Enclosures: 1. 1st Quarter Results announcement made on 31 July 2003

July 31, 2003

FIRST QUARTER RESULTS TO JUNE 30, 2003

FIRST QUARTER HIGHLIGHTS

## Edgar Filing: BT GROUP PLC - Form 6-K

- Earnings per share\* of 4.1 pence, up 64 per cent
- . Profit before taxation\* of GBP502 million, up 56 per cent
- . Group turnover maintained at GBP4,586 million
- . Free cash generated of GBP618 million (GBP206 million last year)
- . Net debt reduced below GBP9 billion, GBP4.4 billion less than June 30, 2002
- One million broadband connections achieved in June

### Chief Executive's statement

Ben Verwaayen, Chief Executive, said:

"Our focus on financial discipline, defending our core business and creating new business streams continues to deliver results. I am pleased to report earnings per share\* growth of 64 per cent on flat revenues, free cash flow of GBP618 million and net debt reduced below GBP9 billion.

The group reached another key milestone early, achieving one million broadband connections in June. This was also a further record quarter for the corporate order book and the group continues to deliver efficiency savings throughout the business."

\* Before goodwill amortisation and exceptional items. The full profit and loss account is presented on page 12.

### RESULTS FOR THE FIRST QUARTER TO JUNE 30, 2003

BT Group's results before goodwill amortisation and exceptional items

	First quarter			Year M
	2003 GBPm	2002 GBPm	Better (worse) %	
Group turnover	4,586	4,587	-	
EBITDA	1,460	1,303	12	
Group operating profit	730	570	28	
Net interest charge	225	300	25	
Profit before taxation	502	322	56	
Profit after taxation	349	215	62	
Earnings per share	4.1p	2.5p	64	

## Edgar Filing: BT GROUP PLC - Form 6-K

Capital expenditure	552	549	(1)
Net debt	8,988	13,397	33

Total earnings per share and profit before tax, after goodwill amortisation and exceptional items, for the first quarter are 4.1 pence (2002 - 3.2 pence) and GBP498 million (2002 - GBP384 million) respectively.

The results in the table above and the commentary focus on the results before goodwill amortisation and exceptional items.

The full profit and loss account, cash flow statement and balance sheet are provided below.

### GROUP RESULTS

Group turnover was flat year on year at GBP4,586 million in the first quarter. This performance represents an improvement on the 1 per cent underlying decline in turnover in the fourth quarter of last year. The 3 per cent decline in the group's core business was offset by the 23 per cent growth in new wave revenues. The consumer sector has shown continued growth although revenue from SME's declined.

Group operating profit before goodwill amortisation at GBP730 million for the quarter was GBP160 million higher than the first quarter of last year. Leaver costs of GBP11 million were GBP145 million lower than the first quarter of last year and further operational efficiencies have resulted in cost savings across the lines of business. These savings were partly offset by increased pension costs, wage inflation, higher national insurance rates and the continued investment in new wave activities. Group operating profit margin increased to 15.9 per cent (12.4 per cent last year) and excluding leaver costs was 16.2 per cent (15.8 per cent last year).

BT's share of associates and joint ventures operating losses before goodwill amortisation was GBP3 million in the quarter (GBP49 million profit last year) with the reduction due to the disposal of our stake in Cegetel in January 2003.

Net interest payable was GBP225 million for the quarter, an improvement of GBP75 million against last year as a result of the reduction in the level of net debt.

The above factors resulted in the group achieving a profit before taxation, goodwill amortisation and exceptional items of GBP502 million in the quarter, an increase of 56 per cent.

The taxation charge was GBP153 million for the quarter on the profit before goodwill amortisation and exceptional items, an effective rate of 30.5 per cent (33.2 per cent last year). The lower effective tax rate partially reflects reduced overseas losses for which relief is not available.

Earnings per share before goodwill amortisation and exceptional items were 4.1 pence for the first quarter (2.5 pence last year), an increase of 64 per cent. Earnings per share after goodwill amortisation and exceptional items were 4.1 pence compared to 3.2 pence last year, an increase of 28 per cent.

### Customer satisfaction

BT has an extensive market research programme conducted by external agencies which focuses on the level and causes of customer dissatisfaction. The group

## Edgar Filing: BT GROUP PLC - Form 6-K

achieved a 6 per cent improvement in the level of customer dissatisfaction over the quarter, including significant improvements among the group's Global Services and Wholesale customers.

