For the transition period from _____ to _____

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report

Commission file number: 001-14856

ORIX KABUSHIKI KAISHA

(Exact name of Registrant as specified in its charter)

ORIX CORPORATION

(Translation of Registrant's name into English)

JAPAN

(Jurisdiction of incorporation or organization)

Mita NN Building, 4-1-23 Shiba, Minato-ku Tokyo 108-0014, Japan

(Address of principal executive offices)

Tatsuhito Yazaki

Mita NN Building, 4-1-23 Shiba, Minato-ku Tokyo 108-0014, Japan

Telephone: +81-3-5419-5042

Edgar Filing: ORIX CORP - Form 20-F

Facsimile: +81-3-5419-5901

(Name, telephone, e-mail and/or facsimile number and address of company contact person)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

| | Title of each class | Name of each exchange on which registered |
|-----|---|---|
| (1) | Common stock without par value, or the Shares | New York Stock Exchange* |
| (2) | American depository shares, or the ADSs, each of which represents one-half of one Share | New York Stock Exchange |

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

As of March 31, 2009, 92,217,067 Shares were outstanding, including Shares that were represented by 1,446,586 ADSs.

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Note: Checking the box above will not relieve any Registrant required to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 from their obligations under those sections.

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the Registrant submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer

Indicate by check mark which basis of accounting the Registrant has used to prepare the financial statements included in this filing.

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the Registrant has elected to follow.

Edgar Filing: ORIX CORP - Form 20-F

.. Item 17 .. Item 18

If this is an annual report, indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

.. Yes No

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the Registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court.

.. Yes .. No

*Not for trading, but only for technical purposes in connection with the registration of the ADSs.

Table of Contents

**CERTAIN DEFINED TERMS, CONVENTIONS AND
PRESENTATION OF FINANCIAL INFORMATION**

As used in this annual report, unless the context otherwise requires, the Company and ORIX refer to ORIX Corporation and ORIX Group, we, us, our and similar terms refer to ORIX Corporation and its subsidiaries.

In this annual report, subsidiary and subsidiaries refer to consolidated subsidiaries of ORIX, generally companies in which ORIX owns more than 50% of the outstanding voting stock and exercises effective control over the companies operations, and affiliate and affiliates refer to all of our affiliates accounted for by the equity method, generally companies in which ORIX has the ability to exercise significant influence over their operations by way of 20-50% ownership of the outstanding voting stock or other means.

The consolidated financial statements of ORIX have been prepared in accordance with accounting principles generally accepted in the United States of America, or US GAAP. For certain entities where we hold majority voting interests but minority shareholders have substantive participation rights to decisions that occur as part of the ordinary course of the business, the equity method is applied pursuant to EITF96-16 (Investor s accounting for an investee when the investor has a majority of the voting interest but a minority shareholder or shareholders have certain approval or veto rights). Unless otherwise stated or the context otherwise requires, all amounts in such financial statements are expressed in Japanese yen.

References in this annual report to yen or ¥ are to Japanese yen and references to US\$, \$ or dollars are to United States dollars.

Certain monetary amounts and percentage data included in this annual report have been subject to rounding adjustments for the convenience of the reader. Accordingly, figures shown as totals in certain tables may not be equal to the arithmetic sums of the figures which precede them.

The Company s fiscal year ends on March 31. The fiscal year ended March 31, 2009 is referred to throughout this annual report as fiscal 2009 or the 2009 fiscal year, and other fiscal years are referred to in a corresponding manner. References to years not specified as being fiscal years are to calendar years.

FORWARD-LOOKING STATEMENTS

This annual report contains statements that constitute forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. When included in this annual report, the words, will, should, expects, intends, anticipates, estimates and similar expressions, others, identify forward looking statements. Such statements, which include, but are not limited to, statements contained in Item 3. Key Information Risk Factors, Item 5. Operating and Financial Review and Prospects and Item 11. Quantitative and Qualitative Disclosures About Market Risk, inherently are subject to a variety of risks and uncertainties that could cause actual results to differ materially from those set forth in such statements. These forward-looking statements are made only as of the filing date of this annual report. The Company expressly disclaims any obligation or undertaking to release any update or revision to any forward-looking statement contained herein to reflect any change in the Company s expectations with regard thereto or any change in events, conditions or circumstances on which any statement is based.

- (1) As a result of the recording of income from discontinued operations based on the Statement of Financial Accounting Standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, we reclassified certain items retroactively to the prior years.
- (2) The sum of assets considered 90 days or more past due and loans individually evaluated for impairment amounted to ¥138,699 million, ¥120,607 million, ¥134,394 million, ¥203,253 million and ¥495,514 million

Table of Contents

- as of March 31, 2005, 2006, 2007, 2008 and 2009, respectively. These sums included: (i) investment in direct financing leases considered 90 days or more past due of ¥25,733 million, ¥20,494 million, ¥21,149 million, ¥22,637 million and ¥27,949 million as of March 31, 2005, 2006, 2007, 2008 and 2009, respectively, (ii) installment loans (excluding loans individually evaluated for impairment) considered 90 days or more past due of ¥26,945 million, ¥16,455 million, ¥12,656 million, ¥15,333 million and ¥17,860 million, as of March 31, 2005, 2006, 2007, 2008 and 2009, respectively, and (iii) installment loans individually evaluated for impairment of ¥86,021 million, ¥83,658 million, ¥100,589 million, ¥165,283 million and ¥449,705 million as of March 31, 2005, 2006, 2007, 2008 and 2009, respectively. See Item 5. Operating and Financial Review and Prospects Results of Operations Year Ended March 31, 2009 compared to Year Ended March 31, 2008 Details of Operating Results Revenues, New Business Volumes and Operating Assets Direct financing leases, and Installment loans and investment securities.
- (3) Operating assets are defined as assets subject to regular, active sales and marketing activities including the assets shown on the balance sheet as investment in direct financing leases, installment loans, investment in operating leases, investment in securities and other operating assets. Operating assets are calculated before allowance for doubtful receivables on direct financing leases and probable loan losses.
- (4) Return on equity is the ratio of net income for the period to average shareholders' equity based on fiscal year-end balances during the period. Return on assets is the ratio of net income for the period to average total assets based on fiscal year-end balances during the period. Shareholders' equity ratio is the ratio as of the period end of shareholders' equity to total assets. Allowance/investment in direct financing leases and installment loans is the ratio as of the period end of the allowance for doubtful receivables on direct financing leases and probable loan losses to the sum of investment in direct financing leases and installment loans.
- (5) Basic earnings from continuing operations per share is the amount derived by dividing income from continuing operations by the weighted-average number of common shares outstanding based on month-end balances during the fiscal year. The term basic earnings from continuing operations per share as used throughout this annual report has the meaning described above.
- (6) The US dollar amounts represent translations of the Japanese yen amounts at the noon buying rates for Japanese yen per \$1.00 in New York City for cable transfers in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York in effect on the respective dividend payment dates.

Table of Contents**EXCHANGE RATES**

In certain parts of this annual report, we have translated yen amounts into dollars for the convenience of readers. The rate that we used for translations was ¥98.23 = \$1.00, which was the approximate exchange rate in Japan on March 31, 2009 using the telegraphic transfer rate of the Bank of Tokyo-Mitsubishi UFJ, Ltd. The following table provides the noon buying rates for Japanese yen per \$1.00 in New York City for cable transfers in foreign currencies. As of June 19, 2009, the noon buying rate for Japanese yen per \$1.00 in New York City for cable transfers in foreign currencies was ¥96.15 = \$1.00. No representation is made that the yen or dollar amounts referred to herein could have been or could be converted into dollars or yen, as the case may be, at any particular rate or at all.

RISK FACTORS

Investing in our securities involves risks. You should carefully consider the risks described below as well as all the other information in this annual report, including, but not limited to, our consolidated financial statements and related notes and Item 11. Quantitative and Qualitative Disclosures about Market Risk. Our business activities, financial condition and results of operations and the trading prices of our securities could be adversely affected by any of the factors discussed below or other factors. This annual report also contains forward-looking statements that involve uncertainties. Our actual results could differ from those anticipated in these forward-looking statements as a result of various factors, including, but not limited to, the risks faced by us described below and elsewhere in this annual report. See Forward-Looking Statements. Forward-looking statements in this section are made only as of the filing date of this annual report.

1. Risks related to our external environment

(1) Our business activities, financial condition and results of operations may be adversely affected by turmoil in the financial and capital markets and global economic conditions

The global economy is currently experiencing unprecedented turmoil in the world's financial and capital markets. This turmoil has resulted in a variety of damaging effects on the operating environment of the financial industry, including a severe contraction in the availability of credit, a reduction in liquidity, a decrease of

Table of Contents

confidence in the financial system and global economic decline. The soundness of many financial institutions is dependent on that of other financial institutions through their mutual credits, trading and other transactions. Accordingly, uncertainty regarding the creditworthiness of or the likelihood of default by certain financial institutions could result in significant liquidity problems, losses or defaults at other financial institutions. Although the governments of several major countries have taken extensive emergency measures to stabilize the global financial markets, there is no guarantee that such measures will be effective in correcting the current financial meltdown.

In Japan, exports have been adversely affected by both economic recessions in the United States and Europe as well as a stronger yen exchange rate vis-à-vis the dollar and euro. Concerns about Japan's future economic growth, share price volatility, exchange rate volatility, rising unemployment, declining real estate prices and lower corporate earnings have added to the pressures on the Japanese economy. As a result of these pressures, there has been a rise in delinquencies and default rates, as well as a general lack of confidence in the financial markets amid fears of a prolonged recession in Japan.

Despite our attempts to minimize our exposure to these Japanese and global problems through the development and implementation of risk management procedures, further deterioration of Japanese and global financial and capital markets and economic conditions could continue to adversely affect our business activities, financial condition and results of operations.

(2) Our access to liquidity and capital may be restricted by economic conditions or instability in the financial markets

Our primary sources of funds from financing activities are: borrowings from banks and other institutional lenders, funding from capital markets (such as offerings of commercial paper, medium-term notes, straight bonds, convertible bonds, asset-backed securities and other debt securities) and deposits. Such sources include a significant amount of short-term debt such as commercial paper and short-term borrowings from various institutional lenders, and long-term debt maturing in the current fiscal year ending March 31, 2010. The dysfunction of, and turmoil in, the financial markets have led to a severe reduction in available credit due to increased concerns about, among other things, rising borrower default rates.

The reduction of available credit has increased the risks to our financial liquidity. These risks have increased due to a variety of factors including our ability to raise new funds in the market or renew existing funding sources is uncertain; we are exposed to increased funding costs; we may be more subject to volatility in the credit markets; and our securities may not be attractive to investors in the capital markets. If our access to liquidity is restricted, or if we are unable to obtain our required funding at acceptable costs, we may face a liquidity shortage that significantly impairs our financial condition, or, alternatively, we may be required to substantially, or suddenly, curtail our business activities, which would significantly and adversely affect our results of operations.

(3) We may lose market share or suffer reduced interest margins if our competitors compete with us on pricing and other terms

We compete with our competitors primarily on the basis of pricing, terms and transaction structure. Other competitive factors include industry experience, client service and client relationships. In recent years, Japanese banks, their affiliates and other finance companies have implemented strategies targeted at increasing business with small and medium-sized enterprises, which form the core of our customer base in Japan. Our competitors sometimes seek to aggressively compete on the basis of pricing and terms, without regard to profitability, and we may lose market share if we are unwilling to compete on pricing or terms. Similarly, some of our competitors are larger than we are and have access to capital at a lower cost than we have and may be better able to maintain profits at reduced prices. If we compete with our competitors on pricing or terms, we may experience lower income or reduced profitability.

Table of Contents

(4) Negative press coverage or rumors could affect our business activities, financial condition, results of operations or share price

Our business depends upon the confidence of customers and market participants. Negative press coverage or rumors (including on the Internet) about our activities, our industry or parties with whom we do business could harm our reputation and diminish confidence in our business. If we become aware of such negative press coverage, we typically assess the situation and take appropriate action in response. However, even if we provide appropriate and timely explanations to the press and other interested parties, there is no assurance that we can prevent an adverse effect on our reputation. If we suffer reputational damage as a result of any negative publicity, there is a chance that we will lose customers or business opportunities, which could adversely affect our results of operations and cause our share price to decline.

(5) Our business may be adversely affected by economic fluctuations and political disturbances

We conduct business operations in Japan as well as overseas, including in the United States, Asia, Oceania, the Middle East and Europe. Shifts in commodity market prices, shifts in consumer demands, political instability or religious strife in any such region could adversely affect our operations.

(6) Changes in laws, regulations and accounting standards may affect our business activities, financial condition and results of operations

Changes in laws, regulations and accounting standards may affect the way that we conduct our business, the products that we may offer in Japan or overseas as well as our customers, borrowers and invested companies. Such changes are unpredictable and may cause our costs to increase. As a result our business activities, financial condition and results of operations could be adversely affected.

(7) Our business activities, financial condition and results of operations may be adversely affected by unpredictable events

Our business activities, financial condition and results of operations may be adversely affected by unpredictable events or any continuing effects caused by such events. Unpredictable events include man-made events, such as accidents, war, terrorism and insurgency, and natural events, such as earthquakes, storms, tsunamis, fires and outbreaks of new strains of influenza or other infectious diseases. These events may, among other things, cause unexpectedly large market price movements or an unexpected deterioration of the economic conditions of a country. If such a sudden and unpredictable event occurs in an area where we operate, either as a single event or in combination with other unpredictable events, we may be unable to respond to such changing economic conditions in time to protect our affected business operations, and our results of operations may be adversely affected.

2. Risks related to our financial affairs

(1) Our allowance for doubtful receivables on direct financing leases and probable loan losses may be insufficient and our credit-related costs might increase

Edgar Filing: ORIX CORP - Form 20-F

We maintain an allowance for doubtful receivables on direct financing leases and probable loan losses. This allowance reflects our judgment of the loss potential of these items, after considering factors such as:

the nature and characteristics of obligors;

current economic conditions and trends;

prior charge-off experience;

current delinquencies and delinquency trends;

future cash flows expected to be received from the direct financing leases and loans; and

the value of underlying collateral and guarantees.

Table of Contents

We cannot be sure that our allowance for doubtful receivables on direct financing leases and probable loan losses will be adequate to cover future credit losses. In particular, this allowance may be inadequate due to adverse changes in the Japanese and overseas economies in which we operate, or discrete events that adversely affect specific customers, industries or markets. Recently, the number of clients facing a deteriorating operating environment has been increasing due to restricted credit availability caused by the deterioration of the financial markets. As a result, while our charge-offs (net) have remained flat year on year, provisions for doubtful receivables and probable loan losses have been increasing. This, coupled with a deterioration of the real estate market, has caused significant increases in loans individually evaluated for impairment and provisions for doubtful receivables and probable loan losses for our installment loans to real estate-related companies. See **Item 5 Operating and Financial Review Results of Operations Year Ended March 31, 2009 Compared to Year Ended March 31, 2008 Details of Operating Results Revenues, New Business Volumes and Operating Assets Installment loans and investment securities Asset quality of our owned installment loans** for additional details. If these trends continue, we may be required to make additional provisions in the future and our results of operations may be adversely affected.

In order to enhance our collections from debtors, we may forbear from exercising some or all of our rights as a creditor against companies that are unable to fulfill their repayment obligations, and we may forgive loans or extend additional loans to such companies. Furthermore, if economic or market conditions are adverse, the value of underlying collateral and guarantees may decline. As a result, there is a possibility that credit-related costs might increase. If we need to increase our allowance for doubtful receivables on direct financing leases and probable loan losses to cover these changes or events, our results of operations could be adversely affected.

(2) We may suffer losses on our investment portfolio

We hold investments in debt and equity securities, funds, ships, aircraft and real estate in Japan, the United States and other regions. The market values of our investment assets are volatile and may decline substantially in the current year or future years. Furthermore, debt and equity securities classified as trading securities are measured at fair value and changes in their values have a direct influence on our income and losses. Unrealized gains and losses on debt and equity securities classified as available-for-sale securities are recorded in shareholders' equity, net of income taxes, and are not ordinarily charged directly to income. We recognize write-downs when we determine that declines in fair value on the securities (other than trading securities) are other than temporary.

The uncertainty in the global financial and capital markets has led to significant reductions in the liquidity of securities, greater volatility, widening of credit spreads and a lack of price transparency. For further details about valuation losses on our investment securities, see **Item 5 Operating and Financial Review Results of Operations Year Ended March 31, 2009 Compared to Year Ended March 31, 2008 Details of Operating Results Revenues, New Business Volumes and Operating Assets Brokerage commissions and net gains (losses) on investment securities and Expenses Write-downs of securities**. Although we attempt to minimize risks through the development and implementation of risk management procedures, a continuation of the present adverse market conditions or further deterioration in global financial market conditions could cause us to suffer unexpected losses from declines in the fair market value of securities. We record declines in the fair market value of the securities in accordance with applicable accounting principles. However, due to a decline in liquidity, or to the absence of liquidity, our securities may only be marketable below the recorded price.

(3) Changes in market interest rates and currency exchange rates could adversely affect our assets and our financial condition and results of operations

Our business activities are subject to risks relating to changes in market interest rates and currency exchange rates in Japan and overseas. Although we conduct asset-liability management (ALM), fixed and variable interest rates and terms of fixed-rate assets and liabilities are not uniform among our assets and liabilities. As such, increases or decreases in market interest rates or changes in the yield curve could adversely affect our results of operations.

Table of Contents

In addition, the value of our assets may move independently of market interest rates. Where funds procurement costs are increasing due to a significant increase in market interest rates or the perception that an increase may occur, financing leases terms and loan interest rates for new transactions may diverge from the trend in market interest rates.

Furthermore, changes in market interest rates could have an adverse effect on the credit quality of our assets and our asset structure. With respect to our floating-rate loan assets, if market interest rates increase, this may increase the repayment burden that our customers bear. This increased burden could adversely affect the financial condition of our customers and their ability to repay their obligations to us, possibly resulting in defaults. Alternatively, a decline in interest rates could result in increased prepayments of loans and a decrease in our assets.

We have subsidiaries and affiliates in the United States and other countries outside of Japan. Although we generally attempt to hedge foreign exchange risks that arise from these business operations through matched funding, foreign exchange contracts, currency swaps and other hedging instruments, not all of our foreign exchange risks are perfectly hedged. Similarly, any retained earnings accumulated in foreign currencies at our overseas subsidiaries are also subject to exchange risks. As a result, a significant change in currency exchange rates could have an adverse impact on our financial condition and results of operations.

(4) Our funding may be adversely affected if our credit ratings are downgraded

We obtain credit ratings from ratings agencies and have been recently downgraded by JCR and placed on negative outlook by Moody's, S&P, JCR and R&I. Although this has not had an adverse impact on our business operations, any further downgrades in our credit ratings could result in an increase in our interest expenses, and could have an adverse impact on our fund raising ability by: increasing costs of issuing commercial paper and corporate debt securities, decreasing investor demand for our securities, increasing our bank borrowing costs or reducing the amount of bank credit available to us. Any one of these liquidity events could limit our ability to raise capital, thereby adversely affecting our financial condition and liquidity position. In such event we would seek financing from alternative sources, including asset sales. However, alternative financing may not be adequate to meet our funding needs if adverse conditions arise. As a result, our business activities, financial condition and results of operations may be adversely affected.

(5) Our use of derivatives to manage risk and reduce price fluctuations in our investment portfolio may adversely affect our financial condition and results of operations

We utilize derivative instruments to reduce investment portfolio price fluctuations, to manage interest rate and foreign exchange rate risk, and as part of our trading activities. However, we may not be able to successfully manage our risks through the use of derivatives. Counterparties may fail to honor the terms of their derivatives contracts with us. Alternatively, our ability to enter into derivative transactions may be adversely affected if our credit ratings are downgraded. We may also suffer losses from trading activities. As a result, our financial condition and results of operations could be adversely affected. For a discussion of derivative financial instruments and hedging, see Note 27 in Item 18. Financial Statements.

3. Risks related to our business overall

(1) We face various operational risks

Our various businesses entail many types of operational risks. Operational risk is defined as the risk of loss resulting from inadequacies in, or failures of, internal processes, people and systems, or from external events. Examples of operational risk include inappropriate sales practices, the divulging of confidential information, inadequate internal communication of necessary information, misconduct of officers or employees, errors in the settlement of accounts, erroneous stock orders, computer system security failures and conflicts with employees concerning labor and workplace management.

Our management attempts to control operational risk and maintain it at a level that we believe is appropriate. Notwithstanding our control measures, operational risk is part of the business environment in which

Table of Contents

we operate, and we may incur losses at any time due to this risk. Even if we do not incur direct pecuniary loss, our reputation may be adversely affected.

Our main operational risks are as follows.

(i) A failure to comply with regulations to which our businesses are subject could result in sanctions or penalties, harm our reputation and adversely affect our business activities, financial condition and results of operations

Our business and employees in Japan are subject to laws, as well as regulatory oversight of government authorities who implement those laws, relating to the various fields in which we operate. This includes laws and regulations applicable to financial institutions such as the Moneylending Business Law, the Installment Selling Control Law, the Insurance Business Law, the Banking Law, the Trust Business Law, the Real Estate Trading Business Law and the Building Standards Law, as well as general laws applicable to our business activities such as the Company Law, the Financial Instruments and Exchange Law, the Antimonopoly Act and the Personal Information Protection Act.

Our businesses outside of Japan are also subject to the laws and regulations of the jurisdictions in which they operate and are subject to oversight by the regulatory authorities of those jurisdictions. For example, in addition to being subject to U.S. securities laws, we are also prohibited or otherwise restricted by U.S. law from entering into any transactions with countries listed as state sponsors of terrorism. Our compliance and legal risk management structures are designed to prevent violations of such laws and regulations, but they may not be effective in preventing all future violations. We engage in a wide range of businesses and may expand into new businesses through our acquisition activities. We implement various internal control measures for our businesses; however, with the expansion of our operations, these controls may not function adequately. In such cases, we may be subject to sanctions or penalties, and our reputation may be adversely affected. Future violations of laws and regulations could result in regulatory action and harm our reputation, and our business activities, financial condition and results of operations could be adversely affected. Even if there are no violations of laws, if we are investigated by government authorities and the investigation becomes publicly known, our reputation may be harmed and our business activities may be adversely affected.

(ii) Failures in our computer and other information systems could hinder our operations and damage our reputation and relationships with customers

We utilize computer systems and other information systems for financial transactions, personal information management, business monitoring and processing and as part of our business decision-making and risk management activities. We also offer data center services for our customers. System shutdowns, malfunctions or failures, the mishandling of data or fraudulent acts by employees or third parties, or infection by a computer virus could have adverse effects on our operations, for example by causing delay in the receipt and payment of funds, the leak or destruction of confidential information or personal information, the generation of errors in information used for business decision-making and risk management, and the suspension of other services provided to our customers. In such event, our liquidity could be adversely affected. Alternatively, the liquidity of customers who rely on us for financing or payment or who utilize our data center services could be adversely affected, and our relationships with such customers could also be adversely affected. The occurrence of any of these or any other disruptions could result in our being sued or subject to administrative penalty, or our reputation or credibility could be adversely affected.

Our information system equipment could suffer damage from a large-scale natural disaster or from terrorism. Since information systems serve an increasingly important role in business activities, there is an increasing risk of stoppage of the network or information systems due to disaster or terrorism. If networks or information systems fail, we could experience interruption of business activity, delay in payment or sales, or substantial costs for recovery of functionality.

Table of Contents

(iii) We may not be able to hire or retain human resources to achieve our strategic goals

Our business requires a considerable investment in human resources and requires the retention of such resources in order to successfully compete in markets in Japan and overseas. Much of our business requires employment of talented individuals who have experience and knowledge in the financial field. If we cannot develop, hire or retain the necessary human resources, or if such personnel resign, we may not be able to achieve our strategic goals.

(2) The departure of senior management could adversely affect us

Our continued success relies significantly on the ability and skills of our senior management. The departure of current senior management could have an adverse effect on our business activities, financial condition and results of operations.

(3) Changes in the legal or financial stability of, or cultural differences with, any counterparties with whom we enter into joint ventures or alliances could adversely affect our results of operations

We operate joint ventures and enter into alliances with foreign and domestic third parties, and the success of these operations is often dependent upon the financial and legal stability of these third parties or counterparties. If one of the counterparties with whom we operate a joint venture or have a business alliance suffers a decline in its financial condition for any reason, or is subject to instability because of a change of the laws governing its operations after we have invested in the joint venture or the business alliance and begun operations, we may not be able to successfully operate the joint venture or alliance, may be required to pay in additional capital, or may be required to close the operations altogether. Likewise, significant differences in corporate culture between us and these partners may come to light, and may result in significant changes to the assumptions that we made when we decided to begin the operations. If our alliance counterparties are unable to perform as expected, or if any unexpected variations from the assumptions we made on entering into alliances occur, then we may not be able to continue those alliances successfully. Our inability to successfully operate joint ventures or alliances may adversely affect our reputation and results of operations.

(4) If our independent registered public accounting firm finds that our internal controls over financial reporting are insufficient, investors may lose confidence in the reliability of our financial statements, adversely affecting our share price, financial condition and reputation

The U.S. Securities and Exchange Commission (the "SEC"), as directed by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules requiring each SEC-registered foreign private issuer to include in its Annual Report on Form 20-F a report containing an assessment by management of the effectiveness of the company's internal control over financial reporting. In addition, the company's independent registered public accounting firm must provide an attestation report on the effectiveness of the company's internal controls over financial reporting. These requirements are reflected in our Annual Reports filed on Form 20-F for the fiscal years ended March 31, 2007 and thereafter.

Similarly, the Financial Instruments and Exchange Act was enacted in June 2006 in Japan. Article 24-4-4 thereof requires that a listed company shall submit its internal control report with an audit certificate issued by an independent registered public accounting firm together with its annual securities report. These requirements are applicable to annual securities reports issued for the fiscal year ended March 31, 2009. Pursuant to the provisions of the Cabinet Office Ordinance on the System for Ensuring Appropriateness of Statements on Finance and Accounting and Other Information (2007, No. 62) (the "Cabinet Office Ordinance"), our internal control reports required under the Financial Instruments and

Edgar Filing: ORIX CORP - Form 20-F

Exchange Act are prepared in conformity with the requirements under U.S. accounting standards for the terms, form and preparation method of internal control reports and by including additional information regarding significant differences between the reports prepared in accordance with Japanese accounting standards.

Table of Contents

Although we have established and assessed our internal controls over financial reporting in a manner intended to ensure compliance with the requirements of various laws and regulations, in future periods our independent registered public accounting firm may identify material weaknesses in our internal controls over financial reporting and may issue a report that our internal controls over financial reporting are ineffective. These possible outcomes could have a negative impact on our share price, reputation, business activities, financial condition or results of operations due to a loss of investor confidence in the reliability of our financial statements.

(5) Our risk management may not be effective

We continuously seek to improve our risk management function. However, due to the rapid expansion of our business or significant changes in the business environment, our risk management may not be effective in some cases. We operate in a wide variety of business and geographic areas and if we are unable to effectively manage new or existing risks, our financial condition and results of operations could be adversely affected.

4. Risks related to specific businesses

(1) Our real estate-related operations expose us to various risks

The main areas of our real estate-related operations are real estate-related loans and real estate business. Real estate-related loans are comprised of loans to domestic real estate companies or construction companies, nonrecourse loans for which cash flow from real estate is the main source of repayment, and underwriting specified bonds that are issued by special purpose entities and secured by real estate. Our real estate business comprises the development and lease of office buildings, rental housing, commercial facilities and logistics warehouses; the construction and sale of condominiums; the operation of hotels, golf courses and training facilities; the development and operation of senior housing; integrated facilities management and related services; and asset management services for real estate investment trusts (REITs).

Due to the global financial crisis, the real estate markets in Japan and overseas have declined significantly, resulting in a dramatic deterioration of the funding environment for real estate purchase and development. Accordingly, the business conditions for our borrowers in the real estate industry, including real estate companies as well as construction companies, have deteriorated significantly, and the value of the real estate collateral supporting the loans that we have made is decreasing. These trends have led to increases in our provisions for doubtful receivables and probable loan losses as well as in our credit costs. See *Provision for doubtful receivables and probable loan losses* of Item 5 for further details. In addition, in our real estate business, profit on sales of lease properties is decreasing, and we have incurred valuation losses on property for sale in our condominium business. If the real estate market continues to deteriorate in the future, we may write down further the value of our properties (including real estate projects in which we have an interest), reschedule due dates of particular loans, purchase the senior portion of debt to preserve subordinated debt held by us, or make other additional investments to protect the viability of a project. Despite any additional investments, loans or other efforts that we make to maintain the viability of our properties and development projects, those efforts may fail and our investments may be lost. Any losses that we suffer due to additional write-downs of property values, losses on additional investments, or losses related to borrowers whose debts we have previously rescheduled or modified may be significant, and could have an adverse effect on our financial condition and results of operations.

Changes of initial real estate development project plans may be required as a result of discussions with neighboring residents about the impact of such plans on the neighborhood, even though all the governmental approvals and licenses required for such projects have been previously obtained. Any such change in our plans may also result in an increased likelihood that sales will become difficult due to lowered credibility of the real estate market, the resulting shifts in consumer's company choice, or changes in results of operations and financial conditions of, or

Edgar Filing: ORIX CORP - Form 20-F

misconduct of the counterparties to, joint ventures. These factors could adversely affect our results of operations from our real estate business. Furthermore, since the results of operations of real estate-related companies to which we make loans may be adversely affected in the same way, debt collection from such borrowers. The liquidity of properties held by us as collateral may decline, which could also make debt collection difficult.

Table of Contents

When we commence a building construction project, we try to obtain indemnity against any breach of contract or defect of property from the contractor. Also, when we purchase a property, we try to obtain indemnity from the seller to cover losses and expenses caused by any defects of geological condition, building structure or material in relation to such property. If construction work is postponed or cancelled due to the contractor's circumstances, or if there is any defect in a building or facility sold or leased by us, and indemnity is not provided by the contractor or seller or if the indemnity provided is insufficient due to a deterioration of the indemnitor's financial condition, we may be required to indemnify the tenant or purchaser and thereby incur losses. Even if we do not have to indemnify the tenant or purchaser, we may incur additional costs, including additional construction costs, to complete or operate property causing our expenditures to exceed budget. In addition, even if we do not incur financial loss, property defects may adversely affect our reputation due to our involvement as the seller, owner or original developer.

We may also have latent liabilities for soil contamination cleanup costs related to certain of our real estate acquisitions. Before the Soil Contamination Measures Law came into effect in February 2003, we did not, at the time of acquisition, investigate land (including land provided as loan collateral) that had been used as a factory site or operating facility in which hazardous materials were used or that otherwise could cause health problems due to soil contamination. If the land is polluted and it is necessary to take countermeasures under the Soil Contamination Measures Law, this could adversely affect the value of the land or the amounts conversable on foreclosure from land held as collateral. Although we have conducted investigations at the time of acquisition with respect to land acquired after the Soil Contamination Measures Law came into effect, our investigation may have failed to identify risk and a subsequent determination that such land is polluted may have the same adverse consequences.

If the Building Standards Law, the City Planning Law or any other property-related laws and regulations are amended, we may suffer additional responsibility and our expenses may increase.

We generally carry comprehensive property and casualty insurance covering our real estate investments acquired as part of our real estate business, with insured limits that we believe are adequate and appropriate in light of anticipated losses. However, certain types of losses, such as losses caused by wars, acts of terrorism, willful acts or gross negligence, are uninsurable. In addition, we do not usually carry insurance for damages caused by natural disasters such as earthquakes or typhoons because insurance coverage for such damages is limited and the insurance premiums are relatively expensive.

In the event that our real estate investments suffer uninsured losses, our investment balances in and revenues from such investments could be adversely affected. In addition, in the event that a building or real estate development project in which we have invested is destroyed or otherwise rendered unusable, we would likely remain liable for indebtedness and other financial obligations relating to the relevant property.

(2) We may be exposed to increased risks as we expand or reduce the range of our products and services, or acquire companies or assets

As we have proactively expanded the range of our product sales and services beyond our traditional businesses, we are exposed to new and increasingly complex risks, some or all of which we may be unable to control, and we may incur substantial losses. In addition, our efforts to offer new services and products may not achieve the expected results if business opportunities do not increase as expected or if competitive pressures undermine the profitability of the available opportunities. Restructuring of, or withdrawal from, businesses in which we engage could harm our reputation and adversely affect our financial condition and results of operations.

We cannot guarantee that the price we pay for acquisitions will be fair and appropriate. If the results of operations of acquired companies are lower than what we expected at the times we made the acquisitions, our acquisitions could result in large future write-downs of goodwill and

other assets.

Table of Contents

In recent years, the contribution from consolidated subsidiaries and equity method affiliates to our consolidated results of operations has increased and has been an important component of our income. There can be no assurance that this contribution will be maintained. While we will continue to review and selectively pursue investment opportunities, there can be no assurance that we will continue to identify attractive opportunities, or that investments will be as profitable as we originally expect. Our subsidiaries and affiliates have a wide range of business operations, including operations that are very different from financial services, our core business. Failure to manage investee companies effectively could result in financial losses as well as losses of future business opportunities. In addition, we may not be able to sell or otherwise dispose of investee at the time or price we initially expected. We may also need to invest additional capital in some investee companies if their financial condition deteriorates. We may lose key personnel in investee companies if such personnel are not satisfied with our management.

In the event that any subsidiary or affiliate to which we transfer our personnel to serve as directors or officers is implicated in a problem of significant public concern, our reputation may be adversely affected irrespective of whether such persons perform their obligations appropriately.

(3) We may suffer losses if we are unable to remarket leased equipment returned to us

We lease equipment to customers under direct financing leases and operating leases. We estimate the residual value at the time of contract, and we may suffer losses if we are unable to sell or re-lease the equipment at the end of the leasing period for the residual value that we estimated at the beginning of the lease. This risk is particularly significant for operating leases. Our estimates of the residual value of equipment are based on current market values of used equipment and assumptions about when and to what extent the equipment will become obsolete; however, we may need to recognize additional valuation losses if our estimate differs from actual trends in equipment valuation and the secondhand market.

(4) Leasing equipment distributors inappropriate sales activity may increase the number of customer claims against us and adversely affect our reputation and business performance

Our leasing business and reputation could be affected by the behavior of individual distributors of equipment and inappropriate industry business practices. In 2005, inappropriate sales activity was a serious problem in the telephone equipment leasing industry, and we received an increased number of customer claims and inquiries. In response to the industry trend, the Ministry of Economy, Trade and Industry amended the Act on Specified Commercial Transactions in 2005 and has provided guidance to firms in the related industries on compliance measures. If the same problem recurs, leasing contracts may be cancelled before maturity, adversely affecting our business performance, and our reputation may suffer. The measures that we have taken or may take in the future to resolve and address these problems may cause leasing business costs to increase and leasing transactions to decline.

(5) Increased competition or regulatory changes in entertainment-related industries could weaken the financial condition of companies to which we provide credit, which may adversely affect their ability to repay us

We provide credit to companies in entertainment-related industries, such as pachinko halls operators, primarily through direct financing leases and installment loans. Even though we have accumulated credit know-how from past experience and obtain collateral that we consider adequate after thorough examination of the risks presented by these industries, our business activities, financial condition and results of operations could be adversely affected by an intensification of competition or substantial changes in the regulation of these industries, which may adversely affect their financial condition and credit of our customers in these industries.

Table of Contents***(6) Changes in the Moneylending Business Law may adversely affect our financial condition and results of operations***

We provide consumer loans through ORIX Credit Corporation. The consumer lending industry has been shrinking because of the uncertain business environment that surrounds it due to the increased risk of claims for refunds of gray zone interest (that is the interest on loans in excess of the maximum rate prescribed by the Interest Rate Restriction Law, which is between 15% to 20% per annum, and the maximum rate of 29.2% permitted under the Capital Subscription Law) as a result of the strengthening of various related legal restrictions. Regulatory changes include a reduction in the maximum chargeable interest rates implemented by revisions to the Moneylending Business Law as well as the expansion of self-regulation by moneylending companies, include the introduction of aggregate borrowing limits, both of which will become effective by June 2010. The aggregate borrowing limits for consumer lending will in principle prohibit making a new loan to a borrower if the amount, when aggregated with the borrower's other outstanding debts, would exceed one-third of the borrower's annual income. Since ORIX Credit Corporation has generally not charged gray zone interest on its loans, the reduction of the maximum chargeable interest rate under the Moneylending Law does not directly affect it. However, the aggregate borrowing limits may result in a decline in our outstanding loan balance as we reduce loans to consumers to refrain from lending beyond their aggregate borrowing limits. Additionally, ORIX Credit's credit costs may increase if the decreased borrowing limits constrict cash flows of our borrowers, thereby constraining their ability to pay their debts as they come due. Although we announced plans to transform ORIX Credit Corporation into a joint venture with Sumitomo Mitsui Banking Corporation to better compete in light of industry changes, the trend of the consumer loan industry as a whole may adversely affect our financial condition or results of operations.

(7) Accidents in our environment-related business could damage our reputation and cause us to incur financial losses

We began operations of an industrial waste disposal facility through ORIX Environmental Resources Management Corporation in June 2006 as a Private Finance Initiative, or PFI, under contract with Saitama prefecture in Yorii-machi, Saitama. In addition, we acquired Kanematsu Environmental Corporation (now Funabashi Environmental Corporation) in March 2008 to develop an industrial waste disposal business mainly in Funabashi, Chiba. In order to minimize the risk of emitting environmental pollutants, ORIX Environmental Resources Management Corporation utilizes advanced waste disposal techniques. ORIX Environmental Resources Management Corporation has contracted with the waste disposal specialist firm that constructed the facility to serve as operator of the facility. The Funabashi Environmental Corporation has established a facility that minimizes the risk of emitting environmental pollutants. Although we try to reduce the risks related to operating our industrial waste disposal business, environmental pollution could occur due to an operational error or defect in the disposal facility. To protect against a variety of such accident risks, ORIX Environmental Resources Management Corporation has ensured that the relevant operator bears responsibility for the operation and maintenance of the facility under its operating agreement and responsibility for defects in the facility under the design and construction contracts.

However, in the event that the financial condition of the operator has deteriorated to the point that it cannot perform its contractual obligations or indemnify us for losses, we will be required to bear such losses. Furthermore, we will be responsible for any accident occurring by reason of any event other than those for which the operator is responsible by contract. If such an accident occurs, we will be required to incur loss. Even if we do not incur any direct financial loss, our reputation could be adversely affected.

(8) Our medical business and nursing care business expose us to various risks

We operate the Kochi Health Sciences Center, which is a PFI business of Kochi prefecture and Kochi-city, through our subsidiary Kochi Medical PFI Corporation. The subsidiary is not engaged in medical services directly; however, since it contracts out for sterilization of medical materials, if an accident occurs, the subsidiary

Table of Contents

could be liable for the contribution of the contracted service to the accident. Even if there is no pecuniary liability, our reputation could be adversely affected.

We rent medical instruments to customers. We contract for the inspection of such medical instruments with professionals designated by the manufacturers. The manufacturers are responsible for any injuries or damages caused by defects in such medical instruments. However, as a lessor, we also have potential obligations for such defects. Further, even if there is no pecuniary liability, our reputation could be adversely affected by product defects.

We provide housing and elderly care services to senior citizens, including through the operation of at-home nursing care and nursing home facilities. If a nursing service accident occurs, we could be liable for damages, and our reputation could be adversely affected. In addition, if the nursing care insurance system is modified to reduce public financial support and the economic burden on the user is thereby increased, the nursing market could shrink and our results of operations could be adversely affected.

(9) If our advisory services and consulting services that we offer to our customers are insufficient, we may be obligated to compensate our customers

We provide M&A and financial advisory and consulting services to our customers, including through our subsidiaries ORIX M&A Solutions Corporation and Houlihan Lokey Howard & Zuckin. If such services are insufficient and our customers suffer losses as a consequence, we may be obligated to compensate our customers for those losses.

(10) Our life insurance subsidiary is subject to risks that are specific to its business

We are exposed to the risk of unpredictable increases in insurance payments for deaths and hospital benefits, in relation to the business of ORIX Life Insurance Corporation, or ORIX Life Insurance. It may incur valuation losses or losses on sales if the value of securities or real estate that it purchases for asset management purposes decreases. ORIX Life Insurance is subject to strict regulatory oversight, which includes the maintenance of certain specified capital requirements. If ORIX Life Insurance suffers valuation or other losses that affect its ability to maintain its regulatory capital requirements, we may be required to provide financial support through capital contributions. In addition, if ORIX Life Insurance fails to conduct asset liability management, or ALM, to appropriately manage risks and returns on investment assets and underwriting risks on insurance policy benefits, its financial condition and results of operations may suffer.

ORIX Life Insurance is required to make contributions to the Life Insurance Policyholders Protection Corporation of Japan, or the PPC. The PPC was established in 1998 to provide financial support to insolvent life insurance companies. All life insurers in Japan, including ORIX Life Insurance, are members of the PPC and are required to make contributions to the PPC based on their respective share of insurance premiums and policy reserves within the industry. Because a number of life insurers have become insolvent since 1998, the PPC's financial resources have been depleted by financial support provided to those companies. If there are further bankruptcies of life insurers, other members of the PPC, including ORIX Life Insurance, may be required to make additional contributions to the PPC. In such an event, our financial condition and results of operations may be adversely affected.

(11) If the reputation of our professional baseball team declines, our share price, business activities, financial condition and results of operations could be adversely affected

We own and manage a professional baseball team in Japan, the ORIX Buffaloes. Management of a professional baseball team in Japan, due to its public nature, requires us to consider the various social effects that it may have and the reputation of the team. If the reputation of the baseball team declines, our business activities, financial condition, results of operations and our share price could be adversely affected as a consequence.

Table of Contents

(12) Ship brokerage exposes us to market and credit risks

We operate a ship brokerage business in which we simultaneously place orders for new ships with shipbuilders and enter into purchase agreements with our customers who purchase the ships for use upon completion. As the process of shipbuilding takes several years from the placement of an order to delivery of the ship, if a purchasing customer defaults under its purchase agreement due to a decline in market conditions or deterioration of its cash flow, we are not extinguished from our obligation to purchase the ship upon completion. Also, if a shipbuilder becomes unable to complete and deliver a ship for financing or other reasons, we will be obliged to repay the deposit received from the customer regardless of whether or not the advance was repaid by the shipbuilder. Any of these above events may adversely affect our results of operation.

5. Risks related to holding or trading our Shares and ADRs

(1) Dispositions of Shares may adversely affect market prices for the Shares

A few of our shareholders hold more than five percent of the total number of outstanding Shares. These shareholders may, for strategic or investment reasons, decide to reduce their shareholdings in ORIX. Dispositions of Shares, particularly dispositions of large numbers of Shares by major shareholders, may adversely affect market prices for the Shares.

For information on major shareholders, see Item 7. Major Shareholders and Related Party Transactions. Due to changes in the global economy or political conditions, investors outside Japan may reduce their investments in Japanese stocks. A large portion of our Shares are held by investors outside Japan, and a reduction in Japanese stock investment by such investors may adversely affect market prices of our Shares.

(2) Change of listed sections and delisting of Shares could adversely affect the liquidity and price of the Shares

Each of the Tokyo Stock Exchange, Inc. and the Osaka Securities Exchange Co., Ltd, on which our Shares are listed in Japan, has certain standards for maintaining the listing of shares. If we fail to meet the listing standards, the listed section of the Shares may change from the more prestigious section 1 to section 2, or the Share may be delisted. In general, the liquidity of shares on section 2 is lower and share price volatility is higher than on section 1. If the Shares are moved to section 2, or are delisted, the liquidity of and prices for the Shares could be adversely affected.

(3) Rights of shareholders under Japanese law may be different from those under the laws of other jurisdictions

Our Articles of Incorporation, the regulations of our board of directors and the Company Law govern our corporate affairs. Legal principles relating to such matters as the validity of corporate procedures, directors and officers fiduciary duties and shareholders rights are different from those that would apply if we were incorporated elsewhere. Shareholders rights under Japanese law are different in some respects from shareholders rights under the laws of jurisdictions within the United States and other countries. You may have more difficulty in asserting your rights as a shareholder than you would as a shareholder of a corporation organized in a jurisdiction outside Japan. For a detailed discussion of

Edgar Filing: ORIX CORP - Form 20-F

the relevant provisions of the Company Law and our Articles of Incorporation, see Item 10. Additional Information Memorandum and Articles of Incorporation.

(4) It may not be possible for investors to effect service of process within the United States upon ORIX or ORIX's directors or executive officers, or to enforce against ORIX or those persons judgments obtained in US courts predicated upon the civil liability provisions of the federal securities laws of the United States

ORIX is a joint stock company incorporated in Japan. Most or all of ORIX's directors and executive officers are residents of countries other than the United States. Although some of ORIX's subsidiaries have substantial

Table of Contents

assets in the United States, substantially all of ORIX's assets and the assets of ORIX's directors and executive officers are located outside the United States. As a result, it may not be possible for investors to effect service of process within the United States upon ORIX or ORIX's directors and executive officers or to enforce against ORIX or those persons, in US courts, judgments of US courts predicated upon the civil liability provisions of US securities laws. ORIX has been advised by its Japanese counsel that there is doubt, in original actions or in actions to enforce judgments of US courts, as to the enforceability in Japan of civil liabilities based solely on US securities laws. A Japanese court may refuse to allow an original action based on US securities laws.

The United States and Japan do not currently have a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil or commercial matters. Therefore, if you obtain a civil judgment by a US court, you will not necessarily be able to enforce such judgment directly in Japan.

(5) We expect to be a passive foreign investment company

We expect to be a passive foreign investment company under the US Internal Revenue Code because of the composition of our assets and the nature of our income. US investors in our Shares or ADSs are therefore subject to special rules of taxation in respect of certain dividends or gain on such Shares or ADSs, including recharacterization of gains realized on the disposition of, and certain dividends received on, the Shares or ADSs as ordinary income earned pro rata over a US investor's holding period for such Shares or ADSs, taxed at the maximum rate applicable during the years in which such income is treated as earned, and subject to interest charges for a deemed deferral benefit. See Item 10. Additional Information Taxation United States Taxation. Investors are urged to consult their own tax advisors regarding all aspects of the income tax consequences of investing in our Shares or ADSs.

(6) If you hold fewer than 10 Shares, you will not have all the rights of shareholders with 10 or more Shares

One unit of the Shares is comprised of 10 Shares. Each unit of the Shares has one vote. A holder who owns Shares other than in multiples of 10, will own less than a whole unit (i.e., for the portion constituting fewer than 10 Shares.) The Company Law imposes significant restrictions on the rights of holders of shares constituting less than a whole unit, which include restrictions on the right to vote. Under the unit share system, a holder of Shares constituting less than a unit has the right to require ORIX to purchase its Shares and the right to require ORIX to sell it additional Shares to create a whole unit of 10 Shares. However, a holder of ADRs is not permitted to withdraw underlying Shares representing less than one unit, which is equivalent to 20 ADSs, and, as a practical matter, is unable to require ORIX to purchase those underlying Shares. The unit share system, however, does not affect the transferability of ADSs, which may be transferred in lots of any size.

(7) Foreign exchange fluctuations may affect the value of our securities and dividends

Market prices for our ADSs may decline if the value of the yen declines against the dollar. In addition, the dollar amount of cash dividends or other cash payments made to holders of ADSs will decline if the value of the yen declines against the dollar.

(8) A holder of ADRs has fewer rights than a shareholder and must act through the depositary to exercise those rights

Edgar Filing: ORIX CORP - Form 20-F

The rights of shareholders under Japanese law to take various actions, including voting their shares, receiving dividends and distributions, bringing derivative actions, examining a company's accounting books and records and exercising dissenters' rights are available only to holders of record on a company's register of shareholders. The Shares represented by our ADSs are registered in the name of a nominee of the depositary, through its custodian agent. Only the depositary is able to exercise those rights in connection with the deposited Shares. The depositary will make efforts to vote the Shares represented by our ADSs as instructed by the holders of the ADRs representing such ADSs and will pay to those holders the dividends and distributions collected from

Table of Contents

us. However, a holder of ADRs will not be able to directly bring a derivative action, examine our accounting books and exercise dissenters' rights through the depository unless the depository specifically undertakes to exercise those rights and is indemnified to its satisfaction by the holder of ADRs for doing so.

Item 4. Information on the Company

GENERAL

ORIX is a joint stock corporation (kabushiki kaisha) formed under Japanese law. Our principal place of business is at Mita NN Building, 4-1-23 Shiba, Minato-ku, Tokyo 108-0014, Japan, and our phone number is: +81 3 5419 5000. Our general contact URL is https://ssl.orix-form.jp/ir/inquiry_e/ and our URL is: www.orix.co.jp/grp/index_e.htm. The information on our website is not incorporated by reference into this annual report. ORIX USA Corporation, or ORIX USA, is ORIX's agent in the United States, and its principal place of business is at 1717 Main Street, Suite 900, Dallas, Texas 75201, USA.

CORPORATE HISTORY

ORIX was established on April 17, 1964 in Osaka, Japan as Orient Leasing Co., Ltd. by three trading companies and five banks that included Nichimen Corporation, Nissho Corporation and Iwai Corporation (presently Sojitz Corporation), the Sanwa Bank and Toyo Trust & Banking (presently Mitsubishi UFJ Financial Group, Inc.), the Industrial Bank of Japan and Nippon Kangyo Bank (presently Mizuho Financial Group, Inc.), and the Bank of Kobe (presently Sumitomo Mitsui Financial Group, Inc.). While we maintain business relationships with these companies, they now hold only a limited number of our Shares in the aggregate.

Our initial development occurred during the period of sustained economic growth in Japan during the 1960s and the early 1970s. During this time, strong capital spending by the corporate sector fueled demand for equipment, and led to the first wave of newly established leasing companies in Japan. Under the leadership of Tsuneo Inui, who served as President from 1967 to 1980, we capitalized on the growing demand in this period by expanding our portfolio of leasing assets.

It was also during this time that our marketing strategy shifted from a focus on using the established networks of the trading companies and other initial shareholders to one that concentrated on independent marketing as the number of our branches expanded. In April 1970, we listed our Shares on the second section of the Osaka Securities Exchange, which at the time was the fastest listing by a new company in post-World War II Japan. Since February 1973, the Shares have been listed on the first sections of the Tokyo Stock Exchange and the Osaka Securities Exchange. In September 1998, ORIX listed on the New York Stock Exchange, or NYSE, with the ticker symbol IX. ORIX was listed on the Nagoya Stock Exchange from February 1973 to October 2004.

The 1970s saw the gradual maturing of the Japanese leasing industry, and the Japanese economy was adversely affected by the two oil shocks of 1973 and 1979, resulting in reduced growth in capital spending and increased volatility in foreign exchange rates. Despite these difficulties, we continued to grow rapidly by expanding and diversifying our range of products and services to include ship and aircraft leasing along with real estate collateralized loans. Furthermore, in 1972, we established Orient Leasing Interior (now ORIX Alpha), which concentrated on leasing furnishings and fixtures to retailers, hotels, restaurants and other users. We subsequently set up a number of specialized leasing companies to tap promising new markets, including ORIX Auto Leasing Corporation (now ORIX Auto) in 1973, and Orient Instrument Rentals (now ORIX

Edgar Filing: ORIX CORP - Form 20-F

Rentec) in 1976. We established Family Consumer Credit (now ORIX Credit) in 1979, with the aim of entering the consumer finance sector.

During the 1970s, we expanded overseas, establishing our first overseas office in Hong Kong in 1971, followed by Singapore in 1972, Malaysia in 1973, the United States in 1974, Indonesia in 1975, South Korea in 1975, the Philippines in 1977 and Thailand in 1978.

Table of Contents

Yoshihiko Miyauchi became President and CEO in 1980. During the 1980s, we continued to expand the range of our products and services, and placed increased emphasis on strengthening synergies among our group companies by emphasizing knowledge sharing and cooperation to make optimal use of corporate resources. This included a focus on cross-selling a variety of products and services to our customers, a focus that continues to this day.

During the 1980s, we began using mergers and acquisitions to expand operations, acquiring ORIX Securities Corporation (formerly Akane Securities K.K.), or ORIX Securities, and ORIX Estate Corporation (formerly OSAKA Ichioka Corporation), which is involved in real estate and leisure facility management, in order to expand our array of financial products and services.

In 1988, we acquired one of the twelve professional baseball teams in Japan, the ORIX Buffaloes (formerly the Hankyu Braves), which has helped raise our name recognition and promote our corporate image. In 1989, we introduced a corporate identity program and changed our name to ORIX Corporation from Orient Leasing Co., Ltd. to reflect our increasingly international profile and diversification into financial services other than leasing.

In the 1990s, the Japanese economy experienced a protracted period of industrial stagnation and, in the latter half of the decade, instability within the financial sector. Notwithstanding these adverse conditions, we continued to further develop and expand our financial activities and products and we began to focus our attention on retail operations. For example, in 1991 we entered the life insurance business by establishing ORIX Omaha Life Insurance (now ORIX Life Insurance), and, from 1997, we began to offer ORIX Direct Life Insurance, a new life insurance product offered directly to individual customers. In April 1998, we acquired Yamaichi Trust & Bank, Ltd. (now ORIX Trust and Banking), which has since concentrated primarily on housing loans. Furthermore, with the deregulation of brokerage commissions in May 1999, ORIX Securities began ORIX Online, an Internet-based brokerage aimed at individual investors. We also entered the loan servicing business overseas in 1997 through a joint venture with Bank One Corporation of the United States (this former joint venture is presently a subsidiary of ORIX USA).

In 1999, in order to increase the efficiency of our domestic real estate-related operations, we established our Real Estate Finance Headquarters, which is primarily engaged in real estate-related finance, and ORIX Real Estate Corporation, or ORIX Real Estate, which focuses on the development, operation and management of real estate in Japan. Subsequently, we expanded our real estate-related activities to include loan servicing, real estate investment trusts, CMBS, integrated facilities management and asset management in Japan.

We established our Investment Banking Headquarters in 1999, and have since been attempting to expand our investment banking activities, which include principal investments, corporate rehabilitation and consulting.

Since 2000, we have actively expanded our automobile-related operations by acquiring companies and assets. For example, in addition to our existing companies, ORIX Auto Leasing, ORIX Rent-A-Car and ORIX Rent-A-Car Hokkaido, we added Senko Lease and IFCO Ltd. in 2001, Nittetsu Leasing Auto Co., Ltd. in 2002 and JAPAREN in 2003. We combined these seven companies into ORIX Auto in January 2005.

In February 2005, in order to expand investments based mainly in the Asia region, we transferred control of certain operations from our Investment Banking Headquarters and Real Estate Finance Headquarters to the newly established Alternative Investment & Development Headquarters located in Japan.

Edgar Filing: ORIX CORP - Form 20-F

In December 2005, as a part of our business restructuring in the United States, we sold part of our loan servicing business, including primary and master servicing departments and entrusted servicing assets. In January 2006, we entered the investment banking field in the U.S. with the acquisition of Houlihan Lokey Howard and Zukin (HLHZ). HLHZ established operations in Hong Kong and Japan in 2007, and is expanding its financial advisory services across a broad range of operations, including advisory operations and valuation support for cross-border M&A.

Table of Contents

In June 2007, in order to expand our real estate-related business in Asia and the Middle East where medium- to long-term growth is expected, we established an International Real Estate Business Headquarters located in Japan, which was integrated into ORIX Real Estate Corporation in June 2008 to take advantage of opportunities both domestically and globally.

In January 2008, we integrated our Real Estate Finance Headquarters into our Investment Banking Headquarters.

In June 2008, to promote further diversification within ORIX's operations throughout Asia, Oceania, the Middle East and Europe, we consolidated our International Business Headquarters and our Alternative Investment and Development Headquarters to create the International Administrative Headquarters, which we subsequently converted into our Global Business Headquarters in January 2009.

In January 2009, we integrated our Sales Headquarters into our Domestic Sales Administrative Headquarters. The new division consists of the Eastern Japan unit, the Western Japan unit and specialist business units.

