NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2009

(unaudited)

1. Summary of Significant Accounting Policies

Description of Business

Microtune, Inc. (Microtune) began operations in August 1996. We design and market radio frequency (RF) integrated circuits (ICs) and subsystem module solutions for the cable, automotive entertainment electronics and digital television (DTV) markets. Our tuner, amplifier and upconverter products permit the delivery, reception and exchange of broadband video, audio and data using terrestrial (off-air) and/or cable communications systems. Our products enable or target various consumer electronics, broadband communications and automotive entertainment electronics applications or devices, including cable television set-top boxes; DOCSIS[®]-based, high-speed voice and data cable modems; car audio, television and antenna amplifier systems; digital/analog television systems, including high-definition televisions; personal computer television (PC/TV) multimedia products; and mobile television receivers. We sell our products to original equipment manufacturers (OEMs) and original design manufacturers (ODMs) who sell devices, subsystems and applications to consumers or service providers within the cable, automotive entertainment electronics and DTV markets.

We operate Microtune as a single business unit or reportable operating segment serving our target markets. We record our operating expenses by functional area and account type, but we do not record or analyze our operating expenses by market, product type or product. We attempt to analyze our net revenue by market, but in some cases we sell our products to resellers or distributors serving multiple end markets, giving us limited ability to determine market composition of our net revenue from these customers. In addition, certain of our OEM customers purchase products from us for applications in multiple end-markets, also limiting our ability to determine our net revenue contribution from each market.

General

The accompanying unaudited financial statements as of and for the first quarter of 2009 and 2008 have been prepared by us, pursuant to the rules and regulations of the United States Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States (GAAP) have been condensed or omitted pursuant to such rules and regulations. These unaudited consolidated financial statements should be read in conjunction with the audited financial statements and the notes thereto included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

In the opinion of management, all adjustments which are of a normal and recurring nature and are necessary for a fair presentation of the financial position, results of operations, and cash flows as of and for the first quarter of 2009 and 2008 have been made. Results of operations for the first quarter of 2009 and 2008 are not necessarily indicative of results of operations to be expected for the entire year or any other period.

Risk and Uncertainties

Our future results of operations and financial condition will be impacted by the following factors, among others: worldwide macroeconomic downturn, dependence on the worldwide cable, automotive entertainment electronics and DTV markets characterized by intense competition and rapidly changing technology, dependence on a few significant customers, on third-party manufacturers and subcontractors, on third-party distributors in certain markets, on partners when we go to market with a joint solution, on the successful development and marketing of new products in new and existing markets and on seasonality in the demand for consumer products into which our products are incorporated. Our future results also may be impacted by foreign currency fluctuations as a result of our international operations and foreign currency based revenues, and product warranty liabilities and line down clauses. See Part II, Item 1A. Risk Factors and Part I, Item 3. Quantitative and Qualitative Disclosures About Market Risk below.

Consolidation

Edgar Filing: MICROTUNE INC - Form 10-Q

Our consolidated financial statements include the financial statements of Microtune and its wholly-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Reclassifications

Amounts in the Consolidated Statements of Cash Flows for the first quarter of 2009 and 2008 have been reclassified to conform to current year presentation.

Table of Contents

MICROTUNE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2009

(unaudited)

Use of Estimates

We make estimates, judgments and assumptions that affect the amounts reported in the financial statements and the disclosures made in the accompanying notes, including inventory valuation allowances, warranty costs, determining the collectibility of accounts receivable, the valuation of deferred tax assets, contingent liabilities, liabilities for potential incentive compensation and other amounts. We also use estimates, judgments and assumptions to determine the impairment of investments and the remaining economic lives and carrying values of property and equipment and other long-lived assets. We believe that the estimates, judgments and assumptions upon which we rely are appropriate, based upon information available to us at the time that they are made. These estimates, judgments and assumptions can affect our reported assets and liabilities as of the date of the financial statements, as well as the reported net revenue and expenses during the periods presented. If there are material differences between these estimates, judgments or assumptions and actual facts, our financial statements will be affected.

Cash and Cash Equivalents

We consider highly liquid investments with maturities of three months or less at date of purchase to be cash equivalents. Cash and cash equivalents consist of bank deposits and money market funds.

Investments

Our investments are comprised of high-quality securities purchased in accordance with our investment policy. Investments in debt securities are classified as held-to-maturity when we intend to hold them to maturity. Held-to-maturity investments are carried at amortized cost with the amortization of the purchase discount recorded in interest income. Investments in debt securities not classified as held-to-maturity and equity securities are classified as available-for-sale and carried at fair value, with unrealized gains and losses, net of tax, recorded in stockholders equity. Realized gains and losses and other-than-temporary declines in value, if any, on available-for-sale securities are reported in other income and expense as incurred and are determined based on the specific identification method. At March 31, 2009 and December 31, 2008, our short-term investments, which consisted of certificates of deposit insured by the Federal Deposit Insurance Corporation (FDIC), were categorized as held-to-maturity investments. The certificates of deposit have a contractual maturity of six months and will mature on various dates during the second and third quarters of 2009. We held \$50.0 million and \$40.0 million in short-term investments at March 31, 2009 and December 31, 2008, respectively. At March 31, 2009 and December 31, 2008, we held no long-term investments.

Allowance for Doubtful Accounts

We evaluate the collectibility of our accounts receivable based on several factors. In circumstances where we are aware of a specific customer's inability to meet its financial obligations to us, we record a specific allowance for doubtful accounts against amounts due to us and reduce the net recorded receivable to the amount we reasonably believe will be collected. We also consider recognizing allowances for doubtful accounts based on the length of time the receivables are outstanding compared to contractual terms, industry and geographic concentrations, the current business environment and our historical experience. Accounts receivable included in the allowance for doubtful accounts are written-off after final collection efforts are exhausted. If the financial condition of our customers deteriorates or if economic conditions worsen, increases in the allowance for doubtful accounts may be required in the future. We cannot predict future changes in the financial stability of our customers, and there can be no assurance that our allowance for doubtful accounts will be adequate. Actual credit losses for the first quarter of 2009 and 2008 were insignificant. No allowance for doubtful accounts was recorded as of March 31, 2009 and December 31, 2008.

Inventory Valuation

Our inventories are stated at the lower of standard cost, which approximates actual cost, or estimated realizable value. Amounts are removed from inventory using the first-in, first-out (FIFO) method. Adjustments to reduce our inventories to estimated realizable value, including

Edgar Filing: MICROTUNE INC - Form 10-Q

allowances for excess and obsolete inventories, are determined quarterly by comparing inventory levels of individual materials and parts to current demand forecasts for those items. In addition, we review other individual facts and circumstances to determine necessary adjustments to reduce our inventories to estimated realizable value, including current manufacturing yields, product returns and warranty claims. Actual amounts realized upon the sale of inventories may differ from estimates used to determine inventory valuation allowances due to changes in customer demand, technology changes and other factors. The net impact of changes in the inventory valuation allowances for the first quarter of 2009 and 2008 was a charge (benefit) to cost of revenue of \$0.8 million and \$(0.1) million, respectively.

Table of Contents

MICROTUNE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2009

(unaudited)

Property and Equipment

Our property and equipment are stated at cost, net of accumulated depreciation. We calculate depreciation using the straight-line method over the estimated useful lives of the assets, which generally range from 3 to 7 years. We depreciate leasehold improvements using the straight-line method over the lesser of their estimated useful lives or remaining lease terms.

Impairment of Long-lived Assets

We review long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. We evaluate the recoverability of these assets by a comparison of their carrying amount to projected undiscounted cash flows expected to be generated by the assets or business center. If we determine our long-lived assets are impaired, we recognize the impairment in the amount by which the carrying amount of the assets exceeds the estimated fair value of the assets.

Revenue Recognition

We recognize revenue when we receive a purchase order from our customer, our product has been shipped, title has transferred to our customer, the price that we will receive for our product is fixed or determinable and payment from our customer is considered probable. Title to our product transfers to our customer either when it is shipped to or received by our customer, based on the terms of our specific agreement with the customer.

Our revenue is recorded based on the facts then currently known to us. If we do not meet all the criteria above, we do not recognize revenue. If we are unable to determine the amount that is probable of collection once our product has shipped and title has transferred to our customer, we defer recognition of revenue until we can determine the amount that is probable of collection. Items that are considered when determining the amounts that are probable of collection include a customer's overall creditworthiness, payment history and rights to return unsold product.

