## Non-GAAP Financial Measures and Reconciliation

Below we provide adjusted net income attributable to ICE and adjusted earnings per share attributable to ICE common shareholders as additional information regarding our operating results. We use these non-GAAP measures internally to evaluate our performance and in making financial and operational decisions. When viewed in conjunction with our U.S. generally accepted accounting principles, or GAAP, results and the accompanying reconciliation, we believe that our presentation of these measures provides investors with greater transparency and supplemental data relating to our financial condition and results of operations. In addition, we believe the presentation of these measures is useful to investors for period-to-period comparison of results because the items described below are not reflective of our core business performance. These financial measures are not in accordance with, or an alternative to, GAAP financial measures and may be different from non-GAAP measures used by other companies. Investors should not rely on any single financial measure when evaluating our business. We strongly recommend that investors review the GAAP financial measures included in our Annual Report on Form 10-K, including our consolidated financial statements and the notes thereto.

Adjusted net income attributable to ICE for the periods presented below is calculated by adding net income attributable to ICE, the adjustments described below, and the related income tax effect. The adjustments to net income attributable to ICE, including the transaction costs ICE has incurred in connection with the proposed acquisition of NYSE Euronext, are not reflective of our core business performance. For the year and three months ended December 31, 2011, we included all acquisition-related transaction costs as non-GAAP adjustments. We now include acquisition-related transaction costs as part of our core business expenses, except for those that are directly related to the announcement, closing, financing or termination of a transaction. However, we are including all of the acquisition-related transaction costs relating to our current acquisition of NYSE Euronext as non-GAAP adjustments given the size of the deal. The following table reconciles net income attributable to ICE to adjusted net income attributable to ICE and calculates adjusted earnings per share attributable to ICE common shareholders for the periods presented below:
