For the transition period from _____ to _____

Commission file number 0-18225

CISCO SYSTEMS, INC.

(Exact name of Registrant as specified in its charter)

California
(State or other jurisdiction of
incorporation or organization)

170 West Tasman Drive

San Jose, California 95134

77-0059951
(I.R.S. Employer

Identification Number)

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

(Address of principal executive office and zip code)

(408) 526-4000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer
(Do not check if a smaller
reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

As of November 12, 2009, 5,752,585,247 shares of the registrant's common stock were outstanding.

Supplemental Information

In September 2001, the Company's Board of Directors authorized a stock repurchase program. As of October 24, 2009, the Company's Board of Directors had authorized an aggregate repurchase of up to \$62 billion of common stock under this program. In addition, on November 4, 2009,

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

the Company's Board of Directors authorized the repurchase of up to an additional \$10 billion of the Company's common stock under this program with no termination date. For additional information regarding stock repurchases, see Note 12 to the Consolidated Financial Statements. The stock repurchases since the inception of this program and the related impact on Cisco shareholders' equity are summarized in the table below (in millions):

	Shares of Common Stock	Common Stock and Additional Paid-In Capital	Retained Earnings	Total Cisco Shareholders Equity
Repurchases of common stock under the repurchase program	2,878	\$ 11,192	\$ 47,740	\$ 58,932

CISCO SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation

The fiscal year for Cisco Systems, Inc. (the Company or Cisco) is the 52 or 53 weeks ending on the last Saturday in July. Fiscal 2010 is a 53-week fiscal year and fiscal 2009 was a 52-week fiscal year. The Consolidated Financial Statements include the accounts of Cisco and its subsidiaries. All significant intercompany accounts and transactions have been eliminated. The Company conducts business globally and is primarily managed on a geographic basis in the following theaters: United States and Canada; European Markets; Emerging Markets; Asia Pacific; and Japan. The Emerging Markets theater consists of Eastern Europe, Latin America, the Middle East and Africa, and Russia and the Commonwealth of Independent States.

The accompanying financial data as of October 24, 2009 and for the three months ended October 24, 2009 and October 25, 2008 has been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States (GAAP) have been condensed or omitted pursuant to such rules and regulations. The July 25, 2009 Consolidated Balance Sheet was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States. However, the Company believes that the disclosures are adequate to make the information presented not misleading. These Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and the notes thereto, included in the Company's Annual Report on Form 10-K for the fiscal year ended July 25, 2009.

In the opinion of management, all adjustments (which include normal recurring adjustments, except as disclosed herein) necessary to present fairly the statement of financial position as of October 24, 2009, and results of operations, cash flows, and equity for the three months ended October 24, 2009 and October 25, 2008, as applicable, have been made. The results of operations for the three months ended October 24, 2009 are not necessarily indicative of the operating results for the full fiscal year or any future periods.

The Company has made certain reclassifications to prior period amounts relating to net sales for similar groups of products, and gross margin by theater, due to refinement of the respective categories. The Company has made certain other reclassifications to prior period amounts in order to conform to the current periods presentation.

The Company has evaluated subsequent events through the date that the financial statements were issued on November 17, 2009, based on the accounting guidance for subsequent events.

Table of Contents

2. Summary of Significant Accounting Policies and Guidance

(a) New Accounting Guidance Recently Adopted

Revenue Recognition for Arrangements with Multiple Deliverables

In October 2009, the Financial Accounting Standards Board (FASB) amended the accounting standards for revenue recognition to remove tangible products containing software components and non-software components that function together to deliver the product's essential functionality from the scope of industry specific software revenue recognition guidance. In October 2009, the FASB also amended the accounting standards for multiple deliverable revenue arrangements to:

- (i) provide updated guidance on whether multiple deliverables exist, how the deliverables in an arrangement should be separated, and how the consideration should be allocated;
- (ii) require an entity to allocate revenue in an arrangement using estimated selling prices (ESP) of deliverables if a vendor does not have vendor-specific objective evidence of selling price (VSOE) or third-party evidence of selling price (TPE); and
- (iii) eliminate the use of the residual method and require an entity to allocate revenue using the relative selling price method.

The Company elected to early adopt this accounting guidance at the beginning of its first quarter of fiscal 2010 on a prospective basis for applicable transactions originating or materially modified after July 25, 2009.

This guidance does not generally change the units of accounting for the Company's revenue transactions. Most products and services qualify as separate units of accounting. Products are typically considered delivered upon shipment. In instances where final acceptance of the product, system, or solution is specified by the customer, revenue is deferred until all acceptance criteria have been met. Technical support services revenue is deferred and recognized ratably over the period during which the services are to be performed, which is typically from one to three years. Consulting services for specific customer networking needs, which the Company refers to as advanced services, are recognized upon delivery or completion of performance. Advanced service arrangements are typically short-term in nature and are largely completed within 90 days from the start of service. The Company's arrangements generally do not include any provisions for cancellation, termination, or refunds that would significantly impact recognized revenue.

Many of the Company's products have both software and non-software components that function together to deliver the products' essential functionality. The Company's product offerings fall into the following categories: routing, switching, advanced technologies, and other products, which include emerging technologies. In addition to its product offerings, the Company provides a broad range of technical support and advanced services, as discussed above. The Company has a broad customer base which encompasses virtually all types of public and private entities, including enterprise businesses, service providers, commercial customers, and consumers. The Company and its sales force are not organized by product divisions and all of the above described products and services can be sold stand-alone or together in various combinations across the Company's geographic segments or customer markets. For example, service provider arrangements are typically larger in scale with longer deployment schedules and involve the delivery of a variety of product technologies, including high end routing, video and network management software, among others, along with technical support and advanced services. The Company's enterprise and commercial arrangements are typically unique for each customer, smaller in scale and may include network infrastructure products such as routers and switches or collaboration technologies such as Unified Communications and Cisco TelePresence systems along with technical support services. Consumer products, including Linksys wireless routers and Pure Digital video recorders, are sold in stand-alone arrangements directly to distributors and retailers without support, as customers generally only require repair or replacement of defective products or parts under warranty.

The Company enters into revenue arrangements that may consist of multiple deliverables of its product and service offerings due to the needs of its customers. For example, a customer may purchase high-end routing products along with a contract for technical support services. This arrangement would consist of multiple elements, with the products delivered in one reporting period and the technical support services delivered across multiple reporting periods. Another customer may purchase networking products along with advanced service offerings, in which all the elements are delivered within the same reporting period. In addition, distributors and retail partners purchase products or services on a stand-alone basis for the purpose of stocking for resale to an end user, and these transactions would not result in a multiple element arrangement.

Table of Contents

For transactions entered into prior to the first quarter of fiscal 2010, the Company primarily recognized revenue based on software revenue recognition guidance. For the vast majority of the Company's arrangements involving multiple deliverables, such as sales of products with services, the entire fee from the arrangement was allocated to each respective element based on its relative selling price, using VSOE. In the limited circumstances when the Company was not able to determine VSOE for all of the deliverables of the arrangement, but was able to obtain VSOE for any undelivered elements, revenue was allocated using the residual method. Under the residual method, the amount of revenue allocated to delivered elements equaled the total arrangement consideration less the aggregate selling price of any undelivered elements, and no revenue was recognized until all elements without VSOE had been delivered. If VSOE of any undelivered items did not exist, revenue from the entire arrangement was initially deferred and recognized at the earlier of: (i) delivery of those elements for which VSOE did not exist or (ii) when VSOE can be established. However, in limited cases where technical support services was the only undelivered element without VSOE, the entire arrangement fee was recognized ratably as a single unit of accounting over the technical services contractual period. The residual and ratably revenue recognition methods were generally used in a limited number of arrangements containing advanced and emerging technologies, such as Cisco TelePresence systems. Several of these technologies are sold as solution offerings whereby products or services are not sold on a stand-alone basis.

In many instances, products are sold separately in stand-alone arrangements as customers may support the products themselves or purchase support on a time and materials basis. Advanced services are sold in stand-alone engagements such as general consulting, network management, or security advisory projects. Also, technical support services are sold separately through renewals of annual contracts. As a result, for substantially all of the arrangements with multiple deliverables pertaining to routing and switching products and related services, as well as most arrangements containing advanced and emerging technologies, the Company has used and intends to continue using VSOE to allocate the selling price to each deliverable. Consistent with its methodology under previous accounting guidance, the Company determines VSOE based on its normal pricing and discounting practices for the specific product or service when sold separately. In determining VSOE, the Company requires that a substantial majority of the selling prices for a product or service fall within a reasonably narrow pricing range, generally evidenced by approximately 80% of such historical stand-alone transactions falling within plus or minus 15% of the median rates. In addition, the Company considers the geographies in which the products or services are sold, major product and service groups and customer classifications, and other environmental or marketing variables in determining VSOE.

In certain limited instances, the Company is not able to establish VSOE for all deliverables in an arrangement with multiple elements. This may be due to the Company infrequently selling each element separately, not pricing products within a narrow range, or only having a limited sales history, such as in the case of certain advanced and emerging technologies. When VSOE cannot be established, the Company attempts to establish selling price of each element based on TPE. TPE is determined based on competitor prices for similar deliverables when sold separately. Generally, the Company's go-to-market strategy differs from that of its peers and its offerings contain a significant level of customization and differentiation such that the comparable pricing of products with similar functionality cannot be obtained. Furthermore, the Company is unable to reliably determine what similar competitor products' selling prices are on a stand-alone basis. Therefore, the Company is typically not able to determine TPE.

When the Company is unable to establish selling price using VSOE or TPE, the Company uses ESP in its allocation of arrangement consideration. The objective of ESP is to determine the price at which the Company would transact a sale if the product or service were sold on a stand-alone basis. ESP is generally used for new or highly customized offerings and solutions or offerings not priced within a narrow range, and it applies to a small proportion of the Company's arrangements with multiple deliverables.

The Company determines ESP for a product or service by considering multiple factors including, but not limited to, geographies, market conditions, competitive landscape, internal costs, gross margin objectives, and pricing practices. The determination of ESP is made through consultation with and formal approval by the Company's management, taking into consideration the go-to-market strategy.

The Company regularly reviews VSOE, TPE, and ESP and maintains internal controls over the establishment and updates of these estimates. There were no material impacts during the quarter nor does the Company currently expect a material impact in the near term from changes in VSOE, TPE, or ESP.

Table of Contents

Net sales as reported and pro forma net sales that would have been reported during the quarter ended October 24, 2009, if the transaction entered into or materially modified after July 25, 2009 were subject to previous accounting guidance, are shown in the following table (in millions):

Three Months Ended October 24, 2009	As Reported	UNAUDITED Pro Forma Basis as if the Previous Accounting Guidance Were in Effect
Net Sales	\$ 9,021	\$ 8,973

The impact to net sales during the three months ended October 24, 2009 of the accounting guidance was primarily to net product sales.

The new accounting standards for revenue recognition if applied in the same manner to the year ended July 25, 2009 would not have had a material impact on net sales for that fiscal year. In terms of the timing and pattern of revenue recognition, the new accounting guidance for revenue recognition is not expected to have a significant effect on net sales in periods after the initial adoption when applied to multiple element arrangements based on current go-to-market strategies due to the existence of VSOE across most of the Company's product and service offerings. However, the Company expects that this new accounting guidance will facilitate the Company's efforts to optimize its offerings due to better alignment between the economics of an arrangement and the accounting. This may lead to the Company engaging in new go-to-market practices in the future. In particular, the Company expects that the new accounting standards will enable it to better integrate products and services without VSOE into existing offerings and solutions. As these go-to-market strategies evolve, the Company may modify its pricing practices in the future, which could result in changes in selling prices, including both VSOE and ESP. As a result, the Company's future revenue recognition for multiple element arrangements could differ materially from the results in the current period. The Company is currently unable to determine the impact that the newly adopted accounting guidance could have on its revenue as these go-to-market strategies evolve.

The Company's arrangements with multiple deliverables may have a stand-alone software deliverable that is subject to the existing software revenue recognition guidance. The revenue for these multiple element arrangements is allocated to the software deliverable and the non-software deliverables based on the relative selling prices of all of the deliverables in the arrangement using the hierarchy in the new revenue accounting guidance. In the limited circumstances where the Company cannot determine VSOE or TPE of the selling price for all of the deliverables in the arrangement, including the software deliverable, ESP is used for the purposes of performing this allocation.

Fair Value Measures

Effective the first quarter of fiscal 2010, the Company adopted revised accounting guidance for the fair value measurement and disclosure of its nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The adoption of this accounting guidance did not have a material impact on the Company's financial position or results of operations. See Note 8.

Business Combinations and Noncontrolling Interests

Effective the first quarter of fiscal 2010, the Company adopted the revised accounting guidance for business combinations, which changed its previous accounting practices regarding business combinations. The more significant changes include an expanded definition of a business and a business combination; recognition of assets acquired, liabilities assumed and noncontrolling interests (including goodwill) measured at fair value at the acquisition date; recognition of acquisition-related expenses and restructuring costs separately from the business combination; recognition of assets acquired and liabilities assumed at their acquisition-date fair values with subsequent changes recognized in earnings; and capitalization of in-process research and development at fair value as an indefinite-lived intangible asset. The guidance also amends and clarifies the application issues on initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. The impact of this accounting guidance and its relevant updates on the Company's results of operations or financial position will vary depending on each specific business combination or asset purchase. The Company did not close any business combinations or asset purchases in the first quarter of fiscal 2010. See Note 3.

Table of Contents

Effective in the first quarter of fiscal 2010, the Company adopted revised accounting guidance which requires noncontrolling interests (formerly minority interest) to be presented as a separate component from the Company's equity in the equity section of the Consolidated Balance Sheets. The net income attributable to the noncontrolling interests was not significant to the Company's consolidated operating results and was not presented separately in the Consolidated Statements of Operations. In accordance with the adoption of this accounting guidance, the Company has expanded disclosures on noncontrolling interests in its consolidated financial statements where applicable, and the relevant presentation and disclosures have been applied retrospectively for all periods presented. The adoption of this accounting guidance had no impact on the Company's results of operations and did not have a material impact on the Company's financial position.

(b) Recent Accounting Guidance Not Yet Effective

In June 2009, the FASB issued revised guidance for the accounting of transfers of financial assets. This guidance eliminates the concept of a qualifying special-purpose entity; removes the scope exception for qualifying special-purpose entities when applying the accounting guidance related to the consolidation of variable interest entities; changes the requirements for derecognizing financial assets; and requires enhanced disclosure. This accounting guidance is effective for the Company beginning in the first quarter of fiscal 2011. The Company is currently evaluating the impact that the adoption of this guidance will have on its consolidated financial statements.

In June 2009, the FASB issued revised guidance for the accounting of variable interest entities, which replaces the quantitative-based risks and rewards approach with a qualitative approach that focuses on identifying which enterprise has the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance. The accounting guidance also requires an ongoing reassessment of whether an entity is the primary beneficiary and requires additional disclosures about an enterprise's involvement in variable interest entities. This accounting guidance is effective for the Company beginning in the first quarter of fiscal 2011. The Company is currently evaluating the impact that the adoption of this guidance will have on its consolidated financial statements.

3. Business Combinations***(a) Business Combinations During the Period***

There were no business combinations completed during the three months ended October 24, 2009.

(b) Pending Business Combinations

On October 1, 2009, the Company announced that it had entered into a definitive agreement with TANDBERG ASA (Tandberg) by which the Company has made a tender offer for all outstanding shares of Tandberg. Tandberg is a global leader in video communications, including a broad range of video endpoint and network infrastructure solutions with intercompany and multi-vendor interoperability. The proposed acquisition of Tandberg supports the Company's strategy in relation to its expansion of its collaboration portfolio to offer more solutions to a greater number of customers and to accelerate global market adoption.

The purchase price for the acquisition is payable in Norwegian kroner, and the originally announced aggregate consideration had a U.S. dollar equivalent of approximately \$3.0 billion (\$3.1 billion based on exchange rates in effect on November 16, 2009). On November 9, 2009, the Company extended the tender offer through November 18, 2009. On November 16, 2009, the Company further extended the tender offer through December 1, 2009, and increased the aggregate consideration to a U.S. dollar equivalent of \$3.4 billion (based on exchange rates in effect on November 16, 2009). The U.S. dollar equivalent of the aggregate consideration is subject to exchange rate movements. See Part I, Item 3. Quantitative and Qualitative Disclosures About Market Risk for further discussion.

On October 13, 2009, the Company announced that it had entered into a definitive agreement to acquire Starent Networks, Corp. (Starent), a leading supplier of IP-based mobile infrastructure solutions targeting mobile and converged carriers for approximately \$2.9 billion, which includes cash and fully vested share-based awards assumed. Through this proposed acquisition, the Company intends to expand its offering for the rapidly growing mobile Internet, where the network is the platform that enables service providers to launch, deliver, and monetize the next generation of mobile multimedia applications and services.

Each acquisition is subject to customary closing conditions, including the respective seller's stockholder acceptance or approval and regulatory approvals, and each acquisition is expected to close in the first half of calendar year 2010, although there can be no assurance that either transaction will be completed.

Table of Contents**(c) Cash Compensation Expense Related to Acquisitions and Investments**

In connection with the Company's business combinations and asset purchases, the Company has agreed to pay certain amounts contingent upon the achievement of certain agreed-upon technology, development, product, or other milestones, or the continued employment with the Company of certain employees of the acquired entities. The amount of such compensation recorded for the three months ended October 24, 2009 and October 25, 2008 was \$34 million and \$122 million, respectively. The Company may be required to recognize future compensation expense pursuant to these agreements of up to \$259 million, which includes the remaining potential amount of compensation expense related to Nuova Systems, Inc., as discussed below.

Nuova Systems, Inc.

During fiscal 2008, the Company purchased the remaining interests in Nuova Systems, Inc. (Nuova Systems) not previously held by the Company, representing approximately 20% of Nuova Systems. Under the terms of the merger agreement, the former noncontrolling interest holders of Nuova Systems are eligible to receive up to three milestone payments based on agreed-upon formulas. During the three months ended October 24, 2009, the Company recorded \$26 million of compensation expense, and through October 24, 2009 the Company has recorded aggregate compensation expense of \$449 million related to the fair value of amounts that are expected to be earned by the former noncontrolling interest holders pursuant to a vesting schedule. Actual amounts payable to the former noncontrolling interest holders of Nuova Systems will depend upon achievement under the agreed-upon formulas.

Subsequent changes to the fair value of the amounts probable of being earned and the continued vesting will result in adjustments to the recorded compensation expense. The potential amount that could be recorded as compensation expense may be up to a maximum of \$678 million, including the \$449 million that has been expensed through October 24, 2009. The compensation is expected to be paid primarily in fiscal 2010 through fiscal 2012.

4. Goodwill and Purchased Intangible Assets**(a) Goodwill**

The following table presents the changes in goodwill allocated to the Company's reportable segments during the three months ended October 24, 2009 (in millions):

	Balance at July 25, 2009	Acquisitions	Other	Balance at October 24, 2009
United States and Canada	\$ 9,512	\$	\$ (1)	\$ 9,511
European Markets	1,669		17	1,686
Emerging Markets	437		1	438
Asia Pacific	506			506
Japan	801			801
Total	\$ 12,925	\$	\$ 17	\$ 12,942

In the table above, Other primarily includes foreign currency translation.

Table of Contents**(b) Purchased Intangible Assets**

The following tables present details of the Company's purchased intangible assets (in millions):

October 24, 2009	Gross	Accumulated Amortization	Net
Technology	\$ 1,391	\$ (810)	\$ 581
Customer relationships	1,730	(829)	901
Other	183	(113)	70
Total	\$ 3,304	\$ (1,752)	\$ 1,552

July 25, 2009	Gross	Accumulated Amortization	Net
Technology	\$ 1,469	\$ (803)	\$ 666
Customer relationships	1,730	(768)	962
Other	184	(110)	74
Total	\$ 3,383	\$ (1,681)	\$ 1,702

Purchased intangible assets include technology intangible assets acquired through business combinations as well as through technology licenses.

The following table presents the amortization of purchased intangible assets (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Amortization of purchased intangible assets:		
Cost of sales	\$ 49	\$ 59
Operating expenses	105	112
Total	\$ 154	\$ 171

The estimated future amortization expense of purchased intangible assets as of October 24, 2009 is as follows (in millions):

Fiscal Year	Amount
2010 (remaining nine months)	\$ 407
2011	472
2012	357
2013	247
2014	59
Thereafter	10
Total	\$ 1,552

Table of Contents**5. Balance Sheet Details**

The following tables provide details of selected balance sheet items (in millions):

	October 24, 2009	July 25, 2009
Inventories:		
Raw materials	\$ 167	\$ 165
Work in process	33	33
Finished goods:

Cash receipts related to unrecognized revenue from two-tier distributors	526	407
Total product deferred revenue	3,077	2,897
Total	\$ 9,271	\$ 9,393
Reported as:		
Current	\$ 6,397	\$ 6,438

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Noncurrent	2,874	2,955
Total	\$ 9,271	\$ 9,393

Table of Contents**6. Financing Receivables and Guarantees****(a) Lease Receivables**

Lease receivables represent sales-type and direct-financing leases resulting from the sale of the Company's and complementary third-party products. These lease arrangements typically have terms of up to three years and are generally collateralized by a security interest in the underlying assets. The net lease receivables are summarized as follows (in millions):

	October 24, 2009	July 25, 2009
Gross lease receivables	\$ 2,139	\$ 1,996
Unearned income	(203)	(191)
Allowances	(204)	(213)
Lease receivables, net	\$ 1,732	\$ 1,592
Reported as:		
Current	\$ 689	\$ 626
Noncurrent	1,043	966
Lease receivables, net	\$ 1,732	\$ 1,592

Contractual maturities of the gross lease receivables at October 24, 2009 were \$658 million in the remaining nine months of fiscal 2010, \$691 million in fiscal 2011, \$451 million in fiscal 2012, \$242 million in fiscal 2013, and \$97 million in fiscal 2014 and thereafter. Actual cash collections may differ from the contractual maturities due to early customer buyouts, refinancings, or defaults.

(b) Financed Service Contracts

Financed service contracts are summarized as follows (in millions):

	October 24, 2009	July 25, 2009
Gross financed service contracts	\$ 1,689	\$ 1,642
Allowances	(24)	(26)
Financed service contracts, net	\$ 1,665	\$ 1,616
Reported as:		
Current	\$ 1,017	\$ 940
Noncurrent	648	676
Financed service contracts, net	\$ 1,665	\$ 1,616

The revenue related to financed service contracts, which primarily relates to technical support services, is deferred and included in deferred service revenue. The revenue is recognized ratably over the period during which the related services are to be performed, which is typically from one to three years.

Table of Contents**(c) Loan Receivables**

Loan receivables are summarized as follows (in millions):

	October 24, 2009	July 25, 2009
Gross loan receivables	\$ 1,154	\$ 861
Allowances	(114)	(88)
Loan receivables, net	\$ 1,040	\$ 773
Reported as:		
Current	\$ 328	\$ 236
Noncurrent	712	537
Loan receivables, net	\$ 1,040	\$ 773

A portion of the revenue related to loan receivables is deferred and included in deferred product revenue based on revenue recognition criteria.

(d) Financing Guarantees

In the ordinary course of business, the Company provides financing guarantees, which are generally for various third-party financing arrangements extended to channel partners and end-user customers.

Channel Partner Financing Guarantees

The Company facilitates arrangements for third-party financing extended to channel partners, consisting of revolving short-term financing, generally with payment terms ranging from 60 to 90 days. These financing arrangements facilitate the working capital requirements of the channel partners and, in some cases, the Company guarantees a portion of these arrangements. The volume of channel partner financing was \$3.7 billion and \$4.1 billion for the three months ended October 24, 2009 and October 25, 2008, respectively. The balance of the channel partner financing subject to guarantees was \$1.2 billion and \$1.1 billion as of October 24, 2009 and July 25, 2009, respectively.

End-User Financing Guarantees

The Company also provides financing guarantees for third-party financing arrangements extended to end-user customers related to leases and loans that typically have terms of up to three years. The volume of financing provided by third parties for leases and loans on which the Company has provided guarantees was \$255 million and \$398 million for the three months ended October 24, 2009 and October 25, 2008, respectively.

Financing Guarantee Summary

The aggregate amount of financing guarantees outstanding at October 24, 2009 and July 25, 2009, representing the total maximum potential future payments under financing arrangements with third parties, and the related deferred revenue are summarized in the following table (in millions):

	October 24, 2009	July 25, 2009
Maximum potential future payments relating to financing guarantees:		
Channel partner	\$ 365	\$ 334
End user	391	405

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Total	\$	756	\$	739
Deferred revenue associated with financing guarantees:				
Channel partner	\$	219	\$	218
End user		361		378
Total	\$	580	\$	596

Table of Contents**7. Investments****(a) Summary of Investments**

The following tables summarize the Company's investments (in millions):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
October 24, 2009				
Fixed income securities:				
Government securities	\$ 13,073	\$ 38	\$	\$ 13,111
Government agency securities ⁽¹⁾	14,647	109	(1)	14,755

Asset-backed securities	183	4	(10)	177
Total fixed income securities	29,387	203	(42)	29,548
Publicly traded equity securities	822	270	(49)	1,043
Total	\$ 30,209	\$ 473	\$ (91)	\$ 30,591

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
July 25, 2009				
Fixed income securities:				
Government securities	\$ 10,266	\$ 23	\$ (5)	\$ 10,284
Government agency securities ⁽¹⁾	16,029	116	(2)	16,143
Corporate debt securities	1,740	51	(86)	1,705
Asset-backed securities	252	5	(34)	223
Total fixed income securities	28,287	195	(127)	28,355
Publicly traded equity securities	824	193	(89)	928
Total	\$ 29,111	\$ 388	\$ (216)	\$ 29,283

⁽¹⁾ In the tables in Note 7 and Note 8, government agency securities as of October 24, 2009 and July 25, 2009 include bank-issued securities that are guaranteed by the Federal Deposit Insurance Corporation (FDIC).

(b) Gains and Losses on Investments

The following table summarizes the realized net gains (losses) associated with the Company's investments (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Net gains on investments in publicly traded equity securities	\$ 11	\$ 91
Net gains (losses) on investments in fixed income securities	6	(152)
Net gains (losses) on investments	\$ 17	\$ (61)

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

There were no impairment charges on investments in fixed income securities and publicly traded equity securities for the three months ended October 24, 2009. For the three months ended October 25, 2008, net gains (losses) on investments in fixed income securities and publicly traded equity securities included impairment losses of \$183 million and \$17 million, respectively. All such impairment charges were due to a decline in the fair value of the investments below their cost basis that were judged to be other than temporary and were recorded as a reduction to the amortized cost of the respective investments.

