#### CONSOL ENERGY INC. AND SUBSIDIARIES

#### NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

#### September 30, 2009

#### (Dollars in thousands, except per share data)

#### NOTE 1 BASIS OF PRESENTATION:

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine months ended September 30, 2009 are not necessarily indicative of the results that may be expected for future periods.

The balance sheet at December 31, 2008 has been derived from the audited consolidated financial statements at that date but does not include all the notes required by generally accepted accounting principles for complete financial statements. For further information, refer to the consolidated financial statements and related notes for the year ended December 31, 2008 included in CONSOL Energy s Form 10-K.

As required by the Noncontrolling Interest Topic of the Financial Accounting Standards Board (FASB) Accounting Standards Codification, effective January 1, 2009, CONSOL Energy modified the reporting of noncontrolling interests in the Consolidated Financial Statements. Additionally, certain reclassifications of prior period data have been made to conform to the three and nine months ended September 30, 2009 classifications required by the Noncontrolling Interest Topic of the FASB Accounting Standards Codification.

Basic earnings per share are computed by dividing net income by the weighted average shares outstanding during the reporting period. Dilutive earnings per share are computed similarly to basic earnings per share except that the weighted average shares outstanding are increased to include additional shares from the effect of potential dilutive common shares outstanding during the period as required by the Stock Compensation Topic of the FASB Accounting Standards Codification. The number of additional shares is calculated by assuming that restricted stock units and performance share units were converted, and outstanding stock options were exercised and that the proceeds from such activity were used to acquire shares of common stock at the average market price during the reporting period. Options to purchase 447,333 and 1,650,125 shares of common stock were outstanding for the three and nine months ended September 30, 2009, respectively, but were not included in the computation of dilutive earnings per share because the effect would be antidilutive. Options to purchase 382,487 shares of common stock were outstanding for each of the three and nine months ended September 30, 2008 but were not included in the computation of dilutive earnings per share because the effect would be antidilutive. Unvested restricted stock units of 5,344 were outstanding for the nine months ended September 30, 2009, but were not included in the computation of dilutive earnings per share because the effect would be antidilutive. No unvested restricted stock units were outstanding for the three months ended September 30, 2009 that were not included in the computation of dilutive earnings per share. Additionally, no unvested restricted stock units were outstanding for either the three or nine months ended September 30, 2008 that were not included in the computation of dilutive earnings per share. Unvested performance share units of 36,352 were outstanding for each of the three and nine months ended September 30, 2009, but were not included in the computation of dilutive earnings per share because the effect would be antidilutive. Additionally, no unvested performance share units were outstanding for either the three or nine months ended September 30, 2008 that were not included in the computation of dilutive earnings per share.

Options exercised during the three months ended September 30, 2009 and 2008 were 23,958 shares and 17,678 shares, respectively. The weighted average exercise price per share of the options exercised during the three months ended September 30, 2009 and 2008 was \$21.76 and \$26.23, respectively. There were 81,045 options and 834,292 options exercised during the nine months ended September 30, 2009 and 2008, respectively.

The weighted average exercise price per share of the options exercised during the nine months ended September 30, 2009 and 2008 was \$14.66 and \$18.08, respectively. There were 116,800 and 198,472 fully vested restricted stock awards released during the three and nine months ended September 30, 2009, respectively. Additionally, during the three and nine months ended September 30, 2008, there were 125,395 and 174,324 fully vested restricted stock awards released, respectively.

The computations for basic and dilutive earnings per share from continuing operations are as follows:

Three Months Ended September 30,						· · · · · · · · · · · · · · · · · · ·

We have evaluated all subsequent events through October 28, 2009, the date the financial statements were issued. No material recognized or non-recognizable subsequent events were identified.

#### NOTE 2 ACQUISITIONS AND DISPOSITIONS:

In August 2009, CONSOL Energy completed the lease assignment of a subsidiary s previous headquarters. Total expense related to this transaction for the three and nine months ended September 30, 2009 was \$676 and \$1,500, respectively, which was recognized in Cost of Goods Sold and Other Operating Charges.

In August 2009, CONSOL Energy completed a sale/lease-back of longwall shields for Bailey Mine. Cash proceeds from the sale were \$16,011, which was the same as our basis in the equipment. Accordingly, no gain or loss was recognized on the transaction. The lease has been accounted for as an operating lease. The lease term is five years.

In July 2009, CONSOL Energy, through a subsidiary, leased approximately 20,000 acres having Marcellus Shale potential from NiSource Energy Ventures, LLC, a subsidiary of Columbia Energy Group, for a cash payment of \$8,275 which is included in capital expenditures in Cash Used in Investing Activities on the Consolidated Statement of Cash Flows. The purchase price for the transaction was principally allocated to gas properties and related development.

In June 2009, CONSOL Energy recognized the fair value of the remaining lease payments in the amount of \$11,848 in accordance with the Exit or Disposal Cost Obligations topic of the Financial Accounting Standards Board Accounting Standards Codification related to the Company s previous headquarters. This liability has been recorded in Other Liabilities on the consolidated balance sheet at September 30, 2009. Total expense related to this transaction was \$13,374, which was recognized in Cost of Goods Sold and Other Operating Charges. This amount includes the fair value of the remaining lease payments of \$11,848 as well as the removal of a related asset of \$1,526. Additionally, \$5,832 was recognized in Other Income for the acceleration of a deferred gain associated with the initial sale-leaseback of the premises that occurred in 2005.

In February 2009, CONSOL Energy, through a subsidiary, completed a sale/lease-back of longwall shields for Bailey Mine. Cash proceeds from the sale were \$42,282, which was the same as our basis in the equipment.

Accordingly, no gain or loss was recognized on the transaction. The lease has been accounted for as an operating lease. The lease term is five years.

In December 2008, CONSOL Energy, through a subsidiary, completed the acquisition of the outstanding 51% interest in Southern West Virginia Energy, LLC (SWVE) for a cash payment of \$11,521. This amount is included in capital expenditures in Cash Used in Investing Activities on the Consolidated Statement of Cash Flows. The purchase price was principally allocated to property, plant and equipment. SWVE wholly-owns Southern West Virginia Resources, LLC and Minway Contracting, LLC, and had previously been a 49% subsidiary of CONSOL Energy. Prior to the acquisition of the outstanding interest, SWVE had been fully consolidated in accordance with the consolidation topic of the Financial Accounting Standards Board Accounting Standards Codification by CONSOL Energy. The pro forma results for this acquisition are not material to CONSOL Energy s financial results.

In November 2008, CONSOL Energy, through a subsidiary, completed the acquisition of the assets of North Penn Pipe & Supply, Inc. for a cash payment, net of cash acquired, of \$22,550. This amount is included in capital expenditures in Cash Used in Investing Activities on the Consolidated Statements of Cash Flows. North Penn Pipe & Supply, Inc. is a distributor of oil and gas field equipment, primarily tubular goods, to the northern Appalachian Basin, a region stretching from the state of New York to southwestern Pennsylvania and northern West Virginia. The fair value of merchandise for resale acquired in this acquisition was \$10,623 and was included in inventory on the Consolidated Balance Sheets as of the acquisition date. The pro forma results for this acquisition are not significant to CONSOL Energy s financial results.

In October 2008, CONSOL Energy s Board of Directors authorized a purchase program for shares of CNX Gas Corporation common stock for an aggregate purchase price of up to \$150 million. The authorization, which is not intended to take CNX Gas private, was effective as of October 21, 2008 for a twenty-four month period. During the year ended December 31, 2008, CONSOL Energy completed the purchase of \$67,259 of CNX Gas stock on the open market at an average price of \$26.53 per share. The purchase price was allocated to property, plant and equipment. The purchase of these 2,531,400 shares changed CONSOL Energy s ownership percentage in CNX Gas from 81.7% to 83.3% at December 31, 2008. CONSOL Energy did not purchase any additional shares of CNX Gas stock during the nine months ended September 30, 2009.

In July 2008, CNX Gas completed the acquisition of several leases and gas wells from KIS Oil & Gas Inc. for a cash payment of \$19,324. The purchase price was principally allocated to gas properties and related development and gas gathering equipment. The sales agreement called for the transfer of approximately 5,600 leased acres and 30 oil and gas wells. This acquisition enhanced our acreage position in Northern Appalachia. The pro forma results for this acquisition were not significant to CONSOL Energy s financial results.

In June 2008, CNX Gas completed the acquisition of the remaining 50% interest in Knox Energy, LLC and Coalfield Pipeline Company not already owned by CNX Gas for a cash payment of \$36,000, which was principally allocated to gas properties and related development and gas gathering equipment. Knox Energy, LLC had been proportionately consolidated into CONSOL Energy s financial statements during 2008. During 2006 and 2007, the equity method was used to account for these entities. Knox Energy, LLC is a natural gas production company and Coalfield Pipeline Company is a natural gas transportation company with operations in Tennessee. The pro forma results for this acquisition were not significant to CONSOL Energy s financial results.

In February 2008, CONSOL Energy, through a subsidiary, completed a sale of the Mill Creek Mining Complex located in Kentucky. The sales agreement called for the transfer of all of the assets comprising the complex. Cash proceeds from the sale were \$14,649, with our basis in the assets being \$9,934. Accordingly, a gain of \$4,715 was recorded on the transaction.