### Broadband

A major broadband milestone was passed in the first quarter. The initial target of one million wholesale broadband connections was achieved in early June, ahead of the target date. The challenging target had been set in February 2002 when BT had only 143,000 connections.

There was an installed base of 1,058,000 ADSL lines at June 30, 2003 and at the end of the quarter weekly orders were in excess of 25,000, a 127 per cent increase compared to the end of the first quarter last year.

At June 30, 2003 ADSL broadband was available to 71 per cent of the country. In July, trigger levels were set for a further 500 exchanges under the innovative demand registration scheme, which means that if the demand is there, ADSL broadband will be made available to 90 per cent of UK homes and businesses.

### Lines of business results

With effect from January 1, 2003 the operations of BT Openworld were transferred under the management control of BT Retail. The prior periods have been restated to report BT Openworld's results as part of BT Retail for all periods under review.

There is extensive trading between BT's lines of business and the line of business profitability is dependent on the transfer price levels. The intra-group trading arrangements are subject to review and have changed in certain circumstances so as to reflect reorganisations within the group and regulatory changes. The comparative figures for the lines of business have been restated to reflect these changes but there is no impact at a group level.

The line of business commentaries refer to EBITDA, which is defined as group operating profit before depreciation and amortisation. In addition, reference is made to operating free cash flow, which is defined as EBITDA less capital expenditure.

### OPERATING PERFORMANCE BY LINE OF BUSINESS

First quarter ended June 30, 2003 (i)	Group turnover GBPm	Group operating profit (loss) (iii) GBPm	EBITDA GBPm
BT Retail	3,332	392	439
BT Wholesale	2,769	436	910
BT Global Services	1,345	(51)	95
Other	6	(47)	16
Intra-group items (ii)	(2,866)	-	-
Total	4,586	730	1,460

## Edgar Filing: BT GROUP PLC - Form 6-K

i. See note 2 below for prior year figures.

- (ii) Elimination of intra-group turnover between businesses, which is included in the turnover of the originating business.
- (iii) Before goodwill amortisation.

### BT Retail

	First quarter ended June 30			
	2003 GBPm	2002* GBPm	Better (worse) GBPm	%
Group turnover	3,332	3,345	(13)	-
Gross margin	924	969	(45)	(5)
Sales, general and administration costs	485	553	68	12
EBITDA	439	416	23	6
Depreciation	47	51	4	8
Operating profit	392	365	27	7
Capital expenditure	20	19	(1)	(5)
Operating free cash flow	419	397	22	6

\*Restated to reflect changes in intra-group trading arrangements.

Growth in the new wave revenues of 20 per cent has offset the 3 per cent decline in the core revenues, resulting in flat revenues compared to the first quarter of last year. A significant proportion of the core decline was due to reduced revenues from private circuits.

BT Retail increased operating profit by 7 per cent and operating free cash flow by 6 per cent compared to the first quarter of last year. The operating profit improvement is primarily driven by continued cost reduction programmes, including lower property and IT costs, and lower leaver costs partially offset by the expected decline in the gross margin and investment in new wave products and services.

	First quarter ended June 30			
	2003 GBPm	2002* GBPm	Better (worse) GBPm	%
BT Retail turnover				

## Edgar Filing: BT GROUP PLC - Form 6-K

Voice Services	2,307	2,362	(55)	(2)
Intermediate Products	586	616	(30)	(5)
Core	2,893	2,978	(85)	(3)
New Wave	439	367	72	20
Total	3,332	3,345	(13)	-
Sales to other BT businesses incl. above	198	192	6	3

\*Restated to reflect changes in intra-group trading arrangements.

Turnover from voice services was 2 per cent lower than the first quarter of last year driven primarily by lower volumes of fixed network calls.

The overall market for fixed to fixed voice calls is estimated to have declined by 3 per cent compared to the first quarter of last year. In the residential fixed voice market BT Retail has maintained market share, as measured by volume of fixed voice minutes, at around 73 per cent. In the business fixed voice market, BT Retail's market share has declined by 0.8 percentage points to 42 per cent compared to the last quarter.

Total geographic (local, national and international) call volumes declined by 7 per cent compared to the first quarter of last year.