Table of Contents

The following table summarizes the activity related to credit losses for fixed income securities during the three months ended October 24, 2009 (in millions):

	Credit Losses
Balance at July 25, 2009	\$ (153)
Sales of other-than-temporarily-impaired fixed income securities	19
Balance at October 24, 2009	\$ (134)

The following tables present the breakdown of the investments with gross unrealized losses at October 24, 2009 and July 25, 2009 (in millions):

	UNREALIZED LOSSES LESS THAN 12 MONTHS		UNREALIZED LOSSES 12 MONTHS OR GREATER		TOTAL Gross Unrealized Losses	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
October 24, 2009						
Fixed income securities:						
Government agency securities	\$ 379	\$ (1)	\$ 5	\$	\$ 384	\$ (1)
Corporate debt securities	43	(1)	499	(30)	542	(31)
Asset-backed securities	32	(3)	105	(7)	137	(10)
Total fixed income securities	454	(5)	609	(37)	1,063	(42)
Publicly traded equity securities	21	(1)	370	(48)	391	(49)
Total	\$ 475	\$ (6)	\$ 979	\$ (85)	\$ 1,454	\$ (91)

	Gross Unrealized Losses		Gross Unrealized Losses		Gross Unrealized Losses	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
July 25, 2009						
Fixed income securities:						
Government securities	\$ 1,850	\$ (5)	\$	\$	\$ 1,850	\$ (5)
Government agency securities	1,362	(2)	5	\$	1,367	(2)
Corporate debt securities	123	(10)	613	(76)	736	(86)
Asset-backed securities	41	(11)	141	(23)	182	(34)
Total fixed income securities	3,376	(28)	759	(99)	4,135	(127)
Publicly traded equity securities	25	(3)	328	(86)	353	(89)
Total	\$ 3,401	\$ (31)	\$ 1,087	\$ (185)	\$ 4,488	\$ (216)

For fixed income securities that have unrealized losses as of October 24, 2009, the Company has determined that (i) it does not have the intent to sell any of these investments, and (ii) it is not more likely than not that it will be required to sell any of these investments before recovery of the entire amortized cost basis. In addition, the Company has evaluated these fixed income securities with unrealized losses and has determined that no credit losses were required to be recognized during the three months ended October 24, 2009.

The Company has evaluated its publicly traded equity securities as of October 24, 2009, and has determined that there were no unrealized losses that indicate an other-than-temporary impairment. This determination was based on several factors, which include the length of time and extent to which fair value has been less than the cost basis and the financial condition and near-term prospects of the issuer, and the Company's intent

and ability to hold the publicly traded equity securities for a period of time sufficient to allow for any anticipated recovery in market value.

Table of Contents***(c) Maturities of Fixed Income Securities***

The following table summarizes the maturities of the Company's fixed income securities at October 24, 2009 (in millions):

	Amortized Cost	Fair Value
Less than 1 year	\$ 18,668	\$ 18,712
Due in 1 to 2 years	5,414	5,481
Due in 2 to 5 years	4,918	4,985
Due after 5 years	387	370
Total	\$ 29,387	\$ 29,548

Actual maturities may differ from the contractual maturities because borrowers may have the right to call or prepay certain obligations.

8. Fair Value

Pursuant to the accounting guidance for fair value measurements and its subsequent updates, fair value is defined as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact and it considers assumptions that market participants would use when pricing the asset or liability.

(a) Fair Value Hierarchy

The accounting guidance for fair value measurement also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The fair value hierarchy is as follows:

Level 1 Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2 Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3 Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

Table of Contents**(b) Assets and Liabilities Measured at Fair Value on a Recurring Basis**

Assets and liabilities measured at fair value on a recurring basis as of October 24, 2009 and July 25, 2009 were as follows (in millions):

	October 24, 2009 Fair Value Measurements				July 25, 2009 Fair Value Measurements			
	Level 1	Level 2	Level 3	Total Balance	Level 1	Level 2	Level 3	Total Balance
Assets:								
Money market funds	\$ 2,903	\$	\$	\$ 2,903	\$ 4,514	\$	\$	\$ 4,514
Government securities		13,111		13,111		10,345		10,345
Government agency securities		15,614		15,614		16,455		16,455
Corporate debt securities		1,512		1,512		1,741		1,741
Asset-backed securities			177	177			223	223
Publicly traded equity securities	1,043			1,043	928			928
Derivative assets		181	2	183		109	4	113
Total	\$ 3,946	\$ 30,418	\$ 179	\$ 34,543	\$ 5,442	\$ 28,650	\$ 227	\$ 34,319
Liabilities:								
Derivative liabilities	\$	\$ 57	\$	\$ 57	\$	\$ 66	\$	\$ 66
Total	\$	\$ 57	\$	\$ 57	\$	\$ 66	\$	\$ 66

Level 2 fixed income securities are priced using quoted market prices for similar instruments, nonbinding market prices that are corroborated by observable market data, or discounted cash flow techniques. The Company's derivative instruments are primarily classified as Level 2, as they are not actively traded and are valued using pricing models that use observable market inputs. Level 3 assets include asset-backed securities and certain derivative assets, whose values are determined based on discounted cash flow models using inputs that the Company could not corroborate with market data.

Table of Contents

The following table presents a reconciliation for all assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three months ended October 24, 2009 (in millions):

	Asset-Backed Securities	Derivative Instruments	Total
Beginning balance	\$ 223	\$ 4	\$ 227
Total gains and losses (realized and unrealized):			
Included in other income (loss), net	(6)		(6)
Included in operating expenses		(2)	(2)
Included in other comprehensive income	23		23
Purchases, sales and maturities	(63)		(63)
Ending balance	\$ 177	\$ 2	\$ 179

At October 25, 2008, asset-backed securities in an aggregate amount of \$618 million were classified as Level 3 assets due to a change in the observability of significant inputs for the valuation of asset-backed securities during that quarter.

(c) Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The following tables present the Company's assets that were measured at fair value on a nonrecurring basis and the losses recorded to other income (loss), net on those assets (in millions):

	FAIR VALUE MEASUREMENTS					Total Losses for the Three Months Ended October 24, 2009
	Net Carrying Value as of October 24, 2009	Level 1	Level 2	Level 3		
	\$	\$	\$	\$	\$	
Investments in privately held companies	\$ 23	\$	\$	\$ 23	\$	(10)

	FAIR VALUE MEASUREMENTS					Total Losses for the Three Months Ended October 25, 2008
	Net Carrying Value as of October 25, 2008	Level 1	Level 2	Level 3		
	\$	\$	\$	\$	\$	
Investments in privately held companies	\$ 13	\$	\$	\$ 13	\$	(23)

The assets in the preceding tables were measured at fair value due to events or circumstances the Company identified that significantly impacted the fair value of these investments during the three months ended October 24, 2009 and October 25, 2008. The Company measured fair value using financial metrics, comparison to other private and public companies, and analysis of the financial condition and near-term prospects of the issuer, including recent financing activities and their capital structure as well as other economic variables. These investments were classified as Level 3 assets because the Company used unobservable inputs to value them, reflecting the Company's assessment of the assumptions market participants would use in pricing these investments due to the absence of quoted market prices and inherent lack of liquidity.

(d) Other

The fair value of certain of the Company's financial instruments that are not measured at fair value, including accounts receivable, accounts payable, accrued compensation, and other current liabilities, approximates the carrying amount because of their short maturities. In addition, the fair value of the Company's loan receivables and financed service contracts also approximates the carrying amount. The fair value of the Company's long-term debt is disclosed in Note 9 and was determined using quoted market prices for those securities.

Table of Contents**9. Borrowings****(a) Long-Term Debt**

The following table summarizes the Company's long-term debt (in millions, except percentages):

	October 24, 2009		July 25, 2009	
	Amount	Effective Rate	Amount	Effective Rate
Senior notes:				
5.25% fixed-rate notes, due 2011 (2011 Notes)	\$ 3,000	3.12%	\$ 3,000	3.12%
5.50% fixed-rate notes, due 2016 (2016 Notes)	3,000	4.34%	3,000	4.34%
4.95% fixed-rate notes, due 2019 (2019 Notes)	2,000	5.08%	2,000	5.08%
5.90% fixed-rate notes, due 2039 (2039 Notes)	2,000	6.11%	2,000	6.11%
Total senior notes	10,000		10,000	
Other notes	1		2	
Unaccreted discount	(20)		(21)	
Hedge accounting adjustment of the carrying amount of the 2011 and 2016 Notes	292		314	
Total	\$ 10,273		\$ 10,295	

The effective rates for the fixed-rate debt include the interest on the notes, the accretion of the discount, and adjustments related to hedging, if applicable. Based on market prices, the fair value of the Company's long-term debt was \$10.6 billion and \$10.5 billion as of October 24, 2009 and July 25, 2009, respectively. Interest is payable semi-annually on each class of the senior notes. Cash paid for interest for the three months ended October 24, 2009 and October 25, 2008 was \$269 million and \$165 million, respectively. The notes are redeemable by the Company at any time, subject to a make-whole premium. The Company was in compliance with all debt covenants as of October 24, 2009.

(b) Credit Facility

The Company has a credit agreement with certain institutional lenders providing for a \$2.9 billion unsecured revolving credit facility that is scheduled to expire on August 17, 2012.

Any advances under the credit agreement will accrue interest at rates that are equal to, based on certain conditions, either (i) the higher of the Federal Funds rate plus 0.50% or Bank of America's prime rate as announced from time to time, or (ii) the London Interbank Offered Rate (LIBOR) plus a margin that is based on the Company's senior debt credit ratings as published by Standard & Poor's Ratings Services and Moody's Investors Service, Inc. The credit agreement requires that the Company comply with certain covenants including that it maintains an interest coverage ratio as defined in the agreement.

As of October 24, 2009, the Company was in compliance with the required interest coverage ratio and the other covenants, and the Company had not borrowed any funds under the credit facility. The Company may also, upon the agreement of either the then-existing lenders or of additional lenders not currently parties to the agreement, increase the commitments under the credit facility by up to an additional \$2.0 billion and/or extend the expiration date of the credit facility up to August 15, 2014.

10. Derivative Instruments**(a) Summary of Derivative Instruments**

The Company uses derivative instruments primarily to manage exposures to foreign currency exchange rate, interest rate, and equity price risks. The Company's primary objective in holding derivatives is to reduce the volatility of earnings and cash flows associated with changes in foreign currency exchange rates, interest rates, and equity prices. The Company's derivatives expose it to credit risk to the extent that the counterparties may be unable to meet the terms of the agreement. The Company does, however, seek to mitigate such risks by limiting its counterparties to major financial institutions. In addition, the potential risk of loss with any one counterparty resulting from this type of credit risk is monitored.

Management does not expect material losses as a result of defaults by counterparties.

Table of Contents

The fair values of the Company's derivative instruments and the line items on the Consolidated Balance Sheets to which they were recorded are summarized as follows (in millions):

	DERIVATIVE ASSETS			DERIVATIVE LIABILITIES		
	Balance Sheet Line Item	October 24, 2009	July 25, 2009	Balance Sheet Line Item	October 24, 2009	July 25, 2009
Derivatives designated as hedging instruments:						
Foreign currency derivatives	Other current assets	\$ 122	\$ 87	Other current liabilities	\$ 42	\$ 36
Interest rate derivatives	Other current assets	15		Other current liabilities		
Total		137	87		42	36
Derivatives not designated as hedging instruments:						
Foreign currency derivatives	Other current assets	44	22	Other current liabilities	15	30
Equity derivatives	Other current assets		2	Other current liabilities		
Equity derivatives	Other assets	2	2	Other long-term liabilities		
Total		46	26		15	30
Total		\$ 183	\$ 113		\$ 57	\$ 66

The effect of the Company's cash flow hedging instruments on other comprehensive income (OCI) and the Consolidated Statement of Operations for the three months ended October 24, 2009 and October 25, 2008 is summarized as follows (in millions):

	GAINS (LOSSES) RECOGNIZED IN OCI ON DERIVATIVES (EFFECTIVE PORTION)		Line Item in Statements of Operations	GAINS (LOSSES) RECLASSIFIED FROM AOCI INTO INCOME (EFFECTIVE PORTION)	
	October 24, 2009	October 25, 2008		October 24, 2009	October 25, 2008
Derivatives Designated as Cash Flow Hedging Instruments					
Foreign currency derivatives	\$ 44	\$ (149)	Operating expenses	\$ (7)	\$ (6)
Interest rate derivatives	15		Cost of sales-service	(1)	(1)
Total	\$ 59	\$ (149)	Interest expense	\$ (8)	\$ (7)

During the three months ended October 24, 2009 and October 25, 2008, the amounts recognized in earnings on derivative instruments related to the ineffective portion were not material, and the Company did not exclude any component of the changes in fair value of the derivative instruments from the assessment of hedge effectiveness.

Table of Contents

The effect on the Consolidated Statement of Operations for the three months ended October 24, 2009 and October 25, 2008 of derivative instruments designated as fair value hedges is summarized as follows (in millions):

Derivatives Designated as	Line Item in Statements of Operations	Gains (Losses) For The Three Months Ended	
		October 24, 2009	October 25, 2008
Fair Value Hedging Instruments			
Equity derivatives	Other income (loss), net	\$	\$ 16
Interest rate derivatives	Other income (loss), net		(5)
Total		\$	\$ 11

The effect on the Consolidated Statement of Operations for the three months ended October 24, 2009 and October 25, 2008 of derivative instruments not designated as hedges is summarized as follows (in millions):

Derivatives not Designated as	Line Item in Statements of Operations	Gains (Losses) For The Three Months Ended	
		October 24, 2009	October 25, 2008
Hedging Instruments			
Foreign currency derivatives	Other income (loss), net	\$ 126	\$ (123)
Equity derivatives	Operating expenses	13	(11)
Equity derivatives	Other income (loss), net	4	(6)
Total		\$ 143	\$ (140)

As of October 24, 2009, the Company estimates that approximately \$57 million of net derivative gains related to its cash flow hedges included in accumulated other comprehensive income (AOCI) will be reclassified into earnings within the next 12 months.

(b) Foreign Currency Exchange Risk

The Company conducts business globally in numerous currencies. As such, it is exposed to adverse movements in foreign currency exchange rates. To limit the exposure related to foreign currency changes, the Company enters into foreign currency contracts. The Company does not enter into such contracts for trading purposes.

The Company hedges foreign currency forecasted transactions related to certain operating expenses and service cost of sales with currency options and forward contracts. These currency option and forward contracts, designated as cash flow hedges, generally have maturities of less than 18 months. The Company assesses effectiveness based on changes in total fair value of the derivatives. The effective portion of the derivative's gain or loss is initially reported as a component of AOCI and subsequently reclassified into earnings when the hedged exposure affects earnings. The ineffective portion, if any, of the gain or loss is reported in earnings immediately. The Company did not discontinue any hedges during any of the periods presented because it was probable that the original forecasted transaction would not occur.

The Company enters into foreign exchange forward and option contracts to reduce the short-term effects of foreign currency fluctuations on assets and liabilities such as foreign currency receivables including long-term customer financings, investments, and payables and these derivatives are not designated as hedging instruments. Gains and losses on the contracts are included in other income (loss), net, and offset foreign exchange gains and losses from the remeasurement of intercompany balances or other current assets, investments, or liabilities denominated in currencies other than the functional currency of the reporting entity.

During the three months ended October 24, 2009, the Company entered into foreign exchange forward and options contracts denominated in Norwegian kroner to hedge against a portion of the foreign currency exchange risk associated with the purchase consideration for the proposed Tandberg tender offer. These contracts were not designated as hedging instruments.

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

The Company hedges certain net investments in its foreign subsidiaries with forward contracts which generally have maturities of up to six months. The Company recognized a loss of \$5 million in OCI for the effective portion of its net investment hedges for the three months ended October 24, 2009. The Company's net investment hedges are not included in the preceding tables.

Table of Contents

The notional amounts of the Company's foreign currency derivatives are summarized as follows (in millions):

	October 24, 2009	July 25, 2009
Derivatives designated as cash flow hedging instruments	\$ 2,776	\$ 2,965
Derivatives designated as net investment hedging instruments	108	103
Derivatives not designated as hedging instruments	5,714	4,423
Total	\$ 8,598	\$ 7,491

(c) Interest Rate Risk*Interest Rate Derivatives, Investments*

The Company's primary objective for holding fixed income securities is to achieve an appropriate investment return consistent with preserving principal and managing risk. To realize these objectives, the Company may utilize interest rate swaps or other derivatives designated as fair value or cash flow hedges. As of October 24, 2009, the Company did not have any outstanding interest rate derivatives related to its fixed income securities.

Interest Rate Derivatives, Long-Term Debt

During the three months ended October 24, 2009, the Company entered into \$2.5 billion of interest rate derivatives designated as cash flow hedges to hedge against interest rate movements in connection with the anticipated issuance of senior notes in November 2009. The effective portion of these hedges was recorded to AOCI, net of tax, and will be amortized to interest expense over the respective lives of the notes, and the ineffective portion, if any, will be recognized in earnings. These derivative instruments were settled in connection with the actual issuance of the senior notes in November 2009. See Note 17.

(d) Equity Price Risk

The Company may hold equity securities for strategic purposes or to diversify its overall investment portfolio. The publicly traded equity securities in the Company's portfolio are subject to price risk. To manage its exposure to changes in the fair value of certain equity securities, the Company may enter into equity derivatives that are designated as fair value or cash flow hedges. The changes in the value of the hedging instruments are included in other income (loss), net, and offset the change in the fair value of the underlying hedged investment. In addition, the Company periodically manages the risk of its investment portfolio by entering into equity derivatives that are not designated as accounting hedges. The changes in the fair value of these derivatives were also included in other income (loss), net. As of October 24, 2009 and July 25, 2009, the Company did not have any equity derivatives outstanding related to its investment portfolio.

The Company is also exposed to variability in compensation charges related to certain deferred compensation obligations to employees. Although not designated as accounting hedges, the Company utilizes equity derivatives to economically hedge this exposure. As of October 24, 2009 and July 25, 2009, the notional amount of the derivative instruments used to hedge such liabilities was \$142 million and \$91 million, respectively.

(e) Credit-Risk-Related Contingent Features

Certain of the Company's derivative instruments contain credit-risk-related contingent features, such as provisions that allow a counterparty to terminate a transaction if the Company's debt rating falls below investment grade. These provisions did not affect the Company's financial position as of October 24, 2009 and July 25, 2009, respectively.

Table of Contents**11. Commitments and Contingencies****(a) Operating Leases**

The Company leases office space in several U.S. locations. Outside the United States, larger leased sites include sites in Australia, Belgium, China, France, Germany, India, Israel, Italy, Japan, and the United Kingdom. The Company also leases equipment and vehicles. Future minimum lease payments under all noncancelable operating leases with an initial term in excess of one year as of October 24, 2009 are as follows (in millions):

Fiscal Year	Amount
2010 (remaining nine months)	\$ 281
2011	266
2012	185
2013	138
2014	107
Thereafter	425
Total	\$ 1,402

(b) Purchase Commitments with Contract Manufacturers and Suppliers

The Company purchases components from a variety of suppliers and uses several contract manufacturers to provide manufacturing services for its products. During the normal course of business, in order to manage manufacturing lead times and help ensure adequate component supply, the Company enters into agreements with contract manufacturers and suppliers that either allow them to procure inventory based upon criteria as defined by the Company or that establish the parameters defining the Company's requirements. A significant portion of the Company's reported purchase commitments arising from these agreements consists of firm, noncancelable, and unconditional commitments. In certain instances, these agreements allow the Company the option to cancel, reschedule, and adjust the Company's requirements based on its business needs prior to firm orders being placed. As of October 24, 2009 and July 25, 2009, the Company had total purchase commitments for inventory of \$2.8 billion and \$2.2 billion, respectively.

The Company records a liability for firm, noncancelable, and unconditional purchase commitments for quantities in excess of its future demand forecasts consistent with the valuation of the Company's excess and obsolete inventory. As of October 24, 2009 and July 25, 2009, the liability for these purchase commitments was \$168 million and \$175 million, respectively, and was included in other current liabilities.

(c) Other Commitments

In connection with the Company's business combinations and asset purchases, the Company has agreed to pay certain additional amounts contingent upon the achievement of certain agreed-upon technology, development, product, or other milestones, or the continued employment with the Company of certain employees of acquired entities. See Note 3.

The Company also has certain funding commitments primarily related to its investments in privately held companies and venture funds, some of which are based on the achievement of certain agreed-upon milestones, and some of which are required to be funded on demand. The funding commitments were approximately \$298 million and \$313 million as of October 24, 2009 and July 25, 2009, respectively.

(d) Variable Interest Entities

In the ordinary course of business, the Company has investments in privately held companies and provides financing to certain customers. These privately held companies and customers may be considered to be variable interest entities. The Company has evaluated its investments in these privately held companies and its customer financings and has determined that there were no significant unconsolidated variable interest entities as of October 24, 2009.

Table of Contents**(e) Product Warranties and Guarantees**

The following table summarizes the activity related to the product warranty liability during the three months ended October 24, 2009 and October 25, 2008 (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Balance at beginning of period	\$ 321	\$ 399
Provision for warranties issued	108	101
Payments	(104)	(119)
Balance at end of period	\$ 325	\$ 381

The Company accrues for warranty costs as part of its cost of sales based on associated material product costs, labor costs for technical support staff, and associated overhead. The Company's products are generally covered by a warranty for periods ranging from 90 days to five years, and for some products the Company provides a limited lifetime warranty.

In the normal course of business, the Company indemnifies other parties, including customers, lessors, and parties to other transactions with the Company, with respect to certain matters. The Company has agreed to hold the other parties harmless against losses arising from a breach of representations or covenants, or out of intellectual property infringement or other claims made against certain parties. These agreements may limit the time within which an indemnification claim can be made and the amount of the claim. In addition, the Company has entered into indemnification agreements with its officers and directors, and the Company's bylaws contain similar indemnification obligations to the Company's agents. It is not possible to determine the maximum potential amount under these indemnification agreements due to the Company's limited history with prior indemnification claims and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the Company under these agreements have not had a material effect on the Company's operating results, financial position, or cash flows.

The Company also provides financing guarantees, which are generally for various third-party financing arrangements to channel partners and other end-user customers. See Note 6. The Company's other guarantee arrangements as of October 24, 2009 and July 25, 2009 that are subject to recognition and disclosure requirements were not material.

(f) Legal Proceedings

Brazilian authorities are investigating the Company's Brazilian subsidiary and certain of its current and former employees, as well as a Brazilian importer of the Company's products, and its affiliates and employees, relating to the allegation of evading import taxes and other alleged improper transactions involving the subsidiary and the importer. The Company is conducting a thorough review of the matter. During fiscal 2009, Brazilian authorities asserted claims against the Company for calendar years 2003 and 2004, and the Company believes claims may also be asserted for calendar year 2005 through calendar year 2007. The Company believes the asserted claims are without merit and intends to defend the claims vigorously. The Company is unable to determine the likelihood of an unfavorable outcome on any potential further claims against it. While the Company believes there is no legal basis for its alleged liability, due to the complexities and uncertainty surrounding the judicial process in Brazil, and the nature of the claims asserting joint liability with the importer, the Company is unable to reasonably estimate a range of loss, if any. In addition, the Company is investigating the allegations regarding improper transactions. The Company has proactively communicated with United States authorities to provide information and report on its findings, and the United States authorities are currently investigating such allegations.

In addition, the Company is subject to legal proceedings, claims, and litigation arising in the ordinary course of business, including intellectual property litigation. While the outcome of these matters is currently not determinable, the Company does not expect that the ultimate costs to resolve these matters will have a material adverse effect on its consolidated financial position, results of operations, or cash flows.

Table of Contents**12. Shareholders Equity****(a) Stock Repurchase Program**

In September 2001, the Company's Board of Directors authorized a stock repurchase program. As of October 24, 2009, the Company's Board of Directors had authorized an aggregate repurchase of up to \$62 billion of common stock under this program and the remaining authorized repurchase amount was \$3.1 billion with no termination date. In addition, on November 4, 2009, the Company's Board of Directors authorized the repurchase of up to an additional \$10 billion of the Company's common stock under this program with no termination date. The stock repurchase activity under the stock repurchase program during the three months ended October 24, 2009 is summarized as follows (in millions, except per-share amounts):

Three Months Ended October 24, 2009	Shares Repurchased	Weighted- Average Price per Share	Amount Repurchased
Cumulative balance at July 25, 2009	2,802	\$ 20.41	\$ 57,179
Repurchase of common stock under the stock repurchase program	76	22.99	1,753
Cumulative balance at October 24, 2009	2,878	\$ 20.47	\$ 58,932

The purchase price for the shares of the Company's stock repurchased is reflected as a reduction to shareholders' equity. The Company is required to allocate the purchase price of the repurchased shares as (i) a reduction to retained earnings until retained earnings are zero and then as an increase to accumulated deficit and (ii) a reduction of common stock and additional paid-in capital. Issuance of common stock and the tax benefit related to employee stock incentive plans are recorded as an increase to common stock and additional paid-in capital.

(b) Other Repurchases of Common Stock

For the three months ended October 24, 2009 and October 25, 2008, the Company repurchased approximately 2.8 million and 0.5 million shares, respectively, in settlement of employee tax withholding obligations due upon the vesting of restricted stock or stock units.

Table of Contents**(c) Comprehensive Income**

The components of comprehensive income for the three months ended October 24, 2009 and October 25, 2008 are as follows (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Net income	\$ 1,787	\$ 2,201
Other comprehensive income:		
Change in unrealized gains and losses on investments, net of tax (expense) benefit of \$(30) and \$102, for the three months ended October 24, 2009 and October 25, 2008, respectively	180	(472)
Change in derivative instruments, net of tax expense of \$6 for the three months ended October 24, 2009	61	(142)
Change in cumulative translation adjustment and other	163	(475)
Comprehensive income	2,191	1,112
Comprehensive loss attributable to noncontrolling interests	6	25
Comprehensive income attributable to Cisco Systems, Inc.	\$ 2,197	\$ 1,137

The Company consolidates its investment in a venture fund managed by SOFTBANK Corp. and its affiliates (SOFTBANK) as the Company is the primary beneficiary. As a result, SOFTBANK 's interest in the change in the unrealized gains and losses on the investments in the venture fund is shown as comprehensive income attributable to noncontrolling interests.