#### NOTE 3 COMPONENTS OF PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS NET PERIODIC BENEFIT COSTS:

Components of net periodic costs for the three and nine months ended September 30 are as follows:

		Pension	Benefits			Other	Benefits		
		ree Months Ended Nine Months Ended September 30, September 30,			Three Mor Septem		Nine Months Ended September 30,		
	2009	2008	2009	2008	2009	2008	2009	2008	
Service cost	\$ 3,193	\$ 2,438	\$ 9,362	\$ 7,314	\$ 3,163	\$ 2,639	\$ 9,490	\$ 7,916	
Interest cost	8,918	8,257	26,659	24,771	37,862	39,958	113,588	119,878	
Expected return on plan assets	(9,203)	(8,418)	(27,518)	(25,253)					
Amortization of prior service									
(credits)	(277)	(278)	(831)	(835)	(11,604)	(12,156)	(34,811)	(36,469)	
Recognized net actuarial loss	5,566	4,182	16,697	12,546	12,590	15,376	37,768	46,128	
Net periodic benefit cost	\$ 8,197	\$ 6,181	\$ 24,369	\$ 18,543	\$ 42,011	\$ 45,817	\$ 126,035	\$ 137,453	

For the nine months ended September 30, 2009, \$58,685 in contributions were paid to pension trusts and to pension benefits from operating cash flows. CONSOL Energy presently anticipates contributing a total of \$65,600 to the pension trust in 2009.

We do not expect to contribute to the other post employment benefit plan in 2009. We intend to pay benefit claims as they become due. For the nine months ended September 30, 2009, \$116,004 of other post-employment benefits have been paid.

# NOTE 4 COMPONENTS OF COAL WORKERS PNEUMOCONIOSIS (CWP) AND WORKERS COMPENSATION NET PERIODIC BENEFIT COSTS:

Components of net periodic costs (benefits) for the three and nine months ended September 30 are as follows:

		С	WP			Workers (	Compensation	
	Three Months Ended September 30,		Nine Mon Septem	ing Bliaca	Three Mor Septem		Nine Months Ended September 30,	
	2009	2008	2009	2008	2009	2008	2009	2008
Service cost	\$ 1,769	\$ 1,259	\$ 5,306	\$ 3,777	\$ 7,099	\$ 7,257	\$ 21,296	\$ 21,773
Interest cost	3,014	2,938	9,041	8,811	2,191	2,081	6,573	6,246
Amortization of actuarial gain	(5,080)	(6,028)	(15,239)	(18,083)	(1,050)	(1,235)	(3,150)	(3,704)
State administrative fees and insurance								
bond premiums					1,586	1,538	5,138	4,578
Legal and administrative costs	675	675	2,025	2,025	850	806	2,551	2,418
Net periodic cost (benefit)	\$ 378	\$ (1,156)	\$ 1,133	\$ (3,470)	\$ 10,676	\$ 10,447	\$ 32,408	\$ 31,311

CONSOL Energy does not expect to contribute to the CWP plan in 2009. We intend to pay benefit claims as they become due. For the nine months ended September 30, 2009, \$8,398 of CWP benefit claims have been paid.

CONSOL Energy does not expect to contribute to the workers compensation plan in 2009. We intend to pay benefit claims as they become due. For the nine months ended September 30, 2009, \$26,689 of workers compensation benefits, state administrative fees and surety bond premiums have been paid.

#### NOTE 5 INCOME TAXES:

The following is a reconciliation, stated in dollars and as a percentage of pretax income, of the U.S. statutory federal income tax rate to CONSOL Energy s effective tax rate:

	For the Nine Months Ended September 30,						
	200	)	2003	8			
	Amount	Percent	Amount	Percent			
Statutory U.S. federal income tax rate	\$ 205,263	35.0%	\$ 153,231	35.0%			
Excess tax depletion	(52,313)	(8.9)	(31,040)	(7.1)			
Effect of Domestic Production Activities Deduction	(8,152)	(1.4)	(6,348)	(1.5)			
Effect of Medicare Prescription Drug, Improvement and Modernization Act of							
2003	1,543	0.3	963	0.2			
Effect of Federal Tax Accrual to Tax Return Reconciling Adjustment	598	0.1	473	0.1			
Net Effect of state tax	20,820	3.6	17,381	4.0			
Other	1,611	0.2	3,705	0.9			
Income Tax Expense / Effective Rate	\$ 169.370	28.9%	\$ 138.365	31.6%			

The effective tax rate for the nine months ended September 30, 2009 and 2008 was calculated using the annual effective rate projection on recurring earnings and includes tax liabilities related to certain discrete transactions.

During the nine months ended September 30, 2009 and 2008, CONSOL Energy reduced its liability for unrecognized tax benefits by \$15,711 and \$7,899, respectively. The reduction in unrecognized tax benefits for the nine months ended September 30, 2009 was the result of the payment of Federal and state income tax deficiencies related to the Internal Revenue Service s (IRS) examination of the Company s 2004 and 2005 tax returns and the use of state operating loss carry forwards to reduce the anticipated state tax deficiencies arising from the IRS changes to taxable income for these years. The reduction in unrecognized tax benefits for the nine months ended September 30, 2008 was attributable to the successful resolution of certain tax issues raised by the IRS during its examination of the Company s 2004 and 2005 tax returns.

The total amounts of unrecognized tax benefits at September 30, 2009 and 2008 were \$44,980 and \$55,622, respectively. If these unrecognized tax benefits were recognized, approximately \$14,657 and \$12,376 would affect CONSOL Energy s effective tax rate for the nine months ended September 30, 2009 and 2008, respectively.

CONSOL Energy Inc. and its subsidiaries file income tax returns in the U.S. federal, various states, and Canadian tax jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2002. The Internal Revenue Service has issued its audit report relating to the examination of CONSOL Energy s 2004 and 2005 U.S. income tax returns. During the nine months ended September 30, 2009, CONSOL Energy paid Federal and state income tax deficiencies of \$12,798 and \$608, respectively. The Federal and state income tax deficiencies paid as a result of the IRS examination of the Company s 2004 and 2005 tax returns had an insignificant impact on net income since the tax deficiencies are the result of changes in the timing of certain tax deductions. During the nine months ended September 30, 2009, CONSOL Energy classified various state unrecognized tax benefits of \$4,800 as a current liability. The Company also classified interest expense relating to the various state unrecognized tax benefits of \$2,445 as a current liability.

CONSOL Energy recognizes interest accrued related to unrecognized tax benefits in its interest expense. As of September 30, 2009 and 2008, the Company reported an accrued interest liability relating to uncertain tax positions of \$7,014 and \$11,032, respectively. The accrued interest liability includes \$1,085 and \$2,527 of interest expense that is reflected in the Company s consolidated income statements for the nine months ended September 30, 2009 and 2008, respectively. During the nine months ended September 30, 2009, CONSOL Energy paid interest of \$4,590 related to income tax deficiencies previously paid to the IRS as a result of its examinations of the Company s tax returns from 2002 through 2005.

CONSOL Energy recognizes penalties accrued related to unrecognized tax benefits in its income tax expense. At September 30, 2009, CONSOL Energy had no accrued penalties. At September 30, 2008, an accrued liability of approximately \$1,200 was recognized.

#### NOTE 6 INVENTORIES:

Inventory components consist of the following:

	Sep	tember 30, 2009	De	ember 31, 2008	
Coal	\$	173,413	\$	93,875	
Merchandise for resale		50,589		43,074	
Supplies		86,537		90,861	
Total Inventories	\$	310,539	\$	227,810	

Merchandise for resale is valued using the Last In First Out (LIFO) cost method. The excess of replacement cost of merchandise for resale inventories over carrying LIFO value was \$12,413 and \$14,716 at September 30, 2009 and December 31, 2008, respectively.

#### NOTE 7 ACCOUNTS RECEIVABLE SECURITIZATION:

CONSOL Energy and certain of our U.S. subsidiaries are party to a trade accounts receivable facility with financial institutions for the sale on a continuous basis of eligible trade accounts receivable. The facility allows CONSOL Energy to receive, on a revolving basis, up to \$165,000. The facility also allows for the issuance of letters of credit against the \$165,000 capacity. At September 30, 2009, there were no letters of credit outstanding against the facility.

CONSOL Energy formed CNX Funding Corporation, a wholly owned, special purpose, bankruptcy-remote subsidiary for the sole purpose of buying and selling eligible trade receivables generated by certain subsidiaries of CONSOL Energy. Under the receivables facility, CONSOL Energy and certain subsidiaries, irrevocably and without recourse, sell all of their eligible trade accounts receivable to financial institutions and their affiliates, while maintaining a subordinated interest in a portion of the pool of trade receivables. This retained interest, which is included in Accounts and Notes Receivable Trade in the Consolidated Balance Sheets, is recorded at fair value. Due to a short average collection cycle for such receivables, our collection experience history and the composition of the designated pool of accounts receivable that are part of this program, the fair value of our retained interest approximates the total amount of the designated pool of accounts receivable reduced by the amount of accounts receivables sold to the third-party financial institutions under the program. CONSOL Energy will continue to service the sold trade receivables for the financial institutions for a fee based upon market rates for similar services.

