

Edgar Filing: NYSE Euronext - Form 425

NYSE Euronext
Form 425
June 02, 2011

Filed by Alpha Beta Netherlands Holding N.V.

Pursuant to Rule 425 under the Securities Act of 1933

Subject Companies:

NYSE Euronext

(Commission File No. 001-33392)

Deutsche Börse

June 2, 2011

Safe Harbour Statement

In connection with the proposed business combination transaction between NYSE Euronext and Deutsche Boerse AG, Alpha Beta Netherlands Holding N.V. (Holding), a newly formed holding company, has filed, and the SEC has declared effective on May 3, 2011, a Registration Statement on Form F-4 with the U.S. Securities and Exchange Commission (SEC) that includes (1) a proxy statement of NYSE Euronext that will also constitute a prospectus for Holding and (2) an offering prospectus of Holding to be used in connection with Holding 's offer to acquire Deutsche Boerse AG shares held by U.S. holders. Holding has also filed an offer document with the German Federal Financial Supervisory Authority (Bundesanstalt fuer Finanzdienstleistungsaufsicht) (BaFin), which was approved by the BaFin for publication pursuant to the German Takeover Act (Wertpapiererwerbs-und Übernahmegesetz), and was published on May 4, 2011.

Investors and security holders are urged to read the definitive proxy statement/prospectus, the offering prospectus, the offer document and published additional accompanying information in connection with the exchange offer regarding the proposed business combination transaction because they contain important information. You may obtain a free copy of the definitive proxy statement/prospectus, the offering prospectus and other related documents filed by NYSE Euronext and Holding with the SEC on the SEC 's website at www.sec.gov. The definitive proxy statement/prospectus and other documents relating thereto may also be obtained for free by accessing NYSE Euronext 's website at www.nyse.com. The offer document and published additional accompanying information in connection with the exchange offer are available at Holding 's website at www.global-exchange-operator.com. Holders of Deutsche Börse shares who have accepted the exchange offer have certain withdrawal rights which are set forth in the offer document.

This document is neither an offer to purchase nor a solicitation of an offer to sell shares of Holding, Deutsche Boerse AG or NYSE Euronext. The final terms and further provisions regarding the public offer are disclosed in the offer document that has been approved by the BaFin and in documents that have been filed with the SEC.

No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the U.S. Securities Act of 1933, as amended, and applicable European regulations. The exchange offer and the exchange offer document shall not constitute an issuance, publication or public advertising of an offer pursuant to laws and regulations of jurisdictions other than those of Germany, United Kingdom of Great Britain and Northern Ireland and the United States of America. The relevant final terms of the proposed business combination transaction will be disclosed in the information documents reviewed by the competent European market authorities.

Subject to certain exceptions, in particular with respect to qualified institutional investors (tekikaku kikan toshika) as defined in Article 2 para. 3 (i) of the Financial Instruments and Exchange Act of Japan (Law No. 25 of 1948, as amended), the exchange offer will not be made directly or indirectly in or into Japan, or by use of the mails or by any means or instrumentality (including without limitation, facsimile transmission, telephone and the internet) of interstate or foreign commerce or any facility of a national securities exchange of Japan. Accordingly, copies of this announcement or any accompanying documents may not be, directly or indirectly, mailed or otherwise distributed, forwarded or transmitted in, into or from Japan.

The shares of Holding have not been, and will not be, registered under the applicable securities laws of Japan. Accordingly, subject to certain exceptions, in particular with respect to qualified institutional investors (tekikaku kikan toshika) as defined in Article 2 para. 3 (i) of the Financial Instruments and Exchange Act of Japan (Law No. 25 of 1948, as amended), the shares of Holding may not be offered or sold within Japan, or to or for the account or benefit of any person in Japan.

Participants in the Solicitation

NYSE Euronext, Deutsche Boerse AG, Holding and their respective directors and executive officers and other members of management and employees may be deemed to be participants in the solicitation of proxies from NYSE Euronext stockholders in respect of the proposed business combination transaction. Additional information regarding the interests of such potential participants will be included in the definitive proxy statement/prospectus and the other relevant documents filed with the SEC.