The components of AOCI, net of tax, are summarized as follows (in millions):

	October 24, 2009	July 25, 2009
Net unrealized gains on investments	\$ 324	\$ 138
Net unrealized gains (losses) on derivative instruments	40	(21)
Cumulative translation adjustment and other	481	318
Total	\$ 845	\$ 435

13. Employee Benefit Plans**(a) Employee Stock Purchase Plan**

The Company has an Employee Stock Purchase Plan, which includes its subplan, the International Employee Stock Purchase Plan (together, the Purchase Plan), under which 321.4 million shares of the Company 's common stock had been reserved for issuance as of October 24, 2009. Effective July 1, 2009, eligible employees are offered shares through a 24-month offering period, which consists of four consecutive 6-month purchase periods. Employees may purchase a limited number of shares of the Company 's stock at a discount of up to 15% of the lesser of the market value at the beginning of the offering period or the end of each 6-month purchase period. Prior to July 1, 2009 the offering period was six months. During the three months ended October 24, 2009 and October 25, 2008, the Company did not issue any shares under the Purchase Plan. As of October 24, 2009, 33 million shares were available for issuance under the Purchase Plan. Based on a vote of the Company 's shareholders at the 2009 Annual Meeting of Shareholders on November 12, 2009, the maximum number of shares authorized for issuance under the Purchase Plan was increased by 150 million shares, and the term of the Purchase Plan was extended from January 3, 2010 to January 3, 2020.

Table of Contents***(b) Employee Stock Incentive Plans****Stock Incentive Plan Program Description*

As of October 24, 2009, the Company had five stock incentive plans: the 2005 Stock Incentive Plan (the 2005 Plan); the 1996 Stock Incentive Plan (the 1996 Plan); the 1997 Supplemental Stock Incentive Plan (the Supplemental Plan); the Cisco Systems, Inc. SA Acquisition Long-Term Incentive Plan (the SA Acquisition Plan); and the Cisco Systems, Inc. WebEx Acquisition Long-Term Incentive Plan (the WebEx Acquisition Plan). In addition, the Company has, in connection with the acquisitions of various companies, assumed the share-based awards granted under stock incentive plans of the acquired companies or issued share-based awards in replacement thereof. Share-based awards are designed to reward employees for their long-term contributions to the Company and provide incentives for them to remain with the Company. The number and frequency of share-based awards are based on competitive practices, operating results of the Company, government regulations, and other factors. Since the inception of the stock incentive plans, the Company has granted share-based awards to a significant percentage of its employees, and the majority has been granted to employees below the vice president level. The Company's primary stock incentive plans are summarized as follows:

2005 Plan

As amended on November 15, 2007, the maximum number of shares issuable under the 2005 Plan over its term is 559 million shares plus the amount of any shares underlying awards outstanding on November 15, 2007 under the 1996 Plan, the SA Acquisition Plan, and the WebEx Acquisition Plan that are forfeited or are terminated for any other reason before being exercised or settled. If any awards granted under the 2005 Plan are forfeited or are terminated for any other reason before being exercised or settled, then the shares underlying the awards will again be available under the 2005 Plan.

For each of the periods presented, the number of shares available for issuance under the 2005 Plan was reduced by 2.5 shares for each share awarded as a stock grant or stock unit. Based on a vote of the Company's shareholders at the 2009 Annual Meeting of Shareholders on November 12, 2009, following that vote the number of shares available for issuance under the 2005 Plan will be reduced by 1.5 shares for each share awarded as a stock grant or a stock unit, and any shares underlying awards outstanding under the 1996 Plan, the SA Acquisition Plan, and the WebEx Acquisition Plan that expire unexercised at the end of their maximum terms will become available for reissuance under the 2005 Plan. The 2005 Plan permits the granting of stock options, stock, stock units, and stock appreciation rights to employees (including employee directors and officers) and consultants of the Company and its subsidiaries and affiliates, and non-employee directors of the Company. Stock options and stock appreciation rights granted under the 2005 Plan have an exercise price of at least 100% of the fair market value of the underlying stock on the grant date and, for each of the periods presented, have an expiration date no later than nine years from the grant date. Based on a vote of the Company's shareholders at the 2009 Annual Meeting of Shareholders on November 12, 2009, the expiration date for stock options and stock appreciation rights granted subsequent to November 12, 2009 shall be not later than ten years from the grant date. The stock options will generally become exercisable for 20% or 25% of the option shares one year from the date of grant and then ratably over the following 48 or 36 months, respectively. Stock grants and stock units will generally vest with respect to 20% or 25% of the shares covered by the grant on each of the first through fifth or fourth anniversaries of the date of the grant, respectively. The Compensation and Management Development Committee of the Board of Directors has the discretion to use different vesting schedules. Stock appreciation rights may be awarded in combination with stock options or stock grants and such awards shall provide that the stock appreciation rights will not be exercisable unless the related stock options or stock grants are forfeited. Stock grants may be awarded in combination with non-statutory stock options, and such awards may provide that the stock grants will be forfeited in the event that the related non-statutory stock options are exercised.

1996 Plan

The 1996 Plan expired on December 31, 2006, and the Company can no longer make equity awards under the 1996 Plan. The maximum number of shares issuable over the term of the 1996 Plan was 2.5 billion shares. Stock options granted under the 1996 Plan have an exercise price of at least 100% of the fair market value of the underlying stock on the grant date and expire no later than nine years from the grant date. The stock options generally become exercisable for 20% or 25% of the option shares one year from the date of grant and then ratably over the following 48 or 36 months, respectively. Certain other grants have utilized a 60-month ratably vesting schedule. In addition, the Board of Directors, or other committees administering the plan, have the discretion to use a different vesting schedule and have done so from time to time.

Table of Contents

Supplemental Plan

The Supplemental Plan expired on December 31, 2007, and the Company can no longer make equity awards under the Supplemental Plan. Officers and members of the Company's Board of Directors were not eligible to participate in the Supplemental Plan. Nine million shares were reserved for issuance under the Supplemental Plan.

Acquisition Plans

In connection with the Company's acquisitions of Scientific-Atlanta, Inc. (Scientific-Atlanta) and WebEx Communications, Inc. (WebEx), the Company adopted the SA Acquisition Plan and the WebEx Acquisition Plan, respectively, each effective upon completion of the applicable acquisition. These plans constitute assumptions, amendments, restatements, and renamings of the 2003 Long-Term Incentive Plan of Scientific-Atlanta and the WebEx Communications, Inc. Amended and Restated 2000 Stock Incentive Plan, respectively. The plans permit the grant of stock options, stock, stock units, and stock appreciation rights to certain employees of the Company and its subsidiaries and affiliates who had been employed by Scientific-Atlanta or its subsidiaries or WebEx or its subsidiaries, as applicable. As a result of the shareholder approval of the amendment and extension of the 2005 Plan, as of November 15, 2007, the Company will no longer make stock option grants or direct share issuances under either the SA Acquisition Plan or the WebEx Acquisition Plan.

General Share-Based Award Information

Stock Option Awards

A summary of the stock option activity is as follows (in millions, except per-share amounts):

	STOCK OPTIONS OUTSTANDING	
	Number Outstanding	Weighted-Average Exercise Price per Share
BALANCE AT JULY 26, 2008	1,199	\$ 27.83
Granted and assumed	14	19.01
Exercised	(33)	14.67
Canceled/forfeited/expired	(176)	49.79
BALANCE AT JULY 25, 2009	1,004	24.29
Exercised	(37)	17.38
Canceled/forfeited/expired	(25)	45.75
BALANCE AT OCTOBER 24, 2009	942	\$ 23.99

The following table summarizes significant ranges of outstanding and exercisable stock options as of October 24, 2009 (in millions, except years and share prices):

Range of Exercise Prices	STOCK OPTIONS OUTSTANDING				STOCK OPTIONS EXERCISABLE		
	Number Outstanding	Weighted-Average Remaining Contractual Life (in Years)	Weighted-Average Exercise Price per Share	Aggregate Intrinsic Value	Number Exercisable	Weighted-Average Exercise Price per Share	Aggregate Intrinsic Value

35.01	68.56	91	0.09	50.12		91	50.12	
Total		942	3.96	\$ 23.99	\$ 3,634	743	\$ 23.72	\$ 3,227

The aggregate intrinsic value in the preceding table represents the total pretax intrinsic value, based on the Company's closing stock price of \$24.17 as of October 23, 2009, which would have been received by the option holders had those option holders exercised their stock options as of that date. The total number of in-the-money stock options exercisable as of October 24, 2009 was 572 million. As of July 25, 2009, 768 million outstanding stock options were exercisable and the weighted-average exercise price was \$24.16.

Table of ContentsRestricted Stock and Stock Unit Awards

A summary of the restricted stock and stock unit activity is as follows (in millions, except per-share amounts):

	Restricted Stock/Stock Units	Weighted- Average Grant Date Price per Share	Aggregated Fair Market Value
BALANCE AT JULY 26, 2008	10	\$ 24.27	
Granted and assumed	57	20.90	
Vested	(4)	23.56	\$ 69
Canceled/forfeited	(1)	22.76	
BALANCE AT JULY 25, 2009	62	\$ 21.25	
Vested	(8)	23.34	\$ 187
Canceled/forfeited	(1)	21.91	
BALANCE AT OCTOBER 24, 2009	53	\$ 20.92	

Certain of the restricted stock units are awarded contingent on the future achievement of financial performance metrics.

Share-Based Awards Available for Grant

A summary of share-based awards available for grant are as follows (in millions):

	Share-Based Awards Available for Grant
BALANCE AT JULY 26, 2008	362
Options granted and assumed	(14)
Restricted stock, stock units, and other share-based awards granted and assumed	(140)
Share-based awards canceled/forfeited	38
Additional shares reserved	7
BALANCE AT JULY 25, 2009	253
Share-based awards canceled/forfeited	18
BALANCE AT OCTOBER 24, 2009	271

As reflected in the preceding table, for each share awarded as restricted stock or subject to a restricted stock unit award under the 2005 Plan beginning November 15, 2007 and prior to November 12, 2009, an equivalent of 2.5 shares was deducted from the available share-based award balance. Effective November 12, 2009, the equivalent number of shares has been revised to 1.5 shares for each share awarded as restricted stock or subject to restricted stock unit award under the 2005 Plan beginning on this date.

Table of Contents*Expense and Valuation Information for Share-Based Awards*Share-Based Compensation Expense

Share-based compensation expense consists primarily of expenses for stock options, stock purchase rights, restricted stock, and restricted stock units granted to employees and share-based compensation related to acquisitions or investments. The following table summarizes share-based compensation expense (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Cost of sales – product	\$ 12	\$ 11
Cost of sales – service	33	31
Share-based compensation expense in cost of sales	45	42
Research and development	97	94
Sales and marketing	113	113
General and administrative	66	55
Share-based compensation expense in operating expenses	276	262
Total share-based compensation expense	\$ 321	\$ 304

Share-based compensation in the above table includes \$28 million and \$22 million related to acquisitions for the three months ended October 24, 2009 and October 25, 2008, respectively. As of October 24, 2009, total compensation cost related to unvested share-based awards not yet recognized was \$2.9 billion, which is expected to be recognized over approximately 2.7 years on a weighted-average basis. The income tax benefit for share-based compensation expense was \$85 million and \$82 million for the three months ended October 24, 2009 and October 25, 2008, respectively.

Valuation of Share-Based Awards

The Company estimates the fair value of employee stock options and employee stock purchase rights on the date of grant using a lattice-binomial option-pricing model and measures the fair value of restricted stock and restricted stock units as if the awards were vested and issued on the grant date.

The Company's employee stock options have vesting provisions and various restrictions including restrictions on transfer and hedging, among others, and are often exercised prior to their contractual maturity. Lattice-binomial models are more capable of incorporating the features of the Company's employee stock options than closed-form models such as the Black-Scholes model. The use of a lattice-binomial model requires extensive actual employee exercise behavior data and a number of complex assumptions including expected volatility, risk-free interest rate, expected dividends, kurtosis, and skewness. Kurtosis and skewness are technical measures of the distribution of stock price returns, which affect expected employee exercise behaviors, and are based on the Company's stock price return history as well as consideration of various academic analyses.

The expected life of employee stock options represents the weighted-average period the stock options are expected to remain outstanding and is a derived output of the lattice-binomial model. The expected life of employee stock options is impacted by all of the underlying assumptions and calibration of the Company's model. The lattice-binomial model assumes that employees' exercise behavior is a function of the option's remaining vested life and the extent to which the option is in-the-money. The lattice-binomial model estimates the probability of exercise as a function of these two variables based on the entire history of exercises and cancellations on all past option grants made by the Company. The Company did not grant a material number of options during the three months ended either October 24, 2009 or October 25, 2008.

Accuracy of Fair Value Estimates

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

The Company uses third-party analyses to assist in developing the assumptions used in, as well as calibrating, its lattice-binomial model. The Company is responsible for determining the assumptions used in estimating the fair value of its share-based payment awards. The Company's determination of the fair value of share-based payment awards is affected by assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the Company's expected stock price volatility over the term of the awards and actual and projected employee stock option exercise behaviors. Option-pricing models were developed for use in estimating the value of traded options that have no vesting or hedging restrictions and are fully transferable. Because the Company's employee stock options have certain characteristics that are significantly different from traded options, and because changes in the subjective assumptions can materially affect the estimated value, in management's opinion, the existing valuation models may not provide an accurate measure of the fair value or be indicative of the fair value that would be observed in a willing buyer/willing seller market for the Company's employee stock options.

Table of Contents**14. Income Taxes**

The following table provides details of income taxes (in millions, except percentages):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Effective tax rate	20.2%	15.5%
Cash paid for income taxes	\$ 649	\$ 460

During the three months ended October 25, 2008, the Tax Extenders and Alternative Minimum Tax Relief Act of 2008 reinstated the U.S. federal R&D tax credit, retroactive to January 1, 2008. As a result, the effective tax rate for the three months ended October 25, 2008 reflected a \$106 million tax benefit related to fiscal 2008 R&D expenses. The U.S. federal R&D tax credit will expire on December 31, 2009 unless extended.

As of October 24, 2009, the Company had \$2.9 billion of unrecognized tax benefits, of which \$2.2 billion, if recognized, would favorably impact the effective tax rate. Although timing of the resolution of audits is highly uncertain, the Company does not believe it is reasonably possible that the total amount of unrecognized tax benefits as of October 24, 2009 will materially change in the next 12 months.

15. Segment Information and Major Customers

The Company's operations involve the design, development, manufacturing, marketing, and technical support of networking and other products and services related to the communications and information technology industry. Cisco products include routers, switches, advanced technologies, and other products. These products, primarily integrated by Cisco IOS Software, link geographically dispersed local-area networks (LANs), metropolitan-area networks (MANs) and wide-area networks (WANs).

(a) Net Sales and Gross Margin by Theater

The Company conducts business globally and is primarily managed on a geographic basis. The Company's management makes financial decisions and allocates resources based on the information it receives from its internal management system. Sales are attributed to a geographic theater based on the ordering location of the customer.

The Company does not allocate research and development, sales and marketing, or general and administrative expenses to its geographic theaters in this internal management system because management does not include the information in its measurement of the performance of the operating segments. In addition, the Company does not allocate amortization of acquisition-related intangible assets, share-based compensation expense, and certain other items to the gross margin for each theater because management does not include this information in its measurement of the performance of the operating segments.

Table of Contents

Summarized financial information by theater for the three months ended October 24, 2009 and October 25, 2008, based on the Company's internal management system and as utilized by the Company's Chief Operating Decision Maker (CODM), is as follows (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Net sales:		
United States and Canada ⁽¹⁾	\$ 4,990	\$ 5,549
European Markets	1,822	2,153
Emerging Markets	863	1,229
Asia Pacific	959	1,022
Japan	387	378
Total	\$ 9,021	\$ 10,331
Gross margin⁽²⁾:		
United States and Canada	\$ 3,298	\$ 3,679
European Markets	1,244	1,415
Emerging Markets	542	780
Asia Pacific	612	649
Japan	281	254
Theater total	5,977	6,777
Unallocated corporate items ⁽³⁾	(89)	(96)
Total	\$ 5,888	\$ 6,681

⁽¹⁾ Net sales in the United States were \$4.5 billion and \$5.2 billion for the three months ended October 24, 2009 and October 25, 2008, respectively.

⁽²⁾ Certain reclassifications have been made to prior period amounts to conform to the current period's presentation.

⁽³⁾ The unallocated corporate items include the effects of amortization of acquisition-related intangible assets and share-based compensation expense.

(b) Net Sales for Groups of Similar Products and Services

The following table presents net sales for groups of similar products and services (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Net sales⁽¹⁾:		
Routers	\$ 1,574	\$ 1,899
Switches	2,872	3,631
Advanced technologies	2,273	2,666
Other	481	439

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Product	7,200	8,635
Service	1,821	1,696
Total	\$ 9,021	\$ 10,331

(1) Certain reclassifications have been made to prior period amounts to conform to the current period's presentation. The Company refers to some of its products and technologies as advanced technologies. As of October 24, 2009, the Company had identified the following advanced technologies for particular focus: application networking services, home networking, security, storage area networking, unified communications, video systems, and wireless technology. The Company continues to identify additional advanced technologies for focus and investment in the future, and the Company's investments in some previously identified advanced technologies may be curtailed or eliminated depending on market developments.

Table of Contents**(c) Other Segment Information**

The majority of the Company's assets, excluding cash and cash equivalents and investments, as of October 24, 2009 and July 25, 2009 were attributable to its U.S. operations. The Company's total cash and cash equivalents and investments held outside of the United States in various foreign subsidiaries was \$30.6 billion as of October 24, 2009, and the remaining \$4.7 billion was held in the United States. For the three months ended October 24, 2009 and October 25, 2008, no single customer accounted for 10% or more of the Company's net sales.

Property and equipment information is based on the physical location of the assets. The following table presents property and equipment information for geographic areas (in millions):

	October 24, 2009	July 25, 2009
Property and equipment, net:		
United States	\$ 3,269	\$ 3,330
International	707	713
Total	\$ 3,976	\$ 4,043

16. Net Income per Share

The following table presents the calculation of basic and diluted net income per share (in millions, except per-share amounts):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Net income	\$ 1,787	\$ 2,201
Weighted-average shares - basic	5,767	5,881
Effect of dilutive potential common shares	104	91
Weighted-average shares - diluted	5,871	5,972
Net income per share - basic	\$ 0.31	\$ 0.37
Net income per share - diluted	\$ 0.30	\$ 0.37
Antidilutive employee share-based awards, excluded	465	620

Employee equity share options, unvested shares, and similar equity instruments granted by the Company are treated as potential common shares outstanding in computing diluted earnings per share. Diluted shares outstanding include the dilutive effect of in-the-money options and nonvested restricted stock and restricted stock units which is calculated based on the average share price for each fiscal period using the treasury stock method. Under the treasury stock method, the amount the employee must pay for exercising stock options, the amount of compensation cost for future service that the Company has not yet recognized, and the amount of tax benefits that would be recorded in additional paid-in capital when the award becomes deductible are assumed to be used to repurchase shares.

17. Subsequent Event

On November 9, 2009, the Company entered into an underwriting agreement to issue senior unsecured notes in aggregate principal amount of \$5.0 billion under a Form S-3 Registration Statement filed on February 9, 2009. Of these notes, \$500 million will mature in 2014 and bear interest at a fixed rate of 2.90% per annum (the "2014 Notes"), \$2.5 billion will mature in 2020 and bear interest at a fixed rate of 4.45% per

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

annum (the 2020 Notes), and \$2.0 billion will mature in 2040 and bear interest at a fixed rate of 5.50% per annum (the 2040 Notes). This offering was completed on November 17, 2009. The Company intends to use the proceeds from the offering for general corporate purposes. The interest on the senior notes is payable semi-annually in arrears. The senior notes are redeemable by the Company at any time, subject to a make-whole premium.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**
Forward-Looking Statements

This Quarterly Report on Form 10-Q, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements regarding future events and our future results that are subject to the safe harbors created under the Securities Act of 1933 (the Securities Act) and the Securities Exchange Act of 1934 (the Exchange Act). All statements other than statements of historical facts are statements that could be deemed forward-looking statements. These statements are based on current expectations, estimates, forecasts, and projections about the industries in which we operate and the beliefs and assumptions of our management. Words such as expects, anticipates, targets, goals, projects, intends, plans, believes, seeks, estimates, continues, endeavors, strives, may, various, and similar expressions are intended to identify such forward-looking statements. In addition, any statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, and other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties, and assumptions that are difficult to predict, including those identified below, under Part II, Item 1A. Risk Factors, and elsewhere herein. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. We undertake no obligation to revise or update any forward-looking statements for any reason.

Overview

In the first quarter of fiscal 2010, our results reflected a 13% decrease in net sales from the first quarter of fiscal 2009 with the decrease reflected across our four largest geographic theaters, and across most of our product categories and customer markets. The year-over-year decline in sales in the first quarter of fiscal 2010 was attributable in part to the fact that the economic downturn did not begin to have a material impact on the corresponding period in fiscal 2009 until the later stages of that quarter. Although net sales declined on a year-over-year basis, they increased by 6% on a sequential basis.

Although we experienced a year-over-year decline in net sales in the first quarter of fiscal 2010, we did begin to observe what we believe to be positive trends within our business. The positive trends in the first quarter of fiscal 2010 consisted of a smaller decline in year-over-year sales than we experienced in the three preceding quarters, and the sequential increase in sales. These positive trends were apparent across most of our geographic theaters, as only Asia Pacific showed a slight sequential decline in revenue. These positive trends were evident in the United States and Canada theater, particularly within the enterprise market including the public sector, and its continued business momentum.

Net income and net income per diluted share each decreased by approximately 19% compared with the first quarter of fiscal 2009, primarily due to lower revenue, which was partially offset by a higher gross margin percentage and lower operating expenses primarily as a result of our ongoing expense management initiatives.

Strategy and Focus Areas

Our strategy centers on the increasing role of intelligent networks, collaboration and Web 2.0 technologies, the United States and selected emerging countries, the network as the platform, and resource management and realignment. Consistent with our strategy during the recent economic downturn, we will continue to seek to expand our share of our customers' information technology spending. We will endeavor to achieve this objective by focusing on our core networking capabilities while continuing to expand into product markets similar, related, or adjacent to those in which we currently are active, which we refer to as market adjacencies. We have continued our focus on our core networking capabilities and have expanded our movement into market adjacencies primarily through the realignment of resources, while simultaneously reducing our operating expenses.

We refer to the evolutionary process by which adjacencies arise as market transitions. Specifically, we believe the key market transitions currently taking place in our industry pertain to virtualization, video, and collaboration. Virtualization is the process of aggregating the current siloed data center resources into unified, shared resource pools that can be dynamically delivered to applications on demand thus providing the ability to move content and applications between devices and the network. Due to changing technology trends such as the increasing adoption of virtualization and the rise in scalable processing, a significant market transition appears to be under way in the enterprise data center market. We believe the market is at an inflection point, as awareness grows that intelligent networks are becoming the platform for productivity improvement and global competitiveness. We further believe that disruption in the enterprise data center market will accelerate in the next 12 months. This market transition is being brought about through the convergence of networking, computing, storage, and software technologies. We are seeking to capitalize on this market transition through, among other things, our Cisco Unified Computing System and Cisco Nexus product families, which are designed to integrate the previously-siloed technologies in the enterprise data center with a unified architecture.

Table of Contents

The competitive landscape in our markets has changed, and we expect there will be a new class of very large, well-financed and aggressive competitors, each bringing its own new class of products to address this new enterprise data center market. Despite the increased competition, we continue to believe that, with respect to this new enterprise data center market, the network will be the intersection of innovation through an open ecosystem and standards. We expect to see acquisitions, industry consolidation, and new alliances among companies as they seek to serve the enterprise data center market. As we enter this next market phase, we expect to continue and strengthen certain strategic alliances, as we have already done, and compete more with certain strategic alliances and partners, and perhaps also encounter new competitors, in our attempt to deliver the best solutions for our customers.

Other market transitions on which we are focusing attention include those related to the increased role of video and collaboration across our customer markets. The key market transitions relative to the convergence of video and collaboration which we believe will drive productivity and growth in network loads, appear to be evolving even faster than we had anticipated earlier this year. Cisco TelePresence systems are one example of our product offerings that have incorporated video and collaboration as customers evolve their communications and business models. We will continue to focus on enhancing multiproduct and multivendor interoperability to encourage faster customer adoption.

We believe that the architectural approach that has served us well in our core networking technologies in the communications and information technology industry will be adaptable to other markets. Examples of market adjacencies where we aim to apply this approach are the consumer market and electrical services infrastructure market. For the consumer market, through collaboration with technology partners, retailers, service providers, and content publishers, we are striving to create compelling consumer experiences and make the network the platform for a variety of services in the home, as broadband development moves from a device-centric phase to a network-centric model. In the electrical services infrastructure market, we are developing an architecture for managing energy in a highly secure fashion on electrical grids at various steps from energy generation to consumption in homes and buildings.

Our approach of focusing on our core networking technologies and moving into market adjacencies has contributed to the growth we experienced in the past. Recently we have delivered several new products, and we are pleased with the breadth and depth of our innovation across almost all aspects of our business and the impact that we believe this innovation will have on our long-term prospects. We believe that our strategy and our ability to innovate and execute may enable us to improve our relative competitive position in difficult business conditions and may continue to provide us with long-term growth opportunities.

Revenue

For the first quarter of fiscal 2010, our total revenue decreased by 13% year over year. Despite the overall decrease in total revenue, our net service revenue increased by approximately 7%, compared with the corresponding period of fiscal 2009, reflecting increased service revenue in all of our geographic theaters. The net sales in the first quarter of 2010 also reflected a benefit of approximately \$50 million as a result of an adoption of new accounting guidance related to revenue recognition. We expect that the new accounting guidance related to revenue recognition will facilitate our efforts to optimize our offerings due to better alignment between the economics of a sales arrangement and the corresponding accounting.

While we did experience a sequential revenue increase in many of our product categories, our net product sales declined year over year across almost all of our product categories in the first quarter of fiscal 2010, except for sales of our products under the category of other, which reflected positive year-over-year revenue growth as well as positive sequential revenue growth. The year-over-year and sequential revenue increase in that category was driven by sales of Flip video cameras from our fiscal 2009 acquisition of Pure Digital Technologies, Inc. (Pure Digital), and increased sales of Cisco TelePresence systems. Our revenue from routing products declined by 17% as sales decreased across all router product categories from high-end to low-end routers, and revenue from switching products declined by 21%, reflecting a decrease in sales for both modular and fixed-configuration switches. Our advanced technologies category also experienced a year-over-year decrease in revenue by approximately 15%. The decrease was spread across almost all advanced technology product categories including video, unified communications, and security products, but did not include wireless products, which showed growth in revenue of approximately 7% compared with the first quarter of fiscal 2009.