In the consumer market, BT Retail continued to innovate with the launch in June of its improved, new and simpler BT Together packages which for the first time in the UK removed the difference between local and national call rates; the three packages allow customers a choice from a maximum call charge of 6 pence for up to 60 minutes, or free UK calls for a fixed monthly fee. For the second quarter running, the historical decline in BT residential international call volumes was stemmed by the extension of the BT Together packages to international calls, launched in the third quarter of last year. Existing customers had signed up for 165,000 international packages by June 30, 2003. Including revenues from new wave products and services, in the consumer sector, the average revenue per customer household has increased.

In the business market, the decline in geographic call volumes was driven by a combination of customers switching out of traditional telephony into services, such as VPN's, which are not measured in minutes and the continued competitive pressure of Carrier Pre-Selection in the SME market. BT Business Plan was launched in January 2003 and has attracted more than 100,000 business locations and 65,000 customers by July 25, 2003. This highly competitive package places a ceiling of 10 pence on national and local business calls, rewards loyalty and provides a single BT customer contact. The package was enhanced in July, offering among other features, outstanding value on international calls, with for example, call prices to the US capped at 10 pence for 60 minutes.

Within the major corporate market the defence of core revenues is based on the migration of traditional voice only services into managed ICT (information, communications and technology) contracts; enhanced account management; and deployment of Billing Analyst, an application which allows large corporates to

## Edgar Filing: BT GROUP PLC - Form 6-K

more closely manage their telecommunications spend.

Internet, data and fixed to mobile call volumes declined by 9 per cent, with fixed to mobile growth of 5 per cent offset by a reduction in internet and data related call minutes of 11 per cent mainly due to customers continuing to switch to flat rate internet access products and broadband.

Within voice services, external turnover from directory services reduced by GBP7 million in the first quarter compared to last year with the deregulation of this market and BT's replacement of 192 by 118 500.

Turnover from intermediate products of GBP586 million decreased by 5 per cent compared to the first quarter of last year mainly driven by a decline in private circuits as customers migrate to cheaper partial private circuits. The effect of this on the BT Group revenues is about GBP60 million in the first quarter.

New wave revenue increased by 20 per cent year on year in the quarter with the continued focus on the ICT, broadband and mobility products and solutions. During the first quarter, further momentum was gained in the ICT order book with contract wins with Royal Mail, Visa, Travelex, Securicor and Sheffield City Council.

Both BT Broadband and BT Openworld Broadband continue to perform strongly in the marketplace with a combined customer base of 536,000 at June 30, 2003. This represents 51 per cent of BT Wholesale's total ADSL connections.

The total number of BT Retail lines, which includes voice, digital and broadband, increased by 1 per cent, to 29.6 million, since June 30, 2002, reflecting the growth in digital lines and broadband offsetting the reduction in voice lines.

The gross margin reduced by GBP45 million (1.3 percentage points to 27.7 per cent) compared to the first quarter of last year. Lower call volumes and the migration from retail private circuits to partial private circuits, being only partially offset by lower wholesale prices, account for the reduction.

Cost transformation programmes, including a reduction in expenses such as travel, accommodation and IT, lower service costs resulting from improvements in service quality, and billing initiatives and lower leaver costs have generated GBP68 million (12 per cent) savings in sales, general and administration costs against the first quarter of last year. These programmes delivered savings in the core business which were partially offset by investment in new wave activities.

Operating profit in the first quarter of GBP392 million was 7 per cent higher than the prior year which enabled BT Retail to contribute an operating free cash flow (EBITDA less capital expenditure) of GBP419 million in the quarter; GBP22 million better than the first quarter of last year.

### BT Wholesale

	First quarter ended June 30			
	2003 GBPm	2002* GBPm	Better (worse) GBPm	%
External turnover	879	854	25	3
Internal turnover	1,890	1,894	(4)	-

## Edgar Filing: BT GROUP PLC - Form 6-K

Group turnover	2,769	2,748	21	1
Total operating costs before depreciation	1,887	1,974	87	4
Other operating income	28	31	(3)	(10)
EBITDA	910	805	105	13
Depreciation	474	472	(2)	-
Operating profit	436	333	103	31
Capital expenditure	368	359	(9)	(3)
Operating free cash flow	542	446	96	22

\*Restated to reflect changes in intra-group trading arrangements.