In June 2009, we consolidated our Corporate Planning Office, Treasury Department, Accounting Department and Investor Relations in the Office of the President to create the Corporate Planning and Financial Control Headquarters.

Target Performance Indicators, Medium- and Long-Term Corporate Management Strategies and Challenges to be Addressed

Our current business plan is focused on strengthening the corporate structure and operational realignment. Our objective is to improve our profitability and operational stability while simultaneously preserving liquidity and asset stability in response to the drastic changes in the economic environment and the effects of the credit crunch.

In strengthening the corporate structure, ORIX Group aims for improved financial stability by reducing overall levels of interest-bearing debt. ORIX Group aims to maintain sufficient funding and will maintain a high long-term debt ratio by controlling levels of commercial paper, or CP, in response to dysfunction in the capital markets.

In managing operational realignment, capital will be appropriately allocated through consideration of whether our various operations are asset-efficient, have sufficient market size and growth potential, and are able to control risk. At the same time, we seek to manage our portfolio by limiting risk to within the limits of shareholders' equity. Furthermore, along with reducing investment in market-related products, each business unit involved in real estate related business will further increase its real estate-related expertise and seek to improve risk diversification and profitability. The Corporate Financial Services segment will reduce traditional corporate loans, and promote the provision of value-added services capitalizing on group expertise. The trust and banking operations will continue providing mortgages, in addition to expanding the corporate finance function. Furthermore, ORIX Group has initiated group-wide cost reduction programs. Along with the strategies outlined above, ORIX Group will proactively invest in and allocate personnel to promising fields to sow the seeds for medium- and long-term growth.

Table of Contents**PROFILE OF BUSINESS BY SEGMENT**

Our reportable segments are based on FASB Statement No. 131. They are mainly identified based on the nature of services for operations in Japan and on geographic area for overseas operations. For a discussion of the basis for the breakdown of segments, see Note 31 in Item 18. Financial Statements. The following table shows a breakdown of profits by segment for the years ended March 31, 2007, 2008 and 2009.

| | Years ended March 31, | | |
|--|-----------------------|----------------|---------------|
| | 2007 | 2008 | 2009 |
| | (In millions of yen) | | |
| Corporate Financial Services | ¥ 58,820 | ¥ 35,412 | ¥ (10,451) |
| Maintenance Leasing | 39,093 | 37,235 | 25,621 |
| Real Estate | 51,285 | 83,065 | 50,508 |
| Investment Banking | 83,866 | 47,483 | (63,397) |
| Retail | 33,215 | 27,463 | 9,573 |
| Overseas Business | 68,884 | 57,862 | 20,066 |
| Total segment profits | 335,163 | 288,520 | 31,920 |
| Difference between segment total and consolidated amounts | (20,185) | (39,965) | (21,849) |
| Income before income taxes, minority interests in earnings of subsidiaries, discontinued operations and extraordinary gain | ¥ 314,978 | ¥ 248,555 | ¥ 10,071 |

Each of our segments is briefly described below.

BUSINESS SEGMENTS

As of April 1, 2008, ORIX reorganized its businesses into six segments to facilitate formulating strategy, allocating resources and determining portfolio balance at the segment level. These six business segments are: Corporate Financial Services, Maintenance Leasing, Real Estate, Investment Banking, Retail and Overseas Business.

Management believes that organizing our business into these six segments addresses the significant changes in the ORIX Group's operations and lines of business over the preceding four to five years. Each segment is organized as a large strategic unit that allows us to maximize our corporate value by identifying and building strategic advantages vis-à-vis anticipated competitors in each area and by helping the ORIX Group obtain a competitive advantage.

An overview of operations, operating environment and operating strategy for each of the six segments follows below.

Corporate Financial Services

Overview of Operation

The Corporate Financial Services segment has its origin in the leasing business developed at the time of ORIX's establishment in 1964, and even today this segment serves as the foundation for the entire ORIX Group.

Operating through a nationwide network of 81 offices, we provide capital through loans and leasing for capital investment and other needs to our core customer base of domestic small and medium enterprises, or SMEs. In addition, the Corporate Financial Services segment serves as a central point of contact for the entire ORIX Group in responding to needs of other segments, including business succession and overseas business development.

Table of Contents

This segment's framework has recently been reorganized by merging the three Regional Divisions into one Headquarters consisting of two regional units, Eastern Japan and Western Japan. Specialist business units were also established within the Headquarters to seek new opportunities, such as environmental businesses. In addition, a specialist real estate loan recovery unit was established to pursue collection upon maturity and client maintenance.

The activities in this segment are conducted primarily through the Domestic Sales Administrative Headquarters. The number of employees working in this segment is 2,900.

Operating Environment

The economic environment surrounding the core client base of SMEs in this segment has changed significantly and adversely since 2007, and has become increasingly uncertain. The effects of the financial crisis that originated in the United States have prompted domestic financial institutions to take a more cautious approach to real estate lending, which in turn has led to an increase in the number of companies with rapidly worsening cash flows, primarily in the construction and real estate sectors. In addition, the number of companies facing major job cuts and swelling inventories is increasing. With the worsening economy and a progressively stronger yen, the Japanese government has announced one of its largest economic stimulus policies ever, a package of measures designed to address the fiscal crisis that includes funding support for SMEs. However, it will be necessary to closely monitor whether these measures can improve the corporate fund-raising environment and the effect of these measures on business performance.

In an attempt to create new growth areas, the government is also announcing policies in environmental fields. For example, the government has already enacted policies to support the purchase of energy-efficient home appliances and to promote the purchase of vehicles with a smaller environmental impact. Given the increased awareness of environmental issues among both clients and society as a whole, this segment anticipates the expansion of its environmental businesses.

In the lending and leasing markets for SMEs, our primary competitors are banks and other leasing firms. While these companies are taking a more conservative approach to lending and other transactions, given worsening credit conditions among borrowers, competition continues to be stiff for business from blue-chip firms and in areas with future cash demands.

Operating Strategy

Sales personnel in the corporate financial services segment craft and deliver optimal solutions based on a deep understanding of this segment's customers, their specific needs, and their management issues, gained in the course of day-to-day transactions, and, where necessary, supported by team efforts centered around the Group's high levels of expertise.

Moving forward, the segment will promote a "back to basics" approach by providing services to a wider range of clients in an expanded range of industries other than the real estate industry. Furthermore, the segment is seeking to position itself as a financial services expert capable of enhancing the competitiveness of SME customers, our core customer category. This entails gathering customer, product, and service information throughout the Group, and responding quickly, flexibly, and in detail to customer needs.

Edgar Filing: ORIX CORP - Form 20-F

At the same time, given the increasingly uncertain environment faced by SMEs, and the heightened credit risks, the segment is also focusing on timely collections from existing transactions and improved transaction maintenance. In October 2008, the segment established a dedicated task force to monitor and manage major borrowers and real estate-related transactions, and this unit will work together with the risk management division, real estate development division, and loan servicing (asset recovery) operations to focus on ensuring timely collections from clients and improved transaction maintenance. The segment will work to ensure both profitability and financial soundness through detailed and prompt responsiveness to client needs and tight monitoring.

Table of Contents

As an offshoot of its core end-of-lease asset collections and disposal business, the ORIX Group has been involved in the environmental business for more than ten years. Since June 2006, in a PFI partnership with Saitama Prefecture, we have operated one of the country's largest private-sector waste disposal facilities capable of controlling dioxins while completely recycling waste.¹

We will continue to focus on environmental businesses, which are expected to see growing demand from customers and society as a whole, mainly through ESCO operations and waste disposal proposals.²

Maintenance Leasing

Overview of Operation

This segment consists of our automobile operations and rental operations.

The automobile operations began with automobile leasing in 1973, and expanded to automobile rental in 1985. Since 2002, the ORIX Group has also operated a car sharing business. Our automobile leasing operations started by offering to corporate clients leases that included maintenance services, and today provide a complete range of specialized vehicle management outsourcing services. The segment also offers wide range of services to address the vehicle needs of both corporate and individual clients.

We entered the rental business in 1976 with leasing of precision measuring equipment to corporate clients. Today, the rental business covers a broad range of services, including IT-related equipment rentals, technical support, calibration, and asset management.

The activities in this segment are conducted primarily through ORIX Auto and ORIX Rentec. The number of employees working in this segment is 3,280.

Operating Environment

In corporate automobile leasing operations, the operating environment has become increasingly difficult. Competition between the major leasing companies has intensified in recent years and the sudden tightening of credit and the worsening economy has suppressed demand from customers. There has also been drop in used car prices brought on by the yen's rapid appreciation since autumn 2008.

At the same time, as companies look for ways to cut costs, we expect companies using automobiles in their operations to reduce vehicle costs and improve fleet operating efficiency. Furthermore, we expect that heightened awareness of environmental issues will also stimulate demand for leasing services as companies switch to hybrid and electric vehicles, and increase their use of car sharing.

Edgar Filing: ORIX CORP - Form 20-F

We believe that the market in Japan for vehicle leases to individuals has ample room for expansion, with just over 125,000 vehicles under lease as of September 2008.

Our precision measuring equipment rental operation has comparatively high barriers to entry because of the need for significant initial investment in distribution centers and rental assets, and the difficulty of finding or training personnel with knowledge of calibration. As a result, the competitive landscape in the domestic measuring equipment rental market is relatively stable. However, the recent economic downturn and waning consumer confidence suppressed demand for rentals, particularly among the major electronics manufacturers, creating an even more difficult operating environment.

¹ Complete recycling may not be possible if materials do not meet recycling standards (such as JIS).

² ESCO (Energy Service Company) businesses provide comprehensive services pertaining to energy efficiency for factories and buildings, including technology, equipment and funding, thereby enabling customers to realize higher energy efficiency.

Table of Contents

Operating Strategy

The Maintenance Leasing segment targets growth as a stable revenue base by continuously providing high value-added services and improving the cost structure through streamlining back office operations and integrating outsourced operations, while maintaining its top market share.

In the automobile leasing business, in addition to its own sales network, the segment utilizes the networks of the Corporate Financial Services segment and Group companies to deliver proposals that combine leasing, automobile rental, and car sharing to provide optimal vehicle solutions to the widest range of clients. As of March 31, 2009, automobiles under management by the ORIX Group totaled approximately 616,000 units.

The corporate automobile leasing operation aims to expand income from peripheral services by addressing outsourcing needs related to comprehensive vehicle management, and enhance earnings by increasing per-vehicle profitability. To achieve this, we are responding to the increasingly specialized and complex needs of our clients primarily by strengthening consulting services in the areas of compliance, environmental services, and consulting services related to vehicle management, while continuing to create systems that deliver high added value for clients. We will differentiate ourselves from competitors by actively showing clients how to realize cost reduction by optimizing vehicle management.

While used car prices have dropped due to adverse economic conditions and a stronger yen, we aim to maintain profitability in the sales of our used cars. We seek to reduce costs by switching from third-party auto auctions to an in-house bidding system, and to enhance sale prices chiefly by expanding the number of participating bidders.

In leasing automobiles to individual clients, we will continue to enhance awareness of products such as My Car Lease and Car Sharing as a new approach to vehicle use that is more appropriate to the changing social environment. We will work to enhance our brand recognition, while steadily creating a foundation for new businesses.

Our rental business will continue to expand the types of equipment it handles, while working to enhance ancillary services such as asset management. In addition, we will take advantage of our large market share to obtain favorable terms from equipment manufacturers and achieve a more efficient turnover of assets, with the aim of generating stable growth. As of March 31, 2009, the rental business owned more than 600,000 units of equipment spanning about 30,000 types.

Going forward, we will aggressively expand product and service offerings in new rental markets, such as the new energy market, in addition to current product offerings in the environmental analysis and medical equipment fields. We will also work to expand our IT equipment rental operations to meet information security needs and fee business from technical support services such as the operation and management of IT equipment, and will seek continued growth in our business of selling used rental equipment and other assets. We will also seek growth overseas by using expertise accumulated in the Japanese market to support our existing presence in overseas markets, including South Korea and Singapore in addition to China.

Real Estate

Overview of Operation

The Real Estate segment began with corporate dormitory rental operations in 1986, and started developing residential condominiums in 1993. Real estate operations gained momentum in 1999 with the establishment of ORIX Real Estate Corporation. Today, the ORIX Group is involved in:

development and leasing of properties such as office buildings and logistics facilities;

residential condominium development;

operation of hotels, golf courses and training facilities;

Table of Contents

development and operation of properties, such as senior housing; and

asset management and administration of Japanese real estate investment trusts (REITs).

The activities in this segment are conducted primarily through ORIX Real Estate. The number of employees working in this segment is 3,444.

Operating Environment

The domestic real estate business is facing an increasingly challenging environment, defined by a sharp decrease in the volume of real estate transactions and a tightening of available credit, which affects investors both in Japan and overseas in the wake of the global financial crisis.

Vacancy rates in newly available office buildings have risen, a reflection of the economic environment and corporate performance. In light of this and the ongoing decline in rents, real estate companies will be called upon to demonstrate leasing and other operational capabilities that are crucial to maintaining cash flows from properties.

In the residential condominium market, a sharp rise in sales prices since the previous fiscal year generated a disconnect between consumer needs and the market. However, we are starting to see some positive signs, such as improvement in contract completion rates (as of March 2009) to the key benchmark level of 70% in the Tokyo metropolitan area. Falling sales prices due to lower construction costs, and government policies encouraging home buying including an expansion of tax deductions on housing loans introduced as part of broader economic measures, and an expanded exemption on gift taxes on money received from certain family members that is used when buying a home are expected to stimulate new demand.

Our facility operation business spans a diverse portfolio that includes hotels, golf courses, and training facilities. Although conditions are difficult due to corporate cost cutting and waning consumer confidence, we anticipate an improvement in capacity utilization due to government policies to stimulate consumer spending, such as a cash hand-out program and a new 1,000 yen ceiling on expressway tolls. Given these circumstances, the ORIX Group must work to provide high value-added services that stand apart from those of its competitors.

Operating Strategy

In this sluggish real estate market, the ORIX Group will work to increase the value of its real estate assets and maximize earnings. It will also focus on its facility operation and asset management businesses to build a stable earnings base. We will utilize our real estate development, asset management, property management, leasing, and similar functions to move from an expansion model based on boosting earnings from increasing assets, to a more balanced growth model that emphasizes control over our existing portfolio, and expansion of our diversified facilities operations businesses.

In our real estate operating lease business, we will work to improve occupancy rates of our existing asset holdings. We will thereby improve our current income, while holding properties for the foreseeable future, pending improvement in market prices for properties. We are seeking to time

Edgar Filing: ORIX CORP - Form 20-F

property deliveries to match demand to respond more proactively to mitigating vacancy rates. At the same time, we are crafting a stronger exit strategy that takes full advantage of our Group-wide capabilities. Through this exit strategy, we will seek to sell assets opportunistically in light of market conditions, with the aim of replacing properties in our portfolio with prime assets.

Using the highly specialized knowledge and broad expertise we have accumulated over the years, the ORIX Group will engage in risk management responsive to conditions in light of the real estate market downturn. The Real Estate segment works closely with ORIX's Risk Management Headquarters and other specialized departments to conduct regular monitoring of properties to optimize risk management. We also share the risks of

Table of Contents

large-scale projects by working with business partners through joint ventures. Through such measures, we believe we are able to respond more flexibly to changing market conditions.

ORIX Real Estate Investment Advisors Corporation is expanding fee-based revenue in its asset management business not only by managing Group assets but also by addressing the fund management needs of investors outside the group. It does so mainly by forming private offering funds and using these funds to win large-scale property projects.

In the condominium development business, we face an increasingly challenging operating environment. In response, from the fall of 2007, we have suspended the pace of new land purchases. We have been proactive in writing down inventories, working to restore sound inventories at an early stage. Going forward, we will maintain a close watch on declining construction costs and overall market recovery, with the goal of building a more efficient residential condominium development business.

In our facilities operation business, we operate a diverse array of facilities, ranging from golf courses to nursing care facilities, training facilities, hotels, the Kyocera Dome Osaka and the Enoshima Aquarium. We continue to increase our focus on this business. We work to enhance facilities by clarifying targets for each facility and constantly responding to customer expectations. At the same time, we are working to attract individual customers by utilizing the Internet, as well as working to increase sales to corporate clients in order to diversify our customer base and enhance profitability.

Investment Banking

Overview of Operation

This segment consists principally of the real estate-related finance business and the investment banking business that we began developing during the late 1990s and 2000s. Operations include:

- a venture capital business established in 1983;
- a real estate-related finance business, including non-recourse loans, established in 1999;
- a loan servicing business that invests in non-performing loans and CMBS management and collection;
- a principal investment business initiated in 2000;
- a securitization business; and

Edgar Filing: ORIX CORP - Form 20-F

a mergers and acquisitions and financial advisory business established in 2003.

The activities in this segment are conducted primarily through our Investment Banking Headquarters. The number of employees working in this segment is 2,505.

Operating Environment

In light of the opacity in the financial and capital markets over the near term, we believe that it is imperative to respond with speed to the changing environment. The global tightening of credit has resulted in the successive pullout from the Japanese market of foreign and domestic funds and financial institutions. Nonetheless, these developments have also created opportunities for acquiring prime assets.

The domestic non-recourse loan market saw the risk tolerance of investors decrease in the wake of the global recession precipitated by the Lehman Brothers bankruptcy in September 2008, leading to a dramatic decline in the volume of real estate transactions and a contraction in the market. Financial institutions competing with the ORIX Group have begun to narrow the scope of their lending or withdraw completely, and the number of real estate businesses entering bankruptcy because of cash flow problems is increasing.

Table of Contents

In the domestic securitization markets, an increase in credit-rating downgrades for CMBS and growing distrust of credit-ratings, combined with the already sluggish condition of the real estate market, have greatly reduced the number of new CMBS issues, and interest spreads are increasing.

In the market for non-performing loans, opportunities for investment have emerged due to increasing bankruptcies of real estate businesses and growing pressure on lenders to dispose of collateralized properties. Secondary markets are also seeing increased asset sales as investors close out previously formed funds and work to restore liquidity and realize profits.

Reflecting the uncertain economic outlook and the progression of the financial crisis, the domestic M&A market has seen a contraction in the number of mergers and acquisitions. Considering also the growing number of foreign corporate acquisition funds withdrawing from Japan, there are no signs of an upturn in the market environment.

However, with listed companies undertaking restructuring and engaging in strategic de-listing of subsidiaries, and SMEs undergoing business succession, we believe that the use of mergers and acquisitions as a corporate management strategy has become increasingly widespread in Japan, and see this as an opportunity for financial advisory and other engagements.

Operating Strategy

The Investment Banking segment is focusing on preserving and enhancing the value of existing loans and portfolio companies. While both foreign and domestic financial institutions downsize the business or withdraw from the market, we will capitalize on survivors merit, taking advantage of opportunities such as distressed asset related business. As the segment strengthens its relationships with financial institutions, it seeks to generate new sources of earnings by promoting joint ventures and establishing new funds, and by creating new services ancillary to existing assets.

New investments will center on assets being traded at distressed prices. In the secondary markets, we expect to see more disposal of assets from the restructuring of regional banks, further withdrawal of financial institutions, and business downsizing. Because business relating to distressed assets and restructuring takes full advantage of the extensive expertise accumulated by this segment, we will work hard to develop this business.

In light of the significant changes in the real estate market, our non-recourse loan business is focused on ensuring consistent collections from the existing portfolio. Specifically, we are monitoring individual transaction terms including loan caps, interest rate spreads, loan-to-value ratios, debt-service coverage ratios, and cash reserves, as well as the status of underlying assets, and otherwise moving proactively to maximize collections, while continuously reducing asset balances.

While further enhancing functions in existing investments, we seek to implement flexible organizational changes and allocate human resources promptly in response to business environment and strategies.

Retail

Overview of Operation

This segment consists of four businesses that primarily serve individual customers. The four businesses are:

the trust and banking business, which is handled by ORIX Trust and Banking, is centered on the housing loan business started by ORIX in 1980 and is also engaged in corporate lending and other services;

the card loan business which ORIX began with ORIX Credit in 1979, and which now includes an alliance with the Sumitomo Mitsui Banking Corporation, announced in May 2009;

the life insurance business, which is handled by ORIX Life Insurance (founded in 1991), which operates mainly through representative and mail-order sales; and

the securities business, which we entered by bringing ORIX Securities into the ORIX group in 1986, and which now centers on Internet securities brokerage operations.

Table of Contents

The activities in this segment are conducted primarily through ORIX Trust and Banking, ORIX Credit, ORIX Life Insurance and ORIX Securities. The number of employees working in this segment is 1,623.

Operating Environment

While individual funds continue to flow into deposits following a drop in investment confidence due to tumbling stock markets, ORIX Trust and Banking has steadily attracted deposits. Separately, the corporate lending business is expected to expand and become a driving force behind Japan's financial markets as the value of indirect corporate financings is revaluated. Even in a declining real estate market, demand remains firm in the market for investment rental condominium units, a key engine behind the housing loan business, which continues to perform strongly.

The card loan market is in a period of dramatic change, due to the revision of the Moneylending Business Law in December 2006 and the law's ongoing enforcement. Specifically, the upper limit on interest rates set by the Investment Deposit and Interest Rates Law has been lowered, and a ceiling on total debt has been created. As a result, consumer finance companies are finding it difficult to maintain their conventional high-margin business models. The industry is therefore restructuring, with large firms forming alliances with banks.

In the life insurance market, the operating environment has rapidly worsened, and it is becoming difficult to secure investment yields. In the products side, diversification in medical insurance and other products in the so-called third sector of insurance is seen due to high customer needs, and intensifying competition.

In the securities market, since the Lehman Brothers bankruptcy filing, severe economic and market conditions have continued, and individual investor sentiment has yet to recover. Still, with governments around the world responding with measures to address the worsening economy, the markets indicate optimism for an early economic recovery.

Operating Strategy

In this segment, we will maintain our policy of developing new markets for individuals, by offering products and services that provide a high level of customer satisfaction, and increasing our unique expertise and efficiency in niche markets. In particular, ORIX Trust and Banking will work to expand its business through deposit-based funding and its corporate lending.

In line with this growth in business, ORIX Trust and Banking has begun handling deposits for corporate customers since May 2009, via the Internet. On the investment side, in addition to its housing loan business, it seeks to grow its corporate lending business, which started full-scale operations in March 2009. As the business grows, it will also work to raise the sophistication of risk management, and strengthen its internal control structure.

Over the past twenty years, ORIX Credit has concentrated on providing its VIP Loan Card at interest rates below the legal ceiling. We will continue to focus on the VIP Loan Card, utilizing our expertise in credit evaluation, screening, advertising, and marketing to provide customers with convenient card loans. With investment from the Sumitomo Mitsui Banking Corporation, we also will target a stable and increased

Edgar Filing: ORIX CORP - Form 20-F

operating base by attracting different types of customers via Group network, and greater diversification in its fund-raising options. As a result of the tie-up with Sumitomo Mitsui, ORIX Credit will become an equity method affiliate.

ORIX Life Insurance, which concentrates mainly on developing and selling products for individuals, has seen a substantial increase in the number of policies in force. In particular, we have received positive feedback from insurance agents, financial planners, and other specialists for Medical Insurance CURE, a product introduced to the market in September 2006. As other companies enter the market, competition has grown increasingly fierce, but by continuing to develop products that meet the needs of our customers, we will expand

Table of Contents

our customer base and build a stable, profitable business. However, the worsening investment climate in the aftermath of the financial crisis has affected investment returns. In response, we are working toward the goal of a stable portfolio.

ORIX Securities is working to diversify our new customer acquisition channels through our alliance with ORIX Credit, providing stock collateral loans, night trading, online sales of bonds, and other services. Due to sluggish securities markets, our business performance is disappointing, but we expect growth when the securities markets recover. CFD (contract for difference) trading, which commenced in December 2008, has seen new accounts grow approximately five times faster than foreign exchange deposit trading, which started in February 2004. We are also building a solid track record in corporate services, including underwriting initial public offerings and structured bond sales.

Overseas Business

Overview of Operation

Since expanding to Hong Kong in 1971, ORIX has built a broad overseas network spanning the United States, Asia, the Pacific, the Middle East, North Africa and Europe. Our main operations include equipment leasing, automobile leasing, corporate financial services, and ship and airplane-related operations. Recently, ORIX has also expanded into principal investment, investments in non-performing loans, real estate-related operations, and M&A advisory services.

Our activities in this segment are conducted primarily through ORIX USA, International Business Headquarters, Alternative Investment & Development Headquarters and other subsidiaries, as well as affiliates in Hong Kong, China, Singapore, Malaysia, Indonesia, the Philippines, Thailand, Sri Lanka, Taiwan, South Korea, Pakistan, India, Oman, Egypt, Saudi Arabia, UAE, Kazakhstan, Australia, New Zealand, Ireland and Poland. The number of employees working in this segment is 3,356.

Operating Environment

In the United States, a succession of bankruptcies and the realignment of major financial institutions, including the collapse of the prominent investment bank Lehman Brothers, have dealt a tremendous blow to the nation's financial and capital markets. The ensuing deterioration in global financial liquidity has triggered a sharp contraction in credit, leading to a significant decline in the operating environment. In response, the U.S. government has swiftly unveiled a series of policies to shore up liquidity in the financial system, as highlighted by passage of the Emergency Economic Stabilization Act. These efforts notwithstanding, consumer spending, the main engine behind the U.S. economy, fell sharply because of worsening employment levels, resulting in a sharp recession. With the effectiveness of the government's economic measures still uncertain, conditions are expected to remain difficult for the foreseeable future. Tightening of credit and general market turmoil also means that, in the U.S. financial markets, fewer major financial institutions, non-banks, and other entities are willing to take on risk.

In Asia and the Middle East, including ASEAN, where ORIX has major business operations, the effects of the economic downturn on operations in the first half of the fiscal year were relatively minor. However, economic conditions have further weakened since last fall due to the global financial crisis and the business environment is expected to continue to worsen going forward. China, which plays a particularly influential role in the Asian economic region, was not immune to the downturn, and has been affected by, among other things, a sharp drop in its stock markets. However, China is now seeing signs of economic recovery, thanks to government economic stimulus measures. While conditions vary from country to country, Asia's latent strengths may make it possible for the region to recover relatively quickly.

Operating Strategy

In the United States, we are engaged in investment and financing operations, such as corporate finance and investments in CMBS and other marketable securities, and in investment banking operations, including advisory

Table of Contents

services in the areas of mergers and acquisitions, corporate financial restructuring and enterprise valuation. In the United States, where the economic outlook remains uncertain, investment and financing operations will be scaled back to investments and loans aimed at replacing the portfolio with sounder and more profitable assets. For the time being, we seek to curb losses by focusing on more detailed management of existing assets, and by raising personnel efficiency.

Investment banking operations are carried out by Houlihan Lokey, which has maintained a strong reputation in the United States for decades. After joining the ORIX Group in 2006, Houlihan Lokey now has a global operating network spanning eight locations across the United States, three offices in Europe, and offices in Hong Kong, Tokyo, and Beijing. In the midst of the global recession, we believe Houlihan Lokey will find increased earnings opportunities in its corporate financial restructuring advisory operations, where it is a market leader.

We are operating our business cautiously in Asian, ASEAN and Middle Eastern countries, closely monitoring the effects and progression of the global recession. However from a long-term perspective, these regions have by no means lost their strong growth potential, and numerous opportunities remain in the financial services field. With recovering market conditions, in conjunction with our expansive business partner network spanning 26 countries, we will capitalize on our financial services and real estate development expertise to prepare for new business opportunities.

In Asia, Oceania, the Middle East, and Europe, we continue to focus on leasing, lending and other financial services closely tied to local communities. We will carefully monitor the existing asset portfolio of our principal investment, investments in non-performing loans, and real estate development-related businesses, while pursuing new investment opportunities, primarily in distressed assets. Moreover, we are working to enhance our resources for supporting Japanese companies looking to move into overseas markets, as well as foreign companies entering Japan.

DIVISIONS, MAJOR SUBSIDIARIES AND AFFILIATES

A list of major subsidiaries can be found in Exhibit 8.1.

CAPITAL EXPENDITURES AND MAJOR M&A ACTIVITIES

We are a financial services company with significant leasing, lending, real estate development and other operations based on investment in tangible assets. As such, we are continually acquiring and developing such assets as part of our business. A detailed discussion of these activities is presented elsewhere in this annual report, including in other parts of Item 4. Information on the Company and in Item 5. Operating and Financial Review and Prospects.

We also have made a number of acquisitions in other companies to expand our operations. Some of our recent acquisitions are described below.

In March 2005, we acquired an additional 42% of DAIKYO and preferred shares for approximately ¥47 billion. As a result of the acquisition, our stake in the company increased to 44%. During fiscal 2008, DAIKYO acquired a 100% stake in Fuso Lexel Incorporated through a share swap. As the Company and its subsidiaries had held shares of Fuso Lexel Incorporated, we acquired an additional interest in DAIKYO through

Edgar Filing: ORIX CORP - Form 20-F

this share swap. As a result, the interest of the third parties increased and our ownership in DAIKYO decreased to 41%. In June 2008, DAIKYO repurchased 20% of its preferred shares from ORIX at a purchase price of ¥10.4 billion. In March 2009, we acquired preferred shares of DAIKYO for ¥10 billion. Also in March 2009, we transferred our wholly owned subsidiary, ORIX Facilities Corporation, to DAIKYO through a share swap. This resulted in a further acquisition of ¥9.4 billion of preferred shares. See Item 7. Major Shareholders and Related Party Transactions Related Party Transactions.

Table of Contents

In general, we seek to expand and deepen our product and service offerings and enhance our financial performance by pursuing acquisition opportunities. We are continually reviewing acquisition opportunities, and selectively pursuing several such opportunities. We have in the past deployed a significant amount of capital for acquisition activities, and expect to continue to make investments selectively in the future.

PROPERTY, PLANT AND EQUIPMENT

Because our main business is to provide diverse financial services to our clients, we do not own any material factories or facilities that manufacture products. We have no plans to build any factories that manufacture products.

The primary facilities we own include two office buildings, one training facility and one waste disposal facility. One office building is located in Shiba, Minato-ku, Tokyo with a book value of ¥37,512 million, and the other is located in Tachikawa, Tokyo with a book value of ¥23,707 million. Our training facility located in Funabashi, Chiba has a book value of ¥11,070 million, and our industrial waste disposal facility located in Yorii, Saitama has a book value of ¥14,313 million. In addition to these major facilities, we are building a new regional headquarters building in Osaka that will allow us to manage our Osaka operations from within a single location. Construction is expected to be completed by February 2011, and the current estimated costs for the project are ¥30 billion. Although there are presently no other material plans to construct or improve facilities, we may build or acquire additional offices or make improvements to existing facilities if we believe the expansion of our business so warrants.

Our operations are generally conducted in leased office space in cities throughout Japan and in other countries in which we operate. We believe our leased office space is suitable and adequate for our needs. We utilize, or expect to utilize in the near future, substantially all of our leased office space.

We own office buildings, apartment buildings and recreational facilities for our employees with an aggregate book value of ¥77,945 million as of March 31, 2009.

As of March 31, 2009, net book value of equipment held for operating leases amounted to ¥1,210,166 million, which consists of ¥582,104 million of transportation equipment, ¥178,062 million of measuring and information-related equipment, ¥788,749 million of real estate and ¥19,867 million for others. Accumulated depreciation on the operating leases was ¥358,616 million as of the same date.

SEASONALITY

Our business is not materially affected by seasonality.

RAW MATERIALS

Our business does not depend materially on the supply of raw materials.

BUSINESS REGULATION

Japan

ORIX is incorporated under the Company Law and its corporate activities are governed by the Company Law; its group companies in Japan are also so incorporated and governed.

There is no general regulatory regime which governs the conduct of our direct financing lease and operating lease businesses in Japan, although various laws regulate certain aspects of particular lease transactions, depending on the type of leased property.

Table of Contents

The major regulations that govern our businesses are as follows:

Moneylending Business

ORIX and certain of our group companies, such as ORIX Credit, engage in the business of money lending in Japan. The business of money lending is regulated by the Interest Limitation Law, the Acceptance of Contributions, the Deposit and the Interest Law, and the Moneylending Business Law. The Moneylending Business Law requires that all companies register with the Prime Minister and relevant prefectural governors. Registered moneylenders are regulated by the FSA, and are required to report to or notify the FSA, providing such documents as their annual business reports. Accordingly, pursuant to the Moneylending Business Law, ORIX and certain of our group companies register with the Prime Minister or prefectural governors and provide the necessary reporting and notification to the FSA. The FSA has the power to issue a business improvement order to suspend all or part of a business's activities, or to revoke the registration of a moneylender that has violated the law. In addition, in December 2006, laws related to the money lending business were amended for the purpose of enhancing borrower protection. The amendments tighten regulations by, among other things, reducing the maximum interest rate and introducing limits on the maximum amount of money that may be loaned to individuals. These amendments have come into effect.

Real Estate Business

ORIX and certain of our group companies, including ORIX Real Estate and ORIX Alpha, engage in the real estate business in Japan, including the buying and selling of land and buildings. ORIX and our relevant group companies are therefore required to be licensed by the Ministry of Land, Infrastructure and Transport, or the MoLIT, and relevant prefectural governors under the Building Lots and Building Transaction Law, and our operations are regulated by such laws, including the maintenance of registered real-estate transaction managers on staff and the provision and delivery of material information to counterparties.

Car Rental Business

ORIX Auto is registered with the MoLIT under the Road Transportation Law to engage in the car rental business in Japan and is subject to the requirements of such law and to inspection by the MoLIT.

Insurance Business

ORIX Life Insurance is engaged in the life insurance business and has a license from the Prime Minister under the Insurance Business Law. The FSA has broad regulatory powers over the life insurance business of ORIX Life Insurance, including the authority to grant or, under certain conditions, revoke its operating license, to request information regarding its business or financial condition and to conduct onsite inspections of its books and records. ORIX Life Insurance generally must also receive FSA approval for the sale of new products and to set new pricing terms. In addition, under the Insurance Business Law regulations, any party attempting to acquire voting rights of an insurance company over or equal to a specified threshold must receive permission from the Prime Minister. We have received such permission as a major shareholder in ORIX Life Insurance and The Fuji Fire and Marine Insurance Company, Limited. Insurance solicitation, which we and our group companies conduct, is also governed by the Insurance Business Law. We and certain of our group companies, such as ORIX Alpha and ORIX Auto, are registered as life insurance agents with the Prime Minister.

Financial Instruments Exchange Business

The Financial Instruments and Exchange Law which became effective in September 2007 supplants the Securities and Exchange Law and includes significant changes. The Financial Instruments and Exchange Law expands its scope of control to cover many additional subjects (product, business, etc.) for the purpose of establishing comprehensive and cross-sectional protection for investors. Certain businesses conducted

Table of Contents

by ORIX and our group companies in Japan are governed by the Financial Instruments and Exchange Law. Registered financial instruments traders are regulated by the FSA, and are required to file certain reports or notifications with the FSA. The FSA has the power to order improvement of a business, suspension of a part or the whole of a business, or to revoke the registration of a financial instruments trader that has violated the law. Business regulations to be applied to ORIX and our group companies are as follows:

(1) First Class Financial Instruments Exchange Business

ORIX Securities is engaged in the first class financial instruments exchange business and is registered with the Prime Minister under the Financial Instruments and Exchange Law. The first class financial instruments exchange business contains trading of high-liquid financial products such as sales and solicitation of listed securities. The Financial Instruments and Exchange Law regulates the business activities of securities companies and the conduct of securities companies related to securities transactions. In addition, under the Financial Instruments and Exchange Law, any entity possessing voting rights of a securities company (first class financial instruments trader) over or equal to a specified threshold is considered a major shareholder and must report this to the Prime Minister. ORIX has filed such a report as a major shareholder of ORIX Securities Corporation.

(2) Second Class Financial Instruments Exchange Business

ORIX and certain of our group companies are registered with the Prime Minister under the Financial Instruments and Exchange Law to conduct second class financial instruments exchange business. The second class financial instruments exchange business contains trading of low-liquid financial instruments, such as sales and solicitation of trust beneficiary interests and certain equity investment in partnerships.

(3) Financial Instruments Intermediary Business

The financial instruments intermediary business that we conduct is also regulated by the Financial Instruments and Exchange Law. ORIX is registered with the Prime Minister under the Financial Instruments and Exchange Law to conduct business as a financial instruments intermediary.

(4) Investment Management Business

ORIX Asset Management Corporation, a wholly owned subsidiary, is registered with the Prime Minister under the Financial Instruments and Exchange Law as an investment manager. ORIX Asset Management Corporation is responsible for the asset management of a real estate investment corporation, ORIX JREIT Inc., which is listed on the Tokyo Stock Exchange. In addition, ORIX Real Estate Investment Advisory Corporation and ORIX Investment Corporation are registered with the Prime Minister to conduct investment management businesses. Under the Financial Instruments and Exchange Law, any entity possessing the voting rights of an investment manager over or equal to a specified threshold is considered a major shareholder and must report this to the Prime Minister. ORIX has filed such a report as a major shareholder with regard to ORIX Asset Management Corporation and ORIX Investment Corporation.

(5) Investment Advisory and Agency Business

ORIX Investment Corporation and ORIX Real Estate Investment Advisory Corporation are registered with the Prime Minister under the Financial Instruments and Exchange Law to conduct an investment advisory and agency business.

Banking and Trust Business

ORIX Trust and Banking, or OTB, is licensed by the Prime Minister to engage in the banking and trust business, and is regulated under the Banking Law, the Law concerning Trust Business Concurrently Conducted by Financial Institutions and the Trust Business Law. The Banking Law governs the general banking business

Table of Contents

and the Law concerning Trust Business Concurrently Conducted by Financial Institutions and the Trust Business Law govern the trust business. Our trust contract agency business is also governed by the Trust Business Law, and we are registered with the Prime Minister to engage in such business. In addition, under the Banking Law, any entity that attempts to hold voting rights of a bank in excess of or equal to a specified threshold must receive permission from the Prime Minister. ORIX has received such permission as a major shareholder of OTB.

Debt Management and Collection Business

ORIX Asset Management & Loan Services Corporation, or OAMLS, is engaged in the loan servicing business and the business of managing and collecting certain assets. Consequently, OAMLS is regulated under the Law for Special Measures Concerning the Debt Management and Collection Business. OAMLS is licensed by the Minister of Justice under such law to engage in the loan servicing business.

Waste Management

ORIX Environmental Resources Management Corporation, under the Waste Management and Public Cleansing Law, has permission for and to (i) the installation of an industrial waste disposal facility to act as an industrial waste disposal contractor and as a specially controlled industrial waste disposal contractor and the installation of a municipal solid waste disposal facility from the governor of Saitama Prefecture, and (ii) act as a municipal solid waste disposal contractor from the town mayor of Yorii Town.

Also, Funabashi Environmental Corporation, under the Waste Management and Public Cleansing Law, has permission to: (i) engage in the installation of an industrial waste disposal facility within Chiba Prefecture, (ii) act as an Collection and Transportation of an industrial waste disposal collector from each governor of Tokyo, Kanagawa, Chiba and Saitama Prefectures, and also from mayors of major 6 cities in Kanto region and (iii) engage in the business of industrial waste disposal contractor, by the authorization of mayor of Funabashi City.

ORIX Environmental Resources Management Corporation and Funabashi Environmental Corporation are engaged in the waste management service regulated by the Waste Management and Public Cleansing Law.

Regulation on Share Acquisitions

Certain of our activities and those of certain of ORIX group companies are regulated by the Foreign Exchange and Foreign Trade Law of Japan and the cabinet orders and ministerial ordinances thereunder, or the Foreign Exchange Regulations.

Under the Foreign Exchange Regulations, the Company and certain ORIX group companies in Japan are regulated as residents conducting capital transactions or foreign direct investments. Moreover, if the ratio of foreign shareholders of the Company is 50% or more, the Company and the relevant group companies in Japan will be regulated as foreign investors conducting inward direct investment.

Edgar Filing: ORIX CORP - Form 20-F

To conduct such activities under the Foreign Exchange Regulations, notices or reports are required to be filed with the governing agency through the Bank of Japan. In certain cases, the Minister of Finance and any other competent Ministers have the power to recommend the cancellation or modification of activities specified in such notices and can order such cancellation or modification if their recommendation is not followed.

Outside Japan

ORIX USA is incorporated under the laws of the state of Delaware, and its corporate activities are governed by the Delaware General Corporation Law.

The SEC and various state agencies regulate the issuance and sale of securities and the conduct of broker-dealers, investment companies and investment advisers in the United States. ORIX USA is majority owned

Table of Contents

subsidiaries, Houlihan Lokey Howard & Zukin Capital, Inc. and Houlihan Lokey Howard & Zukin Financial Advisors, Inc., are a registered broker-dealer and a registered investment adviser, respectively, and as such, are regulated by the SEC. ORIX USA and its other subsidiaries are not subject to these regulations but must comply with US federal and state securities laws.

ORIX USA's corporate finance, real estate finance and development, equipment finance, public finance and special servicing businesses are subject to numerous state and federal laws and regulations. Commercial and real estate loans may be governed by the USA PATRIOT Act, the Equal Credit Opportunity Act and its Regulation B, the Flood Disaster Protection Act, the National Flood Insurance Reform Act of 1994 and state usury laws. Real estate transactions are also governed by state real property and foreclosure laws. ORIX USA's equipment finance transactions are governed by the Uniform Commercial Code, as adopted by the various states. ORIX USA is registered with or has obtained licenses from the various state agencies that regulate the activity of commercial lenders in such states.

Recent disruptions in the U.S. financial markets have caused lawmakers and regulators to evaluate the effectiveness of their oversight of the financial services industry, and a variety of regulatory initiatives are likely to be proposed by the Obama administration and Congress. It is increasingly probable that new regulations and laws, or significant changes to existing regulations and laws, affecting ORIX USA will be implemented.

Outside of the United States, ORIX USA's majority owned subsidiary, Houlihan Lokey Howard & Zukin (Europe) Limited, or HLHZE, is authorized and regulated by the Financial Services Authority in the UK, inter alia, to arrange deals in investments, to advise on investments by others and to deal in investments as a principal. HLHZE has also established branches in France and Germany under the provisions of the Investment Services Markets in Financial Instruments Directive and is regulated by the BaFin in Germany and the Autorité des marchés financiers in France in the conduct of the respective businesses of the branches located in those countries. Other such majority owned subsidiaries include Houlihan Lokey Howard & Zukin (China) Limited, which is licensed to conduct regulated activities by the Securities and Futures Commission in Hong Kong, and Blenheim Advisors Limited, which is authorized and regulated by the Financial Services Authority in the UK to advise on investments.

In other regions outside of Japan, our businesses are also subject to regulation and supervision in the jurisdictions in which they operate.

LEGAL PROCEEDINGS

We are a plaintiff or a defendant in various lawsuits arising in the ordinary course of our business. We aggressively manage our pending litigation and assess appropriate responses to lawsuits in light of a number of factors, including potential impact of the actions on the conduct of our operations. In the opinion of management, none of the pending legal matters is expected to have a material adverse effect on our financial condition or results of operations. However, there can be no assurance that an adverse decision in one or more of these lawsuits will not have a material adverse effect.

Item 4A. Unresolved Staff Comments

OVERVIEW

The following discussion provides management's explanation of factors and events that have significantly affected our financial condition and results of operations. Also included is management's assessment of factors and trends which are anticipated to have a material effect on our financial condition and results of operations in the future. However, please be advised that financial conditions and results of operations in the future may also be affected by factors other than those discussed here. This discussion should be read in conjunction with Item 3. Key Information Risk Factors and Item 18. Financial Statements included in this annual report.

During fiscal 2009, the effects of a significant credit crunch in global capital markets increasingly spilled over into the real economies of many countries, and in Japan, the real economic growth rate and the Bank of Japan's short-term economic survey of enterprises (the Tankan) measuring businesses' short-term sentiments revealed the bleakest outlook since the survey began. Furthermore, the concern surrounding enterprises continues to increase, as can be seen in the record-high number of listed companies that have filed for bankruptcy, particularly in the real estate sector. Under this operating environment, our net income was ¥21.9 billion, down 87% year on year, due to losses and impairments on equity method affiliates, write-downs on investment securities and increases in provisions for doubtful receivables and probable loan losses. We will pursue the current business plan of strengthening the corporate structure and operational realignment for fiscal year 2010 to improve profitability while securing financial liquidity and asset stability in order to adapt to the drastic changes in the economic environment and effects of the credit crunch.

The main factors underlying performance in fiscal 2009 are outlined below.

Profits decreased 87% year on year due to declines in all six of our business segments.

Edgar Filing: ORIX CORP - Form 20-F

The Corporate Financial Services segment, the core business of the ORIX Group, recorded a loss due to continued increases in provisions for doubtful receivables and probable loan losses for real estate-related loans and impairment losses of goodwill in consolidated subsidiaries and equity-method affiliates.

The Maintenance Leasing Segment saw a decline in profits due to increases in expenses related to depreciation and maintenance parts and services, increases in provisions for doubtful receivables and probable loan losses and reductions in gains on sales of used automobiles due to a declining secondary market.

Table of Contents

The Real Estate Segment's profit decreased substantially due to declining gains on sales of real estate under operating leases and reduced profits from condominium operations due to a fall in profitability and an increase in write-downs on projects under development.

The Investment Banking Segment recorded significant losses including impairment losses due to the effects of a deterioration of results of domestic-based equity method affiliates, mainly DAIKYO INCORPORATED and The Fuji Fire and Marine Insurance Co., Ltd. Furthermore, a decline in profits of the loan servicing (asset recovery) and expanding of losses by private equity investment and alternative investment operations saw declines in profit for this segment.

The Retail Segment's profits decreased. Profits from the life insurance business significantly decreased primarily due to a decline in related investment profit and increases in provisions for doubtful receivables and probable loan losses, as well as increased provisions in the card loan and trust and banking businesses and declines in commissions in the securities brokerage business.

The Overseas Segment's profits declined due to increased losses from investment securities, caused by deterioration in the bond and equity markets, a decline in installment loan revenues, caused by the foreign exchange effects of an appreciated yen combined with a lowering of market interest rates. Nevertheless, the U.S. operations achieved profitability as a result of contributions from fee-based revenue of Houlihan Lokey Howard & Zukin Limited, strict risk control and the effects of cost reduction.

FAIR VALUE MEASUREMENTS

We adopted FASB Statement No. 157 (Fair Value Measurements). This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements.

This Statement classifies and prioritizes inputs used in valuation techniques to measure fair value into the following three levels:

Level 1 Inputs of quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly.

Level 3 Unobservable inputs for the assets or liabilities.

This Statement differentiates between those assets and liabilities required to be carried at fair value at every reporting period (recurring) and those assets and liabilities that are only required to be adjusted to fair value under certain circumstances (nonrecurring). We measure mainly cash equivalents, trading securities, available-for-sale securities, certain investment in affiliates and derivatives at fair value on a recurring basis.

Edgar Filing: ORIX CORP - Form 20-F

We adopted FSP 157-2 (Effective Date of FASB Statement No. 157). This Staff Position defers the effective date of FASB Statement No. 157 to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years for nonfinancial assets and liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis.

Table of Contents

The following table presents recorded amounts of major financial assets measured at fair value on a recurring basis as of March 31, 2009:

| Financial Assets | Total Carrying Value in Consolidated Balance Sheets | March 31, 2009 | | |
|-------------------------------|---|--|---|---|
| | | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) |
| | | (Millions of yen) | | |
| Cash equivalents | ¥ 34,990 | ¥ 34,990 | ¥ | ¥ |
| Trading securities | 7,410 | 1,787 | 5,457 | 166 |
| Available-for-sale securities | 729,273 | 40,473 | 240,941 | 447,859 |
| Investment in affiliates | 10,245 | 3,291 | | 6,954 |
| Derivative assets | 19,800 | 152 | 18,888 | 760 |
| Others | 942 | | 942 | |
| | ¥ 802,660 | ¥ 80,693 | ¥ 266,228 | ¥ 455,739 |

Compared to financial assets classified as Level 1 and Level 2, measurements of financial assets classified as Level 3 are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting the fair value measurements may differ significantly from management's current measurements.

As of March 31, 2009, financial assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) and percentages to total assets in consolidated balance sheets are as follows:

| Level 3 financial assets: | March 31, 2009 | |
|--------------------------------|---|--------------------------------|
| | Significant Unobservable Inputs (Level 3) (In millions of yen, except percentage data) | Percentage to total assets (%) |
| Trading securities | ¥ 166 | 0 |
| Available-for-sale securities | 447,859 | 5 |
| Investment in affiliates | 6,954 | 0 |
| Derivative assets | 760 | 0 |
| Total Level 3 financial assets | ¥ 455,739 | 5 |
| Total assets | ¥ 8,369,736 | 100 |

The amount of financial assets classified as Level 3 is ¥455,739 million among financial assets that we measured at fair value on recurring basis in fiscal 2009. It represents 5.4% of total assets of ¥8,369,736 million.

Available for sale securities classified as Level 3 are mainly mortgage-backed and other asset-backed securities. Specified bonds issued by special purpose entities, or SPEs, classified as Level 3 available-for-sale securities were ¥300,765 million, which is 67% of Level 3

available-for-sale securities.

When re-evaluating the specified bonds issued by SPEs, we estimate the fair value by discounting future cash flows using a discount rate based on the market interest rate and a risk premium. The future cash flows for the specified bonds issued by the SPEs are estimated based on contractual principal and interest repayment schedules on each of the specified bond issued by the SPEs. The risk premium is estimated mainly based on the value of the real estate collateral of each specified bonds issued by SPEs and the seniority of the bonds. The fair value of the specified bonds issued by SPEs rises when the fair value of the collateral real estate rises and the market interest rate declines. The fair value of the specified bonds issued by SPEs declines when the fair value of the collateral real estate declines and the market interest rate rises. The difference between the carrying amount and the fair value of the specified bonds issued by SPEs is recorded in accumulated other comprehensive income.

Table of Contents

When the fair value of the specified bonds issued by SPEs declines significantly below the acquisition cost and the decline is determined to be other than temporary, we recognize write-downs of the specified bonds issued by SPEs.

The following table presents the reconciliation for financial assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during fiscal 2009:

| | Trading securities | Significant Unobservable Inputs (Level 3) | | | Derivatives assets |
|---|--------------------|---|--------------------------|---|--------------------|
| | | Available-for-sale securities | Investment in affiliates | | |
| | | (Millions of yen) | | | |
| Balance at March 31, 2008 | ¥ | ¥ | 437,939 | ¥ | ¥ |
| Total gains or losses (realized/unrealized) | (820) | (5,743) | 954 | | 760 |
| Included in earnings | (734) | (2,305) | 954 | | 760 |
| Included in other comprehensive income | (86) | (3,438) | | | |
| Purchases, sales, and redemptions | 154 | (51,090) | 6,000 | | |
| Transfers in and/or out of Level 3 (net) | 832 | 66,753 | | | |
| Balance at March 31, 2009 | ¥ 166 | ¥ 447,859 | ¥ 6,954 | ¥ | 760 |

Net amount of ¥66,753 million of available-for-sale securities, mainly CMBS and RMBS in U.S., was transferred from other levels to Level 3 in fiscal 2009 due to a certain market becoming inactive.

For more information on fair value measurements, see Note 2 in Item 18. Financial Statements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Accounting estimates are an integral part of the financial statements prepared by management and are based upon management's current judgments. Note 1 of the notes to the consolidated financial statements includes a summary of the significant accounting policies used in the preparation of our consolidated financial statements. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting the estimates may differ significantly from management's current judgments. We consider the accounting estimates discussed in this section to be critical accounting estimates for us for two reasons. First, the estimates require us to make assumptions about matters that are highly uncertain at the time the accounting estimates are made. Second, different estimates that we reasonably could have used in the relevant period, or changes in the accounting estimates that are reasonably likely to occur from period to period, could have a material impact on the presentation of our financial condition, changes in financial condition or results of operations. We believe the following represents our critical accounting policies and estimates.

ALLOWANCE FOR DOUBTFUL RECEIVABLES ON DIRECT FINANCING LEASES AND PROBABLE LOAN LOSSES

The allowance for doubtful receivables on direct financing leases and probable loan losses represents management's estimate of probable losses inherent in the portfolio. This evaluation process is subject to numerous estimates and judgments. The estimate made in determining the

Edgar Filing: ORIX CORP - Form 20-F

allowance for doubtful receivables on direct financing leases and probable loan losses is a critical accounting estimate for all of our segments.

In developing the allowance for doubtful receivables on direct financing leases and probable loan losses, we consider, among other things, the following factors:

the nature and characteristics of obligors;

current economic conditions and trends;

Table of Contents

prior charge-off experience;

current delinquencies and delinquency trends;

future cash flows expected to be received from the direct financing leases and loans; and

the value of underlying collateral and guarantees.

In particular, the valuation allowance for large balance non-homogeneous loans is individually evaluated based on the present value of expected future cash flows, the loan's observable market price or the fair value of the collateral securing the loans if the loans are collateral-dependent. The allowance for losses on smaller-balance homogeneous loans, including individual housing loans and card loans which are not restructured, and lease receivables, is collectively evaluated, considering current economic conditions and trends, the value of the collateral and guarantees underlying the loans and leases, prior charge-off experience, delinquencies and non-accruals. If actual future economic conditions and trends, actual future value of underlying collateral and guarantees, and actual future cash flows are less favorable than those projected by management or the historical data we use to calculate these estimates do not reflect future loss experience, additional provisions may be required.

The allowance is increased by provisions charged to income and is decreased by charge-offs, net of recoveries.

We review delinquencies or other transactions exceeding a specified amount as frequently as three times a month in the case of transactions in Japan. Transactions with payments 90 days or more past-due are reported to the Head of the Risk Management Headquarters. We stop accruing revenues on direct financing leases and installment loans when principal or interest is past-due 90 days or more, or earlier if management determines that it is doubtful that we can collect on direct financing leases and installment loans. The decision to suspend accruing revenues on direct financing leases and installment loans is based on factors such as the general economic environment, individual clients' creditworthiness and historical loss experience, delinquencies and accruals. After we have set aside provisions for a non-performing asset, we carefully monitor the quality of any underlying collateral, the status of management of the obligor and other important factors. When we determine that there is little likelihood of continued repayment by the borrower or lessee, we sell the leased equipment or loan collateral, and we record a charge-off for the portion of the lease or loan that remains outstanding.

Under our charge-off policy, we charge off doubtful receivables when it is determined that prospects for further recovery from the obligor are minimal. Our policy requires the exercise of management judgment in assessing when a customer receivable has become worthless and when charge-off is appropriate. In exercising such judgment, management considers criteria set forth in Japanese tax laws which focus on objective characteristics evidencing worthlessness, such as creditor-negotiated restructurings, legal extinguishment or extended suspension of transaction with the obligor beyond one year. These considerations may result in our charge-off of doubtful receivables later than might be the case for companies in other jurisdictions where regulatory or tax policies may not require that a worthlessness assessment be reached prior to charge-off of the receivable. This potential difference in application of charge-off policy may result in our recognizing lower recoveries from charged-off receivables than might be experienced by reporting entities in other jurisdictions.

IMPAIRMENT OF INVESTMENT IN SECURITIES

We recognize write-downs of securities in our consolidated statements of income when the fair value of a security has declined significantly below the acquisition cost and the decline has been determined to be other than temporary. We generally charge the losses related to investments

Edgar Filing: ORIX CORP - Form 20-F

in securities other than trading securities when the following conditions are met:

if the fair value for an equity security has remained significantly below our acquisition cost, or significantly below the current carrying value if the price of the security has been adjusted in the past, for more than six months;

Table of Contents

in certain situations for a debt security, if there has been significant deterioration in a bond issuer's credit rating, an issuer's default or a similar event;

in certain other situations where, even though the fair value of an equity security has not remained significantly below the carrying value for six months, the decline in fair value of an equity security is based on an issuer's specific economic conditions and not just general declines in the related market and where it is considered unlikely that the fair value of the equity security will recover within six months, or

in certain other situations where it is considered that the decline in the value of an other security is other than temporary.