Table of Contents

Gross Margin

In the first quarter of fiscal 2010, our gross margin percentage increased by approximately 0.6 percentage points compared with the first quarter of fiscal 2009. The increase in gross margin percentage was a result of higher service gross margin as our product gross margin was flat year over year. The increase in the service gross margin percentage was primarily due to higher margins for technical support and advanced services, and the favorable impact from higher service volume and increased cost savings. Our gross margins could be impacted by economic downturns or uncertain economic conditions as well as our movement into market adjacencies, such as the consumer market through sales of Flip video cameras, as well as increased sales of unified computing products. Our margins may also be impacted by the geographic mix of our revenue. In addition, if any of the additional factors that impact our gross margins are adversely affected in future periods, our product and service gross margins could decline.

Operating Expenses

Operating expenses in the first quarter of fiscal 2010 decreased, but increased as a percentage of revenue, compared with the corresponding period of fiscal 2009. For the first quarter of fiscal 2010, lower discretionary expenses, lower headcount-related expenses, and lower acquisition-related compensation expenses collectively contributed to the decrease in operating expenses.

Other Key Financial Measures

The following is a summary of our other financial measures for the first quarter of fiscal 2010:

We generated cash flows from operations of \$1.5 billion and \$2.7 billion during the first quarter of fiscal 2010 and 2009, respectively. Our cash and cash equivalents, together with our investments, were \$35.4 billion at the end of the first quarter of fiscal 2010, compared with \$35.0 billion at the end of fiscal 2009.

Our deferred revenue at the end of the first quarter of fiscal 2010 was \$9.3 billion, compared with \$9.4 billion at the end of fiscal 2009.

We repurchased 76 million shares of our common stock under our stock repurchase program for \$1.8 billion during the first quarter of fiscal 2010. On November 4, 2009, our Board of Directors authorized the repurchase of up to an additional \$10 billion of our common stock under this program with no termination date.

Days sales outstanding in accounts receivable (DSO) at the end of the first quarter of fiscal 2010 was 32 days, compared with 34 days at the end of fiscal 2009.

Our inventory balance was \$1.1 billion at the end of the first quarter of fiscal 2010, as it also was at the end of fiscal 2009. Annualized inventory turns were 11.6 in the first quarter of fiscal 2010 and were 11.7 in the fourth quarter of fiscal 2009.

Our purchase commitments with contract manufacturers and suppliers were \$2.8 billion at the end of the first quarter of fiscal 2010, compared with \$2.2 billion at the end of fiscal 2009. Similar to what is happening in the industry, we are seeing some product lead time extensions stemming from supplier constraints based upon their labor and other actions taken during the global economic downturn.

We believe that our strong cash position and cash flows, our solid balance sheet, our visibility into our supply chain, our high-quality investment portfolio management, and our financing capabilities together provide a key competitive advantage and collectively have enabled us to be well positioned to manage our business through the economic uncertainties and to prepare our business for the upturn we believe will come.

Critical Accounting Estimates

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

The preparation of financial statements and related disclosures in conformity with accounting principles generally accepted in the United States requires us to make judgments, assumptions, and estimates that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Note 2 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended July 25, 2009, as updated where applicable in Note 2 herein, describes the significant accounting policies and methods used in the preparation of the Consolidated Financial Statements.

The accounting policies described below are significantly affected by critical accounting estimates. Such accounting policies require significant judgments, assumptions, and estimates used in the preparation of the Consolidated Financial Statements, and actual results could differ materially from the amounts reported based on these policies.

Table of Contents

Revenue Recognition

Revenue is recognized when all of the following criteria have been met:

When persuasive evidence of an arrangement exists. Contracts, Internet commerce agreements, and customer purchase orders are generally used to determine the existence of an arrangement.

Delivery has occurred. Shipping documents and customer acceptance, when applicable, are used to verify delivery.

The fee is fixed or determinable. We assess whether the fee is fixed or determinable based on the payment terms associated with the transaction and whether the sales price is subject to refund or adjustment.

Collectibility is reasonably assured. We assess collectibility based primarily on the creditworthiness of the customer as determined by credit checks and analysis, as well as the customer's payment history.

In instances where final acceptance of the product, system, or solution is specified by the customer, revenue is deferred until all acceptance criteria have been met. When a sale involves multiple deliverables, such as sales of products that include services, the entire fee from the arrangement is allocated to each respective element based on its relative selling price and recognized when revenue recognition criteria for each element are met.

In October 2009, the FASB amended the accounting standards for revenue recognition to remove tangible products containing software components and non-software components that function together to deliver the product's essential functionality from the scope of industry specific software revenue recognition guidance. In October 2009, the FASB also amended the accounting standards for multiple deliverable revenue arrangements to:

- (i) provide updated guidance on whether multiple deliverables exist, and on how the deliverables in an arrangement should be separated and how the consideration should be allocated;
- (ii) require an entity to allocate revenue in an arrangement using estimated selling prices (ESP) of deliverables if a vendor does not have vendor-specific objective evidence of selling price (VSOE) or third-party evidence of selling price (TPE); and
- (iii) eliminate the use of the residual method and require an entity to allocate revenue using the relative selling price method.

We elected to early adopt this accounting guidance at the beginning of our first quarter of fiscal 2010 on a prospective basis for applicable transactions originating or materially modified after July 25, 2009.

The amount of product and service revenue recognized in a given period is affected by our judgment as to whether an arrangement includes multiple deliverables and, if so, our determinations surrounding whether VSOE exists. In the certain limited circumstances when VSOE does not exist, we then apply judgment with respect to whether we can obtain TPE. Generally, we are not able to determine TPE because our go-to-market strategy differs from that of our peers. In the limited number of circumstances in which we are unable to establish selling price using VSOE or TPE, we will use ESP in our allocation of arrangement consideration. We determine VSOE based on its normal pricing and discounting practices for the specific product or service when sold separately. In determining VSOE, we require that a substantial majority of the selling prices for a product or service fall within a reasonably narrow pricing range, generally evidenced by approximately 80% of such historical stand-alone transactions falling within plus or minus 15% of the median rates. In determining ESP, we apply significant judgment as we weigh a variety of factors, based on the facts and circumstances of the arrangement. We typically arrive at an ESP for a product or service that is not sold separately by considering company specific factors such as geographies, competitive landscape, internal costs, gross margin objectives, pricing practices used to establish bundled pricing, and existing portfolio pricing and discounting. There were no material impacts

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

during the quarter nor do we currently expect a material impact in future periods from changes in VSOE, TPE, or ESP.

In terms of the timing and pattern of revenue recognition, the new accounting guidance for revenue recognition is not expected to have a significant effect on net sales in subsequent periods after the initial adoption when applied to multiple element arrangements based on current go-to-market strategies due to the existence of VSOE across most of our product and service offerings. However, we expect that this new accounting guidance will facilitate our efforts to optimize our offerings due to better alignment between the economics of an arrangement and the accounting. This may lead to us engaging in new go-to-market practices in the future. In particular, we expect that the new accounting standards will enable us to better integrate products and services without VSOE into existing offerings and solutions. As these go-to-market strategies evolve, we may modify our pricing practices in the future, which could result in changes in selling prices, including both VSOE and ESP. As a result, our future revenue recognition for multiple

Table of Contents

element arrangements could differ materially from the results in the current period. We are currently unable to determine the impact that the newly adopted accounting guidance could have on our revenue as these go-to-market strategies evolve.

Revenue deferrals relate to the timing of revenue recognition for specific transactions based on financing arrangements, service, support, and other factors. Financing arrangements may include sales-type, direct-financing, and operating leases, loans, and guarantees of third-party financing. Our total deferred revenue for products was \$3.1 billion and \$2.9 billion as of October 24, 2009 and July 25, 2009, respectively. Technical support services revenue is deferred and recognized ratably over the period during which the services are to be performed, which typically is from one to three years. Advanced services revenue is recognized upon delivery or completion of performance. Our total deferred revenue for services was \$6.2 billion and \$6.5 billion as of October 24, 2009 and July 25, 2009, respectively.

We make sales to distributors and retail partners and recognize revenue based on a sell-through method using information provided by them. Our distributors and retail partners participate in various cooperative marketing and other programs, and we maintain estimated accruals and allowances for these programs. If actual credits received by our distributors and retail partners under these programs were to deviate significantly from our estimates, which are based on historical experience, our revenue could be adversely affected.

Allowances for Receivables and Sales Returns

The allowances for receivables were as follows (in millions, except percentages):

	October 24, 2009	July 25, 2009
Allowance for doubtful accounts	\$ 216	\$ 216
<i>Percentage of gross accounts receivable</i>	<i>6.4 %</i>	<i>6.4 %</i>
Allowance for lease receivables	\$ 204	\$ 213
<i>Percentage of gross lease receivables</i>	<i>9.5 %</i>	<i>10.7 %</i>
Allowance for loan receivables	\$ 114	\$ 88
<i>Percentage of gross loan receivables</i>	<i>9.9 %</i>	<i>10.2 %</i>

The allowances are based on our assessment of the collectibility of customer accounts. We regularly review the adequacy of these allowances by considering factors such as historical experience, credit quality, age of the receivable balances, and economic conditions that may affect a customer's ability to pay. In addition, we perform credit reviews and statistical portfolio analysis to assess the credit quality of our receivables. We also consider the concentration of receivables outstanding with a particular customer in assessing the adequacy of our allowances. If a major customer's creditworthiness deteriorates, or if actual defaults are higher than our historical experience, or if other circumstances arise, our estimates of the recoverability of amounts due to us could be overstated, and additional allowances could be required, which could have an adverse impact on our revenue.

A reserve for future sales returns is established based on historical trends in product return rates. The reserve for future sales returns as of October 24, 2009 and July 25, 2009 was \$66 million and \$75 million, respectively, and was recorded as a reduction of our accounts receivable. If the actual future returns were to deviate from the historical data on which the reserve had been established, our revenue could be adversely affected.

Inventory Valuation and Liability for Purchase Commitments with Contract Manufacturers and Suppliers

Our inventory balance was \$1.1 billion as of October 24, 2009 and July 25, 2009. Inventory is written down based on excess and obsolete inventories determined primarily by future demand forecasts. Inventory write-downs are measured as the difference between the cost of the inventory and market, based upon assumptions about future demand, and are charged to the provision for inventory, which is a component of our cost of sales. At the point of the loss recognition, a new, lower cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.

We record a liability for firm, noncancelable, and unconditional purchase commitments with contract manufacturers and suppliers for quantities in excess of our future demand forecasts consistent with the valuation of our excess and obsolete inventory. As of October 24, 2009, the liability for these purchase commitments was \$168 million, compared with \$175 million as of July 25, 2009, and was included in other current liabilities.

Table of Contents

Our provision for inventory was \$19 million and \$8 million for the first quarter of fiscal 2010 and 2009, respectively. The provision for the liability related to purchase commitments with contract manufacturers and suppliers was \$7 million and \$19 million for the first quarter of fiscal 2010 and 2009, respectively. If there were to be a sudden and significant decrease in demand for our products, or if there were a higher incidence of inventory obsolescence because of rapidly changing technology and customer requirements, we could be required to increase our inventory write-downs and our liability for purchase commitments with contract manufacturers and suppliers and gross margin could be adversely affected. In light of the uncertainties in the macroeconomic conditions in the first quarter of fiscal 2010 and the resulting potential for changes in future demand forecasts, we continued to regularly evaluate the exposure for inventory write-downs and the adequacy of our liability for purchase commitments. Inventory and supply chain management remain areas of focus as we balance the need to maintain supply chain flexibility to help ensure competitive lead times with the risk of inventory obsolescence.

Warranty Costs

The liability for product warranties, included in other current liabilities, was \$325 million as of October 24, 2009, compared with \$321 million as of July 25, 2009. See Note 11 to the Consolidated Financial Statements. Our products are generally covered by a warranty for periods ranging from 90 days to five years, and for some products we provide a limited lifetime warranty. We accrue for warranty costs as part of our cost of sales based on associated material costs, technical support labor costs, and associated overhead. Material cost is estimated based primarily upon historical trends in the volume of product returns within the warranty period and the cost to repair or replace the equipment. Technical support labor cost is estimated based primarily upon historical trends in the rate of customer cases and the cost to support the customer cases within the warranty period. Overhead cost is applied based on estimated time to support warranty activities.

The provision for product warranties issued during the first quarter of fiscal 2010 and 2009 was \$108 million and \$101 million, respectively. If we experience an increase in warranty claims compared with our historical experience, or if the cost of servicing warranty claims is greater than expected, our gross margin could be adversely affected.

Share-Based Compensation Expense

Total share-based compensation expense for the three months ended October 24, 2009 and October 25, 2008 was \$321 million and \$304 million, respectively. The determination of fair value of share-based payment awards on the date of grant using an option-pricing model is affected by our stock price as well as assumptions regarding a number of highly complex and subjective variables. For employee stock options and employee stock purchase rights, these variables include, but are not limited to, the expected stock price volatility over the term of the awards, risk-free interest rate, and expected dividends. For employee stock options, we used the implied volatility for two-year traded options on our stock as the expected volatility assumption required in the lattice-binomial model. For employee stock purchase rights, we used the implied volatility for traded options (with lives corresponding to the expected life of the employee stock purchase rights) on our stock. The selection of the implied volatility approach was based upon the availability of actively traded options on our stock and our assessment that implied volatility is more representative of future stock price trends than historical volatility. The valuation of employee stock options is also impacted by kurtosis, and skewness, which are technical measures of the distribution of stock price returns, and the actual and projected employee stock option exercise behaviors.

Because share-based compensation expense recognized in the Consolidated Statements of Operations is based on awards ultimately expected to vest, it has been reduced for forfeitures. If factors change and we employ different assumptions in the application of our option-pricing model in future periods or if we experience different forfeiture rates, the compensation expense that is derived may differ significantly from what we have recorded in the current period.

Fair Value Measurements

Our fixed income and publicly traded equity securities, collectively, are reflected in the Consolidated Balance Sheets at a fair value of \$30.6 billion as of October 24, 2009, compared with \$29.3 billion as of July 25, 2009. Our fixed income investment portfolio consists primarily of high-quality investment grade securities and as of October 24, 2009 had a weighted-average credit rating exceeding AA. See Note 7 to the Consolidated Financial Statements.

As described more fully in Note 8 to the Consolidated Financial Statements, a valuation hierarchy was established based on the level of independent, objective evidence available regarding the value of the investments. It encompasses three classes of investments: Level 1 consists of securities for which there are quoted prices in active markets for identical securities; Level 2 consists of securities for which observable inputs other than Level 1 inputs are used, such as prices for similar securities in active markets or for identical

Table of Contents

securities in less active markets and model-derived valuations for which the variables are derived from, or corroborated by, observable market data; and Level 3 consists of securities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value.

Our Level 2 securities are valued using quoted market prices for similar instruments, nonbinding market prices that are corroborated by observable market data, or discounted cash flow techniques in limited circumstances. We use inputs such as actual trade data, benchmark yields, broker/dealer quotes, and other similar data, which are obtained from independent pricing vendors, quoted market prices, or other sources to determine the ultimate fair value of our assets and liabilities. We use such pricing data as the primary input, to which we have not made any material adjustments during the periods presented, to make our assessments and determinations as to the ultimate valuation of our investment portfolio. We are ultimately responsible for the financial statements and underlying estimates.

The inputs and fair value are reviewed for reasonableness, may be further validated by comparison to publicly available information and could be adjusted based on market indices or other information that management deems material to their estimate of fair value. In the current market environment, the assessment of fair value can be difficult and subjective. However, given the relative reliability of the inputs we use to value our investment portfolio, and because substantially all of our valuation inputs are obtained using quoted market prices for similar or identical assets, we do not believe that the nature of estimates and assumptions affected by levels of subjectivity and judgment was material to the valuation of the investment portfolio as of October 24, 2009. Level 3 assets do not represent a significant portion of our total investment portfolio as of October 24, 2009.

Other-Than-Temporary Impairments

We recognize an impairment charge when the declines in the fair values of our fixed income or publicly traded equity securities below their cost basis are judged to be other than temporary. The ultimate value realized on these securities, to the extent unhedged, is subject to market price volatility until they are sold.

Effective at the beginning of the fourth quarter of fiscal 2009, we were required to evaluate our fixed income securities for other-than-temporary impairments subject to new accounting guidance. Pursuant to this accounting guidance, if the fair value of a debt security is less than its amortized cost, we assess whether the impairment is other than temporary. An impairment is considered other than temporary if (i) we have the intent to sell the security, (ii) it is more likely than not that we will be required to sell the security before recovery of its entire amortized cost basis, or (iii) we do not expect to recover the entire amortized cost basis of the security. If an impairment is considered other than temporary based on (i) or (ii) described above, the entire difference between the amortized cost basis and the fair value of the security is recognized in earnings. If an impairment is considered other than temporary based on condition (iii), the amount representing credit losses, defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis of the debt security, will be recognized in earnings and the amount relating to all other factors will be recognized in other comprehensive income (OCI). In estimating the amount and timing of cash flows expected to be collected, we consider all available information including past events, current conditions, the remaining payment terms of the security, the financial condition of the issuer, expected defaults, and the value of underlying collateral.

For publicly traded equity securities, we consider various factors in determining whether we should recognize an impairment charge, including the length of time and extent to which the fair value has been less than our cost basis, the financial condition and near-term prospects of the issuer, and our intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value.

There were no impairment charges on investments in fixed income securities and publicly traded equity securities that were recognized in earnings in the first quarter of fiscal 2010, while such impairment charges for the first quarter of 2009 were \$200 million. Our ongoing consideration of all the factors described above could result in additional impairment charges in the future, which could adversely affect our net income.

We also have investments in privately held companies, some of which are in the startup or development stages. As of October 24, 2009, our investments in privately held companies were \$728 million, compared with \$709 million as of July 25, 2009, and were included in other assets. See Note 5 to the Consolidated Financial Statements. We monitor these investments for events or circumstances indicative of potential impairment and will make appropriate reductions in carrying values if we determine that an impairment charge is required, based primarily on the financial condition and near-term prospects of these companies. These investments are inherently risky because the markets for the technologies or products these companies are developing are typically in the early stages and may never materialize. Our impairment charges on investments in privately held companies were \$10 million and \$23 million during the first quarters of fiscal 2010 and 2009, respectively.

Table of Contents*Goodwill Impairments*

Our methodology for allocating the purchase price relating to purchase acquisitions is determined through established valuation techniques. Goodwill is measured as a residual as of the acquisition date, which in most cases, results in measuring goodwill as an excess of the purchase consideration transferred plus the fair value of any noncontrolling interest in the acquiree over the fair value of net assets acquired, including any contingent consideration. We perform goodwill impairment tests on an annual basis in the fourth fiscal quarter and between annual tests in certain circumstances for each reporting unit. Effective in fiscal 2010, the assessment of fair value for goodwill and other long-lived intangible assets is based on factors that market participants would use in an orderly transaction in accordance with the new accounting guidance for the fair value measurement of nonfinancial assets.

The goodwill recorded in the Consolidated Balance Sheets as of October 24, 2009 and July 25, 2009 was \$12.9 billion. In response to changes in industry and market conditions, we could be required to strategically realign our resources and consider restructuring, disposing of, or otherwise exiting businesses, which could result in an impairment of goodwill. There was no impairment of goodwill in the first quarter of fiscal 2010 and 2009, respectively.

Income Taxes

We are subject to income taxes in the United States and numerous foreign jurisdictions. Our effective tax rates differ from the statutory rate primarily due to the tax impact of state taxes, foreign operations, research and development (R&D) tax credits, tax audit settlements, nondeductible compensation, international realignments, and transfer pricing adjustments. Our effective tax rate was 20.2% and 15.5% in the first quarter of fiscal 2010 and fiscal 2009, respectively.

Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes. Although we believe our reserves are reasonable, no assurance can be given that the final tax outcome of these matters will not be different from that which is reflected in our historical income tax provisions and accruals. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest.

Significant judgment is also required in determining any valuation allowance recorded against deferred tax assets. In assessing the need for a valuation allowance, we consider all available evidence, including past operating results, estimates of future taxable income, and the feasibility of tax planning strategies. In the event that we change our determination as to the amount of deferred tax assets that can be realized, we will adjust our valuation allowance with a corresponding impact to the provision for income taxes in the period in which such determination is made.

Our provision for income taxes is subject to volatility and could be adversely impacted by earnings being lower than anticipated in countries that have lower tax rates and higher than anticipated in countries that have higher tax rates; by changes in the valuation of our deferred tax assets and liabilities; by expiration of or lapses in the R&D tax credit laws; by transfer pricing adjustments including the effect of acquisitions on our intercompany R&D cost sharing arrangement and legal structure; by tax effects of nondeductible compensation; by tax costs related to intercompany realignments; by changes in accounting principles; or by changes in tax laws and regulations including possible U.S. changes to the taxation of earnings of our foreign subsidiaries, the deductibility of expenses attributable to foreign income, or the foreign tax credit rules. Significant judgment is required to determine the recognition and measurement attributes prescribed in the accounting guidance for uncertainty in income taxes. The accounting guidance for uncertainty in income taxes applies to all income tax positions, including the potential recovery of previously paid taxes, which if settled unfavorably could adversely impact our provision for income taxes or additional paid-in capital. Further, as a result of certain of our ongoing employment and capital investment actions and commitments, our income in certain countries is subject to reduced tax rates and in some cases is wholly exempt from tax. Our failure to meet these commitments could adversely impact our provision for income taxes. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these continuous examinations will not have an adverse effect on our operating results and financial condition.

Loss Contingencies

We are subject to the possibility of various losses arising in the ordinary course of business. We consider the likelihood of loss or impairment of an asset or the incurrence of a liability, as well as our ability to reasonably estimate the amount of loss, in determining

Table of Contents

loss contingencies. An estimated loss contingency is accrued when it is probable that an asset has been impaired or a liability has been incurred and the amount of loss can be reasonably estimated. We regularly evaluate current information available to us to determine whether such accruals should be adjusted and whether new accruals are required.

Third parties, including customers, have in the past and may in the future assert claims or initiate litigation related to exclusive patent, copyright, trademark, and other intellectual property rights to technologies and related standards that are relevant to us. These assertions have increased over time as a result of our growth and the general increase in the pace of patent claims assertions, particularly in the United States. If any infringement or other intellectual property claim made against us by any third party is successful, or if we fail to develop non-infringing technology or license the proprietary rights on commercially reasonable terms and conditions, our business, operating results, and financial condition could be materially and adversely affected.

Table of Contents*Net Sales*

The following table presents the breakdown of net sales between product and service revenue (in millions, except percentages):

	October 24, 2009	October 25, 2008	Three Months Ended Variance in Dollars	Variance in Percent
Net sales:				
Product	\$ 7,200	\$ 8,635	\$ (1,435)	(16.6)%
Service	1,821	1,696	125	7.4 %
Total	\$ 9,021	\$ 10,331	\$ (1,310)	(12.7)%

We manage our business primarily on a geographic basis, organized into five geographic theaters. Our net sales, which include product and service revenue, for each theater are summarized in the following table (in millions, except percentages):

	October 24, 2009	October 25, 2008	Three Months Ended Variance in Dollars	Variance in Percent
Net sales:				
United States and Canada	\$ 4,990	\$ 5,549	\$ (559)	(10.1)%
<i>Percentage of net sales</i>	<i>55.3%</i>	<i>53.7%</i>		
European Markets	1,822	2,153	(331)	(15.4)%
<i>Percentage of net sales</i>	<i>20.2%</i>	<i>20.8%</i>		
Emerging Markets	863	1,229	(366)	(29.8)%
<i>Percentage of net sales</i>	<i>9.6%</i>	<i>11.9%</i>		
Asia Pacific	959	1,022	(63)	(6.2)%
<i>Percentage of net sales</i>	<i>10.6%</i>	<i>9.9%</i>		
Japan	387	378	9	2.4 %
<i>Percentage of net sales</i>	<i>4.3%</i>	<i>3.7%</i>		
Total	\$ 9,021	\$ 10,331	\$ (1,310)	(12.7)%

For the first quarter of fiscal 2010, net sales decreased across our four largest geographic theaters compared with the first quarter of fiscal 2009. Our year-over-year decline in net sales was due in large part to the relative strength of the corresponding period in fiscal 2009, as the decline in our business due to the economic downturn was not fully reflected in that quarter. Our net sales in the first quarter of 2010 also included a benefit of approximately \$50 million as a result of an adoption of new accounting guidance related to revenue recognition. See Note 2 to the Consolidated Financial Statements for more details on the adoption of this accounting guidance. Regarding our customer markets, net sales decreased on a year-over-year basis across all customer markets with the exception of the public sector.

We conduct business globally in numerous currencies. The direct effect of foreign currency fluctuations on sales has not been material because our sales are primarily denominated in U.S. dollars. However, if the U.S. dollar strengthens relative to other currencies, such strengthening could have an indirect effect on our sales to the extent it raises the cost of our products to non-U.S. customers and thereby reduces demand. A weaker U.S. dollar could have the opposite effect. However, the precise indirect effect of currency fluctuations is difficult to measure or predict because our sales are influenced by many factors in addition to the impact of such currency fluctuations.

Net sales by theater in a particular period may be significantly impacted by several factors related to revenue recognition, including large and sporadic purchases by customers particularly in our service provider market; the complexity of transactions such as multiple element arrangements; the mix of financings provided to our channel partners and end-user customers; and final acceptance of the product, system, or solution, among other factors.

