ORIX Corporation

Table of Contents**CONSOLIDATED FINANCIAL INFORMATION**

1. On February 13, 2012, ORIX Corporation (the Company) filed its quarterly financial report (*shihanki houkokusho*) with the Kanto Financial Bureau in Japan. This document is an English translation of unaudited consolidated financial information prepared in accordance with generally accepted accounting principles in the United States (U.S. GAAP) for the three and nine months ended December 31, 2010 and 2011.

2. Significant differences between U.S. GAAP and generally accepted accounting principles in Japan (Japanese GAAP) are stated in the notes of Overview of Accounting Principles Utilized.

In preparing its consolidated financial information, the Company and its subsidiaries have complied with U.S. GAAP, except as modified to account for stock splits in accordance with the usual practice in Japan.

These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under Risk Factors in the Company's most recent annual report on Form 20-F filed with the U.S. Securities and Exchange Commission.

These documents contain non-GAAP financial measures, including adjusted long-term and interest-bearing debt, adjusted total assets and adjusted ORIX Corporation shareholders' equity, as well as other measures and ratios calculated on the basis thereof. These Non-GAAP financial measures should not be considered in isolation or as a substitute for the most directly comparable financial measures included in our consolidated financial statements presented in accordance with U.S. GAAP. Reconciliations of these Non-GAAP financial measures to the most directly comparable U.S. GAAP measures are included on page 10 in these documents.

The Company believes that it will be considered a passive foreign investment company for U.S. Federal income tax purposes in the year to which these consolidated financial results relate and for the foreseeable future by reason of the composition of its assets and the nature of its income. A U.S. holder of the shares or ADSs of the Company is therefore subject to special rules generally intended to eliminate any benefits from the deferral of U.S. Federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.

1. Information on the Company and its Subsidiaries**(1) Consolidated Financial Highlights**

- Notes: 1. Pursuant to FASB Accounting Standards Codification (ASC) 205-20 (Presentation of Financial Statements Discontinued Operations), certain amounts in fiscal year ended March 31, 2011 related to the operations of subsidiaries, business units, and certain properties, which have been sold or are to be disposed of by sale without significant continuing involvement as of December 31, 2011 have been reclassified retroactively.
2. Consumption tax is excluded from the stated amount of total revenues.

Table of Contents

(2) Overview of Activities

For the nine months ended December 31, 2011, no significant changes were made in the Company and its subsidiaries' operations. Additionally, there are no changes of principal related companies.

2. Risk Factors

There were no additional Risk Factors for the nine months ended December 31, 2011.

In addition, there were not significant changes to the description under Risk Factors in the Form 20-F for the fiscal year ended March 31, 2011.

3. Material Contract

Not applicable.

4. Analysis of Financial Results and Condition

The following discussion provides management's explanation of factors and events that have significantly affected our financial condition and results of operations. Also included is management's assessment of factors and trends which are anticipated to have a material effect on our financial condition and results of operations in the future. However, please be advised that financial conditions and results of operations in the future may also be affected by factors other than those discussed here. These factors and trends regarding the future were assessed as of the issue date of the quarterly financial report (*shihanki houkokusho*).

(1) Qualitative Information Regarding Consolidated Financial Results

Economic Environment

The global economy continued to show moderate recovery. However, growth in emerging economies is starting to slow due to the protracted European debt issue and delayed economic recovery in advanced economies. Against this backdrop, 2012 is set to be a milestone year for politics with elections and changes in the top leadership of major nations and with economic policy of each country expected to be a focus of attention.

In the United States, business sentiment is improving and consumer spending continues to remain strong as employment continues to steadily improve.

Table of Contents

Financial concerns continue in peripheral nations of the European Union, which affect the financial and capital markets. Repercussions are starting to be felt in the real economy with business confidence rapidly deteriorating even among core European Union nations such as Germany. Despite the avoidance to date of a sovereign default through the cooperation of countries around the world, the underlying issues have yet to be resolved.

Emerging economies in Asia continue to experience stable growth, yet the specter of inflation continues to simmer beneath the surface. The rate of growth in emerging Asian economies is currently expected to slow due to the softness of the European and United States economies.

The Japanese economy continues to tread water despite recovery efforts from the Great East Japan Earthquake and a recovery in production activity. Amid the confusion in the global financial markets, the yen remains at a historic high, putting a squeeze on economic recovery.

Financial Highlights**Financial Results for the Nine Months Ended December 31, 2011**

Total revenues	¥714,587 million (Up 3% year on year)
Income before income taxes and discontinued operations	¥102,512 million (Up 36% year on year)
Net income attributable to ORIX Corporation	¥68,770 million (Up 35% year on year)
Earnings per share for net income attributable to ORIX Corporation (Basic)	¥639.68 (Up 35% year on year)
(Diluted)	¥534.26 (Up 34% year on year)
ROE (Annualized) *1	6.9% (5.2% during the same period of the previous fiscal year)
ROA (Annualized) *2	1.09% (0.83% during the same period of the previous fiscal year)

*1 ROE is the ratio of net income attributable to ORIX Corporation for the period to average ORIX Corporation Shareholders' Equity.

*2 ROA is the ratio of net income attributable to ORIX Corporation for the period to average Total Assets.

Total Revenues for the nine-month period ended December 31, 2011 (hereinafter the third consolidated period) increased 3% to ¥714,587 million compared to ¥695,648 million during the same period of the previous fiscal year. Interest on loans and investment securities decreased compared to the same period of the previous fiscal year in line with a decrease in the balance of installment loans. Meanwhile, operating lease revenues increased compared to the same period of the previous fiscal year primarily due to an increase in aircraft operating lease revenues in the Overseas Business segment, and brokerage commissions and net gains on investment securities increased compared to the same period of the previous fiscal year due to the sale of shares of Aozora Bank.

Total expenses decreased 3% to ¥612,725 million compared to ¥631,069 million during the same period of the previous fiscal year. Both interest expense and provision for doubtful receivables and probable loan losses decreased compared to the same period of the previous fiscal year due to a decrease in the balance of short- and long-term debt and a decrease in the amount of non-performing loans, respectively. In addition, write-downs of securities decreased mainly due to a decrease in write-downs recorded for non-marketable securities compared to the same period of the previous fiscal year. However, write-downs of long-lived assets increased compared to the same period of the previous year due to write-downs of properties under operating leases in the Real Estate segment.

Equity in net income (loss) of affiliates recorded a loss of ¥1,847 million, down from a profit of ¥9,014 million during the same period of the previous fiscal year. A write-down was recorded for the equity-method affiliate Monex Group, Inc.

As a result of the foregoing, income before income taxes and discontinued operations for the third consolidated period increased 36% to ¥102,512 million compared to ¥75,163 million during the same period of the previous fiscal year, and net income attributable to ORIX Corporation increased 35% to ¥68,770 million compared to ¥50,798 million during the same period of the previous fiscal year.

Table of Contents**Segment Information**

Total revenues and profits by segment for the nine months ended December 31, 2010 and 2011 are as follows:

	Millions of yen							
	Nine months ended December 31, 2010		Nine months ended December 31, 2011		Change (revenues)		Change (profits)	
	Segment Revenues	Segment Profits	Segment Revenues	Segment Profits (losses)	Amount	Percent (%)	Amount	Percent (%)

Total Consolidated Amounts	¥ 8,581,582	100.0	¥ 8,194,598	100.0	¥ (386,984)	(5)		

Compared to the same period of the previous fiscal year, segment profit in the Real Estate and Retail segments decreased, while segment profit in the Corporate Financial Services, Maintenance Leasing, Investment and Operation and Overseas Business segments increased.

In line with a change in management classification, the environment and energy-related businesses, which were previously included in the Corporate Financial Services segment have been included in the Investment and Operation segment since the second consolidated period.

Due to these changes, the reclassified figures are shown for the previous third consolidated period and the fiscal year ended March 31, 2011.

Edgar Filing: ORIX CORP - Form 6-K

Segment information for the third consolidated period is as follows:

Corporate Financial Services Segment

This segment is involved in lending, leasing and the commission business for the sale of financial products.

Segment revenue decreased 11% to ¥53,523 million compared to ¥59,896 million during the same period of the previous fiscal year due to a decrease in installment loan revenues in line with a decrease in the average balance of installment loans as a result of selective new loan origination continuing from the previous fiscal year despite robust direct financing lease revenues.

Table of Contents

Similarly, segment expenses decreased compared to the same period of the previous fiscal year, resulting from decreases in provision for doubtful receivables and probable loan losses and interest expense.

As a result, segment profit increased 77% to ¥14,749 million compared to ¥8,314 million during the same period of the previous fiscal year.