For certain of our customers, we do not recognize revenue until receipt of payment because collection is not probable or the amount we will ultimately collect is not determinable at the date of the shipment. Upon shipment of product to these customers, title to the inventory transfers to the customer and the customer is invoiced. We account for these transactions by recording accounts receivable for the revenue value of the shipments, as the shipments represent valid receivables, and reducing inventory for the cost of the inventory shipped. The difference, representing the gross margin on the transactions, is recorded as deferred revenue. For financial statement presentation purposes, this deferred revenue balance is offset against any outstanding corresponding accounts receivable balances from the customer. When payment is received for the transaction, revenue is recognized for the value of the cash payment, cost of revenue is recorded for the cost of the inventory and the deferred revenue is relieved for the gross margin on the transaction. At March 31, 2009, there were no products shipped for which revenue was deferred due to the uncertainty of collection. At December 31, 2008, the sales value of products shipped for which revenue was deferred due to the uncertainty of collection was insignificant.

When we defer revenue, the timing and amount of revenue we ultimately recognize is determined upon our receipt of payment, which can result in significant fluctuations in net revenue from period to period. In the first quarter of 2009 and 2008, net revenue recognized upon receipt of payment was insignificant.

We also defer revenue when customers have made payments and we have not completed the earnings process. These payments are reflected as liabilities in our financial statements as deferred revenue. In these instances, we recognize revenue once the product is shipped, title has transferred to our customer and the earnings process is complete. Deferred revenue as a result of customer prepayments was \$0.1 million and \$0.2 million as of March 31, 2009 and December 31, 2008, respectively.

Edgar Filing: MICROTUNE INC - Form 10-Q

We grant limited stock rotation rights to certain distributors, allowing them to return qualifying product to us in accordance with their specific agreements for up to 5% of their aggregate net purchases for the previous six months. In these circumstances, we require the distributor to submit an offsetting purchase order that is, at a minimum, equivalent to the aggregate dollar amount of the product to be returned. We account for the return as a reduction to net revenue and a reduction to accounts receivable for the price of the items returned. Correspondingly, cost of revenue is reduced by the cost of returned inventory offset by an increase in inventory. Any returned inventory items are included in gross inventories, are reviewed along with our other inventory items and are recorded at the lower of cost or market. Historically, distributor returns under stock rotation rights have been insignificant. As a result, we do not establish a reserve for potential returns when product is shipped to distributors, rather we subsequently monitor distributor inventory levels and record a reserve for potential returns of estimated unsaleable inventory subject to stock rotation rights. We account for the reserve by reducing net revenue and cost of revenue. The difference, representing the gross margin on the transaction, is recorded as

Table of Contents**MICROTUNE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2009****(unaudited)**

deferred revenue. We account for the shipment of replacement product as a sales transaction, which offsets the reduction of net revenue discussed above. At March 31, 2009, the sales value of product shipped for which revenue was reserved due to distributor stock rotation rights was insignificant. At December 31, 2008, the sales value of product shipped for which revenue was reserved due to distributor stock rotation rights was \$0.2 million.

Research and Development Costs

Our research and development expenses consist primarily of personnel-related expenses, lab supplies, training and prototype materials. We expense all of our research and development costs in the period incurred as our current process for developing our products is essentially complete concurrent with the establishment of technological feasibility. Research and development efforts currently are focused primarily on the development of our next generation of RF products.

Shipping and Handling Costs

Shipping and handling costs related to product shipments to customers are included in cost of revenue.

Warranty Costs

We generally provide a minimum of a one-year warranty on all products. In certain instances, a warranty beyond one year is provided to comply with statutory requirements of foreign jurisdictions. We record specific warranty provisions for any identified product issues, which have not been significant to date. At March 31, 2009, there were no accrued warranty costs. At December 31, 2008, accrued warranty costs were insignificant.

Foreign Currency Translation

Our functional currency is the United States Dollar. The impact from the re-measurement of accounts not denominated in United States Dollars is recognized currently in our results of operations as a component of foreign currency gains and losses and results primarily from exchange rate fluctuations between the United States Dollar and the Euro. Net foreign currency gains (losses), were \$(0.2) million and \$0.1 million during the first quarter of 2009 and 2008, respectively.

Income Taxes

Our income taxes are computed using the asset and liability method of accounting. Under the asset and liability method, a deferred income tax asset or liability is recognized for estimated future tax effects attributable to temporary differences and carryforwards. The measurement of deferred income tax assets is adjusted by a valuation allowance, if necessary, to recognize future income tax benefits only to the extent, based on available evidence, it is more likely than not such benefits will be realized. Our net deferred income tax assets were fully reserved at March 31, 2009 and December 31, 2008. Uncertain income tax positions were as follows (in thousands):

Balance at December 31, 2008	\$ 113
Tax positions taken prior to 2009	2
Balance at March 31, 2009	\$ 115

Edgar Filing: MICROTUNE INC - Form 10-Q

At March 31, 2009, the uncertain income tax positions related to foreign withholding taxes on certain cross-border transactions. We expect no material changes to uncertain income tax positions within the next twelve months.

We recognize interest and penalties related to uncertain income tax positions in income tax expense. No interest and penalties related to uncertain income tax positions were accrued at March 31, 2009 and December 31, 2008.

Due to our net operating loss carryforward position, tax years in the United States remain open to examination until three years after the net operating losses from each year are utilized. Potential examination adjustments are limited to the net operating losses utilized from each year. For our international operations, the tax years 2004 through 2008 remain open to examination by the major taxing jurisdictions in which we operate.

Table of Contents**MICROTUNE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2009****(unaudited)****Income (Loss) Per Share**

Basic income (loss) per common share is computed by dividing net income (loss) by the weighted average number of common shares outstanding during each period. Diluted income (loss) per common share is computed by dividing net income (loss) by the weighted average number of common shares outstanding during each period and dilutive common equivalent shares consisting of stock options, restricted stock units and employee rights to purchase stock under our employee stock purchase plan. All potentially dilutive common equivalent shares were anti-dilutive and were excluded from diluted loss per common share for the first quarter of 2009.

Our computation of income (loss) per common share was as follows (in thousands, except per share data):

	Three Months Ended March 31,	
	2009	2008
Net income (loss)	\$ (3,657)	\$ 652
Weighted average common shares outstanding	52,064	54,138
Weighted average dilutive potential common shares:		
Stock options		2,449
Restricted stock units		172
Employee stock purchase plan		
Weighted average common and dilutive potential common shares	52,064	56,759
Basic income (loss) per common share	\$ (0.07)	\$ 0.01
Diluted income (loss) per common share	\$ (0.07)	\$ 0.01

The following table sets forth anti-dilutive securities that have been excluded from net income (loss) per share (in thousands):

	Three Months Ended March 31,	
	2009	2008
Stock options	11,039	4,260
Restricted stock units	756	
Employee stock purchase plan	44	57
Total anti-dilutive securities excluded	11,839	4,317

Stock-Based Compensation

We account for all share-based payment awards to employees and directors, including stock options, restricted stock units and employee stock purchases related to our employee stock purchase plan, using the fair value recognition provisions of SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS No. 123(R)) and the provisions of Staff Accounting Bulletin No. 107 (SAB No. 107), issued by the SEC. We use the Black-Scholes-Merton option-pricing formula to value share-based payments granted to employees and attribute the value of stock-based compensation to expense using the straight-line single option method. Stock-based compensation expense recognized each period includes: (1) compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006, based on the measurement date fair value estimate in accordance with the original provisions of SFAS No. 123, and (2) compensation cost for all share-based payments granted subsequent to January 1, 2006, based on the measurement date fair value estimate in accordance with the provisions of SFAS No. 123(R). Stock-based compensation expense recognized each period is based

Table of Contents

MICROTUNE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2009

(unaudited)

on the greater of the value of the portion of share-based payment awards under the straight-line method or the value of the portion of share-based payment awards that is ultimately expected to vest during the period. In accordance with SFAS No. 123(R), we estimate forfeitures at the time of grant and revise our estimates, if necessary, in subsequent periods if actual forfeitures differ materially from those estimates. Stock-based compensation expense under SFAS No. 123(R) was \$1.1 million for the first quarter of 2009 and 2008 relating to employee and director stock options, restricted stock units and our employee stock purchase plan. See Note 8.

SFAS No. 123(R) requires the cash flows resulting from the tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows. Due to our historical net operating loss position, we have not recorded these excess tax benefits as of March 31, 2009 and December 31, 2008.