The cost of funds under this facility is based upon commercial paper rates, plus a charge for administrative services paid to the financial institutions. Costs associated with the receivables facility totaled \$705 and \$2,474 for the three and nine months ended September 30, 2009, respectively. Costs associated with the receivables facility totaled \$1,389 and \$4,251 for the three and nine months ended September 30, 2008, respectively. These

costs have been recorded as financing fees which are included in Cost of Goods Sold and Other Operating Charges in the Consolidated Statements of Income. No servicing asset or liability has been recorded. The receivables facility expires in April 2012 with the underlying liquidity agreement renewing annually each April.

At September 30, 2009 and 2008, eligible accounts receivable totaled approximately \$165,000. There were no subordinated retained interests at September 30, 2009 and 2008. Accounts receivable totaling \$165,000 were removed from the Consolidated Balance Sheets at September 30, 2009 and 2008. There was no change in the facility usage in the nine months ended September 30, 2009. CONSOL Energy s \$39,600 increase in the accounts receivable securitization program for the nine months ended September 30, 2008 is reflected in cash flows from operating activities in the Consolidated Statement of Cash Flows.

#### NOTE 8 PROPERTY, PLANT AND EQUIPMENT:

The components of property, plant and equipment are as follows:

	September 30, 2009	December 31, 2008
Coal & other plant and equipment	\$ 4,730,002	\$ 4,533,793
Coal properties and surface lands	1,258,562	1,264,920
Gas properties and related development	1,617,850	1,427,588
Gas gathering equipment	790,554	740,396
Airshafts	618,673	615,512
Leased coal lands	504,286	502,521
Mine development	558,598	527,991
Coal advance mining royalties	371,273	365,380
Gas advance royalties	2,889	2,187
Total property, plant and equipment	10,452,687	9,980,288
Less Accumulated depreciation, depletion and amortization	4,471,096	4,214,316
Total Net Property, Plant and Equipment	\$ 5,981,591	\$ 5,765,972

#### NOTE 9 SHORT-TERM NOTES PAYABLE:

CONSOL Energy has a five-year \$1,000,000 senior secured credit facility, which extends through June 2012. The facility is secured by substantially all of the assets of CONSOL Energy and certain of its subsidiaries and collateral is shared equally and ratably with the holders of CONSOL Energy Inc. 7.875% bonds maturing in 2012. The Agreement does provide for the release of collateral at the request of CONSOL Energy upon achievement of certain credit ratings. Fees and interest rate spreads are based on a ratio of financial covenant debt to twelve-month trailing earnings before interest, taxes, depreciation, depletion and amortization (EBITDA), measured quarterly. The facility includes a minimum interest coverage ratio covenant of no less than 4.50 to 1.00, measured quarterly. The interest coverage ratio was 26.54 to 1.00 at September 30, 2009. The facility also includes a maximum leverage ratio covenant of not more than 3.25 to 1.00, measured quarterly. The leverage ratio was 0.92 to 1.00 at September 30, 2009. Affirmative and negative covenants in the facility limit our ability to dispose of assets, make investments, purchase or redeem CONSOL Energy common stock, pay dividends and merge with another corporation. At September 30, 2009, the \$1,000,000 facility had \$336,900 of borrowings outstanding and \$267,776 of letters of credit outstanding, leaving \$395,324 of capacity available for borrowings and the issuance of letters of credit. The facility bore a weighted average interest rate of 1.10% for the nine months ended September 30, 2009.

CNX Gas has a five-year \$200,000 unsecured credit agreement which extends through October 2010. The agreement contains a negative pledge provision, whereas CNX Gas assets cannot be used to secure other obligations. Fees and interest rate spreads are based on the percentage of facility utilization, measured quarterly. Covenants in the facility limit CNX Gas ability to dispose of assets, make investments, purchase or redeem

CNX Gas stock, pay dividends and merge with another corporation. The facility includes a maximum leverage ratio covenant of not more than 3.00 to 1.00, measured quarterly. The leverage ratio was 0.40 to 1.00 at September 30, 2009. The facility also includes a minimum interest coverage ratio covenant of no less than 3.00 to 1.00, measured quarterly. This ratio was 66.77 to 1.00 at September 30, 2009. At September 30, 2009, the CNX Gas credit agreement had \$73,050 of borrowings outstanding and \$14,933 of letters of credit outstanding, leaving \$112,017 of capacity available for borrowings and the issuance of letters of credit. The facility bore a weighted average interest rate of 1.47% for the nine months ended September 30, 2009.

#### NOTE 10 COMMITMENTS AND CONTINGENCIES:

CONSOL Energy and its subsidiaries are subject to various lawsuits and claims with respect to such matters as personal injury, wrongful death, damage to property, exposure to hazardous substances, governmental regulations including environmental remediation, employment and contract disputes and other claims and actions arising out of the normal course of business. Our current estimates related to these pending claims, individually and in the aggregate, are immaterial to the financial position, results of operations or cash flows of CONSOL Energy. However, it is reasonably possible that the ultimate liabilities in the future with respect to these lawsuits and claims may be material to the financial position, results of operations or cash flows of CONSOL Energy.

On January 30, 2008, the Pennsylvania Department of Conservation and Natural Resources filed a six-count Complaint in the Court of Common Pleas of Allegheny County, Pennsylvania, asserting claims in both tort and contract against the Company for alleged damage to park property owned by the Commonwealth allegedly due to the Company s underground mining activities. The Commonwealth claims that the Company s underground longwall mining activities in the summer of 2005 in Greene County, Pennsylvania, caused cracks and seepage damage to the nearby Ryerson Park Dam. The Commonwealth demolished the Ryerson Dam s spillway allegedly to protect persons and property, thereby eliminating the Ryerson Park lake. The Commonwealth claims that the Company is liable for dam reconstruction costs, lake restoration costs and natural resources damages totaling \$58,000. The theories of liability include general allegations of negligence, breach of contract, strict liability, nuisance, an administrative remedy claim under the Bituminous Mine Subsidence Act and a claim of fraud; the last claim seeking punitive damages. The Court, in ruling on the Company s Preliminary Objections to the Complaint, stayed the current proceedings in the state court, holding that the Commonwealth should pursue administrative agency review of the claim because full compensatory relief, if warranted, could be provided by the particular administrative agency and then the Environmental Hearing Board, if further relief was sought. Furthermore, the Court found that the Commonwealth could not recover natural resources damages under applicable law. The remainder of the Company s objections was preserved pending the outcome of the administrative proceedings. The matter is being reviewed by the Department of Environmental Protection (DEP). The DEP set specific dates for the submission of materials regarding the issue of causation. On August 3, 2009, the Company replied to several written inquiries from the DEP, as did the Commonwealth. The Company presented its views on why the damage was not subsidence-related on September 25, 2009, with the Commonwealth to do a presentation later in October. The DEP may issue its causation decision prior to year end. The Company has submitted extensive material, including comments from its mining expert, showing that longwall mining activity did not cause damage to the dam. If the DEP determines that there is causation, a second phase will be set to determine the remedy. As to the underlying claim, the Company believes it is not responsible for the damage to the dam and that numerous grounds exist upon which to attack the propriety of the claims. The Company intends to vigorously defend the case. However, it is reasonably possible that the ultimate liability in the future with respect to these claims may be material to the financial position, results of operations, or cash flows of CONSOL Energy.

One of our subsidiaries, Fairmont Supply Company (Fairmont), which distributes industrial supplies, currently is named as a defendant in approximately 22,500 asbestos claims in state courts in Pennsylvania, Ohio, West Virginia, Maryland, Mississippi, New Jersey and Illinois. Because a very small percentage of products manufactured by third parties and supplied by Fairmont in the past may have contained asbestos and many of the pending claims are part of mass complaints filed by hundreds of plaintiffs against a hundred or more defendants,

it has been difficult for Fairmont to determine how many of the cases actually involve valid claims or plaintiffs who were actually exposed to asbestos-containing products supplied by Fairmont. In addition, while Fairmont may be entitled to indemnity or contribution in certain jurisdictions from manufacturers of identified products, the availability of such indemnity or contribution is unclear at this time, and in recent years, some of the manufacturers named as defendants in these actions have sought protection from these claims under bankruptcy laws. Fairmont has no insurance coverage with respect to these asbestos cases. For the nine months ended September 30, 2009 and 2008, payments by Fairmont with respect to asbestos cases have not been material. Our current estimates related to these asbestos claims, individually and in the aggregate, are immaterial to the financial position, results of operations and cash flows of CONSOL Energy. However, it is reasonably possible that payments in the future with respect to pending or future asbestos cases may be material to the financial position, results of operations or cash flows of CONSOL Energy.

CONSOL Energy was notified in November 2004 by the United States Environmental Protection Agency (EPA) that it is a potentially responsible party (PRP) under Superfund legislation with respect to the Ward Transformer site in Wake County, North Carolina. At that time, the EPA also identified 38 other PRPs for the Ward Transformer site. On September 16, 2005, the EPA, CONSOL Energy and two other PRPs entered into an administrative Settlement Agreement and Order of Consent, requiring those PRPs to undertake and complete a PCB soil removal action, at and in the vicinity of the Ward Transformer property. In December 2005, the EPA approved the PRPs work plan, and field work began the first week of January 2006. On March 12, 2007, another party joined the participating PRPs and reduced CONSOL Energy s interim allocation share from 46% to 32%. Accordingly, CONSOL Energy recognized a reduction in the previously recognized liability related to this matter. In June 2008, while conducting the PCB soil excavation on the Ward property, it was determined that PCBs have migrated onto adjacent properties.