BT Wholesale's turnover for the first quarter of GBP2,769 million was 1 per cent higher than last year, with external revenue increasing by 3 per cent. Operating profit of GBP436 million was 31 per cent higher and operating free cash flow of GBP542 million was 22 per cent higher than the first quarter of last year. Before leaver costs of GBP102 million in the first quarter of last year (GBPnil this year), both operating profit and operating free cash flow have been broadly maintained at last year's level.

Within traditional products, the impact of price reductions, due mainly to the Network Charge Control (NCC) pricing formulae and Oftel determinations, have offset the growth in volumes and continued to stem external turnover growth. FRIACO revenues continue to grow but are partly offset by the decrease in the conveyance revenues they replace. Revenues from retail private circuits have continued to decline, due to the migration of customers to lower priced partial private circuits.

New wave external revenues of GBP72 million showed a strong growth of 44 per cent over the first quarter of last year. This reflected gains made in broadband, facilities management and consultancy.

Internal turnover in the first quarter of GBP1,890 million was flat year on year due to network volume growth being offset by price reductions.

Operating costs, excluding depreciation, of GBP1,887 million decreased by 4 per cent. The first quarter of last year included one-off early leaver payments of GBP102 million. Excluding leaver costs, operating costs would be broadly flat despite a 3 per cent increase in network volumes, reflecting the continued drive for operational efficiencies.

Operating profit at GBP436 million increased by 31 per cent and operating profit margin of 16 per cent increased by 4 percentage points - both movements mainly reflecting the leaver payments in the prior year.

BT Wholesale has maintained its focus on managed cash costs (defined as operating costs excluding payments to other network operators and depreciation, plus capital expenditure) through its best in class costs programme. Managed cash cost savings were GBP65 million for the quarter and BT Wholesale remains on

## Edgar Filing: BT GROUP PLC - Form 6-K

track to achieve the full year target savings of GBP200 million after allowing for price and volume effects.

### BT Global Services

	First quarter ended June 30			
	2003 GBPm	2002* GBPm	Better (worse) GBPm	%
Group turnover	1,345	1,284	61	5
EBITDA	95	28	67	239
Group operating loss	(51)	(112)	61	54
Capital expenditure	102	96	(6)	(6)
Operating free cash flow	(7)	(68)	61	90

\*Restated to reflect changes in intra-group trading arrangements.

BT Global Services has produced a very positive start to the year in achieving significant improvements in profitability and cash flow despite continuing difficult market conditions. Operating losses for the quarter were more than halved to GBP51 million.

Turnover for the quarter rose by 5 per cent to GBP1,345 million despite a 6 per cent fall in Global Carrier. This reduction is in line with the previous quarter and is partly caused by the decline in trade with AT&T and MCI following the unwind of the Concert global venture. Solutions grew by 16 per cent partially reflecting growth in orders over the past three quarters and Global Products grew by 10 per cent on the back of strong growth in MPLS revenues. Syntegra achieved growth of 1 per cent in what remains a difficult market.

Solutions continued its strong momentum in the corporate sector from last year by signing record sales orders to the value of GBP1.9 billion in the first quarter. Despite a strong revenue performance, the operating profits in Solutions reflect contract costs that are recognised up-front in accordance with the group's accounting policies.

A combination of higher gross margin and lower network, selling, general and administration costs following cost reduction initiatives throughout the previous year helped BT Global Services generate an EBITDA improvement of GBP50 million before leaver costs over the first quarter of last year. Leaver costs were GBP8 million for the first quarter (GBP25 million last year).

Capital expenditure totalled GBP102 million and was GBP6 million higher than the first quarter of last year. Operating free cash outflow (EBITDA less capital expenditure) was consequently 90 per cent (GBP61 million) better than the first quarter of last year and before leaver costs there was a cash inflow of GBP1 million.

### CASH FLOW AND NET DEBT

Cash inflow from operating activities amounted to GBP1,509 million in the first quarter, a year on year increase of GBP197 million. This improvement reflects

## Edgar Filing: BT GROUP PLC - Form 6-K

the higher operating profits and better working capital management.

Free cash flow (before acquisitions and disposals, dividends and financing) was GBP618 million in the quarter, representing a year on year improvement of GBP412 million. As well as improvements in cash flow from operations, free cash flow benefited from the lower cash outflow from fixed asset purchases, interest and tax.