Comprehensive Income

SFAS No. 130, *Reporting Comprehensive Income*, establishes standards for reporting and displaying comprehensive income and its components in the consolidated financial statements. Accumulated other comprehensive loss at March 31, 2009 and December 31, 2008 included foreign currency translation adjustments of \$1.0 million related to changing the functional currency of our German subsidiaries from the German Mark to the United States Dollar in 2000.

Risk Concentrations

Financial instruments that potentially expose Microtune to concentrations of credit risk consist primarily of trade accounts receivable. At March 31, 2009, approximately 60% of our net accounts receivable were due from five of our customers. We periodically evaluate the creditworthiness of our customers' financial condition and generally do not require collateral. We evaluate the collectibility of our accounts receivable based on several factors. In circumstances when we are aware of a specific customer's inability to meet its financial obligations to us, we record a specific reserve for bad debts against amounts due to us and reduce the net recorded receivable to the amount we reasonably believe will be collected. For all other customers, we recognize allowances for doubtful accounts based on the length of time the receivables are outstanding, industry and geographic concentrations, the current business environment and our historical experience. If the financial condition of our customers deteriorates or if economic conditions worsen, additional allowances may be required in the future. Historically, our bad debts have been insignificant and we are not currently aware of any significant uncollectible accounts.

We depend on third-party foundries, primarily IBM, Jazz Semiconductor (a Tower Group Company) and X-FAB, and third-party assembly and test firms, primarily ASE and Amkor, to manufacture all of our ICs. We do not have long-term supply agreements with our foundries but obtain ICs on a purchase order basis. The inability of a third-party foundry to continue manufacturing our ICs would have a material adverse effect on our operations. Our ICs are primarily manufactured in the United States, South Korea and the Philippines.

We use Ionics EMS, Inc. (Ionics) for nearly all assembly and calibration functions for our subsystem module solutions. We expect to continue to use a single provider for nearly all assembly and calibration functions for our subsystem module solutions. The unanticipated or sudden loss of this single provider would have a material adverse effect on our results of operations. We are also dependent upon third-parties, some of whom are competitors, for the supply of components used in subsystem module manufacturing. Our failure to obtain components for module manufacturing would significantly impact our ability to ship subsystem modules to customers in a timely manner.

Commitments and Contingencies

We may be subject to the possibility of loss contingencies for various legal matters. Our discussion of legal matters includes pending litigation and matters in which any party has manifested a present intention to commence litigation related to such matters. There can be no assurance that additional contingencies of a legal nature or having legal aspects will not be asserted against us in the future. Such matters could relate to prior

Edgar Filing: MICROTUNE INC - Form 10-Q

transactions or events or future transactions and events. See Note 7. We regularly evaluate current information available to us to determine whether any provisions for loss should be made. If we ultimately determine that a provision for loss should be made for a legal matter, the provision for loss could have a material adverse effect on our results of operations and financial condition.

Our future cash commitments are primarily for long-term facility leases. See Note 7.

Recent Accounting Pronouncements

In December 2007, the FASB issued Statement No. 141(R), *Business Combinations* (SFAS No. 141(R)) and Statement No. 160, *Accounting and Reporting of Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51* (SFAS

Table of Contents**MICROTUNE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2009****(unaudited)**

No. 160). These standards change the financial accounting and reporting of business combination transactions and noncontrolling (or minority) interests in consolidated financial statements. SFAS No. 141(R) is required to be adopted concurrently with Statement 160 and is effective for business combination transactions for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. These statements did not impact our financial condition or results of operations for past transactions.

2. Accounts Receivable, net

Accounts receivable, net consisted of the following (in thousands):

	March 31, 2009	December 31, 2008
Gross accounts receivable	\$ 7,511	\$ 9,606
Deferred revenue	(93)	(111)
Accounts receivable, net	\$ 7,418	\$ 9,495

3. Inventories, net

Inventories, net consisted of the following (in thousands):

	March 31, 2009	December 31, 2008
Finished goods	\$ 6,044	\$ 7,799
Work-in-process	3,037	3,097
Raw materials	233	365
Total inventories, net	\$ 9,314	\$ 11,261

4. Accrued Compensation

Accrued compensation consisted of the following (in thousands):

March 31, 2009	December 31, 2008
---------------------------	------------------------------

Edgar Filing: MICROTUNE INC - Form 10-Q

Accrued vacation	\$ 1,281	\$ 1,191
Accrued payroll taxes	188	192
Accrued incentive compensation	59	379
Other	752	733
Total accrued compensation	\$ 2,280	\$ 2,495

At December 31, 2008, accrued incentive compensation included \$0.2 million for cash awards under the fiscal year 2008 incentive compensation program. These cash awards were paid in February 2009. See Note 8.

During the first quarter of 2007, we voluntarily contacted the United States Department of Treasury Internal Revenue Service (IRS) regarding the findings of the Audit Committee's investigation into our stock option granting practices with the intent of

Table of Contents**MICROTUNE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2009****(unaudited)**

pursuing a negotiated settlement with the IRS. On March 28, 2008, we paid the IRS \$0.2 million upon completion of its examination of our payroll tax returns for the years 2003 through 2006 and other matters related to the Audit Committee's investigation. As a result of the completion of the IRS examination, in the first quarter of 2008, we realized a benefit to operating expenses of \$0.4 million for the reversal of taxes and interest accrued in excess of amounts paid to the IRS upon completion of its examination.

5. Accrued Expenses

Accrued expenses consisted of the following (in thousands):

	March 31, 2009	December 31, 2008
Accrued legal fees	\$ 1,440	\$ 640
Accrued non-cancelable inventory purchase obligations	1,004	624
Other	1,259	1,208
 Total accrued expenses	 \$ 3,703	 \$ 2,472

The accrued non-cancelable inventory purchase obligations related to non-cancelable orders to subcontractors for inventories determined to be excess compared to current inventory levels and current demand forecasts. At March 31, 2009 and December 31, 2008, the accrued legal fees related primarily to amounts incurred in connection with the SEC litigation against certain former officers. See Note 7. The accrued expenses are expected to be paid during the next twelve months.

6. Income Taxes

We have established a valuation allowance to fully reserve our net deferred tax assets at March 31, 2009 and December 31, 2008 due to the uncertainty of the timing and amount of future taxable income. For United States federal income tax purposes, at December 31, 2008, we had a net operating loss carryforward of approximately \$176.5 million and an unused research and development credit carryforward of approximately \$4.4 million that will begin to expire in 2021. A change in ownership, as defined in Section 382 of the Internal Revenue Code, may limit utilization of the United States federal net operating loss and research and development credit carryforwards.

In the first quarter of 2009, our effective tax rate differed from the 34% statutory corporate tax rate primarily due to permanent differences, lower withholding tax rates and lower foreign tax rates. Income tax expense for the first quarter of 2009 included the utilization of previously reserved net operating loss carryforwards and consisted of withholding taxes on certain cross-border transactions, United States state income taxes and foreign income taxes.

In the first quarter of 2008, our effective tax rate differed from the 34% statutory corporate tax rate primarily due to a \$0.3 million charge relating to withholding taxes on certain cross-border transactions and alternative minimum taxes, partially offset by permanent differences, changes in valuation allowances and lower foreign tax rates. Income tax expense for the first quarter of 2008 consisted of withholding taxes, alternative minimum taxes and foreign income taxes.

7. Commitments and Contingencies

Lease Commitments

We lease our corporate headquarters and principal IC design center in Plano, Texas under an operating lease with a ten year term, which began in April 2005. Rent expense is calculated using the straight-line method over the lease term. We lease a research and development facility in Germany under an operating lease with a twenty-two year term, which began in December 1999. We also lease certain other facilities under operating leases and certain equipment and software under operating and capital leases. Future minimum lease payments required under operating leases as of March 31, 2009 were as follows (in thousands):

Table of Contents**MICROTUNE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2009****(unaudited)**

Year Ending December 31,	
2009	\$ 867
2010	1,009
2011	942
2012	949
2013	951
Thereafter	4,530
Total future minimum lease payments	\$ 9,248

Rent expense for the first quarter of 2009 and 2008 was \$0.3 million and \$0.4 million, respectively.

Purchase Commitments

As of April 17, 2009, we had approximately \$6.5 million of cancelable and non-cancelable purchase commitments outstanding with our vendors. These commitments were entered into in the normal course of business.