The current estimated cost of remedial action for the area CONSOL Energy was originally named a PRP, including payment of the EPA s past and future cost, is approximately \$55,000. The current estimated cost of the most likely remediation plan for one of the additional areas discovered is approximately \$10,000, although the removal action plan is not yet approved by the EPA. Also, in September 2008, the EPA notified CONSOL Energy and 60 other PRPs that there were additional areas of potential contamination allegedly related to the Ward Transformer Site. Current estimates of the cost or potential range of cost for this area are not yet available.

There was \$1,024 and \$4,480 of expense recognized in Cost of Goods Sold and Other Operating Charges for the three and nine months ended September 30, 2009, respectively. CONSOL Energy funded \$5,500 in the nine months ended September 30, 2009 to an independent trust established for this remediation. The remaining liability of \$5,916 is reflected in Other Accrued Liabilities at September 30, 2009. As of April 30, 2009, CONSOL Energy and the other participating PRPs had asserted CERCLA cost recovery and contribution claims against approximately 225 nonparticipating PRPs to recover a share of the costs incurred and to be incurred to conduct the removal actions at the Ward Site. Those actions were filed in the United States District Court for the Eastern District of North Carolina. As of September 30, 2009, CONSOL Energy and the other participating PRPs had settled with some of those nonparticipating PRPs. The actions remain pending against the remaining nonparticipating PRPs. CONSOL Energy s portion of probable recoveries from settled claims is estimated to be \$3,599. Accordingly, an asset has been included in Other Assets for these claims. CONSOL Energy expects the majority of payments related to this liability to be made over the next year. We cannot predict the ultimate outcome of this Superfund site; however, it is reasonably possible that payments in the future with respect to this lawsuit may be material to the financial position, results of operations or cash flows of CONSOL Energy.

As part of conducting mining activities at the Buchanan Mine, our subsidiary, Consolidation Coal Company (CCC), has to remove water from the mine. Several actions have arisen with respect to the removal of naturally accumulating and pumped water from the Buchanan Mine:

Yukon Pocahontas Coal Company, Buchanan Coal Company and Sayers-Pocahontas Coal Company filed an action on March 22, 2004 against CCC which is presently pending in the Circuit Court of Buchanan County, Virginia (the Yukon Action). The action is related to CCC s depositing of untreated water from its Buchanan

Mine into the void spaces of nearby mines of one of our other subsidiaries, Island Creek Coal Company (ICCC). The plaintiffs are seeking to stop CCC from depositing any additional water in these areas, to require CCC to remove the water that is stored there along with any remaining impurities, to recover \$300,000 of compensatory and trebled damages and to recover punitive damages. Plaintiffs have twice amended the original complaint to assert additional claims for compensatory damages to the coal and gas estates of up to \$3,252,000, punitive damages in the amount of \$350,000, as well as interest, costs, and attorneys fees, against CCC. Plaintiffs have also added CONSOL Energy, CNX Gas Company, LLC and ICCC as additional defendants asserting additional damage claims of \$150,000 against those defendants. The Yukon group has recently filed a demand for arbitration (the 2008 Arbitration ) against ICCC which makes similar claims relating to breach of the lease for water deposits and lost coal claims.

CCC has obtained revision to its environmental permit from the Division of Mined Land Reclamation ( DMLR ) of the Virginia Department of Mines, Minerals and Energy ( DMME ) to deposit water from its Buchanan Mine into void spaces of VP3, and to permit the discharge of water into the nearby Levisa River under controlled conditions. Plaintiffs in the Yukon Action along with the Town of Grundy, Virginia, Buchanan County Board of Supervisors, and others have requested the DMME to reconsider the permit revisions issued by DMLR. Requests for temporary relief to prevent CCC from constructing and operating pursuant to the permit revisions pending a final hearing before the DMME have been rejected by the Director of the DMME. The hearing to be conducted by the Director of the DMME through a Hearing Officer appointed by the Supreme Court of Virginia has not yet been scheduled. On June 13, 2006, the plaintiffs in the Yukon Action also filed an action against the DMME in the Circuit Court of Buchanan County, Virginia seeking to enjoin DMLR and DMME from issuing the permit revisions, which were ultimately issued in September 2006 and are the subject of the administrative appeal to the Director of DMME described above. DMME filed demurrers, but no hearing has been conducted since the DMME issued the permit in September 2006. On December 4, 2006, the plaintiffs in the Yukon Action nonsuited their respective Citizen Suits, and Buchanan County is expected to agree not to pursue its objections, subject to certain conditions, as part of the settlement of the Buchanan County license tax issues described below.

We believe that CCC has and continues to have the right to deposit mine water from Buchanan Mine into void spaces at nearby mines. We also believe DMME properly issued environmental permits to CCC authorizing it to deposit naturally accumulating water from the Buchanan Mine into VP3 and to discharge water into the Levisa River under the controlled conditions established by the permits. CCC and the other named CONSOL Energy defendants in the Yukon Action deny all liability and intend to vigorously defend the action filed against them in connection with the removal and deposit of water from the Buchanan Mine. CCC also intends to vigorously defend the environmental permits issued to it. Consequently, we have not recognized any liability related to these actions. However, if a temporary or permanent injunction were to be issued against CCC, if the environmental permits were temporarily suspended or revoked, or if damages were awarded to plaintiffs, the result may be material to the financial position, results of operations or cash flows of CONSOL Energy.

On October 24, 2006, CONSOL Energy and CCC were served with a summons in the name of the Commonwealth of Virginia with the Circuit Court of Buchanan County, Virginia regarding a special grand jury presentment in response to citizens complaints that noise resulting from the ventilation fan at the Buchanan Mine constitutes a public nuisance. CONSOL Energy and CCC deny that the operation of the ventilation fan is a public nuisance and intend to vigorously defend this proceeding. However, if the operation of the ventilation fan is ordered to be stopped, the result may be material to the financial position, results of operations or cash flows of CONSOL Energy.

On August 1, 2007, Bluestone Coal Corporation filed a lawsuit against the Company and its subsidiary, CNX Land Resources, in the United States District Court for the Southern District of West Virginia. The suit alleges that the Company breached a contract that allegedly provides Bluestone with an option to lease coal reserves within a seven-and-one-half mile radius of Bishop, WV and seeks damages of \$1,200,000. The writing relied upon only refers to a right of first refusal, rather than an option. The lawsuit has been settled. The terms of

the settlement are confidential, but include CONSOL Energy granting to Bluestone the option to acquire certain mining assets and reserves. The settlement did not materially impact the financial position, results of operations or cash flows of CONSOL Energy.

South Carolina Electric & Gas Company (SCE&G), a utility, has demanded arbitration, seeking \$36,000 in damages against CONSOL of Kentucky and CONSOL Energy Sales Company. SCE&G claims it suffered damages in obtaining cover coal to replace coal which was not delivered in 2008 under a coal sales agreement. The Company counterclaimed against SCE&G for \$9,400 for terminating coal shipments under the sales agreement which SCE&G had agreed could be made up in 2009. A hearing on the claims is scheduled for May 10, 2010. The named CONSOL Energy defendants deny all liability and intend to vigorously defend the action filed against them. However, if damages were awarded to SCE&G, the result may be material to the financial position, results of operations or cash flows of CONSOL Energy.

In September 2009, a fish kill occurred in Dunkard Creek, which is a creek with segments in both Pennsylvania and West Virginia. The fish kill was caused by the growth of golden brown algae in the creek, which appears to be an invasive species, not indigenous to the area. Our subsidiary, CCC, discharges water into Dunkard Creek, after treatment, from its Blacksville No. 2 Mine and from its Loveridge Mine. This water has levels of chlorides that are higher than West Virginia in-stream limits. CCC is subject to an Agreed Order with the West Virginia Department of Environmental Protection that sets forth a schedule for compliance with these in-stream chloride limits. The Dunkard Creek fish kill is being investigated by the West Virginia Department of Environmental Protection and the Pennsylvania Department of Environmental Protection Agency is also involved. We are cooperating with the investigation. We do not believe that there is a connection between the fish kill and our discharge of water into Dunkard Creek, but the investigation of the matter is continuing. If such a causal connection were established or if we are required to comply with in-stream chloride limits on an accelerated basis, it is reasonably possible that the liabilities or costs to CONSOL Energy in the future with respect to these matters may be material to the financial position, results of operations, or cash flows of CONSOL Energy.

On February 14, 2007, GeoMet Inc. and certain of its affiliates filed a lawsuit against CONSOL Energy and certain of its affiliates, including CNX Gas Company LLC, in the Circuit Court for the County of Tazewell, Virginia, The lawsuit alleges, among other things, that the defendants have violated the Virginia Antitrust Act in their dealings with GeoMet in southwest Virginia. The complaint, as amended, seeks injunctive relief, compensatory damages of \$385,600 and treble damages. CNX Gas continues to believe this lawsuit to be without merit and intends to vigorously defend it. We cannot predict the ultimate outcome of this litigation; however, it is reasonably possible that the ultimate liabilities in the future with respect to these lawsuits and claims may be material to the financial position, results of operations, or cash flows of CNX Gas.

On January 7, 2009, CNX Gas received a civil investigative demand for information and documents from the Attorney General of the Commonwealth of Virginia regarding the company s exploration, production, transportation and sale of coalbed methane gas in Virginia. According to the request, the Attorney General is investigating whether the company may have violated the Virginia Antitrust Act. The request for information does not constitute the commencement of legal proceedings and does not make any specific allegations against the company. CNX Gas does not believe that it has violated the Virginia Antitrust Act and the company is cooperating with the Attorney General s investigation.