Segment assets decreased 11% compared to March 31, 2011 to ¥860,482 million due to declines in installment loans and investment in direct financing leases.

Maintenance Leasing Segment

This segment consists of automobile and rental operations. The automobile operations are comprised of automobile leasing, rentals and car sharing and the rental operations are comprised of leasing and rental of precision measuring and IT-related equipment.

Despite limited recovery in domestic capital expenditure and an otherwise bleak business environment outlook, Maintenance Leasing segment revenue has remained stable due to the ability to provide customers with high value-added services while meeting corporate customers' cost reduction needs.

Segment revenue increased 4% to ¥175,455 million compared to ¥169,512 million during the same period of the previous fiscal year due to solid revenues from operating leases including the sales of used automobiles. Segment expenses have remained flat period on period.

As a result, segment profit increased 30% to ¥27,117 million compared to ¥20,831 million during the same period of the previous fiscal year.

Segment assets increased 4% compared to March 31, 2011 to ¥521,486 million resulting from stable investment in direct financing leases and operating lease assets.

Real Estate Segment

This segment consists of development and rental of commercial real estate and office buildings; condominium development and sales; hotel, golf course and training facility operation; senior housing development and management; REIT asset management; real estate investment and advisory services and real estate finance.

A post-earthquake drop in sales was feared in the residential condominium market, but calm is returning to the market as evidenced by contract completion rates surpassing the key benchmark level of 70% in the Tokyo metropolitan area. Under these conditions, the number of condominiums delivered increased to 732 units compared to 568 units during the same period of the previous fiscal year.

The office building market is still in an adjustment phase. However, investors such as J-REITs and overseas investors are starting to consider the acquisition of new properties. Under this environment, the real estate investment business is pursuing a policy of turning over assets while carefully monitoring the market and making appropriate asset sales.

The real estate operating business, which consists of various businesses such as hotels, Japanese inns, golf courses and training facilities, has stable revenues despite a small portion of facilities having experienced decreased revenues due to the Great East Japan Earthquake.

Segment revenue increased 4% to ¥148,511 million compared to ¥142,769 million during the same period of the previous fiscal year due to increases in real estate sales from the delivery of condominium units and operating lease revenues, despite a decrease in gains on sales of real estate under operating leases.

Segment expenses increased compared to the same period of the previous fiscal year due to increased write-downs of long-lived assets and cost of real estate sales.

As a result of the foregoing, segment profit recorded a loss of ¥2,877 million, down from a profit of ¥3,508 million during the same period of the previous fiscal year.

Segment assets decreased 9% compared to March 31, 2011 to ¥1,405,440 million due to the sales of real estate under operating leases and decreases in installment loans and investment in securities.

Investment and Operation Segment

This segment consists of loan servicing (asset recovery), principal investment, M&A advisory, venture capital, securities brokerage and the environment and energy -related businesses.

Table of Contents

The domestic IPO market has been stagnant since the Lehman Shock, but there continue to be steady corporate realignment activities such as mergers, acquisitions and de-listings.

Segment revenue decreased 14% to ¥56,679 million compared to ¥66,012 million during the same period of the previous fiscal year in line with decreased revenues as a result of the sale of a consolidated subsidiary during the previous fiscal year partially offset by gains on investment securities from the sale of Aozora Bank shares and robust collection and fee revenues in the servicing business.

Similarly, segment expenses decreased compared to the same period of the previous fiscal year due to the effects of the sale of a consolidated subsidiary during the previous fiscal year in addition to decreases in write-downs of securities and provision for doubtful receivables and probable loan losses.

As a result of the foregoing, segment profit increased 57% to ¥17,810 million compared to ¥11,349 million during the same period of the previous fiscal year due to an increase in profits from equity-method affiliates, despite the absence of the sale of a subsidiary that was recorded during the previous fiscal year.

Segment assets remained flat at ¥499,447 million compared to March 31, 2011.

Retail Segment

This segment consists of the life insurance business, the banking business and the card loan business.

In the life insurance business, life insurance premiums grew steadily due to an increase in the number of policies in force.

Both corporate lending and individual home loans steadily increased in the banking business, and both revenues and profits increased.

As a result of the foregoing, segment revenue increased 7% to ¥116,969 million compared to ¥109,538 million during the same period of the previous fiscal year. However, although segment expenses remained flat period on period, segment profit decreased 27% to ¥15,321 million compared to ¥21,067 million during the same period of the previous fiscal year resulting from the recognition of a write-down on the equity-method affiliate Monex Group, Inc..

Segment assets increased 3% compared to March 31, 2011 to ¥1,701,641 million due to an increase in installment loans offsetting a decrease in investment in affiliates.

Overseas Business Segment

This segment consists of leasing, lending, investment in bonds, investment banking, real estate-related operations, and ship- and aircraft-related operations in the United States, Asia, Oceania and Europe.

In the United States, business sentiment is improving and consumer spending continues to remain strong as employment continues to steadily improve. Meanwhile, despite continuing strong economic performance in emerging economies in Asia, there is the possibility of a short-term adjustment phase in Asia, in response to concerns regarding inflation and the effects of economic weakness in Europe and the United States.

Segment revenue increased 4% to ¥133,286 million compared to ¥128,655 million during the same period of the previous fiscal year due to direct financing leases in Asia, automobile and aircraft operating leases, in addition to continued strong gains on investment securities in the United States.

Segment expenses decreased compared to the same period of the previous fiscal year due to a decrease in selling, general and administrative expenses offsetting an increase in interest expense.

As a result, segment profit increased 27% to ¥39,308 million compared to ¥31,037 million during the same period of the previous fiscal year.

Segment assets decreased 4% compared to March 31, 2011 to ¥933,932 million due to the effects of the appreciated yen and sales of municipal bonds and loans in the United States, offsetting increases from new investments in a water company in China and a life insurance company in South Korea, in addition to the consolidation of an automobile-related service company in India.

Edgar Filing: ORIX CORP - Form 6-K

ORIX has almost no direct exposure to assets or investments in Europe that would cause concerns relating to credit risk and there has been no direct impact on either segment profits or segment assets stemming from the European financial problems.

Table of Contents**(2) Financial Condition**

	As of March 31, 2011	As of December 31, 2011	Change Amount	Percent (%)
Total assets (millions of yen)	8,581,582	8,194,598	(386,984)	(5%)
(Segment assets)	6,142,818	5,922,428	(220,390)	(4%)
Total liabilities (millions of yen)	7,206,652	6,764,117	(442,535)	(6%)
(Long- and short-term debt)	5,009,901	4,639,644	(370,257)	(7%)
(Deposits)	1,065,175	1,063,667	(1,508)	(0%)
ORIX Corporation shareholders' equity (millions of yen)	1,319,341	1,357,579	38,238	3%
ORIX Corporation shareholders' equity ratio	15.4%	16.6%	1.2%	
Adjusted ORIX Corporation shareholders' equity ratio*	17.7%	18.8%	1.1%	
D/E ratio (Debt-to-equity ratio) (Short- and long-term debt (excluding deposits) / ORIX Corporation Shareholders' equity)	3.8x	3.4x	(0.4)	
Adjusted D/E ratio*	3.0x	2.7x	(0.3)	

* Adjusted ORIX Corporation shareholders' equity ratio and adjusted D/E ratio are non-GAAP financial measures presented on an adjusted basis which excludes certain assets or liabilities attributable to consolidated VIEs and reverses the cumulative effect on our retained earnings of applying the new accounting standards for the consolidation of VIEs under ASU 2009-16 and ASU 2009-17, effective April 1, 2010. For a discussion of this and other non-GAAP financial measures, including a quantitative reconciliation to the most directly comparable GAAP financial measures, see 5. NON-GAAP FINANCIAL MEASURES.

Total assets decreased 5% to ¥8,194,598 million from ¥8,581,582 million on March 31, 2011. Installment loans decreased as a result of selective loan origination, continuing from the previous fiscal year. Also, investment in securities decreased due to a decrease in trading securities overseas and specified bonds in Japan, which offset increases resulting from new transactions overseas in addition to a decrease in investment in affiliates due to the recognition of a write-down. Segment assets decreased 4% compared to March 31, 2011 to ¥5,922,428 million.

The balance of interest-bearing liabilities is controlled at an appropriate level depending on assets, cash flow and liquidity on-hand in addition to the domestic and overseas financial environment. As a result, long- and short-term debt and deposits decreased compared to March 31, 2011.

ORIX Corporation Shareholders' equity increased 3% compared to March 31, 2011 to ¥1,357,579 million primarily due to an increase in retained earnings.