Other Commitments

We are currently subject to line down clauses in contracts with certain automotive entertainment electronics customers. Such clauses require us to pay financial penalties if our failure to supply product in a timely manner causes the customer to slow down or stop their production. We are also subject to product liability clauses and/or intellectual property indemnification clauses in some of our customer contracts. Such clauses require us to pay financial penalties if we supply defective product, which results in financial damages to the customer, or to indemnify the customer for third-party actions based on the alleged infringement by our products of a third party's intellectual property. As of March 31, 2009, we were unaware of any such claims by any of our customers.

Legal Proceedings

From time to time, we may be involved in routine legal proceedings, as well as demands, claims and threatened litigation that arise in the normal course of our business. The ultimate amount of liability, if any, for any claims of any type (either alone or in the aggregate) may materially and adversely affect our financial condition, results of operations and liquidity. In addition, the ultimate outcome of any litigation is uncertain. Any outcome, whether favorable or unfavorable, may materially and adversely affect us due to legal costs and expenses, diversion of management attention and other factors. We cannot assure you that additional contingencies of a legal nature or contingencies having legal aspects will not be asserted against us in the future, and these matters could relate to prior, current or future transactions or events. Except as described below, we are not currently a party to any material litigation.

Audit Committee Investigation, Restatement, Derivative Litigation, and SEC Investigation

In June 2006, the Audit Committee of our Board of Directors self-initiated an independent investigation into our stock option granting practices covering the period from the date of our initial public offering on August 4, 2000 through June 2006. As a result of the findings of the Audit Committee's investigation, on January 22, 2007, we restated our consolidated financial statements for the years ended December 31, 2005, 2004 and 2003, and the selected consolidated financial data as of and for the years ended December 31, 2005, 2004, 2003, 2002, 2001, 2000 and 1999 to record additional stock-based compensation expense and related tax liabilities related to certain mispriced stock option grants.

Edgar Filing: MICROTUNE INC - Form 10-Q

On January 31, 2007, a stockholder derivative lawsuit was filed in the United States District Court for the Eastern District of Texas against certain of our current and former officers and directors and against Microtune, as a nominal defendant, alleging various claims related to the historical stock option granting practices described in our Annual Report on Form 10-K/A for the year ended December 31, 2005 filed on January 22, 2007.

On March 31, 2008, the Court granted the defendants' motions to dismiss the derivative lawsuit. On June 30, 2008, we announced that the Court had entered a final judgment dismissing the derivative litigation.

We voluntarily contacted the SEC in July 2006 regarding the Audit Committee's independent investigation, and representatives of the Audit Committee met with the SEC in February 2007 and again in July 2007 to discuss the findings of the Audit Committee's investigation. We fully cooperated with the SEC in its investigation of these matters.

MICROTUNE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2009

(unaudited)

On June 30, 2008, we announced that we had reached a settlement with the SEC relating to our historical stock option granting practices. We agreed to settle with the SEC, without admitting or denying the allegations in the SEC's complaint, by consenting to the entry of a permanent injunction against future violations of the federal securities laws. We were not required to pay any civil penalty or other money damages as part of the settlement. The SEC also filed suit against Douglas J. Bartek, our former Chairman and Chief Executive Officer, who resigned in June 2003, and Nancy A. Richardson, our former Chief Financial Officer and General Counsel, who resigned in March 2004, alleging various violations of the U.S. securities laws related to our historical stock option granting practices. The suit against Mr. Bartek and Ms. Richardson is still pending and Mr. Bartek and Ms. Richardson are actively conducting pre-trial discovery.

We have incurred substantial expenses for legal, accounting, tax and other professional services in connection with the Audit Committee's investigation, the preparation of our restated financial statements, the defense of the derivative lawsuit and the SEC investigation. We continue to incur substantial legal expenses related to the SEC litigation against Mr. Bartek and Ms. Richardson. We have advanced substantial legal expenses to Mr. Bartek and Ms. Richardson pursuant to our indemnification agreements with such former officers for legal proceedings related to these matters. We have incurred expenses of approximately \$7.4 million through March 31, 2009 related to these matters, net of amounts reimbursed by our directors' and officers' liability insurance carrier, and currently have a receivable of \$2.4 million at March 31, 2009 for amounts expected to be reimbursed by our directors' and officers' liability insurance carrier. We expect further legal fees related to the SEC litigation against Mr. Bartek and Ms. Richardson to be substantial, and our directors' and officers' liability insurance policy is expected to cover a significant portion of any future expenses with any non-reimbursable amounts being covered solely by Microtune.

Initial Public Offering Litigation

Starting on July 11, 2001, multiple purported securities fraud class action complaints were filed in the United States District Court for the Southern District of New York naming as defendants several investment banking firms that served as underwriters of our initial public offering, and in one instance, naming Microtune and several of our former officers. The complaints were brought purportedly on behalf of all persons who purchased our common stock from August 4, 2000 through December 6, 2000 and were consolidated into *In re Initial Public Offering Securities Litigation* (IPO cases), which includes hundreds of other lawsuits filed in the Southern District of New York, challenging over 300 other initial public offerings and secondary offerings conducted in 1998, 1999 and 2000. The consolidated complaint alleges liability on the grounds that the registration statement for our initial public offering did not disclose that (1) the underwriters had agreed to allow certain of their customers to purchase shares in the offering in exchange for excess commissions paid to the underwriters, and (2) the underwriters had arranged for certain of their customers to purchase additional shares in the aftermarket at pre-determined prices to artificially inflate the market price of our shares.

We previously accepted a settlement proposal presented to all issuer defendants that would not have required Microtune or its affiliated defendants to make any payments. On December 5, 2006, however, the U.S. Second Circuit Court of Appeals reversed the district court's ruling certifying the consolidated cases as a class action litigation, which had the effect of undermining the settlement proposal.

On December 14, 2006, the district court ordered a stay of all proceedings in all of the lawsuits pending the outcome of plaintiffs' petition to the Second Circuit for rehearing en banc and resolution of the class certification issue. On April 6, 2007, the Second Circuit denied plaintiffs' petition for rehearing, but clarified that the plaintiffs may seek to certify a more limited class in the district court. Accordingly, the parties withdrew the prior settlement, and Plaintiffs submitted amended complaints in designated focus or test cases with a revised class definition, in an attempt to comply with the Second Circuit's ruling. On March 26, 2008, the district court issued an order granting in part and denying in part motions to dismiss the amended complaints in the focus cases. On April 2, 2009, a new global settlement of the IPO cases was submitted to the district court for its approval. This settlement would not require Microtune or its affiliated defendants to pay any money. There can be no assurance, however, that the new settlement proposal will be approved. If the approval of the settlement fails, we intend to vigorously defend the lawsuit.

Section 16 Litigation

Edgar Filing: MICROTUNE INC - Form 10-Q

On October 9, 2007, a purported Microtune stockholder filed *Vanessa Simmonds v. The Goldman Sachs Group, Inc., JP Morgan Chase & Co. and Microtune, Inc.* Microtune was named as a nominal defendant in this action, which is styled as a Complaint for Recovery of Short-Swing Profits under Section 16(b) of the Securities Exchange Act of 1934. No damages are alleged against or sought from Microtune. The suit was filed in the United States District Court for the Western District of Washington at Seattle. During this same timeframe, Ms. Simmonds filed similar lawsuits against over 50 other companies alleging substantially identical claims under Section 16(b). These lawsuits are related to the Initial Public Offering Litigation described above. On March 12, 2009, the court dismissed all 54 cases, including the one against Microtune. The plaintiff may file an appeal with the United States Ninth Circuit Court of Appeals.

MICROTUNE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2009

(unaudited)

8. Stockholders Equity

Common Stock

On March 4, 2002, our Board declared a dividend of one right for each share of our common stock issued and outstanding at the close of business on March 16, 2002. One right also attaches to each share of our common stock issued subsequent to March 16, 2002. The rights become exercisable to purchase one one-thousandth of a share of new Series A Preferred Stock (Series A), at \$115.00 per right, when a person or entity acquires 15 percent or more of our common stock or announces a tender offer which could result in such a person or entity owning 15 percent or more of our common stock. Each one one-thousandth of a share of the Series A has terms designed to make it substantially the economic equivalent of one share of our common stock. Prior to a person or entity acquiring 15 percent, the rights can be redeemed for \$0.001 each by action of our Board. Under certain circumstances, if a person or entity acquires 15 percent or more of our common stock, the rights permit our stockholders other than the acquirer to purchase our common stock having a market value of twice the exercise price of the rights, in lieu of the Series A. Alternatively, when the rights become exercisable, the Board may authorize the issuance of one share of our common stock in exchange for each right that is then exercisable. In addition, in the event of certain business combinations, the rights permit the purchase of the common stock of an acquirer at a 50 percent discount. Rights held by the acquirer will become null and void in both cases. The rights expire on March 3, 2012. On March 31, 2009, 52,082,021 rights were outstanding.