The Company is a party to a case filed in 2007 captioned Earl Kennedy (and others) v. CNX Gas and CONSOL Energy in the Court of Common Pleas of Greene County, Pennsylvania. The lawsuit alleges that CNX Gas and CONSOL Energy trespassed and converted gas and other minerals allegedly belonging to Mr. Kennedy in connection with wells drilled by CNX Gas. The complaint, as amended, seeks injunctive relief, including the removal of CNX Gas from the property, and compensatory damages of \$20,000. The suit also sought to overturn existing law as to the ownership of coalbed methane in Pennsylvania, but that claim was dismissed by the court; the plaintiffs are seeking to appeal that dismissal. CNX Gas believes this lawsuit to be without merit and intends

to vigorously defend it. We cannot predict the ultimate outcome of this litigation; however, it is reasonably possible that the ultimate liabilities in the future with respect to these lawsuits and claims may be material to the financial position, results of operations, or cash flows of CNX Gas.

In April 2005, Buchanan County, Virginia (through its Board of Supervisors and Commissioner of Revenue) filed a lawsuit against CNX Gas Company LLC in the Circuit Court of the County of Buchanan for the year 2002; the county has since filed and served three substantially similar cases for years 2003, 2004 and 2005. These cases have been consolidated. The complaint alleges that CNX Gas calculation of the license tax on the basis of the wellhead value (sales price less post production costs) rather than the sales price is improper. For the period from 1999 through mid 2002, CNX Gas paid the tax on the basis of the sales price, but we have filed a claim for a refund for these years. Since 2002, we have continued to pay Buchanan County taxes based on our method of calculating the taxes. We believe that this litigation will settle on terms that will not have a material adverse impact on the financial position or the results of operations of CNX Gas.

In July 2007, production at the Buchanan Mine was suspended after several roof falls in previously mined areas damaged some of the ventilation controls inside the mine, requiring a general evacuation of the mine by employees. The mine atmosphere was continually monitored to determine the impact of the roof falls on the mine s ventilation system and the overall mine atmosphere. On March 17, 2008, Buchanan Mine resumed production. This incident was covered under our property and business interruption insurance policy, subject to certain deductibles. Business interruption recoveries of \$50,000 were recognized as Other Income in the nine months ended September 30, 2008, \$42,000 in the coal segment and \$8,000 in the gas segment. The total recoveries for this incident under our insurance policy were \$75,000. No other insurance recoveries for this incident will be received.

On October 3, 2008 the Emergency Economic Stabilization Act of 2008 (the EESA Act) was signed into law. The EESA Act contains a section that authorizes certain coal producers and exporters who have filed a Black Lung Excise Tax (BLET) return on or after October 1, 1990, to request a refund of the BLET paid on export sales during these years. The EESA Act requires that the U.S. Treasury refund a coal producer or exporter an amount equal to the BLET erroneously paid on export sales in prior years along with interest computed at the statutory rates applicable to overpayments.

In the nine months ended September 30, 2009, CONSOL Energy collected the BLET receivable and related interest in the amount of \$59,723. Upon collection of the refunds, CONSOL Energy paid third parties \$4,362. CONSOL Energy recognized \$55,795 in the year ended December 31, 2008 that was included in Black Lung Excise Tax Refund in the Consolidated Statements of Income. In the nine months ended September 30, 2009, CONSOL Energy recognized additional income related to the collection of the receivable in the amount of \$700 which was also reflected in Cost of Goods Sold and Other Operating Charges in the Consolidated Statements of Income. CONSOL Energy also recognized additional expense related to the collection of the receivable in the amount of \$1,134 for the nine months ended September 30, 2009 that is included in Cost of Goods Sold and Other Operating Charges.

At September 30, 2009, CONSOL Energy has provided the following financial guarantees, unconditional purchase obligations and letters of credit to certain third parties, as described by major category in the following table. These amounts represent the maximum potential total of future payments that we could be required to make under these instruments. These amounts have not been reduced for potential recoveries under recourse or collateralization provisions. Generally, recoveries under reclamation bonds would be limited to the extent of the work performed at the time of the default. No amounts related to these financial guarantees and letters of credits are recorded as liabilities on the financial statements. CONSOL Energy management believes that these guarantees will expire without being funded, and therefore the commitments will not have a material adverse effect on financial condition.

	Total	Amount of Commitment Expiration Per Period Total						
	Amounts Committed	Less Than 1 Year	1-3 Years	3-5 Years	Beyond 5 Years			
Letters of Credit:								
Employee-Related	\$ 192,434	. ,	\$ 101,403	\$	\$			
Environmental	63,502	61,205	2,297					
Gas	14,933	14,933						
Other	11,914	250	11,664					
Total Letters of Credit	282,783	167,419	115,364					
Surety Bonds:								
Employee-Related	193,251	193,251						
Environmental	340,991	338,761	2,230					
Gas	4,434	4,295	139					
Other	10,652	10,468	184					
Total Surety Bonds	549,328	546,775	2,553					
Guarantees:								
Coal	116,637	71,549	40,526	1,593	2,969			
Gas	33,112	30,012			3,100			
Other	261,563		65,972	49,417	109,092			
Total Guarantees	411,312	138,643	106,498	51,010	115,161			
Total Commitments	\$ 1,243,423	\$ 852,837	\$ 224,415	\$ 51,010	\$ 115,161			

Employee-related financial guarantees have primarily been provided to support the United Mine Workers of America's 1992 Benefit Plan and various state workers compensation self-insurance programs. Environmental financial guarantees have primarily been provided to support various performance bonds related to reclamation and other environmental issues. Gas financial guarantees have primarily been provided to support various performance bonds related to land usage and restorative issues. Other guarantees have been extended to support insurance policies, legal matters and various other items necessary in the normal course of business. Other guarantees have also been provided to promise the full and timely payments to lessors of mining equipment and support various other items necessary in the normal course of business. Surety bonds are typically renewed each year. However, the majority of the surety bonds are non-cancelable by the issuer, most notably for employee-related and environmental obligations.

CONSOL Energy and CNX Gas enter into long-term unconditional purchase obligations to procure major equipment purchases, natural gas firm transportation, gas drilling services and other operating goods and services. These purchase obligations are not recorded on the Consolidated Balance Sheet. As of September 30, 2009, the purchase obligations for each of the next five years and beyond were as follows:

Obligations Due	Amount
Less than 1 year	\$ 67,991
1-3 years	61,937
3-5 years	50,079
More than 5 years	308,633
Total purchase obligations	\$ 488,640

#### NOTE 11 DERIVATIVES:

CONSOL Energy enters into financial derivative instruments to manage our exposure to commodity price volatility. Our derivatives are accounted for under the Derivatives and Hedging Topic of the Financial Accounting Standards Board (FASB) Accounting Standards Codification. We measure each derivative instrument at fair value and record it on the balance sheet as either an asset or liability. Changes in the fair value of the derivatives are recorded currently in earnings unless special hedge accounting criteria are met. For derivatives designated as fair value hedges, the changes in fair value of both the derivative instrument and the hedged item are recorded in earnings. For derivatives designated as cash flow hedges, the effective portions of changes in fair value of the derivative are reported in Other Comprehensive Income or Loss and reclassified into earnings in the same period or periods which the forecasted transaction affects earnings. The ineffective portions of hedges are recognized in earnings in the current year. CONSOL Energy currently utilizes only cash flow hedges that are considered highly effective.

CONSOL Energy formally assesses both at inception of the hedge and on an ongoing basis, whether each derivative is highly effective in offsetting changes in the fair values or the cash flows of the hedged item. If it is determined that a derivative is not highly effective as a hedge or if a derivative ceases to be a highly effective hedge, CONSOL Energy will discontinue hedge accounting prospectively.

CONSOL Energy is exposed to credit risk in the event of nonperformance by counterparties. The creditworthiness of counterparties is subject to continuing review. All of the counterparties to CONSOL Energy s natural gas derivative instruments also participate in CONSOL Energy s revolving credit facility. The Company has not experienced any issues of non-performance by derivative counterparties.

CONSOL Energy has entered into forward and option contracts on various commodities to manage the price risk associated with the forecasted revenues from those commodities. The objective of these hedges is to reduce the variability of the cash flows associated with the forecasted revenues from the underlying commodities.

As of September 30, 2009, the total notional amount of the Company s outstanding natural gas forward contracts was 91.0 Bcf. These forward contracts are forecasted to settle through December 31, 2012 and to meet the criteria for cash flow hedge accounting. During the next twelve months, \$77,836 of unrealized gain is expected to be reclassified from Other Comprehensive Income and into earnings. No gains or losses have been reclassified into earnings as a result of the discontinuance of cash flow hedges.