Determinations of whether a decline is other than temporary often involve estimating the outcome of future events that are highly uncertain at the time the estimates are made. Management judgment is required in determining whether factors exist that indicate that an impairment loss should be recognized at any balance sheet date, mainly based on objective factors. In view of the diversity and volume of our shareholdings, the highly volatile equity markets make it difficult to determine whether the declines are other than temporary.

If the financial condition of an investee deteriorates, its forecasted performance is not met or actual market conditions are less favorable than those projected by management, we may charge to income additional losses on investment in securities.

IMPAIRMENT OF GOODWILL AND INTANGIBLE ASSETS NOT SUBJECT TO AMORTIZATION

We test for impairment of goodwill and any intangible assets that are not subject to amortization at least annually. Additionally, if events or changes in circumstances indicate that the asset might be impaired, we test for impairment when such events occur.

Goodwill impairment is determined using a two-step process either at the operating segment level or one level below the operating segments. The first step of the goodwill impairment test, used to identify potential impairment, compares the fair value of a reporting unit with its carrying value, including goodwill. If the carrying value of a reporting unit exceeds its fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss. The second step of the goodwill impairment test compares implied fair value of reporting unit goodwill with the carrying value of that goodwill. If the carrying value of the reporting unit goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The implied fair value of goodwill is determined in the same manner used to determine the amount of goodwill recognized in a business combination. Any intangible assets that are not subject to amortization are tested for impairment by comparing the fair value of the intangible asset with its carrying value. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess.

The fair value of a reporting unit under the first step and the second step is determined by estimating the outcome of future events and assumptions made by management. Similarly, estimates and assumptions are used in determining the fair value of any intangible asset that is not subject to amortization. When necessary, we refer to the evaluation by the third party in determining the fair value of a reporting unit, however, such determinations are often evaluated by discounted cash flows analysis performed by us. This approach uses numerous estimates and assumptions, including projected future cash flows of a reporting unit, discount rates reflecting the risk inherent and growth rate. If actual cash flows or any items which affect a fair value are less favorable than those projected by management due to economic conditions or own risk of reporting unit, we may charge additional losses to income.

Table of Contents

IMPAIRMENT OF LONG-LIVED ASSETS

We periodically perform an impairment review for long-lived assets held and used in operation, including tangible assets, intangible assets being amortized and real estate development projects. The assets are tested for recoverability, whenever events or changes in circumstances indicate that those assets might be impaired, including, but not limited to, the following:

significant decline in the market value of an asset;

significant deterioration in the usage range and method, and physical condition of an asset;

significant deterioration of the legal factors and business environment, including an adverse action or assessment by a regulator;

acquisition and construction costs substantially exceeding estimates;

continued operating loss, loss of cash flows, or potential loss of cash flows; and

potential loss on sale, having a plan of sale.

When we determine that assets might be impaired based upon the existence of one or more of the above factors or other factors, we estimate the future cash flows expected to be generated by those assets. Our estimates of the future cash flows are based upon historical trends adjusted to reflect our best estimate of future market and operating conditions. Also, our estimates include the expected future period in which future cash flows are expected. As a result of the recoverability test, when the sum of the estimated future undiscounted cash flows expected to be generated by those assets is less than its carrying amount, and when its fair value is less than its carrying amount, we determine the amount of impairment based on the fair value of those assets.

If the asset is considered impaired, an impairment charge is recorded for the amount by which the carrying amount of the asset exceeds fair value. We determine fair value based on appraisals prepared by independent third party appraisers or our own staff of qualified appraisers, based on recent transactions involving sales of similar assets, or other valuation techniques to estimate fair value. If actual market and operating conditions under which assets are operated are less favorable than those projected by management, resulting in lower expected future cash flows or shorter expected future periods to generate such cash flows, additional impairment charges may be required. In addition, changes in estimates resulting in lower fair values due to unanticipated changes in business or operating assumptions could adversely affect the valuations of long-lived assets.

The accounting estimates relating to impairment of long-lived assets could affect all segments.

UNGUARANTEED RESIDUAL VALUE FOR DIRECT FINANCING LEASES AND OPERATING LEASES

Edgar Filing: ORIX CORP - Form 20-F

We estimate unguaranteed residual values of leased equipment except real estate, which is explained in Impairment of Long-lived Assets described above, when we calculate unearned lease income to be recognized as income over the lease term for direct financing leases and when we calculate depreciation amounts for operating leases which carry inherently higher obsolescence and resale risks. Our estimates are based upon current market values of used equipment and estimates of when and how much equipment will become obsolete. If actual future demand for re-lease or actual market conditions of used equipment is less favorable than that projected by management, write-downs of unguaranteed residual value may be required.

The accounting estimates relating to unguaranteed residual value for direct financing leases and operating leases affect mainly the Corporate Financial Services, Maintenance Leasing and Overseas Business segments.

Table of Contents

INSURANCE POLICY LIABILITIES AND DEFERRED POLICY ACQUISITION COSTS

A subsidiary of ORIX writes life insurance policies to customers. Policy liabilities for future policy benefits are established by the net level premium method, based on actuarial estimates of the amount of future policyholder benefits. The policies are characterized as long-duration policies and mainly consist of whole life, term life, endowments, and medical insurance. Computation of policy liabilities and reserves necessarily includes assumptions about mortality, lapse rates and future yields on related investments and other factors applicable at the time the policies are written. The life insurance subsidiary continually evaluates the potential for changes in the estimates and assumptions applied in determining policy liabilities, both positive and negative, and uses the results of these evaluations both to adjust recorded liabilities and to adjust underwriting criteria and product offerings. If actual assumption data, such as mortality, lapse rates, investment returns and other factors, do not properly reflect future policyholder benefits, we may establish a premium deficiency reserve.

FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, requires insurance companies to defer certain costs associated with writing insurances, or deferred policy acquisition costs, and amortize them over the respective policy periods in proportion to anticipated premium revenue. Deferred policy acquisition costs are the costs related to the acquisition of new and renewal insurance policies and consist primarily of first-year commissions in excess of recurring policy maintenance costs and certain variable costs and expenses for underwriting policies. Periodically, deferred policy acquisition costs are reviewed for whether relevant insurance and investment income are expected to recover the unamortized balance of the deferred acquisition costs. When such costs are expected to be unrecoverable, they are charged to income in that period. If the historical data, such as lapse rates, investment returns, mortality experience, expense margins and surrender charges, which we use to calculate these assumptions, do not properly reflect future profitability, additional amortization may be required.

The accounting estimates relating to insurance policy liabilities and deferred policy acquisition costs affect our Retail segment.

ASSESSING HEDGE EFFECTIVENESS AND MEASURING INEFFECTIVENESS

We use foreign currency swap agreements, interest rate swap agreements and foreign exchange contracts for hedging purposes and apply either fair value hedge, cash flow hedge or foreign currency hedge accounting to measure and account for subsequent changes in their fair value.

To qualify for hedge accounting, details of the hedging relationship are formally documented at the inception of the arrangement, including the risk management objective, hedging strategy, hedged item, specific risks that are to be hedged, the derivative instrument and how effectiveness is being assessed. The derivative for hedge purpose must be highly effective in offsetting either changes in fair value or cash flows, as appropriate, for the risk being hedged and effectiveness needs to be assessed at the inception of the relationship.

Hedge effectiveness is assessed quarterly on a retrospective and prospective basis. Ineffectiveness is also measured quarterly, with the results recognized in earnings. If specified criteria for the assumption of effectiveness are not met at hedge inception or upon the quarterly testing, then the hedge accounting is discontinued. To assess effectiveness and measure ineffectiveness, we use techniques including regression analysis and cumulative dollar offset method.

PENSION PLANS

Edgar Filing: ORIX CORP - Form 20-F

The determination of our projected benefit obligation and expense for our employee pension benefits is mainly dependent on the size of the employee population, actuarial assumptions, expected long-term rate of return on plan assets and the discount rate used in the accounting.

Pension expense is directly related to the number of employees covered by the plans. Increased employment through internal growth or acquisition would result in increased pension expense.

Table of Contents

In estimating the projected benefit obligation, actuaries make assumptions regarding mortality rates, turnover rates, retirement rates and rates of compensation increase. In accordance with FASB Statement No. 87 (Employers Accounting for Pensions), actual results that differ from the assumptions are accumulated and amortized over future periods and, therefore, impact expense and the recorded obligations in future periods.

We determine the expected long-term rate of return on plan assets annually based on the composition of the pension asset portfolios and the expected long-term rate of return on these portfolios. The expected long-term rate of return is designed to approximate the long-term rate of return actually earned on the plans assets over time to ensure that funds are available to meet the pension obligations that result from the services provided by employees. We use a number of factors to determine the reasonableness of the expected rate of return, including actual historical returns on the asset classes of the plans portfolios and independent projections of returns of the various asset classes.

We use March 31 as a measurement date for our pension assets and projected benefit obligation balances under all of our material plans. If we were to assume a 1% increase or decrease in the expected long-term rate of return, holding the discount rate and other actuarial assumptions constant, pension expense would decrease or increase, respectively, by approximately ¥741 million.

Discount rates are used to determine the present value of our future pension obligations. The discount rates are reflective of rates available on long-term, high-quality fixed-income debt instruments with maturities that closely correspond to the timing of defined benefit payments. Discount rates are determined annually on the measurement date.

If we were to assume a 1% increase in the discount rate, and keep the expected long-term rate of return and other actuarial assumptions constant, pension expense would decrease by approximately ¥990 million. If we were to assume a 1% decrease in the discount rate, and keep other assumptions constant, pension expense would increase by approximately ¥1,097 million. The decrease to pension expense based on a 1% increase in discount rate differs from the increase to pension expense based on a 1% decrease in discount rate due to a 10% corridor.

While we believe the estimates and assumptions used in our pension accounting are appropriate, differences in actual results or changes in these assumptions or estimates could adversely affect our pension obligations and future expenses.

INCOME TAXES

In preparing the consolidated financial statements, we make estimates relating to income taxes of ORIX and its subsidiaries in each of the jurisdictions in which we operate. The process involves estimating our actual current income tax position together with assessing temporary differences resulting from different treatment of items for income tax reporting and financial reporting purposes. Such differences result in deferred income tax assets and liabilities, which are included within the consolidated balance sheets. We must then assess the likelihood that our deferred income tax assets will be recovered from future taxable income, and to the extent we believe that recovery is not more likely than not, we must establish a valuation allowance. When we establish a valuation allowance or increase this allowance during a period, we must include an expense within the income tax provision in the consolidated statements of income.

Significant management judgments are required in determining our provision for income taxes, current income taxes, deferred income tax assets and liabilities and any valuation allowance recorded against our deferred income tax assets. We file tax returns in Japan and certain foreign tax jurisdictions and recognize the financial statement effects of a tax position taken or expected to be taken in a tax return when it is more likely than not, based on the technical merits, that the position will be sustained upon tax examination, including resolution of any related appeals or

litigation processes, and measure the tax position that meets the recognition threshold at the largest amount of tax benefit that is greater than 50% likely of being realized upon settlement

Table of Contents

with the taxing authority. Management judgments, including the interpretations about the application of the complex tax laws of Japan and certain foreign tax jurisdictions, are required in the process of evaluating tax positions; therefore, these judgments may differ from the actual results. We have recorded a valuation allowance due to uncertainties about our ability to utilize certain deferred income tax assets, primarily certain net operating loss carry forwards, before they expire. Although utilization of the net operating loss carry forwards is not assured, management believes it is more likely than not that all of the deferred income tax assets, net of the valuation allowance, will be realized. The valuation allowance is based on our estimates of taxable income by jurisdiction in which we operate and the period over which our deferred income tax assets will be recoverable. In the event that actual results differ from these estimates or if we adjust these estimates in future periods, we may need to establish additional valuation allowances, which could materially impact the consolidated financial position and results of operations.

DISCUSSION WITH AND REVIEW BY THE AUDIT COMMITTEE

Our management has discussed the development and selection of each critical accounting estimate with our Audit Committee in June 2009.

RESULTS OF OPERATIONS

GUIDE TO OUR CONSOLIDATED STATEMENT OF INCOME

The following discussion and analysis provides information that management believes to be relevant to an understanding of our consolidated financial condition and results of operations. This discussion should be read in conjunction with our consolidated financial statements, including the notes thereto, included in this annual report. See Item 18. Financial Statements.

Our consolidated results of operations are presented in the accompanying financial statements with sub-categorization of revenues and expenses designed to enable the reader to better understand the diversified operating activities contributing to our overall operating performance.

As further described in Item 4. Information on the Company, since we developed the leasing market in Japan in 1964, we have extended the scope of our operations into various types of businesses which have become significant contributors to our group operating results. Our initial leasing business has expanded into the provision of broader financial services, including direct lending to our lessees and other customers. Initial direct lending has broadened into diversified finance such as housing loans, loans secured by real estate, unsecured loans and non-recourse loans. Through our lending experience, we have developed a loan servicing business and a loan securitization business. Through experience gained by our focusing on real estate as collateral for loans, we have also developed our real estate leasing, development and management operations.

Furthermore, we also expanded our business by the addition of securities-related operations, aimed at capital gains and brokerage income. Thereafter, we established and acquired a number of subsidiaries and affiliates in Japan and overseas to expand our operations, such as a trust bank, a life insurance company and a real estate-related company. The Investment Banking Headquarters makes selective equity investments in companies and has been working to meet the needs of companies through recently expanding management buyouts (MBOs), sales of subsidiaries by large corporations, carve-outs and business successions, in addition to investments in rehabilitation companies, which they have continued over the past few years.

This diversified nature of our operations is reflected in our presentation of operating results through the categorization of our revenues and expenses to align with operating activities. Based on those diversified operating activities, we categorize our revenues as direct financing leases, operating leases, interest on loans and investment securities, brokerage commissions and net gains (losses) on investment securities, life insurance

Table of Contents

premiums and related investment income, real estate sales, gains on sales of real estate under operating leases and other operating revenues, and these revenues are summarized into Total Revenues on the consolidated statements of income.

The following is an additional explanation for certain account captions on our consolidated statements of income to supplement the discussion above:

Interest on investment securities is combined with interest on loans because we believe that capital we deploy is fungible and, whether used to provide financing in the form of loans and leases or through investment in debt securities, the decision to deploy the capital is a banking-type operation that shares the common objective of managing earning assets to generate a positive spread over our cost of borrowings.

In addition, securities investment activities were originated by the Company and extended to group companies, such as our U.S. operations. As a result, gains on investment securities have grown and become one of our major revenue sources. We believed that the securities company subsidiary, which was acquired in the middle of the 1980 s, would grow our securities-related operations and contribute to our revenues and earnings. Against this background, we determined to present gains on investment securities under a separate income statement caption, together with brokerage commissions, because we invest in securities as one of our core operations, and both the gains on investment securities and brokerage commissions are derived from our securities operations.

In our diversified operating activities including the corporate rehabilitation business, other operating revenues consist of revenues derived from our various operations which are considered a part of our recurring operating activities, such as integrated facilities management operations, vehicle maintenance and management services, management of golf courses, training facilities and hotels, real estate-related business and commissions for the sale of insurance and other financial products.

Furthermore, our expenses include mainly selling, general and administrative expenses, costs of operating leases, life insurance costs, costs of real estate sales, interest expenses, and other operating expenses.

Expenses reported by us within other operating expenses are directly associated with the sales and revenues separately reported within other operating revenues. Interest expense is based on funds borrowed mainly to purchase equipment for leases, extend loans and invest in securities and real estate operations, which are revenue-generating assets. We also consider the principal part of selling, general and administrative expenses to be directly related to the generation of revenues. Therefore, they have been included within our subtotal of operating expenses constituting our operating income. We similarly view the provision for doubtful receivables and probable loan losses to be directly related to our finance activities and accordingly have included it within our subtotal of operating income. As our principal operations consist of providing financial products and/or finance-related services to our customers, these expenses are directly related to the potential risks and changes in these products and services. See Year Ended March 31, 2009 compared to Year Ended March 31, 2008 and Year Ended March 31, 2008 compared to Year Ended March 31, 2007 .

We have historically reflected write-downs of long-lived assets within our measure of operating income, as related assets, primarily real estate assets, represented significant operating assets under management or development, and accordingly the write-downs were considered to represent an appropriate component of the operating income derived from the related real estate investment activities. Similarly, as we have identified investment in securities to represent an operating component of our financing activities, write-downs of securities are also included within our measure of operating income.

Edgar Filing: ORIX CORP - Form 20-F

We believe that our financial statement presentation, as explained in the paragraphs above, with the expanded presentation of revenues and expenses, aids in the comprehension of our diversified operating activities in Japan and overseas and demonstrates the fair presentation of our consolidated statements of income.

Total Revenues

| | Year ended March 31, | | Change | |
|---|--|-------------|------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| | (In millions of yen, except percentage data) | | | |
| Total revenues: | | | | |
| Direct financing leases | ¥ 78,548 | ¥ 63,766 | ¥ (14,782) | (19) |
| Operating leases | 288,360 | 291,352 | 2,992 | 1 |
| Interest on loans and investment securities | 227,020 | 196,601 | (30,419) | (13) |
| Brokerage commissions and net gains (losses) on investment securities | 23,521 | (12,330) | (35,851) | |
| Life insurance premiums and related investment income | 128,616 | 117,751 | (10,865) | (8) |
| Real estate sales | 88,445 | 71,088 | (17,357) | (20) |
| Gains on sales of real estate under operating leases | 16,756 | 24,346 | 7,590 | 45 |
| Other operating revenues | 300,273 | 323,237 | 22,964 | 8 |
| Total | ¥ 1,151,539 | ¥ 1,075,811 | ¥ (75,728) | (7) |

Total revenues in fiscal 2009 decreased 7% to ¥1,075,811 million compared with the previous fiscal year. Revenues from direct financing leases decreased as a result of adverse economic conditions and our prudent selection of leasing assets, choosing only those assets where we felt the risk and return balance to be appropriate. Interest on loans and investment securities were down due to our more cautious approach for new transactions beginning in the latter half of the previous fiscal year, in addition to decline in revenues from the loan servicing (asset recovery) operations and commission revenues. We recorded a loss on brokerage commissions and net gains (losses) on investment securities compared to a gain in the previous fiscal year, due primarily to decline in revenues as a result of further deterioration in the bond and securities markets in the U.S. and losses in private equity funds since the second quarter of fiscal 2009. Real estate sales were down due to an absence of gains on sales of real estate in Oceania that had been recorded in the previous fiscal year, and the decline in revenues from sales of domestic condominiums.

Table of Contents**Total Expenses**

| | Year ended March 31, | | Change | |
|---|----------------------|--------------------|-----------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Total expenses: | | | | |
| Interest expense | ¥ 105,905 | ¥ 104,541 | ¥ (1,364) | (1) |
| Costs of operating leases | 184,313 | 197,401 | 13,088 | 7 |
| Life insurance costs | 112,869 | 105,899 | (6,970) | (6) |
| Costs of real estate sales | 81,056 | 79,060 | (1,996) | (2) |
| Other operating expenses | 170,476 | 186,531 | 16,055 | 9 |
| Selling, general and administrative expenses | 265,759 | 249,505 | (16,254) | (6) |
| Provision for doubtful receivables and probable loan losses | 33,226 | 77,028 | 43,802 | 132 |
| Write-downs of long-lived assets | 1,742 | 3,782 | 2,040 | 117 |
| Write-downs of securities | 8,290 | 18,632 | 10,342 | 125 |
| Foreign currency transaction loss (gain), net | (87) | (1,307) | (1,220) | |
| Total | ¥ 963,549 | ¥ 1,021,072 | ¥ 57,523 | 6 |

Total expenses in fiscal 2009 increased 6% compared with the previous fiscal year to ¥1,021,072 million. Costs of operating leases were up primarily due to an increase in depreciation and related costs of automobile operating leases and real estate, despite the decrease in overseas expenses due to the foreign exchange effects of an appreciated yen. Provision for doubtful receivables and probable loan losses was up due primarily to increases made for loans to the real estate sector, reflecting the global economic recession. Write-downs of securities were up due primarily to market valuation losses recorded from equity investments both in Japan and overseas.

Operating Income, Income before Income Taxes, Minority Interests in Earnings of Subsidiaries, Discontinued Operations and Extraordinary Gain and Net Income

Operating income in fiscal 2009 decreased 71% to ¥54,739 million due to decreases in brokerage commissions and net gains on investment securities and interest on loans and investment securities, in addition to increases in provision for doubtful receivables and probable loan losses. Income before income taxes, minority interests in earnings of subsidiaries, discontinued operations and extraordinary gain decreased 96% to ¥10,071 million due to equity-method affiliates with net losses and impairment losses resulting from our judgment that the downward stock price movements of equity-method affiliates were other than temporary, in addition to the decrease in operating income.

Net income in fiscal 2009 decreased 87% to ¥21,924 million as a result of the decrease in income before income taxes, minority interests in earnings of subsidiaries, discontinued operations and extraordinary gain.

Basic and diluted earnings per share in fiscal 2009 were ¥246.59 and ¥233.81, respectively, compared to ¥1,860.63 and ¥1,817.81 in fiscal 2008.

Table of Contents**Operating Assets**

| | As of March 31, | | Change | |
|--|--------------------|--------------------|--------------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Operating assets: | | | | |
| Investment in direct financing leases | ¥ 1,098,128 | ¥ 914,444 | ¥ (183,684) | (17) |
| Installment loans | 3,766,310 | 3,304,101 | (462,209) | (12) |
| Investment in operating leases | 1,019,956 | 1,226,624 | 206,668 | 20 |
| Investment in securities | 1,121,784 | 926,140 | (195,644) | (17) |
| Other operating assets | 197,295 | 189,560 | (7,735) | (4) |
| Total operating assets | 7,203,473 | 6,560,869 | (642,604) | (9) |
| Allowance for doubtful receivables on direct financing leases and probable loan losses | (102,007) | (158,544) | (56,537) | 55 |
| Other assets | 1,893,504 | 1,967,411 | 73,907 | 4 |
| Total assets | ¥ 8,994,970 | ¥ 8,369,736 | ¥ (625,234) | (7) |

Investment in operating leases increased compared to March 31, 2008. Conversely, investment in direct financing leases, installment loans, investment in securities and other operating assets decreased due to continued caution toward new transactions. As a result, operating assets were down 9% to ¥6,560,869 million compared to March 31, 2008.

Shareholders' Equity, ROE and ROA

Shareholders' equity declined 8% to ¥1,167,530 million in fiscal 2009 due to continued declines of accumulated other comprehensive income from a loss of ¥19,295 million to a loss of ¥92,384 million, and an increase of ¥17,041 million in treasury stock due to acquisitions of treasury stock.

As a result, the shareholders' equity ratio declined year on year from 14.10% to 13.95%, and ROE and ROA declined from 13.78% to 1.80%, and from 1.97% to 0.25%, respectively.

Details of Operating Results

The following is a discussion of items in the consolidated statements of income, operating assets in the consolidated balance sheets and other selected financial information. See Item 4. Information on the Company Profile of Business by Segment.

| Overseas | 268,989 | 212,190 | (56,799) | (21) |

Table of Contents

Direct financing lease transactions have been decreasing as a result of our selective process for choosing only those assets where the risk and return balance was appropriate in an environment in which new equipment acquisitions have been on the decline in Japan. In the automobile leasing area, the volume of new equipment acquisitions has been shrinking in Japan due to our shift towards operating leases.

Overseas, the overall balance of direct financing leases has been decreasing as a result of our more stringent selection of new transaction in Asia due to the global recession and of a contraction in the leasing business in the U.S.

As a result, revenues from direct financing leases in fiscal 2009 decreased 19% compared to the previous fiscal year to ¥63,766 million. In Japan, revenues from direct financing leases were down 22% to ¥42,099 million compared to ¥53,683 million in the previous fiscal year. Overseas, revenues were down 13% to ¥21,667 million compared to ¥24,865 million in the previous fiscal year.

The average return we earned on direct financing leases in Japan, calculated on the basis of monthly balances, was up slightly at 5.25% in fiscal 2009 compared to 5.12% in fiscal 2008. The average return on overseas direct financing leases, calculated on the basis of monthly balances, decreased slightly to 8.37% in fiscal 2009 from 8.65% in fiscal 2008 due mainly to lower rates in Asia.

New equipment acquisitions related to direct financing leases decreased 37% to ¥364,734 million compared to the previous fiscal year. New equipment acquisitions for operations in Japan decreased 40% in fiscal 2009, as a result of our continuing selective approach to new projects. New equipment acquisitions for overseas operations decreased 30% in fiscal 2009 due primarily to decreases in the U.S. and our selective approach to choosing transactions in Asia.

Investment in direct financing leases as of March 31, 2009 decreased 17% to ¥914,444 million compared to the previous fiscal year. Investments in Japan decreased 15% due to declines in new equipment acquisitions, while overseas decreased 21% due to a contraction in the U.S. and a decrease in new equipment acquisitions in Asia. As a result, the balances of all categories of investment in direct financing leases declined.

As of March 31, 2009, no single lessee represented more than 2% of our total portfolio of direct financing leases. As of March 31, 2009, 77% of our direct financing leases were to lessees in Japan, while 23% were to lessees overseas. 6% of the direct financing leases were to lessees in Malaysia and 5% were to lessees in Indonesia. No other overseas country represented more than 5% of our total portfolio of direct financing leases.

Edgar Filing: ORIX CORP - Form 20-F

Balances for investment in direct financing leases in the tables above do not include lease assets sold in securitizations. However, gains and losses from securitization are included in direct financing lease revenues. During fiscal 2008 and 2009, we sold ¥116,445 million and ¥37,889 million, respectively, of direct financing lease assets (all of which were in Japan) through securitizations that were treated as sales transactions. The securitization of these assets produced gains of ¥1,688 million and losses of ¥365 million for fiscal 2008 and

Table of Contents

2009, respectively, which were included in direct financing lease revenues. The balance of direct financing lease assets treated as sales transactions amounted to ¥303,034 million as of March 31, 2008 and ¥222,945 million as of March 31, 2009. If assets sold in securitizations were included, the total balance of investment in direct financing lease assets would be ¥1,401,162 million as of March 31, 2008 and ¥1,137,389 million as of March 31, 2009. For more information on securitization, see Note 10 of Item 18. Financial Statements.

Asset quality of our owned direct financing leases

| | 2007 | As of March 31, 2008 | 2009 |
|---|--|-------------------------|----------|
| | (In millions of yen, except percentage data) | | |
| 90+ days past-due direct financing leases and allowances for direct financing leases: | | | |
| 90+ days past-due direct financing leases | ¥ 21,149 | ¥ 22,637 | ¥ 27,949 |
| 90+ days past-due direct financing leases as a percentage of the balance of investment in direct financing leases | 1.68% | 2.06% | 3.06% |
| Provisions as a percentage of average balance of investment in direct financing leases (1) | 0.14% | 0.73% | 0.93% |
| Allowance for direct financing leases | ¥ 25,545 | ¥ 25,481 | ¥ 27,540 |
| Allowance for direct financing leases as a percentage of the balance of investment in direct financing leases | 2.03% | 2.32% | 3.01% |

(1) Average balances are calculated on the basis of fiscal quarter-end balances.

The balance of 90+ days past-due direct financing leases increased by ¥5,312 million to ¥27,949 million compared to the previous fiscal year due to the credit crunch. As a result, the ratio of 90+ days past-due direct financing leases increased by 1.00% from the previous fiscal year to 3.06%.

We believe that the ratio of allowance for doubtful receivables as a percentage of the balance of investment in direct financing leases is a reasonable indication that our allowance for doubtful receivables was adequate as of March 31, 2009 for the following reasons:

lease receivables are generally diversified and the amount of realized loss on any particular contract is likely to be relatively small; and

all lease contracts are secured by the collateral of the underlying leased equipment, and we can expect to recover at least a portion of the outstanding lease receivables by selling the underlying equipment.

The ratio of charge-offs as a percentage of the average balance of investment in direct financing leases was 0.52%, 0.66% and 0.70% for fiscal 2007, 2008 and 2009, respectively.

Operating leases

| Overseas | 169,467 | 139,657 | (29,810) | (18) | |

Table of Contents

Revenues from operating leases were flat at ¥291,352 million compared to the previous fiscal year. In Japan, revenues increased 5% to ¥223,656 million compared to ¥212,039 million in the previous fiscal year, due to an increase in real estate properties for rental operations and an increasing trend towards operating leases in the automobile leasing business, despite a decline of revenues from the car rental operations and the precision measuring and other equipment rental operations, in addition to decreased gains of sales of properties due to a decline of sales price in secondhand markets. Overseas, we engage in investment and sales of aircraft leases. Gains on sales of aircraft have declined slightly compared to the previous fiscal year, due to our continuous monitoring and responses to severe market trends. Also, in line with the slowdown in the economy, overseas operating lease revenues were down 11% to ¥67,696 million compared to ¥76,321 million for the previous fiscal year chiefly due to a decline in new automobile lease transactions and the foreign exchange effects of an appreciated yen. In fiscal 2008 and 2009, gains from the disposition of operating lease assets other than real estate were ¥15,217 million and ¥11,426 million, respectively, and are included in operating lease revenues.

New equipment acquisitions related to operating leases decreased 8% to ¥426,715 million compared to the previous fiscal year. New equipment acquisitions by operations in Japan were flat year on year at ¥366,336 million, as the result of a decrease in the purchase of automobiles, offset by an increase in purchases of real estate properties. New equipment acquisitions by overseas operations decreased 39% compared to the previous fiscal year to ¥60,379 million, due to a decrease in the purchase of transportation equipment and real estate properties, in addition to the foreign exchange effects of an appreciated yen.

Investment in operating leases increased 20% year on year to ¥1,226,624 million in fiscal 2009. These investments rose 28% year on year in Japan due primarily to an increase in investments in real estate properties for rental operations, despite a decrease of 18% year on year overseas due to declines of transportation equipment mainly including automobiles, in addition to the foreign exchange effects of an appreciated yen.

| | As of March 31, | | Change | |
|--|--|--------------------|------------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| | (In millions of yen, except percentage data) | | | |
| Investment in operating leases by category: | | | | |
| Transportation equipment | ¥ 383,298 | ¥ 388,028 | ¥ 4,730 | 1 |
| Measuring and information-related equipment | 67,871 | 62,303 | (5,568) | (8) |
| Real estate | 546,586 | 754,345 | 207,759 | 38 |
| Other | 5,653 | 5,490 | (163) | (3) |
| Accrued rental receivables | 16,548 | 16,458 | (90) | (1) |
| Total | ¥ 1,019,956 | ¥ 1,226,624 | ¥ 206,668 | 20 |

Investment in transportation equipment operating leases was flat year on year due to an increase in investment in automobile operating leases in Japan, despite a decrease in new equipment acquisitions in automobile and aircraft leases and the foreign exchange effects of an appreciated yen overseas. Investment in measuring and information-related equipment operating leases fell 8% year on year reflecting decreases in assets both in Japan and overseas. Investment in real estate operating leases rose 38% year on year primarily due to an increase in purchases of real estate properties in Japan which are sources of stable cash flows, reflecting a shift in emphasis from asset turnover to prioritizing income gains.

- (1) All income and losses on installment loans related to our life insurance operations, which are included in installment loans, are reflected in our consolidated statements of income as life insurance premiums and related investment income.

Interest on installment loans decreased 16% compared with the previous fiscal year to ¥172,838 million in fiscal 2009. In Japan, although we have been focusing on loans to corporate clients in the Corporate Financial Services and Investment Banking segments, we adopted a more cautious approach for new transactions beginning in the latter half of fiscal 2008 due to uncertainty in the direction of the economy. As a result, revenues decreased due to the decrease in the amount of installment loans outstanding. Furthermore, revenues from the loan servicing (asset recovery) operations and commission revenues also decreased, and interest on installment loans in Japan decreased 14% compared to the previous fiscal year. Interest on overseas installment loans decreased 20% in fiscal 2009, due primarily to lower market interest rates in the U.S., a reduction in new transactions due to a more cautious approach to new transactions similar to the approach we adopted in Japan, and the foreign exchange effects of an appreciated yen.

The average interest rate earned on loans in Japan, calculated on the basis of monthly balances, decreased to 4.36% in fiscal 2009 compared to 4.69% in fiscal 2008 due primarily to a decrease in revenues from loan servicing operations. The average interest rate earned on overseas loans, calculated on the basis of monthly balances, decreased to 7.72% in fiscal 2009 from 9.49% in fiscal 2008 due primarily to a decline in prevailing market interest rates in the U.S.

New loans added decreased 55% compared with the previous fiscal year to ¥1,055,014 million in fiscal 2009, as we adopted a more cautious approach for new transactions in Japan and overseas, in addition to the foreign exchange effects of an appreciated yen.

The balance of installment loans as of March 31, 2009, decreased 12% to ¥3,304,101 million compared to the balance as of March 31, 2008. The balance of installment loans for borrowers in Japan fell by 13% due to a more cautious approach to new transactions, while the balance of installment loans for overseas customers decreased 6% due primarily to a more cautious approach to new transactions in the U.S., as well as the foreign exchange effects of an appreciated yen.

Edgar Filing: ORIX CORP - Form 20-F

As of March 31, 2009, 90% of our installment loans were to borrowers in Japan, while 8% were to borrowers in the U.S.

Table of Contents

The table below sets forth the balances as of March 31, 2008 and 2009 of our installment loans to borrowers in Japan and overseas, categorized by the type of borrower (i.e., consumer or corporate) in the case of borrowers in Japan. As of March 31, 2009, ¥141,332 million, or 5%, of our portfolio of installment loans to consumer and corporate borrowers in Japan related to our life insurance operations. We reflect income from these loans in our consolidated statements of income as life insurance premiums and related investment income.

| Purchased loans (1) | 192,275 | 148,984 | (43,291) | (23) |
| Total | ¥ 3,766,310 | ¥ 3,304,101 | ¥ (462,209) | (12) |

- (1) Purchased loans represent loans with evidence of deterioration of credit quality since origination and for which it is probable at acquisition that collection of all contractually required payments from the debtors is unlikely in accordance with AICPA Statement of Position (SOP) No. 03-3 (Accounting for Certain Loans or Debt Securities Acquired in a Transfer) and consist mainly of housing loans, loans to real estate companies and commercial, industrial and other companies in Japan.

As of March 31, 2009, ¥668,958 million, or 20%, of all installment loans were outstanding to real estate companies in Japan and overseas. Of this amount, ¥215,971 million, or 7% of all installment loans, was loans individually evaluated for impairment. We calculated an allowance of ¥47,592 million on these impaired loans. As of March 31, 2009, we had installment loans outstanding in the amount of ¥205,551 million, or 6% of all installment loans, to companies in the entertainment industry. Of this amount, ¥34,057 million, or 1% of all installment loans, was loans individually evaluated for impairment. We calculated an allowance of ¥3,592 million on these impaired loans.

The balance of loans to consumer borrowers in Japan as of March 31, 2009 increased by 2% to ¥1,085,272 million compared to the balance as of March 31, 2008, due to an increase in housing loans despite a decrease in margin transaction loans to customers of ORIX Securities that such loan balances are generally subject to stock market volatility. The balance of loans to corporate borrowers in Japan as of March 31, 2009 decreased by 20% to ¥1,748,683 million compared to the balance as of March 31, 2008, due primarily to decreased loans to real estate companies.

Edgar Filing: ORIX CORP - Form 20-F

Balances of installment loans in the tables above do not include assets sold in securitizations. However, the amount of interest on installment loans includes gains from the securitization of installment loans. We sold ¥59,161 million and ¥5,258 million of installment loans through securitizations, which were treated as sales transactions, in fiscal 2008 and 2009, respectively. Gains from the securitization of loans of ¥1,155 million and ¥132 million were included in interest on installment loans in fiscal 2008 and 2009, respectively. The balance of

Table of Contents

installment loans treated as sales transactions amounted to ¥152,208 million and ¥130,565 million as of March 31, 2008 and 2009, respectively. If loans sold in securitizations were included, the total balance of installment loans would be ¥3,918,518 million and ¥3,434,666 million as of March 31, 2008 and 2009, respectively. For more information on securitization, see Note 10 in Item 18. Financial Statements.

Asset quality of our owned installment loans

We classify past-due installment loans into two categories: installment loans individually evaluated for impairment and 90+ days past-due loans not individually evaluated for impairment.

| | 2007 | As of March 31, 2008 | 2009 |
|---|----------------------|-------------------------|-----------|
| | (In millions of yen) | | |
| Loans individually evaluated for impairment: | | | |
| Impaired loans | ¥ 100,589 | ¥ 165,283 | ¥ 449,705 |
| Impaired loans requiring a valuation allowance | 67,934 | 108,921 | 262,145 |
| Valuation allowance (1) | 29,189 | 38,081 | 89,236 |

- (1) The valuation allowance is individually evaluated based on the present value of expected future cash flows, the loans' observable market price or the fair value of the collateral securing the loans if the loans are collateral dependent.

New provision for probable loan losses was ¥13,664 million in fiscal 2008 and ¥55,140 million in fiscal 2009, and charge-off of impaired loans was ¥4,633 million in fiscal 2008 and ¥3,726 million in fiscal 2009. New provision for probable loan losses increased by ¥41,476 million compared to fiscal 2008 due to an increase in impaired corporate loans as a result of the credit crunch. Despite the increase in impaired loans, charge-off of impaired loans decreased by ¥907 million compared to fiscal 2008 because many of the impaired loans were still expected to recover and had not deteriorated to the point of requiring charge-offs as of March 31, 2009. Accordingly, there is a possibility that our charge-offs will increase during the year ending March 31, 2010.

The table below sets forth the outstanding balances of impaired loans by region and type of borrower. Consumer loans in Japan primarily consist of restructured smaller-balance homogeneous loans individually evaluated for impairment. Impaired loans increased in fiscal 2009 due mainly to an increase in impaired corporate loans for real estate companies in Japan due to the tighter credit markets.

| | 2007 | As of March 31, 2008 | 2009 |
|--|----------------------|-------------------------|----------|
| | (In millions of yen) | | |
| Impaired loans: | | | |
| Consumer borrowers in Japan | ¥ 17,878 | ¥ 20,595 | ¥ 23,388 |
| Corporate borrowers in Japan | | | |
| Real estate companies | 12,749 | 37,658 | 215,309 |
| Commercial, industrial and other companies | 48,785 | 80,356 | 181,488 |
| Subtotal | 61,534 | 118,014 | 396,797 |
| Overseas corporate, industrial and other borrowers | 6,412 | 12,080 | 12,870 |
| Purchased loans | 14,765 | 14,594 | 16,650 |

| | | | |
|-------|-----------|-----------|-----------|
| Total | ¥ 100,589 | ¥ 165,283 | ¥ 449,705 |
|-------|-----------|-----------|-----------|

Table of Contents

The table below sets forth information as to past-due loans which are not individually significant and accordingly are evaluated for impairment as a homogeneous group.

| | 2007 | As of March 31, 2008 | 2009 |
|--|--|-------------------------|----------|
| | (In millions of yen, except percentage data) | | |
| 90+ days past-due loans and allowance for installment loans: | | | |
| 90+ days past-due loans not individually evaluated for impairment | ¥ 12,656 | ¥ 15,333 | ¥ 17,860 |
| 90+ days past-due loans not individually evaluated for impairment as a percentage of the balance of installment loans not individually evaluated for impairment | 0.37% | 0.43% | 0.63% |
| Provisions as a percentage of average balance of installment loans (1) | 0.22% | 0.30% | 0.38% |
| Allowance for probable loan losses on installment loans exclusive of those loans individually evaluated for impairment | ¥ 34,774 | ¥ 38,445 | ¥ 41,768 |
| Allowance for probable loan losses on installment loans exclusive of those loans individually evaluated for impairment as a percentage of the balance of installment loans not individually evaluated for impairment | 1.03% | 1.07% | 1.46% |

(1) Average balances are calculated on the basis of fiscal quarter-end balances.

The balance of 90+ days past-due loans not individually evaluated for impairment increased by 16% in fiscal 2009, principally due to increase in 90+ days past-due loans not individually evaluated for impairment in housing loans and in card loans.

| | 2007 | As of March 31, 2008 | 2009 |
|---|----------------------|-------------------------|----------|
| | (In millions of yen) | | |
| 90+ days past-due loans not individually evaluated for impairment: | | | |
| Consumer borrowers in Japan | | | |
| Housing loans | ¥ 10,177 | ¥ 9,425 | ¥ 10,641 |
| Card loans and other | 2,376 | 5,861 | 7,211 |
| Overseas corporate, industrial and other borrowers | 103 | 47 | 8 |
| Total | ¥ 12,656 | ¥ 15,333 | ¥ 17,860 |

We make provisions against losses for these homogenous loans by way of general reserves for installment loans included in the allowance for doubtful receivables. We make allowance for housing loans in Japan after careful evaluation of the value of collateral underlying the loans, past loss experience and any economic conditions that we believe may affect the default rate.

We determine the allowance for our card loans and other items on the basis of past loss experience, general economic conditions and the current portfolio composition.

We believe that the level of the allowance as of March 31, 2009 was adequate because we expect to recover a portion of the outstanding balance for 90+ days past-due loans not individually evaluated for impairment primarily because many of our 90+ days past-due loans are housing loans, which are ordinarily made to a diverse group of individuals who we believe generally have a higher credit rating than the population at-large.

The ratio of charge-offs as a percentage of the average balance of installment loans was 0.22%, 0.16% and 0.27% for fiscal 2007, 2008 and 2009, respectively. The ratio of charge-offs as a percentage of the average balance of installment loans for fiscal 2009 increased compared to that of fiscal 2008 due to an increase in charge-offs of card loans and a decrease in the balance of installment loans.

Table of Contents*Investment securities*

We maintain a sizeable portfolio of various investment securities. Our life insurance operations account for approximately 25% of our total investment in securities as of March 31, 2009, and those mainly consist of investments in yen-denominated and fixed-rate corporate debt securities.

| | As of March 31, 2008 | | |
|-------------------------------|----------------------|----------------------|-------------|
| | Life | Other | Total |
| | insurance | (In millions of yen) | |
| Investment securities: | | | |
| Trading securities | ¥ | ¥ 34,535 | ¥ 34,535 |
| Marketable debt securities | 297,780 | 486,621 | 784,401 |

| Total | ¥ 229,182 | ¥ 696,958 | ¥ 926,140 |

(1) Other securities consist mainly of non-marketable equity securities, preferred capital shares and investment funds.

We present income from investments in separate lines of our consolidated statements of income, depending upon whether the security is held in connection with our life insurance operations.

Interest we earn on interest-earning securities held in connection with operations other than life insurance is reflected in our consolidated statements of income as interest on loans and investment securities. All other non-interest income and losses (other than foreign currency transaction gains or losses) we recognize on securities held in connection with operations other than life insurance are reflected in our consolidated statements of income as brokerage commissions and net gains on investment securities. All income and losses we recognize on securities held in connection with life insurance operations are reflected in our consolidated statements of income as life insurance premiums and related investment income.

Table of Contents

Interest on investment securities other than those held in connection with our life insurance operations in Japan increased 23% to ¥15,559 million in fiscal 2009 due primarily to a higher average balance of available-for-sale debt securities while our overseas income from similar investments decreased 16% to ¥8,204 million in fiscal 2009 primarily due to the foreign exchange effects of an appreciated yen. The average interest rate earned on investment securities in Japan, calculated on a monthly basis, was 2.83% in fiscal 2009 compared to 2.87% in fiscal 2008. The average interest rate earned on overseas investment securities, calculated on a monthly basis, declined to 8.73% in fiscal 2009 compared to 9.76% in fiscal 2008.

New securities added decreased 46% to ¥374,614 million in fiscal 2009 due primarily to the turmoil in financial and capital markets. New securities added in Japan decreased 55% in fiscal 2009. New securities added overseas increased 248% due primarily to increases in the U.S.

The balance of our investment in securities as of March 31, 2009 decreased 17% to ¥926,140 million compared to fiscal 2008. The balance of our investment in securities in Japan decreased 20% due primarily to sales from our life insurance investment portfolio and the overall market declines, while the balance of our investment in securities overseas increased 13% mainly due to newly purchased distressed assets in the U.S.

| | As of March 31, | | Change | |
|---|--------------------|------------------|--------------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Investment in securities by security type: | | | | |
| Trading securities | ¥ 34,535 | ¥ 7,410 | ¥ (27,125) | (79) |
| Available-for-sale securities | 884,777 | 729,273 | (155,504) | (18) |
| Other securities | 202,472 | 189,457 | (13,015) | (6) |
| Total | ¥ 1,121,784 | ¥ 926,140 | ¥ (195,644) | (17) |

Investments in trading securities decreased to ¥7,410 million in fiscal 2009 primarily due to revaluation losses related to the market declines caused by the turmoil in financial and capital markets, as well as the influence of foreign exchange rates, in the U.S. Investments in available-for-sale securities decreased 18% in fiscal 2009 due primarily to lower balances of equity securities, corporate debt securities and specified bonds issued by SPEs. As of March 31, 2009, CMBS and RMBS in available-for-sale securities in the U.S. were ¥72,054 million. Other securities decreased 6% in fiscal 2009 due to a decline in the value of non-marketable equity securities and private equity funds.

The above table does not include assets sold in securitizations. We sold ¥10,851 million of investment securities through securitizations, which were treated as sales transactions in fiscal 2008. Gains from the securitization of investment securities of ¥638 million were included in net gains on investment securities in fiscal 2008. There were no sales of investment securities through securitizations in fiscal 2009. The balance of investment securities treated as sales transactions amounted to ¥46,707 million and ¥45,145 million in fiscal 2008 and 2009, respectively. For more information on securitization, see Note 10 in Item 18. Financial Statements.

For further information on investment in securities, see Note 9 of Item 18. Financial Statements.

Table of Contents**Brokerage commissions and net gains (losses) on investment securities**

All non-interest income and losses (other than foreign currency transaction gains or losses) that we recognize on securities held in connection with operations other than life insurance are reflected in our consolidated statements of income as brokerage commissions and net gains on investment securities.

| | Year ended March 31, | | Change | |
|---|--|-------------------|-------------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| | (In millions of yen, except percentage data) | | | |
| Brokerage commissions and net gains (losses) on investment securities: | | | | |
| Brokerage commissions | ¥ 6,879 | ¥ 5,025 | ¥ (1,854) | ¥ (27) |
| Net gains (losses) on investment securities | 13,301 | (22,088) | (35,389) | |
| Dividends income | 3,341 | 4,733 | 1,392 | 42 |
| Total | ¥ 23,521 | ¥ (12,330) | ¥ (35,851) | |

Brokerage commissions and net gains (losses) on investment securities were losses of ¥12,330 million in fiscal 2009, compared to gains of ¥23,521 million in fiscal 2008. Our brokerage commissions decreased 27% due primarily to a decrease in revenues from our securities brokerage business as a decrease in retail trading transactions in connection with the turmoil of the financial and capital markets. Net gains (losses) on investment securities were losses of ¥22,088 million in fiscal 2009, compared to gains of ¥13,301 million in fiscal 2008, due primarily to losses from CMBS and RMBS, and losses in private equity funds. Dividends income, however, increased 42% to ¥4,733 million in fiscal 2009 compared to fiscal 2008, primarily due to an increase in distributions from real-estate investing SPEs.

As of March 31, 2009, gross unrealized gains on available-for-sale securities, including those held in connection with our life insurance operations, were ¥18,767 million, compared to ¥61,706 million as of March 31, 2008. As of March 31, 2009, gross unrealized losses on available-for-sale securities, including those held in connection with our life insurance operations, were ¥27,490 million, compared to ¥9,222 million as of March 31, 2008. These unrealized gains decreased primarily due to a decline in the domestic securities market in Japan and the deterioration of the credit market in the U.S. as a result of the turmoil in financial and capital markets.

Life insurance premiums and related investment income

We reflect all income and losses (other than provision for doubtful receivables and probable loan losses) that we recognize on securities, installment loans and other investments held in connection with life insurance operations in our consolidated statements of income as life insurance premiums and related investment income.

| | Year ended March 31, | | Change | |
|---|--|-----------|-----------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| | (In millions of yen, except percentage data) | | | |
| Life insurance premiums and related investment income: | | | | |
| Life insurance premiums | ¥ 120,527 | ¥ 115,214 | ¥ (5,313) | (4) |
| Life insurance-related investment income | 8,089 | 2,537 | (5,552) | (69) |

Edgar Filing: ORIX CORP - Form 20-F

| | | | | |
|--------|-----------|-----------|------------|-----|
| Total. | ¥ 128,616 | ¥ 117,751 | ¥ (10,865) | (8) |
|--------|-----------|-----------|------------|-----|

Life insurance premiums and related investment income decreased 8% to ¥117,751 million in fiscal 2009 compared to fiscal 2008. Life insurance premiums decreased 4%, and life insurance-related investment income decreased 69% in fiscal 2009.

Table of Contents

The gross margin ratio increased to 8% in fiscal 2009 compared with 6% in fiscal 2008.

| | As of March 31, | | Change | |
|--|-----------------|-----------|------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Investments by ORIX Life Insurance: | | | | |
| Marketable debt securities | ¥ 297,780 | ¥ 207,703 | ¥ (90,077) | (30) |
| Marketable equity securities | 12,920 | 5,505 | (7,415) | (57) |
| Other securities | 31,179 | 15,974 | (15,205) | (49) |
| Total investment in securities | 341,879 | 229,182 | (112,697) | (33) |
| Installment loans and other investments | 138,866 | 197,356 | 58,490 | 42 |
| Total | ¥ 480,745 | ¥ 426,538 | ¥ (54,207) | (11) |

Investments in securities decreased to ¥229,182 million as the result of fewer acquisitions and declines in the market value of the securities. On the other hand, installment loans and other investments increased to ¥197,356 million mainly due to the acquisition of ¥46,231 million of real estate under operating leases.

| | As of March 31, | | Change | |
|---|-----------------|-----------|-----------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Breakdown of life insurance-related investment income: | | | | |
| Net gains (losses) on investment securities | ¥ 1,342 | ¥ (1,280) | ¥ (2,622) | |
| Interest on loans and investment securities, and others | 6,747 | 3,817 | (2,930) | (43) |
| Total | ¥ 8,089 | ¥ 2,537 | ¥ (5,552) | (69) |

Life insurance-related investments were down 69% compared to the previous fiscal year chiefly due to a decline in investment securities-related operating revenues caused by the deterioration in the markets.

For further information on life insurance operations, see Note 22 of Item 18. Financial Statements.

Real estate sales

| | Year ended March 31, | | Change | |
|--|----------------------|----------|------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Real estate sales: | | | | |
| Real estate sales | ¥ 88,445 | ¥ 71,088 | ¥ (17,357) | (20) |

Edgar Filing: ORIX CORP - Form 20-F

The condominium market continues to stagnate as the real estate market has deteriorated as a result of the financial crisis. Real estate sales were down 20% year on year to ¥71,088 million due to an absence of gains on sales of real estate in Oceania that had been recorded in the previous fiscal year and a decline in the number of condominiums sold to buyers in Japan from 1,931 units in fiscal 2008 to 1,828 units in fiscal 2009.

Gains on sales of real estate under operating leases

| | Year ended March 31, 2008 | 2009 | Amount | Change Percent (%) |
|--|--|----------|---------|-----------------------|
| | (In millions of yen, except percentage data) | | | |
| Gains on sales of real estate under operating leases: | | | | |
| Gains on sales of real estate under operating leases | ¥ 16,756 | ¥ 24,346 | ¥ 7,590 | 45 |

Table of Contents

Gains on sales of real estate under operating leases increased 45% year on year to ¥24,346 million in fiscal 2009 due primarily to the increase in real estate under operating leases that were sold but were not included in discontinued operations. Where we have continuing involvement with the cash flows from the real estate under operating leases which have been disposed of, the gains or losses arising from such disposition are separately disclosed as gains on sales of real estate under operating leases, while if we have no continuing involvement with the cash flows from such disposed real estate properties, the gains or losses are reported as income from discontinued operations. For discussion of accounting policy for discontinued operations, see Note 25 in Item 18. Financial Statements.

Other operations

| | As of and for the year ended March 31, | | Change | |
|--|---|-----------|----------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Other operations: | | | | |
| Other operating revenues | ¥ 300,273 | ¥ 323,237 | ¥ 22,964 | 8 |
| Japan | 236,253 | 270,894 | 34,641 | 15 |
| Overseas. | 64,020 | 52,343 | (11,677) | (18) |
| New assets added | 152,480 | 76,269 | (76,211) | (50) |
| Japan | 152,480 | 76,269 | (76,211) | (50) |
| Overseas | | | | |
| Other operating assets | 197,295 | 189,560 | (7,735) | (4) |
| Japan | 192,628 | 185,872 | (6,756) | (4) |
| Overseas | 4,667 | 3,688 | (979) | (21) |

Other operating revenues increased 8% year on year to ¥323,237 million. In Japan, revenues were up 15% to ¥270,894 million compared to ¥236,253 million in the previous fiscal year due to contributions from the consolidated subsidiary Internet Research Institute, Inc. acquired during the previous fiscal year and increases in revenues associated with real estate management operations, including golf courses and training facilities. Overseas, revenues were down 18% to ¥52,343 million compared to ¥64,020 million from the previous fiscal year, due to reductions in revenues from advisory services in the U.S. and ship-related finance in Asia, which had been recorded in the previous fiscal year, along with the foreign exchange effects of an appreciated yen.

New assets added for other operating transactions were down 50% to ¥76,269 million in fiscal 2009 due to strict controls on the selection of new transactions. Other operating transactions include other operating assets and real estate for sale, such as residential condominiums and commercial real estate.

Other operating assets decreased 4% to ¥189,560 million.

Expenses**Interest expense**

Edgar Filing: ORIX CORP - Form 20-F

Interest expense was flat year on year at ¥104,541 million. In Japan, the debt balance at the end of fiscal 2009 declined compared to the end of fiscal 2008, however the average debt levels for fiscal 2009 were higher than in fiscal 2008. Furthermore, interest expense in Japan increased 12% compared to fiscal 2008 due to increased funding costs resulting from a shift from short-term to long-term debt at higher interest rates in order to manage liquidity risk. Overseas, interest expense was down 26% compared to the fiscal 2008 due to reduced dollar interest rates and the foreign exchange effects of an appreciated yen.

The average interest rate on our short-term and long-term debt in Japan, calculated on the basis of average monthly balances, increased to 1.40% in fiscal 2009, compared to 1.33% in fiscal 2008, due to higher interest

Table of Contents

rates following policy action by the Bank of Japan. The average interest rate on our short-term and long-term overseas debt, calculated on the basis of average monthly balances, decreased to 4.13% in fiscal 2009 from 5.41% in fiscal 2008 reflecting lower interest rates in the U.S. For information regarding interest rate risk, see Item 3. Key Information. Risk Factors

Costs of operating leases

Costs of operating leases were up 7% to ¥197,401 million compared to the previous fiscal year. In Japan, costs of operating leases increased 15% to ¥153,023 million compared to the previous fiscal year chiefly due to an increase in depreciation and related costs of automobile operating leases and real estate. Overseas, due to the foreign exchange effects of an appreciated yen, costs of operating leases decreased 13% to ¥44,378 million compared to the previous fiscal year.

Life insurance costs

Life insurance costs in fiscal 2009 decreased 6% to ¥105,899 million, corresponding to a decrease in life insurance premiums.

Costs of real estate sales

To minimize risk, new land purchases have been suspended since September 2007 and new projects have been rescheduled since the fiscal year ended March 31, 2008.

Costs of real estate sales decreased 2% to ¥79,060 million compared to the previous fiscal year due to costs of real estate in Oceania recorded in the previous fiscal year and the decrease in the number of condominiums sold to buyers in Japan, despite write-downs recorded on some projects under development. We also recorded ¥5,222 million and ¥10,911 million of write-downs for fiscal 2008 and 2009. Costs of real estate sales include the upfront costs associated with advertising and creating model rooms. Margins recorded a loss of ¥7,972 million in fiscal 2009 down from a profit of ¥7,389 million in fiscal 2008 due mainly to the recognition of write-downs and a fall in profitability.

