Consolidated Financial Results

April 1, 2005 December 31, 2005

February 7, 2006

In preparing its consolidated financial information, ORIX Corporation and its subsidiaries have complied with accounting principles generally accepted in the United States of America, except as modified to account for stock splits in accordance with the usual practice in Japan.

U.S. Dollar amounts have been calculated at Yen 118.07 to \$1.00, the approximate exchange rate prevailing at December 31, 2005.

These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under Risk Factors in the Company's annual report on Form 20-F filed with the United States Securities and Exchange Commission.

The Company believes that it will be considered a passive foreign investment company for United States Federal income tax purpose in the year to which these consolidated financial results relate and for the foreseeable future by reason of the composition of its assets and the nature of its income. A U.S. holder of the shares or ADSs of the Company is therefore subject to special rules generally intended to eliminate any benefits from the deferral of U.S. Federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.

Summary of Consolidated Financial Results

1. Nine Months Ended December 31, 2005**Financial Highlights**

Income before Income Taxes*	192,023 million yen (Up 71% year on year)
Net Income	126,097 million yen (Up 86% year on year)
Earnings Per Share (Basic)	1,434.39 yen (Up 77% year on year)
Earnings Per Share (Diluted)	1,359.01 yen (Up 83% year on year)
Shareholders' Equity Per Share	10,099.03 yen (Up 21% on March 31, 2005)
ROE (Annualized)	20.7% (December 31, 2004: 15.0%)
ROA (Annualized)	2.64% (December 31, 2004: 1.57%)

* Income before income taxes refers to income before discontinued operations and income taxes.

Revenues: 658,802 million yen (Up 6% year on year)

Revenues increased 6% to 658,802 million yen in the first nine months of this fiscal year compared with the same period of the previous fiscal year. Although real estate sales decreased year on year, revenues from direct financing leases, operating leases, interest on loans and investment securities, brokerage commissions and net gains on investment securities, life insurance premiums and related investment income, gains on sales of real estate under operating leases, and other operating revenues were up compared to the same period of the previous fiscal year.

Furthermore, transportation revenues, which were recorded in the previous fiscal year, are recorded as equity in net income of affiliates during this fiscal year as shown in (Note 1) on page 2.

Revenues from direct financing leases increased 11% to 92,264 million yen compared to the same period of the previous fiscal year. In Japan, revenues from direct financing leases performed steadily overall and were up 10% year on year. Revenues from direct financing leases were up due to the larger contribution from the securitization of direct financing leases compared to the same period of the previous fiscal year and the operations of ORIX Kitakanto Corporation, which entered the ORIX Group during the previous fiscal year. Overseas, revenues were up 13% year on year. Although The Americas segment showed signs of improvement, revenues were lower as a result of a lower average balance of operating assets compared to the same period of the previous fiscal year, while the expansion of the leasing operations in the Asia, Oceania and Europe segment resulted in the higher overall revenues.

Revenues from operating leases increased 14% to 150,396 million yen compared to the same period of the previous fiscal year. In Japan, although revenues from the precision measuring and other equipment rental operations were down year on year, there was an increase in automobile and real estate operating leases that contributed to a 10% increase year on year. Overseas, revenues were up 26% year on year due to the expansion of automobile operating leases in the Asia, Oceania and Europe segment.

Edgar Filing: ORIX CORP - Form 6-K

Revenues from interest on loans and investment securities increased 20% to 117,987 million yen compared to the same period of the previous fiscal year. In Japan, interest on loans and investment securities increased 18% year on year. The increase in revenues was due mainly to an expansion of revenues associated with loans to corporate customers, including non-recourse loans, and the loan servicing operations. Overseas, revenues were up 26% year on year, due to the contribution from loans to corporate customers in The Americas segment.

- 1 -

Table of Contents

Revenues from brokerage commissions and net gains on investment securities increased 37% to 28,200 million yen compared to the same period of the previous fiscal year. Brokerage commissions were up 91% year on year due to an increase in the level of trading volume on the stock market in Japan. Net gains on investment securities were up 27% year on year due to the sale of securities mainly associated with our venture capital operations and corporate rehabilitation fund investments in Japan and securities investments in The Americas segment.

Life insurance premiums and related investment income were up 1% year on year to 98,175 million yen. Life insurance premiums were flat year on year, while life insurance related investment income increased year on year.

Real estate sales decreased 22% year on year to 53,459 million yen. Although revenues associated with the sales of residential condominiums to buyers increased compared to the same period of the previous fiscal year, there was no sale of office buildings and other real estate developments in the first nine months of this fiscal year that was recorded in the same period of the previous fiscal year. Furthermore, residential condominiums developed through certain joint ventures were accounted for by the equity method, and are included as a net of revenues and selling costs in equity in net income of affiliates. The revenues from the aforementioned joint ventures were 1,656 million yen.