Net debt at June 30, 2003 was GBP8,988 million, a reduction of GBP585 million in the first quarter and GBP4,409 million lower when compared to the position at June 30, 2002.

The group's gross borrowings at June 30, 2003 totalled GBP15,993 million (GBP16,004 million at March 31, 2003). After deducting short term investments and cash of GBP7,005 million (GBP6,431 million at March 31, 2003), net debt was GBP8,988 million at June 30, 2003.

---

The second quarter and half year's results are expected to be announced on November 13, 2003.

### NOTES

#### 1 Basis of preparation

The unaudited interim results of BT Group, which are not statutory accounts, have been prepared on the basis of the accounting policies as set out in the report and accounts of BT Group plc for the year ended March 31, 2003. Figures for the year ended March 31, 2003 are extracts from the group accounts for that year.

The group accounts for the year ended March 31, 2003, on which the auditors issued an unqualified report which did not contain a statement under Section 237 (2) or (3) of the Companies Act 1985, were approved by the board of directors on May 21, 2003, were published on June 4, 2003 and have been delivered to the Registrar of Companies.

#### 2. Results of businesses

The tables below show the results of BT's lines of business. There is extensive trading between many of the business units and profitability is dependent on the transfer price levels. These intra-group trading arrangements are subject to review and have changed in certain instances. Comparative figures have been

## Edgar Filing: BT GROUP PLC - Form 6-K

restated for these changes. The eliminations are intra-group eliminations.

With effect from January 1, 2003 the operations of BT Openworld were transferred under the management control of BT Retail. The comparative figures have been restated to report BT Openworld as part of BT Retail for all the periods under review.

Net (charge) credit before tax and minority interests	(4)	62

7 Earnings per share

The basic earnings per share are calculated by dividing the profit attributable to shareholders by the average number of shares in issue after deducting the company's shares held by employee share ownership trusts. In calculating the diluted earnings per share, share options outstanding and other potential ordinary shares have been taken into account.

The average number of shares in the periods was:

	First quarter ended June 30	
	2003	2002
	million of shares	
Basic	8,623	8,619
Diluted	8,673	8,672

8 Reconciliation of operating profit to operating cash flow

	First quarter ended June 30	
	2003	2002
	GBPm	GBPm

Edgar Filing: BT GROUP PLC - Form 6-K

Group operating profit	727	562
Depreciation and amortisation	733	741
Changes in working capital	12	5
Provision, pension movements and other	37	4
Net cash inflow from operating activities	1,509	1,312

Forward-looking statements - caution advised

Certain statements in this results release are forward-looking and are made in reliance on the safe harbour provisions of the US Private Securities Litigation Reform Act of 1995. These statements include, without limitation, those concerning: expectations regarding broadband growth and the benefits of other new wave initiatives; the possible or assumed future results of operations of BT and/or its lines of business; expectations regarding revenue growth,

## Edgar Filing: BT GROUP PLC - Form 6-K

capital expenditure, investment plans, cost reductions, improved efficiencies and cash savings, and pension funding.

Although BT Group believes that the expectations reflected in these forward-looking statements are reasonable, it can give no assurance that these expectations will prove to have been correct. Because these statements involve risks and uncertainties, actual results may differ materially from those expressed or implied by these forward-looking statements.

Factors that could cause differences between actual results and those implied by the forward-looking statements include, but are not limited to: material adverse changes in economic conditions in the markets served by BT and its lines of business; future regulatory actions and conditions in BT's operating areas, including competition from others in the UK and other international communications markets; selection by BT and its lines of business of the appropriate trading and marketing models for its products and services; fluctuations in foreign currency exchange rates and interest rates; technological innovations, including the cost of developing new products and the need to increase expenditures for improving the quality of service; prolonged adverse weather conditions resulting in a material increase in overtime, staff or other costs; developments in the convergence of technologies; the anticipated benefits and advantages of new technologies, products and services, including broadband and other new wave initiatives, not being realised; the timing of entry and profitability of BT and its lines of business in certain communication markets; significant changes in market shares for BT and its principal products and services; to the extent that BT chooses to sell assets or minority interests in its subsidiaries, prevailing market levels for such sales; and general financial market conditions affecting BT's performance. BT Group undertakes no obligation to update any forward-looking statements whether as a result of new information, future events or otherwise.