Other operating expenses

Other operating expenses were up 9% year on year to ¥186,531 million resulting from the recognition of expenses from the beginning of the fiscal year from companies in which we invested in the previous fiscal year and correlate with the increase in other operating revenues.

Selling, general and administrative expenses

Edgar Filing: ORIX CORP - Form 20-F

| | Year ended March 31, | | Change | |
|--|----------------------|-----------|------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |

| Total | ¥ 265,759 | ¥ 249,505 | ¥ (16,254) | (6) |

Employee salaries and other personnel expenses account for approximately 60% of selling, general and administrative expenses, and the remaining portion consists of general and administrative expenses such as rent for office spaces, communication expenses and travel expenses. Selling, general and administrative expenses in

Table of Contents

fiscal 2009 decreased 6% year on year, due to the absence of one-off write-downs of intangible assets recorded in the previous fiscal year, despite the recognition of expenses from the beginning of this fiscal year from consolidated subsidiaries in which we invested in the previous fiscal year.

Provision for doubtful receivables and probable loan losses

We make provisions for doubtful receivables and probable loan losses for direct financing leases and installment loans. New provisions for doubtful receivables and probable loan losses in fiscal 2009 increased 132% as compared to the previous year. Provisions for direct financing leases increased 7%. Provisions for loans not individually evaluated for impairment increased 16% due to growth in provisions for card loans in Japan. Provisions for loans individually evaluated for impairment increased 304% due mainly to an increase in provisions for loans to real estate companies, reflecting a recent slowdown in the economy.

(1) Other includes foreign currency translation adjustments and amounts reclassified to discontinued operations.

Write-downs of long-lived assets

In accordance with FASB Statement No. 144 (Accounting for the Impairment or Disposal of Long-Lived Assets), we performed an impairment review for long-lived assets in Japan and overseas such as golf courses, corporate dormitories, office buildings, hotel properties and commercial buildings, and condominiums. Write-downs totaling ¥3,829 million were made in fiscal 2009, an increase of 77% compared to fiscal 2008, which are reflected as write-down of long-lived assets and income from discontinued operations (¥3,782 million of which is reflected as write-down of long-lived assets). ¥3,590 million of write-downs in fiscal 2009 within the write-downs of long-lived assets were associated with

Edgar Filing: ORIX CORP - Form 20-F

five office buildings. Two of the buildings were written down because it was determined that their carrying value exceeded their estimated undiscounted cash flows, while three were written down to fair value when we reclassified them as held and used from held for sale upon our determination that we would not be able to sell the buildings due to the troubled financial condition of the customer.

Table of Contents

In accordance with FASB Statement No. 144, an asset held for use is generally deemed to be impaired if the undiscounted future cash flows estimated to be generated by the asset are expected to be less than its carrying amount, and if its fair value is less than its carrying amount. If an asset is deemed to be impaired, the value of the asset is written down to fair value. The requirements of FASB Statement No. 144 potentially result in large charges being recorded in a given period as a result of relatively smaller changes in estimated future cash flows. An asset is generally not considered to be impaired so long as its estimated future cash flows exceed its carrying amount. However, once the estimated future cash flows are believed to be less than the carrying amount, the asset is written down to estimated fair value (which is in general the appraised value). A write-down to fair value prior to a determination of impairment is not permitted.

Our total investment in long-lived assets as of March 31, 2009 was ¥1,694,348 million. ¥1,464,275 million of long-lived assets were included in business segments in Japan, ¥143,458 million were included in overseas business segments, while the remaining assets mainly consist of office facilities that are regarded as corporate assets. Of the long-lived assets in business segments in Japan, ¥916,551 million were in the Real Estate segment. For a breakdown of long-lived assets by segment, see Note 31 of Item 18. Financial Statements.

Write-downs of securities

Write-downs for fiscal 2009 were in connection with a decline in the securities market. In fiscal 2009, write-downs increased 125% from ¥8,290 million in fiscal 2008 to ¥18,632 million in fiscal 2009. For information regarding the impairment of investment in securities, see Item 5. Operating and Financial Review and Prospects Critical Accounting Policies and Estimates.

Foreign currency transaction loss (gain), net

We recognized a foreign currency transaction net gain in the amount of ¥1,307 million in fiscal 2009. For information on the impact of foreign currency fluctuations, see Item 11. Qualitative and Quantitative Disclosures about Market Risk.

Equity in net income (loss) of affiliates

Equity in net income (loss) of affiliates was a loss of ¥42,937 million down from a profit of ¥48,343 million for the previous fiscal year. The loss was recorded due to the absence in the fiscal year of the equity income recorded in the previous fiscal year as a result of the sale of Korea Life Insurance Co., Ltd. (KLI) in the previous fiscal year and the effects of weaker results from our domestic-based equity method affiliates, mainly DAIKYO INCORPORATED, during the fiscal year. In addition, impairment losses were recorded, since we determined that the downward stock price movements of a number of equity-method affiliates, chiefly The Fuji Fire and Marine Insurance Co., Ltd. (Fuji Fire), were other than temporary. Net income from residential condominiums developed through certain joint ventures in Japan decreased to ¥12,527 million from ¥19,127 million for the previous fiscal year. For discussion of investment in affiliates, see Note 12 of Item 18. Financial Statements.

Gains (losses) on sales of subsidiaries and affiliates and liquidation losses, net

Edgar Filing: ORIX CORP - Form 20-F

Gains (losses) on sales of subsidiaries and affiliates and liquidation losses, net was a loss of ¥1,731 million in fiscal 2009, down from a profit of ¥12,222 million in the previous fiscal year, due chiefly to the losses on our shareholdings in Fuji Fire resulting from the dilution caused by the issuance and sale of shares to a third party, despite gains on sales of ORIX Facilities, as well as the absence of gains on the sales of domestic and Asia-based equity method affiliates (including KLI) involved in the corporate rehabilitation operations which were recorded in the previous fiscal year.

Provision for income taxes

Provision for income taxes in fiscal 2009 consisted of a reversal of ¥1,990 million compared to the provision of ¥98,487 million in fiscal 2008, mainly due to the effects of the 2009 revision of the taxation system.

Table of Contents

In March 2009, the Japanese tax code was revised to reduce the taxes on dividends of foreign subsidiaries by 95%, which resulted in a substantial reduction of our taxes in fiscal 2009. Prior to the 2009 revision, dividends received from foreign subsidiaries were taxed at a rate based on the differences between the Japanese tax rate and applicable income tax rates in the foreign countries. Consequently, deferred tax liabilities related to such additional tax for undistributed earnings of foreign subsidiaries had been recognized except for those earnings designated as indefinitely reinvested. In fiscal 2009, we reversed deferred tax liabilities except for the amount which continued to be taxed under the revised tax code. As part of our capital allocation plans going forward, we made a decision that for certain foreign subsidiaries where we had not recognized deferred tax liabilities we will no longer reinvest undistributed earnings indefinitely. Accordingly, we recognized deferred tax liabilities for the relevant subsidiaries according to the revised tax code in fiscal 2009.

For discussion of income taxes, see Note 16 in Item 18. Financial Statements.

Minority interests in earnings of subsidiaries, net

Minority interests were mainly recorded as a result of the minority interests in earnings of Houlihan Lokey, which is engaged in investment banking including M&A and financial advisory. In fiscal 2009, minority interests decreased 52% year on year to ¥1,873 million.

Discontinued operations

We base disclosure of discontinued operations on FASB Statement No. 144. Under FASB Statement No. 144, the scope of discontinued operations includes operating results of any component of an entity with its own identifiable operations and cash flow and in which operations we will not have significant continuing involvement. Income from discontinued operations, net refers to net income from the sale or disposal by sale of subsidiaries, business units and real estate under operating leases in which we no longer have significant continuing involvement. Discontinued operations, net of applicable tax effect, decreased 48% compared to the previous fiscal year to ¥11,736 million in fiscal 2009 due primarily to lower gains on sales of real estate under operating leases in Japan.

Segment Information

As of April 1, 2008, the ORIX Group implemented changes to its internal organization to reorganize its business into six segments to facilitate strategy formulation, resource allocation and portfolio balance determination at the segment level. The six business segments are: Corporate Financial Services, Maintenance Leasing, Real Estate, Investment Banking, Retail and Overseas Business.

Management believes reorganizing its businesses into these six new segments addresses the significant changes in ORIX Group's operations and lines of business over the past four to five years. Each segment is organized as a large strategic unit that we believe will allow us to maximize our corporate value by identifying and building strategic advantages vis-à-vis anticipated competitors in each area and by helping the ORIX Group obtain a competitive advantage.

Edgar Filing: ORIX CORP - Form 20-F

Financial information about our operating segments reported below is information that is separately available and evaluated regularly by management in deciding how to allocate resources and in assessing performance. We evaluate the performance of segments based on income before income taxes as well as results of discontinued operations, minority interests in earnings of subsidiaries and extraordinary gain, before applicable tax effect. Tax expenses are not included in segment profits.

For a description of segments, see Item 4. Information on the Company Profile of Business by Segment. See Note 31 in Item 18. Financial Statements for additional segment information, a discussion of how we prepare our segment information and the reconciliation of segment totals to consolidated financial statement amounts.

Table of Contents***Corporate Financial Services***

The operating environment has drastically changed since the latter half of the previous fiscal year, a trend that is expected to continue for the foreseeable future. In this fiscal year, financial institutions have not changed their conservative stance toward lending to the real estate sector and as a result, financial conditions in the construction and real estate industries have continued to deteriorate. In collaboration with Risk Management Headquarters, the segment has been scrutinizing the financial and operating conditions of each client, striving to continue maximizing the speed and amount of loan recovery.

Segment revenues were down 2% to ¥137,712 million compared to ¥139,874 million in the previous fiscal year as a result of the decline in revenues in line with decreases in installment loan assets and direct financing lease assets due to the more stringent criteria placed on new transactions. This decline was partially offset by an increase in revenues recorded from the beginning of the fiscal year from consolidated subsidiaries in which we invested in the previous fiscal year.

There were continued increases in provisions for doubtful receivables and probable loan losses for real estate-related loans due to the absence of buyers and to banks refusing to refinance. Therefore, to minimize secondary losses, we realigned the division structure of the segment and set up a specialist real estate-focused loan recovery unit. In addition, impairment losses of goodwill in consolidated subsidiaries and equity-method affiliates were recognized since we determined that the downward stock price movement was other than temporary. As a result, the segment recorded a loss of ¥10,451 million, down from a profit of ¥35,412 million in the previous fiscal year.

Segment assets decreased 21% to ¥1,583,571 million compared to the end of the previous fiscal year due to strict controls on the selection of new transactions resulting in a reduction in installment loans and direct financing lease assets.

Maintenance Leasing

The operating environment for the automobile leasing business continues to be severe due to the swift decline experienced by the automobile industry from the latter half of the fiscal year and due to a falloff in demand from corporate clients as a result of the deteriorating economy. Furthermore, our car rental operations have underperformed due to worsening of consumer sentiment. Similarly, our precision measuring and other equipment rental operations have seen a declining trend in operating results due to weaker demand in the contracting economy.

Segment revenues were flat year on year at ¥235,953 million due to a decrease of revenues from car rental operations and precision measuring and other equipment rental operations as a result of the severe operating environment, despite an increase in client demand for operating leases in automobile operations. Segment profits decreased 31% to ¥25,621 million compared to ¥37,235 million during the previous fiscal year due to increases in expenses related to depreciation and maintenance parts and services, increases in provisions for doubtful receivables and probable loan losses and reductions in gains on sales of used automobiles due to a declining secondary market.

Segment assets were flat year on year at ¥648,314 million compared to March 31, 2008 due to an increase in operating lease assets in the automobile leasing business, which were offset by a decline in direct financing lease assets.

Real Estate

The domestic real estate market has deteriorated as a result of the financial crisis, and from the latter half of the fiscal year our focus has shifted from an emphasis on asset turnover to prioritizing income gains and

Table of Contents

enhancing the property leasing and facility operations businesses that are sources of stable cash flows. Furthermore, the condominium market continues to stagnate; however, reduced taxes on mortgages may stimulate demand.

Gains on sales of real estate under operating leases (including income from discontinued operations) have declined as a result of the present market conditions. Profits from condominium operations have greatly declined due to a fall in profitability and an increase in write-downs on projects under development. Furthermore, 3,038 units were delivered, a decrease from 3,710 units sold in the previous fiscal year, and write-downs of some projects under development were ¥11,560 million in this fiscal year.

As a result, segment revenues were down 6% to ¥270,027 million compared to the previous fiscal year and segment profits were down 39% to ¥50,508 million compared to ¥83,065 million during the previous fiscal year. Segment assets increased 9% to ¥1,175,437 million compared to March 31, 2008 due to increased levels of real estate under operating leases in line with strengthening of the rental property and management operations.

Investment Banking

This segment is facing increasingly severe conditions as its business portfolio is being affected by the tightening of liquidity in the domestic real estate sector and deterioration in the capital and financial markets. In order to maintain asset stability in this environment, there is a need for enhanced risk management and monitoring of existing real estate-related finance transactions as well as companies in which we have invested.

Real estate-related finance business has seen a decline in installment loan levels and revenues due to stricter selection criteria for new transactions. Furthermore, provisions for doubtful receivables and probable loan losses have increased due to the credit crunch. Revenues have also declined in the loan servicing (asset recovery) business, due to the adverse economic environment. In our principal investment operations, there was a decline in equity in net income of affiliates, particularly due to the deterioration in the operating results of domestic equity method affiliates. Furthermore, we recorded impairment losses since we determined that the downward stock price movement of Fuji Fire was other than temporary. Revenues from private equity funds and alternative investments have also significantly decreased.

Under these circumstances, segment revenues decreased 26% to ¥94,645 million compared to the previous fiscal year, and the segment recorded a loss of ¥63,397 million compared to a profit of ¥47,483 million for the previous fiscal year. Segment assets decreased 22% to ¥1,321,491 million compared to March 31, 2008.

Retail

This segment consists of trust and banking services, card loan, life insurance and securities brokerage.

Profits from the card loan business remained flat year on year, as we controlled expenses through cost-cutting programs despite slight increases in provisions for doubtful receivables and probable loan losses from the latter half of the fiscal year. Profits from trust and banking operations declined due to increases in selling, general and administrative expenses from expanded operations, and to an increase in provisions for doubtful

Edgar Filing: ORIX CORP - Form 20-F

receivables and probable loan losses. Commissions from the securities brokerage business declined due to a decrease in retail trading transactions. Operating revenues from the life insurance business decreased significantly due to declines in the market value of the securities. Furthermore, due to increases in provisions for doubtful receivables and probable loan losses on installment loans, profits from the life insurance business declined.

In this fiscal year, we injected ¥25 billion of additional capital into the life insurance business in order to enhance our financial position and maintain stability. Under these circumstances, segment revenues declined 8% to ¥183,307 million compared to the previous fiscal year, and segment profits declined 65% to ¥9,573 million compared to ¥27,463 million during the previous fiscal year.

Table of Contents

Targeting future growth, our trust and banking business has begun to diversify its business by expanding into corporate finance to supplement its mortgage loans to individuals, and has increased its deposit base. As a result, segment assets were up 7% to ¥1,554,006 million compared to March 31, 2008.

Overseas Business

The U.S. market is experiencing a severe credit crunch. In the U.S., where the economic situation remains uncertain, we are continuously striving to limit future losses by maintaining stringent portfolio management while prioritizing investment in stable and profitable assets for new transactions.

The global economic downturn is also severely affecting Asian and Middle Eastern countries. Existing operations will continue to be managed taking into careful consideration the overriding operating environments in the Asian and Middle Eastern regions. Additionally, in collaboration with our long-term local business partners, we will cautiously look for new revenue-generating opportunities centered on investments in distressed assets.

Segment profits declined due to expansion of losses from investments in high yield bonds, mortgage backed securities and equity caused by deterioration in the bond and equity markets in the U.S., a decline in installment loan revenues caused by the foreign exchange effects of an appreciated yen combined with a lowering of market interest rates and decreases in gains on sales of ship-related revenues in Asia. The segment also recorded a decline in profits due to the absence of equity in net income of affiliates from KLI, which had substantially contributed to profits during the previous fiscal year.

Under these circumstances, segment revenues decreased 23% to ¥167,635 million from ¥218,227 million in the previous fiscal year, and segment profits decreased 65% to ¥20,066 million compared to ¥57,862 million in the previous fiscal year. Segment assets were down 8% year on year to ¥949,852 million.

| Other operating revenues | 267,901 | 300,273 | 32,372 | 12 |
| Total | ¥ 1,122,450 | ¥ 1,151,539 | ¥ 29,089 | 3 |

Total revenues in fiscal 2008 increased 3% to ¥1,151,539 million compared with the previous fiscal year. Revenues from direct financing leases decreased as a result of our selective process for seeking quality operating assets (assets in which risk and return are appropriately balanced). Brokerage commissions and net gains (losses) on investment securities decreased due primarily to the absence of a one-time gain on the sale of a portion of our shares in Aozora Bank Ltd. recorded in the previous fiscal year.

On the other hand, revenues from operating leases increased compared to the previous fiscal year due to an expansion in automobile, real estate, and precision measuring and other equipment rental operations. Interest on loans and investment securities was also up due to an increase in loans to corporate customers including non-recourse loans.

Total Expenses

| | Year ended March 31, | | Change | |
|---|----------------------|------------------|------------------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Total expenses: | | | | |
| Interest expense | ¥ 80,737 | ¥ 105,905 | ¥ 25,168 | 31 |
| Costs of operating leases | 161,114 | 184,313 | 23,199 | 14 |
| Life insurance costs | 115,565 | 112,869 | (2,696) | (2) |
| Costs of real estate sales | 73,999 | 81,056 | 7,057 | 10 |
| Other operating expenses | 140,597 | 170,476 | 29,879 | 21 |
| Selling, general and administrative expenses | 248,482 | 265,759 | 17,277 | 7 |
| Provision for doubtful receivables and probable loan losses | 13,805 | 33,226 | 19,421 | 141 |
| Write-downs of long-lived assets | 1,027 | 1,742 | 715 | 70 |
| Write-downs of securities | 5,592 | 8,290 | 2,698 | 48 |
| Foreign currency transaction loss (gain), net | 467 | (87) | (554) | |
| Total | ¥ 841,385 | ¥ 963,549 | ¥ 122,164 | 15 |

Edgar Filing: ORIX CORP - Form 20-F

Total expenses in fiscal 2008 increased 15% to ¥963,549 million compared with the previous fiscal year. Interest expense increased due to higher interest rates as well as higher average debt levels. Costs of operating leases were up due primarily to an increase in the average balance of investments in operating leases. Provision for doubtful receivables and probable loan losses increased, reflecting a recent slowdown in the economy, and due in addition to some reversals in the previous fiscal year and an increase in installment loans. Write-downs of securities were higher primarily in connection with a decline in the domestic securities market in Japan.

Table of Contents***Operating Income, Income before Income Taxes, Minority Interests in Earnings of Subsidiaries, Discontinued Operations and Extraordinary Gain and Net Income***

Operating income in fiscal 2008 decreased 33% to ¥187,990 million due primarily to increases in interest expense, selling, general and administrative expenses, and provision for doubtful receivables and probable loan losses and decreases in revenues from direct financing leases and brokerage commissions and net gains on investment securities. Income before income taxes, minority interests in earnings of subsidiaries, discontinued operations and extraordinary gain decreased 21% to ¥248,555 million due primarily to the decrease in operating income.

Net income in fiscal 2008 decreased 14% to ¥169,597 million as a result of the decrease in income before income taxes, minority interests in earnings of subsidiaries, discontinued operations and extraordinary gain.

Basic and diluted earnings per share in fiscal 2008 were ¥1,860.63 and ¥1,817.81, respectively, compared to ¥2,177.10 and ¥2,100.93 in fiscal 2007.

Operating Assets

| | As of March 31, | | Change | |
|--|--|--------------------|------------------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| | (In millions of yen, except percentage data) | | | |
| Operating assets: | | | | |
| Investment in direct financing leases | ¥ 1,258,404 | ¥ 1,098,128 | ¥ (160,276) | (13) |
| Installment loans | 3,490,326 | 3,766,310 | 275,984 | 8 |
| Investment in operating leases | 862,049 | 1,019,956 | 157,907 | 18 |
| Investment in securities | 875,581 | 1,121,784 | 246,203 | 28 |
| Other operating assets | 152,106 | 197,295 | 45,189 | 30 |
| Total operating assets | 6,638,466 | 7,203,473 | 565,007 | 9 |
| Allowance for doubtful receivables on direct financing leases and probable loan losses | (89,508) | (102,007) | (12,499) | 14 |
| Other assets | 1,658,229 | 1,893,504 | 235,275 | 14 |
| Total assets | ¥ 8,207,187 | ¥ 8,994,970 | ¥ 787,783 | 10 |

Operating assets increased 9% to ¥7,203,473 million in fiscal 2008. As a result of our continuing selective process in accumulating quality operating assets (assets with appropriate risk and return), installment loans, investment in operating leases, investment in securities and other operating assets increased in fiscal 2008, while investment in direct financing leases decreased.

Shareholders Equity, ROE and ROA

Edgar Filing: ORIX CORP - Form 20-F

Shareholders' equity grew 6% to ¥1,267,917 million in fiscal 2008 due to an increase in retained earnings from ¥921,823 million to ¥1,081,219 million, and an increase of ¥19,109 million in common stock and additional paid-in capital from the conversion of convertible bonds and a share swap merger.

Since total assets grew 10% compared with the end of fiscal 2007, the shareholders' equity ratio declined from 14.55% to 14.10%. A decrease in net income resulted in declines of ROE and ROA, from 18.30% to 13.78% and from 2.54% to 1.97%, respectively.

Table of Contents**Details of Operating Results**

The following is a discussion of items in the consolidated statements of income, operating assets in the consolidated balance sheets and other selected financial information. See Item 4. Information on the Company Profile of Business by Segment.

Revenues, New Business Volumes and Operating Assets**Direct financing leases**

| | As of and for the year ended March 31, | | Amount | Change | |

| Direct financing lease revenues | ¥ 90,272 | ¥ 78,548 | ¥ (11,724) | | (13) |
| Japan | 62,442 | 53,683 | (8,759) | | (14) |
| Overseas | 27,830 | 24,865 | (2,965) | | (11) |
| New equipment acquisitions | 636,723 | 574,859 | (61,864) | | (10) |
| Japan | 501,699 | 390,377 | (111,322) | | (22) |
| Overseas | 135,024 | 184,482 | 49,458 | | 37 |
| Investment in direct financing leases | 1,258,404 | 1,098,128 | (160,276) | | (13) |
| Japan | 966,907 | 829,139 | (137,768) | | (14) |
| Overseas | 291,497 | 268,989 | (22,508) | | (8) |

Direct financing lease transactions have been on a decreasing trend as a result of our selective process for seeking quality operating assets (assets in which risk and return are appropriately balanced) in an environment for the Japanese leasing industry in which competition has become more intense and new equipment acquisitions have been on the decline. Furthermore, the worsening business conditions of small- to medium-sized enterprises in this fiscal year have also contributed to this decrease, with a particular decline in small-scale leases. In the automobile leasing area, the volume of new equipment acquisitions has been shrinking in Japan due to increasing trend towards operating leases.

The overall overseas balance in direct financing leases is decreasing, due to a contraction in the leasing business in the U.S. and to the effect of foreign exchange rates despite an expansion of the automobile leasing business in Asia.

Revenues from direct financing leases in fiscal 2008 decreased 13% to ¥78,548 million compared to the previous fiscal year. In Japan, revenues from direct financing leases were down 14% to ¥53,683 million compared to ¥62,442 million in the previous fiscal year due to a lower level of operating assets resulting from securitizations made in the latter half of the previous fiscal year and our prudent selectiveness of new projects, in addition to decreases in revenues from cancellations and revenues from sales of direct financing lease assets and a decrease in gains from securitizations. Overseas, revenues were down 11% to ¥24,865 million compared to ¥27,830 million in the previous fiscal year due to the lower level of operating assets, especially in the U.S.

Edgar Filing: ORIX CORP - Form 20-F

The average return we earned on direct financing leases in Japan, calculated on the basis of monthly balances, was almost the same level at 5.12% in fiscal 2008 compared to 5.05% in fiscal 2007. The average return on overseas direct financing leases, calculated on the basis of monthly balances, decreased to 8.65% in fiscal 2008 from 9.43% in fiscal 2007 due mainly to the lower rates in Asia.

New equipment acquisitions related to direct financing leases decreased 10% to ¥574,859 million compared to the previous fiscal year. New equipment acquisitions by operations in Japan decreased 22% in fiscal 2008 as a result of our continuing selective approach to new projects. New equipment acquisitions by overseas operations increased 37% in fiscal 2008 due primarily to an increase in Asia, Oceania and Europe.

Table of Contents

Investment in direct financing leases as of March 31, 2008 decreased 13% to ¥1,098,128 million compared to the previous fiscal year. Investments in Japan decreased 14% due to declines in new equipment acquisitions while investments overseas decreased 8% due to a contraction in the U.S.

As of March 31, 2008, no single lessee represented more than 3% of our total portfolio of direct financing leases. As of March 31, 2008, 76% of our direct financing leases were to lessees in Japan, while 24% were to lessees overseas with 6% of the direct financing leases to lessees in Malaysia and 5% to lessees in Indonesia. No other overseas country represented more than 5% of our total portfolio of direct financing leases.

| | As of March 31, | | Change | |
|---|--------------------|--------------------|--------------------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Investment in direct financing leases by category: | | | | |
| Information-related and office equipment | ¥ 171,389 | ¥ 130,075 | ¥ (41,314) | (24) |
| Industrial equipment | 189,319 | 169,952 | (19,367) | (10) |
| Commercial services equipment | 147,436 | 115,675 | (31,761) | (22) |
| Transportation equipment | 465,923 | 425,694 | (40,229) | (9) |
| Other equipment | 284,337 | 256,732 | (27,605) | (10) |
| Total | ¥ 1,258,404 | ¥ 1,098,128 | ¥ (160,276) | (13) |

Investment in information-related and office equipment, industrial equipment, commercial services equipment and transportation equipment decreased 24%, 10%, 22% and 9%, respectively, due to declines in Japan and overseas. Investment in other equipment decreased 10% due primarily to a decline in Japan.

Balances for investment in direct financing leases in the tables above do not include lease assets sold in securitizations. However, gains from securitization are included in direct financing lease revenues. During fiscal 2007 and 2008, we sold ¥167,567 million and ¥116,445 million, respectively, of direct financing lease assets (all of which were in Japan) through securitizations that were treated as sales transactions. Gains from the securitization of these assets of ¥4,237 million and ¥1,688 million were included in direct financing lease revenues for fiscal 2007 and 2008, respectively. The balance of direct financing lease assets treated as sales transactions amounted to ¥289,694 million as of March 31, 2007 and ¥303,034 million as of March 31, 2008. If assets sold in securitizations were included, the total balance of investment in direct financing lease assets would be ¥1,548,098 million as of March 31, 2007 and ¥1,401,162 million as of March 31, 2008. For more information on securitization, see Note 10 of Item 18. Financial Statements.

(1) Average balances are calculated on the basis of fiscal quarter-end balances.

Table of Contents

The asset quality of investment in direct financing leases improved in fiscal 2006 through fiscal 2007 in tandem with the recovery of the economy, with the ratio of 90+ days past-due direct financing leases staying below 2%. At the same time, the ratio of provisions for doubtful receivables for the same 3-year period declined to 0.4% or less. Nevertheless, the downturn in housing investment, increases in energy and materials costs and the effect of the strong yen in this fiscal year clearly indicate a decelerating trend in the Japanese economy, and signs of an impending adjustment became stronger. Small- to medium-sized enterprises, which are our main customers felt the effects of these factors, and there was an overall increase in the amount of past-due direct financing leases and the provisions for doubtful receivables.

The increase to a ratio of 2.06% in 90+ days past-due direct financing leases as of March 31, 2008 occurred primarily due to an increase in 90+ days past-due direct financing leases in Japan reflecting a slowdown in the economy despite a decrease in 90+ days past-due direct financing leases overseas.

We determined that the ratio of allowance for doubtful receivables as a percentage of the balance of investment in direct financing leases was a reasonable indication that our allowance for doubtful receivables was adequate as of March 31, 2008 for the following reasons:

lease receivables are generally diversified and the amount of realized loss on any particular contract is likely to be relatively small; and

all lease contracts are collateralized by the underlying leased equipment, and we can expect to recover at least a portion of the outstanding lease receivables by selling the underlying equipment.

The ratio of charge-offs as a percentage of the average balance of investment in direct financing leases was 0.75%, 0.52% and 0.66% for fiscal 2006, 2007 and 2008, respectively.

We have made efforts to expand operating leases in the automobile and real estate businesses in recent years, which resulted in an increase in operating lease transactions. While the number of lease vehicles handled in the automobile business increased, the trend was a particularly strong in operating leases. This increase was largely because the used vehicle market was fairly stable and it was easy for lessors to understand the residual value risks involved with buying versus leasing, and there had also been an increase in demand for operating leases from lessees rather than direct financing leases. In the area of real estate, we had been developing and investing in rental properties, focusing on offices and

Edgar Filing: ORIX CORP - Form 20-F

distribution warehouses. We deployed a business model whereby we took profits on sales after stabilizing cash flows during a fixed period, and accumulated assets through the fiscal year. We also had increased revenues and assets in the rental business of measuring and information-related equipment in tandem with the resumption of rental demand. We have made continuous efforts in the automobile leasing business overseas in recent years. We also engaged in investment and sales in vessel and aircraft leases, in response to the changing market conditions.

Table of Contents

Revenues from operating leases increased 16% to ¥288,360 million compared to the previous fiscal year. In Japan, revenues were up 13% to ¥212,039 million compared to ¥187,172 million in the previous fiscal year due to an expansion in automobile, real estate operating leases and precision measuring and other equipment rental operations. Overseas, revenues were up 23% to ¥76,321 million compared to ¥61,919 million in the previous fiscal year due mainly to an expansion of automobile operating leases. In fiscal 2007 and 2008, gains from the disposition of operating lease assets other than real estate were ¥12,105 million and ¥15,217 million, respectively, and are included in operating lease revenues.

New equipment acquisitions of operating leases increased 34% year on year to ¥465,909 million in fiscal 2008 due primarily to an increase in the purchase of rental purpose real estate and transportation equipment, mainly including automobiles in Japan and overseas.

Investment in operating leases increased 18% year on year to ¥1,019,956 million in fiscal 2008. These investments rose 23% year on year in Japan due primarily to an increase in investments in real estate properties for rental operations and transportation equipment, despite a decrease of 2% year on year overseas influenced by changes in foreign exchange rates.

| | As of March 31, | | Change | |
|--|------------------|--------------------|------------------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Investment in operating leases by category: | | | | |
| Transportation equipment | ¥ 340,850 | ¥ 383,298 | ¥ 42,448 | 12 |
| Measuring and information-related equipment | 61,463 | 67,871 | 6,408 | 10 |
| Real estate | 433,648 | 546,586 | 112,938 | 26 |
| Other | 6,434 | 5,653 | (781) | (12) |

- (1) All income and losses on installment loans related to our life insurance operations, which are included in installment loans, are reflected in our consolidated statements of income as life insurance premiums and related investment income.

Table of Contents

In recent years we have been making efforts in the Corporate Financial Service segment, Investment Banking segment and the U.S. in loans for corporate customers, but given the increased lack of clarity in forecasts for the economy beginning from the latter half of fiscal 2008, we have adopted a more cautious approach.

Interest on installment loans increased 12% compared with the previous fiscal year to ¥204,577 million in fiscal 2008. Revenues from interest on installment loans in Japan increased 13% due primarily to an expansion of loans to corporate customers including non-recourse loans. Interest on overseas installment loans increased 8% in fiscal 2008 primarily as a result of the contribution from loans to corporate customers in the U.S.

The average interest rate earned on loans in Japan, calculated on the basis of monthly balances, decreased to 4.69% in fiscal 2008 compared to 4.71% in fiscal 2007 due primarily to a decrease in revenues from loan servicing operations. The average interest rate earned on overseas loans, calculated on the basis of monthly balances, decreased to 9.49% in fiscal 2008 from 10.50% in fiscal 2007 due primarily to a fall in market interest rates prevailing in the U.S.

New loans added increased 5% compared with the previous fiscal year to ¥2,331,331 million in fiscal 2008 due primarily to an increase in non-recourse loans and loans to corporate customers in Japan.

The balance of installment loans as of March 31, 2008 increased 8% to ¥3,766,310 million compared to the balance as of March 31, 2007. The balance of installment loans for borrowers in Japan rose by 8% due primarily to increased non-recourse loans and loans to corporate borrowers and the balance of installment loans for overseas customers increased 4% due primarily to increased loans to corporate customers in the U.S.

As of March 31, 2008, 90% of our installment loans were to borrowers in Japan, while 8% were to borrowers in the U.S.

The table below sets forth the balances as of March 31, 2007 and 2008 of our installment loans to borrowers in Japan and overseas, categorized by the type of borrower (i.e., consumer or corporate) in the case of borrowers in Japan. As of March 31, 2008, ¥121,884 million, or 4%, of our portfolio of installment loans to consumer and corporate borrowers in Japan related to our life insurance operations. We reflected income from these loans in our consolidated statements of income as life insurance premiums and related investment income.

Table of Contents

- (1) Purchased loans represent loans with evidence of deterioration of credit quality since origination and for which it is probable at acquisition that collection of all contractually required payments from the debtors is unlikely in accordance with AICPA Statement of Position (SOP) No. 03-3 (Accounting for Certain Loans or Debt Securities Acquired in a Transfer) and consist mainly of housing loans, loans to real estate companies and commercial, industrial and other companies in Japan.

As of March 31, 2008, ¥867,994 million, or 23%, of all installment loans were outstanding to real estate companies. Of this amount, ¥38,850 million, or 1% of all installment loans, was loans individually evaluated for impairment. We calculated an allowance of ¥5,808 million on these impaired loans. As of March 31, 2008, we had installment loans outstanding in the amount of ¥257,687 million, or 7% of all installment loans, to companies in the entertainment industry. Of this amount, ¥30,090 million, or 1% of all installment loans, was loans individually evaluated for impairment. We calculated an allowance of ¥4,782 million on these impaired loans.

The balance of loans to consumer borrowers in Japan as of March 31, 2008 increased by 1% to ¥1,069,182 million compared to the balance as of March 31, 2007 due to an increase in housing loans despite a decrease in margin transaction loans to customers of ORIX Securities, that such loan balances are generally dependent to stock market volatility. The balance of loans to corporate borrowers in Japan as of March 31, 2008 increased by 12% to ¥2,174,339 million compared to the balance as of March 31, 2007 due primarily to increased demand from real estate companies, especially in the first half of fiscal 2008.

Balances of installment loans in the tables above do not include assets sold in securitizations. However, the amount of interest on installment loans includes gains from the securitization of installment loans. We sold ¥88,150 million and ¥59,161 million of installment loans through securitizations, which were treated as sales transactions in fiscal 2007 and 2008, respectively. Gains from the securitization of loans of ¥3,146 million and ¥1,155 million were included in interest on installment loans in fiscal 2007 and 2008, respectively. The balance of installment loans treated as sales transactions amounted to ¥154,357 million and ¥152,208 million as of March 31, 2007 and 2008, respectively. If loans sold in securitizations were included, the total balance of installment loans would be ¥3,644,683 million and ¥3,918,518 million as of March 31, 2007 and 2008, respectively. For more information on securitization, see Note 10 in Item 18. Financial Statements.

Asset quality of our owned installment loans

We classify past-due installment loans into two categories: installment loans individually evaluated for impairment and 90+ days past-due loans not individually evaluated for impairment.

| | 2006 | As of March 31, 2007 | 2008 |
|---|----------------------|-------------------------|-----------|
| | (In millions of yen) | | |
| Loans individually evaluated for impairment: | | | |
| Impaired loans | ¥ 83,658 | ¥ 100,589 | ¥ 165,283 |
| Impaired loans requiring a valuation allowance | 66,543 | 67,934 | 108,921 |
| Valuation allowance (1) | 31,056 | 29,189 | 38,081 |

- (1) The valuation allowance is individually evaluated based on the present value of expected future cash flows, the loan's observable market price or the fair value of the collateral securing the loans if the loans are collateral dependent.

Edgar Filing: ORIX CORP - Form 20-F

New provision for probable loan losses was ¥4,942 million in fiscal 2007 and ¥13,664 million in fiscal 2008, and charge-off of impaired loans was ¥7,222 million in fiscal 2007 and ¥4,633 million in fiscal 2008. New provision for probable loan losses increased by ¥8,722 million compared to fiscal 2007 due to an increase in impaired corporate loans reflecting a slowdown in the economy. Despite the increase in impaired loans, charge-off of impaired loans decreased by ¥2,589 million compared to fiscal 2007 because many of the impaired loans were still expected to recover and had not deteriorated to the point of requiring charge-offs as of March 31, 2008.

Table of Contents

The table below sets forth the outstanding balances of impaired loans by region and type of borrower. Consumer loans in Japan primarily consist of restructured smaller-balance homogeneous loans individually evaluated for impairment. Impaired loans increased in fiscal 2008 due mainly to an increase in impaired corporate loans for real estate companies and commercial, industrial and other companies in Japan reflecting a slowdown in the economy.

| | 2006 | As of March 31, 2007 | 2008 |
|--|----------------------|-------------------------|-----------|
| | (In millions of yen) | | |
| Impaired loans: | | | |
| Consumer borrowers in Japan | ¥ 11,474 | ¥ 17,878 | ¥ 20,595 |
| Corporate borrowers in Japan | | | |
| Real estate companies | 13,684 | 12,749 | 37,658 |
| Commercial, industrial and other companies | 37,234 | 48,785 | 80,356 |
| Subtotal | 50,918 | 61,534 | 118,014 |
| Overseas corporate, industrial and other borrowers | 4,766 | 6,412 | 12,080 |
| Purchased loans | 16,500 | 14,765 | 14,594 |
| Total | ¥ 83,658 | ¥ 100,589 | ¥ 165,283 |

The table below sets forth information as to past-due loans which are not individually significant and accordingly are evaluated for impairment as a homogeneous group.

| | 2006 | As of March 31, 2007 | 2008 |
|--|--|-------------------------|----------|
| | (In millions of yen, except percentage data) | | |
| 90+ days past-due loans and allowance for installment loans: | | | |
| 90+ days past-due loans not individually evaluated for impairment | ¥ 16,455 | ¥ 12,656 | ¥ 15,333 |
| 90+ days past-due loans not individually evaluated for impairment as a percentage of the balance of installment loans not individually evaluated for impairment | 0.58% | 0.37% | 0.43% |
| Provisions as a percentage of average balance of installment loans (1) | 0.11% | 0.22% | 0.30% |
| Allowance for probable loan losses on installment loans exclusive of those loans individually evaluated for impairment | ¥ 35,223 | ¥ 34,774 | ¥ 38,445 |
| Allowance for probable loan losses on installment loans exclusive of those loans individually evaluated for impairment as a percentage of the balance of installment loans not individually evaluated for impairment | 1.24% | 1.03% | 1.07% |

(1) Average balances are calculated on the basis of fiscal quarter-end balances.

The balance of 90+ days past-due loans not individually evaluated for impairment increased by 21% in fiscal 2008, principally due to increase in 90+ days past-due loans not individually evaluated for impairment in card loans.

| | 2006 | As of March 31, 2007 | 2008 |
|---|----------------------|-------------------------|------|
| | (In millions of yen) | | |
| 90+ days past-due loans not individually evaluated for impairment: | | | |

Edgar Filing: ORIX CORP - Form 20-F

| | | | |
|--|----------|----------|----------|
| Consumer borrowers in Japan | | | |
| Housing loans | ¥ 13,221 | ¥ 10,177 | ¥ 9,425 |
| Card loans and other | 2,742 | 2,376 | 5,861 |
| Overseas corporate, industrial and other borrowers | 492 | 103 | 47 |
| Total | ¥ 16,455 | ¥ 12,656 | ¥ 15,333 |

Table of Contents

We make provisions against losses for these homogenous loans by way of general reserves for installment loans included in the allowance for doubtful receivables. We make allowance for housing loans in Japan after careful evaluation of the value of collateral underlying the loans, past loss experience and any economic conditions that we believe may affect the default rate.

We determine the allowance for our card loans and other items on the basis of past loss experience, general economic conditions and the current portfolio composition.

We believed that the level of the allowance as of March 31, 2008 was adequate because we expected to recover a portion of the outstanding balance for 90+ days past-due loans not individually evaluated for impairment primarily because most 90+ days past-due loans were housing loans, which are ordinarily made to a diverse group of individuals who we believe generally have a higher credit rating than the population at-large.

The ratio of charge-offs as a percentage of the average balance of installment loans was 0.48%, 0.22% and 0.16% for fiscal 2006, 2007 and 2008, respectively. The ratio of charge-offs as a percentage of the average balance of installment loans went down for fiscal 2008 compared to that of fiscal 2007 due to a decrease in charge-offs including sales of housing loans and an increase in the balance of installment loans.

Investment securities

We maintain a sizeable portfolio of various investment securities. Our life insurance operations accounted for approximately 30% of our total investment in securities as of March 31, 2008, and those mainly consisted of investments in yen-denominated and fixed-rate corporate debt securities.

| | As of March 31, 2007 | | |
|-------------------------------|----------------------|-----------|----------|
| | Life insurance | Other | Total |
| | (In millions of yen) | | |
| Investment securities: | | | |

| (In millions of yen, except percentage data) | | | | |
| Investment securities: | | | | |
| Interest on investment securities | ¥ 19,559 | ¥ 22,443 | ¥ 2,884 | 15 |
| Japan | 4,406 | 12,685 | 8,279 | 188 |
| Overseas | 15,153 | 9,758 | (5,395) | (36) |
| New securities added | 331,055 | 688,148 | 357,093 | 108 |
| Japan | 314,678 | 666,296 | 351,618 | 112 |
| Overseas | 16,377 | 21,852 | 5,475 | 33 |
| Investment in securities | 875,581 | 1,121,784 | 246,203 | 28 |
| Japan | 753,078 | 1,021,537 | 268,459 | 36 |
| Overseas | 122,503 | 100,247 | (22,256) | (18) |

Interest on investment securities other than those held in connection with our life insurance operations in Japan increased 188% to ¥12,685 million in fiscal 2008 due primarily to a higher balance of securities and overseas decreased 36% to ¥9,758 million in fiscal 2008 due primarily to a decrease in contributions from interest on investment securities recorded in the previous fiscal year in the U.S. The average interest rate earned on investment securities in Japan, calculated on a monthly basis, was 2.87% in fiscal 2008 compared to 2.43% in fiscal 2007 due primarily to increase of investments in specified bonds issued by SPEs secured by commercial mortgages. The average interest rate earned on overseas investment securities, calculated on the basis of monthly balances, was almost flat at 9.76% in fiscal 2008 compared to 9.66% in fiscal 2007.

New securities added increased 108% to ¥688,148 million in fiscal 2008. New securities added in Japan increased 112% in fiscal 2008 due primarily to increased investment in the specified bonds issued by SPEs in Japan. New securities added overseas increased 33% due primarily to increases in the U.S.

The balance of our investment in securities as of March 31, 2008 increased 28% to ¥1,121,784 million compared to fiscal 2007. The balance of our investment in securities in Japan increased 36% due primarily to a higher balance of specified bonds issued by SPEs in Japan, and the balance of our investment in securities overseas decreased 18% due primarily to market valuation losses on trading securities, as well as the influence of foreign exchange rates in the U.S.

| | As of March 31, | | Amount | Change Percent (%) |
|---|-----------------|-------------|------------|-----------------------|
| | 2007 | 2008 | | |
| (In millions of yen, except percentage data) | | | | |
| Investment in securities by security type: | | | | |
| Trading securities | ¥ 45,912 | ¥ 34,535 | ¥ (11,377) | (25) |
| Available-for-sale securities | 649,897 | 884,777 | 234,880 | 36 |
| Other securities | 179,772 | 202,472 | 22,700 | 13 |
| Total | ¥ 875,581 | ¥ 1,121,784 | ¥ 246,203 | 28 |

Edgar Filing: ORIX CORP - Form 20-F

Investments in trading securities decreased 25% in fiscal 2008 due primarily to write-downs in high-yield bond investments which was attributable to declines in market values for credit instruments, as well as the influence of foreign exchange rates in the U.S. Investments in available-for-sale securities increased 36% in fiscal 2008 due primarily to a higher balance of the specified bonds issued by SPEs. As of March 31, 2008, our portfolio included investments in available-for-sale securities in the U.S. consisting of commercial mortgage-backed securities and residential mortgage-backed securities, totaling ¥41,152 million, and high-yield debt

Table of Contents

securities, totaling ¥7,835 million. Other securities increased 13% in fiscal 2008 due primarily to a higher balance of preferred capital shares.

The above table does not include assets sold in securitizations. We sold ¥12,519 million and ¥10,851 million of investment securities through securitizations, which were treated as sales transactions in fiscal 2007 and 2008, respectively. Gains from the securitization of investment securities of ¥379 million and ¥638 million were included in net gains on investment securities in fiscal 2007 and 2008, respectively. The balance of investment securities treated as sales transactions amounted to ¥41,535 million and ¥46,707 million in fiscal 2007 and 2008, respectively. For more information on securitization, see Note 10 in Item 18. Financial Statements.

For further information on investment in securities, see Note 9 of Item 18. Financial Statements.

Brokerage commissions and net gains (losses) on investment securities

All non-interest income and losses (other than foreign currency transaction gains or losses) that we recognize on securities held in connection with operations other than life insurance are reflected in our consolidated statements of income as brokerage commissions and net gains (losses) on investment securities.

| | Year ended March 31, | | Change | |
|---|----------------------|-----------------|-------------------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| Brokerage commissions and net gains (losses) on investment securities: | | | | |
| Brokerage commissions | ¥ 7,851 | ¥ 6,879 | ¥ (972) | (12) |
| Net gains on investment securities | 60,428 | 13,301 | (47,127) | (78) |
| Dividends income | 2,405 | 3,341 | 936 | 39 |
| Total | ¥ 70,684 | ¥ 23,521 | ¥ (47,163) | (67) |

Brokerage commissions and net gains on investment securities decreased 67% to ¥23,521 million in fiscal 2008. Our brokerage commissions decreased 12% due to a decrease in revenues from securities operations. Net gains on investment securities decreased 78% due primarily to a decrease in revenues from venture capital operations in Japan, in addition to the absence of gains on the sale of a portion of our shares in Aozora Bank Ltd. in connection with its listing on the Tokyo Stock Exchange which were recorded in the previous fiscal year, as well as market valuation losses on trading securities recorded from deterioration in the credit markets in the U.S.

As of March 31, 2008, gross unrealized gains on available-for-sale securities, including those held in connection with our life insurance operations, were ¥61,706 million compared to ¥97,493 million as of March 31, 2007. As of March 31, 2008, gross unrealized losses on available-for-sale securities, including those held in connection with our life insurance operations, were ¥9,222 million compared to ¥2,843 million as of March 31, 2007. These unrealized gains decreased due primarily to a decline in the domestic securities market in Japan and the deterioration in the credit markets in the U.S.

Life insurance premiums and related investment income

Edgar Filing: ORIX CORP - Form 20-F

We reflect all income and losses (other than provision for doubtful receivables and probable loan losses) that we recognize on securities, installment loans and other investments held in connection with life insurance operations in our consolidated statements of income as life insurance premiums and related investment income.

| | Year ended March 31, | | Change | |
|---|--|-----------|-----------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| | (In millions of yen, except percentage data) | | | |
| Life insurance premiums and related investment income: | | | | |
| Life insurance premiums | ¥ 121,373 | ¥ 120,527 | ¥ (846) | (1) |
| Life insurance-related investment income | 11,462 | 8,089 | (3,373) | (29) |
| Total | ¥ 132,835 | ¥ 128,616 | ¥ (4,219) | (3) |

Table of Contents

Life insurance premiums and related investment income decreased 3% to ¥128,616 million in fiscal 2008 compared to fiscal 2007. Life insurance premiums decreased 1% and life insurance-related investment income decreased 29% in fiscal 2008.

| | As of March 31, | | Change | |
|--|-----------------|-----------|------------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Investments by ORIX Life Insurance: | | | | |
| Marketable debt securities | ¥ 283,648 | ¥ 297,780 | ¥ 14,132 | 5 |
| Marketable equity securities | 9,054 | 12,920 | 3,866 | 43 |
| Other securities | 47,635 | 31,179 | (16,456) | (35) |
| Total investment in securities | 340,337 | 341,879 | 1,542 | 0 |
| Installment loans and other investments | 170,714 | 138,866 | (31,848) | (19) |
| Total | ¥ 511,051 | ¥ 480,745 | ¥ (30,306) | (6) |

Marketable debt securities increased, while other securities decreased resulting from increasing investments in low-risk corporate and government bonds. Installment loans and other investments decreased 19% year on year due to an increase in principal collected on installment loans.

| | Year ended March 31, | | Change | |
|---|----------------------|---------|-----------|-------------|

| Net gains (losses) on investment securities | ¥ 3,208 | ¥ 1,342 | ¥ (1,866) | (58) |
| Interest on loans and investment securities, and others | 8,254 | 6,747 | (1,507) | (18) |
| Total | ¥ 11,462 | ¥ 8,089 | ¥ (3,373) | (29) |

For further information on life insurance operations, see Note 22 of Item 18. Financial Statements.

Real estate sales

| | Year ended March 31, | | Change | |
|--|----------------------|----------|---------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Real estate sales: | | | | |
| Real estate sales | ¥ 87,178 | ¥ 88,445 | ¥ 1,267 | 1 |

Although the number of condominiums sold to buyers in Japan decreased from 2,194 units in fiscal 2007 to 1,931 units in fiscal 2008, revenues from real estate sales increased 1% year on year to ¥88,445 million due to gains from sales recorded in the Oceania region.

Gains on sales of real estate under operating leases

| | Year ended March 31, | | Change | |
|--|--|----------|-----------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| | (In millions of yen, except percentage data) | | | |
| Gains on sales of real estate under operating leases: | | | | |
| Gains on sales of real estate under operating leases | ¥ 22,958 | ¥ 16,756 | ¥ (6,202) | (27) |

Gains on sales of real estate under operating leases decreased 27% year on year to ¥16,756 million in fiscal 2008 due primarily to a decrease in real estate under operating leases that were sold but were not included in discontinued operations. Where we have continuing involvement with the cash flows from the real estate under

Table of Contents

operating leases which have been disposed of, the gains or losses arising from such disposal are separately disclosed as gains on sales of real estate under operating leases, while if we have no continuing involvement with the cash flows from such disposed real estate properties, the gains or losses are reported as income from discontinued operations. For discussion of accounting policy for discontinued operations, see Note 25 in Item 18. Financial Statements.

Other operations

| | As of and for the year ended March 31, | | Change | |
|--|---|-----------|----------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Other operations: | | | | |
| Other operating revenues | ¥ 267,901 | ¥ 300,273 | ¥ 32,372 | 12 |
| Japan | 203,704 | 236,253 | 32,549 | 16 |
| Overseas | 64,197 | 64,020 | (177) | (0) |
| New assets added | 215,409 | 152,480 | (62,929) | (29) |
| Japan | 214,115 | 152,480 | (61,635) | (29) |
| Overseas | 1,294 | | (1,294) | |
| Other operating assets | 152,106 | 197,295 | 45,189 | 30 |
| Japan | 146,487 | 192,628 | 46,141 | 31 |
| Overseas | 5,619 | 4,667 | (952) | (17) |

Other operating revenues increased 12% year on year to ¥300,273 million. In Japan, revenues were up 16% to ¥236,253 million compared to ¥203,704 million in the previous fiscal year due mainly to an increase in revenues associated with real estate management operations including golf courses and training facilities, and contributions from the beginning of this fiscal year from various other companies in which we invested in the previous fiscal year. Overseas revenues were flat at ¥64,020 million compared to the previous fiscal year.

New assets added for other operating transactions were down 29% to ¥152,480 million in fiscal 2008 due primarily to starting operation of an industrial waste disposal facility in the previous fiscal year. Other operating transactions include other operating assets and real estate for sale, such as residential condominiums and commercial real estate.

Other operating assets increased 30% to ¥197,295 million mainly reflecting investments made in connection with real estate management operations in Japan.

Expenses**Interest expense**

Interest expense was up 31% year on year to ¥105,905 million due mainly to an increase in Japan. In Japan, interest expense increased 50% year on year due to higher interest rates as well as higher average debt levels. Overseas interest expense increased 6% year on year due mainly to higher average debt levels.

The average interest rate on our short-term and long-term debt in Japan, calculated on the basis of monthly balances, increased to 1.33% in fiscal 2008 compared to 1.09% in fiscal 2007 due to higher interest rates following policy by the Bank of Japan. The average interest rate on our short and long-term overseas debt, calculated on the basis of monthly balances, decreased to 5.41% in fiscal 2008 from 5.66% in fiscal 2007 reflecting lower interest rates in the U.S. For information regarding interest rate risk, see Item 3. Key Information Risk Factors.

Table of Contents***Costs of operating leases***

Costs of operating leases increased 14% compared to the previous fiscal year to ¥184,313 million in fiscal 2008 due primarily to the increase in the average balance of investment in operating leases.

Life insurance costs

Life insurance costs in fiscal 2008 decreased 2% to ¥112,869 million, corresponding to a decrease in life insurance premiums, while margins increased to 6% in fiscal 2008 compared with 5% in fiscal 2007.

Costs of real estate sales

Costs of real estate sales were up 10% year on year to ¥81,056 million due to a recognition of write-downs resulting mainly from an increase in development costs for units under development in condominium operations. Cost of real estate sales includes upfront costs associated with advertising and creating model rooms. Margins decreased to 8% in fiscal 2008 from 15% in fiscal 2007 due mainly to a recognition of write-downs.

Other operating expenses

Other operating expenses were up 21% year on year to ¥170,476 million resulting from the recognition of expenses from the beginning of this fiscal year from companies in which we invested in the previous fiscal year and correlate with the increase in other operating revenues.

Selling, general and administrative expenses

| | Year ended March 31, | | Change | |
|--|----------------------|-----------|----------|-------------|
| | 2007 | 2008 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Selling, general and administrative expenses: | | | | |
| Personnel expenses | ¥ 138,729 | ¥ 141,915 | ¥ 3,186 | 2 |
| Selling expenses | 34,713 | 38,011 | 3,298 | 10 |
| Administrative expenses | 71,376 | 81,738 | 10,362 | 15 |
| Depreciation of office facilities | 3,664 | 4,095 | 431 | 12 |
| Total | ¥ 248,482 | ¥ 265,759 | ¥ 17,277 | 7 |

Employee salaries and other personnel expenses account for approximately half of selling, general and administrative expenses, and the remaining half consists of administrative expenses such as rent for office spaces, communication expenses and travel expenses. Selling, general and administrative expenses in fiscal 2008 increased 7% year on year, due to an increase in general and administrative expenses for write-downs of intangible assets resulting from the termination of contracts with a seller in acquisition in Japan, in addition to recorded expenses associated with companies in which we invested in the previous fiscal year from the beginning of this fiscal year, and expenses associated with the expansion of existing operations.

Provision for doubtful receivables and probable loan losses

We make provisions for doubtful receivables and probable loan losses for direct financing leases and installment loans. New provisions for doubtful receivables and probable loan losses in fiscal 2008 increased 141% as compared to the previous year. Provisions for direct financing leases increased 349% due to reversals of provision for doubtful receivables recorded by some subsidiaries in the previous fiscal year. Provisions for loans not individually evaluated for impairment increased 55% due to growth in provisions for card loans in Japan.

Table of Contents

Provisions for loans individually evaluated for impairment increased 176% due mainly to an increase in loans individually evaluated for impairment including loans for real estate companies, reflecting a recent slowdown in the economy.