Gains on sales of real estate under operating leases were up almost nine-fold year on year to 9,433 million yen due to the increase in sales of rental purpose office buildings and other real estate.

Other operating revenues increased 33% year on year to 108,888 million yen due to the increase in revenues associated with companies in which we invested as part of our corporate rehabilitation business in the previous fiscal year that contributed from the beginning of this fiscal year and increase in revenues associated with our integrated facilities management operations.

(Note 1)

Transportation revenues and costs of transportation revenues associated with the operations of Footwork Express Co., Ltd. in which we invested as part of our corporate rehabilitation business, were included in the same period of the previous fiscal year based on a three-month lag basis as permitted under U.S. GAAP. However, ORIX's share in Footwork Express Co., Ltd. was reduced in December 2004 due to an increase in capital whereby the substantive participating rights of a minority shareholder were increased. As a result, ORIX no longer has a controlling financial interest in the company and accounted for this company as an equity method affiliate at the end of the fiscal year ended March 31, 2005. ORIX has started recording its proportionate share of net income or loss of the company by the equity method from the beginning of the fiscal year ending March 31, 2006 instead of recording transportation revenues and costs of transportation revenues.

Expenses: 490,454 million yen (Down 8% year on year)

Expenses were down 8% to 490,454 million yen compared with the same period of the previous fiscal year. Although interest expense, costs of operating leases, other operating expenses, and selling, general and administrative expenses increased, life insurance costs, costs of real estate sales, provision for doubtful receivables and probable loan losses, write-downs of long-lived assets, and write-downs of securities were down year on year. For details on costs of transportation revenues, please see (Note 1) shown above.

Interest expense was up 14% year on year to 46,242 million yen. In Japan, interest expense increased due to the higher average debt levels, and interest expense also increased overseas due to the higher interest rates despite the lower average debt levels.

Edgar Filing: ORIX CORP - Form 6-K

Costs of operating leases were up 11% year on year to 101,281 million yen accompanying the increase in revenues from operating leases.

Life insurance costs decreased 5% year on year to 82,976 million yen due mainly to lower insurance payments.

- 2 -

Table of Contents

Costs of real estate sales were down 26% year on year to 46,013 million yen accompanying the decrease in real estate sales. Furthermore, 5,230 million yen in selling costs associated with residential condominiums developed through certain joint ventures were accounted for by the equity method.

Other operating expenses were up 35% year on year to 66,307 million yen accompanying the increase in other operating revenues.

Selling, general and administrative expenses were up 5% year on year to 132,310 million yen. Although there were no expenses associated with Footwork Express Co., Ltd., which became an equity method affiliate ((Note 1) on page 2), an increase in costs, which were included from the beginning of this fiscal year, associated with an increase in the number of consolidated companies in the previous fiscal year and expansion of business scope led to the higher expenses.

Despite an increase in operating assets, provision for doubtful receivables and probable loan losses was down 56% year on year to 11,987 million yen due to a lower level of non-performing assets.

Write-downs of long-lived assets were down year on year to 521 million yen.

Write-downs of securities were down 3% year on year to 3,878 million yen as we recorded write-downs associated mainly with equity investments made by our venture capital operations in Japan.

Net Income: 126,097 million yen (Up 86% year on year)

Operating income was up 85% year on year to 168,348 million yen.

Equity in net income of affiliates was up 16% to 20,716 million yen compared to the same period of the previous fiscal year due to the steady performance of equity method affiliates in both Japan and overseas. Included in equity in net income of affiliates are earnings on investments in operating companies accounted for by the equity method and earnings on investments in residential condominiums developed through certain joint ventures, which are also accounted for by the equity method. The equity in net income of affiliates associated with residential condominium joint ventures was a loss of 3,574 million yen, which is primarily attributable to the upfront recognition of advertising expenses, associated with some large-scale residential condominium development projects, preceding the revenue recognition of completed sales upon title transfer to buyers.

Gains on sales of subsidiaries and affiliates and liquidation loss were down 17% year on year to 2,959 million yen.

Income before discontinued operations and income taxes increased 71% year on year to 192,023 million yen.

Edgar Filing: ORIX CORP - Form 6-K

Discontinued operations, net of applicable tax effect (Note 2) were up 150% year on year to 13,221 million yen.

As a result, net income increased 86% year on year to 126,097 million yen.