2008 Incentive Compensation Program

During the first quarter of 2008, our Board of Directors approved an annual incentive compensation program for fiscal year 2008 (2008 Bonus Program) covering executive officers and certain key managers and providing for incentive compensation to be paid, to the extent any such compensation is earned, 40% in cash and 60% through the performance vesting of restricted stock units under the Amended and Restated Microtune, Inc. 2000 Stock Plan (2000 Stock Plan). An aggregate of 213,000 restricted stock units were awarded under the 2008 Bonus Program with a grant date fair value of \$5.42 per share. The 2008 Bonus Program also provides for the payment of cash awards to certain key employees to the extent profitability goals are met under the 2008 Bonus Program.

On February 3, 2009, our Board of Directors determined that the executive officers covered by the 2008 Bonus Program each achieved only a portion of the awards set forth in the 2008 Bonus Program based upon the program's profitability and revenue targets. As such, cash awards earned under the 2008 Bonus Program totaling \$0.2 million were paid and 49,115 restricted stock units issued under the 2008 Bonus Program vested and the underlying shares were issued pursuant to the terms of the 2008 Bonus Program. Of the total shares issued under the 2008 Bonus Program, executive officers and certain key managers surrendered an aggregate of 16,644 shares to satisfy minimum payroll tax withholding requirements. The cash awards were paid in February 2009. During 2008, stock-based compensation expense recognized under the 2008 Bonus Program was \$0.2 million. Stock-based compensation expense recognized during the first quarter of 2009 under the 2008 Bonus Program was insignificant as participants are required to be employed with us on the payment date to be eligible for awards under the 2008 Bonus Program. During the first quarter of 2009, amounts recognized under the 2008 Bonus Program in stock-based compensation expense relating to the restricted stock units and amounts recognized relating to the cash awards were insignificant.

2007 Incentive Compensation Program

During the first quarter of 2007, our Board of Directors approved an annual incentive compensation program for fiscal year 2007 (2007 Bonus Program) covering executive officers and providing for incentive compensation, to the extent any such compensation was earned, to be paid 35% in cash and 65% through the performance vesting of restricted stock units under the 2000 Stock Plan. An aggregate of 197,600 restricted stock units were awarded under the 2007 Bonus Program with a grant date fair value of \$4.43 per share. The 2007 Bonus Program also provided for the payment of cash awards to certain employees to the extent any such compensation was earned.

On February 8, 2008, our Board of Directors determined that the executive officers covered by the 2007 Bonus Program each achieved the maximum awards set forth in the 2007 Bonus Program based upon the program's profitability and revenue targets. As such, the maximum

Edgar Filing: MICROTUNE INC - Form 10-Q

amount of cash awards under the 2007 Bonus Program were paid and the entire amount of restricted stock units awarded under the 2007 Bonus Program vested and the underlying shares were issued pursuant to the terms of the 2007 Bonus Program. Of the total shares issued under the 2007 Bonus Program, certain executive officers surrendered an aggregate of 51,266 shares to satisfy minimum payroll tax withholding requirements. The cash awards were paid in February 2008. Stock-based

Table of Contents**MICROTUNE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2009****(unaudited)**

compensation expense of \$0.1 million was recognized during the first quarter of 2008 under the 2007 Bonus Program as participants were required to be employed with us on the payment date to be eligible for awards under the 2007 Bonus Program. We recognized \$0.3 million relating to the cash awards during the first quarter of 2008 under the 2007 Bonus Program.

Stock-Based Compensation

The following table summarizes the allocation of stock-based compensation expense under SFAS No. 123(R) (in thousands):

	Three Months Ended March 31,	
	2009	2008
Cost of revenue	\$ (2)	\$ 5
Research and development	467	358
Selling, general and administrative	655	691
Total stock-based compensation expense included in operating expenses	\$ 1,122	\$ 1,049
Total stock-based compensation expense	\$ 1,120	\$ 1,054

At March 31, 2009, the balance of unearned stock-based compensation to be expensed in future periods related to unvested share-based awards, as adjusted for expected forfeitures, was approximately \$6.0 million. The weighted-average period over which the unearned stock-based compensation was expected to be recognized was approximately 2 years. We anticipate that we will grant additional share-based awards to employees in the future, which will increase the stock-based compensation expense by the additional unearned compensation resulting from these grants. The fair value of these grants is not included in the amount above, as the impact of these grants cannot be predicted at this time because it will depend on the number of share-based payments granted. In addition, if factors change and we employ different assumptions in the application of SFAS No. 123(R) in future periods, the stock-based compensation expense that we record under SFAS No. 123(R) may differ significantly from what we have recorded in the current period.

9. Geographic Information and Significant Customers

Our corporate headquarters and main design center are located in Plano, Texas. We have other sales offices and design centers in the United States and other worldwide locations. Net income (loss) from foreign operations totaled \$(1.5) million and \$2.7 million for the first quarter of 2009 and 2008, respectively. Net revenue by geographical area is summarized below (in thousands):

	Three Months Ended March 31,	
	2009	2008
Asia Pacific	\$ 8,062	\$ 11,589
North America	6,271	8,247

Edgar Filing: MICROTUNE INC - Form 10-Q

Europe	3,406	5,533
Other	156	94
Total	\$ 17,895	\$ 25,463

Table of Contents**MICROTUNE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2009****(unaudited)**

Net revenue derived from shipments to customer locations in countries exceeding 10% of total net revenue was as follows:

	Three Months Ended March 31,	
	2009	2008
Mexico	31%	24%
China (including Hong Kong)	23%	26%
Germany	*	12%

* Less than 10% of total net revenue

The locations of property and equipment, net are summarized below (in thousands):

	March 31, 2009	December 31, 2008
North America	\$ 3,378	\$ 3,599
Europe	1,063	1,109
Asia Pacific	420	440
Total	\$ 4,861	\$ 5,148

Net revenue from customers, including their respective manufacturing subcontractors, exceeding 10% of total net revenue was as follows:

	Three Months Ended March 31,	
	2009	2008
Cisco	36%	27%
Unihan ⁽¹⁾⁽²⁾	14%	18%
Panasonic	10%	12%
Samsung	*	10%
Ten largest customers	88%	86%

(1) Primarily for the benefit of ARRIS Group, Inc.

(2) A wholly-owned subsidiary of Asustek Computer

* Less than 10% of total net revenue

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Caution Regarding Forward-Looking Statements

All statements included or incorporated by reference in this Quarterly Report on Form 10-Q, other than statements of historical fact, are forward-looking statements. These forward-looking statements are based upon our current expectations, estimates and projections about our business and our industry, and reflect our beliefs and assumptions based upon information available to us as of the date of this report and are therefore subject to change. In some cases, you can identify these statements by words such as if, may, might, will, should, could, would, expects, plans, anticipates, believes, estimates, predicts, potential, continue, and other similar terms. These forward-looking statements but are not limited to, projections of our future financial performance and our anticipated growth, our accounting estimates, assumptions and judgments, the demand for our products, descriptions of our strategies, our product and market development plans, the trends we anticipate in our business and the markets in which we operate, the competitive nature and anticipated growth of those markets, our dependence on a few key customers for a substantial portion of our net revenue, our ability to continue to successfully partner with strategic demodulator partners and our ability to successfully address new markets where competition is intense.

We caution readers that the forward-looking statements in this report are predictions based on our current expectations about future events. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions that are difficult to predict. Our actual results, performance or achievements could differ materially and adversely from those expressed or implied by any forward-looking statements as a result of various factors. We caution readers not to rely on these forward-looking statements, which reflect management's analysis only as of the date of this report. These forward-looking statements speak only as of the date of this report. We undertake no obligation to revise or update any forward-looking statement for any reason, except as otherwise required by law.

NOTE: For a more complete understanding of our financial condition and results of operations, and the risks that could affect our future results, see Risk Factors in Part II, Item 1A. below which describes some of the important risk factors that may affect our business, results of operations and financial condition. You should carefully consider those risks, in addition to the other information in this report and in our other filings with the United States Securities and Exchange Commission (SEC), before deciding to make an investment in our stock. You should also read Quantitative and Qualitative Disclosures About Market Risk in Part I, Item 3. below.

You should also read the following discussion and analysis in conjunction with our Unaudited Consolidated Financial Statements and related Notes in Part I, Item 1., Financial Statements.