(1) Other includes foreign currency translation adjustments and amounts reclassified to discontinued operations.

Write-downs of long-lived assets

In accordance with FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, we performed an impairment review for long-lived assets in Japan and overseas such as golf courses, corporate dormitories, office buildings, hotel properties and commercial buildings, and condominiums. Write-downs totaling ¥2,169 million were made in fiscal 2008, a decrease of 31% compared to fiscal 2007, which are reflected as write-down of long-lived assets and income from discontinued operations (¥1,742 million of which is reflected as write-down of long-lived assets.). The majority of write-downs in fiscal 2008 totaled ¥1,555 million and was associated with land to be developed in the future.

Our total investment in long-lived assets as of March 31, 2008 was ¥1,435,234 million. ¥1,167,272 million of long-lived assets were included in business segments in Japan, ¥178,434 million were included in overseas business segments, while the remaining assets mainly consist of office facilities that are regarded as corporate assets. Of the long-lived assets in business segments in Japan, ¥743,052 million were in the Real Estate segment. For a breakdown of long-lived assets by segment, see Note 31 of Item 18. Financial Statements.

Write-downs of securities

Edgar Filing: ORIX CORP - Form 20-F

Write-downs for fiscal 2008 were primarily in connection with a decline in the domestic securities market in Japan. In fiscal 2008, write-downs increased 48% from ¥5,592 million in fiscal 2007 to ¥8,290 million in fiscal 2008. For information regarding the impairment of investment in securities, see Critical Accounting Policies and Estimates of Item 5. Operating and Financial Review and Prospects.

Table of Contents

Foreign currency transaction loss (gain), net

We recognized a foreign currency transaction net gain in the amount of ¥87 million in fiscal 2008. For information on the impact of foreign currency fluctuations, see Item 11. Qualitative and Quantitative Disclosures about Market Risk.

Equity in net income (loss) of affiliates

Equity in net income (loss) of affiliates in fiscal 2008 increased 51% year on year to ¥48,343 million largely due to an increase in profits from residential condominiums developed through certain joint ventures and equity method affiliates in Japan, despite lower profits from equity method affiliates overseas. The decrease in profits from equity method affiliates overseas was due to the decline in income as a result of the sale of stock in Korea Life Insurance Co., Ltd.

For discussion of investment in affiliates, see Note 12 of Item 18. Financial Statements.

Gains (losses) on sales of subsidiaries and affiliates and liquidation losses, net

Gains (losses) on sales of subsidiaries and affiliates and liquidation losses, net in fiscal 2008 were up more than six times year on year to ¥12,222 million, due to gains on sales of affiliates mainly in the Asian region and sales of affiliates in the corporate rehabilitation business in Japan.

Provision for income taxes

Provision for income taxes in fiscal 2008 was ¥98,487 million compared to the provision of ¥125,759 million in fiscal 2007. The decrease of ¥27,272 million was due primarily to lower income before income taxes, minority interests in earnings of subsidiaries, discontinued operations and extraordinary gain. For discussion of income taxes, see Note 16 in Item 18. Financial Statements.

Minority Interests in Earnings of Subsidiaries, net

Minority interests were mainly recorded as a result of the minority interests in earnings of Houlihan Lokey, which is engaged in investment banking including M&A and financial advisory. In fiscal 2008, minority interests decreased 19% year on year to ¥3,918 million.

Discontinued operations

Discontinued operations, net of applicable tax effect, increased 95% compared to the previous fiscal year to ¥22,514 million in fiscal 2008 due primarily to higher gains on sales of real estate under operating leases in Japan.

Extraordinary gain

We recorded an extraordinary gain, net of applicable tax effect, of ¥933 million in fiscal 2008, which resulted from an acquisition of interests in an affiliate company, in accordance with FASB Statement No. 141, Business Combinations, because our proportional share of the fair value of investee's net assets exceeded the acquisition cost.

| Difference between Segment Total and Consolidated Amounts | 894,405 | 1,088,202 | 193,797 | 22 |
| Total consolidated assets | ¥ 8,207,187 | ¥ 8,994,970 | ¥ 787,783 | 10 |

Corporate Financial Services

The segment's operating environment has changed significantly in the past fiscal year. The trends of increasing concerns of a U.S. economic slowdown, the strengthening of the yen and rising prices for crude oil and other raw materials have exceeded the assumptions underlying forecasts for domestic economic growth at the start of the fiscal year. As a result, the outlook for SMEs remains uncertain.

Segment revenues were up 11% year on year to ¥139,874 million due primarily to an expansion of loans to corporate customers, despite a decrease in gains from securitizations.

Segment profits decreased 40% to ¥35,412 million compared to ¥58,820 million in fiscal 2007, despite an increase in segment revenues, due to increases in interest expense and provision for doubtful receivables and probable loan losses reflecting a slowdown in the economy, where some reversals for doubtful receivables and probable loan losses were recognized in fiscal 2007, in addition to the recognition of write-downs of intangible assets.

Segment assets increased 6% on March 31, 2007 to ¥1,993,390 million due to the expansion of loans to corporate customers.

Maintenance Leasing

Revenues from operating leases increased, despite a decrease in revenues from direct financing leases in the automobile leasing operations due to lower operating assets resulting from securitizations in fiscal 2007. Revenues from operating leases related to precision measuring and other equipment were increased as well. As a result, segment revenues increased 10% year on year to ¥236,411 million.

Edgar Filing: ORIX CORP - Form 20-F

Segment profits decreased 5% to ¥37,235 million compared to ¥39,093 million in fiscal 2007 due to an increase in expenses corresponding with an increase in revenues from operating leases, in addition to an increase in interest expenses and selling, general and administrative expenses. Operating leases include operating expenses that are recognized as a larger amount during initial period, so when compared with direct financing leases under circumstance in which operating leases are increasing in automobile leasing operations, profitability temporarily declines.

Segment assets increased 3% on March 31, 2007 at ¥649,814 million due to an expansion of operating lease assets.

Table of Contents

Real Estate

The domestic real estate operating environment is changing significantly due to the turmoil in the international financial and capital markets and the tightening of credit markets and liquidity, which are affecting domestic and overseas investors and reducing risk tolerance. Fundamental conditions in the real estate market are uncertain at the moment, making future performance unpredictable. Given this environment, we are utilizing our ability to collect information from multiple sources and our diverse business development capabilities to differentiate ourselves from competitors by delivering properties with high added value.

Segment revenues increased 18% year on year to ¥288,795 million due to an increase in revenues associated with real estate rental activities, including office buildings, and management operations including golf courses and training facilities, and an increase in gains on sales of real estate under operating leases, despite a decrease in the number of condominiums sold to buyers recognized under real estate sales.

Segment profits increased 62% to ¥83,065 million compared to ¥51,285 million in fiscal 2007 due mainly to an increase in gains on sales of real estate under operating leases, in addition to an increase in the contribution from condominiums developed through certain joint ventures which were accounted for by the equity method, despite a recognition of write-downs resulting from an increase in development costs for units under development in the condominium operations. The total number of condominiums sold to buyers including those developed through certain joint ventures which were accounted for by the equity method was 3,710 units this fiscal year compared with 3,098 units in fiscal 2007.

Segment assets increased 19% on March 31, 2007 to ¥1,077,560 million due mainly to an expansion of operating assets, including operating lease assets.

Investment Banking

For the past few years, the funds from worldwide excess financial liquidity tended to flow into the non-recourse loans markets in Japan. However, investors' risk tolerance has been reduced due to the turmoil in, and the tightening of, credit markets and it is necessary to continue monitoring the emerging trends carefully.

Segment revenue decreased 12% year on year to ¥127,199 million due to decreases in revenues from real estate sales and venture capital operation and in gains from securitizations, in addition to the absence of gains on the sales of a portion of our shares in Aozora Bank which were recorded in fiscal 2007, despite an increase from an expansion of revenues associated with corporate loans, including non-recourse loans, and in contributions from equity method affiliates in Japan.

Segment profits were ¥47,483 million, a 43% decrease in comparison with ¥83,866 million in fiscal 2007. The main reasons for the decrease were the decreases in revenue from real estate sales and in gains from securitizations, an increase in interest expense, an increase in the provision for doubtful receivables and probable loan losses, compared to fiscal 2007, when the reversal of provisions had contributed to profit, and the recognition of losses from subsidiaries in the corporate rehabilitation business in Japan.

Segment assets increased 27% on March 31, 2007 to ¥1,698,452 million due to an increase in corporate loans, including non-recourse loans.

Retail

This segment consists of trust and banking services, card loan, life insurance and securities brokerage.

Segment revenues were flat year on year at ¥198,858 million due mainly to a decrease in life insurance related investment income, despite an increase in revenues from the expansion of investment in securities and installment loans in trust and banking operation and the card loan business.

Table of Contents

Segment profits were ¥27,463 million, a 17% decrease in comparison with ¥33,215 million in fiscal 2007 due mainly to an increase in interest expense and selling, general and administrative expenses. Furthermore, there was an increase in provision for doubtful receivables and probable loan losses compared to fiscal 2007, when some reversals were recognized.

Segment assets increased 2% from March 31, 2007 to ¥1,450,241 million at March 31, 2008 due to an increase in installment loans and investment in securities, despite a decrease in installment loans to customers in our securities brokerage operation.

Overseas Business

Although the U.S. subprime mortgage loan problem had no direct impact on our overseas business segment, we recognized market valuation losses on high-yield bond trading securities due to a drop in bond values caused by deterioration in the bond market. On the other hand, we saw an increase in revenues associated with corporate loans and an increase in gains from sales of real estate under operating leases. In addition, operating leases increased, including automobile leasing, and the recognition of real estate sales and ship finance-related revenues in Asia and Oceania.

Furthermore, in the absence of one-off contributions made by gains on investment securities and interest on investment securities in fiscal 2007 in the U.S. and Asia, segment revenues decreased 4% year on year to ¥218,227 million.

Segment profits decreased 16% to ¥57,862 million compared to ¥68,884 million in fiscal 2007 accompanying an increase in provision for doubtful receivables and probable loan losses and a decrease from the sale of our interest in Korea Life Insurance Co., Ltd.

Segment assets decreased 8% to ¥1,037,311 million for the year ended March 31, 2008 due mainly to the strong yen and a decrease in investment in direct financing leases and sales of shares in affiliates, despite an increase in corporate loans.

LIQUIDITY AND CAPITAL RESOURCES

Overview

We require capital resources at all times for maintaining working capital and for the expansion of our business. We have put our main emphasis on ensuring stable funding and reducing our funding costs by diversifying our funding methods and procuring capital from a variety of sources.

The fiscal year ended March 31, 2009 was marked by the rapid contraction of capital markets after the Lehman Brothers bankruptcy filing, and the resulting rapid contraction of the credit markets due to the sudden deterioration in the financial condition of financial institutions has continued. In response to this environment we have been implementing various measures to strengthen our financial condition and to stabilize liquidity, including:

Decreasing interest bearing debt and improving our debt-to-equity ratio.

Strengthening our funding structure by:

Decreasing the ratio of our funding from capital markets to total debt by reducing commercial paper (CP) in response to the rapid contraction of capital markets;

Issuing ¥150 billion in convertible bonds in December and increasing the ratio of long-term debt to total debt, as a means of limiting liquidity demands in the event that there are further declines in the funding environment;

Table of Contents

Managing the efficiency of our intra-group company funding; and

Retaining excess liquidity through cash and deposits.

Our funding consists mainly of borrowings from financial institutions and funding from capital markets. We maintain a flexible funding strategy by adjusting the ratio of funding obtained from the capital markets by taking into account domestic and foreign financial market conditions. The ratio of funding from capital markets to total debt was 39% as of March 31, 2008 and 34% as of March 31, 2009 (not including off-balance sheet funding, such as the securitization of assets). In the fiscal year ended March 31, 2009, in response to the rapid contraction of the capital markets after the Lehman bankruptcy filing, we decreased the amount of CP outstanding and decreased our ratio of debt from the capital markets.

Our ratio of long-term debt to total debt as of March 31, 2008 was 77% while at March 31, 2009 the ratio was 85%, which is our historical high. In preparation for expected further declines in the funding environment, in December 2008 we issued unsecured convertible bonds with stock acquisition rights due 2014 to decrease stress on funding and to increase the ratio of long-term debt to total debt. Floating rate funding and fixed rate funding amounted to 51% and 49%, respectively of long-term debt as of March 31, 2008 and 48% and 52%, respectively, of long-term debt as of March 31, 2009.

Although we primarily obtain our capital resources from financial institutions and capital markets in Japan, we also procure funds from overseas markets in accordance with the location of our assets as part of our strategy to reduce exchange rate risk. The ratio of domestic (Japanese) funding to total debt was 89% and 90% as of March 31, 2008 and March 31, 2009, respectively. The ratio of domestic segments' assets to the total assets for all segments was 87% both as of March 31, 2008 and March 31, 2009. (We calculate the ratio of domestic funding using the amount borrowed by companies that are located in Japan even though some or all of the funding may be used outside Japan, for example, for acquiring assets in overseas operations).

Our main domestic and foreign subsidiaries produce annual financial plans in consultation with us, and we monitor the management of funds as necessary. We employ a cash management system for supplying and absorbing capital efficiently from our domestic subsidiaries, concentrating the management of domestic cash flow for the group at ORIX. Our overseas subsidiaries conduct local funding activities corresponding to market and business conditions where each subsidiary is located. The procured funds provide the resources for increasing assets and repaying debt and other notes and accounts payable for the relevant subsidiary.

The ability to secure capital resources readily is of the utmost importance in making possible the prompt handling of customer needs and various transaction demands. We strive for timely and flexible capital resource procurement by monitoring the funding requirements from our sales and investment operations, and by monitoring the balance between funding supply and our funding needs.

We have also been seeking to prevent funding shortages by conserving our cash on hand. As a result of this liquidity management strategy, our cash and cash equivalents as of March 31, 2009 increased to ¥459,969 million from ¥320,655 million as of March 31, 2008.

Ratings

Edgar Filing: ORIX CORP - Form 20-F

As of the date of this filing, our domestic unsecured straight bonds and our Euro Medium-Term Note Program (Euro MTN Program) were rated A+ by Rating and Investment Information, Inc. (R&I) and A+ by Japan Credit Rating Agency, Ltd. (JCR). Standard & Poor's has assigned A- as our long-term senior debt securities and counterparty credit ratings, and Moody's has assigned a A3 long-term unsecured debt securities and long-term issuer rating. Our domestic CP is rated a-1 by R&I and J-1 by JCR.

For a discussion of short-term and long-term debt, see Note 14 of Item 18. Financial Statements.

Table of Contents**Sources of Liquidity*****Borrowings from Financial Institutions***

ORIX Group's borrowings are procured from a variety of sources including major banks, regional banks, foreign banks, life insurance companies, casualty insurance companies and financial institutions associated with agricultural cooperatives. The number of financial institutions from which we procured borrowings was approximately 230 as of March 31, 2009. The majority of our loan balance consists of borrowings from Japanese financial institutions. As of March 31, 2008 and March 31, 2009, short-term debt from financial institutions was ¥655,549 million and ¥568,676 million, respectively, while long-term debt was ¥2,693,233 million and ¥2,676,129 million, respectively. The year-on-year decline in total debt from financial institutions reflects the general tightening of the credit markets, which is related to the financial institutions' own ability to access funding for loans through the capital markets. While we do not anticipate a significant decline in our ability to borrow from financial institutions, we expect the trend of our outstanding debt balances to continue to decline as we manage our credit sources and expenses.

As is typical in Japan, contracts for borrowings from Japanese banks and insurance companies contain clauses which require us to pledge assets upon request by the lender when it is considered reasonably necessary for the preservation of their claims. In addition, in loan agreements with some banks, the bank is assigned the right to offset deposits with any debt for which payment is due, and under certain conditions, such as default, banks have the right to offset all our debt with deposits. Whether or not such provisions are actually applied depends upon the actual circumstances at that time, and as of the time of filing we have not received any such demand from any lender.

Although there has been a general change in some financial institutions' willingness to lend money in the current market due to the current financial turmoil, we have not seen any major changes in our ability to borrow from our main lenders (especially from the major Japanese banks) or in the terms of our borrowings. Furthermore, because our borrowings from foreign banks only comprise approximately 10% of our total bank borrowings, our ability to borrow or renew loans is not significantly affected by the condition of foreign credit markets.

Committed Credit Facilities

We have concluded many committed credit facilities agreements, including syndicate-type agreements, with financial institutions as a means for securing liquidity. The maturity dates of these committed credit facilities are staggered to prevent the overlap of contract renewal periods. The total amount of our committed credit facilities as of March 31, 2008 and March 31, 2009 was ¥689,698 million and ¥537,196 million, respectively. Of these figures, the available amount as of March 31, 2008 and March 31, 2009 was ¥480,250 million and ¥270,507 million, respectively. In the fiscal year 2009, corresponding with the decline of our total liabilities, there was a reduction in the amount of available credit partially due to the transfer of a portion of the committed credit facilities to long-term borrowings and due to our drawing down credit facilities and using the funds to decrease the amount of CP outstanding, in order to further our policy of improving liquidity and increasing the ratio of long-term debt to total debt. Of these committed credit facilities, which include both ORIX and a number of our foreign local subsidiaries as the borrower, the total amount of global commitment lines as of March 31, 2008 and as of March 31, 2009 was ¥125,691 million and ¥97,445 million, respectively with available amounts of ¥84,942 million and ¥35,532 million, respectively.

Compliance with covenant conditions is required for use of the committed credit facilities, and some of these covenants include financial restrictions, such as the maintenance of shareholders' equity ratio, as well as the maintenance of a specified credit rating. In addition, the majority of the committed credit facilities require the debtor to represent and warrant that there has been no material negative change in its financial condition, among other factors, since a specified time. We are currently in compliance with our financial covenants and have been able to make

the requested representations and warranties concerning our financial condition.

Table of Contents

Funding from the Capital Markets

Funding from the capital markets includes financing such as the issuance of straight bonds, CP, Euro MTN, Convertible Bonds (CB), stock or other forms of equity finance, and the securitization of leasing receivables or loans receivables.

Straight Bonds

We have been issuing unsecured straight bonds in conjunction with the expansion of the Japanese bond market. Domestic straight bond issuance is mainly divided into bonds for institutional investors and bonds for individuals. To diversify our investor base, as of March 31, 2008 and March 31, 2009, our balance of straight bonds for domestic institutional investors (including private offerings) was ¥683,000 million and ¥610,000 million, respectively, while the balance of straight bonds for individual investors was ¥435,000 million and ¥418,000 million, respectively. In November 2006, we issued \$1,000 million of US\$-denominated unsecured straight bonds due 2011 in an SEC-registered public offering. In addition, ORIX Leasing Malaysia Berhad (Headquarters in Kuala Lumpur, Malaysia), a subsidiary of ORIX, issued Malaysian ringgit-denominated unsecured straight bonds in Malaysia, totaling 150 million ringgit, in January 2006 (due January 2009), and 200 million ringgit, in October 2007 (due October 2010). The domestic straight bonds market has been essentially closed since the bankruptcy of Lehman Brothers. Although we issued ¥113,000 million domestic straight bonds during the first half of the fiscal year, we did not raise any money through domestic offerings of straight bonds during the latter half of the fiscal year.

CP

The investors for our CP include investment trusts, life insurance companies, casualty insurance companies and other financial institutions, as well as private corporations. The date of issuance and the terms are spread out over time as much as possible when CP is issued so as to avoid overlap of these dates. In response to the rapid contraction of capital markets, we significantly decreased the ratio of capital markets funding to total debt by using our committed credit facilities to reduce our CP outstanding. As a result of this shift away from using CP as funding source, our balance of CP declined to ¥225,991 million as of March 31, 2009 from ¥661,550 million as of March 31, 2008.

Euro MTN

In addition to borrowing from local financial institutions, we have sought to increase our overseas funding operations by establishing a Euro MTN program. As of March 31, 2009, ORIX and three overseas subsidiaries are participants in a Multi-Issuer Euro MTN program with a maximum issuance limit of \$4,000 million. Our Euro MTN issuance is determined based on the funding needs of our overseas subsidiaries and supervised by ORIX's Treasury Department. The total balance of Euro MTN issued as of March 31, 2008 and March 31, 2009 was ¥136,654 million and ¥102,893 million, respectively, of which a total of ¥90,812 million and ¥66,725 million were for the foreign local subsidiaries, respectively.

CB

Edgar Filing: ORIX CORP - Form 20-F

In December 2008, ORIX issued ¥150,000 million in the third series of unsecured convertible bonds with stock acquisition rights due March 2014.

Securitization

We securitize leasing receivables, installment loans, and certain investment securities, primarily in Japan. As of March 31, 2008 and March 31, 2009, the total balance of each of these assets removed from our balance sheet through securitization was ¥501,949 million and ¥398,655 million, respectively, while the total balance of notes and accounts payable reflected on our balance sheet as secured borrowings was ¥374,920 million and

Table of Contents

¥358,969 million, respectively, due to a decline in our overall assets available for securitization. The Japanese securitization market has been shrinking but is comparatively more stable than that of the US even after the turmoil of the Lehman Brothers bankruptcy. We expect to continue to be able to use securitizations as a source of funding. We have agreed to sell a 51% interest in ORIX Credit Corporation to SMBC on July, 2009. As a result of this sale, we are likely to see a proportional decline in the amount of funding from the securitization of ORIX Credit Corporation's loans assets, as ORIX Credit Corporation will become a non-consolidated affiliate.

Equity and Equity-Related Finance

We listed our American Depositary Shares on the New York Stock Exchange in September 1998. After that time, we have conducted occasional equity-related capital-raising transactions in the domestic and international markets.

Deposits

ORIX Trust and Banking has been seeking to expand its business by reviewing its asset portfolio and strengthening its fund procurement through deposits. Utilizing the convenience of on-line banking, ORIX Trust and Banking has successfully expanded its deposits over the course of the past year. Deposits balances as of March 31, 2008 and March 31, 2009 were ¥470,683 million and ¥667,627 million, respectively.

LEVELS OF BORROWINGS

Our procurement of capital resources is not influenced by seasonal factors. There are occasions where capital demand is concentrated at the end of our fiscal year, according to specific operational circumstances. Nevertheless, such factors are included in our annual funding plans, and seasonal factors such as concentration of capital demand are not thought to have a serious influence on our capital resource procurement. Generally speaking, there is no limit on the use of funds under borrowed debt; however, funds such as those borrowed under non-recourse loans are generally limited to specific purposes.

Short-term Debt

| | As of March 31, | | Change | |
|--|--|------------------|--------------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| | (In millions of yen, except percentage data) | | | |
| Short-term debt: | | | | |
| Borrowings from financial institutions | ¥ 655,549 | ¥ 568,676 | ¥ (86,873) | (13) |
| Commercial paper | 661,550 | 225,991 | (435,559) | (66) |
| Medium-term notes | 13,048 | 3,500 | (9,548) | (73) |
| Total short-term debt | ¥ 1,330,147 | ¥ 798,167 | ¥ (531,980) | (40) |

Edgar Filing: ORIX CORP - Form 20-F

Short-term debt as of March 31, 2009 was ¥798,167 million, representing 15% of the total amount of debt as of March 31, 2009, and 23% as of March 31, 2008. As of March 31, 2009, 71% of the short-term debt is borrowings from financial institutions.

Long-term Debt

| | As of March 31, | | Change | |
|--|-----------------|-----------------|---------------|-------------|
| | 2008 | 2009 | Amount | Percent (%) |
| (In millions of yen, except percentage data) | | | | |
| Long-term debt: | | | | |
| Borrowings from financial institutions | ¥ 2,693,233 | ¥ 2,676,129 | ¥ (17,104) | (1) |
| Bonds | 1,270,428 | 1,319,354 | 48,926 | 4 |
| Medium-term notes | 123,606 | 99,393 | (24,213) | (20) |
| Payable under securitized lease and loan receivables | 374,920 | 358,969 | (15,951) | (4) |
| Total long-term debt | ¥ 4,462,187 | ¥ 4,453,845 | ¥ (8,342) | (0) |

Table of Contents

Long-term debt as of March 31, 2009 was ¥4,453,845 million, representing 85% of the total amount of debt as of March 31, 2009, and 77% as of March 31, 2008. 60% of the long-term debt is borrowings from financial institutions.

Approximately 52% of the interest paid on long-term debt borrowings in this fiscal year was fixed rate interest, with the remainder being mainly floating rate interest based on TIBOR or LIBOR.

For information regarding the repayment schedule of our long-term debt and of interest rates for short and long-term debt, see Note 14 of Item 18. Financial Statements.

We have entered into various types of interest rate contracts to manage risk associated with fluctuations in interest rates. For information with respect to derivative financial instruments and hedging, see Note 27 of Item 18. Financial Statements.

Deposits

In addition to the long/short-term debt described above, ORIX Trust and Banking Corporation and ORIX Asia Limited also accepts deposits. The deposit balance as of March 31, 2009 was ¥667,627 million, an increase of 42% or ¥196,944 million over March 31, 2008. For further information with respect to deposits, see Note 15 of Item 18. Financial Statements.

CASH FLOWS

In addition to cash required for the payment of operating expenses such as selling, general and administrative expenses, as a financial services company our primary uses of cash are for:

payment and repayment of interest on and principal of short-term and long-term debt; and

purchases of lease equipment, installment loans made to customers, purchases of available-for-sale and other securities and cash outlays for real estate development projects.

The use of cash, therefore, is heavily dependent on new business volumes for our operating assets. When new business volumes for such assets as leases and loans increase, we require more cash to meet these requirements, while a decrease in assets results in a reduced use of cash and an increase in repayment of debt.

We have cash inflows from the principal payments received under direct financing leases and installment loans, and proceeds from the sales of investment securities and operating lease assets. For cash flow information regarding interest and income tax payments, see Note 4 of Item 18. Financial Statements.

Year Ended March 31, 2009 Compared to Year Ended March 31, 2008

Cash and cash equivalents increased by ¥139,314 million to ¥459,969 million compared to March 31, 2008 in line with our policy of increasing liquidity on hand.

Cash flows from operating activities provided ¥308,779 million in fiscal 2009 and provided ¥156,287 million in fiscal 2008, resulting from a decrease in volume of new investments in real estate for sale such as residential condominiums, a decrease in loans held for sale, and operating cash flow adjustments such as depreciation and amortization and provision for doubtful receivables and probable loan losses, in addition to a decrease in net income compared to fiscal 2008.

Cash flows from investing activities provided ¥171,183 million in fiscal 2009 and used ¥838,331 million in fiscal 2008 due to a decrease in purchases of lease equipment, a decrease in purchases of available-for-sale securities and a decrease in installment loans made to customers which was less than the principal collected on installment loans resulting from the implementation of a more prudent stance towards new transactions compared to fiscal 2008.

Table of Contents

Cash flows from financing activities used ¥334,587 million in fiscal 2009 and provided ¥792,966 million in fiscal 2008 due to decreased levels of commercial paper to reduce interest-bearing debt.

Year Ended March 31, 2008 Compared to Year Ended March 31, 2007

Cash and cash equivalents increased by ¥105,492 million to ¥320,655 million compared to March 31, 2007 due mainly to an increase in debt.

Cash flows from operating activities provided ¥156,287 million in fiscal 2008. The operating cash flow adjustments include depreciation and amortization and provision for doubtful receivables and probable loan losses, as well as outflows such as an increase in loans held for sale, an increase in inventories and a decrease in security deposits.

Cash flows from investing activities used ¥838,331 million in fiscal 2008 and ¥802,278 million in fiscal 2007 principally due to an increase in outflows associated with the increase in installment loans made to customers as a result of the expansion of loans to corporate customers, and the increase in purchases of available-for-sale securities, partly offset by higher principal collected on installment loans.

Cash flows from financing activities provided ¥792,966 million in fiscal 2008 and provided ¥545,014 million in fiscal 2007 due to an increase in debt.

COMMITMENTS FOR CAPITAL EXPENDITURES

As of March 31, 2009, we had commitments for the purchase of equipment to be leased in the amount of ¥15,513 million. For information on commitments, guarantees and contingent liabilities, see Note 30 of Item 18. Financial Statements.

OFF BALANCE SHEET ARRANGEMENTS

USE OF SPECIAL PURPOSE ENTITIES

We periodically securitize lease receivables and loan receivables. These securitizations allow us to access the capital markets, provide us with alternative sources of funding and diversify our investor base as well as help us to mitigate, to some extent, credit risk associated with our customers and risk associated with fluctuations in interest rates.

In the securitization process, the assets for securitization are sold to SPEs, which issue asset-backed securities to investors. SPEs are generally organized as trusts. Our use of SPEs for securitizations is consistent with conventional practices in the securitization market, to isolate the sold

Edgar Filing: ORIX CORP - Form 20-F

receivables from creditors of other entities, including the seller of the assets. SPEs can be structured to be bankruptcy-remote, and if structured in this manner (and subject to certain other conditions) the assigned assets are removed from the balance sheet. A portion of the SPEs that we utilize meet the definition of qualifying special purpose entities, or QSPEs, as defined in FASB Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, and, in accordance with FASB Statement No. 140, we do not consolidate the assets and liabilities of the QSPEs. These SPEs are also designed so that investors have no recourse against our other assets in the event of any failure of payment on the assigned assets. In addition, we do not make any payment guarantees to investors in these transactions, eliminating exposure to contingent liabilities. When assets are securitized in this manner, we recognize subordinated residual interests on our consolidated balance sheets. The subordinated interests, with the right to receive dividends and principal redemptions out of the remaining balance after the SPE operating expense and dividends and principal redemption money to preferred investors are deducted from the cash flow generated from the assigned assets, are affected by the performance of the assigned

Table of Contents

assets (credit risk, advanced redemption, interest levels, etc.). We may repurchase a portion of the assets that we securitized as required under the terms of the contract such as violation of the representation and warranty set forth in the assignment agreement and other related agreements, termination of assigned lease contracts and other conditions that trigger repurchase, and the event triggering the repurchase is outside of our control. From time to time, we may act as an investor, servicer or administrator in SPE transactions. The effects of these transactions are reflected in our consolidated financial statements.

We do not dispose of troubled leases, loans or other problem assets through unconsolidated SPEs. None of our officers, directors or employees holds any equity interests in these SPEs or receives any direct or indirect compensation from them. The SPEs do not own any Shares or other equity interests and no contractual rights permitting the SPEs to acquire our Shares or other equity interests exist.

SPEs do not issue CP, nor will they in the future. In addition, SPEs are not scheduled to issue any additional bonds, beneficiary rights or the like for refinancing or other purposes after issuing bonds, beneficiary rights and the like at the time that the assets are sold to SPEs.

We expect to continue to utilize SPE structures for securitization of assets. For further information on our securitization transactions, see Note 10 of Item 18. Financial Statements.

Investment Products

We provide investment products to our customers that employ a contractual mechanism known in Japan as a *kumiai*, which is in effect a type of SPE. We arrange and market *kumiai* products to investors as a means to finance the purchase of aircraft, ships or other large-ticket items to be leased to third parties. A portion of the funds necessary to purchase the item are contributed by such investors, while the remainder is borrowed by the *kumiai* from one or more financial institutions in the form of a non-recourse loan. The *kumiai* investors (and any lenders to the *kumiai*) retain all of the economic risks and rewards in connection with the purchase and leasing activities of the *kumiai*, and all related gains or losses are recorded on the financial statements of investors in the *kumiai*. We are responsible for the arrangement and marketing of these products, and may act as servicer or administrator in *kumiai* transactions. Fee income for arranging and administering these transactions is recognized in our consolidated financial statements. In *kumiai* transactions, we do not guarantee or otherwise have any financial commitments or exposure with respect to the *kumiai* or its related SPE and the assets of such are not reflected on our balance sheet.

Other Financial Transactions

We occasionally make loans, leases, equity or other investments in SPEs in connection with finance transactions related to aircrafts, ships and real estate, as well as transactions involving investment funds, in addition to real estate purchases and development projects. All transactions involving use of SPE structures are evaluated to determine if we hold a beneficial interest that would result in our being defined as the primary beneficiary of the SPE pursuant to FASB Interpretation No. 46 (revised December 2003), (Consolidation of Variable Interest Entities). When we are considered to own the primary beneficial interest in the SPEs, the SPEs are fully consolidated into our financial statements. In all other circumstances our loan, lease, equity or other investments are recorded on our consolidated balance sheets as appropriate.

See Note 11 of Item 18. Financial Statements for further information concerning our SPEs and the effect of this Interpretation on our results of operations or financial position.

RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES, ETC.

Not applicable.

Table of Contents**TREND INFORMATION**

COMMITMENTS

The table below sets forth the maturities of guarantees and other commitments as of March 31, 2009.

| | Total | Amount of commitment expiration per period | | | |
|----------------------------------|-----------|--|-----------|-----------|---------------|
| | | Within 1 year | 1-3 years | 3-5 years | After 5 years |
| (In millions of yen) | | | | | |
| Commitments: | | | | | |
| Guarantees | ¥ 144,963 | ¥ 32,172 | ¥ 71,832 | ¥ 16,557 | ¥ 24,402 |
| Committed credit lines and other | 579,109 | 118,624 | 99,945 | 43,761 | 316,779 |
| Total commercial commitments | ¥ 724,072 | ¥ 150,796 | ¥ 171,777 | ¥ 60,318 | ¥ 341,181 |

For a discussion of commitments, guarantee and contingent liabilities, see Note 30 of Item 18. Financial Statements.

TABULAR DISCLOSURE OF CONTRACTUAL OBLIGATIONS

The table below sets forth the maturities of contractual cash obligations as of March 31, 2009.

| | Total | Payments due by period | | | |
|---|-------------|------------------------|-------------|-------------|---------------|
| | | Within 1 year | 1-3 years | 3-5 years | After 5 years |
| (In millions of yen) | | | | | |
| Contractual cash obligations: | | | | | |
| Deposits | ¥ 667,627 | ¥ 417,149 | ¥ 178,562 | ¥ 71,916 | ¥ |
| Long-term debt | 4,453,845 | 1,032,849 | 2,172,038 | 977,508 | 271,450 |
| Operating leases | 27,026 | 4,194 | 4,834 | 3,229 | 14,769 |
| Unconditional purchase obligations of lease equipments | 15,513 | 15,431 | 82 | | |
| Unconditional non-cancelable contracts for computer systems | 1,746 | 825 | 861 | 60 | |
| Interest rate swaps: | | | | | |
| Notional amount (floating to fixed) | 288,334 | 114,660 | 141,376 | 6,322 | 25,976 |
| Notional amount (fixed to floating) | 5,000 | | | 2,000 | 3,000 |
| Total contractual cash obligations | ¥ 5,459,091 | ¥ 1,585,108 | ¥ 2,497,753 | ¥ 1,061,035 | ¥ 315,195 |

Edgar Filing: ORIX CORP - Form 20-F

Other items excluded from the above table are short-term debt, security deposits, trade notes and accounts payable and policy liabilities. The amounts of such items were ¥798,167 million, ¥168,890 million, ¥350,183 million, ¥442,884 million, respectively, as of March 31, 2009. For information on pension plans and derivatives, see Notes 17 and 27 in Item 18. Financial Statements. We expect to fund commitments and contractual obligations from one, some or all of our diversified funding sources depending on the amount to be funded, the time to maturity and other characteristics of the commitments and contractual obligations.

For a discussion of debt and deposit-related obligations, see Notes 14 and 15 of Item 18. Financial Statements.

Table of Contents

RECENT DEVELOPMENTS

ECONOMIC CONDITIONS

Fiscal 2009 was marked by an unprecedented global financial crisis. The subprime loan problem that began in the U.S. led to a worldwide financial crisis resulting in a series of bankruptcies and restructurings at major financial institutions, highlighted by Lehman Brothers' bankruptcy filing. During the latter half of the year, the effects of a significant credit crunch in the capital markets increasingly spilled over into the real economies of many countries, affecting all key economic indicators including growth, consumption and employment, resulting in a drastic economic downturn.

In Japan, the real economic growth rate and the Bank of Japan's short-term economic survey of enterprises (the Tankan) measuring businesses' short-term sentiments revealed the bleakest outlook since the survey began. Furthermore, the concern surrounding enterprises continues to increase, as can be seen in the record-high number of listed companies that have filed for bankruptcy, particularly in the real estate sector.

In order to support the flagging economy, Japan and other major economic powers have responded by implementing expanded programs to increase liquidity and by coordinating policies including government spending programs. As a result, indications that conditions are normalizing have been seen in domestic and international capital markets as the U.S. financial system begins to show signs of stabilizing. In Japan, declines in industrial production and machinery order indices, two leading economic indicators, are slowing, but real economic recovery is projected to take some time. Until we have clear signs that the economy is recovering, we will continue to manage our operations under the assumption that the severe economic environment will continue for the foreseeable future.

NEW ACCOUNTING PRONOUNCEMENTS

In September 2006, FASB Statement No. 157 (Fair Value Measurements) was issued. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This statement is effective for fiscal years beginning after November 15, 2007. Adoption of this Statement did not have a significant effect on our results of operations or financial position. For more information about fair value measurements, see Note 2 of Item 18. Financial Statements.

In February 2007, FASB Statement No. 159 (The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115) was issued. This Statement permits entities to choose to measure many financial instruments and certain other assets and liabilities at fair value at specified election dates, which have not been measured at fair value. A business entity shall report unrealized gain and losses for which the fair value option has been elected in earnings at each subsequent reporting date. This Statement is effective as of the beginning of fiscal year that begins after November 15, 2007. We did not choose fair value option as of the adoption date, April 1, 2008, for any asset or liability which had not been measured at fair value. Therefore the adoption of this Statement had no effect on our results of financial position as of the adoption date. For more information about fair value option, see Note 12 of Item 18. Financial Statements.

In December 2007, FASB Statement No. 141 (revised 2007) (Business Combinations) was issued. This Statement requires the acquiring entity in a business combination to recognize the full fair value of assets acquired, liabilities assumed and noncontrolling interest in the transaction at the acquisition date (whether a full or partial acquisition); requires expensing of acquisition-related transaction and restructuring costs; and requires the acquirer to disclose to investors and other users all of the material information needed to evaluate and understand the nature and

Edgar Filing: ORIX CORP - Form 20-F

financial effect of the business combination. This Statement applies prospectively to business combinations for which the acquisition date is on or after the beginning of the fiscal years beginning on or after December 15, 2008. Generally, the effect on our results of operations or financial position on this Statement will depend on future acquisitions.

Table of Contents

In December 2007, FASB Statement No. 160 (Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51) was issued. This Statement requires noncontrolling interests in subsidiaries to be classified as a separate component of equity. Under this Statement, increases and decreases in the parent's ownership interest that leave control intact are accounted for as equity transactions. On the other hand, in a transaction that results in the loss of control, the gain or loss recognized in income includes the realized gain or loss related to the portion of ownership interest sold and the gain or loss on the remeasurement to fair value of the interest retained. This Statement is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Generally, the effect on our results of operations or financial position on this Statement will depend on future transactions.

In March 2008, FASB Statement No. 161 (Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133) was issued. This Statement requires companies with derivative instruments to disclose information that should enable financial-statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under FASB Statement No. 133 (Accounting for Derivative Instruments and Hedging Activities), and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flow. The required disclosures include the fair value of derivative instruments and their gains or losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and the company's strategies and objective for using derivative instruments. This Statement is effective for fiscal years and interim periods beginning after November 15, 2008. For more information, see Note 27 of Item 18. Financial Statements.

In May 2009, FASB Statement No. 165 (Subsequent Events) was issued. This Statement establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. This Statement is effective for fiscal years, and interim periods, ending after June 15, 2009 and is applied prospectively.

In June 2009, FASB Statement No. 166 (Accounting for Transfers of Financial Assets an amendment of FASB Statement No. 140) was issued. This Statement removes the concept of a qualifying special-purpose entity from Statement 140 and removes the exception from applying FASB Interpretation No. 46 (revised December 2003) (Consolidation of Variable Interest Entities) to variable interest entities that are qualifying special-purpose entities. This Statement also modifies the financial-components approach used in Statement 140 and limits the circumstances in which a transferor derecognizes a portion or component of a financial asset. This Statement is effective as of the beginning of first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. We are currently evaluating the effect that the adoption of this Statement will have on our results of operations and financial position.

In June 2009, FASB Statement No. 167 (Amendments to FASB Interpretation No. 46(R)) was issued. This Statement requires an enterprise to perform qualitative analysis that identifies the primary beneficiary, who shall consolidate a variable interest entity, as the enterprise that has both of the following characteristics:

The power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance

The obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity.

Additionally, this Statement requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity. This Statement is effective as of the beginning of first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. We are currently evaluating the effect that the adoption of this Statement will have on our results of operations and financial position.

Table of Contents

RISK MANAGEMENT

ORIX's Enterprise Risk Management

We believe that an enterprise risk management system that is responsive to changes in the business environment and to the diversification of ORIX's businesses is essential for the optimal allocation of management resources. For this purpose, we seek to achieve management goals by implementing comprehensive and timely enterprise risk management policies that cover areas including capital management, individual business risk management, fund procurement and personnel strategies.

Systems and Functions Supporting Enterprise Risk Management

Within our enterprise risk management system, the Board of Directors, executive committees and specialized departments all play important roles. The people in charge of each business unit are also responsible for controlling risk.

The Board of directors is responsible for approving and monitoring on a regular basis, ORIX's policies which includes corporate planning such as capital management, fund procurement and personnel strategies. In addition, the Audit Committee discusses and evaluates the status of ORIX Group risk controls.

Executive committee meetings include the Investment and Credit Committee (ICC), Group Executive Officer Meetings, Monthly Strategy Meetings, and the Information Technology Management Committee. ORIX's senior management emphasizes the importance of frequent and effective meetings related to risk management.

ICC meetings are attended by senior management, including the CEO, COO, CFO and the executive officer in charge of investment and credit. The ICC generally meets on average three times a month, primarily to deliberate on and make decisions regarding transactions that exceed specified investment and credit amounts and to discuss important issues that arise in the execution of business. The Committee evaluates risk and profitability and approves proposed transactions according to these characteristics.

Group Executive Officer Meetings are attended by our executive officers and group executives, who share important information regarding the status of strategies and management resources at the company-wide level, and regarding the execution of ORIX Group business.

Monthly Strategy Meetings include meetings between top management and the individuals in charge of individual departments and business units to discuss matters such as the state of achievement of strategic targets and changes in the business environment. Meetings are held on a regular basis depending on the nature of the business. Matters of key importance to be deliberated on at Monthly Strategy Meetings are decided by the ICC and reported to the Board of Directors as necessary.

Edgar Filing: ORIX CORP - Form 20-F

The Information Technology Management Committee is held in principle once each month and attended by the CEO, COO, CFO, CIO and other related executive officers to deliberate matters concerning basic IT policies and strategies, system implementation and maintenance for Group operations.

In addition to these executive committee meetings, specialized groups including the Corporate Planning and Financial Control Headquarters, Risk Management Headquarters, Legal and Compliance Department, Human Resources and Corporate Administration Headquarters, the Office of the President, and IT Planning Office also perform oversight functions with a cross-departmental perspective. These specialized groups periodically exchange information, discussing the priority of and response to cases requiring attention. They also share information regarding risk management and division of responsibilities, and check the progress of cases.

Enterprise Risk Management Framework

At ORIX, capital is allocated to each business unit, taking into account the department's degree of risk in addition to company-wide risk preference policies based on future strategies. The cost of the allocated capital is

Table of Contents

used in evaluation of our business portfolio. Through this process, we can maintain a current understanding of the sufficiency of our capital, and allocate more resources to business units with the best growth potential, taking into account the internal and external business climate and competitive environment.

Top management regularly reviews risks in each business unit to evaluate the risk situation and any deviation from the original asset and profit plans, and to evaluate the business unit's profitability with respect to its allocated capital. Management also compares shareholders' equity with risk in the group overall, and takes the results into account when considering the capital management policy.

The ORIX Group, in addition to the departmental monitoring described above, also monitors on an individual transaction and total portfolio basis.

For individual transactions, the operating environment, strategy, risk and profitability are evaluated prior to the transaction, and changes to the operating environment and cash flow are monitored after execution. For new transactions requiring monitoring, transactions exceeding a certain monetary amount or transactions for which there has been a major change in circumstance or strategy, the responsible department head, may, in his discretion, report the transaction to the appropriate executive committee.

In analyzing a total portfolio, the following characteristics are monitored: client tier, region, transaction type, risk type, debt status and concentration of major debtors. Some of these are scrutinized and analyzed by each operating department according to its industry characteristics and some are analyzed from a group perspective by the Risk Management Headquarters. Monitoring results are regularly reported to the executive committee. Measures are taken to rapidly understand and minimize all types of risk.

Main Risk Management

The ORIX Group views credit risk, market risk, business risk, risk related to fund procurement, legal risk and other operational risk as the main risks facing the ORIX Group. Each risk is being managed according to its individual characteristics.

Credit Risk Management

The ORIX Group defines credit risk as uncertainty in future investment recovery caused by the fluctuation of cash flow from debtors and investees. As our main business is financial service, we manage credit risks in almost all business segments, including the Corporate Financial Service segment, the Investment Banking segment and the Overseas Business segment.

Credit Risk Management mainly consists of (i) credit evaluation for each transaction, (ii) portfolio management and (iii) implementation of corrective actions for the management of problem assets.

Edgar Filing: ORIX CORP - Form 20-F

We emphasize credit evaluation at the beginning of each transaction as well as continuous risk monitoring of individual credit after the transaction has been made, sufficiency of collaterals and guarantees, liquidation of debt and the distribution of debtors and their business fields. Monitoring in the aggregate is important, as risks associated with individual debtors are high.

In connection with each credit transaction, the relevant sales and marketing department and the Risk Management Headquarters each performs a comprehensive customer credit evaluation based on the relevant customer's business performance, financial position and projected cash flow. The evaluation also covers the collateral or guarantees, terms and conditions and potential profitability of the transaction. The profitability is based on the corporate value contribution spread (calculated from investment yield, default rates, preservation situation, funding cost, capital cost and administrative cost), which helps us to evaluate risk quantitatively.

Regular evaluation of individual debtors, and of our comprehensive portfolio, as well as measures to set limits to credit lines, allow us to control exposures to the markets with potentially high risks.

Table of Contents

The ORIX Group identifies problem assets, including debtors who have petitioned for bankruptcy or civil rehabilitation, or other insolvency proceedings, whose bank transactions are suspended, whose bills are dishonored, whose debts are not collected for three months or more, and whose businesses have deteriorated or who are involved in fraud. Under the current business environment, corrective actions for the management of problem assets is the most important task, and we respond promptly based on various conditions of each transaction.

In making collections, we believe an early response is extremely important. When information is received regarding the emergence of problem assets, the relevant sales and marketing departments, in cooperation with the Risk Management Headquarters, take steps to secure collateral or other guarantees and to begin the collection process. The Risk Management Headquarters plays an important role in the collection process by drawing on its accumulated experience in collections and by working closely with our sales and marketing departments. The accumulated experience is reflected in our evaluation criteria of each credit transaction and portfolio analysis.

Market Risk Management

The ORIX Group defines market risk as the risks of negative impact on our portfolio or on the market value of our financial assets caused by variation in market conditions, such as interest rates, exchange rates, stock prices, product prices or credit spreads. For further discussion regarding our interest rate risks and exchange rate risks related to fund procurement, please see [Risk Management Relating to Fund Procurement](#) [Interest Rate Risk and Exchange Rate Risk Management](#) below.

We manage market risks in the following segments:

1. Investment Banking Segment: Private equity investment, venture capital investment, proprietary investment; and
2. Retail Segment: Price fluctuations in operating assets in our life insurance business;
3. Overseas Business Segment: Price fluctuation in investment securities in the United States.

We monitor risks in our portfolio by quantifying risks based on market fluctuations and defining acceptable levels of risks. The risks are quantified based on statistical methods, qualitative scenario analyses, stress tests and sensitivity analyses.

As non-trading assets are mainly impacted by credit risk, we set appropriate market risk parameters based on types of assets or on specific business portfolios and evaluate the impact of market fluctuation.

In connection with investments in securities by ORIX Life Insurance in Japan and ORIX USA in the United States, our investment departments regularly monitor interest rate policies, economic conditions and securities and financial market trends. We also analyze on a daily basis price movements of securities, profits and losses on each investment and financial conditions of companies in which we invest, as well as other factors. Our risk management departments review and compare daily reports against internal guidelines and macro-and microeconomic conditions.

Business Risk Management

Various risks are inherent to our daily business, such as the risks associated with our judgment in our investments, our selection of new product development and our competitors' marketing strategies or pricing. The ORIX Group defines business risk as risks related to entry into the market, uncertainty of future business performance caused by changes in business environment and market fluctuation risks in used car market and the real estate market.

We monitor the scenario analyses and stress tests for each of our business risks. The evaluation and verification of the cost of withdrawal from a business is also subject to monitoring.

Table of Contents

We manage market risks in the Maintenance Lease segment and the Real Estate segment. A principal risk relating to operating leases in the Maintenance Lease segment is the risk of fluctuation in the residual value of the leased property. In order to control fluctuations in residual value, we monitor our inventories of leased items, market environments and the overall business environment.

We primarily limit our ship and aircraft operating leases to general-purpose ships and aircraft that are comparatively easy to re-lease, as these operating lease items have high residual value risks. We monitor the market values of these ships and aircraft and sell assets as necessary or desirable to reduce our exposure to downward trends in the market or take advantage of upward trends.

The automobile industry has a well-established market for used cars, so most of our vehicles are able to be sold. We keep current on trends in the used car market by continuously monitoring the ratio of residual value to purchase cost, selling price trends and other indicators, thereby adjusting estimated residual value in new transactions.

Risk Management Relating to Fund Procurement

The ORIX Group views liquidity risks, interest rate risks and exchange rate risks as significant risks associated with fund procurement. We establish asset-liability management (ALM) rules so that we can maintain an accurate understanding of these risks and respond to them appropriately. The risk management situation is understood and the major perspectives are analyzed by the Corporate Planning and Financial Control Headquarters, which reports the results to the CFO and Executive Officers, in accordance with the ALM rules above mentioned, and takes necessary actions.

Liquidity Risk Management

Liquidity risk is the risk that the ORIX Group will be unable to obtain the necessary funds to meet its commitments and obligations, or be forced to procure funds at unusually high interest rates, due to market turmoil or deterioration in ORIX's financial condition. The important objective of our liquidity risk management is to create a liquidity structure that matches asset size and structure to our management goals. In order to achieve this, we place emphasis on maintaining high flexibility in our balance sheet. At the same time, we seek to diversify funding sources to reduce refinancing risks, which may be caused by large market fluctuations. Specifically, we monitor liquidity by projecting future cash flow from the maturity of assets and liabilities, conducting liquidity risk analysis including future trends and assuming such stresses as financial market turmoil and a reduction of ORIX's credit ratings. Measures we use to manage liquidity risk include diversifying funding sources, establishing committed credit lines with financial institutions and adjusting the balance of short-term and long-term debt, taking into account prevailing market conditions.

Interest Rate Risk and Exchange Rate Risk Management

We take various measures to properly understand and manage the interest rate risk and exchange rate risk associated with assets and liabilities. In accordance with the ALM rules, policies for ALM are set by the ICC every six months, and reports on the present status of our risk profile based on the ALM policies and future responses are made at the Group Executive Officer meetings.

Edgar Filing: ORIX CORP - Form 20-F

Interest rate risk represents our exposure to assets and liabilities whose values fluctuate with interest rates. For example, the ORIX Group may incur a loss if the fair value of its assets and liabilities declines due to a change in interest rates, or earnings may decline if an increase in interest rates causes interest expenses to increase by an amount greater than the increase in interest received. We analyze these risks from a variety of perspectives, including basis point value (BPV), slope point value (SPV), value at risk (VaR), as well as the effect on income for a given period. After making quantitative and qualitative assessments of interest rate risk, we manage our business to keep the overall amount of interest rate risk within a fixed range.

We manage exchange rate risk by using foreign currency loans, foreign exchange contracts, currency swaps and other instruments to hedge the exchange rate fluctuation risks that arise in connection with our business

Table of Contents

transactions in foreign currencies and overseas investments. For unhedged foreign currency-denominated assets and investments to overseas subsidiaries, we monitor and manage exchange rate risks by following the same ALM rules used in managing interest rate risks, in addition to utilizing VaR and other metrics.

Derivative Risk Management

We may use derivatives as hedges if we decide to hedge interest rate risk and exchange rate risk after consulting our ALM rules. We use derivatives to mitigate or offset changes in cash flow or the fair value of assets and liabilities due to interest rate fluctuations. Derivatives used to hedge interest rate risk include interest rate swaps and caps. To hedge exchange rate risk accompanying our business transactions in foreign currencies and overseas investments, we employ currency swaps, foreign exchange contracts and other derivatives. We also use foreign currency borrowings to hedge these exchange rate risks.

The use of derivatives exposes us to credit risk on such derivative transactions. We monitor the notional principal amounts, current prices, transaction types and other variables for each counterparty on a regular basis.

We set derivative transaction management rules and guidelines, and we have a system of internal controls for derivative transactions.

Legal Risk Management

Transactional legal risk is a major type of legal risk that we face in our business. Transactional legal risk includes the risk that the contracts into which we enter contain unintended conditions, are not legally effective or cannot be carried out as stipulated in the contract, or that the transactions in which we participate involve activities that violate, or are not in strict compliance with, applicable laws. When we consider a new transaction, new product development or other new business activities, our risk management system requires an examination of these types of legal risks.

In an attempt to prevent and mitigate such legal risks, in Japan we require, in principle, that our divisions related to legal affairs be involved in transactions from the early stages when a transaction is first considered through the documentation process in which transaction-related contracts are prepared for internal review and final approval. Contracts may not be approved internally unless they follow our prescribed rules and guidelines. Our divisions related to legal affairs are also involved in the process for the approval of such contracts in accordance with our internal rules. Depending on the size and importance of a given transaction, we may also utilize the expertise of outside lawyers. To ensure that proper legal procedures are followed in connection with legal disputes and litigation, we require that our divisions related to legal affairs be involved in such disputes and litigation, including lawsuits that have been, or are expected to be, brought against us and lawsuits that we bring, or expect to bring, against third parties. The status of any lawsuits is reported to the Group Executive Officer meetings regularly.

In addition to establishing internal regulations necessary to observe applicable laws, we also monitor potential changes in relevant laws, as new information becomes available. As necessary or appropriate, we may also initiate preparatory measures to address the requirements of new laws that are expected to take effect in the future and implement steps to ensure that we are, and continue to be, in compliance with new laws as they take effect.

Edgar Filing: ORIX CORP - Form 20-F

Overseas, each Group company is working to avoid, prevent and mitigate risks through programs involving an in-house lawyer and, when necessary, with the involvement of outside lawyers and others.

In addition, our divisions related to legal affairs conduct monitoring activities to prevent the violation of intellectual property rights, and quickly take necessary measures when violations are discovered.

Other Operational Risk Management

As our business has expanded in recent years, the importance of operational risk management has increased as a significant component of overall risk management. Operational risk is defined as the risk of loss resulting

Table of Contents

from inadequate or failed internal processes, people and systems, or from external events. As part of operational risk management, we are also continually seeking to strengthen our internal control and compliance functions.

The Risk Management Headquarters conducts quantitative and qualitative evaluation and regular monitoring of risk. ORIX Computer Systems is working on the reduction of operational risks by the maintenance and administration of internal systems. The Internal Audit Department monitors the effectiveness and efficiency and compliance with applicable rules and regulations by our various operations; the status of improvements to and compliance with our internal rules; and the status of each department's self-examinations based on an annual internal audit plan that focuses on material risks. As a result of monitoring, we evaluate the current status of internal controls and make improvements as necessary.

Additionally, in order to raise awareness of compliance issues among employees, the Legal and Compliance Department has produced a compliance manual and distributed it to all employees in Japan. Each year, the department also plans and executes a compliance improvement program encompassing such activities as identifying and evaluating compliance risks, selecting the important risks, and taking measures to reduce those risks. Based on the programs results, more effective compliance systems are built.