(3) Liquidity and Capital Resources

We require capital resources for working capital and investment and lending in our businesses. In setting funding strategies, we prioritize funding stability and maintaining adequate liquidity to minimize the effects of volatility in financial markets. In preparing our management plan, we consider asset structure and size in light of expected cash flows, asset liquidity and our own liquidity situation. In actual implementation, we adjust our funding plans at times in response to changes in external environments and funding necessities based on our business activities, and maintain flexible funding activities.

To help ensure adequate stability and reduce liquidity risk in actual funding activities, we have sought to diversify our funding resources, promote longer liability maturities, stagger interest and principal repayment dates, and maintain committed credit facilities from a stable base of financial institutions.

Funding was comprised of borrowings from financial institutions, direct fund procurement from capital markets, and deposit. ORIX Group's total funding including those from short- and long-term debt and deposits on a consolidated basis was ¥5,703,311 million as of December 31, 2011.

Borrowings were procured from a diverse range of financial institutions including major banks, regional banks, foreign banks, life and casualty insurance companies. The number of financial institutions from which we procured borrowings exceeded 200 as of December 31, 2011. Procurement from the capital markets was composed of bonds including unsecured convertible bonds, commercial paper, medium-term notes issued by the Company and overseas subsidiaries, payables under securitized leases, loan receivables and investment in securities (including asset backed securities). Three domestic and overseas subsidiaries accept deposits for funding purposes, with the majority of deposits

Edgar Filing: ORIX CORP - Form 6-K

attributable to ORIX Bank Corporation, which changed its name from ORIX Trust and Banking Corporation on October 1, 2011.

Table of Contents

In the efforts to promote longer maturities of liabilities and further diversified capital resources, we secured longer maturities of borrowings from various domestic financial institutions, and issued domestic straight bonds both for institutions as well as individuals and asset backed securities during the nine months ended December 31, 2011. We also made international efforts including issuing SEC registered U.S. dollar dominated senior notes in the United States, Renminbi dominated medium-term notes in the Chinese offshore market, and Won dominated unsecured notes in the Korean capital market. We intend to continue to strengthen our financial condition, while maintaining an appropriate balance of funding structure.

Debt

(a) Short-term debt

	Millions of yen	
	March 31, 2011	December 31, 2011
Borrowings from financial institutions	¥ 297,835	¥ 263,241
Notes		1,819
Commercial paper	180,798	202,061
Total	¥ 478,633	¥ 467,121

Short-term debt as of December 31, 2011 was ¥467,121 million, which accounts for 10% of the total amount of short and long-term debt (excluding deposits), with the same ratio as of March 31, 2011.

While the amount of short-term debt as of December 31, 2011 was ¥467,121 million, liquidity is maintained at an adequate level; the sum of cash and cash equivalent and available amount of the committed credit facilities as of December 31, 2011 was ¥1,052,080 million.

(b) Long-term debt

	Millions of yen	
	March 31, 2011	December 31, 2011
Borrowings from financial institutions	¥ 2,063,099	¥ 1,962,901
Bonds	1,361,789	1,256,372
Medium-term notes	88,190	70,157
Payable under securitized lease and loan receivables and other	1,018,190	883,093
Total	¥ 4,531,268	¥ 4,172,523

The balance of long-term debt as of December 31, 2011 was ¥4,172,523 million, which accounts for 90% of the total amount of short and long-term debts (excluding deposits), with the same ratio as of March 31, 2011. On an adjusted basis, our ratio of long-term debt to total debt (excluding deposits) was 88% as of December 31, 2011, with the same ratio as of March 31, 2011. This ratio is a non-GAAP financial measure presented on an adjusted basis that excludes payables under securitized leases, loan receivables and investment in securities. For a discussion of this and other non-GAAP financial measures including reconciliations to the most directly comparable financial measures presented in accordance with GAAP, see 5. NON-GAAP FINANCIAL MEASURES.

Apart from the short-term and long-term debt noted above, ORIX Bank Corporation, ORIX Savings Bank, and ORIX Asia Limited accept deposits.

Table of Contents

(4) Summary of Cash Flows

Cash and cash equivalents decreased by ¥ 69,233 million to ¥662,894 million in the third consolidated period compared to March 31, 2011.

Cash flows from operating activities provided ¥211,490 million in the nine months ended December 31, 2011, up from ¥ 101,914 million during the same period of the previous fiscal year, resulting from an increase in quarterly net income and a decrease in trading securities, in addition to the non-cash revenue and expense items such as depreciation and amortization, provision for doubtful receivables and probable loan losses and equity in net income (loss) of affiliates (excluding interest on loans) compared to the same period of the previous fiscal year.

Cash flows from investing activities provided ¥60,039 million in the nine months ended December 31, 2011, while having provided ¥171,218 million during the same period of the previous fiscal year. This change was due to a decrease in principal collected on installment loans.

Cash flows from financing activities used ¥334,458 million in the nine months ended December 31, 2011, while having used ¥ 294,373 million during the same period of the previous fiscal year. This change was due to a decrease in net increase in funding from deposits due to customers for the nine months ended December 31, 2011.

(5) Challenges to be addressed

There were no significant changes for the nine months ended December 31, 2011.

(6) Research and Development Activity

There were no significant changes for the nine months ended December 31, 2011.

(7) Major facilities

Significant changes in major facilities for the nine months ended December 31, 2011 include the following:

New construction

We have finished the construction of a new regional head quarters in Nishi-ku, Osaka-shi, Osaka. The new head quarters allows us to manage our Osaka operations from a single location. The total investment for the facility was ¥13.6 billion.

Table of Contents**5. NON-GAAP FINANCIAL MEASURES**

The sections in (2) Financial Condition and (3) Liquidity and Capital Resources contain certain financial measures presented on a basis not in accordance with U.S. GAAP (commonly referred to as non-GAAP financial measures), including long-term debt, ORIX Corporation Shareholders' equity and total assets, as well as other measures or ratios calculated based on those measures, presented on an adjusted basis. The adjustment excludes payables under securitized leases, loan receivables and investment in securities and reverses the cumulative effect on retained earnings of applying the new accounting standards for the consolidation of VIEs, effective April 1, 2010.

Our management believes these non-GAAP financial measures provide investors with additional meaningful comparisons between our financial condition as of December 31, 2011, as compared to prior periods. Effective April 1, 2010, we adopted ASU 2009-16 and ASU 2009-17, which changed the circumstances under which we are required to consolidate certain VIEs. Our adoption of these new accounting standards caused a significant increase in our consolidated assets and liabilities and a decrease in our retained earnings without affecting the net cash flow and economic effects of our investments in such consolidated VIEs. Accordingly, our management believes that providing certain financial measures that exclude assets and liabilities attributable to consolidated VIEs as a supplement to financial information calculated in accordance with U.S. GAAP enhances the overall picture of our current financial position and enables investors to evaluate our historical financial and business trends without the large balance sheet fluctuation caused by our adoption of these new accounting standards.

We provide these non-GAAP financial measures as supplemental information to our consolidated financial statements prepared in accordance with U.S. GAAP, and they should not be considered in isolation or as substitutes for the most directly comparable U.S. GAAP measures.

The tables set forth below provide reconciliations of these non-GAAP financial measures to the most directly comparable financial measures presented in accordance with U.S. GAAP as reflected in our consolidated financial statements for the periods provided.

		2011	
		As of March 31, (In millions of yen, except percentage data)	As of December 31,
Total assets	(a)	8,581,582	8,194,598

Notes to Consolidated Financial Statements

1. Overview of Accounting Principles Utilized

In preparing the accompanying consolidated financial statements, ORIX Corporation (the Company) and its subsidiaries have complied with accounting principles generally accepted in the United States of America (U.S. GAAP), modified for the accounting for stock splits (see Note 2 (n)).

These statements include all adjustments (consisting of normal recurring accruals) that we considered necessary to present a fair statement of our results of operations, financial position and cash flows. The results reported in these condensed consolidated financial statements should not be regarded as necessarily indicative of results that may be expected for the entire year. It is suggested that these condensed consolidated financial statements be read in conjunction with the financial statements and notes thereto included in our March 31, 2011 consolidated financial statements.

Since the Company listed on the New York Stock Exchange in September 1998, the Company has filed the annual report (Form 20-F) including the consolidated financial statements with the Securities and Exchange Commission.

Significant differences between U.S. GAAP and generally accepted accounting principles in Japan (Japanese GAAP) are as follows:

(a) Initial direct costs

Under U.S. GAAP, certain initial direct costs to originate leases or loans are being deferred and amortized as yield adjustments over the life of related direct financing leases or loans by using interest method.