Table of Contents***Net Product Sales by Theater***

The following table presents the breakdown of net product sales by theater (in millions, except percentages):

	October 24, 2009	October 25, 2008	Three Months Ended Variance in Dollars	Variance in Percent
Net product sales:				
United States and Canada	\$ 3,832	\$ 4,447	\$ (615)	(13.8)%
<i>Percentage of net product sales</i>	<i>53.2%</i>	<i>51.5%</i>		
European Markets	1,532	1,879	(347)	(18.5)%
<i>Percentage of net product sales</i>	<i>21.3%</i>	<i>21.8%</i>		
Emerging Markets	708	1,092	(384)	(35.2)%
<i>Percentage of net product sales</i>	<i>9.8%</i>	<i>12.6%</i>		
Asia Pacific	812	896	(84)	(9.4)%
<i>Percentage of net product sales</i>	<i>11.3%</i>	<i>10.4%</i>		
Japan	316	321	(5)	(1.6)%
<i>Percentage of net product sales</i>	<i>4.4%</i>	<i>3.7%</i>		
Total	\$ 7,200	\$ 8,635	\$ (1,435)	(16.6)%

United States and Canada

Net product sales in the United States and Canada theater for the first quarter of fiscal 2010 decreased compared with the corresponding period of fiscal 2009. The decrease was primarily a result of lower sales in our service provider, enterprise, and commercial markets compared with the corresponding period of fiscal 2009. The lower sales in our service provider market during the first quarter of fiscal 2010 was primarily due to lower spending by a few larger customers, and the lower sales in our commercial market was primarily due to the cautious spending by these customers. While year-over-year sales to enterprise customers in this theater decreased, we did experience an increase in business momentum within the enterprise market, including the public sector, in the first quarter of fiscal 2010, particularly with respect to the larger global enterprise customers within this theater.

We experienced a year-over-year increase in our product sales to the public sector in this theater compared with the first quarter of fiscal 2009. The increase in the public sector was driven by the increase in product sales to state and local governments partially offset by decreased product sales to the U.S. federal government.

European Markets

Net product sales in the European Markets theater during the first quarter of fiscal 2010 decreased compared with the corresponding period of fiscal 2009. We experienced a decline in net product sales across all our customer markets in this theater, with the public sector market experiencing the lowest decline in percentage terms. Net product sales also decreased in most of the large countries in this theater, including the United Kingdom and Germany, primarily due to challenging economic conditions in those countries during the first quarter of fiscal 2010.

Emerging Markets

During the first quarter of fiscal 2010, net product sales in the Emerging Markets theater decreased across all of our customer markets compared with the first quarter of fiscal 2009. The decrease was attributable to weakness in many of the larger countries in this theater, and in particular Mexico, Brazil, and Russia. These decreases were partially offset by positive year-over-year growth in South Africa and Saudi Arabia. Certain of our customers in the Emerging Markets theater tend to make large and sporadic purchases, and the net sales related to these transactions may also be affected by the timing of revenue recognition. Further, some customers may continue to require greater levels of financing arrangements, service, and support in future periods which may also impact the timing of recognition of the revenue for this theater.

Asia Pacific

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

The decrease in net product sales in the Asia Pacific theater in the first quarter of fiscal 2010, compared with the corresponding period of fiscal 2009, was attributable to a decline in sales across most customer markets within this theater except for enterprise market, which was flat year over year. We also experienced weakness in net product sales in significant countries to us such as China and India during the first quarter of fiscal 2010, while net product sales in Australia were relatively flat on a year-over-year basis.

Table of Contents*Japan*

Net product sales in the Japan theater decreased slightly during the first quarter of fiscal 2010 compared with the first quarter of fiscal 2009 primarily due to decrease in net product sales in service provider and commercial markets, while our enterprise market showed growth year over year.

Net Product Sales by Groups of Similar Products

In addition to the primary view on a geographic basis, we also prepare financial information related to groups of similar products and customer markets for various purposes. The following table presents net sales for groups of similar products (in millions, except percentages):

	Three Months Ended		Variance in Dollars	Variance in Percent
	October 24, 2009	October 25, 2008		
Net product sales:				
Routers	\$ 1,574	\$ 1,899	\$ (325)	(17.1)%
<i>Percentage of net product sales</i>	<i>21.9%</i>	<i>22.0%</i>		
Switches	2,872	3,631	(759)	(20.9)%
<i>Percentage of net product sales</i>	<i>39.9%</i>	<i>42.0%</i>		
Advanced technologies	2,273	2,666	(393)	(14.7)%
<i>Percentage of net product sales</i>	<i>31.6%</i>	<i>30.9%</i>		
Other	481	439	42	9.6 %
<i>Percentage of net product sales</i>	<i>6.6%</i>	<i>5.1%</i>		
Total	\$ 7,200	\$ 8,635	\$ (1,435)	(16.6)%

Routers

We categorize our routers primarily as high-end, midrange, and low-end routers. Our sales of routers decreased in the first quarter of fiscal 2010, across each of these categories with the decline in sales of high-end routers of approximately \$175 million representing the most significant decrease in dollar terms. Within the high-end router category, the decline was driven by the lower sales of Cisco 12000 Series Routers, partially offset by an increase in sales of Cisco CRS-1 Carrier Routing Systems, and Cisco ASR 1000 Series Aggregation Services Routers. Because our high-end routers are sold primarily to service providers, our high-end router sales during the first quarter of fiscal 2010 were adversely impacted by, among other factors, a year-over-year decline in capital expenditures in the global service provider market, and the tendency of service providers to make large and sporadic purchases. Our decline in sales of low-end routers of approximately \$75 million and midrange routers of approximately \$65 million was primarily due to a decline in sales of our integrated services routers.

Switches

The decrease in net product sales related to switches in the first quarter of fiscal 2010, compared with the first quarter of fiscal 2009, was due to lower sales of our local-area network (LAN) fixed-configuration switches, which decreased by approximately \$410 million or 22%, and lower sales of modular switches, which decreased by approximately \$340 million or 19%. While we had a year-over-year decline in sales of modular switches, we experienced an 11% sequential increase in sales of modular switches, consistent with the momentum we experienced in the enterprise market during the first quarter of fiscal 2010.

The decrease in sales of LAN fixed-configuration switches was primarily a result of lower sales of Cisco Catalyst 3750, 3560, and 2960 Series Switches, partially offset by the increased sales of Cisco Nexus 5000 and 2000 Series Switches. The decrease in sales of modular switches was primarily due to the decreased sales of Cisco Catalyst 6000 and 4500 Series Switches, partially offset by increased sales of Cisco Nexus 7000 Series Switches.

Advanced Technologies

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

The decrease in net product sales of advanced technologies in the first quarter of fiscal 2010 compared with the first quarter of fiscal 2009 was due to the following:

Sales of unified communications products decreased by approximately \$80 million, primarily due to lower sales of IP phones and associated software, partially offset by higher sales of our web-based collaborative offerings.

Table of Contents

Sales of video systems decreased by approximately \$185 million, primarily due to decreased sales of digital set-top boxes.

Sales of security products decreased by approximately \$40 million. Our decreased sales of security products were a result of the lower sales of module and line-cards related to our routers and LAN switches, as well as lower sales of security appliance products, partially offset by increased sales of our web and email security products.

Sales of networked home products decreased by approximately \$50 million. The decrease in sales of networked home products was primarily due to lower sales of wireless routers for the connected home, and lower sales of adapters.

Sales of storage area networking products decreased by approximately \$25 million, which was primarily due to lower sales of our Cisco MDS 9000 product line.

Sales of application networking services decreased by approximately \$35 million. The decrease was primarily related to lower customer demand in the first quarter of fiscal 2010 for data center application optimization solutions.

Sales of wireless LAN products increased by approximately \$20 million, which was primarily due to the adoption of and migration to the Cisco Unified Wireless Network architecture.

Other Product Revenue

The increase in other product revenue in the first quarter of fiscal 2010 compared with the corresponding period of fiscal 2009 was primarily due to approximately \$50 million in sales of Flip video cameras from the acquisition of Pure Digital late in fiscal 2009, and increased sales of Cisco TelePresence systems within emerging technologies. Sales of the recently introduced unified computing systems also contributed to the increase. These increases in sales within other product revenue were partially offset by decreased sales of cable, optical, and service provider voice products.

Net Service Revenue

Net service revenue increased across all of our geographic theaters in the first quarter of fiscal 2010, led by international growth. Service revenue increased by 5% in the United States and Canada theater, 6% in the European Markets theater, 13% in the Emerging Markets theater, 17% in the Asia Pacific theater, and 25% in the Japan theater, compared with the first quarter of fiscal 2009. Higher revenue from technical support service contracts and increased revenue from advanced services relating to consulting services for specific customer networking needs contributed to the growth in net service revenue in the first quarter of fiscal 2010 compared with the corresponding period in fiscal 2009. The increase in our technical support revenue was due to a combination of renewals, the amortization of existing technical support service contracts including multiyear service contracts initiated in prior years, and initiations associated with recent product sales, which have led to a larger installed base of our equipment being serviced.

Gross Margin

The following table presents the gross margin for products and services (in millions, except percentages):

	Three Months Ended			
	Amount		Percentage	
	October 24, 2009	October 25, 2008	October 24, 2009	October 25, 2008
Gross margin:				
Product	\$ 4,714	\$ 5,654	65.5%	65.5%
Service	1,174	1,027	64.5%	60.6%

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Total	\$ 5,888	\$ 6,681	65.3%	64.7%
-------	----------	----------	-------	-------

Table of Contents*Product Gross Margin*

The following table summarizes the key factors that contributed to the flat year-over-year product gross margin for the first quarter of fiscal 2010:

	Product Gross Margin Percentage
First quarter of fiscal 2009	65.5 %
Sales discounts, rebates, and product pricing	(1.6)%
Shipment volume, net of certain variable costs	(0.6)%
Mix of products sold	(0.1)%
Overall manufacturing costs	2.4 %
Other ⁽¹⁾	(0.1)%
First quarter of fiscal 2010	65.5 %

⁽¹⁾ Includes the net effects of amortization of acquisition-related intangible assets and share-based compensation expense. Product gross margin for the first quarter of fiscal 2010 was flat compared with the first quarter of fiscal 2009. The unfavorable impacts attributable to higher sales discounts, higher rebates, lower product pricing, and lower shipment volume, were offset by the favorable impact of lower overall manufacturing costs. Lower manufacturing costs were primarily driven by strong operational efficiency in our manufacturing operations, value engineering and a reduction in other manufacturing-related costs. Value engineering is the process by which production costs are reduced through component redesign, board configuration, test processes, and transformation processes.

Our gross margins could be impacted by economic downturns or uncertain economic conditions as well as our movement into market adjacencies such as the consumer market through sales of Flip video cameras, as well as increased sales of unified computing products. Our margins may also be impacted by the geographic mix of our revenue. If any of the above factors that impact our gross margins are adversely affected in future periods, our product and service gross margins could decline.

Service Gross Margin

Our service gross margin percentage increased in the first quarter of fiscal 2010 compared with the corresponding period of fiscal 2009, primarily due to higher margins for both technical support and advanced services. The higher margins for both types of services were favorably impacted by higher volume. The higher margins for technical support services also benefited from certain cost-control initiatives that have helped to limit costs. Our service gross margin normally experiences some fluctuations due to various factors such as the timing of technical support service contract initiations and renewals, our strategic investments in headcount, and resources to support this business. Other factors include the mix of service offerings, as the gross margin from our advanced services is typically lower than the gross margin from technical support services. Our continued focus on providing comprehensive support to our customers' networking devices, applications, and infrastructures, or other reasons, may cause advanced services to increase to a higher proportion of total service revenue.

Table of Contents

The following table presents the gross margin for each theater (in millions, except percentages):

	Amount		Three Months Ended	
	October 24, 2009	October 25, 2008	October 24, 2009	October 25, 2008
Gross margin:				
United States and Canada	\$ 3,298	\$ 3,679	66.1%	66.3%
European Markets	1,244	1,415	68.3%	65.7%
Emerging Markets	542	780	62.8%	63.5%
Asia Pacific	612	649	63.8%	63.5%
Japan	281	254	72.6%	67.2%
Theater Total	5,977	6,777	66.3%	65.6%
Unallocated corporate items ⁽¹⁾	(89)	(96)		
Total	\$ 5,888	\$ 6,681	65.3%	64.7%

⁽¹⁾ The unallocated corporate items include the effects of amortization of acquisition-related intangible assets and share-based compensation expense. We do not allocate these items to gross margin for each theater because management does not include the information in measuring the performance of the operating segments.

In the first quarter of fiscal 2010, the gross margin percentage increased in our European Markets, Asia Pacific and Japan theaters. For our European Markets and Asia Pacific theaters, the increases in their respective gross margin percentage were primarily due to the favorable impacts of improved service margins and lower overall manufacturing costs, partially offset by the effects of lower shipment volume, and for our Asia Pacific theater also an unfavorable product mix. The increase in gross margin percentage for our Japan theater, in the first quarter of fiscal 2010 was driven by improved service margins, lower overall manufacturing costs and a favorable product mix. The decrease in the gross margin percentage for the Emerging Markets theater in the first quarter of fiscal 2010 was primarily a result of lower shipment volume and an unfavorable mix, partially offset by lower overall manufacturing costs and improved service margins. The gross margin percentage for the United States and Canada theater decreased slightly in the first quarter of fiscal 2010.

The gross margin for each theater is derived from information from our internal management system. The gross margin percentage for a particular theater may fluctuate and period-to-period changes in such percentages may or may not be indicative of a trend for that theater.

Factors That May Impact Net Sales and Gross Margin

Net product sales may continue to be affected by factors including the recent global economic downturn and related market uncertainty, which so far have resulted in reduced or cautious spending in our global enterprise, service provider, and commercial markets; changes in the geopolitical environment and global economic conditions; competition, including price-focused competitors from Asia, especially from China; new product introductions; sales cycles and product implementation cycles; changes in the mix of our customers between service provider and enterprise markets; changes in the mix of direct sales and indirect sales; variations in sales channels; and final acceptance criteria of the product, system, or solution as specified by the customer. Sales to the service provider market have been and may be in the future characterized by large and sporadic purchases, especially relating to our router sales and sales of certain advanced technologies. In addition, service provider customers typically have longer implementation cycles; require a broader range of services, including network design services; and often have acceptance provisions that can lead to a delay in revenue recognition. Certain customers in the Emerging Markets theater also tend to make large and sporadic purchases, and the net sales related to these transactions may similarly be affected by the timing of revenue recognition. As we focus on new market opportunities, customers may require greater levels of financing arrangements, service, and support, especially in the Emerging Markets theater, which may result in a delay in the timing of revenue recognition. To improve customer satisfaction, we continue to focus on managing our manufacturing lead-time performance, which may result in corresponding reductions in order backlog. A decline in backlog levels could result in more variability and less predictability in our quarter-to-quarter net sales and operating results.

Net product sales may also be adversely affected by fluctuations in demand for our products, especially with respect to telecommunications service providers and Internet businesses, whether or not driven by any slowdown in capital expenditures in the service provider market; price

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

and product competition in the communications and information technology industry; introduction and market acceptance of new technologies and products; adoption of new networking standards; and financial difficulties experienced

Table of Contents

by our customers. We may, from time to time, experience manufacturing issues that create a delay in our suppliers' ability to provide specific components, resulting in delayed shipments. To the extent that manufacturing issues and any related component shortages result in delayed shipments in the future, and particularly in periods when we and our suppliers are operating at higher levels of capacity, it is possible that revenue for a quarter could be adversely affected if such matters are not remediated within the same quarter. For additional factors that may impact net product sales, see Part II, Item 1A. Risk Factors. Our distributors and retail partners participate in various cooperative marketing and other programs. In addition, increasing sales to our distributors and retail partners generally results in greater difficulty in forecasting the mix of our products and, to a certain degree, the timing of orders from our customers. We recognize revenue for sales to our distributors and retail partners based on a sell-through method using information provided by them, and we maintain estimated accruals and allowances for all cooperative marketing and other programs.

Product gross margin may be adversely affected in the future by changes in the mix of products sold, including further periods of increased growth of some of our lower margin products; introduction of new products, including products with price-performance advantages; our ability to reduce production costs; entry into new markets, including markets with different pricing structures and cost structures, as a result of internal development or through acquisitions; changes in distribution channels; price competition, including competitors from Asia, especially from China; changes in geographic mix of our product sales; the timing of revenue recognition and revenue deferrals; sales discounts; increases in material or labor costs; excess inventory and obsolescence charges; warranty costs; changes in shipment volume; loss of cost savings due to changes in component pricing; effects of value engineering; inventory holding charges; and the extent to which we successfully execute on our strategy and operating plans. Service gross margin may be impacted by various factors such as the change in mix between technical support services and advanced services, the timing of technical support service contract initiations and renewals, and the timing of our strategic investments in headcount and resources to support this business.

Research and Development (R&D), Sales and Marketing, and General and Administrative (G&A) Expenses

R&D, sales and marketing, and G&A expenses are summarized in the following table (in millions, except percentages):

	Three Months Ended			
	October 24, 2009	October 25, 2008	Variance in Dollars	Variance in Percent
Research and development	\$ 1,224	\$ 1,406	\$ (182)	(12.9)%
<i>Percentage of net sales</i>	13.6%	13.6%		
Sales and marketing	1,995	2,283	(288)	(12.6)%
<i>Percentage of net sales</i>	22.1%	22.1%		
General and administrative	440	395	45	11.4 %
<i>Percentage of net sales</i>	4.9%	3.8%		
Total	\$ 3,659	\$ 4,084	\$ (425)	(10.4)%
<i>Percentage of net sales</i>	40.6%	39.5%		
<i>R&D Expenses</i>				

R&D expenses decreased in the first quarter of fiscal 2010 compared with the first quarter of fiscal 2009 primarily due to lower acquisition-related compensation expenses, lower headcount-related expenses, and lower discretionary expenses. The lower acquisition-related compensation expense during the first quarter of fiscal 2010 was due to the achievement of certain acquisition-related milestones in the first quarter of fiscal 2009. The decrease in headcount-related expenses was partially a result of the enhanced early retirement program and limited workforce reduction implemented in the fourth quarter of fiscal 2009, and our mandatory paid-time-off program implemented for the first quarter of fiscal 2010 in certain locations as part of our continued expense management initiatives. All of our R&D costs are expensed as incurred, and we continue to invest in R&D in order to bring a broad range of products to market in a timely fashion. If we believe that we are unable to enter a particular market in a timely manner with internally-developed products, we may purchase or license technology from other businesses, partner, or acquire businesses as an alternative to internal R&D.

Sales and Marketing Expenses

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Sales and marketing expenses for the first quarter of fiscal 2010 decreased compared with the first quarter of fiscal 2009 primarily due to a decrease in sales expenses of approximately \$235 million. Marketing expense also decreased during the first quarter of fiscal 2010 compared with the corresponding period in fiscal 2009. The decreases in both sales and marketing expenses were primarily

Table of Contents

due to lower discretionary expenses for trade shows, travel, and professional, as well as project-related services. A decrease in headcount-related expenses as a result of the mandatory paid-time-off program in certain locations and lower overall headcount also contributed to the decrease in both sales and marketing expenses when compared with the corresponding period in fiscal 2009.

G&A Expenses

G&A expenses for the first quarter of fiscal 2010 increased compared with the first quarter of fiscal 2009, primarily due to increased share-based and other compensation expenses and additional non-income-based tax expenses.

Effect of Foreign Currency

Foreign currency fluctuations, net of hedging, decreased combined R&D, sales and marketing, and G&A expenses by approximately \$58 million, or approximately 1.4%, in the first quarter of fiscal 2010 compared with the first quarter of fiscal 2009.

Headcount

Our headcount decreased by approximately 1,800 employees in the first quarter of fiscal 2010, which was primarily due to the effect of our limited workforce reductions and the enhanced early retirement program implemented during the fourth quarter of fiscal 2009, along with our hiring constraints. Our headcount may slowly increase in the future in anticipation of more positive market conditions, and our hiring will be focused on productivity improvements and movement into new market adjacencies.

Share-Based Compensation Expense

The following table summarizes share-based compensation expense (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Cost of sales - product	\$ 12	\$ 11
Cost of sales - service	33	31
Share-based compensation expense in cost of sales	45	42
Research and development	97	94
Sales and marketing	113	113
General and administrative	66	55
Share-based compensation expense in operating expenses	276	262
Total share-based compensation	\$ 321	\$ 304

Share-based compensation in the above table includes \$28 million and \$22 million related to acquisitions for the three months ended October 24, 2009 and October 25, 2008, respectively.

Amortization of Purchased Intangible Assets and In-Process Research and Development

The following table presents the amortization of purchased intangible assets included in operating expenses and in-process R&D (in millions):

Three Months Ended

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

	October 24, 2009	October 25, 2008
Amortization of purchased intangible assets included in operating expenses	\$ 105	\$ 112

The slight decrease in the amortization of purchased intangible assets included in operating expenses for the first quarter of fiscal 2010 compared with the corresponding period of fiscal 2009 was primarily due to certain intangible assets becoming fully amortized during the later part of fiscal 2009. For additional information regarding purchased intangibles, see Note 4 to the Consolidated Financial Statements.

Table of Contents

Under new accounting guidance, effective for acquisitions closing in fiscal 2010, acquired in-process R&D assets from a business combination are capitalized as indefinite-lived intangible assets at acquisition date, and are assessed for impairment thereafter. Development costs incurred after the acquisition are charged to expense. The capitalized in-process R&D asset is amortized upon completion of the development of the underlying marketable products.

The fair value of acquired purchased technology and patents, as well as technology under development, is determined at acquisition date using the income approach, which discounts expected future cash flows to present value. The discount rates used in the present value calculations are typically derived from a weighted-average cost of capital analysis and then adjusted to reflect risks inherent in the development lifecycle as appropriate. We consider the pricing model for products related to these acquisitions to be standard within the high-technology communications industry, and the applicable discount rates represent the rates that market participants would use for valuation of such intangible assets.

Interest and Other Income, Net*Interest Income and Interest Expense*

A summary of interest income and interest expense is as follows (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Interest income	\$ 168	\$ 259
Interest expense	(114)	(64)
Total	\$ 54	\$ 195

The decrease in interest income in the first quarter of fiscal 2010 was primarily due to lower average interest rates partially offset by higher average total cash and cash equivalents and fixed income securities balances compared with the first quarter of fiscal 2009. The increase in interest expense in the first quarter of fiscal 2010 compared with the first quarter of fiscal 2009 was due to higher average debt balances as a result of the debt issuance in February 2009.

Other Income (Loss), Net

The components of other income (loss), net, are as follows (in millions):

	Three Months Ended	
	October 24, 2009	October 25, 2008
Net gains on investments in publicly traded equity securities	\$ 11	\$ 91
Net gains (losses) on investments in fixed income securities	6	(152)
Total net gains (losses) on investments in publicly traded equity and fixed income securities	17	(61)
Net gains (losses) on investments in privately held companies	30	(9)
Other gains (losses), net	14	(2)
Other income (loss), net	\$ 61	\$ (72)

The change in total net gains (losses) on fixed income and publicly traded securities in the first quarter of fiscal 2010 compared with the first quarter of fiscal 2009 was primarily attributable to the absence of impairment charges in the first quarter of fiscal 2010 for such investments. For the first quarter of fiscal 2009, net gains (losses) on investments in fixed income securities and publicly traded equity securities included impairment losses of \$183 million and \$17 million, respectively. The impairment charges in the first quarter of fiscal 2009 were partially offset by a gain related to the termination in the first quarter of fiscal 2009 of various forward sale agreements designated as fair value hedges of

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

publicly traded equity securities. See Note 7 to the Consolidated Financial Statements for the unrealized gains and losses on investments.

Table of Contents

The change in net gains (losses) on investments in privately held companies for the first quarter of fiscal 2010 was primarily due to higher realized gains and lower impairment charges in the first quarter of fiscal 2010. Impairment charges on investments in privately held companies were \$10 million and \$23 million for the first quarters of fiscal 2010 and 2009, respectively.

Other gains, net for the first quarter of fiscal 2010 included a \$42 million mark-to-market impact related to foreign exchange forwards and options to hedge a portion of the foreign currency consideration of the proposed Tandberg tender offer transaction.

Provision for Income Taxes

The provision for income taxes resulted in an effective tax rate of 20.2% for the first quarter of fiscal 2010 compared with 15.5% for the first quarter of fiscal 2009. The net 4.7% increase in the effective tax rate for the first quarter of fiscal 2010, as compared with the first quarter of fiscal 2009, was primarily attributable to the inclusion of a tax benefit of \$106 million, or 4.1% points in the first quarter of fiscal 2009 related to fiscal 2008 R&D expenses. During the first quarter of fiscal 2009, the Tax Extenders and Alternative Minimum Tax Relief Act of 2008 reinstated the U.S. federal R&D tax credit, retroactive to January 1, 2008.

Recent Accounting Guidance Not Yet Effective

In June 2009, the FASB issued revised guidance for the accounting of transfers of financial assets. This guidance eliminates the concept of a qualifying special-purpose entity; removes the scope exception for qualifying special-purpose entities when applying the accounting guidance related to the consolidation of variable interest entities; changes the requirements for derecognizing financial assets; and requires enhanced disclosure. This accounting guidance is effective for us beginning in the first quarter of fiscal 2011. We are currently evaluating the impact that the adoption of this guidance will have on our consolidated financial statements.

In June 2009, the FASB issued revised guidance for the accounting of variable interest entities, which replaces the quantitative-based risks and rewards approach with a qualitative approach that focuses on identifying which enterprise has the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance. The accounting guidance also requires an ongoing reassessment of whether an entity is the primary beneficiary and requires additional disclosures about an enterprise's involvement in variable interest entities. This accounting guidance is effective for us beginning in the first quarter of fiscal 2011. We are currently evaluating the impact that the adoption of this guidance will have on our consolidated financial statements.

In November 2008, the SEC issued for comment a proposed roadmap outlining several milestones that, if achieved, could lead to mandatory adoption of International Financial Reporting Standards (IFRS) by U.S. issuers in 2014. IFRS is a comprehensive series of accounting standards published by the International Accounting Standards Board (IASB). The roadmap also contained proposed rule changes that would permit early adoption of IFRS by a limited number of eligible U.S. issuers beginning with filings in 2010. According to the roadmap, the SEC would make a determination in 2011 regarding the mandatory adoption of IFRS. We are currently assessing the impact that this potential change would have on our consolidated financial statements, and we will continue to monitor the development of the potential implementation of IFRS as well as the ongoing convergence efforts of the FASB and the IASB.

Table of Contents***Liquidity and Capital Resources***

The following sections discuss the effects of changes in our balance sheet, contractual obligations, other commitments, and the stock repurchase program on our liquidity and capital resources.

Balance Sheet and Cash Flows**Cash and Cash Equivalents and Investments**

The following table summarizes our cash and cash equivalents and investments (in millions):

	October 24, 2009	July 25, 2009	Increase (Decrease)
Cash and cash equivalents	\$ 4,774	\$ 5,718	\$ (944)
Fixed income securities	29,548	28,355	1,193
Publicly traded equity securities	1,043	928	115
Total	\$ 35,365	\$ 35,001	\$ 364

The increase in cash and cash equivalents and investments was primarily a result of cash provided by operating activities of \$1.5 billion and the issuance of common stock of \$634 million related to employee stock option exercises, and approximately \$227 million related to the change in unrealized gains and losses on publicly traded equity and fixed income securities as well as realized gains and losses from these investments. These factors were partially offset by the repurchase of common stock of \$1.9 billion and capital expenditures of \$160 million.