Regarding natural disaster risk, ORIX has established Natural Disaster Risk Management Regulations. ORIX has developed a system in which the Human Resources and Corporate Administration Headquarters supervises the coordination of recovery activities after the occurrence of a natural disaster in Japan, while the Global Business and Alternative Investment Headquarters handles the overseas function. By distributing a natural disaster manual to all its employees in Japan and carrying out disaster drills in accordance with these regulations, ORIX is maintaining a framework to respond appropriately to a natural disaster.

Enhanced Risk Management in line with Recent Changes in the Business Environment

Due to the effects of the global financial crisis, significant changes have recently occurred in the environment surrounding the ORIX Group. Under the prevailing economic environment, the ORIX Group has shifted to a management policy emphasizing stability over growth. Balance sheet control is now the most important operational issue. Specifically, our risk management framework is being enhanced to manage liquidity risk, volatility risk related to profitability and risk involved in investment and finance.

Regarding liquidity risk, we are stabilizing our funding structure in response to dysfunction in the short-term financial and capital markets through decreasing our percentage of funding from the capital markets, including CP, along with flexibly increasing long-term funding. In addition, to protect against excessive balance sheet growth, we are controlling the asset levels of each business unit by considering the business units' current position and doing regular scenario analyses. In order to do so, exchanging quantitative and qualitative information between business units is vital. Information about changes to the business environment and to our operating cash flow is shared in bi-monthly meetings between the Treasury Department and the head of each business unit.

Regarding risk related to changes in profitability, impacts on profitability resulting from changes in the quality and cash flow investment assets and loan assets, market changes and status of operations are carefully scrutinized. The ORIX Group has a large portfolio, including financial service operations, and we perform complete and transparent monitoring and control according to the characteristics of each operation. The risk situation for each business unit is analyzed both quantitatively and qualitatively on both the individual transaction and portfolio levels, and the necessary measures to minimize changes in profitability are implemented. Contents of individual business unit level analyses are shared throughout the Group, and risk related to changes in profitability is controlled by capitalizing on a diverse business portfolio through measures including managing risk through intra- business unit cooperation.

In addition to each unit's response to the changing business environment, quantitative and qualitative evaluation of events that may be factors for changes in profitability are performed from the viewpoint of each business unit during weekly meetings (ERM meetings) of the people in charge of each business unit of the company. The results of the evaluation are reflected in Group-wide or business unit-level measures.

Table of Contents

We will seek to control investment and finance risk specifically through emphasizing real estate risk management and the enhanced monitoring of investments. We attempt to minimize real estate-related business risk by capitalizing on our knowledge and experience acquired through our development, rental, operating, servicing and asset management operations, and making use of our network to actively promote the leasing and sales of held real estate as well as increase real estate collateral value.

Regarding enhanced monitoring of investments, we regularly monitor the progress of the original expectations for each transaction and, when necessary, develop a framework to minimize risk by supplying personnel and business support such as enhanced governance and management.

Examples of Main Business Risk Management

Real Estate-related Businesses

The activities of ORIX's domestic real estate-related operations consist mainly of loans to real estate companies in the Corporate Financial Services segment; development and leasing of office buildings, commercial facilities, residentials and logistics centers; sales of condominiums; the operation of hotels, golf courses and training facilities in the Real Estate segment; real estate finance such as non-recourse loans in the Investment Banking segment; and housing loans in the Retail segment. These businesses are susceptible to business risk from a downturn in the real estate market; however, the content, monitoring points and risk management methods differ accordingly. We are planning to minimize risk and increase profitability through the comprehensive application of the Group's wide-ranging real estate-related expertise, in addition to our accumulated financing expertise in each of these businesses.

Loans to Real Estate Companies

Credit risk is the main risk associated with real estate collateral financing. However, loans to real estate companies is capital for the purchase and development of a property and, because it is in no small way impacted by the condition of the real estate market, information is shared with another real estate-related department within the ORIX Group, which is used in monitoring the loan client. In addition, even in the event where the credit of the loan client worsens and the total amount cannot be collected, a purchaser or tenants may be introduced using the network of another real estate-related department and collection may proceed by taking the collateral as an asset and increasing the value.

Real Estate Business

As business risk has the greatest influence on final profitability in the real estate business, emphasis is placed on monitoring business strategies and schedules. The business strategy is reconsidered in the case of a major divergence from the initial forecast. The following are considered for condominiums: development and sales schedule, unit sales progress, and rate of return. The following are considered for development and rental properties: development and retention schedule, and NOI yield. We are focusing on creating manuals and educating employees in order to minimize business and operational risk in the operating asset business.

Real Estate Finance Business

ORIX recognizes market risk and credit risk as the major risks to the real estate finance business under a normal operating environment. Because of this, in our non-recourse loan business we monitor the loan-to-value ratio, the debt-service coverage ratio and other terms and conditions such as equity provided by other companies, interest reserve and guarantees, in addition to controlling risk through swift response to changes in the market. However, in a stress-case such as a significant drop in market liquidity, we diligently monitor the cash flow from the properties to improve the terms and conditions of our loans. In addition, capitalizing on our real estate expertise, we can flexibly respond to the changing business environment by taking on business risk as a profitable operation through the acquisition and holding of the collateral.

Table of Contents

Housing Loan Business

The housing loan business of ORIX Trust and Banking manages risk housing individual screenings, each of which consists of a comprehensive evaluation including the cash flows that can be derived from the property, collateral value and the client's potential to repay. When making housing loans to individuals for the purchase of a property for self-occupancy purposes, we focus on the stability of the client's income, emphasizing disposable income. When making loans for the purchase of a condominium for investment purposes we carry out a stress test on clients that have several properties to determine the amount of revenue in the event that rental revenues decrease significantly. When making a loan for the purchase of an apartment building, we perform a rental simulation to estimate vacancy rates based on the surrounding market, the impact of a rise in interest rates and expected future cost. Through this simulation, we evaluate the potential client's ability to repay.

Principal Investment Business

Credit risk and market risk are the main risk of the principal investment business conducted by the Investment Banking segment, which varies according to the stage of development. Credit risk is high for companies for which we are raising corporate value due to the focus on cash flow. Market risk increases as time for collection nears, due to measuring the corporate value by referencing the corporate values of similar industries.

When making our initial investment decision, we do a credit evaluation, analyzing the company's credit risk and assessing its cash flow. Also, we perform a multi-faceted evaluation, engaging administrative departments such as the accounting and legal departments to consider the characteristics of the operation and investment scheme. Specifically, we analyze the operating environment, corporate strategy and method for increasing corporate value, and verify the adequacy of profitability, estimated investment timeline and exit strategy scenarios.

After an investment has been made, each transaction is monitored for deviations in cash flow, increased corporate value, exit strategy, corporate strategy, and business environment from the original scenario. The frequency of monitoring has been increased during these times of rapid changes in the business environment, and we are simultaneously verifying the adequacy of investment scenarios and swiftly taking the necessary actions. We are working to enhance the management of investments that have a significant impact on the ORIX Group through such measures as the dispatch of management personnel. We also take the result of monitoring into account for risk calculations for each investment.

U.S. Operations

The ORIX Group conducts investment banking operations in the U.S., providing investment and finance services, such as investment in securities including corporate finance and CMBS, and advisory and corporate valuation services related to M&A and corporate financial restructuring. Investment and finance business is conducted by our U.S. subsidiary. Investment banking business is conducted by Houlihan Lokey Howard & Zukin (Houlihan Lokey) under our U.S. subsidiary. The following sections overview the risk management systems applied to these operations.

Investment and Finance Business

Edgar Filing: ORIX CORP - Form 20-F

The main risks for the investment and finance business are credit risk, market risk and operational risk.

At the time of origination, we assign an internal credit rating for each investment and loan taking into consideration the credit status of the borrower or company in which we are investing and the collateral for the transaction. We continually monitor credit throughout the financing period, reconsidering the internal credit rating at fixed intervals. Monitoring is conducted by performing a comprehensive analysis of the investment and/or loan, taking into account the profits and losses and cash flow of the company, competitive edge, corporate value and balance sheet stability, which is reflected in our internal rating. For investments and loans with a rating requiring attention, administrative departments outside of the Accounting Department, Legal Department and the department responsible for investments and loans participate to produce an objective and compound evaluation the deciding management policies such as provisions and impairments.

Table of Contents

Regarding market risk, we monitor on a daily basis the market value and mark-to-market valuation of our investments and loans. In addition, we proactively manage risk by referring to the credit risk information for each investment and loan that we acquired during the credit risk management process and by conducting early exits to secure profits or minimize losses.

Regarding operational risk, the investment, loan provider and manager are separated. Each acts independently according to the financing process manual. Also, the internal audit department regularly inspects the performance of our investing and lending operations.

Investment Banking Business

Operational risk is the main risk in the investment banking business.

Houlihan Lokey complies with operating standards set forth by authorities responsible for overseeing the investment banking business such as the U.S. Financial Industry Regulatory Authority (FINRA) and U.K. Financial Services Authority (FSA). It is vital that the advice and evaluation forms provided as a part of the investment banking business maintain quality and operational methods that meet these standards. In order for Houlihan Lokey to provide high-quality advisory and evaluation services according to the appropriate methods, operational risk is managed through such methods as an internal quality control committee.

Retail Businesses

Life Insurance Business

The main business risk in the life insurance business is risk associated with accepting insurance contracts.

Before finalizing insurance contracts, ORIX Life Insurance takes thorough measures to prevent the acceptance of fraudulent contracts by rigorously examining health condition declarations and medical examination reports as well as by taking steps to confirm associated marketing-related situations. These measures promote the fair and equitable treatment of policyholders and, because they are important determinants of future insurance-related profitability, ORIX Life Insurance promotes their effective execution by ensuring the hiring of sufficient staff and encouraging staff to acquire specialized know-how. ORIX Life Insurance also educates and instructs representative branch staff and agents to enhance compliance regarding the prevention of personal information leaks and regarding the solicitation of insurance.

Consumer Card Loan Business

Credit risk is the main risk associated with the consumer card loan business.

Edgar Filing: ORIX CORP - Form 20-F

New transactions capitalize on extensive individual credit evaluation know-how, as well as a proprietary scoring system that is founded on a database accumulated over many years. In accordance with the self-regulations established by the Moneylending Business Law and the Japan Financial Services Association, we evaluate customer creditworthiness based on an analysis of customer attributes, such as income level, as well as diverse other factors that may affect the borrower's ability to repay, such as past credit quality and other debt. Then we set the levels of interest rates and credit limits in line with each customer's credit risk.

Regarding card loan contracts, depending on customers' financial condition at the initial contract date, we obtain information from several consumer credit bureaus and undertake subsequent credit evaluations at regular intervals to constantly monitor changes in the customers' financial condition.

These subsequent credit evaluations examine changes in customers' attributes and other debt, and analyze the customers' repayment history with respect to ORIX Credit and other creditors. Moreover, particularly regarding customers with deteriorating credit, we provide counseling programs and through those programs work to gain a more detailed understanding of customers' situations.

Depending on the results of these subsequent evaluations, we may discontinue supplementary loans or reduce credit limits, in order to continually control credit risk.

Table of Contents

Furthermore, the implementation of total volume controls is expected to become effective by June 2010 pursuant to the revised Moneylending Business Law. According to the regulations, in principle if a borrower's loans exceed one-third of the borrower's yearly income (including existing loans), it will become necessary to decline applications for new loans and stop increased financing.

GOVERNMENTAL AND POLITICAL POLICIES AND FACTORS

In our opinion, no current governmental economic, fiscal, monetary or political policies or factors have materially affected, or threaten to materially affect, directly or indirectly, our operations or the investments in our Shares by our U.S. shareholders.

Item 6. Directors, Senior Management and Employees

DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

COMPANY WITH COMMITTEES BOARD MODEL

Since the establishment in June 1997 of an Advisory Board, which included experienced and resourceful individuals from outside the Company, ORIX has strengthened its corporate governance framework with the aim of objectively determining whether its business activities are emphasizing the interests of its shareholders. In June 1998, we introduced a Corporate Executive Officer system to help separate strategic decision-making functions from day-to-day administrative operations. In June 1999, ORIX reduced the number of members on its Board of Directors, arranged for three Advisory Board members to fill two positions as independent directors and one position as an advisor to the Board, and phased out the Advisory Board. In addition, the Nominating Committee and the Compensation Committee were established to operate as support units for the Board of Directors.

At the 40th annual general meeting of shareholders held in June 2003, shareholders of ORIX passed a resolution to amend ORIX's articles of incorporation and allow the Company to adopt a Company with Committees board model, which became possible as a result of the amendment to the Law for Special Provisions for the Commercial Code of Japan, or the old Commercial Code, effective April 2003. The Company with the Committees board model replaced the former system that required corporate auditors to monitor the board on behalf of shareholders.

When the Company Law of Japan, or the Company Law, came into effect in May 2006, ORIX automatically became a company with a revised Company with Committees board model under the related enacting provisions for the Company Law, through which any company with a Company with Committees board structure under the old Commercial Code was deemed to have amended its articles of incorporation, to include a provision regarding the structure of the board of directors, committees and accounting auditors. There are no substantial differences between the system for companies with a Company with Committees board model under the old Commercial Code and the revised system for companies with a Company with Committees board model under the Company Law.

This Company with Committees board model, as stipulated under the Company Law, requires the establishment of three committees, the Audit, Nominating and Compensation Committees, composed of members of the board of directors. Each committee is required to consist of three or

Edgar Filing: ORIX CORP - Form 20-F

more directors, a majority of whom must be outside directors. Directors may serve on more than one committee. The term of office of committee members is not stipulated under the Company Law. However, as a committee member must be a director of the company, the term expires at the close of the first annual general meeting of shareholders after his or her election.

Under the Company Law, an outside director is defined as a director who does not have a role in executing the company's business, meaning those who have not assumed, in the past, the position of a

Table of Contents

representative director or a director with the role of executing the business, executive officer (shikkou-yaku), manager or any other employee of the company or its subsidiaries, and who does not currently assume such position of such company or subsidiaries. Each committee of ORIX is currently composed entirely by outside directors.

Board of Directors

ORIX's board of directors has the ultimate decision-making responsibility for our important affairs. It also monitors the performance of the directors and executive officers, and receives performance reports from the executive officers. The articles of incorporation of ORIX provide for no less than three directors. Directors are elected at general meetings of shareholders. The term of office for any director, as stipulated under the Company Law, for companies that adopt a Company with Committees board model, expires at the close of the first annual general meeting of shareholders after his or her election.

Under the Company with Committees board model, the board of directors carries out decisions on the day-to-day administration related to items that, either as a matter of law or dictated by our articles of incorporation, cannot be entrusted to executive officers, and important items as determined by the regulations of the board of directors. The Board of directors is responsible for approving and monitoring on a regular basis, ORIX's policies which includes corporate planning such as capital management, fund procurement and personnel strategies. Aside from such items, the Board of Directors delegates decision making regarding operational execution to Representative Executive Officers. The Board of Directors also receives reports from executive officers and committees regarding the status of business execution.

With the exception of the aforementioned items, the board of directors may delegate substantial management authority to executive officers under this system. Executive officers make decisions on management issues as delegated by the board of directors and perform the business of the company. For example, the board may delegate to executive officers the authority to approve issuances of shares of capital stock and bonds. In addition, the Company Law permits an individual to simultaneously be a director and an executive officer of the company.

From April 1, 2008 through March 31, 2009 the Board of Directors met 10 times. The attendance rate of directors for these meetings was 99%.

The Board of Directors includes 11 members, five of whom are outside directors.

Audit Committee

Under the Company with Committees system, the directors of the Company that compose the Audit Committee are not permitted to be executive officers, executive directors, managers, any other employees or accounting counselors (kaikai san-yo) of the Company or its subsidiaries. Under the Company with Committees board model, the Audit Committee generally has powers and duties to monitor the performance of the directors and executive officers in the performance of their duties, as well as the right to propose the appointment or dismissal, or to pass resolutions for refusing reappointment of the Company's independent certified public accountants at the annual general meeting of shareholders. Any proposal for appointment or dismissal of a certified public accountant needs to be submitted to a general meeting of shareholders for approval. In furtherance of its responsibilities, the Audit Committee has the power to request a report of business operations from any director, executive officer, manager or other employee at any time, and to inspect for itself the details of the Company's business operations and financial condition.

Edgar Filing: ORIX CORP - Form 20-F

The Audit Committee decides the person responsible in each department who will report to the Audit Committee, and evaluates the administration of executive officers and internal controls of the Company by considering the following five points: First, the Audit Committee confirms the report related to the results of the audit and items indicated for improvement that has been prepared by the executive officer responsible for the corporate audit. Second, the Audit Committee engages in discussions which are the basis of our business

Table of Contents

strategy, after it receives explanations from the heads of each business department and presidents of group companies that focuses, in particular, on risk control. Third, the Audit Committee confirms the business environment through reports, which it receives from the executive officer responsible for the accounting department, which covers the revenue composition of each department and any problem areas related to the business. Fourth, the Audit Committee confirms the quarterly reports regarding the direction of the company and the execution of important business matters that it receives from the representative executive officer. Fifth, the Audit Committee confirms the reports that it receives from the independent certified public accountants regarding whether there are any material items relating to the audit.

The Audit Committee Secretariat was established to provide advice to the Audit Committee regarding the execution of its duties.

The Audit Committee met 8 times from April 1, 2008 through March 31, 2009. The attendance rate of these meetings was 94%.

Teruo Ozaki (Chairman), Yoshinori Yokoyama, Hirotaka Takeuchi and Takeshi Sasaki comprise the Audit Committee. All four members are outside directors.

Nominating Committee

The Nominating Committee is authorized to propose the slate of director appointments or dismissals to be submitted to the annual general meeting of shareholders. Directors are elected from a list of candidates at the annual general meeting of shareholders. In addition, the Nominating Committee deliberates on the appointment or dismissal of our executive officers and group executives, although this is not required under the Company Law.

From April 1, 2008, through March 31, 2009, the Nominating Committee met 8 times. The attendance rate of these meetings was 95%.

The Nominating Committee comprises five members: Hirotaka Takeuchi (Chairman), Yoshinori Yokoyama, Paul Sheard, Takeshi Sasaki, and Teruo Ozaki. All five members are outside directors.

Furthermore, the Nominating Committee determines whether the conditions necessary for director independence have been met in accordance with nomination criteria for outside directors. Presently all outside directors meet the necessary conditions, which are:

No individuals, or their family members(1), may receive a compensation of more than ¥10 million annually excluding compensation as an employee for family members, and excluding the individual's compensation as outside directors, from ORIX or its subsidiaries.

No individuals, or their family members(1), may be a major shareholder of ORIX (more than 10% of issued shares) or represent the interests of a major shareholder.

Edgar Filing: ORIX CORP - Form 20-F

No individuals may have served as an executive officer or an employee of ORIX or its subsidiaries within the past five years. No family members(1) may have served as an executive officer of ORIX or its subsidiaries within the past five years.

There must be no concurrent directorship relationship between the company for which the individual is serving as executive officer and ORIX, defined as being a relationship in which the company for which the individual is serving as an executive officer has a director that is also an executive officer of ORIX or its subsidiaries.

There must be no material conflict of interest or any possible conflict of interest that might influence the individual's judgment in performing their duties as an outside director.

Note: (1) Family members include a spouse, those related within the second degree by consanguinity or affinity, or other kin living with the outside director.

Table of Contents

Compensation Committee

The Compensation Committee has the authority to set the policy for determining compensation for directors and executive officers in accordance with the Company Law and to set the specific compensation packages (including all bonuses and other financial remuneration provided as compensation for the performance of their duties as directors or executive officers) for each individual director and executive officer. Director and executive officer compensation information is disclosed in accordance with the Company Law.

Policy of Determining Compensation of Directors and Executive Officers

Our business objective is to increase shareholder value over the medium- and long-term. We believe in each director and executive officer responsibly performing his or her duties and in the importance of cooperation among different business units in order to achieve continued growth of the ORIX Group. The Compensation Committee at ORIX believes that in order to accomplish such business objectives, directors and executive officers should place emphasis not only on performance during the current fiscal year, but also on medium- and long-term results. Accordingly, under the basic policy that compensation should provide effective incentives, we take such factors into account when making decisions regarding the compensation system and compensation levels for our directors and executive officers. Taking into consideration this basic policy, we have established separate policies for the compensation of directors and that of executive officers in accordance with their respective roles.

Compensation Policy for Directors

The compensation policy for directors who are not also executive officers aims for a level and composition of compensation that is effective in maintaining supervisory and oversight functions of executive officers' performance in business operations, which is the main duty of directors. Specifically, while aiming to maintain competitive compensation standards, our compensation structure consists of a fixed compensation component based on duties performed, a shares component of compensation(1), and stock options.

Compensation Policy for Executive Officers

The compensation policy for executive officers, including those who are also directors, aims for a level of compensation that is effective in maintaining business operation functions, while incorporating in its composition a component that is linked to current period business performance. Specifically, while aiming to maintain competitive compensation standards, our compensation structure consists of a fixed compensation component based on positions and duties performed, a performance-linked component, a shares component of compensation(2), and stock options.

From April 1, 2008 through March 31, 2009, the Compensation Committee met 8 times to determine policies. The attendance rate of these meetings was 88%.

Edgar Filing: ORIX CORP - Form 20-F

The Compensation Committee is comprised of Yoshinori Yokoyama (Chairman), Hiroataka Takeuchi, Takeshi Sasaki and Teruo Ozaki. All four members are outside directors.

Note: (1)(2) The shares component of compensation is a system in which points are annually allocated to directors and executive officers based upon prescribed standards and the compensation provided is the amount equal to the accumulated number of points multiplied by the stock price at the time of retirement. Under this system, directors and executive officers have an obligation to purchase shares from the company at the stock price that prevails at the time of their retirement using the after-tax compensation provided.

Table of Contents**AUDITORS INDEPENDENCE**

The ORIX Group must appoint independent certified public accountants, who have the statutory duty of examining the non-consolidated financial statements prepared in accordance with accounting principles generally accepted in Japan, or Japanese GAAP. The independent certified public accountants must present an auditor's report to the Audit Committee and the executive officers specified by the board of directors. The independent certified public accountants are also responsible for auditing financial statements that are submitted to the Kanto Local Finance Bureau of the Ministry of Finance (Kanto Local Finance Bureau). The board of directors is required to submit the audited consolidated and non-consolidated financial information to the annual general meeting of shareholders, and this information is also required to be submitted to the Tokyo Stock Exchange, the Osaka Securities Exchange and the Kanto Local Finance Bureau.

Presently, our independent certified public accountants are KPMG AZSA & Co. The independence of KPMG AZSA & Co. has been considered and confirmed by our audit committee. The audit committee also confirmed that no management-level individuals are currently seconded to or from KPMG AZSA & Co. However, Mr. Teruo Ozaki, a member of our audit committee was previously a partner of KPMG AZSA & Co. until September 2003.

In addition to the non-consolidated financial statements that are prepared under Japanese GAAP, we also prepare consolidated financial statements in accordance with accounting principles generally accepted in the United States, or US GAAP. US GAAP consolidated financial information is used by management for evaluating our performance and forms the basis for presentation of financial information to our shareholders. The consolidated financial statements prepared in accordance with US GAAP that are reported at the annual general shareholders meeting and included in this annual report filed with the United States Securities and Exchange Commission, or the SEC, have been audited by KPMG AZSA & Co. which is registered with the PCAOB in the United States.

In the opinion of management, the provision of non-audit services did not in any way influence the independence of the audits conducted by KPMG AZSA & Co. because management took full responsibility for decisions relating to the activities affected by these services and KPMG AZSA & Co. and its affiliates did not assume any of the management authority and duties.

THE DIRECTORS

The directors of ORIX as of June 26, 2009 are as follows:

| Name (Date of birth) | Current positions and principal outside positions | Business experience | Share-holdings as of June 26, 2009 |

- Notes: (1) Yoshihiko Miyauchi started his career at Nichimen & Co., Ltd. currently Sojitz Corporation, in 1960. After four years, he joined Orient Leasing Co., Ltd., now ORIX Corporation, as one of the founding 13 members. In 1980, he was appointed president and CEO. Under his leadership, ORIX has become an integrated financial services company that is consistently at the forefront of innovation. He has been a strong advocate of deregulation, and he served as the president of the Council for Promoting Regulatory Reform, an organization reporting directly to the Cabinet, until October 2006. He earned a BA from Kwansai Gakuin University in 1958 and an MBA from the University of Washington in the USA in 1960.
- (2) Yukio Yanase held a number of positions at Saitama Bank currently Resona Bank, Ltd. including roles in human resources, international operations, risk management, corporate planning and corporate communications, and investor relations. In October 2001, he was appointed president of Asahi Bank (currently Resona Bank). He joined ORIX Corporation as an advisor in November 2003. The following year, he was appointed executive officer for ORIX's overseas operations in addition to his responsibilities for the Office of the President. In February 2005, he was named deputy president and was additionally given responsibility for the Alternative Investment & Development Headquarters. He became a director in June 2005, and was appointed president and COO of ORIX Corporation in January 2008. He graduated from Waseda University's School of Law in 1968.
- (3) All ORIX directors are engaged full-time except Messrs. Yoshinori Yokoyama, Paul Sheard, Hiroataka Takeuchi, Takeshi Sasaki, and Teruo Ozaki.

EXECUTIVE OFFICERS

In 1998, ORIX implemented a corporate executive officer system, which was adopted voluntarily to help separate strategic decision-making functions from day-to-day administrative operations. Under this system, the board of directors were mainly responsible for the strategic decision-making function of ORIX's operations

Table of Contents

while the corporate executive officers were responsible for carrying out the decisions made by the board of directors. Also, a group executive system was set up to share information with management of certain subsidiaries.

With the adoption in June 2003 of the new corporate governance Company with Committees board model, executive officers were nominated as stipulated under the old Commercial Code of Japan. Before the adoption of the Company with Committees board model, the term shikkou yakuin (corporate executive officer) was used by us to refer to those executives responsible for executing the decisions made by the board of directors, but there was no specific Japanese law covering the responsibilities and duties of corporate executive officers as this system was voluntarily adopted. Pursuant to the old Commercial Code of Japan, our executive officers under the Company with Committees system now bear responsibilities to the Company and to third parties, as the case may be, in a manner similar to the responsibilities borne by directors of companies that still employ a traditional corporate governance system.

When the Company Law came into effect in May 2006, the Company adopted the Company with Committees board model under the Company Law. There is no substantial difference between the Company with Committees board model under the Commercial Code of Japan and under the Company Law.

The representative executive officer makes our important business execution decisions after deliberations by the Investment and Credit Committee in accordance with the various regulations of the Company. The business execution duties of executive officers are decided by the board of directors and the representative executive officer and these duties are carried out based upon the various regulations of the Company.

Important decision making related to business execution, monitoring, discussions, and information sharing is carried out by the following bodies:

Investment and Credit Committee

The Investment and Credit Committee, or ICC, which includes members of the top management and the executive officer in charge of investment and credit meets on average three times a month primarily to deliberate and decide on credit transactions and investments that exceed certain specified investment or credit amounts, important matters related to management of the Company and matters that have been entrusted to executive officers by the board of directors. Matters considered crucial to our operations are decided on by the ICC and reported to the board of directors as appropriate.

Group Executive Officer Meetings

Group Executive Officer Meetings, in which executive officers and group executives of the Company participate, are held on a monthly basis to share important information related to the business execution of the ORIX Group.

Monthly Strategy Meetings

Monthly Strategy Meetings include meetings between top management and the individuals in charge of individual departments and business units to discuss matters such as the state of achievement of strategic targets and changes in the business environment. Meetings are held on a regular basis depending on the nature of the business. Matters of key importance to be deliberated on at Monthly Strategy Meetings are decided by the ICC and reported to the Board of Directors as necessary.

Information Technology Management Committee

The Information Technology Management Committee includes members of the top management and the executive officer in charge of information technology (IT) systems, and meets once a month to deliberate and

Table of Contents

approve important matters concerning fundamental policies for IT operations and IT systems. The committee determines the needs of and priorities for IT investment based on the ORIX Group's fundamental IT strategies. This method enables ORIX to ensure that IT decisions are consistent with its business strategies. Furthermore, this enables ORIX to pursue its goal of making IT investments that contribute to business growth and help reduce risk.

Disclosure Committee

ORIX believes that disclosure control occupies an important position within the overall scheme of corporate governance. We have set up an information disclosure system with the Disclosure Committee playing a central role in facilitating the appropriate and timely disclosure of information to investors.

The Disclosure Committee, which plays a key role in our disclosure control, is chaired by the CFO and consists of the executive officers in charge of various departments, including: the Corporate Planning and Financial Control Headquarters, Risk Management Headquarters, Legal and Compliance Department, Human Resources and Corporate Administration Headquarters and the Office of the President. Upon receiving material information from an executive officer of the ORIX Group, or the person in charge of an ORIX Group company department, the committee discusses whether or not any timely disclosure is necessary, and takes steps to provide appropriate disclosure of such information.

The executive officers of the ORIX Group as of June 26, 2009, excluding those who are also directors as listed above are as follows:

| Name | Title | Areas of duties | Shareholdings as of June 26, 2009 |
|------------------|------------------------------------|--|--|
| Takeshi Sato | Corporate Executive Vice President | Risk Management Headquarters | 7,026 |

EMPLOYEES

As of March 31, 2009, we had 18,920 full-time employees, compared to 18,702 as of March 31, 2008 and 16,662 as of March 31, 2007. We employ 2,900 staff in the Corporate Financial Services segment, 3,280 staff in the Maintenance Leasing segment, 3,444 staff in the Real Estate segment, 2,505 staff in the Investment Banking segment, 1,623 staff in the Retail segment, 3,356 staff in the Overseas Business segment and 1,812 staff as part of our headquarters function as of March 31, 2009. With the exception of the Overseas segment all other staff are located in Japan. As of March 31, 2009, we had 6,981 temporary employees. Some of our employees are represented by a union. We consider our labor relations to be excellent.

The mandatory retirement age for our employees is 60, and varies for our subsidiaries and affiliates. ORIX announced in June 1999 an early voluntary retirement program which is available to ORIX employees who are at least 54 years old. Beginning in April 2005, the age was reduced to 50 years old. Employees who take advantage of this program receive their accrued retirement package plus an incentive premium.

ORIX and some of its subsidiaries have established contributory and non-contributory funded pension plans covering substantially all of their employees. The contributory funded pension plans include defined benefit pension plans and defined contribution pension plans. Under the plans, employees are entitled to lump sum payments at the time of termination of their employment or, if enrollment period requirements have been met, to

Table of Contents

pension payments. Defined benefit pension plans consist of a cash balance plan and a plan in which the amount of the payments are determined on the basis of length of service and remuneration at the time of termination. Our funding policy in respect of these plans is to contribute annually the amounts actuarially determined to be required. Assets of the plans are invested primarily in interest-bearing securities and marketable equity securities. In July 2004, ORIX introduced a defined contribution pension program. In November 2004, we received permission from the Japanese Ministry of Health, Labor and Welfare to transfer the substitutional portion benefit obligation from our employer pension fund to the government and these assets were transferred back to the government in March 2005. Total costs (termination or pension plans for both employees and directors and corporate auditors) charged to income for all benefit plans (including defined benefit plans) were ¥2,578 million, ¥2,978 million and ¥3,947 million in fiscal 2007, 2008 and 2009, respectively.

SHARE OWNERSHIP

As of June 26, 2009, the directors, executive officers and group executives of the Company directly held an aggregate of 92,093 Shares, representing 0.10% of the total Shares then in issue.

COMPENSATION

To ensure greater management transparency, we established the executive nomination and compensation committee in June 1999. Its functions included recommending executive remuneration. With the move to a Company with Committees board model in June 2003, the committee was replaced with a Nominating Committee and a Compensation Committee. For discussion of these committees, see Item 6. Directors, Senior Management and Employees Nominating Committee and Compensation Committee.

At the shareholders meeting held on June 25, 2003, with our adoption of the Company with Committees board model, ORIX terminated its program for retirement payments to directors and corporate auditors. In connection with the termination of this system, shareholders approved payments of an aggregate maximum amount of ¥3,250 million to directors and ¥50 million to corporate auditors for the accumulated amounts under these payments. The amount, timing and method of payment was approved for each director and corporate auditor by the Compensation Committee. The payments to individual directors and corporate auditors were based on the length of service and remuneration at the time of termination.

Compensation for directors, executive officers and group executives in fiscal 2009 was ¥1,161 million in the aggregate. Of the aggregate amount, the five non-executive directors received ¥60 million and the 35 executive officers and group executives (including executive directors) received ¥1,101 million in fixed compensation. Compensation linked to the performance of the Company was not paid for the fiscal year ended March 31, 2009 as decided by the Compensation Committee on February 9, 2009.

In addition, in June 2005, we introduced a share component of compensation. The total number of points granted to directors, executive officers and group executives for fiscal 2009 is equivalent to 29,854 points. Under this system, ¥153 million, which is equivalent to 13,932 points accumulated up to the time of retirement, was paid to five executive officers and one group executive who retired during fiscal 2009. As a result, the balance to directors, executive officers and group executives as of March 31, 2009 was 85,379 points.

In addition, in June 2005 we established guidelines for ownership of our shares for directors, executive officers and group executives.

There are no service contracts between any of our directors, executive officers or group executives and the Company or any of its subsidiaries providing for benefits upon termination of employment.

Table of Contents

The following table shows the names of directors, executive officers and group executives who received stock options, and the number of Shares for which they were granted options, under the 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007 and 2008 stock option plans. Each unit of the Shares has one vote. We have not issued any preferred shares. Titles for each individual as of June 23, 2009 unless otherwise described, are as follows:

| Name | Title | 1999-2007 stock option plans | 2008 stock option plan |
|---------------------|--|------------------------------------|------------------------------|

| Masatoshi Kenmochi | Group Executive | 6,000 | 600 |

STOCK OPTION PLAN

We have adopted various incentive plans. The purpose of our stock option plan is to enhance the awareness of the option holders of the link between management, corporate performance and stock price, and, in this way, improve our business results. These plans are administered by the Human Resources Group of ORIX. For further discussion of the stock-based compensation, see Note 18 in Item 18. Financial Statements.

Stock Option Plans

Our shareholders approved Stock Option Plans at the annual general meetings of shareholders in the years from 1997 to 2000 inclusive, under which Shares were purchased from the open market and were held by ORIX for transfer to Directors and Corporate Executive Officers and some employees of ORIX upon the exercise of

Table of Contents

their options. Shareholders also approved a stock subscription rights plan in 2001 and stock acquisition rights plans from 2002 to 2005. From 2006, the Compensation Committee approved granting stock acquisition rights plans to our directors and executive officers, and shareholders approved granting the said plans to a portion of our employees, as well as directors, executives and a portion of employees of our subsidiaries and affiliates.

Options granted under Stock Option Plans generally expire one year after the termination of the option holder's service with the ORIX Group.

At the annual general meeting of shareholders in June 2008, our shareholders approved the 2008 Stock Acquisition Rights Plan, under which 11,310 stock acquisition rights, each convertible into 10 new Shares, were granted to some employees of ORIX and directors and certain employees of subsidiaries and affiliates.

In addition, the compensation committee approved the 2008 Stock Acquisition Right Plan, under which 3,480 stock acquisition rights, each convertible into 10 new Shares were granted to directors and executive officers of ORIX.

| | Shares granted | Exercise price per Share | Option expiration date |

ORIX is not directly or indirectly owned or controlled by any corporations, natural or legal persons severally or jointly. As of March 31, 2009, the percentage of outstanding Shares held by overseas corporations and individuals was 34.25%. On March 31, 2009, approximately 1,446,586 ADSs were outstanding. This is equivalent to 723,293 or approximately 0.78% of the total number of Shares outstanding on that date. On that date, all our ADSs were held by 3 record holders in the United States.

We received a copy of a filing made by Capital Research and Management Company, to the Kanto Local Finance Bureau on December 19, 2008 indicating that Capital Research and Management Company and several companies of Capital Group held 2,795,583 Shares, representing 3.03% of ORIX's outstanding Shares. In addition, in February 2009, ORIX received a notice from Capital Group International, Inc., or CGII, that included a copy of a Schedule 13G filed by CGII and Capital Guardian Trust Company on February 2, 2009 pursuant to Rule 13d-1(b) under the Securities and Exchange Act of 1934, or the Act. The notice indicated that neither CGII nor any of its affiliates owned Shares for its own account and that the Shares were held solely for investment purposes in the ordinary course of business and not with the purpose or effect of changing or influencing control. However, by virtue of Rule 13d-4 under the Act, CGII may be deemed to beneficially own and have sole dispositive power over 2,768,600 Shares as of December 31, 2008, representing 3.0% of ORIX's outstanding Shares at that time, and it has sole voting power with regard to 2,116,080 Shares, representing 2.29% of ORIX's outstanding Shares.

In January 2009, we received a copy of a filing made by AllianceBernstein Group, to the Kanto Local Finance Bureau on January 20, 2009 indicating AllianceBernstein Group, primarily through AllianceBernstein L.P., held 2,531,084 Shares, representing 2.74% of ORIX's outstanding Shares, as part of AllianceBernstein Group's assets under management.

In April 2009, we received a copy of a filing made by J.P.Morgan Group to the Kanto Local Finance Bureau on April 21, 2009 indicating that J.P.Morgan Group, primarily through J.P.Morgan Asset Management Ltd., held 6,346,613 Shares, representing 6.88% of ORIX's outstanding Shares, as part of the J.P.Morgan Group's assets under management.

Edgar Filing: ORIX CORP - Form 20-F

In May 2009, we received a copy of a filing made by Barclays Group to the Kanto Local Finance Bureau on May 15, 2009 indicating Barclays Group, primarily through Barclays Global Investors, N.A., held 3,750,943 Shares, representing 4.07% of ORIX's outstanding Shares, as part of Barclays Group's assets under management.

Table of Contents

In May 2009, we received a copy of a filing made by Mitsubishi UFJ Financial Group to the Kanto Local Finance Bureau on May 18, 2009 indicating Mitsubishi UFJ Financial Group, primarily through Mitsubishi UFJ Trust Bank Ltd., held 4,821,197 Shares (not including 396,872 residual securities), representing 5.23% of ORIX's outstanding Shares, as part of Mitsubishi UFJ Financial Group's assets under management.

In June 2009, we received a copy of a filing made by Nomura Group to the Kanto Local Finance Bureau on June 2, 2009 indicating Nomura Group, primarily through Nomura Asset Management Co., Ltd., held 7,450,366 Shares (not including 2,105,110 residual securities), representing 8.07% of ORIX's outstanding Shares, as part of Nomura Group's assets under management.

In June 2009, we received a copy of a filing made by Fidelity Group to the Kanto Local Finance Bureau on June 19, 2009 indicating Fidelity Group, primarily through Fidelity Investments Japan Ltd., held 9,714,360 Shares, representing 10.53% of ORIX's outstanding Shares, as part of Fidelity Group's assets under management.

RELATED PARTY TRANSACTIONS

As of March 31, 2009, no person was the beneficial owner of more than 10% of any class of the Shares which might give that person significant influence over us. In addition, we are not directly or indirectly owned or controlled by, or under common control with, any enterprise.

We may enter into transactions with Capital Group, AXA Group, JP Morgan Group, Barclays Group, Mitsubishi UFJ Group, Nomura Holdings Group, Fidelity Group, or other shareholders or potential large investors in the ordinary course of our business. We may also enter into transactions in the ordinary course of our business with certain key management personnel or with certain companies over which we, or our key management personnel, may have a significant influence. Our business relationships with these companies and individuals cover many of the financial services we provide our clients generally. We believe we conduct our business with these companies and individuals in the normal course and on terms equivalent to those that would exist if they did not have equity holdings in us, if they were not our key management personnel, or if we or our key management personnel did not have significant influence over them, as the case may be. None of these transactions is or was material to us or, to our knowledge, to the other party.

Other than as outlined below, since the beginning of our preceding three fiscal years, there have been no transactions or outstanding loans, including guarantees of any kind, and there are none currently proposed, that are material to us, or to our knowledge, to the other party, between us and any (i) enterprises that directly or indirectly through one or more intermediaries, control or are controlled by, or are under common control with, us; (ii) associates; (iii) individuals owning, directly or indirectly, an interest in the voting power of us that gives them significant influence over us, and close members of any such individual's family; (iv) key management personnel, including directors and senior management of companies and close members of such individuals' families; or (v) enterprises in which a substantial interest in the voting power is owned, directly or indirectly, by any person described in (iii) or (iv) or over which such a person is able to exercise significant influence.

One of our subsidiaries, ORIX Eco Services Corporation, has entered into an agreement to act as the distribution agent for Aemotech Corporation in Japan for the purchase and sale of Aemotech's asbestos measuring instruments. Aemotech is owned by one of our outside directors, Yoshinori Yokoyama, who also serves as the director. Although this contract will not be material to us it may be a material contract to Aemotech.

Edgar Filing: ORIX CORP - Form 20-F

One of our subsidiaries, ORIX Living Corporation has entered into a customer referral agreement with ICZ Corporation. As a result, we have had a few transactions with ICZ during fiscal 2009. A son of Yoshihiko

Table of Contents

Miyauchi, one of our directors, is a representative director of ICZ. Although the agreement and related transactions were made in the ordinary course of business and are not material to us they may be a material to ICZ.

There are no outstanding loans (including guarantees of any kind) made by us or any of our subsidiaries to or for the benefit of any of the persons listed in clauses (i) through (v) in the foregoing paragraph except as follows. Certain of our affiliates may fall within the meaning of a related party under clauses (i) or (ii) of the foregoing paragraph. The amount of outstanding loans (including guarantees of any kind) made by us to or for the benefit of all our affiliates, including those which may fall within the meaning of a related party, totaled ¥4,540 million as of March 31, 2009 and did not exceed ¥9 billion at any time during the fiscal year. We have extended a ¥20 billion debt assumption facility on behalf of our affiliate, DAIKYO, whereby we have agreed to purchase accounts receivable originated by DAIKYO from certain of its suppliers at a discount. The average duration of such transactions, the time between our purchases of the accounts receivable to repayment by DAIKYO, is 150 days. As of March 31, 2009, the outstanding amount of such accounts receivable that we had purchased under this facility was ¥10,285 million, and ¥9,715 million remained outstanding under the debt assumption facility. We believe the commercial commitments were made in the ordinary course of business, on substantially the same terms, as those prevailing at the time for comparable transactions with other persons, and did not involve more than the normal risk of collectibility or present other unfavorable features. In fiscal 2009, ORIX Real Estate Corporation, our subsidiary, also entered into various real estate transactions with DAIKYO. These dealings are done at fair prices based on third-party appraisal, and consist less than 10% of the total sales of DAIKYO. Other than the commitments, we also enter into certain ordinary course of business transactions, including financing leases, with DAIKYO. These transactions are not material to either us or DAIKYO.

We also sold ORIX Facilities Corporation to DAIKYO in exchange for ¥9.4 billion of its Class 8 convertible preferred shares. In connection with the sale, ORIX Corporation and ORIX Real Estate Corporation have signed a business collaboration agreement with ORIX Facilities Corporation, which gives ORIX Facilities certain ordering priorities, subject to reasonable conditions in regard to the management of real estate owned or subdivided by the ORIX Group. Any orders made under the collaboration agreement would be on market terms, and we do not view either the sale of ORIX Facilities nor any transactions contemplated by the collaboration agreement to be material to us, although they may be to ORIX Facilities or DAIKYO.

Other than those mentioned above, the amount of loans to companies included in the related parties described in (ii) and (v) above totaled ¥5,437 million as of March 31, 2009. Of this amount, approximately 38% is loans to a general trading company and 30% is loans to a hotel management company. We believe these loans were made in the ordinary course of business, on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons, and did not involve more than the normal risk of collectibility or present other unfavorable features.

and exterior finishing, and design and supervision thereof; (ix) management of various facilities for sports, lodging, restaurant, medical treatment, welfare and training and education, etc., and conducting sports, etc.; (x) waste-disposal business; (xi) trading of emission rights for greenhouse gases and other various subjects; (xii) supply of various energy resources and the products in relation thereto; (xiii) planning, developing, contracting for, lease and sale of, intangible property rights; (xiv) information processing and providing services, telecommunications business; (xv) business of dispatching workers to enterprise and employment agency business; (xvi) purchase and sale of antiques; (xvii) transport business; (xviii) brokerage, agency, investigation and consulting for business relating to any of the preceding items, and pension consulting service; (xix) as a result of holding shares in a subsidiary company engaged in those activities, engaging in business relating to any of the preceding items and managing such company's business activities; (xx) any and all businesses incidental or related to any of the preceding items.

GENERAL MEETING OF SHAREHOLDERS

The annual General Meeting of our Shareholders is held in June each year and extraordinary General Meetings of Shareholders may be held whenever necessary (Article 11). Notices for calling either an annual or an extraordinary General Meeting of Shareholders must be given to shareholders at least two weeks prior to the date set for such meetings. General Meetings of Shareholders can be called by a director pursuant to a resolution of the board of directors (Article 13).

Unless otherwise provided under applicable laws or ordinances, each shareholder holds one vote per one Unit and generally, those shareholders of the Company registered or recorded as having voting rights on the Register of Shareholders as of the end of a given fiscal year are permitted to exercise their voting rights at the annual General Meeting of Shareholders to be convened after the completion of that fiscal year and those shareholders of the Company registered or recorded as having voting rights on the Register of Shareholders as of a date fixed by the Company are permitted to exercise their rights at the annual General Meeting of Shareholders concerning that fiscal year (Article 12). The record date for an annual general meeting of shareholders is March 31 of each year (Article 12, Article 33).

Except as otherwise provided by law or by our articles of incorporation, a resolution can be adopted at a general meeting of shareholders by the holder of a majority of the total number of the voting rights represented at the meeting. (Article 14).

DIRECTORS AND BOARD OF DIRECTORS

There shall be no less than three directors of the Company (Article 16). Directors are elected and removed at a General Meeting of Shareholders. A resolution for the election and removal of directors is adopted by a majority vote of the votes of the shareholders present at a meeting at which shareholders who hold one-third or more of the voting rights held by all of the shareholders of the Company who are permitted to exercise their voting rights at the General Meeting of Shareholders are present. In the case of election of directors, cumulative voting shall not be used (Article 17). The term of office of a director is for one year and expires upon conclusion of the annual General Meeting of Shareholders relating to the last fiscal year ending within one year after election of director (Article 18). Resolutions of the Board of Directors are adopted by a majority vote of the directors present at a meeting attended by a majority of the directors who may participate in making resolutions (Article 21).

BOARD COMMITTEES

Edgar Filing: ORIX CORP - Form 20-F

As a company with committees we are required to maintain a Nominating Committee, an Audit Committee and a Compensation Committee (Article 10). The members of each Board Committee are elected from among the directors by a resolution of the Board of Directors meeting. Each Committee is composed of three or more members. The majority of members of each Committee are required to be Outside Directors. No member of the

Table of Contents

Audit Committee may be an executive officer, manager or an operating director of the Company or any of the subsidiaries or the accounting advisor (if the accounting advisor is a corporate body, then the individuals performing the duties), manager or other employee of any of the Company's subsidiaries (Article 24).

SHARES AND DISTRIBUTION OF DIVIDENDS AS DISTRIBUTION OF SURPLUS

We do not issue preferred stock. If the dividends from surplus as of the last day of the fiscal year are distributed within three months for common shares, we treat the shareholders or share pledgees registered or recorded on the Register of Shareholders as of the last day of the fiscal year as the person having rights to receive such dividends (Article 35). Dividends or other distributable assets shall not incur interest thereon. If the relevant distributed assets are not received within a full three years from the date on which the distribution of relevant distributed assets became effective, we may be released from its obligation to distribute such assets (Article 36). A Shareholder may not exercise shareholders rights in relation to any shares that it holds that are less than one Unit (ten shares) other than the rights set forth below under the Company Law of Japan (Article 6):

- (1) The right to receive the distribution of money, etc., when the Company distributes the money, etc. in exchange for acquiring one class of shares subject to terms under which the Company shall acquire all of such class shares;
- (2) The right to receive the distribution of money, etc., in exchange for acquisition of shares subject to terms under which the Company shall acquire such shares;
- (3) The right to receive allocation of shares when the Company allocates its shares without having a shareholder make new payment;
- (4) The right to demand that the Company purchase shares that are less than one Unit held by the shareholder;
- (5) The right to receive distribution of remaining assets;
- (6) The right to demand review of the Articles of Incorporation and delivery of their copies;
- (7) The right to receive the distribution of money, etc. pursuant to reverse stock split, stock split, allocation of stock acquisition right for free (which means that the Company allocates its stock acquisition right without having a shareholder make new payment), distribution of dividends as distribution of surplus or change of corporate organization;
- (8) The right to receive the distribution of money, etc. to be distributed pursuant to merger, share-swap or share-transfer effected by the Company;
- (9) The right to subscribe to Offering Shares and Offering Stock Acquisition Rights on a pro rata basis based upon the number of shares held by the shareholder; and
- (10) The right to demand that the Company sell to the number of additional shares necessary to make the number of shares of less than one Unit held by the shareholder, equal to one Unit.

Edgar Filing: ORIX CORP - Form 20-F

In general, there are no limitations on the right to own shares of the Company's common stock, including the rights of non-residents or foreign shareholders to hold or exercise voting rights on the securities imposed under Japanese law or by the Company's articles of incorporation.

Table of Contents

RESTRICTION ON DISTRIBUTIONS OF SURPLUS

Under the Company Law, when we make distributions of surplus, if the sum of our capital reserve and earned surplus reserve is less than one-quarter of our stated capital, we must, until such sum reaches one-quarter of the stated capital, set aside in our capital reserve and/or earned surplus reserve an amount equal to one-tenth of the amount of surplus so distributed as required by ordinances of the Ministry of Justice.

The amount of surplus at any given time must be calculated in accordance with the following formula:

$$A + B + C + D - (E + F + G)$$

In the above formula:

A = the total amount of other capital surplus and other earnings surplus, each such amount being that appearing on our non-consolidated balance sheet as of the end of the last fiscal year

B = (if we have disposed of our treasury stock after the end of the last fiscal year) the amount of the consideration for such treasury stock received by us less the book value thereof

C = (if we have reduced our stated capital after the end of the last fiscal year) the amount of such reduction less the portion thereof that has been transferred to capital reserve or earned surplus reserve (if any)

D = (if we have reduced our capital reserve or earned surplus reserve after the end of the last fiscal year) the amount of such reduction less the portion thereof that has been transferred to stated capital (if any)

E = (if we have cancelled our treasury stock after the end of the last fiscal year) the book value of such treasury stock

F = (if we have distributed surplus to our shareholders after the end of the last fiscal year) the amount of the assets distributed to shareholders by way of such distribution of surplus

G = certain other amounts set forth in an ordinance of the Ministry of Justice, including (if we have reduced surplus and increased stated capital, capital reserve or earned surplus reserve after the end of the last fiscal year) the amount of such reduction and (if we have distributed surplus to our shareholders after the end of the last fiscal year) the amount set aside in capital reserve or earned surplus reserve (if any) as required by ordinances of the Ministry of Justice.

Under the Company Law, the aggregate book value of surplus distributed by us may not exceed a prescribed distributable amount, as calculated on the effective date of such distribution. Our distributable amount at any given time shall be the amount of surplus less the aggregate of: (a) the book value of our treasury stock; (b) the amount of consideration for any of our treasury stock disposed of by us after the end of the last fiscal year; and (c) certain other amounts set forth in an ordinance of the Ministry of Justice, including (if the total of the one-half of goodwill and the deferred assets exceeds the total of stated capital, capital reserve and earned surplus reserve, each such amount being that appearing on our non-consolidated balance sheet as of the end of the last fiscal year) all or certain part of such exceeding amount as calculated in accordance with the ordinances of the Ministry of Justice. If we have opted to become a company that applies the restriction on distributable amounts on a consolidated basis (*renketsu haito kisei tekiyo kaisha*), we will further deduct from the amount of surplus a certain amount which is calculated based on our non-consolidated and consolidated balance sheets as of the end of the last fiscal year as provided in ordinances of the Ministry of Justice.

If we have prepared interim financial statements as described below after the end of the last fiscal year, and if such interim financial statements have been approved by our board of directors or (if so required) by a general meeting of our shareholders, then the distributable amount must be adjusted to take into account the amount of profit or loss as set forth in ordinances of the Ministry of Justice, and the amount of consideration for any of our treasury stock disposed of by us, during the period in respect of which such interim financial statements have

Table of Contents

been prepared. Under the Company Law, we are permitted to prepare non-consolidated interim financial statements consisting of a balance sheet as of any date subsequent to the end of the last fiscal year and an income statement for the period from the first day of the current fiscal year to the date of such balance sheet. Interim financial statements prepared by us must be reviewed by our independent auditors, as required by an ordinance of the Ministry of Justice.

STOCK SPLITS

We may at any time split the outstanding shares of common stock into a greater number of shares of common stock by resolution of the board of directors. When a stock split is to be made, if our only class of outstanding stock is common stock, we may increase the number of authorized shares in the same ratio as that of such stock split by amending our articles of incorporation, which amendment may be effected by resolution of the board of directors without approval by shareholders.

Before a stock split, we must give public notice of the stock split, specifying the record date therefor, not less than two weeks prior to such record date.

LIQUIDATION RIGHTS

In the event of our liquidation, the assets remaining after payment of all debts, liquidation expenses and taxes will be distributed among shareholders of common stock in proportion to the respective number of shares which they hold.

ACQUISITION OF OUR SHARES BY US

We may acquire our shares, including shares of our common stock:

- (i) by way of purchase on any Japanese stock exchange or by way of tender offer (pursuant to a resolution of the board of directors);
- (ii) from a specific shareholder other than any of our subsidiaries (pursuant to a special resolution of a general meeting of shareholders);
or
- (iii) from any of our subsidiaries (pursuant to a resolution of the board of directors).

In the case of (ii) above, any other shareholder of such class may make a request to a director, at least five days prior to the relevant shareholders meeting, to include such shareholder as a seller in the proposed purchase. However, no such right will be available if the relevant class of shares is listed on any Japanese stock exchange and the purchase price or any other consideration to be received by the relevant specific shareholder does not exceed the then market price of the shares calculated in a manner set forth in Ordinances of the Ministry of Justice.

Any such acquisition of our shares must satisfy certain requirements that the total amount of the purchase price may not exceed the distributable amount, as described in [Restriction on Distributions of Surplus](#). We may hold our shares acquired in compliance with the provisions of the Company Law, and may generally cancel such shares by a resolution of the board of directors, although the disposal of such shares are subject to the same proceedings for the issuance of new shares, in general.

MATERIAL CONTRACTS

We have no material contracts aside from those entered in our ordinary course of business.

Table of Contents

FOREIGN EXCHANGE AND OTHER REGULATIONS

FOREIGN EXCHANGE

The Foreign Exchange and Foreign Trade Law of Japan, as amended, and the cabinet orders and ministerial ordinances thereunder, or the Foreign Exchange Regulations, govern the acquisition and holding of shares of capital stock of ORIX by exchange non-residents and by foreign investors (as defined below). The Foreign Exchange Regulations currently in effect do not, however, regulate transactions between exchange non-residents who purchase or sell shares outside Japan for non-Japanese currencies.

Exchange non-residents are defined as individuals who are not resident in Japan and corporations whose principal offices are located outside Japan. Generally, the branch and other offices of non-resident corporations located within Japan are regarded as residents of Japan and branch and other offices of Japanese corporations located outside Japan are regarded as exchange non-residents. Foreign investors are defined to be (i) individuals who are exchange non-residents, (ii) corporations which are organized under the laws of foreign countries or whose principal offices are located outside Japan, and (iii) corporations (1) of which 50% or more of their voting rights are held, directly or indirectly, by (i) and/or (ii) or (2) a majority of the officers (or officers having the power of representation) of which are non-resident individuals.

