silicom**

Silicom Ltd. is an industry-leading provider of communications connectivity solutions and advanced enabling technologies, making it the preferred time-to-market and performance partner to many of the industry's significant players. With core expertise in high performance, innovative technologies for networking and operating systems, the Company develops high-performance networking solutions for manufacturers of storage, Internet traffic management, security, and other types of server-based systems characterized by multi-port high-performance environments. Silicom also offers an extensive range of PC Cards, PCI cards and USB products. For more information, please visit: [www.silicom.co.il](http://www.silicom.co.il).

Statements in this press release which are not historical data are forward-looking statements which involve known and unknown risks, uncertainties, or other factors not under the Company's control, which may cause actual results, performance, or achievements of the Company to be materially different from the results, performance, or other expectations implied by these forward-looking statements. These factors include, but are not limited to, those detailed in the Company's periodic filings with the Securities and Exchange Commission. The Company disclaims any duty to update such statements.