OVERVIEW

Microtune, Inc. was incorporated in 1996. We design and market radio frequency (RF) integrated circuits (ICs) and subsystem module solutions for the cable, automotive entertainment electronics and digital television (DTV) markets. Our tuner, amplifier and upconverter products permit the delivery, reception and exchange of broadband video, audio and data using terrestrial (off-air) and/or cable communications systems. Our tuner products shipped into the cable and DTV markets are in the form of ICs while our tuner products shipped into the automotive entertainment electronics market are principally in the form of subsystem modules, but are expected to be increasingly in the form of ICs in the near future. Our amplifier products are principally in the form of both ICs and subsystem modules and our upconverter products are principally in the form of subsystem modules, but also contain our ICs.

Our products enable or target various consumer electronics, broadband communications and automotive entertainment electronics applications or devices, including cable television set-top boxes; DOCSIS®-based, high-speed voice and data cable modems; car audio, television and antenna amplifier systems; digital/analog television systems, including high-definition televisions (HDTV); personal computer television (PC/TV) multimedia products; and mobile television receivers. We sell our products to original equipment manufacturers (OEMs) and original design manufacturers (ODMs) who sell devices, subsystems and applications to consumers or service providers within the cable, automotive entertainment electronics and DTV markets. We operate Microtune as a single business unit or reportable operating segment serving our target markets. We record our operating expenses by functional area and account type, but we do not record or analyze our operating expenses by market, product type or product. We attempt to analyze our net revenue by market, but in some cases we sell our products to resellers or distributors serving multiple end markets, giving us limited ability to determine market composition of our net revenue from these customers. In addition, certain of our OEM customers purchase products from us for applications in multiple end-markets, also limiting our ability to determine our net revenue contribution from each market.

The cable, automotive entertainment electronics and DTV markets are intensely competitive and historically have seen rapid changes in demand. Certain applications, such as PC/TV, within our target markets can be characterized as having short product life cycles due to rapid technological changes, relatively simple application designs and aggressive competitive pricing. These factors can result in rapidly decreasing average selling prices, which we attempt to mitigate with our product cost reduction efforts and higher levels of integration and functionality. The volatility of demand within our target markets makes it difficult for us to identify and discuss business trends or to predict future results.

Table of Contents

Today, our products are marketed principally to OEMs and ODMs in the following markets:

Cable

Products targeting this market send and/or receive cable broadband signals. These products include tuners used in consumer premise equipment (CPE), including high-speed voice and data cable modems, digital cable set-top boxes and hybrid analog/digital cable set-top boxes; upconverter modules and chipsets used in headend modulators; and RF amplifiers used to send and receive signals between the cable headend and CPE. In some cases, the same tuners may be used to receive digital terrestrial signals. In this market, performance, the ability to support industry standards and overall solution cost are key factors in competing for design wins. Design cycles in the cable market can range from a few months to more than one year.

Automotive Entertainment Electronics

This market includes products targeting mobile automotive and, to a lesser extent, commercial aircraft environments. Our automotive entertainment electronics products range from components for traditional AM/FM radios (including tuners and antenna amplifiers) to components for emerging entertainment applications, including in-car television; in-flight video; digital radio, such as digital audio broadcast (DAB); and HD radio. Both performance and overall solution cost are key competitive factors in this market. Design cycles in the automotive entertainment electronics market are generally very long, in some cases, two to three years.

Digital Television

Products targeting this market receive digital terrestrial signals or digital and analog terrestrial signals. These products are designed for use in consumer electronics devices such as mobile televisions; integrated digital television (iDTV) sets; digital terrestrial set-top converter boxes; satellite and IP set-top boxes that include one or more terrestrial tuners used to receive local high-definition television broadcasts; portable DVD players; digital video recorders (DVRs); DVD recorders; and PC/TV multimedia products, including both USB and PCI or PCI Express OEM and add-on devices. Products targeting these applications require both high performance and competitive overall solution cost. The design cycles for PC/TV are relatively shorter and require very low overall solution cost and low power consumption. Design cycles in the DTV market can range from a few months to more than one year for peripheral devices and from a few months to several months for PC/TV applications.

We monitor and analyze a number of key financial performance indicators in order to manage our business and evaluate our financial and operating performance. Those indicators include:

Net Revenue: Our net revenue is generated principally by sales of our ICs and subsystem module products directly to OEMs and ODMs who sell devices or applications to consumers or service providers within the cable, automotive entertainment electronics and DTV markets. The devices or applications that our customers produce include cable television set-top boxes; DOCSIS[®]-based, high-speed voice and data cable modems; car audio, television and antenna amplifier systems; digital/analog television systems, including HDTVs; PC/TV multimedia products; and mobile television receivers. We also market and sell to third-party manufacturers and to distributors who sell directly to the OEMs and ODMs. The majority of our net revenue is generated through the efforts of our sales organization. However, we generated approximately 8% and 10% of our net revenue from sales made to distributors in the first quarter of 2009 and 2008, respectively. Our net revenue varies based upon economic and market conditions in the semiconductor industry and our target markets; the timing, rescheduling or cancellation of customer orders; our ability, as well as the ability of our customers, to manage inventory; seasonality in the demand for consumer products into which our products are incorporated; and large orders placed by our key customers. These factors may cause our quarterly and yearly net revenue to fluctuate significantly, which makes it difficult for us to discuss revenue trends or to predict future results. We expect these fluctuations will continue in the future. We analyze trends in total net revenue and we attempt to analyze total net revenue trends by market, which is limited due to our lack of visibility into customers and/or applications, as described above. We also analyze revenue from key customers, focusing on our ten-percent customers, and aggregate net revenue from our top ten customers.

Table of Contents

Cost of Revenue and Gross Margin: Cost of revenue includes the cost of subcontracted materials and wafer fabrication, IC assembly, final test, factory labor and overhead, shipping of materials, shipping costs to customers, customs expenses, warranty costs, production employee expenses and inventory charges or benefits relating to excess or obsolete inventory. We also report expenses for the depreciation of our test and handling equipment and logistics in cost of revenue. Significant items impacting cost of revenue include our product mix and volumes of product sales; the position of our products in their respective life cycles; the effects of competitive pricing programs; manufacturing costs; fluctuations in direct product costs such as wafer pricing and assembly, packaging and testing costs, and overhead costs; and provisions for excess or obsolete inventory. Stock-based compensation expense recorded in cost of revenue under SFAS No. 123(R) was insignificant, and is expected to continue to be insignificant as we use third-party contract manufacturers to produce the majority of our products enabling us to employ a limited number of production employees. Our cost of revenue may increase due to price fluctuations and cyclical demand and we may not be able to pass this increase on to our customers, which makes it difficult for us to determine if cost of revenue and gross margin trends will continue or to predict future results. We analyze absolute gross margin dollars and gross margin percentage. We also analyze the key drivers of gross margin, namely typical selling price trends and the components of cost of revenue. In 2009, we expect the average selling prices of our products to slightly decrease. More significant decreases, should they occur, could have a material adverse effect on our gross margins, results of operations and financial condition.

Operating Expenses: Operating expenses are substantially driven by personnel-related expenses, including cash and stock-based compensation expense, lab supplies, training and prototype materials, professional fees and insurance expenses. We record stock-based compensation expense in operating expenses in accordance with SFAS No. 123(R), which has resulted in a material charge each period as the majority of our employees are classified in this category. We analyze trends in the absolute dollar value and percentage of net revenue for research and development and selling, general and administrative expenses. We also analyze the underlying expense inputs of significant operating expenses.

Other Income and Expense: We analyze the individual components of other income and expense. We also analyze interest income and the rate of return earned on our cash and cash equivalents and short-term investments.

Liquidity and Cash Flows: Our cash flows are primarily driven by our cash operating results and sales and purchases of investments. The primary source of our liquidity is our cash and cash equivalents and short-term investments. From period to period, we experience fluctuations in various items, including our working capital accounts, capital expenditures and proceeds from the exercise of employee stock options and shares purchased under our employee stock purchase program.

Balance Sheet: We view cash and cash equivalents, short-term investments, accounts receivable, days sales outstanding, inventory, inventory turns, and working capital as important indicators of our financial health.