The fair value of CONSOL Energy s derivative instruments at September 30, 2009 is as follows:

#### **Consol Energy Fair Values of Derivative Instruments**

	Asset Deriva 2009	atives	Liability Derivatives 2009					
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value

#### NOTE 13 FAIR VALUE OF FINANCIAL INSTRUMENTS:

The financial instruments measured at fair value on a recurring basis are summarized below:

	Fair Value	e Measurements at Se	eptember 30, 2009
	Quoted Prices in		
	Active		
	Markets		
	for	Significant	<b>C! !!!</b>
	Identical	Other	Significant
	Instruments	Observable	Unobservable
	(Level	Inputs	Inputs
Description	1)	(Level 2)	(Level 3)
Gas Cash Flow Hedges	\$	\$ 127.030	\$

The Fair Value disclosure topic of the Financial Accounting Standards Board (FASB) Accounting Standards Codification requires the disclosure of the estimated fair value of financial instruments including those financial instruments for which the fair value option was not elected. The following methods and assumptions were used to estimate the fair value of those financial instruments:

*Cash and cash equivalents:* The carrying amount reported in the balance sheets for cash and cash equivalents approximates its fair value due to the short maturity of these instruments.

*Short-term notes payable:* The carrying amount reported in the balance sheets for short-term notes payable approximates its fair value due to the short-term maturity of these instruments.

*Long-term debt:* The fair values of long-term debt are estimated using discounted cash flow analyses, based on CONSOL Energy s current incremental borrowing rates for similar types of borrowing arrangements.

The carrying amounts and fair values of financial instruments for which the Fair Value option was not elected are as follows:

### Edgar Filing: CONSOL Energy Inc - Form 10-Q

	Septembe	r 30, 2009	December 31, 2008

#### NOTE 14 SEGMENT INFORMATION:

CONSOL Energy has two principal business units: Coal and Gas. The principal activities of the Coal unit are mining, preparation and marketing of steam coal, sold primarily to power generators, and metallurgical coal, sold to metal and coke producers. The Coal unit includes four reportable segments. These reportable segments are Northern Appalachian, Central Appalachian, Metallurgical and Other Coal. Each of these reportable segments includes a number of operating segments (mines). For the nine months ended September 30, 2009, the Northern Appalachian aggregated segment includes the following mines: Blacksville #2, Robinson Run, McElroy, Loveridge, Bailey, Enlow Fork, Shoemaker and Mine 84. For the nine months ended September 30, 2009, the Central Appalachian aggregated segment includes the following mines: Jones Fork, the Fola Complex, the Miller Creek Complex and the Terry Eagle Complex. For the nine months ended September 30, 2009, the Metallurgical aggregated segment includes the Buchanan and Amonate mines. The Other Coal segment includes our purchased coal activities, idled mine cost, coal segment business units not meeting aggregation criteria, as well as various other activities assigned to the coal segment but not allocated to each individual mine. The principal activity of the Gas unit is to produce pipeline quality methane gas for sale primarily to gas wholesalers. CONSOL Energy s All Other classification is made up of the Company s terminal services, river and dock services, industrial supply services and other business activities, including rentals of buildings and flight operations. Intersegment sales have been recorded at amounts approximating market. Operating profit for each segment is based on sales less identifiable operating and non-operating expenses. Certain reclassifications of 2008 segment information have been made to conform to the 2009 presentation. Reclassifications include changes between mines reflected in Central Appalachian and Other Coal segments to reflect the current aggregation

#### NOTE 15 GUARANTOR SUBSIDIARIES FINANCIAL INFORMATION:

The payment obligations under the \$250,000, 7.875% per annum notes due March 1, 2012 issued by CONSOL Energy are jointly and severally, and also fully and unconditionally guaranteed by several subsidiaries of CONSOL Energy. In accordance with positions established by the Securities and Exchange Commission (SEC), the following financial information sets forth separate financial information with respect to the parent, CNX Gas, an 83.3% owned guarantor subsidiary, the remaining guarantor subsidiaries and the non-guarantor subsidiaries. CNX Gas is presented in a separate column in accordance with SEC Regulation S-X Rule 3-10. CNX Gas Corporation is a reporting company under Section 12(b) of the Securities Exchange Act of 1933, and as such, CNX Gas Corporation files its own financial statements with the Securities and Exchange Commission and those financial statements, when filed, are publicly available on Edgar. The principal elimination entries include investments in subsidiaries and certain intercompany balances and transactions. CONSOL Energy, the parent, and a guarantor subsidiary manage several assets and liabilities of all other 100% owned subsidiaries. These include, for example, deferred tax assets, cash and other post-employment liabilities. These assets and liabilities are reflected as parent company or guarantor company amounts for purposes of this presentation. Certain reclassifications of 2008 guarantor information have been made to conform to the 2009 presentation.

Income Statement for the three months ended September 30, 2009:

## NOTE 16 RECENT ACCOUNTING PRONOUNCEMENTS:

In June 2009, the Financial Accounting Standards Board issued accounting guidance regarding the accounting for transfers of financial assets that is designed to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor s continuing involvement, if any, in transferred financial assets. The guidance enhances the information provided to financial statement users to provide greater transparency about transfers of financial assets and a transferor s continuing involvement, if any, with transferred financial assets. The guidance requires enhanced disclosures about the risks that a transferor continues to be exposed to because of its continuing involvement in transferred financial assets. This guidance is effective for an entity s first annual reporting period after November 15, 2009 and is not eligible for early adoption. Management believes that this guidance will result in the securitization facility transactions being reclassified from sales transactions to secured borrowing transactions as of January 1, 2010.

# ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS General

The U.S. economy may have bottomed in the third quarter. Depending on the pace and sustainability of the recovery from the current recession, we believe substantial opportunities exist for our coal and gas businesses. Due to the significant fiscal spending and relaxed monetary policy in the United States, a modest recovery appears likely in the United States in 2010. This should lead to an increase in demand for energy products from industrial customers, power generators and steel producers.

Steel plant capacity utilization rates in the United States and globally continue to improve from the beginning of the year and are nearly double of what they were at year-end 2008. Domestic steel mill capacity is approximately 60% and Asian steel mills currently are using about 75% of their capacity. Export demand for metallurgical coal, especially from China, is having a positive impact on pricing and has led many industry analysts to predict a shortage of high-quality metallurgical coal in the near-term.

Current inventories at coal-fired power generators are near all-time highs due to the contraction in the U.S. economy. Customers in our major market area had an estimated 60 days of inventory on hand at the first of October. The company believes the overhang in thermal inventories is likely to continue into at least the first half of 2010. CONSOL Energy believes, however, that when thermal coal markets tighten, they will do so quickly. Industry analysts expect annualized coal production to fall by 80 to 100 million tons in 2009 and anticipate a permanent reduction as producers in Central Appalachia face increased financial, safety, and permitting issues which will eventually decrease supply.

For 2010, industrial and power demand is likely to increase due to the expectations of an improvement in economic activity. Moreover, higher natural gas prices in 2010 should lead power generators to dispatch coal ahead of natural gas. We anticipate up to 30 million tons of coal could displace natural gas in 2010. In addition, approximately 19 gigawatts of new coal-fired electricity generation capacity is set to come online by the end of 2012. This new demand, coupled with permanent cuts in coal production as well as safety and regulatory issues, is setting the stage for coal supply shortages over the next few years. With the continued build-out of scrubbers by generators, increased economic activity and its low cost position, CONSOL Energy is in a position to gain market share.

The U.S. natural gas market has shown signs of stability, because the total rig count appears to have bottomed at approximately 700 rigs. The expectations of lower natural gas production, coupled with expectations of increased demand due to an improving economy and a return to normal weather patterns, has led to an improvement in pricing. With its low costs and rising production volumes, CNX Gas should benefit from improved pricing.

### **Results of Operations**

## Three Months Ended September 30, 2009 Compared with Three Months Ended September 30, 2008

#### Net Income Attributable to CONSOL Energy Shareholders

Net income attributable to CONSOL Energy shareholders changed primarily due to the following items (table in millions):

	2009 Period	2008 Period	Dollar Variance	Percentage Change
Sales Outside	\$ 1,023	\$ 1,053	\$ (30)	(2.8)%
Sales Purchased Gas	1	2	(1)	(50.0)%
Sales Gas Royalty Interest	8	23	(15)	(65.2)%
Freight-Outside	36	60	(24)	(40.0)%
Other Income	26	35	(9)	(25.7)%
Total Revenue and Other Income	1,094	1,173	(79)	(6.7)%
Cost of Goods Sold and Other Charges	707	740	(33)	(4.5)%
Purchased Gas Costs	1	2	(1)	(50.0)%
Gas Royalty Interest Costs	6	21	(15)	(71.4)%
Total Cost of Goods Sold	714	763	(49)	(6.4)%
Freight Expense	36	60	(24)	(40.0)%
Selling, General and Administrative Expense	32	31	1	3.2%
Depreciation, Depletion and Amortization	110	96	14	14.6%
Interest Expense	8	9	(1)	(11.1)%
Taxes Other Than Income	66	70	(4)	(5.7)%
Total Costs	966	1,029	(63)	(6.1)%
		,	()	
Earnings Before Income Taxes	128	144	(16)	(11.1)%
Income Tax Expense	35	42	(7)	(16.7)%
1				~ /
Net Income	93	102	(9)	(8.8)%
Less: Net Income Attributable to Noncontrolling Interest	6	12	(6)	(50.0)%
······································	Ũ		(-)	(====)/0
Net Income Attributable to CONSOL Energy Inc. Shareholders	\$ 87	\$ 90	\$ (3)	(3.3)%
The mean randation to contool Energy me. Shareholders	φ 07	φ 70	$\Psi$ (3)	$(3.3)^{10}$

Net income attributable to CONSOL Energy shareholders for the three months ended September 30, 2009 was \$87 million compared to \$90 million in the 2008 period. Net income attributable to CONSOL Energy shareholders for the 2009 period decreased in comparison to the 2008 period primarily due to:

Lower volumes of coal sold;

Higher average unit costs of goods sold per ton sold; and

Lower average sales prices received for volumes of gas sold. Lower net income attributable to CONSOL Energy shareholders was offset, in part, by the following items:

# Edgar Filing: CONSOL Energy Inc - Form 10-Q

Higher average coal sales prices received;

Higher gas sales volumes; and

Lower average unit costs per thousand cubic feet of gas sold.

