

Edgar Filing: CBOT HOLDINGS INC - Form 425

CBOT HOLDINGS INC  
Form 425  
December 12, 2006

Filed by Chicago Mercantile Exchange Holdings, Inc. pursuant  
to Rule 425 under the Securities Act of 1933, as amended, and  
deemed filed pursuant to Rule 14a-12 under the Securities  
Exchange Act of 1934, as amended.

Subject Company: CBOT Holdings, Inc.

Subject Company's Commission File No.: 001-32650

This material is not a substitute for the prospectus/proxy statement and any other documents CME and CBOT intend to file with the Securities and Exchange Commission (SEC). Investors and security holders are urged to read such prospectus/proxy statement and any other such documents, when available, which will contain important information about the proposed transaction. The prospectus/proxy statement would be, and other documents filed or to be filed by CME and CBOT with the SEC are or will be, available free of charge at the SEC's Web site ([www.sec.gov](http://www.sec.gov)) or from Chicago Mercantile Exchange Holdings Inc., Shareholder Relations and Membership Services, 20 South Wacker Drive, Chicago, Illinois 60606, Attention: Beth Hausoul.

CME and its directors, executive officers and other employees may be deemed to be participants in the solicitation of proxies in connection with the proposed transaction. Information about CME's directors and executive officers is available in CME's proxy statement, dated March 10, 2006, for its 2006 annual meeting of stockholders. Additional information about the interests of potential participants will be included in the prospectus/proxy statement when it becomes available. This document shall not constitute an offer to sell or the solicitation of an offer to buy any securities, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the U.S. Securities Act of 1933, as amended.

The following is a presentation that CME plans to use in connection with the proposed merger from time to time.

\* Name effective upon transaction closing.

#### Discussion of Forward-Looking Statements

Statements in this news release that are not historical facts are forward-looking statements. These statements are not guarantees of performance and involve risks, uncertainties and assumptions that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or implied in any forward-looking statements. Among the factors that might affect our performance are: increasing competition by foreign and domestic competitors, including new entrants into our markets; our ability to keep pace with technological developments, including our ability to complete the development and implementation of the enhanced functionality for our customers; our ability to continue introducing competitive new products and services on a timely, cost-effective basis, including our electronic trading capabilities, and our ability to maintain

the competitiveness of our existing products and services; our ability to adjust our fixed costs and expenses if our revenues decline; our ability to continue to realize the benefits of our transaction processing provided to third parties; our ability to maintain existing customers and attract new ones; our ability to expand and offer our products in foreign jurisdictions; changes in domestic and foreign regulations; changes in government policy, including policies relating to common or directed clearing; the costs associated with protecting our intellectual property rights and our ability to operate our business without violating the intellectual property rights of others; our ability to generate revenue from our market data that may be reduced or eliminated by the growth of electronic trading; changes in our rate per contract due to shifts in the mix of the products traded, the trading venue and the number of customers (whether the customer receives member or non-member fees or participates in one of our various incentive programs); the impact of our tiered pricing structure; the ability of our financial safeguards package to adequately protect us from the credit risk of our clearing firms; changes in price levels and volatility in the derivatives markets and in underlying fixed income, equity, foreign and commodity markets; economic, political and market conditions; our ability to accommodate increases in trading volume without degradation of performance of our systems; our ability to execute our growth strategy and maintain our growth effectively; our ability to manage the risks and control the costs associated with our acquisition, investment and alliance strategy; industry and customer

consolidation;  
decreases  
in  
trading  
and  
clearing  
activity;  
the  
imposition  
of  
a  
transaction  
tax  
on  
futures  
and  
options  
on  
futures  
transactions;

and seasonality of the derivatives business. More detailed information about factors that may affect our performance may be found in our press release for the merger and our filings with the Securities and Exchange Commission, including our most recent Quarterly Report on Form 10-Q, which is available in the Investor Information section of the CME Web site. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

**Additional Information**

This material is not a substitute for the prospectus/proxy statement and any other documents CME and CBOT intend to file with the Securities and Exchange Commission (SEC). Investors and security holders are urged to read such prospectus/proxy statement and any other documents, when available, which will contain important information about the proposed transaction. The prospectus/proxy statement, and other documents filed or to be filed by CME and CBOT with the SEC are or will be, available free of charge at the SEC's website ([www.sec.gov](http://www.sec.gov)) or from CME by directing a request to CME, 20 South Wacker Drive, Chicago, IL 60606, Attention: Shareholder Services, or from CBOT by directing a request to 141 West Jackson Boulevard, Chicago, IL 60604, Attention: Investor Relations.