On the other hand, under Japanese GAAP, those initial direct costs are recognized as expenses when they are incurred.

(b) Operating leases

Under U.S. GAAP, revenues from operating leases are recognized on a straight-line basis over the contract terms. Also operating lease assets are depreciated over their estimated useful lives mainly on a straight-line basis.

On the other hand, Japanese GAAP allows for operating lease assets to be depreciated using either the declining-balance basis or straight-line basis.

(c) Accounting for life insurance operations

Based on ASC 944 (Financial Services Insurance), certain costs associated with writing insurances, or deferred policy acquisition costs, are being deferred and amortized over the respective policy periods in proportion to anticipated premium revenue.

Under Japanese GAAP, such costs are recorded as expenses currently in earnings in each accounting period.

In addition, under U.S. GAAP, although policy liabilities for future policy benefits are established using the net level premium method, based on actuarial estimates of the amount of future policyholder benefits, under Japanese GAAP, these are calculated by the methodology which relevant authorities accept.

(d) Accounting for goodwill and other intangible assets in business combination

Under U.S. GAAP, the Company and its subsidiaries test for impairment of goodwill and any intangible assets that are not subject to amortization at least annually. Additionally, if events or changes in circumstances indicate that the asset might be impaired, the Company and its subsidiaries test for impairment when such events or changes occur.

Under Japanese GAAP, goodwill is amortized over an appropriate period up to 20 years.

(e) Accounting for pension plans

Under U.S. GAAP, the Company and its subsidiaries apply ASC 715 (Compensation- Retirement Benefits) and record pension costs based on the amounts determined using actuarial methods. The net actuarial loss is amortized using a corridor test. The Company and its subsidiaries also recognize the funded status of pension plans, measured as the difference between the fair value of plan assets and the benefit obligation, on the consolidated balance sheets.

Under Japanese GAAP, the net actuarial loss is fully amortized over a certain term within the average remaining service period of employees. The pension liabilities are recorded for the difference between the plan assets and the benefit obligation, net of unrecognized prior service cost and net actuarial loss, on the consolidated balance sheets.

Table of Contents

(f) Reporting on discontinued operations

Under U.S. GAAP, in accordance with ASC 205-20 (Presentation of Financial Statements Discontinued Operations), the financial results of discontinued operations and disposal gain or loss, net of applicable income tax effects, are presented as a separate line from continuing operations in the consolidated statements of income. The prior periods' results of these discontinued operations have also been reclassified as income from discontinued operations in each prior period presented in the accompanying consolidated statements of income and consolidated statements of cash flows.

Under Japanese GAAP, there are no rules on reporting discontinued operations and the amounts are not presented separately from continuing operations.

(g) Presentation of net income in the consolidated statements of income

Under U.S. GAAP, net income consists of net income attributable to the parent and net income attributable to the noncontrolling interests. Each of them is separately stated in the consolidated statements of income.

Under Japanese GAAP, net income attributable to the minority interests is not included in net income.

(h) Partial sale and additional acquisition of the parent's ownership interest in subsidiaries

Under U.S. GAAP, a partial sale and an additional acquisition of the parent's ownership interest in subsidiaries where the parent continues to retain control of that subsidiary are accounted for as equity transactions. On the other hand, in a transaction that results in the loss of control, the gain or loss recognized in income includes the realized gain or loss related to the portion of ownership interest sold and the gain or loss on the remeasurement to fair value of the interest retained.

Under Japanese GAAP, a partial sale of the parent's ownership interest where the parent continues to retain control is accounted for as a profit-loss transaction and an additional acquisition of the parent's ownership interest is accounted for as a business combination. In addition, in a transaction that results in the loss of control, only the realized gain or loss related to the portion of ownership interest sold is recognized in income and the gain or loss on the remeasurement to fair value of the interest retained is not recognized.

(i) Classification in consolidated statements of cash flows

Classification in the statements of cash flows under U.S. GAAP is based on ASC 230 (Statement of Cash Flows), which differs from Japanese GAAP. As significant differences, purchase of lease equipment and principal payments received under direct financing leases, proceeds from sales of operating lease assets, installment loans made to customers and principal collected on installment loans (excluding issues and collections of loans held for sale) are included in Cash Flows from Investing Activities under U.S. GAAP while they are classified as Cash Flows from Operating Activities under Japanese GAAP.

(j) Securitization of financial assets

Under U.S. GAAP, from April 1, 2010, because the exception to variable interest entities that are qualifying special-purpose entities has been removed, an enterprise is required to perform analysis to determine whether or not to consolidate these special-purpose entities (SPEs) for securitization under the VIE's consolidation rules. As a result of the analysis, if it is determined that the enterprise transferred financial assets in a securitization transaction to SPE that needs to be consolidated, the transaction is not accounted for as a sale but accounted for as a secured borrowing.

Under Japanese GAAP, an SPE that meets certain conditions may be considered not to be a subsidiary of the investor or transferor. Therefore, if an enterprise transfers financial assets to this type of SPE in a securitization transaction, the transferee SPE is not required to be consolidated, and the enterprise accounts for the transaction as a sale and recognizes a gain or loss on the sale into earnings when control over the transferred assets is surrendered.

Table of Contents

2. Significant Accounting and Reporting Policies

(a) Principles of consolidation

The consolidated financial statements include the accounts of the Company and all of its subsidiaries. Investments in affiliates, where the Company has the ability to exercise significant influence by way of 20%-50% ownership or other means, are accounted for by using the equity method. Where the Company holds majority voting interests but noncontrolling shareholders have substantive participating rights to decisions that occur as part of the ordinary course of their business, the equity method is applied pursuant to FASB Accounting Standards Codification (ASC) 810-10-25-2 to 14 (Consolidation - The effect of Noncontrolling Rights on Consolidation). In addition, the consolidated financial statements also include variable interest entities to which the Company and its subsidiaries are primary beneficiaries pursuant to ASC 810-10 (Consolidation - Variable Interest Entities).

A lag period of up to three months is used on a consistent basis when considered necessary and appropriate for recognizing the results of subsidiaries and affiliates.

All significant intercompany accounts and transactions have been eliminated in consolidation.

(b) Use of estimates

The preparation of the consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Company has identified ten areas where it believes assumptions and estimates are particularly critical to the financial statements. These are the selection of valuation techniques and determination of assumptions used in fair value measurements (see Note 3), the determination and periodic reassessment of the unguaranteed residual value for direct financing leases and operating leases (see (d)), the determination and reassessment of insurance policy liabilities and deferred policy acquisition costs (see (e)), the determination of the allowance for doubtful receivables on direct financing leases and probable loan losses (see (f)), the determination of impairment of long-lived assets (see (g)), the determination of impairment of investment in securities (see (h)), the determination of valuation allowance for deferred tax assets and the evaluation of tax positions (see (i)), assessment and measurement of effectiveness in hedging relationship using derivative financial instruments (see (k)), the determination of benefit obligation and net periodic pension cost (see (l)) and the determination of impairment of goodwill and intangible assets not subject to amortization (see (w)).

(c) Foreign currencies translation

The Company and its subsidiaries maintain their accounting records in their functional currency. Transactions in foreign currencies are recorded in the entity's functional currency based on the prevailing exchange rates on the transaction date.

The financial statements of overseas subsidiaries and affiliates are translated into Japanese yen by applying the exchange rates in effect at the end of each fiscal period to all assets and liabilities. Income and expenses are translated at the average rates of exchange prevailing during the fiscal period. The currencies in which the operations of the overseas subsidiaries and affiliates are conducted are regarded as the functional currencies of these companies. Foreign currency translation adjustments reflected in accumulated other comprehensive income (loss) arise from the translation of foreign currency financial statements into Japanese yen.

(d) Recognition of revenues

Revenues are recognized when persuasive evidence of an arrangement exists, the service has been rendered or the goods have been delivered to the customer, the transaction price is fixed or determinable and collectibility is reasonably assured.

In addition to the aforementioned general policy, the policies as specifically described hereinafter are applied for each of the major revenue items.