Forward-Looking Statements

This document includes forward-looking statements about NYSE Euronext, Deutsche Boerse AG, Holding, the enlarged group and other persons, which may include statements about the proposed business combination, the likelihood that such transaction could be consummated, the effects of any transaction on the businesses of NYSE Euronext or Deutsche Boerse AG, and other statements that are not historical facts. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Forward-looking statements are not guarantees of future performance and actual results of operations, financial condition and liquidity, and the development of the industries in which NYSE Euronext and Deutsche Boerse AG operate may differ materially from those made in or suggested by the forward-looking statements contained in this document. Any forward-looking statements speak only as at the date of this document. Except as required by applicable law, none of NYSE Euronext, Deutsche Boerse AG or Holding undertakes any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events or otherwise.

The following presentation was presented at the Deutsche Börse Investor Day on June 1, 2011.

MAKING MARKETS WORK

5
10-year
transformative
journey
from
a
German

equities
market
to
one
of
the
world's
leading
providers
of
derivatives, risk management and post-trade infrastructure

Pioneer
&
innovator
in
using
technology
to
drive
capital
markets
growth
and
efficiency

Path to leadership position has involved M&A, partnerships and organic growth
Eurex and Clearstream established as leading global brands, complemented by strong brands in
cash equities and market data businesses

Over the last 2 years, Deutsche Börse has focused on completing and integrating its portfolio of world-
class assets, launching new products, expanding into growth markets and further driving efficiency

Acquired majority in STOXX (leading European index franchise) and EEX (power & emissions)

Rolled-out new products, established Clearstream operations in Singapore, launched partnership
with CETIP in Brazil, expanded network into Asia

Track record for cost discipline; 2010 efficiency program resulting in 150mn of cost savings by
2012

Strategy
yields
exceptional
cash
flow
generation,
strong
balance
sheet
and
attractive
distribution
policy

Merger with NYSE Euronext utilizes derivatives, risk management and post trade expertise of Deutsche
Börse Group and accelerates growth opportunities

Path to creating a global leader

Results

By far broadest product range and straight-through-processing
distribution network in Europe:

Objectives

Harmonization of trading infrastructure to increase operating
efficiency for market participants and Deutsche Börse

Improved technology for reliable trading and low latency
International access to all products traded on the Frankfurt Stock
Exchange through Xetra network (doubles member base for floor
trading)

Improvement of market quality through:

Performance oriented incentive schemes

Integrated fee model under which market specialists are
compensated by Deutsche Börse

Specialist as experts in development of corporate trading and
partner to issuers

On 23 May 2011 the
Frankfurt floor trading
has been successfully
migrated to the **Xetra**
trading system

Floor migration to Xetra system further expands network

Sales revenue

EBIT

MD&A supplies tradable content to capital market stakeholders worldwide

Business is based on less volatile revenue drivers compared to Deutsche Börse's trading businesses:

Trading Signals: number of units with access (i.e. legal entities, people, terminals, computers)

Indices + Benchmarks: number of issuers and underlyings, trading activity and assets under management

Others: number of content offerings, subscribers and transactions

Ongoing introduction of new tradable content: 15% of sales revenue generated with products that have been on the market for less than 3 years

Increasing revenue share from products independent of Deutsche Börse's venues

Products also serve as a basis for revenue generation in other segments (e.g. DAX future, ETF listings)

Sales revenue: 11% CAGR

EBIT: 19% CAGR

1) Adjusted for restructuring expenses

GSF outstandings (bn)
Clearstream
has
developed
into
a

global
liquidity
and
risk

management

hub by expanding the GSF service offering

Liquidity and risk management hub for the industry

By significantly expanding the service offering beyond
settlement and custody Clearstream has developed into a
liquidity and risk management hub for the financial industry

The liquidity and risk management hub delivers integrated
securities lending, borrowing and collateral management
services in cash, fixed-income and equities as part of the
GSF offering

Clearstream's sophisticated systems allow a high degree
of flexibility enabling the broad range of participants to
implement individual service requirements

Seamless connections to GC Pooling, a Eurex service,
which enables re-use of securities at the Bundesbank in
order to access ECB liquidity

As part of the global liquidity hub concept Clearstream is
delivering: multi currency eligibility, multi time-zone
eligibility, multi central bank money access eligibility and
multi segment eligibility.