Our total in cash and cash equivalents and investments held outside of the United States in various foreign subsidiaries was \$30.6 billion and \$29.1 billion, as of October 24, 2009 and July 25, 2009, respectively. The remaining balance held in the United States as of October 24, 2009 and July 25, 2009 was \$4.7 billion and \$5.9 billion, respectively.

If cash and cash equivalents and investments held outside the United States are distributed to the United States in the form of dividends or otherwise, we may be subject to additional U.S. income taxes (subject to an adjustment for foreign tax credits) and foreign withholding taxes. For internal management purposes, we target specific ranges of net realizable cash, representing cash and cash equivalents and investments, net of (i) long-term debt and the present value of operating lease commitments, and (ii) U.S. income taxes that we estimate would be payable upon the distribution to the United States of cash and cash equivalents and investments held outside the United States. We believe that our strong total cash and cash equivalents and investments position allows us to use our cash resources for strategic investments to gain access to new technologies, acquisitions, customer financing activities, working capital, and the repurchase of shares.

We maintain an investment portfolio of various holdings, types, and maturities. We classify our investments as short term investments based on their nature and their availability for use in current operations. We believe the overall credit quality of our portfolio is strong, with our cash equivalents and fixed income portfolio invested in securities with a weighted-average credit rating exceeding AA. We believe that our strong cash and cash equivalents and investments position allows us to use our cash resources for strategic investments to gain access to new technologies, acquisitions, customer financing activities, working capital, and the repurchase of shares.

We expect that cash provided by operating activities may fluctuate in future periods as a result of a number of factors, including fluctuations in our operating results, the rate at which products are shipped during the quarter (which we refer to as shipment linearity), the timing and collection of accounts receivable and financing receivables, inventory and supply chain management, deferred revenue, excess tax benefits from share-based compensation, and the timing and amount of tax and other payments. For additional discussion, see Part II, Item 1A. Risk Factors.

Accounts Receivable, Net

The following table summarizes our accounts receivable, net (in millions) and DSO:

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

	October 24, 2009	July 25, 2009	Increase (Decrease)
Accounts receivable, net	\$ 3,159	\$ 3,177	\$ (18)
DSO	32	34	(2)

Table of Contents

Accounts receivable, net was relatively flat compared with the end of fiscal 2009. DSO as of October 24, 2009 was lower by two days compared with the fourth quarter of fiscal 2009 as a result of lower service billings due primarily to seasonality.

Inventories and Purchase Commitments with Contract Manufacturers and Suppliers

The following table summarizes our inventories and purchase commitments with contract manufacturers and suppliers (in millions, except annualized inventory turns):

	October 24, 2009	July 25, 2009	Increase (Decrease)
Inventories	\$ 1,089	\$ 1,074	\$ 15
Annualized inventory turns	11.6	11.7	(0.1)
Purchase commitments with contract manufacturers and suppliers	\$ 2,803	\$ 2,157	\$ 646

The increase in our purchase commitments with contract manufacturers and suppliers was primarily a result of our response to the sequential increase in our revenue. In addition, the increase was a result of longer lead times associated with supply constraints and proactively managing our commitments in the first quarter of fiscal 2010. Similar to what is happening in the industry we are seeing some product lead time extensions stemming from supplier constraints based upon their labor and other actions taken during the global economic downturn.

Our finished goods consist of distributor inventory and deferred cost of sales and manufactured finished goods. Distributor inventory and deferred cost of sales are related to unrecognized revenue on shipments to distributors and retail partners, as well as shipments to customers. Manufactured finished goods consist primarily of build-to-order and build-to-stock products. Service-related spares consist of reusable equipment related to our technical support and warranty activities. All inventories are accounted for at the lower of cost or market. Inventory is written down based on excess and obsolete inventories determined primarily by future demand forecasts. Inventory write downs are measured as the difference between the cost of the inventory and market, based upon assumptions about future demand, and are charged to the provision for inventory, which is a component of our cost of sales.

We purchase components from a variety of suppliers and use several contract manufacturers to provide manufacturing services for our products. During the normal course of business, in order to manage manufacturing lead times and help ensure adequate component supply, we enter into agreements with contract manufacturers and suppliers that either allow them to procure inventory based upon criteria as defined by us or that establish the parameters defining our requirements. A significant portion of our reported purchase commitments arising from these agreements are firm, noncancelable, and unconditional commitments. In certain instances, these agreements allow us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being placed.

We record a liability, included in other current liabilities, for firm, noncancelable, and unconditional purchase commitments for quantities in excess of our future demand forecasts consistent with the valuation of our excess and obsolete inventory. The purchase commitments for inventory are expected to be primarily fulfilled within one year.

Inventory and supply chain management remain areas of focus as we balance the need to maintain supply chain flexibility to help ensure competitive lead times with the risk of inventory obsolescence because of rapidly changing technology and customer requirements. We believe the amount of our inventory and purchase commitments is appropriate for our revenue levels.

Table of ContentsFinancing Receivables and Guarantees

The following table summarizes our financing receivables, financing guarantees, and the related deferred revenue (in millions):

	October 24, 2009	July 25, 2009	Increase (Decrease)
Lease receivables	\$ 1,936	\$ 1,805	\$ 131
Financed service contracts	1,689	1,642	47
Loan receivables	1,154	861	293
Gross financing receivables	4,779	4,308	471
Financing guarantees channel partner	365	334	31
Financing guarantees end-user customers	391	405	(14)
Gross financing receivables and guarantees	5,535	5,047	488
Allowances for financing receivables	(342)	(327)	(15)
Deferred revenue related to financing receivables and guarantees	(2,691)	(2,639)	(52)
Financing receivables and guarantees, net	\$ 2,502	\$ 2,081	\$ 421

Financing Receivables We provide financing to certain end-user customers and channel partners to enable sales of our products, services, and networking solutions. These financing arrangements include leases, financed service contracts, and loans. Arrangements related to leases and loans are generally collateralized by a security interest in the underlying assets. Lease receivables include sales-type and direct-financing leases. We also provide certain qualified customers financing for long-term service contracts, which primarily relate to technical support services. Our loan financing arrangements may include not only financing the acquisition of our products and services but also providing additional funds for other costs associated with network installation and integration of our products and services. We expect to continue to expand the use of our financing programs in the near term.

Financing Guarantees In the normal course of business, third parties may provide financing arrangements to our customers and channel partners under financing programs. The financing arrangements to customers provided by third parties are related to leases and loans and typically have terms of up to three years. In some cases, we provide guarantees to third parties for these lease and loan arrangements. The financing arrangements to channel partners consist of revolving short-term financing provided by third parties, generally with payment terms ranging from 60 to 90 days. In certain instances, these financing arrangements result in a transfer of our receivables to the third party. The receivables are derecognized upon transfer, as these transfers qualify as true sales, and we receive a payment for the receivables from the third party based on our standard payment terms. These financing arrangements facilitate the working capital requirements of the channel partners and, in some cases, we guarantee a portion of these arrangements. We could be called upon to make payments under these guarantees in the event of nonpayment by the channel partners or end-user customers. Where we provide a guarantee, we defer the revenue associated with the channel partner and end-user financing arrangement in accordance with revenue recognition policies, or we record a liability for the fair value of the guarantees. In either case, the deferred revenue is recognized as revenue when the guarantee is removed.

Deferred Revenue Related to Financing Receivables and Guarantees The majority of the deferred revenue in the table above is related to financed service contracts. The revenue related to financed service contracts, which primarily relates to technical support services, is deferred and included in deferred service revenue. The revenue related to financed service contracts is recognized ratably over the period during which the related services are to be performed. A portion of the revenue related to lease and loan receivables is also deferred and included in deferred product revenue based on revenue recognition criteria.

Table of Contents**Borrowings**

Senior Notes The following table summarizes the principal amount of our senior notes (in millions):

	October 24, 2009	July 25, 2009
Senior notes:		
5.25% fixed-rate notes, due 2011 (2011 Notes)	\$ 3,000	\$ 3,000
5.50% fixed-rate notes, due 2016 (2016 Notes)	3,000	3,000
4.95% fixed-rate notes, due 2019 (2019 Notes)	2,000	2,000
5.90% fixed-rate notes, due 2039 (2039 Notes)	2,000	2,000
Total	\$ 10,000	\$ 10,000

Our senior notes were rated A1 by Moody's Investors Service, Inc. and A+ by Standard & Poor's Ratings Services as of October 24, 2009. Interest is payable semi-annually on each class of the senior fixed-rate notes, each of which is redeemable by us at any time, subject to a make-whole premium. We were in compliance with all debt covenants as of October 24, 2009.

On November 9, 2009, we entered into an underwriting agreement to issue senior unsecured notes in aggregate principal amount of \$5.0 billion under a Form S-3 Registration Statement filed on February 9, 2009. Of these notes, \$500 million will mature in 2014 and bear interest at a fixed rate of 2.90% per annum, \$2.5 billion will mature in 2020 and bear interest at a fixed rate of 4.45% per annum, and \$2.0 billion will mature in 2040 and bear interest at a fixed rate of 5.50% per annum. This offering was completed on November 17, 2009. We intend to use the proceeds from the offering for general corporate purposes. The interest on the senior notes is payable semi-annually in arrears. The notes are redeemable by us at any time, subject to a make-whole premium.

Credit Facility We have a credit agreement with certain institutional lenders that provides for a \$2.9 billion unsecured revolving credit facility that is scheduled to expire on August 17, 2012. Any advances under the credit agreement will accrue interest at rates that are equal to, based on certain conditions, either (i) the higher of the Federal Funds rate plus 0.50% or Bank of America's prime rate as announced from time to time, or (ii) LIBOR plus a margin that is based on our senior debt credit ratings as published by Standard & Poor's Ratings Services and Moody's Investors Service, Inc. The credit agreement requires that we comply with certain covenants including that we maintain an interest coverage ratio as defined in the agreement.

As of October 24, 2009, we were in compliance with the required interest coverage ratio and the other covenants, and we had not borrowed any funds under the credit facility. We may also, upon the agreement of either the then-existing lenders or of additional lenders not currently parties to the agreement, increase the commitments under the credit facility by up to an additional \$2.0 billion and/or extend the expiration date of the credit facility up to August 15, 2014.

Table of Contents*Deferred Revenue*

The following table presents the breakdown of deferred revenue (in millions):

	October 24, 2009	July 25, 2009	Increase (Decrease)
Service	\$ 6,194	\$ 6,496	\$ (302)
Product	3,077	2,897	180
Total	\$ 9,271	\$ 9,393	\$ (122)
Reported as:			
Current	\$ 6,397	\$ 6,438	\$ (41)
Noncurrent	2,874	2,955	(81)
Total	\$ 9,271	\$ 9,393	\$ (122)

The decrease in deferred service revenue reflects the ongoing amortization of deferred service revenue, partially offset by the impact of new contract initiations and renewals, which typically are seasonally lower in the first quarter. The increase in deferred product revenue was primarily due to the timing of cash receipts related to unrecognized revenue from two-tier distributors, an increase in shipments not having met revenue recognition criteria, and other revenue deferrals associated with financing arrangements.

Operating Leases

We lease office space in several U.S. locations. Outside the United States, larger leased sites are located in Australia, Belgium, China, France, Germany, India, Israel, Italy, Japan, and the United Kingdom. We also lease equipment and vehicles. The future minimum lease payments under all our noncancelable operating leases with an initial term in excess of one year as of October 24, 2009 were \$1.4 billion.

Other Commitments

In connection with our business combinations and asset purchases, we have agreed to pay certain additional amounts contingent upon the achievement of certain agreed-upon technology, development, product, or other milestones or continued employment with us of certain employees of acquired entities. We also have pending business combinations as of October 24, 2009. See Note 3 to the Consolidated Financial Statements.

We also have certain funding commitments primarily related to our investments in privately held companies and venture funds, some of which are based on the achievement of certain agreed-upon milestones, and some of which are required to be funded on demand. The funding commitments were approximately \$298 million as of October 24, 2009, compared with approximately \$313 million as of July 25, 2009.

Off-Balance Sheet Arrangements

We consider our investments in unconsolidated variable interest entities to be off-balance sheet arrangements. In the ordinary course of business, we have investments in privately held companies and provide financing to certain customers. These privately held companies and customers may be considered to be variable interest entities. We have evaluated our investments in these privately held companies and our customer financings and have determined that there were no significant unconsolidated variable interest entities as of October 24, 2009.

Certain events can require a reassessment of our investments in privately held companies or customer financings to determine if they are variable interest entities and if we would be regarded as the primary beneficiary. As a result of such events, we may be required to make additional disclosures or consolidate these entities. Because we may not control these entities, we may not have the ability to influence these events.

We provide financing guarantees, which are generally for various third-party financing arrangements extended to our channel partners and end-user customers. We could be called upon to make payments under these guarantees in the event of nonpayment by the channel partners or

end-user customers. See the discussion of these financing guarantees under Financing Receivables and Guarantees above.

Table of Contents*Stock Repurchase Program*

In September 2001, our Board of Directors authorized a stock repurchase program. As of October 24, 2009, our Board of Directors had authorized an aggregate repurchase of up to \$62 billion of common stock under this program and the remaining authorized repurchase amount was \$3.1 billion with no termination date. In addition, on November 4, 2009, our Board of Directors authorized the repurchase of up to an additional \$10 billion of our common stock under this program with no termination date. The stock repurchase activity under the stock repurchase program during the first quarter of fiscal 2010 is summarized as follows (in millions, except per-share amounts):

Three Months Ended October 24, 2009	Shares Repurchased	Weighted- Average Price per Share	Amount Repurchased
Cumulative balance at July 25, 2009	2,802	\$ 20.41	\$ 57,179
Repurchase of common stock under the stock repurchase program	76	22.99	1,753
Cumulative balance at October 24, 2009	2,878	\$ 20.47	\$ 58,932

Liquidity and Capital Resource Requirements

Based on past performance and current expectations, we believe our cash and cash equivalents, investments, cash generated from operations, our ability to access capital markets including our issuance of \$5.0 billion of senior notes in November 2009, and committed credit lines, will satisfy our working capital needs, capital expenditures, investment requirements, stock repurchases, contractual obligations, commitments, principal payments on long-term debt, future customer financings, pending acquisitions, and other liquidity requirements associated with our operations through at least the next 12 months. There are no other transactions, arrangements, or other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity, the availability, and our requirements for capital resources.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our financial position is exposed to a variety of risks including interest rate risk, equity price risk, and foreign currency exchange risk.

Interest Rate Risk

Fixed Income Securities

We maintain an investment portfolio of various holdings, types, and maturities. Our primary objective for holding fixed income securities is to achieve an appropriate investment return consistent with preserving principal and managing risk. At any time, a sharp rise in interest rates or credit spreads could have a material adverse impact on the fair value of our fixed income investment portfolio. Conversely, declines in interest rates, including the impact from lower credit spreads, could have a material adverse impact on interest income for our investment portfolio. We may utilize derivative instruments designated as hedging instruments to achieve our investment objectives. We had no outstanding hedging instruments for our fixed income securities as of October 24, 2009. Our fixed income instruments are held for purposes other than trading. Our fixed income instruments are not leveraged as of October 24, 2009. See Note 7 to the Consolidated Financial Statements. We monitor our interest rate and credit risks, including our credit exposures to specific rating categories and to individual issuers. We believe the overall credit quality of our portfolio is strong, with our cash equivalents and fixed income portfolio invested in securities with a weighted-average credit rating exceeding AA. There were no impairment charges on our fixed income securities for the first quarter of fiscal 2010, while for the corresponding period of fiscal 2009, we had impairment charges of \$183 million.

Long-Term Debt

As of October 24, 2009, we had \$10.0 billion in principal amount of fixed-rate long-term debt outstanding, with a carrying amount of \$10.3 billion and a fair value of \$10.6 billion, which fair value is based on market prices. A hypothetical 50 basis points increase or decrease in market interest rates would decrease or increase, respectively, the fair value of the fixed-rate debt as of October 24, 2009 by approximately \$300 million. However, this hypothetical change in interest rates would not impact the interest expense on the fixed-rate debt.

Equity Price Risk

The fair value of our equity investments in publicly traded companies is subject to market price volatility. We may hold equity securities for strategic purposes or to diversify our overall investment portfolio. Our equity portfolio consists of securities with characteristics that most closely match the Standard & Poor's 500 Index or NASDAQ Composite Index. These equity securities are held for purposes other than trading. To manage our exposure to changes in the fair value of certain equity securities, we may enter into equity derivatives designated as hedging instruments.

Table of Contents*Publicly Traded Equity Securities*

The following tables present the hypothetical fair values of publicly traded equity securities as a result of selected potential decreases and increases in the price of each equity security in the portfolio, excluding hedged equity securities, if any. Potential fluctuations in the price of each equity security in the portfolio of plus or minus 10%, 20%, and 30% were selected based on potential near-term changes in those security prices. The hypothetical fair values as of October 24, 2009 and July 25, 2009 are as follows (in millions):

	VALUATION OF SECURITIES GIVEN AN X% DECREASE IN EACH STOCK S PRICE			FAIR VALUE AS OF OCTOBER 24, 2009	VALUATION OF SECURITIES GIVEN AN X% INCREASE IN EACH STOCK S PRICE		
	(30%)	(20%)	(10%)		10%	20%	30%
	Publicly traded equity securities	\$ 730	\$ 834		\$ 939	\$ 1,043	\$ 1,147

	VALUATION OF SECURITIES GIVEN AN X% DECREASE IN EACH STOCK S PRICE			FAIR VALUE AS OF JULY 25, 2009	VALUATION OF SECURITIES GIVEN AN X% INCREASE IN EACH STOCK S PRICE		
	(30%)	(20%)	(10%)		10%	20%	30%
	Publicly traded equity securities	\$ 650	\$ 742		\$ 835	\$ 928	\$ 1,021

There were no impairment charges on our investments in publicly traded equity securities for the first quarter of fiscal 2010, while for the corresponding period of fiscal 2009, we had impairment charges of \$17 million.

Investments in Privately Held Companies

We have also invested in privately held companies. These investments are recorded in other assets in our Consolidated Balance Sheet and are accounted for either using the cost or the equity method. As of October 24, 2009, the total carrying amount of our investments in privately held companies was \$728 million, compared with \$709 million at July 25, 2009. Some of the privately held companies in which we invested are in the startup or development stages. These investments are inherently risky because the markets for the technologies or products these companies are developing are typically in the early stages and may never materialize. We could lose our entire investment in these companies. Our evaluation of investments in privately held companies is based on the fundamentals of the businesses, including, among other factors, the nature of their technologies and potential for financial return. Our impairment charges on investments in privately held companies were \$10 million and \$23 million for the first quarter of fiscal 2010 and 2009, respectively.

Foreign Currency Exchange Risk

Our foreign exchange forward and option contracts are summarized as follows (in millions):

	October 24, 2009		July 25, 2009	
	Notional Amount	Fair Value	Notional Amount	Fair Value
Forward contracts:				
Purchased	\$ 3,292	\$ 37	\$ 2,570	\$ 5
Sold	\$ 568	\$ (9)	\$ 912	\$ (8)
Option contracts:				
Purchased	\$ 2,251	\$ 124	\$ 1,796	\$ 82
Sold	\$ 2,487	\$ (43)	\$ 2,213	\$ (36)

We conduct business globally in numerous currencies. The direct effect of foreign currency fluctuations on sales has not been material because our sales are primarily denominated in U.S. dollars. However, if the U.S. dollar strengthens relative to other currencies, such strengthening could have an indirect effect on our sales to the extent it raises the cost of our products to non-U.S. customers and thereby reduces demand. A weaker U.S. dollar could have the opposite effect. However, the precise indirect effect of currency fluctuations is difficult to measure or predict because our sales are influenced by many factors in addition to the impact of such currency fluctuations.

Table of Contents

Approximately 70% of our operating expenses are U.S.-dollar denominated. Foreign currency fluctuations, net of hedging, decreased our operating expenses, categorized as research and development, sales and marketing, and general and administrative, by approximately 1.4% in the first quarter of fiscal 2010 compared with the corresponding period of fiscal 2009. To reduce variability in operating expenses and service cost of sales caused by non-U.S.-dollar denominated operating expenses and costs, we hedge certain foreign currency forecasted transactions with currency options and forward contracts. These hedging programs are not designed to provide foreign currency protection over long time horizons. In designing a specific hedging approach, we consider several factors, including offsetting exposures, significance of exposures, costs associated with entering into a particular hedge instrument, and potential effectiveness of the hedge. The gains and losses on foreign exchange contracts mitigate the effect of currency movements on our operating expenses and service cost of sales.

During the three months ended October 24, 2009, we entered into foreign exchange forward and options contracts denominated in Norwegian kroner to hedge against a portion of the foreign currency exchange risk associated with the purchase consideration for the proposed Tandberg tender offer transaction. A strengthening of the U.S. dollar in relation to the Norwegian krone, of a magnitude consistent with reasonably possible near-term movements in exchange rates, could result in a loss of up to approximately \$300 million on the currency contracts related to the Tandberg acquisition which were outstanding at October 24, 2009. A weaker U.S. dollar could have the opposite effect. In addition, as the purchase consideration for Tandberg is denominated in Norwegian kroner, the amount of U.S. dollar equivalent for the Tandberg acquisition is dependent on exchange rates.

We also enter into foreign exchange forward and option contracts to reduce the short-term effects of foreign currency fluctuations on receivables, investments, and payables, denominated in currencies other than the functional currencies of the entities. The market risks associated with these foreign currency receivables, investments, and payables relate primarily to variances from our forecasted foreign currency transactions and balances. Our forward and option contracts generally have the following maturities:

	Maturities
Forward and option contracts forecasted transactions related to operating expenses and service cost of sales	Up to 18 months
Forward contracts current assets and liabilities	Up to 3 months
Forward contracts net investments in foreign subsidiaries	Up to 6 months
Forward contracts long-term customer financings	Up to 2 years
Forward contracts investments	Up to 2 years

We do not enter into foreign exchange forward or option contracts for trading purposes.

Table of Contents

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures. Based on our management's evaluation (with the participation of our principal executive officer and principal financial officer), as of the end of the period covered by this report, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, (the Exchange Act)) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in internal control over financial reporting. There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our first quarter of fiscal 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Brazilian authorities are investigating our Brazilian subsidiary and certain of its current and former employees, as well as a Brazilian importer of our products, and its affiliates and employees, relating to the allegation of evading import taxes and other alleged improper transactions involving the subsidiary and the importer. We are conducting a thorough review of the matter. During fiscal 2009, Brazilian authorities asserted claims against us for calendar years 2003 and 2004, and we believe claims may also be asserted for calendar year 2005 through calendar year 2007. We believe the asserted claims are without merit and intend to defend the claims vigorously. We are unable to determine the likelihood of an unfavorable outcome on any potential further claims against us. While we believe there is no legal basis for our alleged liability, due to the complexities and uncertainty surrounding the judicial process in Brazil, and the nature of the claims asserting joint liability with the importer, we are unable to reasonably estimate a range of loss, if any. In addition, we are investigating the allegations regarding improper transactions. We have proactively communicated with United States authorities to provide information and report on our findings, and the United States authorities are currently investigating such allegations.

In addition, we are subject to legal proceedings, claims, and litigation arising in the ordinary course of business, including intellectual property litigation. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations, or cash flows. For additional information regarding intellectual property litigation, see Part II, Item 1A. Risk Factors We may be found to infringe on intellectual property rights of others herein.

Table of Contents

ITEM 1A. Risk Factors

Set forth below and elsewhere in this report and in other documents we file with the SEC are descriptions of the risks and uncertainties that could cause our actual results to differ materially from the results contemplated by the forward-looking statements contained in this report. The descriptions below include any material changes to and supersede the description of the risk factors affecting our business previously disclosed in Part I, Item 1A. Risk Factors of our Annual Report on Form 10-K for the fiscal year ended July 25, 2009.

OUR OPERATING RESULTS MAY FLUCTUATE IN FUTURE PERIODS, WHICH MAY ADVERSELY AFFECT OUR STOCK PRICE

Our operating results have been in the past, and will continue to be, subject to quarterly and annual fluctuations as a result of numerous factors, some of which may contribute to more pronounced fluctuations in an uncertain global economic environment. These factors include:

Fluctuations in demand for our products and services, especially with respect to telecommunications service providers and Internet businesses, in part due to changes in the global economic environment

Changes in sales and implementation cycles for our products and reduced visibility into our customers' spending plans and associated revenue

Our ability to maintain appropriate inventory levels and purchase commitments

Price and product competition in the communications and networking industries, which can change rapidly due to technological innovation and different business models from various geographic regions

The overall movement toward industry consolidation among both our competitors and our customers

The introduction and market acceptance of new technologies and products and our success in new and evolving markets, including emerging and advanced technologies, as well as the adoption of new standards

Variations in sales channels, product costs, or mix of products sold

The timing, size, and mix of orders from customers

Manufacturing and customer lead times

Fluctuations in our gross margins, and the factors that contribute to such fluctuations, as described below

Our ability to achieve targeted cost reductions, such as the resource realignment and expense reduction that is described in the Management's Discussion and Analysis of Financial Condition and Results of Operations section in our 2009 Annual Report to Shareholders

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

The ability of our customers, channel partners, contract manufacturers and suppliers to obtain financing or to fund capital expenditures, especially during a period of global credit market disruption or in the event of customer, channel partner, contract manufacturer or supplier financial problems

Share-based compensation expense

Actual events, circumstances, outcomes, and amounts differing from judgments, assumptions, and estimates used in determining the values of certain assets (including the amounts of related valuation allowances), liabilities, and other items reflected in our Consolidated Financial Statements

How well we execute on our strategy and operating plans

Benefits anticipated from our investments in engineering, sales and manufacturing activities

Table of Contents

Changes in tax laws or regulations or accounting rules, such as increased use of fair value measures and the potential requirement that U.S. registrants prepare financial statements in accordance with International Financial Reporting Standards (IFRS) As a consequence, operating results for a particular future period are difficult to predict, and, therefore, prior results are not necessarily indicative of results to be expected in future periods. Any of the foregoing factors, or any other factors discussed elsewhere herein, could have a material adverse effect on our business, results of operations, and financial condition that could adversely affect our stock price.