In general, the acquisition of a Japanese company's stock shares (such as the shares of capital stock of ORIX) by an exchange non-resident from a resident of Japan is not subject to any prior filing requirements. In certain limited circumstances, however, prior approval by the Minister of Finance for an acquisition of this type may be required. While prior approval, as described above, is not required, in the case where a resident of Japan transfers shares of a Japanese company (such as the shares of capital stock of ORIX) for consideration exceeding ¥100 million to an exchange non-resident, the resident of Japan who transfers the shares is required to report the transfer to the Minister of Finance within 20 days from the date of the transfer, unless the transfer was made through a bank, securities company or financial future trader licensed under the Japanese laws.

If a foreign investor acquires shares of a Japanese company listed on a Japanese stock exchange (such as the shares of capital stock of ORIX) or that are traded on an over-the-counter market in Japan and as a result of the acquisition the foreign investor in combination with any existing holdings directly or indirectly holds 10% or more of the issued shares of the relevant company, the foreign investor is, in general, required to report such acquisition to the Minister of Finance and any other competent Ministers within 15 days from and including the date of such acquisition. In certain exceptional cases, prior notification is required with respect to such an acquisition.

The acquisition of shares by exchange non-residents by way of stock split is not subject to the foregoing notification requirements.

Under the Foreign Exchange Regulations, dividends paid on, and the proceeds of sales in Japan of, Shares held by non-residents of Japan may in general be converted into any foreign currency and repatriated abroad.

LARGE SHAREHOLDINGS REPORT

Edgar Filing: ORIX CORP - Form 20-F

The Financial Instruments and Exchange Law requires any person who has become, beneficially and solely or jointly, a holder of more than 5% of the total issued voting shares of capital stock of a company listed on any Japanese financial instruments exchange (such as the shares of capital stock of ORIX) or whose shares are traded on the over-the-counter markets in Japan, to file with the Prime Minister within five business days a report concerning such shareholdings. An alteration report must also be made in respect of any subsequent change of 1% or more in any such holding or any change in material matters set out in reports previously filed, with certain exceptions. For this purpose, shares issuable to such person upon his exchange of exchangeable securities or exercise of Stock Acquisition Rights are taken into account in determining both the size of his holding and the issuer's total issued share capital.

Table of Contents**SHAREHOLDINGS REPORT**

The Law concerning Prohibition of Private Monopoly and Maintenance of Fair Trade requires any company (including a foreign company) which fulfills certain gross asset requirement and has newly become a holder of more than 10%, 25% or 50% of the total issued voting shares of capital stock (such as the shares of capital stock of ORIX) or the shares of a company (including a foreign company) which meets certain conditions, to file with the Fair Trade Commission within thirty business days a report concerning such shareholding.

DIVIDEND POLICY AND DIVIDENDS

ORIX has paid dividends on the Shares on an annual basis in each year since 1967. With the adoption of a Company with Committees board model in June 2003, the board of directors has been responsible for setting the annual dividend per common share since the fiscal year ended March 31, 2004. The board of directors approves annual dividends at the board of directors meeting customarily held in May of each year. Following such approval, dividends are paid to holders of record as of the preceding March 31.

The following table shows the amount of cash dividends per share paid by ORIX for each of the fiscal years indicated, which amounts are translated into dollars per ADS at the noon buying rate on the date of the commencement of the dividend payment in Japan.

| Year ended | Cash Dividends per Share | Translated into dollar per ADS |
|----------------|--------------------------------|-----------------------------------|
| March 31, 2005 | 40.00 | 0.18 |
| March 31, 2006 | 90.00 | 0.40 |
| March 31, 2007 | 130.00 | 0.53 |
| March 31, 2008 | 260.00 | 1.25 |
| March 31, 2009 | 70.00 | 0.36 |

We believe that retaining profits, primarily as retained earnings, and utilizing them to strengthen our base of operations and investing for growth, assists in sustaining profit growth while maintaining financial stability, leading to increased shareholder value. Our current policy is to meet the needs of our shareholders by increasing shareholder value through medium- and long-term profit growth with appropriate profit distribution.

The financial environment has rapidly deteriorated after the Lehman Brother's bankruptcy filing. The effects spilled over into the real economy and it is expected to take some time for financial and real estate markets to recover. In this chaotic period of unprecedented economic environment, we believe that increasing the amount of retained earnings will improve medium- to long-term shareholder value. ORIX previously determined dividends with a 2% dividend-on-equity (DOE) ratio; however, we will adopt a dividend policy that prioritizes improved operational stability.

We also occasionally purchase our shares in the market through share buyback plans taking into account the adequate level of retained earnings and our ability to react appropriately act flexibly considering factors such as changes in the economic environment, trend in stock prices, and our own financial condition.

Edgar Filing: ORIX CORP - Form 20-F

Applying these policies to the current business conditions, we declared a dividend of 70 yen per share for the year ended March 31, 2009, reduced by 190 yen from the prior year. We currently distribute dividends once a year as a year-end dividend.

Pursuant to the amendment to the Special Taxation Measures Law, dividends paid to US holders of Shares or ADSs are generally subject to a Japanese withholding tax at the rate of 7% for the period from January 1, 2009 to December 31, 2011.

Table of Contents

TAXATION

JAPANESE TAXATION

The following is a summary of the principal Japanese tax consequences for owners of the Shares or ADSs who are non-resident individuals of Japan or non-Japanese corporations without a permanent establishment in Japan (non-resident Holders). The statements regarding Japanese tax laws set forth below are based on the laws in force and as interpreted by the Japanese taxation authorities as of the date hereof and are subject to changes in the applicable Japanese laws or conventions for the avoidance of double taxation occurring after that date. This summary is not exhaustive of all possible tax considerations that may apply to a particular investor and potential investors are advised to satisfy themselves as to:

the overall tax consequences of the acquisition, ownership and disposition of Shares or ADSs, including specifically the tax consequences under Japanese law;

the laws of the jurisdiction of which they are resident; and

any tax treaty between Japan and their country of residence.

by consulting their own tax advisors.

Shares

Generally, a non-resident Holder is subject to Japanese withholding tax on dividends on Shares or ADSs paid by us. Stock splits are not subject to Japanese income or corporation tax.

Pursuant to the Special Taxation Measures Law, the Japanese withholding tax rate applicable to dividends on Shares or ADSs paid to non-resident Holders by us is (i) 7% for dividends due and payable on or before December 31, 2011 and (ii) 15% for dividends due and payable on or after January 1, 2012, except for dividends paid to any individual non-resident Holder who holds 5% or more of the total number of shares issued by us, where the 20% withholding tax rate will apply. Japan has entered into income tax treaties, conventions and agreements where this withholding tax rate is, in some cases, reduced to a lower percentage for portfolio investors. Non-resident Holders of Shares in the countries who are entitled to this reduced Japanese withholding tax rate are required to submit an Application Form for the Income Tax Convention regarding Relief from Japanese Income Tax on Dividends in advance through us to the relevant Japanese tax authority before the payment of dividends. A standing proxy for a non-resident Holder may provide such application service. Non-resident Holders who do not submit an application in advance will be entitled to claim the refund from the relevant Japanese tax authority of those withholding taxes withheld in excess of the rate of an applicable tax treaty.

The Convention between the United States of America and Japan for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, or the Tax Convention, provides for a maximum rate of Japanese withholding tax which may be imposed on

Edgar Filing: ORIX CORP - Form 20-F

dividends paid to an eligible United States resident not having a permanent establishment in Japan. Under the Tax Convention, the maximum withholding rate is generally limited to 10% of the relevant dividends.

Gains derived from the sale outside Japan of Shares or ADSs by a non-resident Holder, are, in general, not subject to Japanese income or corporation taxes.

Japanese inheritance and gift taxes, at progressive rates, may be payable by an individual who has acquired Shares or ADSs as legatee, heir or donee.

Table of Contents

UNITED STATES TAXATION

The following discussion describes the material US federal income tax consequences of ownership and disposition of Shares or ADSs held as capital assets by United States Holders (as defined below).

This discussion does not describe all of the tax consequences that may be relevant to a holder in light of their particular circumstances or to holders subject to special rules, such as:

certain financial institutions;

insurance companies;

dealers and traders in securities who use a mark-to-market method of tax accounting;

persons holding Shares or ADSs as part of a hedging transaction, straddle, conversion transaction or other integrated transaction;

persons whose functional currency for US federal income tax purposes is not the US dollar;

partnerships or other entities classified as partnerships for US federal income tax purposes;

non-US persons;

persons subject to the alternative minimum tax;

tax-exempt entities, including individual retirement accounts and Roth IRAs ;

persons that own or are deemed to own 10% or more of the voting stock of the Company;

persons carrying on a trade or business in Japan through a permanent establishment; or

persons who acquired Shares or ADSs pursuant to the exercise of any employee stock option or otherwise as compensation.

If an entity that is classified as a partnership for US federal income tax purposes holds Shares or ADSs, the US federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. Partnerships holding Shares or ADSs and partners in such partnerships should consult their tax advisors as to the particular US federal income tax consequences of holding and disposing of Shares

or ADSs.

This summary is based on the Internal Revenue Code of 1986, as amended, (the Code) administrative pronouncements, judicial decisions, final, temporary and proposed Treasury regulations, and the Tax Convention, changes to any of which subsequent to the date of this annual report may affect the tax consequences described herein. It is also based in part on representations by the depository and assumes that each obligation under the deposit agreement and any related agreement will be performed in accordance with its terms.

As used herein, the term United States Holder means a beneficial owner of Shares or ADSs that is for US federal income tax purposes:

a citizen or resident of the United States;

a corporation, or other entity taxable as a corporation for US federal income tax purposes, created or organized in or under the laws of the United States or of any political subdivision thereof; or

an estate or trust the income of which is subject to US federal income taxation regardless of its source.

We believe that we will be a passive foreign investment company, or a PFIC, for US federal income tax purposes in the year to which this annual report relates and for the foreseeable future by reason of the composition of our assets and the nature of our income.

Persons considering the purchase of Shares or ADSs should consult their tax advisors with regard to the PFIC rules described below as well as the application of other US federal income tax laws relevant to their particular situations and any tax consequences arising under the laws of any state, local or foreign taxing jurisdiction.

Table of Contents

In general, a United States Holder of ADSs will be treated as the owner of the underlying shares represented by those ADSs for US federal income tax purposes. Accordingly, no gain or loss will be recognized if the United States Holder exchanges ADSs for the underlying shares represented by those ADSs.

The US Treasury has expressed concerns that parties to whom American depositary shares are released prior to delivery of shares to the depositary (pre-release), or intermediaries in the chain of ownership between U.S. holders and the issuer of the security underlying the American depositary shares, may be taking actions that are inconsistent with the claiming of foreign tax credits by U.S. holders of American depositary shares. Accordingly, the creditability of Japanese taxes, described below, could be affected by actions taken by such parties or intermediaries.

Taxation of Distributions

Subject to the passive foreign investment company rules described below, distributions paid on Shares or ADSs, other than certain pro rata distributions of common shares, will generally be treated as dividends to the extent paid out of our current or accumulated earnings and profits (as determined under US federal income tax principles). Because we expect to be a passive foreign investment company (a PFIC), dividends paid by us will not be eligible for the reduced 15% dividend tax rate otherwise available to certain non-corporate United States Holders. The amount of a dividend will include any amounts withheld by us or our paying agent in respect of Japanese taxes, as discussed above under Taxation Japanese Taxation Shares. The amount of the dividend will be treated as foreign source dividend income to United States Holders and will not be eligible for the dividends received deduction generally allowed to US corporations under the Code.

Dividends paid in yen will be included in the income of a United States Holder in a US dollar amount calculated by reference to the exchange rate in effect on the date of the United States Holder s (or, in the case of ADSs, the depositary s) receipt of the dividend, regardless of whether the payment is in fact converted into US dollars. If the dividend is converted into US dollars on the date of receipt, a United States Holder generally should not be required to recognize a foreign currency gain or loss in respect of the dividend income. A United States Holder may have a foreign currency gain or loss if such holder does not convert the amount of such dividend into US dollars on the date of its receipt. Any foreign currency gains or losses resulting from the conversion of the yen will generally be treated as U.S. source ordinary income or loss.

Subject to the passive foreign investment company rules described below and to applicable limitations that may vary depending upon the United States Holder s circumstances, and subject to the discussion above regarding concerns expressed by the US Treasury, Japanese taxes withheld from dividends on Shares or ADSs at a rate not exceeding the rate provided for by the Tax Convention will be creditable against the United States Holder s US federal income tax liability. The maximum rate of withholding tax on dividends paid to a United States Holder pursuant to the Tax Convention is 10%. As discussed under Japanese Taxation above, under current Japanese law, the statutory rate will be lower than the maximum Tax Convention rate until December 31, 2011. After this date, the statutory rate will be higher than the maximum Tax Convention rate. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. The rules governing foreign tax credits are complex and, therefore, United States Holders should consult their own tax advisors regarding the availability of foreign tax credits in their particular circumstances. Instead of claiming a credit, United States Holders may, upon election, deduct such otherwise creditable Japanese taxes in computing taxable income, subject to generally applicable limitations under US law.

Passive Foreign Investment Company Rules

If, as expected, we are a PFIC for any year during a United States Holder s holding period of the Shares or ADSs, and the United States Holder has not made the mark-to-market election for the Shares or ADSs, as described below, the holder will be subject to special rules generally intended to eliminate any benefits from the

Table of Contents

deferral of US federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Upon a disposition of Shares or ADSs (including under certain circumstances, a pledge, and under proposed Treasury regulations, a disposition pursuant to an otherwise tax-free reorganization) gain recognized by a United States Holder would be allocated ratably over its holding period for the Shares or ADSs. The amounts allocated to the taxable year of the sale or other exchange and to any year before the Company became a PFIC would be taxed as ordinary income. The amount allocated to each other taxable year would be subject to tax at the highest rate in effect for individuals or corporations for such year, as appropriate, and an interest charge would be imposed on the tax liability allocated to such taxable year. Similar rules would apply to any distribution in respect of Shares or ADSs to the extent it exceeds 125 percent of the average of the annual distributions on Shares received during the preceding three years or the United States Holder's holding period, whichever is shorter. Any loss realized on a disposition of Shares or ADSs will be capital loss, and will be long-term capital loss if the United States Holder held the Shares or ADSs for more than one year. The amount of the loss will equal the difference between the United States Holder's tax basis in the Shares or ADSs disposed of and the amount realized on the disposition, in each case as determined in US dollars. Such loss will generally be US-source loss for foreign tax credit purposes.

If we are a PFIC for any year during which a United States Holder holds Shares or ADSs, we generally will continue to be treated as a PFIC with respect to the United States Holder for all succeeding years during which the United States Holder holds Shares or ADSs, even if we cease to meet the threshold requirements for PFIC status.

Under certain attribution rules, if we are a PFIC, United States Holders will be deemed to own their proportionate shares of our subsidiaries that are PFICs and will be subject to US federal income tax according to the rules described above on (i) certain distributions by subsidiary PFICs and (ii) a disposition of shares of a subsidiary PFIC, even though they have not received the proceeds of those distributions or dispositions directly.

If the Shares or ADSs are regularly traded on a qualified exchange, a United States Holder of Shares or ADSs would be eligible to make a mark-to-market election that would result in tax treatment different from the general tax treatment for PFICs described above. The Shares or ADSs will be treated as regularly traded in any calendar year in which more than a *de minimis* quantity of the Shares or ADSs are traded on a qualified exchange on at least 15 days during each calendar quarter. A qualified exchange includes the NYSE on which our ADSs will be listed and a foreign exchange that is regulated by a governmental authority in which the exchange is located and with respect to which certain other requirements are met. The Internal Revenue Service, or IRS, has not yet identified specific foreign exchanges that are qualified for this purpose. Under current law, the mark-to-market election may be available to holders of ADSs because the ADSs will be listed on the NYSE, although there can be no assurance that the ADSs will be regularly traded for purposes of the mark-to-market election.

If a United States Holder is eligible and makes the mark-to-market election, the United States Holder will include each year, as ordinary income, the excess, if any, of the fair market value of the Shares or ADSs at the end of the taxable year over their adjusted basis, and will be permitted an ordinary loss in respect of the excess, if any, of the adjusted basis of the Shares or ADSs over their fair market value at the end of the taxable year (but only to the extent of the net amount of previously included income as a result of the mark-to-market election). If a United States Holder validly makes the election, the holder's basis in the Shares or ADSs will be adjusted to reflect any such income or loss amounts. Any gain recognized on the sale or other disposition of Shares or ADSs in a year when the Company is a PFIC will be treated as ordinary income.

We do not intend to comply with the requirements necessary for a United States Holder to make a different election (the qualified electing fund election), which is sometimes available to shareholders of a PFIC.

Special rules apply to determine the foreign tax credit with respect to withholding taxes imposed on distributions on shares in a PFIC.

Table of Contents

If a United States Holder owns Shares during any year in which we are a PFIC, the holder must file IRS Form 8621 with the IRS.

We urge United States Holders to consult their tax advisors concerning our status as a PFIC and the tax considerations relevant to an investment in a PFIC, including the availability and consequences of making the mark-to-market election discussed above.

Backup Withholding and Information Reporting

Payments of dividends and sales proceeds that are made within the United States or through certain US-related financial intermediaries generally are subject to information reporting, and may be subject to backup withholding, unless (i) the United States Holder is a corporation or other exempt recipient or (ii) in the case of backup withholding, the United States Holder provides a correct taxpayer identification number and certifies that it is not subject to backup withholding.

The amount of any backup withholding from a payment to a United States Holder will be allowed as a credit against the such holder's US federal income tax liability and may entitle such holder to a refund, provided that the required information is timely furnished to the IRS.

DOCUMENTS ON DISPLAY

We are subject to the reporting requirements of the Act. In accordance with these requirements, we file annual reports on Form 20-F and furnish periodic reports on Form 6-K with the Securities and Exchange Commission.

These materials, including this annual report and the exhibits thereto, may be inspected and copied at the Commission's Public Reference Room at Room 1580, 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Commission's Public Reference Room by calling the Commission in the United States at 1-800-SEC-0330. The Commission also maintains a website at <http://www.sec.gov> that contains reports and proxy information regarding issuers that file electronically with the Commission.

We are currently exempt from the rules under the Act that prescribe the furnishing and content of proxy statements, and our officers, directors and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Act. We are not required under the Act to publish financial statements as frequently or as promptly as are US companies subject to the Act. We will, however, continue to furnish our shareholders with annual reports containing audited financial statements and will issue interim press releases containing unaudited results of operations as well as such other reports as may from time to time be authorized by our board of directors or as may be otherwise required.

Our American Depositary Shares, or ADSs, each of which represents one-half of one Share, are listed on the New York Stock Exchange under the trading symbol IX.

Item 11. Quantitative and Qualitative Disclosures about Market Risk

MARKET RISKS

Our primary market risk exposures are to interest rate fluctuation risk, foreign exchange rate fluctuation risk and the risk of fluctuation in market prices for equity securities. We enter into derivative transactions to hedge

Table of Contents

interest rate fluctuation risk and foreign exchange rate fluctuation risk. Our management of market risk exposure including our management of derivatives is described under Item 5. Operating and Financial Review and Prospects Risk Management.

The majority of our assets and liabilities are composed of floating rate assets and liabilities, and fixed rate assets and liabilities. Movements in market interest rates affect the gains and losses and fair values of these assets and liabilities and we attempt to limit these gains and losses by match-funding our floating rate assets against our floating rate liabilities, and our fixed-rate assets against our fixed rate liabilities.

For example, floating rate loan assets and floating rate bonds bear the risk of reduced interest income due to a decline in market interest rates. Conversely, floating rate debt and short-term debt bear the risk of increased interest expense due to a rise in market interest rates. As a result of the inverse relationship, risks for floating rate assets and floating rate liabilities can be used to offset each other, and we seek to, by keeping sums for floating rate assets and floating rate liabilities matched as close as possible to achieve risk reduction. However, some floating rate assets and liabilities use a different base rate, so when there is an adverse movement in these rates, risk may not be sufficiently reduced.

Likewise the receivable income (received lease payments, interest income) of fixed rate direct financing leases and fixed rate loan assets will not change upon rises in market interest rates, and bear the risk of a fall in fair value in the event of a rise in market interest rates. Conversely, fixed rate liabilities bear the risk of a rise in fair value due to a decline in market interest rates. However, due to the inverse relationship between the fluctuation risk in fair value for fixed rate assets and fixed rate liabilities we seek to, by keeping sums for fixed rate assets and fixed rate liabilities close to achieve risk reduction.

We perform asset liability management through various methods including balance comparisons for fixed rate and floating rate assets and liabilities, interest rate sensitivity tests, and VaR calculations. It is our basic policy to control interest rate risk within a fixed range by matching the interest rate sensitivities of assets and liabilities while utilizing interest rate derivatives.

The following quantitative information about the market risk of our financial instruments does not include information about financial instruments to which the requirements under FASB Statement No. 107 do not apply, such as investment in direct financing leases, investment in operating leases, and insurance contracts. As a result, the following information does not present all the risks of our financial instruments. Below, we have provided a table showing our exposure to fluctuations in foreign exchange rates and equity market prices (through an analysis of the impact that changes in these rates and prices has on future earnings and fair value of marketable securities). We omitted the disclosure of financial instruments for trading purposes because the amount is immaterial.

The table of interest rate sensitivity for non-trading financial instruments summarizes installment loans, interest-bearing bonds and long- and short-term debt. These instruments are further classified under fixed rates or floating rates. For such items, the principal collection and repayment schedules and the weighted average interest rates for collected and repaid portions are disclosed. Concerning interest rate swaps, under derivative instruments, the estimated notional principal amount for each contractual period and the weighted average of swap rates are disclosed. The average interest rates of financial instruments as of the end of fiscal 2009 are: 5.0% for installment loans, 2.8% for interest-bearing bonds, 1.5% for long- and short-term debt and 1.1% for deposits.

The average payment rate of interest rate swaps is 2.2% and the average receipt rate is 1.6%. The average interest rates of financial instruments as of the end of fiscal 2008 were: 4.9% for installment loans, 2.5% for interest-bearing bonds, 1.7% for long- and short-term debt and 1.0% for deposits. The average payment rate of interest rate swaps was 2.4% and the average receipt rate was 2.4%. There is no material change in the balance or in the average interest rate of financial instruments.

Table of Contents

The table below shows our interest rate risk exposure and the results of our interest rate sensitivity analysis.

In addition to the table above, we acquire loans we call purchased loans that have shown evidence of credit quality deterioration since origination and for which it is probable that collection of all contractually required payments from the debtors is unlikely in accordance with AICPA Statement of Position (SOP) 03-3 (Accounting for Certain Loans or Debt Securities Acquired in a Transfer). It is difficult to estimate the timing and extent of collection for these loans. Total book value of our purchased loans as of March 31, 2009 amounted to ¥148,984 million.

We hold foreign currency-denominated assets and liabilities and deal in foreign currencies. It is our policy to match balances of foreign currency-denominated assets and liabilities as a means of hedging foreign exchange rate risk. While we do not take large marketable exposures bearing foreign exchange rate risk for trading purposes, there are cases where a certain part of our foreign currency-denominated investments are not hedged for foreign exchange rate risk.

Table of Contents

Furthermore, surplus capital accumulated in foreign currencies at our overseas subsidiaries is translated to Japanese yen upon consolidation. The fluctuations in shareholder's equity due to these translations hold foreign exchange rate risk.

We identified all positions subject to a change in the value of the foreign currency and calculated the potential loss in future earnings resulting from several hypothetical scenarios of 10% changes in related currencies. For fiscal 2008 and fiscal 2009, we found that the largest loss results from a scenario where the euro appreciates against the dollar. Based on these scenarios, exchange losses in future earnings were ¥1,393 million at the end of fiscal 2008 and ¥2,360 million at the end of fiscal 2009.

We have marketable equity securities held for purposes other than trading, which are subject to price risk arising from changes in their market prices. Our shareholder's equity and net income bear risks due to changes in the market prices of these securities. To manage these risks of market price fluctuations, we assume a scenario of a 10% uniform upward and downward movement in stock prices and calculate the fair value sensitivity of our equity securities. The following table shows the sensitivity of our investments to changes in equity prices as of March 31, 2008 and 2009.

| | As of March 31, 2008 | |
|-----------|-----------------------------|---------|
| 10% | ±0% | +10% |
| | (In millions of yen) | |
| ¥(10,038) | ¥0 | ¥10,038 |
| | As of March 31, 2009 | |
| 10% | ±0% | +10% |
| | (In millions of yen) | |
| ¥(4,553) | ¥0 | ¥4,553 |

We are also exposed to market risks in relation to insurance policies issued by ORIX Life Insurance. All insurance policies issued by ORIX Life Insurance are denominated in yen, so fluctuations in foreign exchange rates do not cause fluctuations in the payments. These payments do not fluctuate based on market interest rates either. Our insurance policies include obligations that are based upon the occurrence of loss events. These also include insurance contract obligations that are based upon essentially financial criteria, such as insurance products that are designed partially or wholly as investment products. Changes in market interest rates may affect the fair value of our obligations under other investment-type insurance products, and may affect the present value of our expected obligations (based on actuarial determinations) under other insurance products. As mentioned above, life insurance is not included in the table of interest rate risk exposure and interest rate sensitivity.

Item 12. Description of Securities Other than Equity Securities

Not applicable.

Table of Contents

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies

None.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

None.

Item 15. Controls and Procedures

As of March 31, 2009, the ORIX Group, under the supervision and with the participation of the Company's management, including the Chief Executive Officer, the Chief Operating Officer and the Chief Financial Officer, performed an evaluation of the effectiveness of the ORIX Group's disclosure controls and procedures. The Company's management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures, which by their nature can provide only reasonable assurance regarding management's control objectives. Based on this evaluation, the Company's Chief Executive Officer, Chief Operating Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective at the reasonable assurance level for gathering, analyzing and disclosing the information the Company is required to disclose in the reports it files under the Act, within the time periods specified in the SEC's rules and forms. There has been no change in the ORIX Group's internal control over financial reporting that occurred during the period covered by this annual report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Management's report on internal control over financial reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) under the Securities Exchange Act of 1934). The internal control over financial reporting process of the ORIX Group was designed by, or under the supervision of, the Company's Chief Executive Officer, Chief Operating Officer and Chief Financial Officer and effected by the Company's board of directors, management and other personnel, to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America and includes those policies and procedures that:

Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the ORIX Group;

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the ORIX Group

Edgar Filing: ORIX CORP - Form 20-F

are being made only in accordance with authorizations of management and directors of the Company; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of ORIX Group's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company's management assessed the effectiveness of our internal control over financial reporting as of March 31, 2009 by using the criteria set forth in "Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, the Company's management concluded that our internal control over financial reporting was effective as of March 31, 2009.

Table of Contents

The effectiveness of our internal control over financial reporting has been audited by KPMG AZSA & Co., an independent registered public accounting firm, who also audited our financial statements as of and for the year ended March 31, 2009, as stated in their audit report which is included in Item 18 (page F-3).

Item 16. Reserved

Item 16A. Audit Committee Financial Expert

Our board of directors has determined that Teruo Ozaki is an audit committee financial expert, within the meaning of the current rules of the US Securities and Exchange Commission. Teruo Ozaki is independent as required by Section 303A.06 of the New York Stock Exchange Listed Company Manual.

Item 16B. Code of Ethics

We have adopted a code of ethics that applies to our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. Pursuant to our Code of Ethics, as amended in fiscal 2005, officers of ORIX covered by ORIX's Code of Ethics are required to promptly bring to the attention of the Company's Executive Officer of the Legal and Compliance Department any information concerning any violations of the Code of Ethics.

Item 16C. Principal Accountant Fees and Services

FEES PAID TO PRINCIPAL ACCOUNTANT

AUDIT FEES

In fiscal 2008 and 2009, our auditors (including Japanese and overseas affiliates of KPMG AZSA & Co.) billed us ¥1,404 million and ¥1,372 million, respectively, for direct audit fees.

AUDIT-RELATED FEES

In fiscal 2008 and 2009, our auditors billed us ¥82 million and ¥43 million, respectively, for audit-related services, including services related to due diligence.

TAX FEES

In fiscal 2008 and 2009, our auditors billed us ¥69 million and ¥87 million, respectively, for tax-related services, including tax compliance and tax advice.

ALL OTHER FEES

In fiscal 2008 and 2009, our auditors billed us ¥3 million and ¥1 million, respectively, for other products and services which primarily consisted of advisory services.

AUDIT COMMITTEE'S PRE-APPROVAL POLICIES AND PROCEDURES

In terms of audit services, every year the independent registered public accounting firm draws up its annual audit plan and annual budget, which is evaluated by ORIX's Accounting Department. Subsequently, pre-approval is obtained from the Audit Committee.

Table of Contents

Non-audit services are generally not obtained from the independent registered public accounting firm or its affiliates. In situations where ORIX must engage the non-audit services of the independent registered public accounting firm, pre-approval is obtained from the Audit Committee on a case-by-case basis only after the reason has been specified.

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

| | (a) Total number of Shares (or Units) Purchased (1) | (b) Average Price Paid per Share (or Unit) (2) | (c) Total number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs (2) | (d) Maximum Number (or Approximate Yen Value) of Shares (or Units) that May Yet be Purchased Under the Plans or Programs |
|--------------------|---|--|---|--|
| Fiscal 2009 | | | | |
| April 2008 | 1,800,017 | ¥ 16,272 | 1,800,000 | ¥0 |

| February 2009 | 7 | 2,719 | 0 | 0 |
| March 2009 | 32 | 2,811 | 0 | 0 |
| Total | 1,849,674 | ¥ 32,768 | 0 | ¥0 |

Notes: (1) One unit of the Shares is comprised of 10 Shares. The number of shares constituting one unit was reduced from 100 to 10 on December 1, 2005. Each unit of Shares has one vote. A holder who owns Shares in other than a multiple of 10 will own less than a whole unit (i.e., for the portion constituting fewer than 10 Shares). Under the unit share system, holders of Shares constituting less than a unit have the right to require ORIX to purchase their Shares and the right to require ORIX to sell them additional Shares to create a whole unit of 10 Shares.

(2) No plan or program to purchase Shares was announced in fiscal 2009 nor up until the filing of this annual report.

Item 16G. Corporate Governance

Our ADRs have been listed on the New York Stock Exchange, the NYSE, since 1998. We are therefore required to comply with the NYSE's new corporate governance listing standards, Section 303A.11, approved by the SEC in November 2003. As a foreign issuer, we are not required to

follow several of the NYSE listing standards.

Our corporate governance practices differ in certain significant respects from those that U.S. companies must adopt in order to maintain a NYSE listing and, in accordance with Section 303A.11 of the NYSE's Listed Company Manual, we provide a brief, general summary of such differences.

The composition of our Board of Directors and its committees differs significantly in terms of independence from the composition requirements for boards and committees that U.S. companies must satisfy in order to

Table of Contents

maintain a NYSE listing. We are not required to meet the NYSE's independence requirements for individuals on our Board of Directors or our Nominating, Audit, and Compensation Committees. Under Japanese law, a majority of the membership on our committees must be outside directors—a Japanese law concept that shares similarities with the U.S. concept of independent director. However, we are not required to include on our Board of Directors a majority of outside directors, nor are we required to compose our committees exclusively from outside directors. Five of our 12 directors are considered outside directors.

Under the Commercial Code of Japan, an outside director is a director (i) who does not execute the company's business, (ii) who has not before executed the business of the company or its subsidiaries in the capacity of director, executive officer (*shikkou-yaku*), manager, or employee, and (iii) who does not execute the business of any subsidiary of the company in the capacity of director or executive officer of such subsidiary or in the capacity of manager or any other employee of the company or any of its subsidiaries.

In addition to differences in composition requirements for our Board, we are not required to:

make publicly available one or more documents that summarize all aspects of our corporate governance guidelines or prepare a written code that states the objectives, responsibilities, and performance evaluation criteria of our Nominating, Audit and Compensation Committees in a manner that satisfies the NYSE's requirements; or

adopt a code of business conduct and ethics for our directors, officers, and employees that addresses fully the topics necessary to satisfy the NYSE's requirements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of ORIX Corporation:

We have audited the accompanying consolidated balance sheets of ORIX Corporation (a Japanese corporation) and its subsidiaries as of March 31, 2008 and 2009, and the related consolidated statements of income, shareholders' equity and cash flows for each of the years in the three-year period ended March 31, 2009, expressed in Japanese yen. In connection with our audits of the consolidated financial statements, we also have audited financial statement Schedule II. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ORIX Corporation and its subsidiaries as of March 31, 2008 and 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended March 31, 2009, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), ORIX Corporation's internal control over financial reporting as of March 31, 2009, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated June 25, 2009 expressed an unqualified opinion on the effectiveness of ORIX Corporation's internal control over financial reporting.

The accompanying consolidated financial statements as of and for the year ended March 31, 2009 have been translated into United States dollars solely for convenience of the reader. We have audited the translation, and, in our opinion, the consolidated financial statements, expressed in Japanese yen, have been translated into United States dollars on the basis set forth in Note 1 (ab) to the consolidated financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of ORIX Corporation:

We have audited ORIX Corporation's (a Japanese corporation) internal control over financial reporting as of March 31, 2009, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting, included in Item 15 - Controls and Procedures of the accompanying Form 20-F. Our responsibility is to express an opinion on ORIX Corporation's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, ORIX Corporation maintained, in all material respects, effective internal control over financial reporting as of March 31, 2009, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the accompanying consolidated balance sheets of ORIX Corporation and its subsidiaries as of March 31, 2008 and 2009, and the related consolidated statements of income, shareholders' equity and cash flows for each of the years in the three-year period ended March 31, 2009, expressed in Japanese yen, and our report dated June 25, 2009 expressed an unqualified opinion on those consolidated financial statements.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

ORIX Corporation and Subsidiaries

1. Significant Accounting and Reporting Policies

In preparing the accompanying consolidated financial statements, ORIX Corporation (the Company) and its subsidiaries have complied with accounting principles generally accepted in the United States of America (US GAAP), modified for the accounting for stock splits (see (o)). Significant accounting and reporting policies are summarized as follows:

(a) Basis of presenting financial statements

The Company and its subsidiaries in Japan maintain their books in conformity with Japanese accounting practices, which differ in certain respects from US GAAP.

The accompanying consolidated financial statements have been prepared in conformity with US GAAP and, therefore, reflect certain adjustments to these company's books and records. The principal adjustments relate to initial direct costs to originate lease or loan, use of the straight-line method of depreciation for operating lease equipment, deferral of life insurance policy acquisition cost, calculation of insurance policy liabilities, accounting for goodwill and intangible assets resulting from business combinations, accounting for pension plans, and a reflection of the income tax effect on such adjustments and reclassification of discontinued operations.

(b) Principles of consolidation

The consolidated financial statements include the accounts of the Company and all of its subsidiaries. Investments in affiliates, where the Company has the ability to exercise significant influence by way of 20%–50% ownership or other means, are accounted for by using the equity method (including the fair value option). For certain entities where the Company holds majority voting interests but minority shareholders have substantive participation rights to decisions that occur as part of the ordinary course of their business, the equity method is applied pursuant to Emerging Issue Task Force (EITF) 96-16 (Investor's accounting for an investee when the investor has a majority of the voting interest but the minority shareholder or shareholders have certain approval or veto rights). In addition, the consolidated financial statements also include variable interest entities to which the Company and its subsidiaries are primary beneficiaries pursuant to FASB Interpretation No. 46 (revised December 2003) (FIN 46(R)) (Consolidation of Variable Interest Entities). A lag period of up to three months is used on a consistent basis when considered necessary and appropriate for recognizing the results of subsidiaries and affiliates.

All significant intercompany accounts and transactions have been eliminated in consolidation.

(c) Use of estimates

The preparation of the consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Company has identified nine areas where it believes assumptions and estimates are particularly critical to the financial statements. These are the determination and periodic reassessment of the unguaranteed residual value for direct financing leases and operating leases (see (e)), the determination and reassessment of insurance policy liabilities and deferred policy acquisition costs (see (f)), the determination of the allowance for doubtful receivables on direct financing leases and probable loan losses (see (g)), the determination of impairment of long-lived assets (see (h)), the determination of impairment of investment in securities (see (i)), the determination of the valuation allowance for deferred tax assets and the evaluation of tax positions (see (j)), assessment and measurement of effectiveness in

ORIX Corporation and Subsidiaries

hedging relationship using derivative financial instruments (see(l)), the determination of benefit obligation and net periodic pension cost (see (m)), and the determination of impairment of goodwill and intangible assets not subject to amortization (see (w)).

(d) Foreign currencies translation

The Company and its subsidiaries maintain their accounting records in their functional currency. Transactions in foreign currencies are recorded in the entity's functional currency based on the prevailing exchange rates on the transaction date.

The financial statements of overseas subsidiaries and affiliates are translated into Japanese yen by applying the exchange rates in effect at the end of each fiscal year to all assets and liabilities. Income and expenses are translated at the average rates of exchange prevailing during the fiscal year. The currencies in which the operations of the overseas subsidiaries and affiliates are conducted are regarded as the functional currencies of these companies. Foreign currency translation adjustments reflected in accumulated other comprehensive income in shareholders equity are from the translation of foreign currency financial statements into Japanese yen.

(e) Recognition of revenues

Revenues are recognized when persuasive evidence of an arrangement exists, the service has been rendered or the goods have been delivered to the customer, the transaction price is fixed or determinable and collectibility is reasonably assured.

In addition to the aforementioned general policy, the policies as specifically described hereinafter are applied for each of the major revenue items.

Leases The Company and its subsidiaries lease various assets to customers under direct financing or operating lease arrangements. Classification of a lease arrangement into either a direct financing lease or an operating lease is depending upon the specific conditions of the arrangement. Revenue recognition policies applied for direct financing leases and operating leases are specifically described in sections following this paragraph. In providing leasing services, the Company and its subsidiaries execute supplemental services, such as paying insurance and handling taxes on leased assets on behalf of lessees. In some cases, automobile maintenance services are also provided to lessees. Where under terms of the lease or related maintenance agreements the Company and its subsidiaries bear the favorable or unfavorable variability of cost, revenues and expenses are recorded on a gross basis. For those arrangements in which the Company and its subsidiaries do not have substantial risks and rewards of ownership, but instead serve as an agent in collecting from lessees and remitting payments to third parties, the Company and its subsidiaries record revenues net of third-party services costs. Revenues from automobile maintenance services are taken into income over the contract period in proportion to the estimated service costs to be incurred and are recorded in other operating revenues in the accompanying consolidated statements of income.

(1) Recognition of revenues for direct financing leases

Direct financing leases consist of full-payout leases for various equipment types, including office equipment, industrial machinery and transportation equipment. The excess of aggregate lease rentals plus the estimated unguaranteed residual value over the cost of the leased equipment constitutes the unearned lease income to be taken into income over the lease term by using interest method. The estimated residual values represent estimated proceeds from the disposition of equipment at the time the lease is terminated. Estimates of unguaranteed residual values are based on current market values of used equipment and estimates of when and

F-9

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

how much equipment will become obsolete. Initial direct costs are being deferred and amortized as a yield adjustment over the life of related lease by using interest method. The unamortized balance of initial direct costs is reflected as a component of investment in direct financing leases.

(2) Recognition of revenues for operating leases

Revenues from operating leases are recognized on a straight-line basis over the contract terms. Investment in operating leases is recorded at cost less accumulated depreciation and is depreciated over their estimated useful lives mainly on a straight-line basis. Estimated average useful lives of principal operating lease assets classified as transportation equipment is 7 years, as measuring and information-related equipment is 4 years, as real estate is 31 years, and as other is 7 years. Depreciation costs are included in costs of operating leases. Gains or losses arising from dispositions of operating lease assets, except real estate operating leases, are included in operating lease revenues. With respect to some sales of real estate under operating leases such as commercial buildings, the Company or its subsidiaries may retain an interest in some cash flows from the real estate in the form of property management or other participation in performance of the lease asset. Where the Company or its subsidiaries have continuing involvement with the cash flows from the real estate under operating leases which have been disposed of, the gains or losses arising from such disposition are separately disclosed as Gains on sales of real estate under operating leases, whereas if the Company or its subsidiaries have no continuing involvement with the cash flows from such disposed real estate, the gains or losses are reported as Discontinued operations-Income from discontinued operations, net.

Estimates of residual values are based on current market values of used equipment and estimates of when and how much equipment will become obsolete.

Installment loans Interest income on installment loans is recognized on an accrual basis. Certain direct loan origination costs, offset by loan origination fees, net, are being deferred and amortized over the contractual term of the loan as an adjustment of the related loan's yield using the interest method.

Interest payments received on impaired loans are recorded as interest income unless the collection of the remaining investment is doubtful at which time payments received are recorded as reductions of principal.

Interest payments received on loans with evidence of deterioration of credit quality since origination and for which it is probable at acquisition that collection of all contractually required payments from the debtors is unlikely are recognized on cash basis method or recorded as reductions of principal if the timing and amount of cash flows expected to be collected are reasonably unable to be estimated.

Edgar Filing: ORIX CORP - Form 20-F

Non-accrual policy Revenues on direct financing leases and installment loans are no longer accrued at the time when principal or interest become past due 90 days or more, or earlier, if management believes their collectibility is doubtful. Accrued but uncollected interest is reclassified to investment in direct financing leases or installment loans in the accompanying consolidated balance sheets and becomes subject to the allowance for doubtful receivables and probable loan loss process. Cash repayments received on these accounts are applied first against past due interest until qualifying for a return to accrual status and then any surpluses are taken to income.

Brokerage commissions and net gains on investment securities Brokerage commissions and net gains on investment securities are recorded on a trade date basis.

Real estate sales Revenues from the sales of real estate are recognized when a contract is in place, a closing has taken place, the buyer's initial and continuing investment is adequate to demonstrate a commitment to pay for the property and the Company and its subsidiaries do not have a substantial continuing involvement in the property.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

(f) Insurance premiums and expenses

Premium income from life insurance policies are recognized as earned premiums when due.

Life insurance benefits are recorded as expenses when they are incurred. Policy liabilities for future policy benefits are established for by the net level premium method, based on actuarial estimates of the amount of future policyholder benefits. The policies are characterized as long-duration policies and mainly consist of whole life, term life, endowments, and medical insurance. Computation of policy liabilities necessarily includes assumptions about mortality, lapse rates and future yields on related investments and other factors applicable at the time the policies are written. A life insurance subsidiary continually evaluates the potential for changes in the estimates and assumptions applied in determining policy liabilities, both positive and negative, and uses the results of these evaluations both to adjust recorded liabilities and to adjust underwriting criteria and product offerings.

FASB Statement No. 60 (Accounting and Reporting by Insurance Enterprises) requires insurance companies to defer certain costs associated with writing insurances, or deferred policy acquisition costs, and amortizes them over the respective policy periods in proportion to anticipated premium revenue. Deferred policy acquisition costs are the costs related to the acquisition of new and renewal insurance policies and consist primarily of first-year commissions in excess of recurring policy maintenance costs and certain variable costs and expenses for underwriting policies.

(g) Allowance for doubtful receivables on direct financing leases and probable loan losses

The allowance for doubtful receivables on direct financing leases and probable loan losses is maintained at a level which, in the judgment of management, is adequate to provide for probable losses inherent in lease and loan portfolios. The allowance is increased by provisions charged to income and is decreased by charge-offs, net of recoveries.

Developing the allowance for doubtful receivables on direct financing leases and probable loan losses is subject to numerous estimates and judgments. In evaluating the adequacy of the allowance, management considers various factors, including the nature and characteristics of the obligors, current economic conditions and trends, prior charge-off experience, current delinquencies and delinquency trends, future cash flows expected to be received from the direct financing leases and loans and the value of underlying collateral and guarantees. Generally, the valuation allowance for large balance non-homogeneous loans is individually assessed to determine whether the loan is impaired. If the loan is deemed to be impaired, it is evaluated based on the present value of expected future cash flows, the loan's observable market price or the fair value of the collateral securing the loan if the loan is collateral-dependent. The allowance for losses on smaller-balance homogeneous loans, including individual housing loans and card loans which are not restructured, and lease receivables, is collectively evaluated, considering current economic conditions and trends, the value of underlying collateral and guarantees, prior charge-off experience, delinquencies and non-accruals.

Receivables are charged off when, in the opinion of management, the likelihood of any future collection is believed to be minimal.

(h) Impairment of long-lived assets

The Company and its subsidiaries have followed FASB Statement No. 144 (Accounting for the Impairment or Disposal of Long-Lived Assets). Under FASB Statement No. 144, long-lived assets to be held and used in operations, including tangible assets and intangible assets being amortized, consisting primarily of real estate development projects, golf courses and other operating assets, shall be tested for recoverability whenever events

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

or changes in circumstances indicate that the assets might be impaired. When the undiscounted future cash flows estimated to be generated by those assets are less than the carrying amount of those assets, the net carrying amount of assets not recoverable is reduced to fair value if lower than the carrying amount. In determining fair value, appraisals prepared by independent third party appraisers or the Company's own staff of qualified appraisers, based on recent transactions involving sales of similar assets or other valuation techniques to estimate fair value are utilized.

(i) Investment in securities

Trading securities are reported at fair value with unrealized gains and losses included in income.

Available-for-sale securities are reported at fair value, and unrealized gains or losses are recorded through other comprehensive income (loss), net of applicable income taxes.

Held-to-maturity securities are recorded at amortized cost.

Other securities are recorded at cost or carrying value that reflects equity income and loss based on the investor's share.

For available-for-sale securities, the Company and its subsidiaries generally recognize losses related to equity securities for which the fair value has been significantly below the acquisition cost (or current carrying value if an adjustment has been made in the past) for more than six months. Also, the Company and its subsidiaries charge against income losses related to equity securities in situations where, even though the fair value has not remained significantly below the carrying value for six months, the decline in the fair value of an equity security is based on issuer-specific economic conditions and not just general declines in the related market and where it is considered unlikely that the fair value of the equity security will recover within the next six months. In addition, the Company and its subsidiaries charge against income losses related to debt securities in situations where it is considered that the decline in the fair value of a debt security is other than temporary because there has been a significant deterioration in a bond issuer's credit rating, an issuer's default or a similar event.

For other securities, the Company and its subsidiaries reduce the carrying value of other security to the fair value and charge against income losses related to other securities in situations where it is considered that the decline in the value of other security is other than temporary.

(j) Income taxes

Edgar Filing: ORIX CORP - Form 20-F

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in income in the period that includes the enactment date. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax asset will not be realized.

In fiscal 2008, the Company and its subsidiaries adopted FASB Interpretation No. 48 (Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109). According to the interpretation, the Company and its subsidiaries recognize the financial statement effects of a tax position taken or expected to be taken in a tax return when it is more likely than not, based on the technical merits, that the position will be

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

sustained upon tax examination, including resolution of any related appeals or litigation processes, and measure the tax position that meets the recognition threshold at the largest amount of tax benefit that is greater than 50% likely of being realized upon settlement with the taxing authority. The Company and its subsidiaries classify penalties and interest expense related to income taxes as part of provision for income taxes in the consolidated statements of income.

(k) Securitized assets

The Company and its subsidiaries have securitized and sold to investors certain lease receivables, loan receivables and investment in securities. In the securitization process, the assets to be securitized (the assets) are sold to trusts and special-purpose entities that issue asset-backed beneficial interests and securities to the investors. The Company and its subsidiaries account for the sale when control over the assets is surrendered. When the Company and its subsidiaries sell the assets in a securitization transaction, the carrying value of the assets is allocated to the portion sold and the portion that continues to be held, based on relative fair values. The Company and its subsidiaries recognize gains or losses for the difference between the net proceeds received and the allocated carrying value of the assets sold. Any gain or loss from a securitization transaction is recorded as revenue of direct financing leases, interest on loans and investment securities, or brokerage commissions and net gains on investment securities.

Interests that continue to be held include senior interests, subordinated interests and cash reserve account. Interests that continue to be held are initially recorded at allocated carrying value of the assets based on their fair value and are periodically reviewed for impairment. When a decline in fair value below the carrying value of interests that continue to be held is other than temporary, the Company and its subsidiaries consider the value of the interests that continue to be held to be impaired and record a write-down of the interests that continue to be held to fair value.

Fair values of interests that continue to be held are estimated by determining the present value of future expected cash flows based on management's estimates of key assumptions, including expected credit loss rate, discount rate and prepayment rate.

(l) Derivative financial instruments

The Company and its subsidiaries apply FASB Statement No. 133 (Accounting for Derivative Instruments and Hedging Activities) and all derivatives held by the Company and its subsidiaries are recognized on the balance sheet at fair value. The accounting treatment of subsequent changes in their fair value depends on their use, and whether they qualify as effective hedges for accounting purposes. Derivatives that are not hedges must be adjusted to fair value through the income statement. If a derivative is a hedge, then depending on its nature, changes in its fair value will be either offset against change in the fair value of hedged assets or liabilities through the income statement, or recorded in other comprehensive income (loss).

Edgar Filing: ORIX CORP - Form 20-F

If a derivative is held as a hedge of the variability of fair value related to a recognized asset or liability or an unrecognized firm commitment (fair value hedge), changes in the fair value of the derivative are recorded in earnings along with the changes in the fair value of the hedged item.

If a derivative is held as a hedge of the variability of cash flows related to a forecasted transaction, a recognized asset or liability (cash flow hedge), changes in the fair value of the derivative are recorded in accumulated other comprehensive income (loss) to the extent that the derivative is effective as a hedge, until earnings are affected by the variability in cash flows of the designated hedged item.

F-13

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

If a derivative is held as a hedge of a foreign-currency fair-value or cash-flow hedge (foreign currency hedge), changes in the fair value of the derivative are recorded in either earnings or accumulated other comprehensive income (loss), depending on whether the hedged transaction is a fair-value hedge or a cash-flow hedge. However, if a derivative is used as a hedge of a net investment in a foreign operation, changes in its fair value, to the extent effective as a hedge, are recorded in the foreign currency translation adjustments account within accumulated other comprehensive income (loss).

Changes in the fair value of a derivative, which is not held as a hedge, such as those held for trading use, or the ineffective portion of the change in fair value of a derivative that qualifies as a hedge, are recorded in earnings.

For all hedging relationships, at inception the Company and its subsidiaries formally document the details of the hedging relationship and hedged activity. The Company and its subsidiaries also formally assess, both at the hedge s inception and on an ongoing basis, the effectiveness of the hedge relationship. The Company and its subsidiaries cease hedge accounting prospectively when the derivative no longer qualifies for hedge accounting.

(m) Pension plans

The Company and certain subsidiaries have contributory and non-contributory funded pension plans covering substantially all of their employees. The Company and its subsidiaries apply FASB Statement No. 87 (Employers Accounting for Pensions), and the costs of pension plans are accrued based on amounts determined using actuarial methods under the assumptions of discount rate, rate of increase in compensation level, expected long-term rate of return on plan assets and others.

The Company and its subsidiaries also apply the recognition and disclosure provisions of FASB Statement No. 158 (Employers Accounting for Defined Benefits Pension and Other Postretirement Plans an amendment of FASB Statements No. 87, 88, 106 and 132(R)), and recognize the funded status of pension plans, measured as the difference between the fair value of plan assets and the benefit obligation, on the consolidated balance sheet. Changes in that funded status are recognized in the year in which the changes occur through other comprehensive income (loss), net of applicable income taxes.

(n) Stock-based compensation

The Company and its subsidiaries apply FASB Statement No. 123 (revised 2004) (FASB Statement 123(R)) (Share-Based Payment). FASB Statement 123(R) requires, with limited exception, that the cost of employee services received in exchange for an award of equity instruments be measured based on the grant-date fair value. The costs are recognized over the requisite employee service period.

(o) Stock splits

Stock splits implemented prior to October 1, 2001 had been accounted for by transferring an amount equivalent to the par value of the shares from additional paid-in capital to common stock as required by the Japanese Commercial Code (the Code) before amendment. However, no such reclassification was made for stock splits when common stock already included a portion of the proceeds from shares issued at a price in excess of par value. This method of accounting was in conformity with accounting principles generally accepted in Japan.

As a result of a revision to the Code before amendment effective on October 1, 2001 and Company Law implemented on May 1, 2006, the above-mentioned method of accounting required by the Code has become unnecessary.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

In the United States, stock splits in comparable circumstances are considered to be stock dividends and are accounted for by transferring from retained earnings to common stock and additional paid-in capital amounts equal to the fair market value of the shares issued. Common stock is increased by the par value of the shares and additional paid-in capital is increased by the excess of the market value over par value of the shares issued. Had such stock splits made prior to October 1, 2001 been accounted for in this manner, additional paid-in capital as of March 31, 2009 would have increased by approximately ¥24,674 million (\$251 million), with a corresponding decrease in retained earnings. Total shareholders equity would remain unchanged. A stock split on May 19, 2000 was excluded from the above amounts because the stock split was not considered to be a stock dividend under accounting principles generally accepted in the United States of America.

(p) Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits placed with banks and short-term highly liquid investments with original maturities of three months or less.

(q) Restricted cash

Restricted cash consists of cash held in trusts for the segregation of assets under an investor protection fund, deposits related to servicing agreements and deposits collected on behalf of the customers and applied to non-recourse loans.

(r) Other operating assets

Other operating assets consist primarily of operating facilities (including golf courses, hotels and training facilities), which are stated at cost less accumulated depreciation, and depreciation is calculated mainly on the straight-line basis over the estimated useful lives of the assets. Accumulated depreciation was ¥17,838 million and ¥24,764 million (\$252 million) as of March 31, 2008 and 2009, respectively. Estimated useful lives range up to 50 years for buildings, up to 56 years for land improvement and up to 20 years for others.

(s) Other receivables

Other receivables include primarily payments made on behalf of lessees for property tax, maintenance fees and insurance premiums in relation to direct financing lease contracts, accounts receivables in relation to sales of assets to be leased, residential condominiums and other assets, and receivables relating to debt securities sold.

(t) Inventories

Inventories consist primarily of advance and/or progress payments for development of residential condominiums for sale and completed residential condominiums (including completed residential condominiums waiting to be delivered to buyers under the contracts for sale). Advance and/or progress payments for development of residential condominiums for sale are carried at cost less any impairment losses and finished goods (including completed residential condominiums) are stated at the lower of cost or market. As of March 31, 2008 and 2009, advance and/or progress payments were ¥210,312 million and ¥174,332 million (\$1,775 million), respectively, and finished goods were ¥22,538 million and ¥23,628 million (\$241 million), respectively.

A certain subsidiary recorded ¥5,222 million and ¥10,911 (\$111 million) of write-downs principally for advance and/or progress payments for development of residential condominiums for sale for fiscal 2008 and 2009, resulting from an increase in development costs. These write-downs were recorded in costs of real estate sales and included in the Real Estate segment.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

(u) Office facilities

Office facilities are stated at cost less accumulated depreciation. Depreciation is calculated on a declining-balance basis or straight-line basis over the estimated useful lives of the assets. Accumulated depreciation was ¥35,857 million and ¥35,859 million (\$365 million) as of March 31, 2008 and 2009, respectively. Estimated useful lives range up to 62 years for buildings and fixtures and up to 20 years for machinery and equipment.

(v) Other assets

Other assets consist primarily of the excess of purchase prices over the net assets acquired in acquisitions (goodwill) and other intangible assets (see (w)), deferred insurance policy acquisition costs which are amortized over the contract periods, leasehold deposits and advance payments made in relation to purchases of assets to be leased and to construction of real estate for operating lease.

(w) Goodwill and other intangible assets

The Company and its subsidiaries have followed FASB Statement No. 141 (Business Combinations) and FASB Statement No. 142 (Goodwill and Other Intangible Assets). FASB Statement No. 141 requires that all business combinations be accounted for using the purchase method. Accounting for business combinations using the pooling of interests method is no longer allowed. FASB Statement No. 141 also requires that intangible assets acquired in a business combination be recognized apart from goodwill if the intangible assets meet one of two criteria either the contractual-legal criterion or the separability criterion.