Leases The Company and its subsidiaries lease various assets to customers under direct financing or operating lease arrangements. Classification of a lease arrangement into either a direct financing lease or an operating lease is dependent upon the specific conditions of the arrangement. Revenue recognition policies applied for direct financing leases and operating leases are specifically described in sections following this paragraph. In providing leasing services, the Company and its subsidiaries execute supplemental services, such as paying insurance and handling taxes on leased assets on behalf of lessees. In some cases, automobile maintenance services are also provided to lessees. Where under terms of the lease or related maintenance agreements the Company and its subsidiaries bear the favorable or unfavorable variability of cost, revenues and

Edgar Filing: ORIX CORP - Form 6-K

expenses are recorded on a gross basis. For those arrangements in which the Company and its subsidiaries do not have substantial risks and rewards of ownership, but instead serve as an agent in collecting from lessees and remitting payments to third parties, the Company and its subsidiaries record revenues net of third-party services costs. Revenues from automobile maintenance services are taken into income over the contract period in proportion to the estimated service costs to be incurred and are recorded in other operating revenues in the accompanying consolidated statements of income.

Table of Contents

(1) Recognition of revenues for direct financing leases

Direct financing leases consist of full-payout leases for various equipment types, including office equipment, industrial machinery and transportation equipment. The excess of aggregate lease rentals plus the estimated unguaranteed residual value over the cost of the leased equipment constitutes the unearned lease income to be taken into income over the lease term by using the interest method. The estimated residual values represent estimated proceeds from the disposition of equipment at the time the lease is terminated. Estimates of unguaranteed residual values are based on current market values of used equipment, estimates of when and how much equipment will become obsolete, and actual recovery being experienced for similar used equipment. Initial direct costs are being deferred and amortized as a yield adjustment over the life of the related lease by using interest method. The unamortized balance of initial direct costs is reflected as a component of investment in direct financing leases.

(2) Recognition of revenues for operating leases

Revenues from operating leases are recognized on a straight-line basis over the contract terms. Investment in operating leases is stated at cost less accumulated depreciation, which was ¥402,697 million and ¥413,570 million as of March 31, 2011 and December 31, 2011, respectively. Operating lease assets are depreciated over their estimated useful lives mainly on a straight-line basis. Depreciation expenses are included in costs of operating leases. Gains or losses arising from dispositions of operating lease assets, except real estate under operating leases, are included in operating lease revenues. With respect to some sales of real estate under operating leases such as commercial buildings, the Company or its subsidiaries may retain an interest in some cash flows of the real estate in the form of management or operation of the real estate. Where the Company or its subsidiaries have significant continuing involvement in the operations from the real estate under operating leases which have been disposed of, the gains or losses arising from such disposition are separately disclosed as gains on sales of real estate under operating leases, whereas if the Company or its subsidiaries have no significant continuing involvement in the operations from such disposed real estate, the gains or losses are reported as income from discontinued operations, net.

Estimates of residual values are based on current market values of used equipment, estimates of when and how much equipment will become obsolete and actual recovery being experienced for similar used equipment.

Installment loans Interest income on installment loans is recognized on an accrual basis. Certain direct loan origination costs, offset by loan origination fees, are being deferred and amortized over the contractual term of the loan as an adjustment of the related loan's yield using the interest method.

Interest payments received on impaired loans other than purchased loans are recorded as interest income unless the collection of the remaining investment is doubtful at which time payments received are recorded as reductions of principal. For purchased loans, although the acquired assets may remain loans in legal form, collections on these loans often do not reflect the normal historical experience of collecting delinquent accounts, and the need to tailor individual collateral-realization strategies often makes it difficult to reliably estimate the amount, timing, or nature of collections. Accordingly, the Company and its subsidiaries use the cost recovery method of income recognition for such purchased loans regardless of whether impairment is recognized or not.

Non-accrual policy In common with all classes, past-due financing receivables are receivables for which principal or interest is past-due 30 days or more. Loans whose terms have been modified are not classified as past-due financing receivables if the principals and interests are not past-due 30 days or more in accordance with the modified terms. The Company and its subsidiaries suspend accruing revenues on past-due installment loans and direct financing leases when principal or interest is past-due 90 days or more, or earlier, if management determines that their collections are doubtful based on factors such as individual debtors' creditworthiness, historical loss experience, current delinquencies and delinquency trends. Accrued but uncollected interest is reclassified to investment in direct financing leases or installment loans in the accompanying consolidated balance sheets and becomes subject to the allowance for doubtful receivables and probable loan loss process. Cash repayments received on non-accrual loans are applied first against past due interest and then any surpluses are applied to principal in view of the conditions of the contract and obligors. The Company and its subsidiaries return to accrual status non-accrual loans and lease receivables when it becomes certain that the Company and its subsidiaries will be able to collect all amounts due according to the contractual terms of these loans and receivables, as evidenced by continual payments from the debtors.

Brokerage commissions and net gains on investment securities Brokerage commissions and net gains on investment securities are recorded on a trade date basis.

Real estate sales Revenues from the sales of real estate are recognized when a contract is in place, a closing has taken place, the buyer's initial and continuing investment is adequate to demonstrate a commitment to pay for the property and the Company and its subsidiaries do not have a substantial continuing involvement in the property.

Table of Contents

(e) Insurance premiums and expenses

Premium income from life insurance policies is recognized as earned premiums when due.

Life insurance benefits are recorded as expenses when they are incurred. Policy liabilities for future policy benefits are established using the net level premium method, based on actuarial estimates of the amount of future policyholder benefits.

ASC 944 (Financial Services Insurance) requires insurance companies to defer certain costs associated with writing insurances, or deferred policy acquisition costs, and amortize them over the respective policy periods in proportion to anticipated premium revenue. These deferred policy acquisition costs are the costs related to the acquisition of new and renewal insurance policies and consist primarily of first-year commissions in excess of recurring policy maintenance costs and certain variable costs and expenses for underwriting policies.

Amortization charged to income for the nine months ended December 31, 2010 and 2011 amounted to ¥7,015 million and ¥6,433 million, respectively.

Amortization charged to income for the three months ended December 31, 2010 and 2011 amounted to ¥2,098 million and ¥1,853 million, respectively.

(f) Allowance for doubtful receivables on direct financing leases and probable loan losses

The allowance for doubtful receivables on direct financing leases and probable loan losses is maintained at a level which, in the judgment of management, is appropriate to provide for probable losses inherent in lease and loan portfolios. The allowance is increased by provision charged to income and is decreased by charge-offs, net of recoveries.

Developing the allowance for doubtful receivables on direct financing leases and probable loan losses is subject to numerous estimates and judgments. In evaluating the adequacy of the allowance, management considers various factors, including the business characteristics and financial conditions of the obligors, current economic conditions and trends, prior charge-off experience, current delinquencies and delinquency trends, future cash flows expected to be received from the direct financing leases and loans and value of underlying collateral and guarantees. Impaired loans are individually evaluated for a valuation allowance based on the present value of expected future cash flows, the loan's observable market price or the fair value of the collateral securing the loans if the loans are collateral-dependent. For non-impaired loans, including loans that are not individually evaluated for impairment, and direct financing leases, the Company and its subsidiaries evaluate prior charge-off experience segmented by the debtors' industries and the purpose of the loans, and then develop the allowance for doubtful receivables on direct financing leases and probable loan losses considering the prior charge-off experience and current economic conditions.

The Company and its subsidiaries charge off doubtful receivables when the likelihood of any future collection is believed to be minimal considering debtors' creditworthiness and the liquidation status of collateral.

(g) Impairment of long-lived assets

The Company and its subsidiaries have followed ASC 360-10 (Property, Plant, and Equipment Impairment or Disposal of Long-Lived Assets). Under ASC 360-10, long-lived assets to be held and used in operations, including tangible assets and intangible assets being amortized, consisting primarily of office building, condominiums, golf courses and other operating assets, shall be tested for recoverability whenever events or changes in circumstances indicate that the assets might be impaired. When the undiscounted future cash flows estimated to be generated by those assets are less than the carrying amount of those assets, the net carrying amount of assets not recoverable is reduced to fair value if lower than the carrying amount. The Company and its subsidiaries determine the fair value using appraisals prepared by independent third party appraisers or our own staff of qualified appraisers based on recent transactions involving sales of similar assets or other valuation techniques such as discounted cash flows methodologies using future cash flows estimated to be generated from operation of the existing assets or completion of development projects, as appropriate.

(h) Investment in securities

Trading securities are reported at fair value with unrealized gains and losses included in income.

Available-for-sale securities are reported at fair value, and unrealized gains or losses are recorded in accumulated other comprehensive income (loss), net of applicable income taxes.

Edgar Filing: ORIX CORP - Form 6-K

Held-to-maturity securities are recorded at amortized cost.

Other securities are recorded at cost or carrying value that reflects equity income and loss based on the investor's share.