OUR OPERATING RESULTS MAY BE ADVERSELY AFFECTED BY UNFAVORABLE ECONOMIC AND MARKET CONDITIONS AND THE UNCERTAIN GEOPOLITICAL ENVIRONMENT

Challenging economic conditions worldwide have from time to time contributed, and may continue to contribute, to slowdowns in the communications and networking industries at large, as well as to specific segments and markets in which we operate, resulting in:

Reduced demand for our products as a result of continued constraints on IT-related capital spending by our customers, particularly service providers, and other customer markets as well

Increased price competition for our products, not only from our competitors but also as a consequence of customers disposing of unutilized products

Risk of excess and obsolete inventories

Risk of supply constraints

Risk of excess facilities and manufacturing capacity

Higher overhead costs as a percentage of revenue and higher interest expense

The turmoil in the global credit markets, the instability in the geopolitical environment in many parts of the world and other disruptions, such as changes in energy costs, may continue to put pressure on global economic conditions. Our operating results in one or more segments may also be affected by uncertain or changing economic conditions particularly germane to that segment or to particular customer markets within that segment. The world has been experiencing a global macroeconomic downturn, and if global economic and market conditions, or economic conditions in the United States or other key markets, remain uncertain, persist, or deteriorate further, we may experience material impacts on our business, operating results, and financial condition.

DURING THE RECENT GLOBAL ECONOMIC DOWNTURN AND WHILE THE RELATED MARKET UNCERTAINTY PERSISTS, WE HAVE BEEN INVESTING IN MARKET ADJACENCIES AND ALSO IN THE UNITED STATES AND SELECT EMERGING COUNTRIES, AND IF THE RETURN ON THESE INVESTMENTS IS LOWER OR DEVELOPS MORE SLOWLY THAN WE EXPECT, OUR OPERATING RESULTS MAY BE HARMED

We continue to realign resources to focus on certain market adjacencies, such as enterprise data center virtualization, video/visual networking, collaboration architectures, and globalization, primarily in targeted geographic locations and to focus efforts particularly where we believe the economic recovery will progress the fastest, such as the United States and selected emerging countries, creating opportunities for us even while other countries or markets may not be recovering. However, the return on our investments in such market adjacencies and in such geographic markets may be lower, or may develop more slowly, than we expect. If we do not achieve the benefits anticipated from these investments (including if our selection of areas for investment does not play out as we expect), or if the achievement of these benefits is delayed, our operating results may be adversely affected.

OUR REVENUE FOR A PARTICULAR PERIOD IS DIFFICULT TO PREDICT, AND A SHORTFALL IN REVENUE MAY HARM OUR OPERATING RESULTS

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

As a result of a variety of factors discussed in this report, our revenue for a particular quarter is difficult to predict, especially in light of the recent global economic downturn and related market uncertainty. Our net sales declined in fiscal 2009 and may decline further or may

Table of Contents

grow at a slower rate than in past periods. Our ability to meet financial expectations could also be adversely affected if the nonlinear sales pattern seen in some of our past quarters recurs in future periods. We have experienced periods of time during which shipments have exceeded net bookings or manufacturing issues have delayed shipments, leading to nonlinearity in shipping patterns. In addition to making it difficult to predict revenue for a particular period, nonlinearity in shipping can increase costs, because irregular shipment patterns result in periods of underutilized capacity and periods in which overtime expenses may be incurred, as well as in potential additional inventory management-related costs. In addition, to the extent that manufacturing issues and any related component shortages result in delayed shipments in the future, and particularly in periods in which we and our contract manufacturers are operating at higher levels of capacity, it is possible that revenue for a quarter could be adversely affected if such matters occur and are not remediated within the same quarter.

The timing of large orders can also have a significant effect on our business and operating results from quarter to quarter, primarily in the United States and in our Emerging Markets theater and other emerging countries. From time to time, we receive large orders that have a significant effect on our operating results in the period in which the order is recognized as revenue. The timing of such orders is difficult to predict, and the timing of revenue recognition from such orders may affect period to period changes in net sales. As a result, our operating results could vary materially from quarter to quarter based on the receipt of such orders and their ultimate recognition as revenue.

Inventory management remains an area of focus. Similar to what is happening in the industry, we are seeing some product lead time extensions stemming from supplier constraints based upon their labor and other actions taken during the global economic downturn. Longer manufacturing lead times in the past have caused some customers to place the same order multiple times within our various sales channels and to cancel the duplicative orders upon receipt of the product, or to place orders with other vendors with shorter manufacturing lead times. Such multiple ordering (along with other factors) or risk of order cancellation may cause difficulty in predicting our sales and, as a result, could impair our ability to manage parts inventory effectively. In addition, our efforts to improve manufacturing lead-time performance may result in corresponding reductions in order backlog. A decline in backlog levels could result in more variability and less predictability in our quarter-to-quarter net sales and operating results. Increases in our purchase commitments to shorten lead times could also lead to excess and obsolete inventory charges if the demand for our products is less than our expectations.

We plan our operating expense levels based primarily on forecasted revenue levels. These expenses and the impact of long-term commitments are relatively fixed in the short term. A shortfall in revenue could lead to operating results being below expectations because we may not be able to quickly reduce these fixed expenses in response to short-term business changes.

Any of the above factors could have a material adverse impact on our operations and financial results.

WE EXPECT GROSS MARGIN TO VARY OVER TIME, AND OUR LEVEL OF PRODUCT GROSS MARGIN MAY NOT BE SUSTAINABLE

Our level of product gross margins may not be sustainable and may continue to be adversely affected by numerous factors, including:

Changes in customer, geographic, or product mix, including mix of configurations within each product group

Introduction of new products, including products with price-performance advantages

Our ability to reduce production costs

Entry into new markets, including markets with different pricing and cost structures, through acquisitions or internal development

Sales discounts

Increases in material or labor costs

Excess inventory and inventory holding charges

Obsolescence charges

Changes in shipment volume

Table of Contents

The timing of revenue recognition and revenue deferrals

Increased cost, loss of cost savings or dilution of savings due to changes in component pricing or charges incurred due to inventory holding periods if parts ordering does not correctly anticipate product demand or if the financial health of either contract manufacturers or suppliers deteriorates

Lower than expected benefits from value engineering

Increased price competition, including competitors from Asia, especially from China

Changes in distribution channels

Increased warranty costs

How well we execute on our strategy and operating plans

Changes in service gross margin may result from various factors such as changes in the mix between technical support services and advanced services, as well as the timing of technical support service contract initiations and renewals and the addition of personnel and other resources to support higher levels of service business in future periods.

SALES TO THE SERVICE PROVIDER MARKET ARE ESPECIALLY VOLATILE, AND WEAKNESS IN SALES ORDERS FROM THIS INDUSTRY MAY HARM OUR OPERATING RESULTS AND FINANCIAL CONDITION

Sales to the service provider market have been characterized by large and sporadic purchases, especially relating to our router sales and sales of certain of our advanced technologies, in addition to longer sales cycles. In the past, we have experienced significant weakness in sales to service providers over certain extended periods of time as market conditions have fluctuated. Sales activity in this industry depends upon the stage of completion of expanding network infrastructures; the availability of funding; and the extent to which service providers are affected by regulatory, economic, and business conditions in the country of operations. Weakness in orders from this industry, including as a result of any slowdown in capital expenditures by service providers (which may be more prevalent during a global economic downturn), could have a material adverse effect on our business, operating results, and financial condition. For example, during fiscal 2009, we experienced a slowdown in service provider capital expenditures globally, which may continue in future quarters. Orders from this industry could decline for many reasons other than the competitiveness of our products and services within their respective markets. For example, in the past, many of our service provider customers have been materially and adversely affected by slowdowns in the general economy, by overcapacity, by changes in the service provider market, by regulatory developments, and by constraints on capital availability, resulting in business failures and substantial reductions in spending and expansion plans. These conditions have materially harmed our business and operating results in the past, and some of these or other conditions in the service provider market could affect our business and operating results in any future period. Finally, service provider customers typically have longer implementation cycles; require a broader range of services, including design services; demand that vendors take on a larger share of risks; often require acceptance provisions, which can lead to a delay in revenue recognition; and expect financing from vendors. All these factors can add further risk to business conducted with service providers.

DISRUPTION OF OR CHANGES IN OUR DISTRIBUTION MODEL COULD HARM OUR SALES AND MARGINS

If we fail to manage distribution of our products and services properly, or if our distributors' financial condition or operations weaken, our revenue and gross margins could be adversely affected.

A substantial portion of our products and services is sold through our channel partners, and the remainder is sold through direct sales. Our channel partners include systems integrators, service providers, other resellers, distributors, and retail partners. Systems integrators and service providers typically sell directly to end users and often provide system installation, technical support, professional services, and other support services in addition to network equipment sales. Systems integrators also typically integrate our products into an overall solution, and a number of service providers are also systems integrators. Distributors stock inventory and typically sell to systems integrators, service providers, and

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

other resellers. In addition, home networking products are generally sold through distributors and retail partners. We refer to sales through distributors and retail partners as our two-tier system of sales to the end customer. Revenue from distributors and retail partners is recognized based on a sell-through method using information provided

Table of Contents

by them. These distributors and retail partners are generally given business terms that allow them to return a portion of inventory, receive credits for changes in selling prices, and participate in various cooperative marketing programs. If sales through indirect channels increase, this may lead to greater difficulty in forecasting the mix of our products and, to a degree, the timing of orders from our customers.

Historically, we have seen fluctuations in our gross margins based on changes in the balance of our distribution channels. Although variability to date has not been significant, there can be no assurance that changes in the balance of our distribution model in future periods would not have an adverse effect on our gross margins and profitability.

Some factors could result in disruption of or changes in our distribution model, which could harm our sales and margins, including the following:

We compete with some of our channel partners, including through our direct sales, which may lead these channel partners to use other suppliers that do not directly sell their own products or otherwise compete with them

Some of our channel partners may demand that we absorb a greater share of the risks that their customers may ask them to bear

Some of our channel partners may have insufficient financial resources and may not be able to withstand changes and challenges in business conditions

Revenue from indirect sales could suffer if our distributors' financial condition or operations weaken

In addition, we depend on our channel partners globally to comply with applicable regulatory requirements. To the extent that they fail to do so, that could have a material adverse effect on our business, operating results, and financial condition.

THE MARKETS IN WHICH WE COMPETE ARE INTENSELY COMPETITIVE, WHICH COULD ADVERSELY AFFECT OUR ACHIEVEMENT OF REVENUE GROWTH

The markets in which we compete are characterized by rapid change, converging technologies, and a migration to networking and communications solutions that offer relative advantages. These market factors represent a competitive threat to us. We compete with numerous vendors in each product category. The overall number of our competitors providing niche product solutions may increase. Also, the identity and composition of competitors may change as we increase our activity in our advanced technology markets and market adjacencies. As we continue to expand globally, we may see new competition in different geographic regions. In particular, we have experienced price-focused competition from competitors in Asia, especially from China, and we anticipate this will continue. Our competitors include: Alcatel-Lucent; ARRIS Group, Inc.; Aruba Networks, Inc.; Avaya Inc.; Belden Inc.; Brocade Communications Systems, Inc.; Check Point Software Technologies Ltd.; Citrix Systems, Inc.; D-Link Corporation; LM Ericsson Telephone Company; Extreme Networks, Inc.; F5 Networks, Inc.; Force10 Networks, Inc.; Fortinet, Inc.; Hewlett-Packard Company; Huawei Technologies Co., Ltd.; International Business Machines Corporation; Juniper Networks, Inc.; LogMeIn, Inc.; Meru Networks, Inc.; Microsoft Corporation; Motorola, Inc.; NETGEAR, Inc.; Nortel Networks Corporation; Riverbed Technology, Inc.; and Symantec Corporation; among others.

Some of these companies compete across many of our product lines, while others are primarily focused in a specific product area. Barriers to entry are relatively low, and new ventures to create products that do or could compete with our products are regularly formed. In addition, some of our competitors may have greater resources, including technical and engineering resources, than we do. As we expand into new markets, we will face competition not only from our existing competitors but also from other competitors, including existing companies with strong technological, marketing, and sales positions in those markets. We also sometimes face competition from resellers and distributors of our products. Companies with whom we have strategic alliances in some areas may be competitors in other areas.

For example, the enterprise data center is undergoing a fundamental transformation arising from the convergence of technologies, including computing, networking, storage, and software, that previously were siloed. Due to several factors, including the availability of highly scalable and general purpose microprocessors, application-specific integrated circuits offering advanced services, standards based protocols, cloud computing and virtualization, the application of these converging technologies is spanning multiple, previously independent, technology segments. Also, some of our current and potential competitors for enterprise data center business have made acquisitions, or announced new

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

strategic alliances, designed to position them to provide end-to-end technology solutions for the enterprise data center. As a result of all of these developments, we face greater competition in the development and sale of enterprise

Table of Contents

data center technologies, including competition from entities that are among our long-term strategic alliance partners. Companies that are strategic alliance partners in some areas of our business may acquire or form alliances with our competitors, thereby reducing their business with us.

The principal competitive factors in the markets in which we presently compete and may compete in the future include:

The ability to provide a broad range of networking and communications products and services

Product performance

Price

The ability to introduce new products, including products with price-performance advantages

The ability to reduce production costs

The ability to provide value-added features such as security, reliability, and investment protection

Conformance to standards

Market presence

The ability to provide financing

Disruptive technology shifts and new business models

We also face competition from customers to which we license or supply technology and suppliers from which we transfer technology. The inherent nature of networking requires interoperability. As such, we must cooperate and at the same time compete with many companies. Any inability to effectively manage these complicated relationships with customers, suppliers, and strategic alliance partners could have a material adverse effect on our business, operating results, and financial condition and accordingly affect our chances of success.

OUR INVENTORY MANAGEMENT RELATING TO OUR SALES TO OUR TWO-TIER DISTRIBUTION CHANNEL IS COMPLEX, AND EXCESS INVENTORY MAY HARM OUR GROSS MARGINS

We must manage our inventory relating to sales to our distributors and retail partners effectively, because inventory held by them could affect our results of operations. Our distributors and retail partners may increase orders during periods of product shortages, cancel orders if their inventory is too high, or delay orders in anticipation of new products. They also may adjust their orders in response to the supply of our products and the products of our competitors that are available to them and in response to seasonal fluctuations in end-user demand. Revenue to our distributors and retail partners is recognized based on a sell-through method using information provided by them, and they are generally given business terms that allow them to return a portion of inventory, receive credits for changes in selling price, and participate in various cooperative marketing programs. Inventory management remains an area of focus as we balance the need to maintain strategic inventory levels to ensure competitive lead times against the risk of inventory obsolescence because of rapidly changing technology and customer requirements. If we ultimately determine that we have excess inventory, we may have to reduce our prices and write down inventory, which in turn could result in

lower gross margins.

SUPPLY CHAIN ISSUES, INCLUDING FINANCIAL PROBLEMS OF CONTRACT MANUFACTURERS OR COMPONENT SUPPLIERS, OR A SHORTAGE OF ADEQUATE COMPONENT SUPPLY OR MANUFACTURING CAPACITY THAT INCREASED OUR COSTS OR CAUSED A DELAY IN OUR ABILITY TO FULFILL ORDERS, COULD HAVE AN ADVERSE IMPACT ON OUR BUSINESS AND OPERATING RESULTS, AND OUR FAILURE TO ESTIMATE CUSTOMER DEMAND PROPERLY MAY RESULT IN EXCESS OR OBSOLETE COMPONENT SUPPLY, WHICH COULD ADVERSELY AFFECT OUR GROSS MARGINS

The fact that we do not own or operate the bulk of our manufacturing facilities and that we are reliant on our extended supply chain could have an adverse impact on the supply of our products and on our business and operating results:

Table of Contents

Any financial problems of either contract manufacturers or component suppliers could either limit supply or increase costs

Reservation of manufacturing capacity at our contract manufacturers by other companies, inside or outside of our industry, could either limit supply or increase costs

A reduction or interruption in supply; a significant increase in the price of one or more components; a failure to adequately authorize procurement of inventory by our contract manufacturers; a failure to appropriately cancel, reschedule, or adjust our requirements based on our business needs; or a decrease in demand for our products could materially adversely affect our business, operating results, and financial condition and could materially damage customer relationships. Furthermore, as a result of binding price or purchase commitments with suppliers, we may be obligated to purchase components at prices that are higher than those available in the current market. In the event that we become committed to purchase components at prices in excess of the current market price when the components are actually used, our gross margins could decrease. As the economic recovery takes hold, some tightening of supply has been observed in some components. See the risk factor above entitled Our revenue for a particular period is difficult to predict, and a shortfall in revenue may harm our operating results.

Our growth and ability to meet customer demands depend in part on our ability to obtain timely deliveries of parts from our suppliers and contract manufacturers. We have experienced component shortages in the past, including shortages caused by manufacturing process issues, that have affected our operations. We may in the future experience a shortage of certain component parts as a result of our own manufacturing issues, manufacturing issues at our suppliers or contract manufacturers, capacity problems experienced by our suppliers or contract manufacturers, or strong demand in the industry for those parts. A return to growth in the economy is likely to create greater pressures on us and our suppliers to accurately project overall component demand and component demands within specific product categories and to establish optimal component levels. For example, similar to what is happening in the industry we are seeing some product lead time extensions stemming from supplier constraints based upon their labor and other actions taken during the global economic downturn. If shortages or delays persist, the price of these components may increase, or the components may not be available at all, and we may also encounter shortages if we do not accurately anticipate our needs. We may not be able to secure enough components at reasonable prices or of acceptable quality to build new products in a timely manner in the quantities or configurations needed. Accordingly, our revenue and gross margins could suffer until other sources can be developed. Our operating results would also be adversely affected if, anticipating greater demand than actually develops, we commit to the purchase of more components than we need, which is more likely to occur in a period of demand uncertainties such as we are currently experiencing. There can be no assurance that we will not encounter these problems in the future. Although in many cases we use standard parts and components for our products, certain components are presently available only from a single source or limited sources, and a global economic downturn and related market uncertainty could negatively impact one or more of these sources. We may not be able to diversify sources in a timely manner, which could harm our ability to deliver products to customers and seriously impact present and future sales.

We believe that we may be faced with the following challenges in the future:

New markets in which we participate may grow quickly, which may make it difficult to quickly obtain significant component capacity

As we acquire companies and new technologies, we may be dependent, at least initially, on unfamiliar supply chains or relatively small supply partners

We face competition for certain components that are supply-constrained, from existing competitors, and companies in other markets. Manufacturing capacity and component supply constraints could be significant issues for us. We purchase components from a variety of suppliers and use several contract manufacturers to provide manufacturing services for our products. During the normal course of business, in order to improve manufacturing lead-time performance and to help ensure adequate component supply, we enter into agreements with contract manufacturers and suppliers that either allow them to procure inventory based upon criteria as defined by us or that establish the parameters defining our requirements. In certain instances, these agreements allow us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being placed. If we fail to anticipate customer demand properly, an oversupply of parts could result in excess or obsolete components that could adversely affect our gross margins. For additional information regarding our purchase commitments with contract manufacturers and suppliers, see Note 11 to the Consolidated Financial Statements contained in this report.

Table of Contents

Our key manufacturing facility for Scientific-Atlanta's products is located in Juarez, Mexico, and we may be materially and adversely affected by any prolonged disruption in the operation of this facility.

WE DEPEND UPON THE DEVELOPMENT OF NEW PRODUCTS AND ENHANCEMENTS TO EXISTING PRODUCTS, AND IF WE FAIL TO PREDICT AND RESPOND TO EMERGING TECHNOLOGICAL TRENDS AND CUSTOMERS' CHANGING NEEDS, OUR OPERATING RESULTS AND MARKET SHARE MAY SUFFER

The markets for our products are characterized by rapidly changing technology, evolving industry standards, new product introductions, and evolving methods of building and operating networks. Our operating results depend on our ability to develop and introduce new products into existing and emerging markets and to reduce the production costs of existing products. We believe the industry is evolving to enable personal and business process collaboration enabled by networked Web 2.0, the technologies that enable user collaboration, as part of the second major phase of the Internet. As such, many of our strategic initiatives and investments are aimed at meeting the requirements that a network capable of multiple party, collaborative interaction would demand, and the investments we have made and our architectural approach are designed to enable networked Web 2.0 and the increased use of the network as the platform for all forms of communications and IT. Also, in March 2009 we launched our Unified Computing System (UCS), our next-generation enterprise data center platform architected to unite computing, network, storage access, and virtualization resources in a single system, which is designed to address the fundamental transformation occurring in the enterprise data center. UCS is one of several market adjacencies on which we are focusing resources. The process of developing new technology is complex and uncertain, and if we fail to accurately predict customers' changing needs and emerging technological trends our business could be harmed. We must commit significant resources, including the investments we have been making in market adjacencies and in the United States and select emerging countries mentioned above, to developing new products before knowing whether our investments will result in products the market will accept. In particular, if our model of the evolution of networking to collaborative systems does not emerge as we believe it will, or if the industry does not evolve as we believe it will, or if our strategy for addressing this evolution is not successful, many of our strategic initiatives and investments may be of no or limited value. Furthermore, we may not execute successfully on that vision because of errors in product planning or timing, technical hurdles that we fail to overcome in a timely fashion, or a lack of appropriate resources. This could result in competitors providing those solutions before we do and loss of market share, net sales, and earnings. The success of new products depends on several factors, including proper new product definition, component costs, timely completion and introduction of these products, differentiation of new products from those of our competitors, and market acceptance of these products. There can be no assurance that we will successfully identify new product opportunities, develop and bring new products to market in a timely manner, or achieve market acceptance of our products or that products and technologies developed by others will not render our products or technologies obsolete or noncompetitive. The products and technologies that we identify as emerging technologies or advanced technologies may not prove to have the market success we anticipate, and we may not successfully identify and invest in other emerging or advanced technologies.

OVER THE LONG TERM WE INTEND TO INCREASE OUR INVESTMENT IN ENGINEERING, SALES, SERVICE AND MANUFACTURING ACTIVITIES, AND THESE INVESTMENTS MAY ACHIEVE DELAYED, OR LOWER THAN EXPECTED BENEFITS WHICH COULD HARM OUR OPERATING RESULTS

While recently we have focused on managing our costs and expenses, over the long term, we intend to continue to add personnel and other resources to our engineering, sales, service, and manufacturing functions as we focus on developing emerging technologies, the next wave of advanced technologies, growing the commercial market segment, capitalizing on our emerging market opportunities, enhancing our evolving support model and increasing our market share gains. We are likely to recognize the costs associated with these investments earlier than some of the anticipated benefits, and the return on these investments may be lower, or may develop more slowly, than we expect. If we do not achieve the benefits anticipated from these investments, or if the achievement of these benefits is delayed, our operating results may be adversely affected.

OUR BUSINESS SUBSTANTIALLY DEPENDS UPON THE CONTINUED GROWTH OF THE INTERNET AND INTERNET-BASED SYSTEMS

A substantial portion of our business and revenue depends on growth and evolution of the Internet, including the continued development of networked Web 2.0 as part of the second major phase of the Internet, and on the deployment of our products by customers who depend on such continued growth and evolution. To the extent that an economic slowdown and reduction in capital spending adversely affect spending on Internet infrastructure, as we are currently seeing, we could experience material harm to our business, operating results, and financial condition.

Table of Contents

Because of the rapid introduction of new products and changing customer requirements related to matters such as cost-effectiveness and security, we believe that there could be performance problems with Internet communications in the future, which could receive a high degree of publicity and visibility. Because we are a large supplier of networking products, our business, operating results, and financial condition may be materially adversely affected, regardless of whether or not these problems are due to the performance of our own products. Such an event could also result in a material adverse effect on the market price of our common stock independent of direct effects on our business.

CHANGES IN INDUSTRY STRUCTURE AND MARKET CONDITIONS COULD LEAD TO CHARGES RELATED TO DISCONTINUANCES OF CERTAIN OF OUR PRODUCTS OR BUSINESSES AND ASSET IMPAIRMENTS

In response to changes in industry and market conditions, we may be required to strategically realign our resources and consider restructuring, disposing of, or otherwise exiting businesses. Any decision to limit investment in or dispose of or otherwise exit businesses may result in the recording of special charges, such as inventory and technology-related write-offs, workforce reduction costs, charges relating to consolidation of excess facilities, or claims from third parties who were resellers or users of discontinued products. Our estimates with respect to the useful life or ultimate recoverability of our carrying basis of assets, including purchased intangible assets, could change as a result of such assessments and decisions. Further, our estimates relating to the liabilities for excess facilities are affected by changes in real estate market conditions. Additionally, we are required to perform goodwill impairment tests on an annual basis and between annual tests in certain circumstances, and future goodwill impairment tests may result in a charge to earnings.

WE HAVE MADE AND EXPECT TO CONTINUE TO MAKE ACQUISITIONS THAT COULD DISRUPT OUR OPERATIONS AND HARM OUR OPERATING RESULTS

Our growth depends upon market growth, our ability to enhance our existing products, and our ability to introduce new products on a timely basis. We intend to continue to address the need to develop new products and enhance existing products through acquisitions of other companies, product lines, technologies, and personnel. Acquisitions involve numerous risks, including the following:

Difficulties in integrating the operations, systems, technologies, products, and personnel of the acquired companies, particularly companies with large and widespread operations and/or complex products, such as Scientific-Atlanta and WebEx

Diversion of management's attention from normal daily operations of the business and the challenges of managing larger and more widespread operations resulting from acquisitions

Potential difficulties in completing projects associated with in-process research and development intangibles

Difficulties in entering markets in which we have no or limited direct prior experience and where competitors in such markets have stronger market positions

Initial dependence on unfamiliar supply chains or relatively small supply partners

Insufficient revenue to offset increased expenses associated with acquisitions

The potential loss of key employees, customers, distributors, vendors and other business partners of the companies we acquire following and continuing after announcement of acquisition plans

Acquisitions may also cause us to:

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Issue common stock that would dilute our current shareholders' percentage ownership

Use a substantial portion of our cash resources, as we did in connection with our fiscal 2007 acquisition of WebEx, or incur debt, as we did in fiscal 2006 when we issued and sold \$6.5 billion in senior unsecured notes to fund our acquisition of Scientific-Atlanta

Significantly increase our interest expense, leverage and debt service requirements if we incur additional debt to pay for an acquisition

Assume liabilities

Table of Contents

Record goodwill and nonamortizable intangible assets that are subject to impairment testing on a regular basis and potential periodic impairment charges

Incur amortization expenses related to certain intangible assets

Incur tax expenses related to the effect of acquisitions on our intercompany research and development (R&D) cost sharing arrangement and legal structure

Incur large and immediate write-offs and restructuring and other related expenses

Become subject to intellectual property or other litigation

Mergers and acquisitions of high-technology companies are inherently risky and subject to many factors outside of our control, and no assurance can be given that our previous or future acquisitions will be successful and will not materially adversely affect our business, operating results, or financial condition. Failure to manage and successfully integrate acquisitions could materially harm our business and operating results. Prior acquisitions have resulted in a wide range of outcomes, from successful introduction of new products and technologies to a failure to do so. Even when an acquired company has already developed and marketed products, there can be no assurance that product enhancements will be made in a timely fashion or that pre-acquisition due diligence will have identified all possible issues that might arise with respect to such products.