See discussion below for additional details of the changes in net income in the period-to-period comparison.

#### **Revenue and Other Income**

Revenue and other income decreased due to the following items:

	2009 Period	2008 Period	Dollar Variance	Percentage Change
Sales:				
Produced Coal	\$ 800	\$ 751	\$ 49	6.5%
Purchased Coal		29	(29)	(100.0)%
Produced Gas	154	190	(36)	(18.9)%
Industrial Supplies	49	51	(2)	(3.9)%
Other	20	32	(12)	(37.5)%
Total Sales-Outside	1,023	1,053	(30)	(2.8)%
Gas Royalty Interest	8	23	(15)	(65.2)%
Purchased Gas	1	2	(1)	(50.0)%
Freight Revenue	36	60	(24)	(40.0)%
Other Income	26	35	(9)	(25.7)%
Total Revenue and Other Income	\$ 1,094	\$ 1,173	\$ (79)	(6.7)%

The increase in company produced coal sales revenue during the 2009 period was due to higher average sales prices per ton sold, offset, in part, by lower tons sold.

	2009 Period	2008 Period	Variance	Percentage Change
Produced Tons Sold (in millions)	13.6	14.9	(1.3)	(8.7)%
Average Sales Price Per Ton	\$ 58.85	\$ 50.50	\$ 8.35	16.5%

The increase in average sales price in the period-to-period comparison primarily reflects higher prices negotiated in previous periods when there was a significant increase in the global demand for coal. Sales of company produced coal decreased in the current period due to delivery deferments of Central and Northern Appalachian coals. Coal consumption by the electric power sector continued to decline during the quarter due mainly to lack of industrial demand. Metallurgical grade coal sales volumes were flat due to the steady demand for steel in the period-to-period comparison. Lower volumes of coal sold reduced sales income by approximately \$64 million dollars in the period-to-period comparison.

Purchased coal sales consist of revenues from processing third-party coal in our preparation plants for blending purposes to meet customer coal specifications, coal purchased from third parties and sold directly to our customers and revenues from processing third-party coal in our preparation plants. The decrease of \$29 million in purchased coal sales revenue was primarily due to lower demand in the period-to-period comparison, offset, in part, by higher sales prices.

The \$36 million decrease in produced gas sales revenue in the 2009 period compared to the 2008 period was due to lower average sales price per thousand cubic feet sold, offset, in part, by higher sales volumes.

	2009 Period	2008 Period	Variance	Percentage Change
Produced Gas Sales Volume (in billion cubic feet)	24.5	19.4	5.1	26.3%
Average Sales Price Per thousand cubic feet	\$ 6.30	\$ 9.73	\$ (3.43)	(35.3)%

Sales volumes increased as a result of additional wells coming online from our on-going drilling program. The decrease in average sales price is the result of the general market price decreases in the period-to-period comparison. The general market price decline was offset, in part, by the various gas swap transactions entered into by CNX Gas. These gas swap transactions qualify as financial cash flow hedges that exist parallel to the underlying physical transactions. These financial hedges represented approximately 13.2 Bcf of our produced gas sales volumes for the three months ended September 30, 2009 at an average price of \$8.69 per Mcf. In the three months ended September 30, 2008, these financial hedges represented approximately 12.8 Bcf at an average price of \$9.44 per Mcf.

The \$2 million decrease in revenues from the sale of industrial supplies was primarily due to lower sales volumes. Economic conditions had a negative impact on major customers, particularly those serving the auto and housing markets.

The \$12 million decrease in other sales was primarily attributable to decreased revenues from barge towing and terminal services. The decrease is related to lower tonnage moved by barge towing and terminal services in the 2009 period compared to the 2008 period.

Included in gas royalty interest sales volumes are the revenues related to the portion of production belonging to royalty interest owners sold by CNX Gas on their behalf. The decrease in market prices, contractual differences among leases and the mix of average and index prices used in calculating royalties contributed to the period-to-period change.

	2009 Period	2008 Period	Variance	Percentage Change
Gas Royalty Interest Sales Volumes (in billion cubic feet)	2.4	2.4		-
Average Sales Price Per thousand cubic feet	\$ 3.46	\$ 9.71	\$ (6.25)	(64.4)%

Purchased gas sales volumes represent volumes of gas that are sold at market prices that were purchased from third-party producers.

	2009 Period	2008 Period	Variance	Percentage Change
Purchased Gas Sales Volumes (in billion cubic feet)	0.4	0.2	0.2	100.0%
Average Sales Price Per thousand cubic feet	\$ 3.53	\$ 10.20	\$ (6.67)	(65.4)%

Freight revenue is based on weight of coal shipped, negotiated freight rates and method of transportation (i.e., rail, barge, truck, etc.) used for the customers to which CONSOL Energy contractually provides transportation services. Freight revenue is the amount billed to customers for transportation costs incurred. Freight revenue has decreased \$24 million in the 2009 period primarily related to lower domestic shipments to customers whom CONSOL Energy pays the freight and then passes on the cost to the customer.

Other income consists of interest income, gain or loss on the disposition of assets, equity in earnings of affiliates, service income, royalty income and miscellaneous income.

	2009 Period	2008 Period	Dollar Variance	Percentage Change
Gain on sale of assets	\$ 3	\$9	\$ (6)	(66.7)%
Reversal/recognition of unrealized losses on options		6	(6)	(100.0)%
Contract towing	1	3	(2)	(66.7)%
Equity in earnings of affiliates	6	2	4	200.0%
Other miscellaneous	16	15	1	6.7%
Total other income	\$ 26	\$ 35	\$ (9)	(25.7)%

Gain on sale of assets decreased \$6 million in the period-to-period comparison due to various miscellaneous transactions that occurred throughout both periods, none of which were individually significant.

Mark-to-market adjustments for free standing coal sales options resulted in approximately \$6 million of reversal of unrealized losses in the 2008 period. The September 30, 2009 market price of coal did not materially change from June 30, 2009 and therefore, the mark-to-market adjustments did not result in any significant income adjustment in the 2009 period.

Contract towing revenue has decreased approximately \$2 million due primarily to the general slow-down in the economy, negatively impacting the volume of material being shipped via river transportation.

Equity in earnings of affiliates increased \$4 million in the 2009 period due to various transactions entered into by our equity affiliates throughout both periods, none of which were individually material.

Other miscellaneous income increased \$1 million in the period-to-period comparison due to various miscellaneous transactions that occurred throughout both periods, none of which were individually material.

#### Costs

Cost of goods sold and other charges decreased due to the following:

	2009 Period	2008 Period	Dollar Variance	Percentage Change
Cost of Goods Sold and Other Charges				
Produced Coal	\$ 514	\$ 545	\$ (31)	(5.7)%
Purchased Coal	2	32	(30)	(93.8)%
Produced Gas	51	50	1	2.0%
Industrial Supplies	50	51	(1)	(2.0)%
Closed and Idle Mines	39	19	20	105.3%
Other	51	43	8	18.6%
Total Cost of Goods Sold and Other Charges Outside	707	740	(33)	(4.5)%
Gas Royalty Interest	6	21	(15)	(71.4)%
Purchased Gas	1	2	(1)	(50.0)%
Total Cost of Goods Sold	\$ 714	\$ 763	\$ (49)	(6.4)%

Produced coal cost of goods sold and other charges decreased primarily due to lower sales volumes offset, in part, by a 3.1% increase in average unit cost per ton sold.

	2009	2008		Percentage
	Period	Period	Variance	Change
Produced Tons Sold (in millions)	13.6	14.9	(1.3)	(8.7)%
Average Cost of Goods Sold and Other Charges per Ton	\$ 37.77	\$ 36.64	\$ 1.13	3.1%
Average Cost of Goods Sold and Other Charges per Toll	\$ 57.77	\$ 30.04 · · · ·	\$ 1.15	. 5.1%

Average cost of goods sold and other charges per ton sold increased in the period-to-period comparison primarily due to an increase in average unit costs related to the following items:

In general, the average cost of goods sold per unit has increased \$0.43 per ton due to the reduced amount of tons sold from CONSOL Energy mines. The reduction in tons sold reflects the weak economic environment which has affected electricity generation and correspondingly impacted the demand for coal. Fixed costs incurred at our mining operations are now spread over fewer tons sold,

which has negatively impacted average unit costs.

Supply costs have increased \$1.04 per ton sold related to higher supply and maintenance costs at several locations. Additional supply and maintenance projects were completed during the current period, which included additional roof control, additional ventilation control and additional water handling. Average unit costs of supplies were also impacted by lower sales tons in the period-to-period comparison.