RESULTS OF OPERATIONS

The following table shows certain data from our consolidated statements of operations expressed as a percentage of net revenue:

	Three Months Ended	
	March 31,	
	2009	2008
Net revenue	100%	100%
Cost of revenue	53	52
Gross margin	47	48
Operating expenses:		
Research and development	37	24
Selling, general and administrative	31	23
Total operating expenses	68	47

Edgar Filing: MICROTUNE INC - Form 10-Q

Income (loss) from operations	(21)	1
Other income (expense)	1	3
Income (loss) before income taxes	(20)	4
Income tax expense		1
Net income (loss)	(20)%	3%

Table of Contents**COMPARISON OF THE THREE MONTHS ENDED MARCH 31, 2009 AND 2008****Net Revenue**

The following table presents net revenue from each of our product types for the first quarter of 2009 as compared to the first quarter of 2008 (in thousands):

	Three Months Ended March 31,			
	2009	2008	Change	% Change
Silicon	\$ 14,598	\$ 19,340	\$ (4,742)	(25)%
Modules	3,297	6,113	(2,816)	(46)
Other		10	(10)	(100)
Total	\$ 17,895	\$ 25,463	\$ (7,568)	(30)

The decrease in net revenue in the first quarter of 2009 as compared to the first quarter of 2008 was primarily the result of decreased shipments of silicon tuner products for the cable market, module products for the automotive entertainment electronics market, silicon tuner products for the DTV market and slightly lower average selling prices of silicon tuner products for the cable market. Silicon tuner unit shipments decreased by approximately 21% in the first quarter 2009 as compared to the first quarter of 2008, primarily relating to the cable and DTV markets. Module unit shipments for the automotive entertainment electronics market decreased by approximately 45% in the first quarter of 2009 as compared to the first quarter of 2008, primarily relating to car television applications. We believe these decreased shipments were primarily driven by the challenging economic environment and do not relate to the loss of market share.

We expect net revenues to decline significantly in 2009 as compared to 2008, primarily due to the impact of the economic slowdown, and to a lesser extent, the expected decrease in car television revenue as described above.

Net revenue from customers, including their respective manufacturing subcontractors, exceeding 10% of total net revenue was as follows:

	Three Months Ended March 31,	
	2009	2008
Cisco	36%	27%
Unihan ⁽¹⁾⁽²⁾	14%	18%
Panasonic	10%	12%
Samsung	*	10%
Ten largest customers	88%	86%

⁽¹⁾ Primarily for the benefit of ARRIS Group, Inc.

⁽²⁾ A wholly-owned subsidiary of Asustek Computer

* Less than 10% of total net revenue

Cost of Revenue and Gross Margin

The following table presents cost of revenue and gross margin for the first quarter of 2009 as compared to the first quarter of 2008 (in thousands):

	Three Months Ended March 31,			
	2009	2008	Change	% Change

Edgar Filing: MICROTUNE INC - Form 10-Q

Cost of revenue	\$ 9,464	\$ 13,222	\$ (3,758)	(28)%
Gross margin	8,431	12,241	(3,810)	(31)
Gross margin %	47.1%	48.1%	(1.0)pts.	

Gross margin decreased in the first quarter of 2009 as compared to the first quarter of 2008 primarily due to an approximate \$7.6 million decrease in net revenue and a 1.0 point decrease in gross margin percentage. Gross margin percentage in the first quarter of 2009 as compared to the first quarter of 2008 was negatively impacted by an increase in the inventory valuation allowance,

Table of Contents

particularly for cable set-top box silicon products and car television module products and slightly lower average selling prices of silicon tuner products for the cable market, partially offset by an increase in gross margin percentage for the cable modem market segment and a decrease in net revenue for the automotive entertainment electronics market as a percentage of total net revenue, which had a lower gross margin percentage as compared to other markets.

We expect our gross margin percentage for the year 2009 to be similar to the year 2008 and fall within our target range of 49% to 50%, although the gross margin percentage for any particular quarter may fall outside our target range.

Our cost of revenue for the first quarter of 2009 and 2008 benefited from the sale of inventory which had previously been identified as excess to expected demand and expensed in prior periods. The total value of these inventories for the first quarter of 2009 and 2008 was \$0.2 million and \$0.2 million, respectively. The net impact of changes in the inventory valuation allowance for the first quarter of 2009 and 2008 was a charge (benefit) of \$0.8 million and \$(0.1) million, respectively.

Stock-Based Compensation

The following table summarizes the allocation of stock-based compensation expense under SFAS No. 123(R) (in thousands):

	Three Months Ended March 31,	
	2009	2008
Cost of revenue	\$ (2)	\$ 5
Research and development	467	358
Selling, general and administrative	655	691
Total stock-based compensation expense included in operating expenses	\$ 1,122	\$ 1,049
Total stock-based compensation expense	\$ 1,120	\$ 1,054

Operating Expenses

The following table presents operating expenses for the first quarter of 2009 as compared to first quarter of 2008 (in thousands):

	Three Months Ended March 31,			
	2009	2008	Change	% Change
Research and development	\$ 6,599	\$ 6,017	\$ 582	10%
Selling, general and administrative	5,685	5,959	(274)	(5)
Total	\$ 12,284	\$ 11,976	\$ 308	3

Research and Development Expenses

Our research and development expenses consist primarily of personnel-related expenses, engineering software, prototype materials, lab supplies and training. To date, we have expensed all of our research and development costs in the period incurred as our process for developing our products has been essentially completed concurrently with the establishment of technological feasibility. Research and development efforts currently are focused primarily on development of our next generation of products and designing more highly-integrated products that leverage next-generation technology.

Edgar Filing: MICROTUNE INC - Form 10-Q

The increase in research and development expenses in the first quarter of 2009 as compared to the first quarter of 2008 was primarily the result of an increase in personnel-related expenses resulting from an average headcount increase of approximately 8%, an increase in compensation expense incurred in conjunction with our regular annual base compensation adjustments, the effects of a benefit of \$0.3 million for the reversal of taxes and interest accrued in excess of amounts paid to the IRS upon completion of its examination of our payroll tax returns for 2003 through 2006 recognized during the first quarter of 2008 and an increase in expenditures to design our silicon products, including license and maintenance fees for engineering software, partially offset by a decrease in prototyping expenses for new and existing silicon projects. Stock-based compensation expense related to research and development was \$0.5 million and \$0.4 million in the first quarter of 2009 and 2008, respectively.

Table of Contents

We expect research and development expenses to increase in 2009 between 7% and 12% as compared to 2008 due to the full year impact of expenses that ramped throughout 2008 and minor incremental spending in 2009, as we have increased the number of RF and technical personnel and as we increase spending on new product development.

We remain committed to significant research and development efforts to support our technology leadership in the markets in which we operate. Currently, we hold 83 issued United States utility patents and have 28 additional United States patent applications pending. Our issued United States patents begin to expire in 2015. Our patents generally cover various aspects of our RF and analog technologies at the broad architectural, circuit and building-block levels.

Selling, General and Administrative Expenses

Selling, general and administrative expenses include our personnel-related expenses for our administrative, finance, human resources, sales and marketing, information technology and legal departments, and include expenditures related to professional fees for accounting and legal, public relations and financial advisors. These expenses also include promotional and marketing costs, sales commissions and provisions for doubtful accounts.

The decrease in selling, general and administrative expenses in the first quarter of 2009 as compared to the first quarter of 2008 was due to a decrease in professional fees expensed in connection with general legal and accounting matters and audit-related expenses and a decrease in incentive compensation charges related to the 2008 Bonus Program compared to the fiscal year 2007 Bonus Program, partially offset by an increase in professional fees expensed in connection with the SEC litigation against two of our former officers and the effects of a benefit of \$0.1 million for the reversal of taxes and interest accrued in excess of amounts paid to the IRS upon completion of its examination of our payroll tax returns for 2003 through 2006 recognized during the first quarter of 2008. The results in the first quarter of 2009 included net charges of \$0.6 million related to professional fees of our legal firms expensed in connection with the SEC litigation against two of our former officers and excluded \$2.1 million of professional fees of our former officers legal firms recorded as a receivable for amounts expected to be reimbursed by our directors and officers liability insurance carrier related to this matter. See Part II., Item 1. Legal Proceedings.

We are currently unable to estimate selling, general and administrative expenses in 2009 due to the difficulty predicting potential future professional fees of our legal firms related to the ongoing SEC litigation against two of our former officers.

Other Income and Expense

Other income consists primarily of interest income from our cash balances, net foreign currency gains and other non-operating income.