(Note 2)

Subsidiaries, businesses, and real estate under operating leases that have been sold or that are to be disposed for which there is no significant continuing involvement, are reclassified to discontinued operations. Income and expenses generated by such subsidiaries, businesses, and real estate under operating leases are retroactively reclassified.

Operating Assets: 5,611,344 million yen (Up 9% on March 31, 2005)

Operating assets were up 9% on March 31, 2005 to 5,611,344 million yen as all operating asset categories were up.

- 3 -

Table of Contents

Segment Information (Segment Profits refer to income before income taxes)

Segment profits were up year on year for the Corporate Financial Services, Automobile Operations, Real Estate-Related Finance, Real Estate, Life Insurance, Other, The Americas, and Asia, Oceania and Europe segments, while the Rental Operations segment was lower compared to same period of the previous fiscal year.

The results of the reported segments from April 1, 2005 reflect the revised operating structure following the reorganization of the Company. Accordingly, the real estate-related equity investment operations and the REIT asset management operations, which had been included in the Real Estate-Related Finance segment, were included in the Real Estate segment from the first quarter of this fiscal year (Please refer to (Note 1) on page 14 of the Segment Information).

Operations in Japan

Corporate Financial Services Segment:

Segment revenues were up 22% year on year to 74,671 million yen due to the expansion of loans to corporate customers, an increase in contribution from direct financing leases compared to the same period of the previous fiscal year, and due to the recognition of gains from securitization.

Segment profits increased 35% to 38,445 million yen compared to 28,556 million yen in the same period of the previous fiscal year due to the increase in segment revenues and the lower provision for doubtful receivables and probable loan losses as a result of the lower level of non-performing assets.

Segment assets increased 9% on March 31, 2005 to 1,639,685 million yen due to an increase in loans to corporate customers despite the lower level of direct financing leases as a result of securitization.

Automobile Operations Segment:

Segment revenues increased 9% year on year to 72,706 million yen. Although the automobile rental operations were lower compared to the same period of the previous fiscal year, the automobile leasing operations expanded.

Segment profits increased 14% to 18,590 million yen in line with the increase in segment revenues compared to 16,247 million yen in the same period of the previous fiscal year.

Segment assets increased 12% on March 31, 2005 to 504,276 million yen due to the expansion of the automobile leasing operations.

Rental Operations Segment:

Segment revenues were down 3% year on year to 49,178 million yen as the precision measuring and other equipment rental operations had fewer orders from electronics and communications equipment manufacturers despite an increase in revenues from transactions being accounted for as direct financing leases.

Segment profits decreased 10% to 6,612 million yen compared to 7,314 million yen in the same period of the previous fiscal year. Although gains on investment securities were recorded, the reduction in segment revenues resulted in the lower profits.

Segment assets were up 2% on March 31, 2005 to 120,962 million yen.

Real Estate-Related Finance Segment:

Segment revenues increased 10% year on year to 51,333 million yen due to the expansion of revenues associated with corporate loans, including non-recourse loans, the loan servicing operations, and gains on investment securities.

Table of Contents

Segment profits increased 96% to 26,770 million yen compared to 13,664 million yen in the same period of the previous fiscal year due to the increase in segment revenues and reduction in non-performing assets, which resulted in a lower provision for doubtful receivables and probable loan losses.

Segment assets increased 7% on March 31, 2005 to 1,027,610 million yen due mainly to the increase in corporate loans.

Real Estate Segment:

Segment revenues increased 17% year on year to 146,845 million yen. Lower real estate sales were recorded as there were no revenues associated with the sale of real estate developments, such as office buildings, in the first nine months of this fiscal year that were recorded in the same period of the previous fiscal year despite an increase in revenues associated with the sales of residential condominiums. On the other hand, the increase in gains associated with sales of real estate under operating leases and revenues associated with our integrated facilities management operations led to the higher segment revenues.

Segment profits increased 40% to 26,011 million yen compared to 18,623 million yen in the same period of the previous fiscal year due to the increase in gains associated with the sales of real estate under operating leases, despite the recognition of advertising expenses that were incurred preceding the revenue recognition of completed sales for residential condominiums upon title transfer to buyers.

Segment assets increased 11% on March 31, 2005 to 556,675 million yen due to the purchase of some rental purpose real estate despite the reclassification of some assets to office facilities upon a change in their use.

Life Insurance Segment:

Segment revenues were up 1% year on year to 97,650 million yen. Although life insurance premiums were flat year on year, life insurance related investment income increased year on year.

Segment profits increased 79% year on year to 10,324 million yen compared to 5,765 million yen in the same period of the previous fiscal year due mainly to the lower insurance payments.