CME, CBOT and their respective directors, executive officers and other employees may be deemed to be participants in the solicitation of proxies from the security holders of CME or CBOT in connection with the proposed transaction. Information about CME's directors and executive officers is available in CME's proxy statement, dated March 10, 2006, for its 2006 annual meeting of stockholders, and information about CBOT's directors and executive officers is available in CBOT's proxy statement, dated March 29, 2006, for its 2006 annual meeting of shareholders. Additional information about the interests of potential participants will be included in the prospectus/proxy statement when it becomes available. This document shall not constitute an offer to sell or the solicitation of an offer to buy any securities, nor shall it constitute any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the U.S. Securities Act of 1933, as amended.

**NOTE:**

Potential for Competitive Entry and Expansion Constrains Pricing

The threat of groups of large customers shifting trading volumes  
to

alternate exchanges disciplines exchange pricing.

Select large customers account for a sizeable share of trading for major CME and CBOT  
contracts and can create new exchanges for high volume contracts.

The Commodity Futures Modernization Act of 2000 simplified the regulatory approval  
process.

Exchanges have entered and competed to attract liquidity.

Intercontinental Exchange (ICE) was formed by a collection of major dealers in 2000 and acquired the IPE exchange in 2001. It is now the second largest energy futures exchange.

NYSE has stated its intention to expand into futures exchange business.

Exchange and clearing facilities are readily available

Electronic platforms are available from third parties, including LIFFE's CONNECT platform and OM's Click platform.

Clearing services can be organized by a consortium of customers and are available from such third parties as Eurex Clearing AG, LCH, New York Clearing Corp., OM, Options Clearing Corp., NYMEX, and The Clearing Corporation.

Both clearing and electronic trading platforms are highly scalable and can be expanded rapidly.

CME

effectively

doubled

the

size

of

its

clearing

operation

after

taking

on

CBOT's

clearing

function.

Trading on additional commodities can be readily added to existing trading platforms.

Declining trading rates per contracts

Notes from past comments on fungibility  
to the CFTC

CFTC Roundtable

In 2002 CME participated in a CFTC Roundtable  
discussion of fungibility  
Through a written statement submitted in August 2002  
Through a presentation to the CFTC later that fall

CME's comments focused on 3 pillars  
distinguishing futures exchanges that proscribed  
fungibility would undermine  
Innovation  
Liquidity, open access and price transparency  
Financial integrity

27

Copyright Chicago Mercantile Exchange Inc. All rights reserved.

3 Pillars -

Innovation

Diversity of futures contract designs

Securities exist independently and apart from securities exchanges

stock options were standardized by Put and Call Dealers Association  
before 1972 introduction of CBOE

BUT

futures are *constructed products*

that do not exist apart

from futures exchange

invoking intellectual property issues

Futures exchanges attempt to add unique value

products are

rarely generic, *e.g.*,  
agencies, swaps

Innovation key to exchange value proposition and growth  
Enforced or proscribed fungibility stifles new product innovation  
At worst, it begs question  
why innovate?

3 Pillars -

Liquidity

Liquidity and price transparency

Futures only have utility if they offer enhanced liquidity  
relative to cash or derivative market solutions

But

liquidity as elusive as it is vital  
Successful futures concentrate activity in open, transparent  
marketplace, achieving critical mass  
of liquidity

CME promotes openness and transparency

Price discovery, transparency, open market access and  
competition enhanced by centralized liquidity pool

3 Pillars -

Financial Integrity

Financial Integrity

Designated Contract Markets are bound by Core Principle 11 of  
the

Commodity

Futures

Modernization

Act

of

2000

to

provide

for the *financial integrity*

of its markets

A vertically integrated structure allows CME properly to

discharge that duty

CME has never experienced a default

Reliability and operating costs

A vertically integrated exchange promotes reliability with coordinated execution, clearing, settlement

30

At issue -

Control

Issue is actually about control of bid-offer spread

The majority of [exchange] shareholders are locals whose interest is in maintaining the grip of

open outcry

[preventing]

other forms of trading

such as *internalization or*

*crossing*

because of the rules requiring exposure to the floor  
[or electronic order book].

Kevin Davis in CFTC testimony

Per former SEC Chairman Arthur Levitt

Internalization

substantially reduce[s] the opportunity for  
investor orders to interact

[which]

may hamper price

competition, interfere with

public price discovery, and detract

from the depth and stability of the markets

Price matching dealers

take advantage of the public price

discovery process

but need not contribute to the process of

price discovery

This creates disincentives for vigorous price competition, which

could lead to wider bid-asked spreads, less depth, and higher

transaction costs

all orders could receive poorer executions

Conclusion

Motivation behind fungibility and common clearing

The proponents of fungibility and common clearing seek to internalize their dealings, take the markets upstairs and exploit the profit from the bid/ask spreads.

In doing so, they will no doubt make lots of money, but there will be two fundamental casualties in their wake.

Casualties of fungibility

The first [casualty] will be in the transparency implicit in the exchange-transaction-process

Need we revisit the causes of the

Enron debacle?

The second casualty will be that of innovation. Does anyone here

remember the last innovation produced by a utility?