37

Processing more volume while containing cost

For the past years, Deutsche Börse IT managed higher processing volumes at stable cost

Example: Eurex Production Backend Operations

Deutsche Börse experienced continuous growth of transaction volume

With respect to the exchange systems, quote volume increase is outpacing growth of trading volume

While extending and enhancing the systems, Deutsche Börse IT kept operating cost contained

Quote volume increase due to
growing share of high-frequency
trading

Cost relating to IT operation of the
Eurex trading and clearing backend
have been contained despite
growing system size, complexity,
and performance

Initiatives in order to further improve performance:

1.

A new host infrastructure allows for an additional latency decrease of 30%. At the same time, enlarged co-location

facilities will allow to offer performance services to more customers, while an enhanced co-location network infrastructure further reduces latency.

Implementation starts in Q3 2011.

2.

The new system platform is designed to incorporate high-performance hardware and software components, where appropriate. At OptimISE, latency values of 300 μ s are currently measured in production.

The global trend towards automated and algorithmic trading is driving throughput and latency requirements of trading systems

To address this trend, Deutsche Börse

IT continuously increased the performance of trading infrastructures and rolled out new low-latency interfaces

Over

the

past

years,

Design principles for Deutsche Börse IT's forward-looking application architecture:

Automated regression test

allowing for fully tested

software adaptation in less

than one week

Zero footprint and standards-

based interfaces supporting
backward compatibility
eliminate impact for

customers. This makes
backend changes

independent from customers

Increase of release frequency

The delivery of release
requirements is more efficient

based on the new software
development methodology and

DBG's new application

architecture: up to 40% less effort

for the same demand. This also

reduces elapsed construction time

More efficient service adaptation

Broader choice of software

solutions, including own-

developed, commercial and open

source software. Thus, the

selection of most adequate

solution for the requirement is

possible

Since non-differentiating software

can be purchased, more

development work is available for

differentiating the service

Choice of components

Clear, modular concept, allowing a choice between self-developed software and third-party components and among the latter between Open Source and commercial products

Strict separation of technical and functional layers, featuring high reuse of technical and non-differentiating functional components

Continued rollout of message-based zero footprint interfaces, comprising high-performance trading interface solutions and standards-based interfaces for trading and clearing

Software Development Methodology featuring agile concepts as well as an increased degree of automation in code build, test and documentation, in particular including an automated system and regression test

New architecture and development principles featuring More and Faster

Deutsche Börse Making Markets Work

/ Growth / IT

Software Architecture and Development Principles

Acceleration of Service Adaptation

Decrease of inventory requirements by better utilization of infrastructure, using virtualization and Cloud concepts
Streamlined management processes supporting service delivery
Re-balancing of system load through dynamic allocation of resources and also providing better means of disaster recovery

Choice of hardware vendors (resulting from the Linux-compatibility of DBG-IT's platform architecture) yields higher purchasing power. The usage of x86-based hardware and Linux allows usage of off-the-shelf base software components with minimal adaptation effort.

The hardware independence of Deutsche Börse IT's

platform strategy provides flexibility to run applications on commodity (e.g. x86-based) hardware and only invest in high-performance hardware where required. On basis of a homogeneous IT inventory, comprising backend platforms and running Linux as an operating system, this inventory is geared for virtualization and the implementation of a private Cloud. Thus Deutsche Börse IT is able to realize efficiency gains in both inventory and support processes:

Standardized technologies to form large server pools. CPU resources will converge to Linux and open source software: number of Linux servers to double by 2013

Virtualization of hardware resources, decoupling infrastructure from application services

Standardized, integrated network solution for all computer resources

Deutsche Börse Making Markets Work

/ Growth / IT

Provision of Virtualization and a Private Cloud

Making best Use of the Infrastructure

Standardization of hardware inventory and basis software pushes efficiency to a new level

Hardware and base software measures featuring:

Transition reduced 2011 cost guidance (mn)

Reduced 2011 cost guidance

1

Operating cost guidance reduced from 925mn to 890mn
and volume related cost guidance changed from 235-
255mn to around 255mn

Guidance for total costs in 2011 is 1,145mn (from 1,160-1,180mn); on a like-for-like basis, total costs are down to 1,105mn (adjusted for earnings neutral technical changes due to volume related costs)

