The following table shows the aggregate amount of (i)former Mitsubishi Tokyo Financial Group s and former UFJ Holdings consolidated financial results (in either case actual result from April 1, 2005 to September 30, 2005), (ii)MUFG s consolidated financial results (actual result from October to December for the fiscal year ending March 31, 2006) and(iii) MUFG s consolidated projected earnings (from January to March for the fiscal year ending March 31, 2006).

Net income	1,150.0	850.0	1,010.0	740.0	140.0	110.0

\* Announced on November 24, 2005.

The aggregate amount of the subsidiary banks non-consolidated net business profits remains the same as the previously announced projections in November 2005.

The major factor causing the increase in consolidated ordinary profit was a decrease in credit related costs (non-recurring losses).

The reason that revised amount of the consolidated net income is greater than that of the consolidated ordinary profit is mainly due to the increase in a reversal of allowance for loan losses (special gains).

The total credit related costs (being the aggregate amount of the credit related costs (non-recurring losses) and the reversal of allowance for loan losses (special gains)), which are expected to be reported as the reversal gain, are considered to be greater than previously projected.