From time to time, we have made acquisitions that resulted in charges in an individual quarter. These charges may occur in any particular quarter, resulting in variability in our quarterly earnings. In addition, our effective tax rate for future periods is uncertain and could be impacted by mergers and acquisitions. Risks related to new product development also apply to acquisitions. Please see the risk factors above, including the risk factor entitled "We depend upon the development of new products and enhancements to existing products, and if we fail to predict and respond to emerging technological trends and customers' changing needs, our operating results and market share may suffer" for additional information.

ENTRANCE INTO NEW OR DEVELOPING MARKETS EXPOSES US TO ADDITIONAL COMPETITION AND WILL LIKELY INCREASE DEMANDS ON OUR SERVICE AND SUPPORT OPERATIONS

As we focus on new market opportunities—for example, storage; wireless; security; transporting data, voice, and video traffic across the same network; and other advanced technologies, emerging technologies and market adjacencies—we will increasingly compete with large telecommunications equipment suppliers as well as startup companies. Several of our competitors may have greater resources, including technical and engineering resources, than we do. Additionally, as customers in these markets complete infrastructure deployments, they may require greater levels of service, support, and financing than we have provided in the past, especially in the Emerging Markets theater. Demand for these types of service, support, or financing contracts may increase in the future. There can be no assurance that we can provide products, service, support, and financing to effectively compete for these market opportunities.

Further, provision of greater levels of services, support and financing by us may result in a delay in the timing of revenue recognition. In addition, entry into other markets, including our entry into the consumer market, has subjected and will subject us to additional risks, particularly to those markets, including the effects of general market conditions and reduced consumer confidence.

INDUSTRY CONSOLIDATION MAY LEAD TO INCREASED COMPETITION AND MAY HARM OUR OPERATING RESULTS

There has been a trend toward industry consolidation in our markets for several years. We expect this trend to continue as companies attempt to strengthen or hold their market positions in an evolving industry and as companies are acquired or are unable to continue operations. For example, some of our current and potential competitors for enterprise data center business have made acquisitions, or announced new strategic alliances, designed to position them with the ability to provide end-to-end technology solutions for the enterprise data center. Companies that are strategic alliance partners in some areas of our business may acquire or form alliances with our competitors, thereby reducing their business with us. We believe that industry consolidation may result in stronger competitors that are better able to compete as sole-source vendors for customers. This could lead to more variability in our operating results and could have a material adverse effect on our business, operating results, and financial condition. Furthermore, particularly in the service provider market, rapid consolidation will lead to fewer customers, with the effect that loss of a major customer could have a material impact on results not anticipated in a customer marketplace composed of more

numerous participants.

Table of Contents

PRODUCT QUALITY PROBLEMS COULD LEAD TO REDUCED REVENUE, GROSS MARGINS, AND NET INCOME

We produce highly complex products that incorporate leading-edge technology, including both hardware and software. Software typically contains bugs that can unexpectedly interfere with expected operations. There can be no assurance that our preshipment testing programs will be adequate to detect all defects, either ones in individual products or ones that could affect numerous shipments, which might interfere with customer satisfaction, reduce sales opportunities, or affect gross margins. In the past, we have had to replace certain components and provide remediation in response to the discovery of defects or bugs in products that we had shipped. Although the cost of such remediation has not been material in the past, there can be no assurance that such a remediation, depending on the product involved, would not have a material impact. An inability to cure a product defect could result in the failure of a product line, temporary or permanent withdrawal from a product or market, damage to our reputation, inventory costs, or product reengineering expenses, any of which could have a material impact on our revenue, margins, and net income.

DUE TO THE GLOBAL NATURE OF OUR OPERATIONS, POLITICAL OR ECONOMIC CHANGES OR OTHER FACTORS IN A SPECIFIC COUNTRY OR REGION COULD HARM OUR OPERATING RESULTS AND FINANCIAL CONDITION

We conduct significant sales and customer support operations in countries outside of the United States; maintain a manufacturing facility for a substantial portion of our video systems products in Juarez, Mexico; and also depend on non-U.S. operations of our contract manufacturers, component suppliers and distribution partners. Although sales in our Emerging Markets theater have decreased during the recent global economic downturn, prior to such time our Emerging Markets theater has been a relatively fast growing theater, and we have announced plans to expand our commitments and expectations in this theater. As such, our growth depends in part on our increasing sales into this theater. We also intend to expand our level of business activity in two large emerging countries, India and China, and our growth in the Asia Pacific theater will also depend in part upon our increasing sales in these countries. Our future results could be materially adversely affected by a variety of factors relating to our operations outside the United States, any or all of which could have a material adverse effect on our operating results and financial condition, including, among others, the following:

The worldwide impact of the recent global economic downturn and related market uncertainty

Foreign currency exchange rates

Political or social unrest

Economic instability or weakness or natural disasters in a specific country or region; environmental and trade protection measures and other legal and regulatory requirements, some of which may affect our ability to import our products to export our products from, or sell our products in various countries

Political considerations that affect service provider and government spending patterns

Health or similar issues, such as a pandemic or epidemic (including the H1N1 virus outbreak)

Difficulties in staffing and managing international operations

Adverse tax consequences, including imposition of withholding or other taxes on payments by subsidiaries

WE ARE EXPOSED TO THE CREDIT RISK OF SOME OF OUR CUSTOMERS AND TO CREDIT EXPOSURES IN WEAKENED MARKETS, WHICH COULD RESULT IN MATERIAL LOSSES

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Most of our sales are on an open credit basis, with typical payment terms of 30 days in the United States and, because of local customs or conditions, longer in some markets outside the United States. We monitor individual customer payment capability in granting such open credit arrangements, seek to limit such open credit to amounts we believe the customers can pay, and maintain reserves we believe are adequate to cover exposure for doubtful accounts. Beyond our open credit arrangements, we have also experienced demands for customer financing and facilitation of leasing arrangements. We expect demand for customer financing to continue, and recently we have been experiencing an increase in this demand as the credit markets have been impacted by the recent

Table of Contents

global economic downturn and related market uncertainty, including increased demand from customers in certain countries within our Emerging Markets theater. We believe customer financing is a competitive factor in obtaining business, particularly in serving customers involved in significant infrastructure projects. Our loan financing arrangements may include not only financing the acquisition of our products and services but also providing additional funds for other costs associated with network installation and integration of our products and services.

Our exposure to the credit risks relating to our financing activities described above may increase if our customers are adversely affected by a global economic downturn, or if there is a continuation or worsening of the downturn. Although we have programs in place that are designed to monitor and mitigate the associated risk, including monitoring of particular risks in certain geographic areas, there can be no assurance that such programs will be effective in reducing our credit risks.

In the past, there have been significant bankruptcies among customers both on open credit and with loan or lease financing arrangements, particularly among Internet businesses and service providers, causing us to incur economic or financial losses. There can be no assurance that additional losses will not be incurred. Although these losses have not been material to date, future losses, if incurred, could harm our business and have a material adverse effect on our operating results and financial condition. A portion of our sales is derived through our distributors and retail partners. These distributors and retail partners are generally given business terms that allow them to return a portion of inventory, receive credits for changes in selling prices, and participate in various cooperative marketing programs. We maintain estimated accruals and allowances for such business terms. However, distributors tend to have more limited financial resources than other resellers and end-user customers and therefore represent potential sources of increased credit risk, because they may be more likely to lack the reserve resources to meet payment obligations. Additionally, to the degree that turmoil in the credit markets makes it more difficult for some customers to obtain financing, those customers' ability to pay could be adversely impacted, which in turn could have a material adverse impact on our business, operating results, and financial condition.

WE ARE EXPOSED TO FLUCTUATIONS IN CURRENCY EXCHANGE RATES THAT COULD NEGATIVELY IMPACT OUR FINANCIAL RESULTS AND CASH FLOWS

Because a significant portion of our business is conducted outside the United States, we face exposure to adverse movements in foreign currency exchange rates. These exposures may change over time as business practices evolve, and they could have a material adverse impact on our financial results and cash flows. Historically, our primary exposures have related to nondollar-denominated sales in Japan, Canada, and Australia and certain nondollar-denominated operating expenses and service cost of sales in Europe, Latin America, and Asia, where we sell primarily in U.S. dollars. Additionally, we have exposures to emerging market currencies, which can have extreme currency volatility. An increase in the value of the dollar could increase the real cost to our customers of our products in those markets outside the United States where we sell in dollars, and a weakened dollar could increase the cost of local operating expenses and procurement of raw materials to the extent that we must purchase components in foreign currencies.

Currently, we enter into foreign exchange forward contracts and options to reduce the short-term impact of foreign currency fluctuations on certain foreign currency receivables, investments, and payables. In addition, we periodically hedge anticipated foreign currency cash flows. Our attempts to hedge against these risks may not be successful, resulting in an adverse impact on our net income.

During the first quarter of fiscal 2010, we entered into transactions to hedge a portion of the foreign currency consideration payable in connection with our announced, pending acquisition of Tandberg. These transactions produced gains that were recognized in the first quarter of 2010, and we could recognize losses or gains of a similar or greater magnitude in connection with those transactions or in connection with any similar transactions entered into in connection with that acquisition or future acquisitions. In addition, as the purchase consideration for Tandberg is denominated in a foreign currency, the amount of U.S. dollar equivalent for the Tandberg acquisition is dependent on exchange rates.

OUR PROPRIETARY RIGHTS MAY PROVE DIFFICULT TO ENFORCE

We generally rely on patents, copyrights, trademarks, and trade secret laws to establish and maintain proprietary rights in our technology and products. Although we have been issued numerous patents and other patent applications are currently pending, there can be no assurance that any of these patents or other proprietary rights will not be challenged, invalidated, or circumvented or that our rights will, in fact, provide competitive advantages to us. Furthermore, many key aspects of networking technology are governed by industrywide standards, which are usable by all market entrants. In addition, there can be no assurance that patents will be issued from pending applications or that claims allowed on any patents will be sufficiently broad to protect our technology. In addition, the laws of some foreign countries may not protect our proprietary rights to the same extent as do the laws of the United States. The outcome of any actions taken in these foreign countries may be different than if such actions were determined under the laws of the

Table of Contents

United States. Although we are not dependent on any individual patents or group of patents for particular segments of the business for which we compete, if we are unable to protect our proprietary rights to the totality of the features (including aspects of products protected other than by patent rights) in a market, we may find ourselves at a competitive disadvantage to others who need not incur the substantial expense, time, and effort required to create innovative products that have enabled us to be successful.

WE MAY BE FOUND TO INFRINGE ON INTELLECTUAL PROPERTY RIGHTS OF OTHERS

Third parties, including customers, have in the past and may in the future assert claims or initiate litigation related to exclusive patent, copyright, trademark, and other intellectual property rights to technologies and related standards that are relevant to us. These assertions have increased over time as a result of our growth and the general increase in the pace of patent claims assertions, particularly in the United States. Because of the existence of a large number of patents in the networking field, the secrecy of some pending patents, and the rapid rate of issuance of new patents, it is not economically practical or even possible to determine in advance whether a product or any of its components infringes or will infringe on the patent rights of others. The asserted claims and/or initiated litigation can include claims against us or our manufacturers, suppliers, or customers, alleging infringement of their proprietary rights with respect to our existing or future products or components of those products. Regardless of the merit of these claims, they can be time-consuming, result in costly litigation and diversion of technical and management personnel, or require us to develop a non-infringing technology or enter into license agreements. Where claims are made by customers, resistance even to unmeritorious claims could damage customer relationships. There can be no assurance that licenses will be available on acceptable terms and conditions, if at all, or that our indemnification by our suppliers will be adequate to cover our costs if a claim were brought directly against us or our customers. Furthermore, because of the potential for high court awards that are not necessarily predictable, it is not unusual to find even arguably unmeritorious claims settled for significant amounts. If any infringement or other intellectual property claim made against us by any third party is successful, if we are required to indemnify a customer with respect to a claim against the customer, or if we fail to develop non-infringing technology or license the proprietary rights on commercially reasonable terms and conditions, our business, operating results, and financial condition could be materially and adversely affected.

Our exposure to risks associated with the use of intellectual property may be increased as a result of acquisitions, as we have a lower level of visibility into the development process with respect to such technology or the care taken to safeguard against infringement risks. Further, in the past, third parties have made infringement and similar claims after we have acquired technology that had not been asserted prior to our acquisition.

WE RELY ON THE AVAILABILITY OF THIRD-PARTY LICENSES

Many of our products are designed to include software or other intellectual property licensed from third parties. It may be necessary in the future to seek or renew licenses relating to various aspects of these products. There can be no assurance that the necessary licenses would be available on acceptable terms, if at all. The inability to obtain certain licenses or other rights or to obtain such licenses or rights on favorable terms, or the need to engage in litigation regarding these matters, could have a material adverse effect on our business, operating results, and financial condition. Moreover, the inclusion in our products of software or other intellectual property licensed from third parties on a nonexclusive basis could limit our ability to protect our proprietary rights in our products.

OUR OPERATING RESULTS AND FUTURE PROSPECTS COULD BE MATERIALLY HARMED BY UNCERTAINTIES OF REGULATION OF THE INTERNET

Currently, few laws or regulations apply directly to access or commerce on the Internet. We could be materially adversely affected by regulation of the Internet and Internet commerce in any country where we operate. Such regulations could include matters such as voice over the Internet or using IP, encryption technology, sales taxes on Internet product sales, and access charges for Internet service providers. The adoption of regulation of the Internet and Internet commerce could decrease demand for our products and, at the same time, increase the cost of selling our products, which could have a material adverse effect on our business, operating results, and financial condition.

CHANGES IN TELECOMMUNICATIONS REGULATION AND TARIFFS COULD HARM OUR PROSPECTS AND FUTURE SALES

Changes in telecommunications requirements, or regulatory requirements in other industries in which we operate, in the United States or other countries could affect the sales of our products. In particular, we believe that there may be future changes in U.S. telecommunications regulations that could slow the expansion of the service providers' network infrastructures and materially adversely affect our business, operating results, and financial condition.

Table of Contents

Future changes in tariffs by regulatory agencies or application of tariff requirements to currently untariffed services could affect the sales of our products for certain classes of customers. Additionally, in the United States, our products must comply with various requirements and regulations of the Federal Communications Commission and other regulatory authorities. In countries outside of the United States, our products must meet various requirements of local telecommunications and other industry authorities. Changes in tariffs or failure by us to obtain timely approval of products could have a material adverse effect on our business, operating results, and financial condition.

FAILURE TO RETAIN AND RECRUIT KEY PERSONNEL WOULD HARM OUR ABILITY TO MEET KEY OBJECTIVES

Our success has always depended in large part on our ability to attract and retain highly skilled technical, managerial, sales, and marketing personnel. Competition for these personnel is intense, especially in the Silicon Valley area of Northern California. Stock incentive plans are designed to reward employees for their long-term contributions and provide incentives for them to remain with us. Volatility or lack of positive performance in our stock price or equity incentive awards, or changes to our overall compensation program, including our stock incentive program, resulting from the management of share dilution and share-based compensation expense or otherwise, may also adversely affect our ability to retain key employees. As a result of one or more of these factors, we may increase our hiring in geographic areas outside the United States, which could subject us to additional geopolitical and exchange rate risk. The loss of services of any of our key personnel; the inability to retain and attract qualified personnel in the future; or delays in hiring required personnel, particularly engineering and sales personnel, could make it difficult to meet key objectives, such as timely and effective product introductions. In addition, companies in our industry whose employees accept positions with competitors frequently claim that competitors have engaged in improper hiring practices. We have received these claims in the past and may receive additional claims to this effect in the future.

ADVERSE RESOLUTION OF LITIGATION OR GOVERNMENTAL INVESTIGATIONS MAY HARM OUR OPERATING RESULTS OR FINANCIAL CONDITION

We are a party to lawsuits in the normal course of our business. Litigation can be expensive, lengthy, and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict. In addition, Brazilian authorities are investigating our Brazilian subsidiary and certain of its current and former employees, as well as a Brazilian importer of our products, and its affiliates and employees, relating to the allegation of evading import taxes and other alleged improper transactions involving the subsidiary and the importer. We are conducting a thorough review of the matter. During fiscal 2009, Brazilian authorities asserted claims against us for calendar years 2003 and 2004, and we believe claims may also be asserted for calendar year 2005 through calendar year 2007. We believe the asserted claims are without merit and intend to defend the claims vigorously. In addition, we are investigating the allegations regarding improper transactions. We have proactively communicated with United States authorities to provide information and report on our findings, and the United States authorities are currently investigating such allegations. An unfavorable resolution of lawsuits or governmental investigations could have a material adverse effect on our business, operating results, or financial condition. For additional information regarding certain of the matters in which we are involved, see Item 1, Legal Proceedings, contained in Part II of this report.

CHANGES IN OUR PROVISION FOR INCOME TAXES OR ADVERSE OUTCOMES RESULTING FROM EXAMINATION OF OUR INCOME TAX RETURNS COULD ADVERSELY AFFECT OUR RESULTS

Our provision for income taxes is subject to volatility and could be adversely affected by earnings being lower than anticipated in countries that have lower tax rates and higher than anticipated in countries that have higher tax rates; by changes in the valuation of our deferred tax assets and liabilities; by expiration of or lapses in the R&D tax credit laws; by transfer pricing adjustments including the effect of acquisitions on our intercompany R&D cost sharing arrangement and legal structure; by tax effects of nondeductible compensation; by tax costs related to intercompany realignments; by changes in accounting principles; or by changes in tax laws and regulations including possible U.S. changes to the taxation of earnings of our foreign subsidiaries, and the deductibility of expenses attributable to foreign income, or the foreign tax credit rules. Significant judgment is required to determine the recognition and measurement attribute prescribed in the accounting guidance for uncertainty in income taxes. The accounting guidance for uncertainty in income taxes applies to all income tax positions, including the potential recovery of previously paid taxes, which if settled unfavorably could adversely impact our provision for income taxes or additional paid-in capital. Further, as a result of certain of our ongoing employment and capital investment actions and commitments, our income in certain countries is subject to reduced tax rates and in some cases is wholly exempt from tax. Our failure to meet these commitments could adversely impact our provision for income taxes. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these continuous examinations will not have an adverse effect on our operating results and financial condition.

Table of Contents

OUR BUSINESS AND OPERATIONS ARE ESPECIALLY SUBJECT TO THE RISKS OF EARTHQUAKES, FLOODS, AND OTHER NATURAL CATASTROPHIC EVENTS

Our corporate headquarters, including certain of our research and development operations are located in the Silicon Valley area of Northern California, a region known for seismic activity. Additionally, a certain number of our facilities are located near rivers that have experienced flooding in the past. A significant natural disaster, such as an earthquake, a hurricane, or a flood, could have a material adverse impact on our business, operating results, and financial condition.

MAN-MADE PROBLEMS SUCH AS COMPUTER VIRUSES OR TERRORISM MAY DISRUPT OUR OPERATIONS AND HARM OUR OPERATING RESULTS

Despite our implementation of network security measures our servers are vulnerable to computer viruses, break-ins, and similar disruptions from unauthorized tampering with our computer systems. Any such event could have a material adverse effect on our business, operating results, and financial condition. Efforts to limit the ability of malicious third parties to disrupt the operations of the Internet or undermine our own security efforts may meet with resistance. In addition, the continued threat of terrorism and heightened security and military action in response to this threat, or any future acts of terrorism, may cause further disruptions to the economies of the United States and other countries and create further uncertainties or otherwise materially harm our business, operating results, and financial condition. Likewise, events such as widespread blackouts could have similar negative impacts. To the extent that such disruptions or uncertainties result in delays or cancellations of customer orders or the manufacture or shipment of our products, our business, operating results, and financial condition could be materially and adversely affected.

WE ARE EXPOSED TO FLUCTUATIONS IN THE MARKET VALUES OF OUR PORTFOLIO INVESTMENTS AND IN INTEREST RATES; IMPAIRMENT OF OUR INVESTMENTS COULD HARM OUR EARNINGS

We maintain an investment portfolio of various holdings, types, and maturities. These securities are generally classified as available-for-sale and, consequently, are recorded on our Consolidated Balance Sheets at fair value with unrealized gains or losses reported as a component of accumulated other comprehensive income, net of tax. Our portfolio includes fixed income securities and equity investments in publicly traded companies, the values of which are subject to market price volatility to the extent unhedged. If such investments suffer market price declines, as we experienced with some of our investments during the first quarter of fiscal 2009, we may recognize in earnings the decline in the fair value of our investments below their cost basis when the decline is judged to be other than temporary. For information regarding the sensitivity of and risks associated with the market value of portfolio investments and interest rates, refer to the section titled Quantitative and Qualitative Disclosures About Market Risk. Our investments in private companies are subject to risk of loss of investment capital. These investments are inherently risky because the markets for the technologies or products they have under development are typically in the early stages and may never materialize. We could lose our entire investment in these companies.

IF WE DO NOT SUCCESSFULLY MANAGE OUR STRATEGIC ALLIANCES, WE MAY NOT REALIZE THE EXPECTED BENEFITS FROM SUCH ALLIANCES AND WE MAY EXPERIENCE INCREASED COMPETITION OR DELAYS IN PRODUCT DEVELOPMENT

We have several strategic alliances with large and complex organizations and other companies with which we work to offer complementary products and services and are in the process of establishing a joint venture to market services associated with our UCS products. These arrangements are generally limited to specific projects, the goal of which is generally to facilitate product compatibility and adoption of industry standards. There can be no assurance we will realize the expected benefits from these strategic alliances or from the joint venture. If successful, these relationships may be mutually beneficial and result in industry growth. However, alliances carry an element of risk because, in most cases, we must compete in some business areas with a company with which we have a strategic alliance and, at the same time, cooperate with that company in other business areas. Also, if these companies fail to perform or if these relationships fail to materialize as expected, we could suffer delays in product development or other operational difficulties. Joint ventures can be difficult to manage, given the potentially different interests of joint venture partners.

Table of Contents

OUR STOCK PRICE MAY BE VOLATILE

Historically, our common stock has experienced substantial price volatility, particularly as a result of variations between our actual financial results and the published expectations of analysts and as a result of announcements by our competitors and us. Furthermore, speculation in the press or investment community about our strategic position, financial condition, results of operations, business, security of our products, or significant transactions can cause changes in our stock price. In addition, the stock market has experienced extreme price and volume fluctuations that have affected the market price of many technology companies, in particular, and that have often been unrelated to the operating performance of these companies. These factors, as well as general economic and political conditions and the announcement of proposed and completed acquisitions or other significant transactions, or any difficulties associated with such transactions, by us or our current or potential competitors, may materially adversely affect the market price of our common stock in the future. Additionally, volatility, lack of positive performance in our stock price or changes to our overall compensation program including our stock incentive program may adversely affect our ability to retain key employees, virtually all of whom are compensated, in part, based on the performance of our stock price.

THERE CAN BE NO ASSURANCE THAT OUR OPERATING RESULTS AND FINANCIAL CONDITION WILL NOT BE ADVERSELY AFFECTED BY OUR INCURRENCE OF SENIOR UNSECURED DEBT

In February 2006, we issued senior unsecured notes in an aggregate principal amount of \$6.5 billion, of which \$500 million matured in February 2009, \$3.0 billion will mature in February 2011, and the balance will mature in February 2016. In addition, in February 2009 we issued an aggregate of \$4.0 billion of senior unsecured notes that mature at specific dates in 2019 and 2039. A portion of the proceeds of the notes issued in February 2009 was used to repay in full the notes that matured that month. In November 2009, we issued senior unsecured notes in an aggregate principal amount of \$5.0 billion, of which \$500 million will mature in November 2014, \$2.5 billion will mature in January 2020, and the balance will mature in January 2040. The outstanding notes bear fixed-rate interest payable semi-annually. The fair value of the long-term debt is subject to market interest rate volatility. The instruments governing the notes contain certain covenants applicable to us and our subsidiaries that may adversely affect our ability to incur certain liens or engage in certain types of sale and leaseback transactions. In addition, we will be required to have available in the United States sufficient cash to repay these notes on maturity. There can be no assurance that our incurrence of this debt will be a better means of providing liquidity to us than would our use of our existing cash resources, including cash currently held offshore. Further, we cannot be assured that our maintenance of this indebtedness will not adversely affect our operating results or financial condition. In addition, changes by any rating agency to our credit rating can negatively impact the value and liquidity of both our debt and equity securities.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

(a) None.

(b) None.

(c) Issuer Purchases of Equity Securities (in millions, except per-share amounts)

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share ⁽¹⁾	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽²⁾	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs ⁽²⁾
July 26, 2009 to August 22, 2009	7	\$ 22.10	7	\$ 4,656
August 23, 2009 to September 19, 2009	62	\$ 23.00	59	\$ 3,305
September 20, 2009 to October 24, 2009	10	\$ 23.63	10	\$ 3,068
Total	79	\$ 22.99	76	

⁽¹⁾ Includes approximately 2.8 million shares repurchased to satisfy tax withholding obligations that arose on the vesting of shares of restricted stock and restricted stock units.

⁽²⁾ On September 13, 2001, we announced that our Board of Directors had authorized a stock repurchase program. As of October 24, 2009, our Board of Directors had authorized the repurchase of up to \$62 billion of common stock under this program. During the first quarter of fiscal 2010, we repurchased and retired 76 million shares of our common stock under this program at a weighted-average price of \$22.99 per share for an aggregate purchase price of \$1.8 billion. As of October 24, 2009, we had repurchased and retired 2.9 billion shares of our common stock at a weighted-average price of \$20.47 per share for an aggregate purchase price of \$58.9 billion since inception of the stock repurchase program, and the remaining authorized amount for stock repurchases under this program was \$3.1 billion with no termination date. In addition, on November 4, 2009, our Board of Directors authorized the repurchase of up to an additional \$10 billion of our common stock under this program with no termination date.