Labor costs have increased \$0.53 per ton sold primarily due to the effects of wage increases at the union and non-union mines from labor contracts which began in 2007. These contracts call for specified hourly wage increases in each year of the contract. Labor costs also increased due to the higher average number of employees in the 2009 period compared to the 2008 period reflecting the utilization of new work schedules that require more manpower. The average increase in unit cost for labor was also impacted by lower sales volumes due to the economic environment as discussed above.

These increases in average cost of goods sold and other charges per ton sold were offset, in part, by the following:

Contract Mining Fees decreased \$0.57 per ton sold due to lower contractor usage in the 2009 period compared to the 2008 period.

Subsidence cost decreased \$0.30 per ton sold due to the 2008 period including additional expenses related to settlement agreements entered into between CONSOL Energy and the Pennsylvania Department of Environmental Protection (PA DEP). The settlement agreements stipulate additional work to be performed on streams that were impacted by underground mining prior to the current regulation regarding stream disturbance.

Purchased coal cost of goods sold consists of costs from processing purchased coal in our preparation plants for blending purposes to meet customer coal specifications, coal purchased and sold directly to the customer and costs for processing third party coal in our preparation plants. The decrease of \$30 million in purchased coal cost of goods sold and other charges in the 2009 period was primarily due to lower volumes purchased.

Gas cost of goods sold and other charges increased due primarily to a 26.3% increase in volumes of produced gas sold, offset, in part, by a 18.4% decrease in average unit costs.

	2009 Period	2008 Period	Variance	Percentage Change
Produced Gas Sales Volumes (in billion cubic feet)	24.5	19.4	5.1	26.3%
Average Cost per thousand cubic feet	\$ 2.09	\$ 2.56	\$ (0.47)	(18.4)%

Average costs per unit decreased in the 2009 period as a result of several factors, including the following:

Well service costs decreased by \$0.08 per thousand cubic feet due to lower contract rig hours needed as a result of less pump maintenance being required in the 2009 period.

Gob well collection costs decreased \$0.08 per thousand cubic feet due primarily to idling contractor crews for approximately five weeks during the current period. The idling of the crews was related to the Buchanan long wall being idled in the previous periods.

Water disposal costs have decreased \$0.07 per thousand cubic feet due to lower volumes of water. Lower volumes of water are the result of the slow-down in coal bed methane well drilling activities due to the overall economic environment. Also, water disposal costs are lower in the period-to-period comparison due to lower rates being charged in the current period as a result of contract renegotiations with these contractors.

# Edgar Filing: CONSOL Energy Inc - Form 10-Q

Repairs and maintenance cost per unit decreased by \$0.06 per thousand cubic feet due to lower spending needed in the current period to maintain wells. In addition, road maintenance costs were lower in the period-to-period comparison related to less water being hauled as discussed above.

Compression expenses decreased \$0.05 per thousand cubic feet due primarily to a reduction in the number of compressors utilized in the Northern Appalachian production field. Due to the slow-down in the drilling program in Northern Appalachia, rented compressors have been returned to more appropriately design the gathering fields for existing needs.

Other costs decreased \$0.36 per thousand cubic feet primarily due to the impact of additional gas volumes sold during the period. Dollars spent remained consistent in the period-to-period comparison, therefore additional volumes decreased the average unit cost per thousand cubic feet sold.

These decreases in average costs per unit were offset, in part, by the following items:

CNX Gas has incurred approximately \$0.12 per thousand cubic feet of costs related to idling various drilling rigs throughout the company. Some of CNX Gas drilling contracts require minimum payments be made to the contracting party when drilling rigs are not being used. The CNX Gas drilling program has been slowed down pending a change in the economic environment. These idle rig charges resulted in an increase to costs.

Firm transportation costs have increased \$0.07 per thousand cubic feet due primarily to acquiring additional capacity in the Northern Appalachian region after the 2008 period.

Power and fuel costs increased \$0.04 per thousand cubic feet primarily due to a power rate increase which occurred after the 2008 period.

Industrial supplies cost of goods sold decreased \$1 million primarily due to lower sales volumes as a result of the slow-down in the economic environment.

Closed and idle mine cost of goods sold increased approximately \$20 million in the 2009 period compared to the 2008 period. The increase was primarily attributable to \$13 million of costs incurred at Mine 84 to pull underground equipment out of the mine in preparation of idling, to construct seals to close sections of the underground mine works, and complete work necessary for the mine to be maintained in an efficient manner. Also, approximately \$6 million of costs were due to adjustments for reclamation liabilities related to mine plan changes and estimate changes at Powellton, one of our surface locations. Increases were also attributable to the idled Shoemaker Mine incurring approximately \$2 million of additional expenses in the current period related to continuing to maintain the mine in an idled status. These increases in closed and idle mine cost of goods sold were offset, in part, by a \$1 million reduction due to various transactions that occurred throughout both periods, none of which were individually material.

Other cost of goods sold increased due to the following items:

	200 Peri		2008 Period	llar ance	Percentage Change
Dry hole and other costs	\$	5 \$	\$	\$ 5	100.0%
Stock-based compensation		9	3	6	200.0%
Incentive compensation		8	9	(1)	(11.1)%
Terminal/River operations		14	20	(6)	(30.0)%
Miscellaneous other		15	11	4	36.4%
Other cost of goods sold and other charges	\$	51 5	\$ 43	\$ 8	18.6%

Dry hole and other costs were incurred in the 2009 period related to the determination that certain areas where an exploration well was drilled would not be economical to pursue. The costs for the exploration wells, which were previously capitalized, were expensed. Other costs include costs which were previously capitalized related to a lease. The lease was surrendered due to the properties being widely scattered and not adjacent to any of our operating units at this time. Also, costs related to particular permits where management has determined that no drilling will take place have been expensed.

Stock-based compensation expense increased \$6 million in the period-to-period comparison. The 2008 period included a reduction of expense related to the CNX Gas performance share program reflecting a decrease in the market price of CNX Gas common stock at September 30, 2008. The performance share program was converted into CONSOL Energy restricted stock units. The 2009 year-to-date period also includes additional expense due to expanding the stock-based compensation program to include additional employees.

The incentive compensation program is designed to increase compensation to eligible employees when CONSOL Energy reaches predetermined production, safety and cost targets and the employees reach predetermined performance targets. Incentive compensation expense decreased \$1 million due to differences in achieving the predetermined targets in the 2009 period.

Terminal/River operation charges have decreased approximately \$6 million in the period-to-period comparison due to lower tonnage moved and lower employee counts throughout the 2009 period.

Miscellaneous other cost of goods sold and other charges increased \$4 million due to various transactions that occurred throughout both periods, none of which were individually material.

Included in gas royalty interest costs are the expenses related to the portion of production belonging to royalty interest owners sold by CNX Gas on their behalf. The decrease in costs relate to the volatility and contractual differences among leases, as well as the mix of average and index prices used in calculating royalties.

	2009 Period	2008 Period	Variance	Percentage Change
Gas Royalty Interest Sales Volumes (in billion cubic feet)	2.4	2.4		-
Average Cost Per thousand cubic feet	\$ 2.57	\$ 8.92	\$ (6.35)	(71.2)%

Purchased gas costs represent volumes of gas purchased from third party producers that we sell at market prices. Purchased gas cost volumes also reflect the impact of pipeline imbalances. The \$1 million decrease in cost of goods sold and other charges related to purchased gas represents overall price changes and contractual differences among customers in the year-to-date period-to-period comparison.

	2009 Period	2008 Period	Variance	Percentage Change
Purchased Gas Cost Volumes (in billion cubic feet)	0.5	0.2	0.3	150.0%
Average Cost Per thousand cubic feet	\$ 2.45	\$ 9.23	\$ (6.78)	(73.5)%

Freight expense is based on weight of coal shipped, negotiated freight rates and method of transportation (i.e., rail, barge, truck, etc.) used for the customers to whom CONSOL Energy contractually provides transportation. Freight expense is billed to customers and the revenue from such billing equals the transportation expense. Freight expense decreased \$24 million due to lower domestic shipments to customers whom CONSOL Energy pays the freight and then passes on the cost to the customer.

Selling, general and administrative costs have increased due to the following items:

	2009 Period	2008 Period	Dollar Variance	Percentage Change
Rentals	\$ 2	\$ 1	\$ 1	100.0%
Wages, salaries and related benefits	16	16		
Association/charitable contributions	3	3		
Advertising and promotion	1	1		
Professional, consulting and other purchased services	5	6	(1)	(16.7)%
Other	5	4	1	25.0%
Total Selling, General and Administrative	\$ 32	\$ 31	\$ 1	3.2%

Rentals have increased \$1 million primarily due to rent expense related to the new CONSOL Energy headquarters.

Wages, salaries and related benefits remained consistent in the period-to-period comparison.

Association assessments and charitable contributions remained consistent in the period to period comparison.

Advertising and promotion expenses remained consistent in the period-to-period comparison.

Costs of professional, consulting and other purchased services were \$1 million lower in the 2009 period compared to the 2008 period due to various consulting expenses related to strategic and financial advisory services, none of which were individually material.

Other selling, general and administrative costs increased \$1 million due to timing of various transactions that have occurred throughout both periods, none of which were individually material.

Depreciation, depletion and amortization increased due to the following items:

	2009 Period	2008 Period	Dollar Variance	Percentage Change
Coal	\$ 74	\$ 73	\$ 1	1.4%
Gas:				
Production	25	13	12	92.3%
Gathering	6	5	1	20.0%
Total Gas	31	18	13	72.2%
Other	5	5