Table of Contents

For available-for-sale securities, the Company and its subsidiaries generally recognize losses related to equity securities for which the fair value has been significantly below the acquisition cost (or current carrying value if an adjustment has been made in the past) for more than six months. Also, the Company and its subsidiaries charge against income losses related to equity securities in situations where, even though the fair value has not remained significantly below the carrying value for six months, the decline in the fair value of an equity security is based on issuer specific economic conditions and not just general declines in the related market and where it is considered unlikely that the fair value of the equity security will recover within the six months.

For debt securities, in the case of the fair value being below the amortized cost, the Company and its subsidiaries consider whether those securities are other-than-temporarily impaired using all available information about the collectibility. The Company and its subsidiaries do not consider that an other-than-temporary impairment for a debt security has occurred if (1) the Company and its subsidiaries do not intend to sell the debt security, (2) it is not more likely than not that the Company and its subsidiaries will be required to sell the debt security before recovery of its amortized cost basis, and (3) the present value of estimated cash flows will fully cover the amortized cost of the security. On the other hand, the Company and its subsidiaries consider that an other-than-temporary impairment has occurred if (1) the Company and its subsidiaries intend to sell the debt security, (2) it is more likely than not that the Company and its subsidiaries will be required to sell the debt security before recovery of its amortized cost basis, or (3) the present value of estimated cash flows will not fully cover the amortized cost of the security. For the debt security for which an other-than-temporary impairment is considered to have occurred, the Company and its subsidiaries recognize the entire difference between the amortized cost and the fair value in earnings if the Company and its subsidiaries intend to sell the debt security or it is more likely than not that the Company and its subsidiary will be required to sell the debt security before recovery of its amortized cost basis less any current-period credit loss. On the other hand, if the Company and its subsidiaries do not intend to sell the debt security and it is not more likely than not that the Company and its subsidiaries will be required to sell the debt security before recovery of its amortized cost basis less any current-period credit loss, the Company and its subsidiaries separate the difference between the amortized cost and the fair value of the debt securities into the credit loss component and the non-credit loss component. The credit loss component is recognized in earnings, and the non-credit loss component is recognized in other comprehensive income (loss), net of applicable income taxes.

For other securities, the Company and its subsidiaries reduce the carrying value of other securities to the fair value and charge against income losses related to other securities in situations where it is considered that the decline in the value of other securities is other than temporary.

(i) Income taxes

The Company, in general, determines its provision for income taxes for quarterly periods by applying the current estimate of the effective tax rate for the full fiscal year to the actual year-to-date income before income taxes and discontinued operations. The estimated effective tax rate is determined by dividing the estimated provision for income taxes for the full fiscal year by the estimated income before income taxes and discontinued operations for the full fiscal year.

At the fiscal year end, income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in income in the period that includes the enactment date. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax asset will not be realized.

The effective income tax rates including discontinued operations are 38.7% and 31.4% for the nine months ended December 31, 2010 and 2011, respectively. These rates are 38.5% and 8.4% for the three months ended December 31, 2010 and 2011, respectively. The Company and its subsidiaries in Japan are subject to a National Corporate tax of 30%, an Inhabitant tax of approximately 6% and a deductible Enterprise tax of approximately 8%, which in the aggregate resulted in a statutory income tax rate of approximately 40.9%. The effective income tax rate is different from the statutory tax rate primarily because of certain non-deductible expenses for tax purposes, non-taxable income for tax purposes, a change in valuation allowance, the effect of lower income tax rates on foreign subsidiaries and a life insurance subsidiary in Japan and the effect of the tax reforms as discussed in the following paragraph.

On November 30, 2011, the bill for reconstruction funding after the March 11, 2011 Great East Japan Earthquake and the bill for the 2011 tax reform were approved by the National Diet of Japan. From fiscal years beginning on or after April 1, 2012, the Japanese corporation tax rate will be reduced, and as a result, the statutory income tax rate for fiscal years beginning between April 1, 2012 and March 31, 2015 will be reduced to approximately 38.3%. The rate for fiscal years beginning after April 1, 2015 will be reduced to approximately 35.9%. In addition, tax loss carry-forward rules have been amended. The Carry-forward period will be extended to 9 years, compared to 7 years under the pre-amendment rules. Further, the deductible amount will be limited to 80% of taxable income for the year, while total amount of taxable income for the year was available for the deduction under the pre-amendment rules. The amendment to the carry-forward period will be applicable for tax losses

Edgar Filing: ORIX CORP - Form 6-K

incurred in fiscal years ending on or after April 1, 2008 and the amendment to the deductible amount will be applicable for fiscal years beginning on or after April 1, 2012.

Table of Contents

Increase and decrease of the deferred tax assets and liabilities due to these tax reforms resulted in a decrease of provision for income taxes by ¥7,661 million in the accompanying consolidated statements of income.

The Company and its subsidiaries have followed ASC 740 (Income Taxes). According to ASC 740, the Company and its subsidiaries recognize the financial statement effects of a tax position taken or expected to be taken in a tax return when it is more likely than not, based on the technical merits, that the position will be sustained upon tax examination, including resolution of any related appeals or litigation processes, and measure the tax position that meets the recognition threshold at the largest amount of tax benefit that is greater than 50% likely of being realized upon settlement with the taxing authority. The Company and its subsidiaries classify penalties and interest expense related to income taxes as part of provision for income taxes in the consolidated statements of income.

Effective for the fiscal year ended March 31, 2012, the Company and certain consolidated subsidiaries have adopted the consolidated taxation system.

(j) Securitized assets

The Company and its subsidiaries have securitized and sold to investors certain lease receivables, loan receivables and investment in securities. In the securitization process, the assets to be securitized (the assets) are sold to trusts and special-purpose entities that issue asset-backed beneficial interests and securities to the investors.

From April 1, 2010, the Company and its subsidiaries have adopted Accounting Standards Update 2009-16 (ASC 860 (Transfers and Servicing)), which removed the exemption from consolidation previously given to QSPEs and any SPEs for securitizing financial assets have become subject to the consolidation rule for VIEs. As a result, trusts or SPEs used in securitization transactions including those that were previously considered to be QSPEs of which the Company and its subsidiaries are the primary beneficiary have been consolidated, and the transfers of the financial assets to those consolidated trusts and SPEs are not accounted for as sales. Assets held by consolidated trusts or consolidated SPEs continue to be accounted for as direct financing lease receivables, loan receivable and investment securities, as they were before the transfer, and asset-backed beneficial interests and securities issued to the investors are accounted for as debt. In case the Company and its subsidiaries have transferred financial assets to a transferee which is not subject to consolidation, the Company and its subsidiaries account for the transfer as a sale when control over the transferred assets is surrendered.

A certain subsidiary originates and sells loans into the secondary market, while retaining the obligation to service those loans. In addition, it undertakes obligations to service loans originated by others. The subsidiary recognizes servicing assets if it expects the benefit of servicing to more than adequately compensate it for performing the servicing or recognizes servicing liabilities if it expects the benefit of servicing to less than adequately compensate it. These servicing assets and liabilities are initially recognized at fair value and subsequently accounted for using the amortization method whereby the assets and liabilities are amortized in proportion to and over the period of estimated net servicing income or net servicing loss. On a quarterly basis, servicing assets and liabilities are evaluated for impairment or increased obligations.

The fair value of servicing assets and liabilities is estimated using an internal valuation model, or by obtaining an opinion of value from an independent third-party vendor. Both methods are based on calculating the present value of estimated future net servicing cash flows, taking into consideration discount rates, prepayments, and servicing costs. The internal valuation model is validated at least semiannually through third-party valuations.

(k) Derivative financial instruments

The Company and its subsidiaries apply ASC 815 (Derivatives and Hedging), and all derivatives held by the Company and its subsidiaries are recognized on the consolidated balance sheets at fair value. The accounting treatment of subsequent changes in their fair value depends on their use, and whether they qualify as effective hedges for accounting purposes. Derivatives that are not hedges must be adjusted to fair value through the consolidated statements of income. If a derivative is a hedge, then depending on its nature, changes in its fair value will be either offset against change in the fair value of hedged assets or liabilities through the consolidated statements of income, or recorded in other comprehensive income (loss).

If a derivative is held as a hedge of the variability of fair value related to a recognized asset or liability or an unrecognized firm commitment (fair value hedge), changes in the fair value of the derivative are recorded in earnings along with the changes in the fair value of the hedged item.

If a derivative is held as a hedge of the variability of cash flows related to a forecasted transaction or a recognized asset or liability (cash flow hedge), changes in the fair value of the derivative are recorded in other comprehensive income (loss) to the extent that the derivative is effective as a hedge, until earnings are affected by the variability in cash flows of the designated hedged item.