Transition volume related costs

ISE/Xetra: Higher volume related costs due to liquidity payments as part of revised fee models: + 25mn/+ 15mn

Cost savings: Accelerated implementation of efficiency measures results in 115mn cost savings by 2011 (instead of 85mn): - 10mn volume related costs

Clearstream: Lower than anticipated increase of volume related costs: - 10-30mn

Transition operating costs

Cost savings: Accelerated implementation of efficiency measures: - 20mn operating costs

Depreciation & Amortization: Reduced regular depreciation of intangibles due to impairments in 2010: - 15mn

1

2008

Effective Group tax rate 28.5%, includes the following effects:

-

German tax reform

-

ISE acquisition

-

Relocation of ~50% of Frankfurt based staff to Eschborn in June 2008

2009

Effective Group tax rate 26.9% due to ~50% of Frankfurt-based staff located in Eschborn

2010

Tax guidance for around 26%, reflecting all Frankfurt-based staff now located in

Eschborn

Effective group tax rate reduced by ~10% within 5 years

Deutsche Börse Making Markets Work

/ Operating Efficiency

45

Under its Capital Management Policy, Deutsche Börse from 2005 to 2008 completed the largest capital distribution program in the exchange industry (2.9 billion, thereof 1.0 billion dividends and 1.9 billion share buybacks)

In 2009, Deutsche Börse implemented an interim holding for Clearstream (ring fencing)

to strengthen the

AA credit rating

Highly cash generative business model allowed for stable dividend in 2009 and 2010 (2.10 per share) despite the difficult market environment at the time

Deutsche Börse Making Markets Work / Capital Management

Continuing past practice, Deutsche Börse AG distributes funds not required for the Group's operating business and further development to its shareholders

The capital management policy foresees a dividend payout ratio of 40 to 60 percent complemented by share buy-backs

Both distribution components are subject to capital requirements, investment needs and general liquidity considerations

Due to its considerable clearing and post-trading business activity, Deutsche Börse Group is focused on maintaining a strong credit and rating profile, including Clearstream

Banking S.A.'s strong AA credit rating

Capital Management Policy

Deutsche Börse is focused on maintaining its strong credit and rating profile while pursuing an attractive distribution policy

POWERING THE EXCHANGING WORLD

48

Strong 1Q11 highlights strength and operating leverage of our model

Further evidence of our ongoing transformation

Our strategy is to build a capital markets community and drive the evolution of the exchange industry

Leverages leading position in the global capital markets to bolster service offerings and create the hub that brings together a capital markets community to facilitate and drive

innovation

Generates value for NYX shareholders through operating leverage and new revenue opportunities

Reduces dependency upon cyclical markets; enhances competitive position

Strong shareholder returns since 2009 validate our direction

Combining with Deutsche Börse accelerates our successful strategy

Compelling rationale in terms of both strategy and savings

Positioned to lead industry evolution

Substantial balance sheet strength

Moving forward from a position of strength

The combined company will have superior cash flow
generation
with
2010PF
FCF
of

~ 1.5bn

/

\$2.0bn ,

~70%

more cash than its nearest competitor

This will allow the combined entity to maintain the shareholder friendly distribution policy both Deutsche Börse and NYSE Euronext have pursued in the past. Ratings agencies expect an improved credit profile for NYSE Euronext as a result of a combination with Deutsche Börse.

With the DB merger, NYX creditors would benefit from the combined entity's broader and strategically better-positioned franchise and stronger cash flow generation. ~ Moody's, 2/15/2011

The combined company's strong balance sheet will provide financial stability to critical market infrastructure for the benefit of issuers, and trading and clearing participants.

Source: Company filings, FactSet; Note: Financial data as of 12/31/2010; /\$ exchange rate of 1.45 as of 5/6/2011, /\$ 1.33 at maturity

1)

FCF defined as operating cash flow minus capital expenditures; Run-rate revenue synergies of 150mn (\$218mn) and cost synergies of 150mn (\$218mn)

2)

Adjusted for restructuring expenses

A Deutsche Börse-NYSE Euronext merger will create a leader with superior cash flow generation and a strong balance sheet