Segment assets were down 8% on March 31, 2005 to 523,272 million yen due to a reclassification of some assets as a result of a change in their use to office facilities and a decrease in the investment portfolio associated with the maturity of some endowment insurance policies.

Other Segment:

Segment revenues decreased 23% year on year to 78,539 million yen. Although there were contributions to revenues from companies that we invested in the previous fiscal year, as part of our corporate rehabilitation business, and from the securities operations and gains on investment securities, revenues from the card loan operations were flat year on year and the change in the accounting treatment of transportation revenues to equity in net income of affiliates, as previously described on the (Note 1) on page 2, led to the lower revenues.

Edgar Filing: ORIX CORP - Form 6-K

Segment profits increased 86% to 30,268 million yen compared to 16,286 million yen in the same period of the previous fiscal year due to the aforementioned contributing factors to segment revenues and the lower provision for doubtful receivables and probable loan losses associated with the card loan operations.

Segment assets were up 34% on March 31, 2005 to 654,042 million yen. The increase in segment assets was due to a change in the cardholder membership agreement at the card loan operations whereby the balance of certain card loans that were previously accounted for as off-balance sheet assets no longer meet the requirements for such accounting treatment and were accounted for as on-balance sheet assets from the third quarter of this fiscal year and due to the increase in loans related to margin trading at the securities brokerage.

- 5 -

Table of Contents

Overseas Operations

The Americas Segment:

Segment revenues were up 27% year on year to 46,625 million yen. Although there was a decrease in revenues associated with direct financing leases and operating leases, revenues from interest on loans to corporate customers and sales on real estate increased year on year. In addition, there was also a contribution from the gain on the sale of the primary and master servicing business.

Segment profits more than doubled to 27,591 million yen compared to 12,207 million yen in the same period of the previous fiscal year due to the increase in segment revenues and reductions in the provision for doubtful receivables and probable loan losses and selling, general and administrative expenses.

Segment assets were up 7% on March 31, 2005 to 431,659 million yen. Although there was a withdrawal from an investment in an affiliate accompanying its termination, segment assets were up due to the increase in loans to corporate customers and the effect of a depreciation of the yen against the dollar.

Asia, Oceania and Europe Segment:

Segment revenues were up 25% year on year to 67,476 million yen due to the steady performance of automobile and machine equipment leasing and increase in revenues from the ship-related operations.

Segment profits increased 55% to 27,100 million yen compared to 17,517 million yen in the same period of the previous fiscal year due to an increase in segment revenues as described above, the steady performance of equity in net income of affiliates, and the contribution from the gain on the sale of an affiliate.

Segment assets were up 12% on March 31, 2005 to 559,701 million yen due mainly to the increase in direct financing leases and the depreciation of the yen against the dollar.

2. Summary of Cash Flows (Nine Months Ended December 31, 2005)

Cash and cash equivalents decreased by 9,449 million yen to 135,931 million yen compared to March 31, 2005.

Cash flows from operating activities provided 140,718 million yen in the first nine months of this fiscal year and provided 73,554 million yen in the same period of the previous fiscal year due primarily to inflows associated with the increase in net income.

Edgar Filing: ORIX CORP - Form 6-K

Cash flows from investing activities used 466,715 million yen in the first nine months of this fiscal year compared to 334,182 million yen in the same period of the previous fiscal year. Outflows exceeded inflows as the purchases of lease equipment exceeded the sum of principal payments received under direct financing leases and proceeds from sales of operating lease assets, and installment loans made to customers exceeded principal collected on installment loans.

Cash flows from financing activities provided 315,286 million yen in the first nine months of this fiscal year compared to 188,573 million yen in the same period of the previous fiscal year, due to the increase in debt accompanying the increase in operating assets.

3. Summary of Third Quarter (Three Months Ended December 31, 2005)

In the third quarter revenues increased 9,539 million yen year on year. Revenues from direct financing leases were up compared to the third quarter of the previous fiscal year due to the increase in the average balance of direct financing leases and the contribution from gains on securitization. Revenues from operating leases and interest on loans and investment securities were up due to the increase in the average balance of the associated operating assets compared with the third quarter of the previous fiscal year. Brokerage commissions and net gains on investment securities were up due to the increase in brokerage commissions despite the decrease in net gains on investment securities. Life insurance premiums and related investment income were down compared to the same period of the previous fiscal year due to the lower life insurance related investment income although life insurance premiums were flat year on year. Real estate sales decreased year on year as sales of office buildings recorded in the third quarter of the previous fiscal year were absent in the current period. Losses on sales of real estate under operating leases, associated with office buildings that are not accounted for under discontinued operations were recorded. Other operating revenues were up year on year due mainly to the contribution to revenues associated with companies in which we invested as part of our corporate rehabilitation business from the fourth quarter of the previous fiscal year.