FASB Statement No. 142 establishes how intangible assets (other than those acquired in a business combination) should be accounted for upon acquisition. It also addresses how goodwill and other intangible assets should be accounted for subsequent to their acquisition. Both goodwill and intangible assets that have indefinite useful lives are no longer amortized but tested at least annually for impairment. The Company and its subsidiaries test the goodwill either at the operating segment level or one level below the operating segments. Intangible assets with finite lives are amortized over their useful lives and tested for impairment in accordance with FASB Statement No. 144 (Accounting for the Impairment or Disposal of Long-Lived Assets).

(x) Trade notes, accounts payable and other liabilities

Trade notes, accounts payable and other liabilities include accounts payables and guarantee liabilities.

(y) Capitalization of interest costs

The Company and its subsidiaries capitalized interest costs of ¥636 million, ¥2,345 million and ¥2,766 million (\$28 million) in fiscal 2007, 2008 and 2009, respectively, related to specific long-term development projects.

(z) Advertising

The costs of advertising are expensed as incurred. The total amounts charged to advertising expense in fiscal 2007, 2008 and 2009 are ¥13,664 million, ¥14,004 million and ¥11,280 million (\$115million), respectively.

(aa) Discontinued operations

The Company and its subsidiaries have followed FASB Statement No.144 (Accounting for the Impairment or Disposal of Long-Lived Assets). Under FASB Statement No.144, the scope of discontinued operations includes the operating results of any component of an entity with its own identifiable operations and cash flow

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

and in which operations the Company and its subsidiaries will not have significant continuing involvement. Included in reported discontinued operations are the operating results of operations for the subsidiaries, the business units, and certain properties sold or to be disposed of by sale without significant continuing involvements, which results of operations for the presented periods were reclassified in the accompanying consolidated statements of income.

(ab) Financial statements presentation in U.S. dollars

The translations of the Japanese yen amounts into U.S. dollars are included solely for the convenience of the readers, using the prevailing exchange rate at March 31, 2009, which was ¥98.23 to \$1.00. The convenience translations should not be construed as representations that the Japanese yen amounts have been, could have been, or could in the future be, converted into U.S. dollars at this or any other rate of exchange.

(ac) Earnings per share

Basic earnings per share is computed by dividing income from continuing operations and net income by the weighted average number of shares of common stock outstanding in each period and diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Earnings per share is adjusted for any stock splits and stock dividends retroactively.

Furthermore, the Company and its subsidiaries apply EITF Issue No. 04-8 (The Effect of Contingently Convertible Instruments on Diluted Earnings per Share) to Liquid Yield Option NotesTM.

(ad) Issuance of stock by a subsidiary or an affiliate

When a subsidiary or an affiliate issues stocks to unrelated third parties, the Company and its subsidiaries' ownership interest in the subsidiary or the affiliate decreases. In the event that the price per share is more or less than the Company and its subsidiaries' average carrying amount per share, the Company and its subsidiaries adjust the carrying amount of its investment in the subsidiary and the affiliate and recognizes gain or loss included in the consolidated statements of income in the year in which the change in ownership interest occurs.

(ae) New accounting pronouncements

Edgar Filing: ORIX CORP - Form 20-F

In September 2006, FASB Statement No. 157 (Fair Value Measurements) was issued. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This Statement is effective for fiscal years beginning after November 15, 2007. Adoption of this Statement did not have a significant effect on the Company and its subsidiaries' results of operations or financial position. For more information about Fair Value Measurements, see Note 2.

In February 2007, FASB Statement No. 159 (The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115) was issued. This Statement permits entities to choose to measure many financial instruments and certain other assets and liabilities at fair value at specified election dates, which had not been measured at fair value. A business entity shall report unrealized gains and losses for which the fair value option has been elected in earnings at each subsequent reporting date. This Statement is effective as of the beginning of fiscal year that begins after November 15, 2007. The Company and its subsidiaries did not choose the fair value option as of the adoption date, April 1, 2008, for any asset or liability, which have not been measured at fair value. Therefore adoption of this Statement had no effect on the Company and its subsidiaries' financial position as of the adoption date. For more information about The Fair Value Option, see Note 12.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

In December 2007, FASB Statement No. 141 (revised 2007) (*Business Combinations*) was issued. This Statement requires the acquiring entity in a business combination to recognize the full fair value of assets acquired, liabilities assumed and noncontrolling interest in the transaction at the acquisition date (whether a full or partial acquisition); requires expensing of acquisition-related transaction and restructuring costs; and requires the acquirer to disclose to investors and other users all of the material information needed to evaluate and understand the nature and financial effect of the business combination. This Statement applies prospectively to business combinations for which the acquisition date is on or after the beginning of the fiscal years beginning on or after December 15, 2008. Generally, the effect on the Company and its subsidiaries results of operations or financial position of this Statement will depend on future acquisitions.

In December 2007, FASB Statement No. 160 (*Noncontrolling Interests in Consolidated Financial Statements* an amendment of ARB No. 51) was issued. This Statement requires noncontrolling interests in subsidiaries to be classified as a separate component of equity. Under this Statement, increases and decreases in the parent's ownership interest that leave control intact are accounted for as equity transactions. On the other hand, in a transaction that results in the loss of control, the gain or loss recognized in income includes the realized gain or loss related to the portion of ownership interest sold and the gain or loss on the remeasurement to fair value of the interest retained. This Statement is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Generally, the effect on the Company and its subsidiaries' results of operations or financial position of this Statement will depend on future transactions.

In March 2008, FASB Statement No. 161 (*Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133) was issued. This Statement requires companies with derivative instruments to disclose information that should enable financial-statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under FASB Statement No. 133 (*Accounting for Derivative Instruments and Hedging Activities*), and how derivative instruments and related hedged items affect a company's financial position, financial performance, and cash flow. The required disclosures include the fair value of derivative instruments and their gains or losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk, and the company's strategies and objective for using derivative instruments. This Statement is effective for fiscal years and interim periods beginning after November 15, 2008. For more information, see Note 27.

In May 2009, FASB Statement No. 165 (*Subsequent Events*) was issued. This Statement establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before the financial statements are issued or are available to be issued. This Statement is effective for fiscal years and interim periods ending after June 15, 2009 and is applied prospectively.

In June 2009, FASB Statement No. 166 (*Accounting for Transfers of Financial Assets* an amendment of FASB Statement No. 140) was issued. This Statement removes the concept of a qualifying special-purpose entity from Statement 140 and removes the exception from applying FASB Interpretation No. 46 (revised December 2003) (*Consolidation of Variable Interest Entities*) to variable interest entities that are qualifying special-purpose entities. This Statement also modifies the financial-components approach used in Statement 140 and limits the circumstances in which a transferor derecognizes a portion or component of a financial asset. This Statement is effective as of the beginning of first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. The Company and its subsidiaries are currently evaluating the effect that the adoption of this Statement will have on the Company and its subsidiaries' results of operations and financial position.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

In June 2009, FASB Statement No. 167 (Amendments to FASB Interpretation No. 46(R)) was issued. This Statement requires an enterprise to perform qualitative analysis that identifies the primary beneficiary, who shall consolidate a variable interest entity, as the enterprise that has both of the following characteristics:

The power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance

The obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity.

Additionally, this Statement requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity. This Statement is effective as of the beginning of first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. The Company and its subsidiaries are currently evaluating the effect that the adoption of this Statement will have on the Company and its subsidiaries' results of operations and financial position.

(af) Reclassifications

Certain amounts in fiscal 2007 and 2008 consolidated financial statements have been reclassified to conform to fiscal 2009 presentation.

2. Fair Value Measurements

The Company and its subsidiaries adopted FASB Statement No. 157 (Fair Value Measurements). This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements.

This Statement classifies and prioritizes inputs used in valuation techniques to measure fair value into the following three levels:

Level 1 Inputs of quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly.

Level 3 Unobservable inputs for the assets or liabilities.

This Statement differentiates between those assets and liabilities required to be carried at fair value at every reporting period (recurring) and those assets and liabilities that are only required to be adjusted to fair value under certain circumstances (nonrecurring). The Company and its subsidiaries measure mainly cash equivalents, trading securities, available-for-sale securities, certain investment in affiliates and derivatives at fair value on a recurring basis.

The Company and its subsidiaries adopted FSP 157-2 (Effective Date of FASB Statement No. 157). This Staff Position defers the effective date of FASB Statement No. 157 to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years for nonfinancial assets and liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

The following table presents recorded amounts of major financial assets and liabilities measured at fair value on a recurring basis as of March 31, 2009:

March 31, 2009

| | Millions of yen | | | |
|--------------------------------|---|--|---|--|
| | Total Carrying Value in Consolidated Balance Sheets | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) |
| Financial Assets: | | | | |
| Cash equivalents | ¥ 34,990 | ¥ 34,990 | ¥ | ¥ |
| Trading securities | 7,410 | 1,787 | 5,457 | 166 |
| Available-for-sale securities* | 729,273 | 40,473 | 240,941 | 447,859 |
| Investment in affiliates** | 10,245 | 3,291 | | 6,954 |

Certain financial assets are required to be measured at fair value under certain circumstances (for example when there is impairment). During fiscal 2009, ¥4,065 million (\$41 million) of unlisted securities, ¥26,002 million (\$265 million) of loans held for sale, ¥113,242 million (\$1,153 million) of real estate collateral-dependent loans (net of allowance for probable loan losses) and ¥28,727 million (\$292 million) of certain investment in affiliates are measured at fair value on a nonrecurring basis mainly due to impairment recognition. And the fair values of unlisted securities, loans held for sale and real estate collateral-dependent loan (net of allowance for probable loan losses) are classified as Level 3, and ¥27,504 million (\$280 million) of investment in affiliates are classified as Level 1 and ¥1,223 million (\$12 million) of certain investment in affiliates are classified as Level 3, respectively.

The following is a description of the main valuation methodologies used for instruments measured at fair value.

Trading securities, Available-for-sale securities and Investment in affiliates

If active market prices are available, fair value measurement is based on quoted active market prices and, accordingly, these securities are classified as Level 1. If active market prices are not available, fair value measurement is based on observable inputs other than quoted prices included within Level 1, such as prices for similar assets, and these securities are classified as Level 2. If market prices are not available, then fair value is estimated by using valuation models including discounted cash flow methodology and commonly used option-pricing models. Such securities are classified as Level 3, as the valuation models are based on inputs that are unobservable in the market.

Mortgage-backed and other asset-backed securities, classified as Level 3 of available-for-sale securities consist mainly of specified bonds issued by special purpose entities, or SPEs. When re-evaluating specified bonds issued by SPEs, we estimate the fair value by discounting future cash

Edgar Filing: ORIX CORP - Form 20-F

flows using a discount rate based on the market interest rate and a risk premium. The future cash flows for the specified bonds issued by SPEs are estimated based on the contractual principal and interest repayment schedule on each of the specified bonds issued by SPEs. The risk premium is estimated mainly based on the value of collateral real estate of each specified bonds issued by SPEs and the seniority of the bonds.

F-22

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries*****Derivatives***

For exchange-traded derivatives, fair value is based on quoted market prices, and accordingly, classified as Level 1. For non-exchange traded derivatives, fair value is based on commonly used models and discounted cash flow methodology. If the inputs used for these measurements that include yield curves, volatilities, are observable, we classify it as Level 2. If the inputs are not observable, we classify it as Level 3.

3. Acquisitions

During fiscal 2007, the Company and its subsidiaries acquired entities for a total cost of ¥57,941 million, which was mainly paid in cash. In accordance with the finalization of purchase price allocation during fiscal 2008, the amount of goodwill was adjusted to ¥12,423 million, which is not deductible for income tax calculation purposes and the amount of acquired intangible assets other than goodwill recognized in these transaction was adjusted to ¥6,871 million, which mainly consist of ¥2,117 million for customer relationship that has an amortization period of 15 years, ¥1,312 million for real estate management service contracts that has an amortization period of 19 years and ¥1,138 million for the trade name that has an indefinite useful life. Acquisitions were mainly made in line with the Company's plans to expand its operations in Real Estate segment.

During fiscal 2008, the Company and its subsidiaries acquired entities for a total cost of ¥35,476 million, which was paid in cash of ¥25,261 million and the Company's common stocks of ¥10,215 million. In accordance with the finalization of purchase price allocation during fiscal 2009, the amount of goodwill was adjusted to ¥9,734 million, which is not deductible for income tax calculation purposes and the amount of acquired intangible assets other than goodwill recognized in these transactions was adjusted to ¥3,996 million. Acquisitions were mainly made in line with the Company's plans to expand its operations in Real Estate segment.

During fiscal 2009, the Company and its subsidiaries acquired entities for a total cost of ¥11,207 million (\$114 million), which was mainly paid in cash. Goodwill initially recognized in these transactions amounted to ¥5,357 million (\$55 million), which is not deductible for income tax calculation purposes. The Company reflected certain preliminary estimates with respect to the value of the underlying net assets of these entities in determining amounts of the goodwill. Thus, the amount of the goodwill could possibly be adjusted upon completion of the purchase price allocation. Acquisitions were mainly made in line with the Company's plans to expand its operations in Real Estate segment.

The segment in which goodwill is allocated is disclosed in Note 13 (Goodwill and Other Intangible Assets).

4. Cash Flow Information

Edgar Filing: ORIX CORP - Form 20-F

Cash payments during fiscal 2007, 2008 and 2009 are as follows:

| | 2007 | Millions of yen 2008 | 2009 | Millions of U.S. dollars 2009 |
|----------------|----------|-------------------------|-----------|-------------------------------------|
| Cash payments: | | | | |
| Interest | ¥ 88,671 | ¥ 113,941 | ¥ 111,435 | \$ 1,134 |
| Income taxes | 94,718 | 142,751 | 110,962 | 1,130 |

F-23

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

Non-cash investing and financing activities are excluded from the consolidated statements of cash flows. As non-cash investing activities, the Company and its subsidiaries assumed ¥12,468 million, ¥19,957 million and ¥38,120 million (\$388 million) of liabilities in connection with acquisitions in fiscal 2007, 2008 and 2009, respectively. In addition, the Company's common stocks of ¥10,215 million and ¥1,673 million (\$17 million) were exchanged in connection with acquisitions in fiscal 2008 and 2009, respectively. Moreover, affiliate's common stocks of ¥9,439 million (\$96 million) were exchanged in connection with a sale of subsidiary in fiscal 2009. As non-cash financing activities, ¥14,288 million and ¥4,209 million of convertible bonds were converted to common stocks in fiscal 2007, and 2008, respectively.

5. Investment in Direct Financing Leases

Investment in direct financing leases at March 31, 2008 and 2009 consists of the following:

| | Millions of yen | | Millions of U.S. dollars |
|-----------------------------------|-----------------|-----------|-----------------------------|
| | 2008 | 2009 | 2009 |
| Minimum lease payments receivable | ¥ 1,186,581 | ¥ 999,325 | \$ 10,173 |
| Estimated residual value | 57,581 | 54,292 | 553 |
| Initial direct costs | 11,015 | 9,544 | 97 |
| Unearned lease income | (157,049) | (148,717) | (1,514) |
| | ¥ 1,098,128 | ¥ 914,444 | \$ 9,309 |

Minimum lease payments receivable are due in periodic installments through fiscal 2029. At March 31, 2009, the amounts due in each of the next five years and thereafter are as follows:

| Years ending March 31, | Millions of yen | Millions of U.S. dollars |
|------------------------|-----------------|-----------------------------|
| 2010 | ¥ 360,240 | \$ 3,667 |
| 2011 | 243,975 | 2,484 |
| 2012 | 150,969 | 1,537 |
| 2013 | 86,139 | 877 |
| 2014 | 44,578 | 454 |
| Thereafter | 113,424 | 1,154 |
| Total | ¥ 999,325 | \$ 10,173 |

Gains and losses from the disposition of direct financing lease assets were not significant for fiscal 2007, 2008 and 2009.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries****6. Investment in Operating Leases**

Investment in operating leases at March 31, 2008 and 2009 consists of the following:

| | Millions of yen | | Millions of U.S. dollars |
|---|-----------------|-------------|-----------------------------|
| | 2008 | 2009 | 2009 |
| Transportation equipment | ¥ 578,988 | ¥ 582,104 | \$ 5,926 |
| Measuring and information-related equipment | 180,835 | 178,062 | 1,813 |
| Real estate | 573,486 | 788,749 | 8,030 |
| Other | 20,683 | 19,867 | 202 |
| | 1,353,992 | 1,568,782 | 15,971 |
| Accumulated depreciation | (350,584) | (358,616) | (3,651) |
| Net | 1,003,408 | 1,210,166 | 12,320 |
| Accrued rental receivables | 16,548 | 16,458 | 167 |
| | ¥ 1,019,956 | ¥ 1,226,624 | \$ 12,487 |

Gains and losses from the disposition of real estate under investment in operating leases are disclosed separately as gains on sales of real estate under operating leases or discontinued operations in the accompanying consolidated statements of income.

For fiscal 2007, 2008 and 2009, gains from the disposition of assets under operating leases other than real estate are ¥12,105 million, ¥15,217 million and ¥11,426 million (\$116 million), respectively, and are included in operating lease revenues.

Costs of operating leases include depreciation and various expenses (insurance, property tax and other). Costs of depreciation and various expenses for fiscal 2007, 2008 and 2009 are as follows:

| | Millions of yen | | | Millions of U.S. dollars |
|------------------|-----------------|-----------|-----------|-----------------------------|
| | 2007 | 2008 | 2009 | 2009 |
| Depreciation | ¥ 119,632 | ¥ 137,167 | ¥ 141,893 | \$ 1,445 |
| Various expenses | 41,482 | 47,146 | 55,508 | 565 |

| | | | |
|-----------|-----------|-----------|----------|
| ¥ 161,114 | ¥ 184,313 | ¥ 197,401 | \$ 2,010 |
|-----------|-----------|-----------|----------|

The operating lease contracts include non-cancelable lease terms ranging from one month to 25 years. The minimum future rentals on non-cancelable operating leases are as follows:

| Years ending March 31, | Millions of yen | Millions of U.S. dollars |
|-------------------------------|------------------------|---------------------------------|
| 2010 | ¥ 138,204 | \$ 1,407 |
| 2011 | 90,405 | 920 |
| 2012 | 60,630 | 617 |
| 2013 | 37,502 | 382 |
| 2014 | 19,569 | 199 |
| Thereafter | 34,918 | 356 |
| Total | ¥ 381,228 | \$ 3,881 |

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries****7. Installment Loans**

The composition of installment loans by domicile and type of borrower at March 31, 2008 and 2009 is as follows:

| | Millions of yen | | Millions of U.S. dollars |
|--|-----------------|-------------|-----------------------------|
| | 2008 | 2009 | 2009 |
| Borrowers in Japan: | | | |
| Consumer | | | |
| Housing loans | ¥ 661,634 | ¥ 702,788 | \$ 7,154 |
| Card loans | 347,632 | 337,403 | 3,435 |
| Other | 59,916 | 45,081 | 459 |
| | 1,069,182 | 1,085,272 | 11,048 |
| Corporate | | | |
| Real estate companies | 848,787 | 651,597 | 6,633 |
| Commercial, industrial and other companies | 1,325,552 | 1,097,086 | 11,169 |
| | 2,174,339 | 1,748,683 | 17,802 |
| | 3,243,521 | 2,833,955 | 28,850 |
| Overseas corporate, industrial and other borrowers | 330,514 | 321,162 | 3,270 |
| Purchased loans* | 192,275 | 148,984 | 1,516 |
| | ¥ 3,766,310 | ¥ 3,304,101 | \$ 33,636 |

* Purchased loans represent loans with evidence of deterioration of credit quality since origination and for which it is probable at acquisition that collection of all contractually required payments from the debtor is unlikely and consist mainly of housing loans, loans to real estate companies and commercial, industrial and other companies in Japan.

Generally, all installment loans, except card loans, are made under agreements which require the borrower to provide collateral or guarantors.

At March 31, 2009, the contractual maturities of installment loans except purchased loans for each of the next five years and thereafter are as follows:

Edgar Filing: ORIX CORP - Form 20-F

| Years ending March 31, | Millions of yen | Millions of U.S. dollars |
|-------------------------------|------------------------|---------------------------------|
| 2010 | ¥ 582,503 | \$ 5,930 |
| 2011 | 572,183 | 5,825 |
| 2012 | 478,159 | 4,868 |
| 2013 | 409,398 | 4,168 |
| 2014 | 315,345 | 3,210 |
| Thereafter | 797,529 | 8,119 |
| Total | ¥ 3,155,117 | \$ 32,120 |

Included in interest on loans and investment securities in the consolidated statements of income is interest income on loans of ¥181,972 million, ¥204,577 million and ¥172,838 million (\$1,759 million) for fiscal 2007, 2008 and 2009, respectively.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

Certain loans, which the Company has the intent and ability to sell or securitize to outside parties in the foreseeable future, are considered held-for-sale and are carried at the lower of cost or market value determined on an individual basis. These loans held for sale are included in installment loans and the outstanding balances of these loans as of March 31, 2008 and 2009 are ¥97,317 million and ¥36,896 million (\$376 million), respectively.

For loans with evidence of deterioration of credit quality since origination and for which it is probable at acquisition that collection of all contractually required payments from the debtors is unlikely (purchased loans), AICPA Statement of Position (SOP) No. 03-3 (Accounting for Certain Loans or Debt Securities Acquired in a Transfer) requires that the investor recognize the excess of the loan s cash flows expected at acquisition over the investor s initial investment as interest income on the level-yield basis over the remaining life of the purchased loan (accretable yield). SOP No. 03-3, however, does not prohibit placing loans on non-accrual status subsequent to acquisition, including use of the cost recovery or cash basis methods of income recognition when it is not appropriate to recognize the accretable yield, such as when the investor does not have sufficient information to reasonably estimate cash flows expected to be collected to compute the accretable yield.

Purchased loans acquired by the Company and its subsidiaries are generally characterized by extended period of non-performance by the borrower which result in limited or no expectation of further performance by the borrower except through liquidation of collateral. Because such loans are commonly collateralized by real estate, the Company and its subsidiaries may pursue various approaches to maximizing the return from the collateral, including arrangement of borrower s negotiated transaction of such collateral before foreclosure, the renovation, refurbishment, or arrangement of evacuation of the property after foreclosure, or the sale of such loans to third parties. In some cases, the Company and its subsidiaries may employ a number of these strategies to maximize collateral realization. Accordingly, although the acquired assets may remain loans in legal form, collections on these loans often do not reflect the normal historical experience of collecting delinquent accounts, and the need to tailor individual collateral-realization strategies often makes it difficult to reliably estimate the amount, timing, or nature of collections. Accordingly, the Company and its subsidiaries use the cost recovery method of income recognition for such purchased loans. The carrying amounts of these purchased loans were ¥192,275 million and ¥148,984 million (\$1,516 million) as of March 31, 2008 and 2009 and the fair value at the acquisition date of these purchased loans acquired during fiscal 2008 and 2009 were ¥77,950 million and ¥17,647 million (\$180 million), respectively.

When it is probable that the Company and its subsidiaries will be unable to collect all book value, the Company and its subsidiaries consider purchased loans impaired and a valuation allowance for the excess amount of the book value over the estimated recoverable amount of the loans is provided. For most cases, the recoverable amount is estimated based on the collateral value. Purchased loans for which valuation allowances were provided amounted to ¥14,594 and ¥16,650 million (\$170 million) as of March 31, 2008 and 2009.

Changes in the allowance for uncollectible accounts relating to the purchased loans for fiscal 2007, 2008 and 2009 are as follows:

| | 2007 | Millions of yen | | Millions of U.S. dollars |
|------------------------------|---------|-----------------|---------|-----------------------------|
| | | 2008 | 2009 | 2009 |
| Beginning balance | ¥ 8,028 | ¥ 8,519 | ¥ 8,579 | \$ 87 |
| Provisions charged to income | 1,545 | 1,414 | 1,615 | 16 |

Edgar Filing: ORIX CORP - Form 20-F

| | | | | |
|----------------|---------|---------|---------|-------|
| Charge-offs | (1,049) | (1,316) | (462) | (4) |
| Other* | (5) | (38) | (212) | (2) |
| Ending balance | ¥ 8,519 | ¥ 8,579 | ¥ 9,520 | \$ 97 |

* Other includes foreign currency translation adjustments.

The above-mentioned amounts are included in the allowance for doubtful receivables on direct financing leases and probable loan losses (see Note 8).

F-27

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries****8. Allowance for Doubtful Receivables on Direct Financing Leases and Probable Loan Losses**

Changes in the allowance for doubtful receivables on direct financing leases and probable loan losses for fiscal 2007, 2008 and 2009 are as follows:

| | 2007 | Millions of yen 2008 | 2009 | Millions of U.S. dollars 2009 |
|------------------------------|----------|-------------------------|-----------|-------------------------------------|
| Beginning balance | ¥ 97,002 | ¥ 89,508 | ¥ 102,007 | \$ 1,038 |
| Provisions charged to income | 13,805 | 33,226 | 77,028 | 784 |
| Charge-offs | (23,389) | (20,310) | (21,027) | (214) |
| Recoveries | 2,059 | 1,742 | 1,296 | 13 |
| Other* | 31 | (2,159) | (760) | (7) |
| Ending balance | ¥ 89,508 | ¥ 102,007 | ¥ 158,544 | \$ 1,614 |

* Other includes foreign currency translation adjustments and amounts reclassified to discontinued operations.

The balance of the allowance broken down into investment in direct financing leases and installment loans at March 31, 2008 and 2009 is as follows:

| | Millions of yen 2008 | 2009 | Millions of U.S. dollars 2009 |
|---------------------------------------|-------------------------|-----------|-------------------------------------|
| Balance of allowance related to: | | | |
| Investment in direct financing leases | ¥ 25,481 | ¥ 27,540 | \$ 280 |
| Installment loans | 76,526 | 131,004 | 1,334 |
| Total | ¥ 102,007 | ¥ 158,544 | \$ 1,614 |

Under FASB Statement No. 114 (Accounting by Creditors for Impairment of a Loan), impaired loans shall be measured based on the present value of expected future cash flows discounted at the loan's original effective interest rate. As a practical expedient, impairment is measured based on the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. Certain loans, such as large groups of smaller-balance homogeneous loans (these include individual housing loans and card loans which are not restructured) and lease receivables, are collectively evaluated for impairment. When the measure of the impaired loan is less than the recorded investment in the loan, the impairment is recorded through a valuation allowance.

The Company and its subsidiaries consider that large balance non-homogeneous loans are impaired when principal or interest is past due 90 days or more, or earlier, if management determines that it is probable that the Company and its subsidiaries will be unable to collect all amounts due according to the contractual terms of these loans, and consider that smaller balance homogeneous loans, including housing loans and card loans are impaired when these terms of loans are modified in a troubled debt restructuring.

The recorded investments in loans considered impaired are ¥165,283 million and ¥449,705 million (\$4,578 million) as of March 31, 2008 and 2009, respectively. Of these amounts, it was determined that a valuation allowance was required with respect to loans which had outstanding balances of ¥108,921 million and

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

¥262,145 million (\$2,669 million) as of March 31, 2008 and 2009, respectively. For such loans, the Company and its subsidiaries recorded a valuation allowance of ¥38,081 million and ¥89,236 million (\$908 million) as of March 31, 2008 and 2009, respectively. This valuation allowance is included in the allowance for doubtful receivables on direct financing leases and probable loan losses in the accompanying consolidated balance sheets. The recorded investments in loans considered impaired above include purchased loans considered impaired as described in Note 7.

The average recorded investments in impaired loans for fiscal 2007, 2008 and 2009 were ¥91,037 million, ¥126,789 million and ¥317,911 million (\$3,236 million), respectively.

The Company and its subsidiaries recognized interest income on impaired loans of ¥2,388 million, ¥5,103 million and ¥15,482 million (\$158 million), and collected in cash interest on impaired loans of ¥1,752 million, ¥3,428 million and ¥9,421 million (\$96 million) in fiscal 2007, 2008 and 2009, respectively.

The Company and its subsidiaries use 90 days for suspending recognition of income from direct financing leases and loans (see Note 1(e)).

As of March 31, 2008 and 2009, the balances of direct financing leases on non-accrual status were ¥22,637 million and ¥27,949 million (\$285 million), and the balances of smaller-balance homogeneous loans on non-accrual status were ¥15,333 million and ¥17,860 million (\$182 million), respectively.

9. Investment in Securities

Investment in securities at March 31, 2008 and 2009 consists of the following:

| | Millions of yen | | Millions of |
|-------------------------------|-----------------|-----------|--------------|
| | 2008 | 2009 | U.S. dollars |
| Trading securities | ¥ 34,535 | ¥ 7,410 | \$ 75 |
| Available-for-sale securities | 884,777 | 729,273 | 7,424 |
| Other securities | 202,472 | 189,457 | 1,929 |
| Total | ¥ 1,121,784 | ¥ 926,140 | \$ 9,428 |

Edgar Filing: ORIX CORP - Form 20-F

Gains and losses realized from the sale of trading securities and net unrealized holding gains or losses on trading securities are included in gains on investment securities, net (see Note 21).

For fiscal 2007, 2008 and 2009, net unrealized holding gains and losses on trading securities were gains of ¥6,649 million, losses of ¥5,264 million and losses of ¥13,065 million (\$133 million), respectively.

During fiscal 2007 and 2008, the Company and its subsidiaries sold available-for-sale securities for aggregate proceeds of ¥118,727 million and ¥198,584 million, respectively, resulting in gross realized gains of ¥50,009 million and ¥8,534 million, respectively, and gross realized losses of ¥368 million and ¥333 million, respectively. During fiscal 2009, the Company and its subsidiaries sold available-for-sale securities for aggregate proceeds of ¥242,702 million (\$2,471 million), resulting in gross realized gains of ¥8,266 million (\$84 million) and gross realized losses of ¥4,932 million (\$50 million). The cost of the securities sold was based on the average cost of each such security held at the time of the sale.

During fiscal 2007, 2008 and 2009, the Company and its subsidiaries charged losses on securities of ¥5,592 million, ¥8,290 million and ¥18,632 million (\$190 million), respectively, to the accompanying consolidated statements of income for declines in market value of securities where the decline was considered as other than temporary.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

Other securities consist mainly of non-marketable equity securities, preferred capital shares carried at cost and investment funds carried at an amount that reflects equity income and loss based on the investor's share.

The aggregate carrying amount of other securities accounted for under the cost method totaled ¥106,652 million and ¥98,498 million (\$1,003 million) at March 31, 2008 and 2009. Investments with an aggregate cost of ¥104,931 million and ¥94,643 million (\$963 million) were not evaluated for impairment because the Company and its subsidiaries did not identify any events or changes in circumstances that might have had significant adverse effect on the fair value of those investments and it was not practicable to estimate the fair value of the investment.

The amortized cost basis amounts, gross unrealized holding gains, gross unrealized holding losses and fair values of available-for-sale securities in each major security type at March 31, 2008 and 2009 are as follows:

March 31, 2008

| | Amortized cost | Millions of yen | | Fair value |
|--|-------------------|------------------------------|-------------------------------|------------|
| | | Gross unrealized gains | Gross unrealized losses | |
| Available-for-sale: | | | | |
| Japanese and foreign government bond securities | ¥ 26,599 | ¥ 167 | ¥ (9) | ¥ 26,757 |
| Japanese prefectural and foreign municipal bond securities | 42,341 | 587 | (2) | 42,926 |
| Corporate debt securities | 252,305 | 3,375 | (3,162) | 252,518 |
| Mortgage-backed and other asset-backed securities | 456,347 | 7,729 | (1,876) | 462,200 |
| Equity securities | 54,701 | 49,848 | (4,173) | 100,376 |
| | ¥ 832,293 | ¥ 61,706 | ¥ (9,222) | ¥ 884,777 |

March 31, 2009

| | Amortized cost | Millions of yen | | Fair value |

| | \$ 3,299 | \$ (157) | \$ 1,133 | \$ (122) | \$ 4,432 | \$ (279) |

Approximately 300 and 540 investment securities were in an unrealized loss position as of March 31, 2008 and 2009, respectively. The gross unrealized losses on these securities are attributable to a number of factors including changes in interest rates and credit spreads and market trends. As part of its ongoing monitoring process, management has concluded that none of these securities were other-than-temporarily impaired at March 31, 2008 and 2009 because the decline was not attributable to the issuer's specific economic conditions such as credit risk. The Company and its subsidiaries have the ability and intent to hold these securities for time sufficient to recover their amortized costs.

The Company and its subsidiaries adopted FASB Staff Position No. FAS 115-2 and FAS 124-2 (Recognition and Presentation of Other-Than-Temporary Impairments) early, and there was not significant effect of the adoption on the results of operation or financial position in fiscal 2009.

The following is a summary of the contractual maturities of debt securities classified as available-for-sale securities held at March 31, 2009:

| | Millions of yen | | Millions of U.S. dollars | |
|-----------------------------|-------------------|------------|--------------------------|------------|
| | Amortized cost | Fair value | Amortized cost | Fair value |
| Due within one year | ¥ 127,268 | ¥ 126,241 | \$ 1,296 | \$ 1,285 |
| Due after one to five years | 357,003 | 353,743 | 3,634 | 3,601 |
| Due after five to ten years | 111,696 | 104,505 | 1,137 | 1,064 |
| Due after ten years | 99,307 | 99,253 | 1,011 | 1,010 |
| | ¥ 695,274 | ¥ 683,742 | \$ 7,078 | \$ 6,960 |

Edgar Filing: ORIX CORP - Form 20-F

Securities not due at a single maturity date, such as mortgage-backed securities, are included in the above table based on their final maturities.

Certain borrowers may have the right to call or prepay obligations. This right may cause actual maturities to differ from the contractual maturities summarized above.

Included in interest on loans and investment securities in the consolidated statements of income is interest income on investment securities of ¥19,559 million, ¥22,443 million and ¥23,763 million (\$242 million) for fiscal 2007, 2008 and 2009, respectively.

F-32

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

In fiscal 2009, a certain foreign subsidiary acquired debt securities with evidence of deterioration of credit quality at the time of acquisition, and those debt securities were probably not able to recover all contractual amounts. In accordance with the provision of the American Institute of Certified Public Accountants (AICPA) Statement of Position 03-3 (SOP 03-3), Accounting for Certain Loans or Debt Securities Acquired in a Transfer , the subsidiary determined the expected future cash flows taking into account historical cash collections for debt securities with similar characteristics as well as expected prepayments and the amount and the timing of undiscounted expected principal, interest and other cash flows for each pool of debt securities. Accretable yield represents the excess of expected future cash flows over carrying value of the debt securities, which is recognized as interest income over the remaining life of the debt securities. As of March 31, 2009, the carrying amount and the nominal value of debt securities acquired with evidence of deterioration of credit quality were ¥13,974 million (\$142 million) and ¥48,349 (\$492 million) respectively, and the outstanding balance of accretable yield was ¥12,849 million (\$131 million). In addition, there was no such debt security at March 31, 2008.

10. Securitization Transactions

The Company and its subsidiaries have securitized various financial assets such as direct financing lease receivables, installment loans (commercial mortgage loans, housing loans and other) and investment in securities.

In the securitization process, these financial assets are transferred to various vehicles (the SPEs), such as trusts and special-purpose companies that issue beneficial interests of the securitization trusts and securities backed by the financial assets to investors. The cash flows collected from these assets transferred to the SPEs are then used to repay these asset-backed beneficial interests and securities. As the transferred assets are isolated from the Company and its subsidiaries, the investors and the SPEs have no recourse to other assets of the Company and its subsidiaries in cases where the debtors or the issuers of the transferred financial assets fail to perform under the original terms of those financial assets.

The Company and its subsidiaries account for the transfer of the financial assets as the sale to the extent that consideration other than beneficial interests in the transferred financial assets is received in exchange when control over the financial assets is surrendered. In addition, the Company and its subsidiaries are not required to consolidate these SPEs if they are qualifying SPEs as defined in FASB Statement No. 140 (Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities) or the Company and its subsidiaries are not primary beneficiaries of the SPEs pursuant to FASB Interpretation No. 46 (revised December 2003) (Consolidation of Variable Interest Entities). The Company and its subsidiaries often retain interests in the SPEs in the form of the beneficial interest of the securitization trusts. Those interests that continue to be held include interests in the transferred assets and are often subordinate to other tranche(s) of the securitization.

Those beneficial interests that continue to be held by the Company and its subsidiaries are subject to credit risk, interest rate risk and prepayment risk on the securitized financial assets. With regards to these subordinated interests that the Company and its subsidiaries retain, they are subordinated to the senior investments and are exposed to different credit and prepayment risks, since they first absorb the risk of the decline in the cash flows from the financial assets transferred to the SPEs for defaults and prepayment of the transferred assets. If there is any excess cash remaining in the SPEs after payment to investors in the securitization of the contractual rate of returns, most of such excess cash is distributed to the Company and its subsidiaries for payments of the subordinated interests. The Company and its subsidiaries periodically estimate the fair value of these interests that continue to be held and test whether the interests that continue to be held are recoverable.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

During fiscal 2007, 2008 and 2009, certain information with respect to these transactions accounted for as sales is as follows:

| | Millions of yen | | | Millions of U.S. dollars |
|------------------------------------|-----------------|-----------|----------|--------------------------|
| | 2007 | 2008 | 2009 | 2009 |
| Direct financing leases: | | | | |
| Balance sold | ¥ 167,567 | ¥ 116,445 | ¥ 37,889 | \$ 386 |
| Gains (losses) on sales | 4,237 | 1,688 | (365) | (4) |
| Interests that continue to be held | 26,608 | 17,074 | 17,903 | 182 |
| Installment loans: | | | | |
| Balance sold | 88,150 | 59,161 | 5,258 | 54 |
| Gains on sales | 3,146 | 1,155 | 132 | 1 |
| Interests that continue to be held | 19,495 | 7,253 | 148 | 2 |
| Investment in securities: | | | | |
| Balance sold | 12,519 | 10,851 | | |
| Gains on sales | 379 | 638 | | |
| Interests that continue to be held | 4,207 | 830 | | |

Regarding securitizations of direct financing lease receivables, for fiscal 2007, 2008 and 2009, revenues from interests that continue to be held of ¥6,484 million, ¥6,826 million and ¥5,772 million (\$59 million), respectively, are included in revenues from direct financing leases in the consolidated statements of income. Regarding securitizations of installment loans, revenues from interests that continue to be held of ¥1,715 million, ¥2,365 million and ¥1,476 million (\$15 million) for fiscal 2007, 2008 and 2009, respectively, are included in interest on loans and investment securities in the consolidated statements of income. Regarding securitizations of investment in securities, revenues from interests that continue to be held of ¥4,141 million, ¥3,902 million and ¥3,469 million (\$35 million) for fiscal 2007, 2008 and 2009, respectively, are included in interest on loans and investment securities in the consolidated statements of income.

As of March 31, 2007, 2008 and 2009, there were no significant servicing assets and liabilities related to the Company and its subsidiaries securitization transactions.

Economic assumptions used in measuring the interests that continue to be held related to securitization transactions completed during fiscal 2007, 2008 and 2009 are as follows:

| | 2007 | | | | 2008 | | | | 2009 | | | | |
|----------------------|-------------------------|---------------------------|--------------------------------|---------|--------------------------|-------------------------|---------------------------|--------------------------------|--------------------------|-------------------------|---------------------------|--------------------------------|---------|
| | Direct financing leases | Commercial mortgage loans | Mortgage loans for individuals | Others* | Investment in securities | Direct financing leases | Commercial mortgage loans | Mortgage loans for individuals | Investment in securities | Direct financing leases | Commercial mortgage loans | Mortgage loans for individuals | Others* |
| | % | % | % | % | % | % | % | % | % | % | % | % | % |
| Expected credit loss | 0.29-1.36 | 1.04-5.00 | 1.05-1.18 | | 2.19-5.00 | 0.20-1.27 | 5.04-5.25 | 0.59 | 5.04-5.25 | 1.27-1.52 | | | 0.86 |

Edgar Filing: ORIX CORP - Form 20-F

| | | | | | | | | | | | |
|------------------------|-----------|-------------|-----------|-----------|-------------|-----------|-------------|------|-------------|------------|------|
| Discount rate | 3.40-6.61 | 1.25-2.46 | 0.99-1.12 | 8.57-8.85 | 0.50-8.51 | 2.23-9.80 | 2.71-2.76 | 1.75 | 2.71-9.04 | 1.92-11.43 | 2.60 |
| Annual prepayment rate | 1.36-6.02 | 20.67-32.74 | 7.06-7.26 | | 20.67-34.89 | 2.00-4.92 | 22.19-23.43 | 4.48 | 22.19-23.43 | 3.70-6.52 | 1.15 |

* With respect to others, certain subsidiary did not separate assumptions for expected credit loss and prepayment rate but considered the effect of expected credit loss and prepayment in estimating discount rate.

F-34

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

Interests that continue to be held from securitization transactions are recorded in the consolidated balance sheet at March 31, 2009. Key economic assumptions used in measuring the fair value of them, and the impacts of 10% and 20% adverse changes to the assumptions on the fair value are as follows:

| | 2009 Installment loans | | | |
|------------------------|-------------------------------|------------------------------|--------------------------------------|-----------------------------|
| | Direct financing leases | Commercial mortgage loans | Mortgage loans for individuals | Investment in securities |
| Expected credit loss | 0.21%-1.62% | 0.72%-8.50% | 0.79%-1.00% | 2.00%-8.50% |
| Discount rate | 1.83%-15.61% | 0.84%-6.52% | 2.36%-5.74% | 0.79%-20.50% |
| Annual prepayment rate | 0.21%-6.52% | 1.50%-54.63% | 2.67%-5.66% | 33.44%-47.29% |

| | Millions of yen Installment loans | | | | Millions of U.S. dollars Installment loans | | | |
|--|--------------------------------------|---------------------------------|--------------------------------------|--------------------------------|---|---------------------------------|--------------------------------------|--------------------------------|
| | Direct financing leases | Commercial mortgage loans | Mortgage loans for individuals | Investment in securities | Direct financing leases | Commercial mortgage loans | Mortgage loans for individuals | Investment in securities |
| Fair value of interests that continue to be held | ¥ 64,183 | ¥ 5,783 | ¥ 25,429 | ¥ 34,463 | \$ 653 | \$ 59 | \$ 259 | \$ 351 |
| Book value of the interests that continue to be held | 57,632 | 5,969 | 23,717 | 36,365 | 587 | 61 | 241 | 370 |
| Weighted average life (in years) | 3.0-3.3 | 1.4 | 13.3-25.5 | 1.0-4.3 | 3.0-3.3 | 1.4 | 13.3-25.5 | 1.0-4.3 |
| Expected credit loss: | | | | | | | | |
| +10% | 456 | 71 | 46 | 74 | 5 | 1 | 0 | 1 |
| +20% | 914 | 140 | 80 | 125 | 9 | 1 | 1 | 1 |
| Discount rate: | | | | | | | | |
| +10% | 636 | 44 | 509 | 652 | 6 | 0 | 5 | 7 |
| +20% | 1,257 | 82 | 999 | 1,225 | 13 | 1 | 10 | 12 |
| Prepayment rate: | | | | | | | | |
| +10% | 148 | 51 | 220 | 8 | 2 | 1 | 2 | 0 |
| +20% | 296 | 101 | 419 | 16 | 3 | 1 | 4 | 0 |

These sensitivities are hypothetical and should be used with caution. As the amounts indicate, changes in fair value based on a 10% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the above table, the effect of a variation in a particular assumption on the fair value of the interest that continue to be held is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities.

Certain cash flows received from/paid to SPEs for all securitization activities in fiscal 2007, 2008 and 2009 are summarized as follows:

Millions of yen

Edgar Filing: ORIX CORP - Form 20-F

| | 2007 | 2008 | 2009 | Millions of U.S. dollars 2009 |

The total assets of direct financing leases and installment loans sold on securitization, as of March 31, 2009, are ¥353,510 million (\$3,599 million), but the assets of ¥31,136 million (\$317 million), of which the Company and certain subsidiaries' only continuing involvement is the servicing, are not included in the table above.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****ORIX Corporation and Subsidiaries**

The total assets of investment securities sold on securitization, as of March 31, 2009, are ¥45,145 million (\$460 million) and are not included in the table above.

The Company and its subsidiaries entered into other lease receivable securitization programs, other installment loan securitization programs and other investment in securities securitization programs that are not accounted for as sales but as secured borrowings. The payables under these securitization programs of ¥374,920 million and ¥358,969 million (\$3,654 million) are included in long-term debt as of March 31, 2008 and 2009 respectively. The collateral under these securitization programs of ¥178,459 million and ¥184,149 million (\$1,875 million) is included in investment in direct financing leases in the consolidated balance sheets as of March 31, 2008 and 2009, respectively. The collateral under these securitization programs of ¥284,168 million and ¥291,312 million (\$2,966 million) is included in installment loans in the consolidated balance sheets as of March 31, 2008 and 2009, respectively. In addition, the collateral under these securitization programs of ¥14,731 million and ¥14,683 million (\$149 million) is included in investment in securities in the consolidated balance sheets as of March 31, 2008 and 2009.

Also, the cash reserves included in trust accounts under these securitization programs of ¥12,418 million and ¥22,471 million (\$229 million) are included in other assets in the consolidated balance sheets as of March 31, 2008 and 2009 respectively.

11. Variable Interest Entities

The Company and its subsidiaries use special purpose companies, partnerships and trusts (hereinafter referred to as SPEs) in the ordinary course of business. These SPEs are not always accompanied by and are not generally controlled by voting rights. FASB Interpretation No. 46 (revised December 2003) (Consolidation of Variable Interest Entities) addresses consolidation by business enterprises of SPEs within the scope of the interpretation. Generally these SPEs are entities where a) the total equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support provided by any parties including the equity holders or b) as a group the holders of the equity investment at risk do not have (1) the direct or indirect ability to make decisions about an entity's activities through voting rights or similar rights, or (2) the obligation to absorb the expected losses of the entity or (3) the right to receive the expected residual returns of the entity. There are certain exceptions to these general criteria. Entities within the scope of the Interpretation are called variable interest entities (VIEs). The variable interest holder who will absorb a majority of the expected losses or receive a majority of the expected residual returns or both is defined as the primary beneficiary of the entity. VIEs are consolidated by the primary beneficiary of the entity.

All of these facts and circumstances are taken into consideration when determining whether the Company and its subsidiaries have variable interests that would deem it the primary beneficiary and, therefore, require consolidation of the related VIE or otherwise rise to the level where disclosure would provide useful information to the users of the Company's financial statements. In most of cases, it is qualitatively clear based on the extent of the involvements of the Company and its subsidiaries or seniority of its investments, whether the Company and its subsidiaries are the primary beneficiary or not.

The Company and its subsidiaries generally consider the following types of involvement to be significant, when making such determination.

designing the structuring of a transaction

providing an equity investment and debt financing

being the investment manager and receiving variable fees

providing liquidity and other financial support

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

Information about significant VIEs for the Company and its subsidiaries are as follows:

(a) VIEs for liquidating customer assets

The Company and its subsidiaries may use VIEs in structuring financing for customers to liquidate specific customer assets. The VIEs are typically used to provide a structure that is bankruptcy remote with respect to the customer and the use of VIEs structure is requested by such customer. Such VIEs typically acquire assets to be liquidated from the customer, borrow non-recourse loans from financial institutions and have an equity investment made by the customer. By using cash flows from the liquidated assets, these VIEs repay the loan and pay dividends to equity investors if sufficient funds exist.

The Company and its subsidiaries provide non-recourse loans to such VIEs and occasionally make investments in them. Among those VIEs, no VIEs were subject to consolidation. The amount of significant variable interests of non-consolidated VIEs, which the Company and its subsidiaries have, are ¥2,642 million and ¥2,642 million (\$27 million) as non-recourse loans and ¥14,882 million and ¥11,164 million (\$114 million) as equity investments as of March 31, 2008 and 2009, respectively. Those non-recourse loans are included in installment loans in the consolidated balance sheets and those equity investments are mainly included in other operating assets in the consolidated balance sheets. The maximum exposure to loss is the amount equal to the total of such loans and equity investments. Total assets of such non-consolidated VIEs are ¥97,697 million and ¥82,037 million (\$835 million) as of March 31, 2008 and 2009, respectively.

(b) VIEs for acquisition of real estate and real estate development projects for customers

Customers and the Company and its subsidiaries are involved with VIEs formed to acquire real estate and/or develop real estate projects. In each case, a customer establishes and makes an equity investment in VIE that is designed to be bankruptcy remote from the customer. The VIEs acquire real estate and/or develop real estate projects.

The Company and its subsidiaries provide non-recourse loans to such VIEs and hold debt securities issued by them and/or make investments in them. Total assets of consolidated VIEs were ¥22,212 million and ¥20,953 million (\$213 million) as of March 31, 2008 and 2009, respectively. Those assets are mainly included in investment in operating leases and other operating assets in the consolidated balance sheets. And total liabilities of those consolidated VIEs were ¥9,450 million and ¥9,608 million (\$98 million) as of March 31, 2008 and 2009, respectively. Those liabilities are mainly included in long-term debt in the consolidated balance sheets. Certain such consolidated VIEs borrow non-recourse loans from financial institutions, and ¥11,519 million and ¥11,339 million (\$115 million) of VIEs' assets are pledged as collateral for the non-recourse loans as of March 31, 2008 and 2009, respectively. The lenders of the non-recourse loans and the creditor of the other liabilities have no recourse to other assets of the Company and its subsidiaries.

Edgar Filing: ORIX CORP - Form 20-F

The amount of significant variable interests of non-consolidated VIEs, which the Company and its subsidiaries have, are ¥16,387 million and ¥12,373 million (\$126 million) as non-recourse loans and debt securities, and ¥42,082 million and ¥44,222 million (\$450 million) as equity investments as of March 31, 2008 and 2009, respectively. Those debt securities are included in investment in securities, those non-recourse loans are included in installment loans and those equity investments are mainly included in other operating assets and investment in affiliates in the consolidated balance sheets. The maximum exposure to loss are ¥84,972 million and ¥77,956 million (\$794 million) as of March 31, 2008 and 2009, respectively, since the Company and its subsidiaries have agreements to commit to invest in certain such non-consolidated VIEs, as long as the agreed-upon terms are met. Total assets of such non-consolidated VIEs are ¥451,282 million and ¥476,390 million (\$4,850 million) as of March 31, 2008 and 2009, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

(c) VIEs for acquisition of real estate for the Company and its subsidiaries real estate-related business

The Company and its subsidiaries acquire real estate and establish VIEs to borrow non-recourse loans from financial institutions and simplify the administration activities necessary for the real estate. The Company and its subsidiaries have consolidated such VIEs even though the Company and its subsidiaries may not have voting rights if substantially all of such VIEs' subordinated interests are issued to the Company and its subsidiaries, and therefore the VIEs are controlled by and for the benefit of the Company and its subsidiaries.

Total assets of such VIEs are ¥222,584 million and ¥339,141 million (\$3,453 million) as of March 31, 2008 and 2009, respectively. Those assets are mainly included in investment in operating leases, other assets and other operating assets in the consolidated balance sheets as of March 31, 2008 and 2009, respectively. And total liabilities of those consolidated VIEs were ¥70,245 million and ¥108,250 million (\$1,102 million) as of March 31, 2008 and 2009, respectively. Those liabilities are mainly included in long-term debt in the consolidated balance sheets. Certain such consolidated VIEs borrow non-recourse loans from financial institutions, and ¥92,423 million and ¥160,283 million (\$1,632 million) of VIEs' assets are pledged as collateral for the non-recourse loans as of March 31, 2008 and 2009, respectively. The lenders of the non-recourse loans and the creditors of the other liabilities have no recourse to other assets of the Company and its subsidiaries.

For fiscal 2009, the Company and its subsidiaries made additional equity investments in certain non-consolidated VIEs to support their repayment, since those VIEs had difficulty repaying debt. The amount of those additional equity investments is ¥7,653 million (\$78 million). As a result, the Company and its subsidiaries have absorbed a majority of the expected losses and consolidated those VIEs.

(d) VIEs for corporate rehabilitation support business

Financial institutions, the Company and its subsidiary are involved with VIEs established for the corporate rehabilitation support business. VIEs receive the funds from investors including the financial institutions, the Company and the subsidiary, and purchase loan receivables due from borrowers which have financial problems, but deemed to have the potential to recover in the future. The servicing operations for the VIEs are mainly conducted by the subsidiary.

The Company and its subsidiary consolidated such VIEs since the Company and the subsidiary have the majority of the investment share of such VIEs.

Total assets of the consolidated VIEs are ¥21,622 million and ¥17,295 million (\$176 million) as of March 31, 2008 and 2009, respectively. Those assets are mainly included in installment loans in the consolidated balance sheets as of March 31, 2008 and 2009, respectively. Certain VIEs borrow non-recourse loans from financial institutions, and ¥714 million and ¥475 million (\$5 million) of VIEs' assets are pledged as collateral for the non-recourse loans as of March 31, 2008 and 2009, respectively. The lenders of the non-recourse loans have no recourse to

other assets of the Company and its subsidiaries.

(e) VIEs for acquisition of loan receivables

The Company is involved with VIEs established by customers to purchase loan receivables. VIEs receive loan receivables as trust assets from the customers. The servicing operations for the VIEs are conducted by the customers.

The Company consolidated such VIEs since the Company purchased all of beneficial interests of such VIEs.

Total assets of the consolidated VIEs are ¥120,197 million and ¥103,161 million (\$1,050 million) as of March 31, 2008 and 2009, respectively. Those assets are mainly included in installment loans in the consolidated balance sheets as of March 31, 2008 and 2009.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ORIX Corporation and Subsidiaries

(f) VIEs for investment in securities

The Company and its subsidiaries have the interests of VIEs that are investment funds and mainly invest in equity and debt securities. Such VIEs are managed by fund management companies that are independent of the Company and its subsidiaries.

The Company consolidated certain such VIEs since the Company has the majority of the investment share of them.

Total assets of the consolidated VIEs are ¥42,026 million and ¥39,296 million (\$400 million) as of March 31, 2008 and 2009, respectively. Those assets are mainly included in other operating assets and investment in affiliates in the consolidated balance sheets as of March 31, 2008 and 2009. And total liabilities of those consolidated VIEs were ¥15,677 million and ¥15,551 million (\$158 million) as of March 31, 2008 and 2009, respectively. Those liabilities are mainly included in trade notes, accounts payable and other liabilities in the consolidated balance sheets. The creditors of those liabilities have no recourse to other assets of the Company and its subsidiaries. The Company has agreements to commit to invest in certain such consolidated VIEs. The total unused capital amount available is ¥3,047 million and ¥1,995 (\$20 million) as of March 31, 2008 and 2009, respectively.

(g) Kumiai structures

In Japan, certain subsidiaries provide investment products to their customers that employ a contractual mechanism known as a kumiai, which in part result in the subsidiaries forming a type of SPE. As a means to finance the purchase of aircraft or other large-ticket items to be leased to third parties, the Company and its subsidiaries arrange and market kumiai products to investors, who invest a portion of the funds necessary into the kumiai structure. The remainder of the purchase funds are borrowed by the kumiai structure in the form of a non-recourse loan from one or more financial institutions. The kumiai investors (and any lenders to the kumiai structure) retain all of the economic risks and rewards in connection with purchase and leasing activities of the kumiai structure, and all related gains or losses are recorded on the financial statements of investors in the kumiai. The Company and its subsidiaries are responsible for the arrangement and marketing of these products, and may act as servicer or administrator in kumiai transactions. The fee income for the arrangement and administration of these transactions is recognized in the consolidated statements of income. The Company and its subsidiaries do not guarantee or otherwise have any significant financial commitments or exposure with respect to the kumiai or its related SPE.

Most of these kumiais are not consolidated by the Company and its subsidiaries since the Company and its subsidiaries are not the primary beneficiary.

12. Investment in Affiliates

Edgar Filing: ORIX CORP - Form 20-F

Investment in affiliates at March 31, 2008 and 2009 consists of the following:

| | Millions of yen | | Millions of U.S. dollars |
|--------|-----------------|-----------|-----------------------------|
| | 2008 | 2009 | 2009 |
| Shares | ¥ 319,840 | ¥ 260,155 | \$ 2,649 |