Table of Contents

If a derivative is held as a hedge of a foreign-currency fair-value or cash-flow hedge (foreign currency hedge), changes in the fair value of the derivative are recorded in either earnings or other comprehensive income (loss), depending on whether the hedged transaction is a fair-value hedge or a cash-flow hedge. However, if a derivative is used as a hedge of a net investment in a foreign operation, changes in its fair value, to the extent effective as a hedge, are recorded in the foreign currency translation adjustments account within other comprehensive income (loss).

Changes in the fair value of a derivative, which is not held as a hedge, such as those held for trading use, or the ineffective portion of the change in fair value of a derivative that qualifies as a hedge, are recorded in earnings.

For all hedging relationships, at inception the Company and its subsidiaries formally document the details of the hedging relationship and hedged activity. The Company and its subsidiaries also formally assess, both at the hedge s inception and on an ongoing basis, the effectiveness of the hedge relationship. The Company and its subsidiaries cease hedge accounting prospectively when the derivative no longer qualifies for hedge accounting.

(l) Pension plans

The Company and certain subsidiaries have contributory and non-contributory pension plans covering substantially all of their employees. The Company and its subsidiaries apply ASC 715 (Compensation Retirement Benefits), and the costs of pension plans are accrued based on amounts determined using actuarial methods under the assumptions of discount rate, rate of increase in compensation level, expected long-term rate of return on plan assets and others.

The Company and its subsidiaries also recognize the funded status of pension plans, measured as the difference between the fair value of plan assets and the benefit obligation, on the consolidated balance sheet. Changes in that funded status are recognized in the year in which the changes occur through other comprehensive income (loss), net of applicable income taxes.

(m) Stock-based compensation

The Company and its subsidiaries apply ASC 718 (Compensation Stock Compensation). ASC 718 requires, with limited exception, that the cost of employee services received in exchange for an award of equity instruments be measured based on the grant-date fair value. The costs are recognized over the requisite employee service period.

(n) Stock splits

Stock splits implemented prior to October 1, 2001 had been accounted for by transferring an amount equivalent to the par value of the shares from additional paid-in capital to common stock as required by the Japanese Commercial Code (the Code) before amendment. However, no such reclassification was made for stock splits when common stock already included a portion of the proceeds from shares issued at a price in excess of par value. This method of accounting was in conformity with accounting principles generally accepted in Japan.

As a result of a revision to the Code before amendment effective on October 1, 2001 and the Companies Act implemented on May 1, 2006, the above-mentioned method of accounting required by the Code has become unnecessary.

In the United States, stock splits in comparable circumstances are considered to be stock dividends and are accounted for by transferring from retained earnings to common stock and additional paid-in capital amounts equal to the fair market value of the shares issued. Common stock is increased by the par value of the shares and additional paid-in capital is increased by the excess of the market value over par value of the shares issued. Had such stock splits made prior to October 1, 2001 been accounted for in this manner, additional paid-in capital as of December 31, 2011 would have increased by approximately ¥24,674 million, with a corresponding decrease in retained earnings. Total ORIX Corporation shareholders equity would remain unchanged. A stock split on May 19, 2000 was excluded from the above amounts because the stock split was not considered to be a stock dividend under U.S. GAAP.

(o) Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits placed with banks and short-term highly liquid investments with original maturities of three months or less.

(p) Restricted cash

Edgar Filing: ORIX CORP - Form 6-K

Restricted cash consists of deposits related to servicing agreements, deposits collected on behalf of the customers and applied to non-recourse loans, trust accounts under securitization programs and others.

Table of Contents**(q) Installment loans**

Certain loans, which the Company and its subsidiaries have the intent and ability to sell to outside parties in the foreseeable future, are considered held for sale and are carried at the lower of cost or market value determined on an individual basis, except loans held for sale for which the fair value option under ASC 825-10 (Financial Instruments Fair Value Option) were elected. A subsidiary elected the fair value option under ASC 825-10 (Financial Instruments Fair Value Option) on its loans held for sale originated on or after October 1, 2011. The subsidiary enters into forward sale agreements to offset the change in the fair value of loans held for sale and the election of the fair value option allows the subsidiary to recognize both the change in the fair value of the loans and the change in the fair value of the forward sale agreements due to changes in interest rates in the same accounting period.

These loans held for sale are included in installment loans and the outstanding balances of these loans as of March 31, 2011 and December 31, 2011 were ¥13,718 million and ¥8,896 million, respectively. All of loans held for sale as of December 31, 2011 are measured at fair value by electing the fair value option.

(r) Other operating assets

Other operating assets consist primarily of operating facilities (including golf courses, hotels, training facilities and senior housing), which are stated at cost less accumulated depreciation, and depreciation is calculated mainly on a straight-line basis over the estimated useful lives of the assets. Accumulated depreciation was ¥34,739 million and ¥37,826 million as of March 31, 2011 and December 31, 2011, respectively.

(s) Other receivables

Other receivables include primarily payments made on behalf of lessees for property tax, maintenance fees and insurance premiums in relation to direct financing lease contracts, accounts receivables in relation to sales of assets to be leased, residential condominiums and other assets, and derivative assets.

(t) Inventories

Inventories consist primarily of advance and/or progress payments for development of residential condominiums for sale and completed residential condominiums (including completed residential condominiums waiting to be delivered to buyers under the contracts for sale). Advance and/or progress payments for development of residential condominiums for sale are carried at cost less any impairment losses and finished goods (including completed residential condominiums) are stated at the lower of cost or market. As of March 31, 2011, and December 31, 2011, advance and/or progress payments were ¥96,197 million and ¥86,766 million, respectively, and finished goods were ¥12,213 million and ¥8,643 million, respectively.

For the nine months ended December 31, 2010 and 2011, a certain subsidiary recorded ¥2,998 million and ¥1,833 million of write-downs principally for advance and/or progress payments for development of residential condominiums for sale, resulting from an increase in development costs and/or a decrease in expected sales price. The amounts of such write-downs for the three months ended December 31, 2010 and the three months ended December 31, 2011 were ¥2,548 million and ¥1,323 million, respectively. These write-downs were recorded in costs of real estate sales and included in the Real Estate segment.

(u) Office facilities

Office facilities are stated at cost less accumulated depreciation. Depreciation is calculated on a declining-balance basis or straight-line basis over the estimated useful lives of the assets. Accumulated depreciation was ¥39,057 million and ¥39,051 million as of March 31, 2011 and December 31, 2011, respectively.

(v) Other assets

Other assets consist primarily of the excess of purchase prices over the net assets acquired in acquisitions (goodwill) and other intangible assets (see (w)), deferred insurance policy acquisition costs which are amortized over the contract periods, leasehold deposits, advance payments made in relation to purchases of assets to be leased and to construction of real estate for operating lease, and deferred tax assets.

(w) Goodwill and other intangible assets

Edgar Filing: ORIX CORP - Form 6-K

The Company and its subsidiaries have followed ASC 805 (Business Combinations) and ASC 350 (Intangibles Goodwill and Other). ASC 805 requires that all business combinations be accounted for using the acquisition method. ASC 805 also requires that intangible assets acquired in a business combination be recognized apart from goodwill if the intangible assets meet one of two criteria either the contractual-legal criterion or the separability criterion.

ASC 350 establishes how intangible assets (other than those acquired in a business combination) should be accounted for upon acquisition. It also addresses how goodwill and other intangible assets should be accounted for subsequent to their acquisition. Both goodwill and intangible assets that have indefinite useful lives are not amortized but tested at least annually for impairment. The Company and its subsidiaries test the goodwill either at the operating segment level or one level below the operating segments.

Table of Contents

Intangible assets with finite lives are amortized over their useful lives and tested for impairment in accordance with ASC 360-10 (*Property, Plant, and Equipment Impairment or Disposal of Long-Lived Assets*).

The amount of goodwill is ¥94,790 million and ¥92,685 million as of March 31, 2011 and December 31, 2011, respectively.

(x) Trade notes, accounts payable and other liabilities

Trade notes, accounts payable and other liabilities include accounts payables, guarantee liabilities, and derivative liabilities.

(y) Capitalization of interest costs

The Company and its subsidiaries capitalized interest costs related to specific long-term development projects.

(z) Advertising

The costs of advertising are expensed as incurred.

(aa) Discontinued operations

The Company and its subsidiaries have followed ASC 205-20 (*Presentation of Financial Statements Discontinued Operations*). Under ASC 205-20, the scope of discontinued operations includes the operating results of any component of an entity with its own identifiable operations and cash flow and in which operations the Company and its subsidiaries will not have significant continuing involvement. Included in reported discontinued operations are the operating results of operations for the subsidiaries, the business units and certain properties sold or to be disposed of by sale without significant continuing involvements, which results of operations for prior periods presented have also been reclassified as discontinued operations in the accompanying consolidated statements of income.