Table of Contents

On the other hand, expenses were down 8,727 million yen compared to the third quarter of the previous fiscal year. Interest expense increased year on year as a result of the increase in the average balance of operating assets. Costs of operating leases were up year on year in line with the increase in revenues from operating leases. Life insurance costs were down compared with the same period of the previous fiscal year due mainly to the lower insurance payments. Costs of real estate sales decreased in line with the lower real estate sales. Other operating expenses increased in line with the increase in associated revenues in the third quarter of this fiscal year. Selling, general and administrative expenses were up year on year despite the change in accounting for Footwork Express Co., Ltd. (please refer to (Note 1) on page 2 for details) which went from being accounted for as a consolidated company to an equity method affiliate, as there was an increase in costs associated with the increase in the number of consolidated companies from the fourth quarter of the previous fiscal year and due to the expansion of business scope. The provision for doubtful receivables and probable loan losses was down compared to the third quarter of the previous fiscal year due to a lower level of non-performing assets. There were no write-downs of long-lived assets in the third quarter of this fiscal year and write-downs of securities were down year on year.

This resulted in an increase in operating income by 18,266 million yen to 53,177 million yen compared with the third quarter of the previous fiscal year.

Equity in net income of affiliates was down year on year due to the lower contribution from an equity method affiliate in The Americas segment that performed well in the same period of the previous fiscal year and due to the recording of gains on sales of subsidiaries and affiliates. Income before discontinued operations and income taxes increased by 15,751 million yen compared to the third quarter of the previous fiscal year to 59,445 million yen.

Discontinued operations, net of applicable tax effect added 7,419 million yen and net income in the third quarter of this fiscal year rose by 17,113 million yen to 42,143 million yen compared with a net income of 25,030 million yen in the third quarter of the previous fiscal year.

4. Outlook and Forecasts for the Fiscal Year Ending March 31, 2006

For the fiscal year ending March 31, 2006 we have revised our consolidated results forecast made at the interim results announcement on November 8, 2005 as follows. Revenues 900,000 million yen (flat compared with the fiscal year ended March 31, 2005), income before income taxes of 245,000 million yen (up 61%), and net income of 155,000 million yen (up 69%).

	Millions of Yen		
	Total Revenues	Income before Income Taxes*	Net Income
Previous Forecast (A)	890,000	230,000	140,000
New Forecast (B)	900,000	245,000	155,000
Change (B-A)	10,000	15,000	15,000
Change (%) (Reference)	1.1	6.5	10.7
Fiscal 2005 Results	900,034	152,332	91,496

* Income before income taxes refers to income before discontinued operations and income taxes.

Net Income	126,097	186	67,718	148	91,496	169	1,068

Note: 1. Pursuant to FASB Statement No. 144 (Accounting for the Impairment or Disposal of Long-Lived Assets), the results of operations which meet the criteria for discontinued operations are reported as a separate component of income, and those related amounts that had been previously reported are reclassified.

2. In the previous fiscal year, Transportation Revenues and Costs of Transportation Revenues were disclosed separately. However, as the logistics subsidiary became an affiliate, the proportionate share of the net income (loss) is recorded in Equity in Net Income of Affiliates by the equity method.

- *Note 1:** The results of the reported segments from April 1, 2005 reflect the revised operating structure following the reorganization of the Company. Accordingly, real estate-related equity investment operations and the REIT asset management operations, which had been included in the Real Estate-Related Finance segment, were included in the Real Estate segment from the first quarter of this fiscal year. Therefore, certain related amounts that had been previously reported are reclassified.
- 2:** Effective January 1, 2005, the Company integrated seven group companies, which were involved in automobile leasing and rental operations, into ORIX Auto Corporation, in order to control and manage the overall automobile operations under one company. The automobile leasing operations, which had been included in the Corporate Financial Services segment and the automobile rental operations that had been included in the Rental Operations segment were included in the Automobile Operations segment from the previous fiscal year. The Rental Operations segment included only the rental operations of precision measuring and other equipment. The Company changed the management of its overseas operations, whereby the Europe segment and the Asia and Oceania segment were combined and from the previous fiscal year the new segment was shown as the Asia, Oceania and Europe segment.
- 3:** Since the Company evaluates the performance for the segments based on profits before income taxes, tax expenses are not included in the segment profits. In addition, results of discontinued operations are included in Segment Revenues and Segment Profits of each segment, if any. Such amounts are eliminated in Difference between Segment totals and Consolidated Amounts.