The following table presents a comparison of other income for the first quarter of 2009 and 2008 (in thousands):

	Three Months Ended March 31,			
	2009	2008	Change	% Change
Interest income	\$ 418	\$ 526	\$ (108)	(21)%
Foreign currency gains (losses), net	(214)	140	(354)	(253)
Other, net	40	2	38	1,900
Total	\$ 244	\$ 668	\$ (424)	(63)

The decrease in interest income in the first quarter of 2009 as compared to the first quarter of 2008 was primarily the result of significantly lower average rates of return on our cash and investment balances. We expect interest income in 2009 to be lower than 2008 levels due to lower rates of return on short-term, high quality investment alternatives. We also expect interest income in the second half of 2009 to be significantly lower compared to the first half of 2009 due to lower expected average rates of return on new investments made after our held-to-maturity investments mature during the second and third quarter of 2009.

Our functional currency is the United States Dollar. The impact from the re-measurement of accounts not denominated in United States Dollars is recognized currently in our results of operations as a component of net foreign currency gains (losses). Foreign currency gains (losses), net, were primarily a result of exchange rate fluctuations between the United States Dollar and the Euro.

Table of Contents**Income Taxes**

The following table presents a comparison of our income tax expense for the first quarter of 2009 and 2008 (in thousands):

	2009	2008	Three Months Ended March 31, Change	% Change
Income tax expense	\$ 48	\$ 281	\$ (233)	(83)%

Effective tax rate (1.3)% 30.1% (31.4)pts.

Our income tax expense for the first quarter of 2009 included the utilization of previously reserved net operating loss carryforwards and consisted of withholding taxes, United States state income taxes and foreign income taxes. In the first quarter of 2008, our effective tax rate differed from the 34% statutory corporate tax rate primarily due to a \$0.3 million charge relating to withholding taxes on certain cross-border transactions and alternative minimum taxes, partially offset by permanent differences, changes in valuation allowances and lower foreign tax rates. Income tax expense for the first quarter of 2008 consisted of the withholding taxes, described above, alternative minimum taxes and foreign income taxes.

Net Income (Loss)

The following table presents a comparison of our net income (loss) for the first quarter of 2009 and 2008 (in thousands):

	2009	2008	Three Months Ended March 31, Change	% Change
Net income (loss)	\$ (3,657)	\$ 652	\$ (4,309)	(661)%

Percent of net revenue (20.4) 2.6 (23.0)pts.

The decrease in net income in the first quarter of 2009 as compared to the first quarter of 2008 was primarily the result of a decrease in net revenue, which resulted in a decrease of \$3.8 million in gross margin, a decrease in gross margin percentage, an increase in research and development expense, an increase in foreign currency losses and a decrease in interest income, partially offset by a decrease in selling, general and administrative expense, as described above.

Since inception we have incurred significant losses resulting in an accumulated deficit of \$353.5 million as of March 31, 2009. Our operating history and our business risks, including those risks set forth under the caption Risk Factors in Part II, Item 1A. and Quantitative and Qualitative Disclosures About Market Risk, in Part I, Item 3. make the prediction of future results of operations difficult. As a result, we cannot assure you that we will sustain revenue growth or profitability.

We have invested heavily in research and development of our RF ICs and subsystem module technology. We expect to continue our investment in these areas to further develop our RF products. This investment may include the continued recruitment of RF and analog IC designers and systems engineers, and the acquisition of test and development equipment and software development tools for the expansion of our product portfolio. As a result, we may incur substantial losses from operations in the foreseeable future. Furthermore, there can be no assurance that our research and development efforts will result in the timely development and commercial release of products that achieve market acceptance.

The time lag between product availability and volume shipment can be significant due to the sales process for our products, including customer qualification of our products. This delay can be from six months to as long as four years, during which we continue to develop our technology. Due to this lengthy product cycle, we may experience significant delays from the time we incur expenses for research and development, selling, general and administrative efforts, and investments in inventory, to the time we generate corresponding revenue. The rate of new orders may vary significantly from month to month and quarter to quarter. If anticipated sales or shipments in any quarter do not occur when expected, expenses and inventory levels could be disproportionately high, and our results of operations for that quarter, and potentially future quarters, would be materially and adversely affected.

Table of Contents**Liquidity and Capital Resources**

The following table presents key components of our liquidity and capital resources for the first quarter of 2009 and 2008 and at March 31, 2009 and December 31, 2008, respectively (in thousands, except days sales outstanding in accounts receivable and inventory turns):

	Three Months Ended			
	March 31,			
	2009	2008	Change	% Change
Operating cash flows	\$ 2,005	\$ (2,546)	\$ 4,551	179%
Investing cash flows	(10,342)	(515)	(9,827)	(1,908)
Financing cash flows	(31)	(35)	4	11
Capital expenditures	342	515	(173)	(34)
Days sales outstanding in accounts receivable	37	44	(7)	(16)
Inventory turns (annualized)	4.1	4.7	(0.6)	(13)
	March 31,	December 31,		
	2009	2008	Change	% Change
Cash and cash equivalents	\$ 37,678	\$ 46,097	\$ (8,419)	(18)%
Short-term investments	50,000	40,000	10,000	25
Total	\$ 87,678	\$ 86,097	\$ 1,581	2
Accounts receivable, net	\$ 7,418	\$ 9,495	\$ (2,077)	(22)%
Inventories	9,314	11,261	(1,947)	(17)
Working capital	100,030	102,015	(1,985)	(2)

In the first quarter of 2009, the increase in cash provided by operating activities resulted primarily from working capital changes in accounts receivable due to the timing of cash receipts and decreased net revenue, working capital changes in inventory and accounts payable due to decreased inventory purchases, working capital changes in accrued compensation due to a decrease in the payment of amounts earned under the fiscal year 2008 Bonus Program compared to a similar program in 2007 and a \$1.6 million reimbursement received from our directors and officers liability insurance carrier for professional fees incurred by certain former officers of the Company who are involved in litigation with the SEC, partially offset by a decrease in cash operating results. See Note 7, Commitments and Contingencies, to the Notes to Unaudited Consolidated Financial Statements. Cash operating results decreased in the first quarter of 2009 as compared to the first quarter of 2008 due to a decrease in net revenue, a decrease in interest income and an increase in operating expenses, as described above.

In the first quarter of 2009, our primary use of cash from investing activities was the purchase of held-to-maturity investments. In the first quarter of 2008, our primary use of cash from investing activities was the purchase of equipment related to testing and evaluation of our products.

In the first quarter of 2009, our primary use of cash from financing activities was the surrender of common stock by employees to satisfy payroll tax withholding requirements on incentive compensation under the 2008 Bonus Program. In the first quarter of 2008, our primary use of cash from financing activities was the surrender of common stock by employees to satisfy payroll tax withholding requirements on incentive compensation under an annual incentive compensation program for fiscal year 2007, partially offset by cash provided from the exercise of employee stock options.

Our cash and cash equivalents consisted of bank deposits and money market funds. Our short-term investments consisted of certificates of deposit insured by the Federal Deposit Insurance Corporation (FDIC). The certificates of deposit have a contractual maturity of six months and mature on various dates during the second and third quarters of 2009. We currently have no long-term debt.

We expect our operating expenses to remain flat or increase slightly in the foreseeable future. We also expect less significant increases in capital expenditures. As a result, our net cash flows will depend heavily on our level of future revenue and our ability to manage expenses.

Table of Contents

See Note 7, Commitments and Contingencies, to the Notes to Unaudited Consolidated Financial Statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no significant changes to the information required under this Item from what was disclosed in our Annual Report on Form 10-K for the year ended December 31, 2008 (2008 10-K) filed with the SEC on February 20, 2009.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures. We have evaluated, under the supervision and with the participation of our Chief Executive Officer (CEO) and our Chief Financial Officer (CFO), the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q (the Evaluation Date). Based on this evaluation, our CEO and CFO have concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective to ensure that information required to be disclosed by Microtune in the reports we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms.

Changes in Internal Control over Financial Reporting. There has been no change in our internal control over financial reporting that occurred during the quarter ended March 31, 2009 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II.**OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

The information set forth under the heading *Legal Proceedings* in Note 7, Commitments and Contingencies, to the Notes to Unaudited Consolidated Financial Statements, included in Part I, Item 1. of this report, is incorporated herein by reference.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors disclosed in our 2008 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table presents information with respect to our purchases of our common stock during the first quarter of 2009:

2009 Calendar Year	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
January 1 - January 31				
February 1 - February 28				
Employee transactions (1)	16,644	\$ 1.91		N/A
March 1 - March 31				
Total	16,644	\$ 1.91		N/A

- (1) All shares were withheld for the payment of withholding taxes upon vesting of restricted stock units pursuant to the 2008 Bonus Program.