(ab) Earnings per share

Basic earnings per share is computed by dividing income attributable to ORIX Corporation from continuing operations and net income attributable to ORIX Corporation by the weighted average number of shares of common stock outstanding in each period and diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Earnings per share is adjusted for any stock splits and stock dividends retroactively.

Furthermore, the Company and its subsidiaries apply ASC 260-10-45-43 to 44 (*Earnings Per Share Contingently Convertible Instruments*) to Liquid Yield Option NotesTM.

(ac) Partial sale and additional acquisition of the parent's ownership interest in subsidiaries

A partial sale and an additional acquisition of the parent's ownership interest in subsidiaries where the parent continues to retain control of that subsidiary are accounted for as equity transactions. On the other hand, in a transaction that results in the loss of control, the gain or loss recognized in income includes the realized gain or loss related to the portion of ownership interest sold and the gain or loss on the remeasurement to fair value of the interest retained.

(ad) Redeemable noncontrolling interests

Noncontrolling interest in certain subsidiaries are subject to call and put rights upon certain shareholder events. As redemption of the noncontrolling interest is not solely in the control of the subsidiary, it is recorded between Liabilities and Equity on the consolidated balance sheets at its estimated redemption value in accordance with provisions including EITF Topic No. D-98 (ASC 480-10-s99-3A) (*Classification and Measurement of Redeemable Securities*).

(ae) Issuance of stock by an affiliate

When an affiliate issues stocks to unrelated third parties, the Company and its subsidiaries' ownership interest in the affiliate decreases. In the event that the price per share is more or less than the Company and its subsidiaries' average carrying amount per share, the Company and its

Edgar Filing: ORIX CORP - Form 6-K

subsidiaries adjust the carrying amount of its investment in the affiliate and recognize gain or loss in the consolidated statements of income in the year in which the change in ownership interest occurs.

(af) New accounting pronouncements

In January 2010, Accounting Standards Update 2010-06 (Improving Disclosures about Fair Value Measurements – ASC 820 (Fair Value Measurements and Disclosures)) was issued. This Update improves existing disclosures and adds new disclosures. The Company and its subsidiaries adopted certain disclosure requirements in the roll forward of activity in Level 3 fair value measurements on April 1, 2011.

Table of Contents

The Company and its subsidiaries already adopted the other disclosure requirements in the period ended March 31, 2010. The adoption did not have a material effect on the Company and its subsidiaries' results of operation or financial position.

In July 2010, Accounting Standards Update 2010-20 (Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses - ASC 310 (Receivables)) was issued. This Update enhances disclosures about the credit quality of financing receivables and the allowance for credit losses, by requiring an entity to provide disaggregated information by portfolio segment or class of financing receivables, credit quality indicators, past due information, and information about modifications of its financing receivables, and other information. This Update requires the disclosures as of the end of a reporting period, and the disclosures about activity that occurs during a reporting period. The Company and its subsidiaries adopted the period-end disclosure requirements for the period ended December 31, 2010, and the activity disclosure requirements for the period beginning on April 1, 2011, respectively. This Update only relates to certain disclosure requirements and its adoption had no effect on the Company and its subsidiaries' results of operations or financial position. In April 2011, Accounting Standards Update 2011-02 (A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring - ASC 310 (Receivables)) was issued. This Update clarifies the guidance on a creditor's evaluation of whether a restructuring constitutes a troubled debt restructuring. Additionally, this Update requires entities to disclose certain information about troubled debt restructuring, which was deferred by the adoption of Accounting Standards Update 2011-01 (Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No.2010-20 - ASC 310 (Receivables)). The Company and its subsidiaries adopted this Update on July 1, 2011 and applied the amendments in this Update retrospectively to restructurings that occurred on or after April 1, 2011. The adoption did not have a material effect on the Company and its subsidiaries' results of operations or financial position.

In October 2010, Accounting Standards Update 2010-26 (Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts - ASC 944 (Financial Services - Insurance)) was issued. This Update modifies the current definition of the types of costs relating to the acquisition of new and renewal insurance contracts that can be deferred as deferred acquisition costs, and specifies that only certain costs related directly to the successful acquisition of new or renewal insurance contracts should be deferred. In accordance with the amendment in this Update, the advertising cost which does not meet certain capitalization criteria, and the cost relating to unsuccessful contract acquisition should be charged to expense as incurred. The Update is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011 and should be applied prospectively. Retrospective application to all prior periods presented upon the date of adoption, and early adoption are permitted. The Company and its subsidiaries are currently evaluating the effect that the adoption of this Update will have on the Company and its subsidiaries' results of operations and financial position.

In December 2010, Accounting Standards Update 2010-28 (When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts - ASC 350 (Goodwill and Other)) was issued. This Update modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For these reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. Any resulting goodwill impairment should be recorded as a cumulative effect adjustment to beginning retained earnings in the period of adoption. Any goodwill impairments occurring after the initial adoption of the Update should be included in earnings. The Company and its subsidiaries adopted this Update on April 1, 2011. The adoption did not have a material effect on the Company and its subsidiaries' results of operations or financial position.

In December 2010, Accounting Standards Update 2010-29 (Disclosure of Supplementary Pro Forma Information for Business Combinations - ASC 805 (Business Combinations)) was issued. This Update specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The Company and its subsidiaries adopted this Update on April 1, 2011. This Update only relates to certain disclosure requirements and its adoption had no effect on the Company and its subsidiaries' results of operations or financial position.

In May 2011, Accounting Standards Update 2011-04 (Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs - ASC 820 (Fair Value Measurement)) was issued. This Update is intended to result in a consistent definition of fair value and common requirements for measuring fair value and for disclosures about fair value between U.S. GAAP and IFRSs. Consequently, this Update changes some fair value measurement principles and enhances the disclosure requirements. The Update is effective for interim and annual periods beginning after December 15, 2011. Early application is not permitted. The adoption will not have a significant effect on the Company and its subsidiaries' results of operations or financial position.

Table of Contents

In June 2011, Accounting Standards Update 2011-05 (Presentation of Comprehensive Income ASC220 (Comprehensive Income)) was issued. Under this Update, an entity has the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. The Update does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The Update does not change the option for an entity to present components of other comprehensive income either net of related tax effects or before related tax effects. The Update does not affect how earnings per share is calculated or presented. In December 2011, Accounting Standards Update 2011-12 (Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No.2011-05) was issued. This Update defers the effective date for certain amendments in Accounting Standards Update 2011-05 which require an entity to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income. These Updates are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011 and should be applied retrospectively. Early adoption is permitted. These Updates only relate to certain disclosure requirements and their adoption will have no effect on the Company and its subsidiaries' results of operations or financial position.

In September 2011, Accounting Standards Update 2011-08 (Testing Goodwill for Impairment ASC350 (Intangibles Goodwill and Other)) was issued. This Update permits an entity to assess qualitative factor to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount including goodwill before performing the two-step goodwill impairment test. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is not required. The Update is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted. The adoption of this Update will not have a significant effect on the Company and its subsidiaries' results of operations or financial position.

In December 2011, Accounting Standards Update 2011-10 (Derecognition of in Substance Real Estate a Scope Clarification ASC 360 (Property, Plant, and Equipment)) was issued. This Update is intended to resolve the diversity in practice and clarifies that when a parent (reporting entity) ceases to have a controlling financial interest in a subsidiary that is in substance real estate as a result of default on the subsidiary's non-recourse debt, the reporting entity should apply the guidance in ASC 360-20 (Property, Plant, and Equipment Real Estate Sales) to determine whether it should derecognize the in substance real estate. The Update is effective for fiscal years, and interim periods within those years, beginning on or after June 15, 2012. Early application is permitted. Generally, the effect of adopting this Update on the Company and its subsidiaries' results of operations or financial position of this Update will depend on future transactions.

In December 2011, Accounting Standards Update 2011-11 (Disclosures about Offsetting Assets and Liabilities ASC 210 (Balance Sheet)) was issued. This Update requires all entities that have financial instruments and derivative instruments that are either offset in the balance sheet or subject to an enforceable master netting arrangement or similar agreement to disclose information about offsetting and related arrangements. The Update is effective for fiscal years, and interim periods within those years, beginning on or after January 1, 2013. The Update only relates to certain disclosure requirements and its adoption will have no effect on the Company and its subsidiaries' results of operations or financial position.

Table of Contents**3. Fair Value Measurements**

The Company and its subsidiaries adopted ASC 820-10 (Fair Value Measurements and Disclosures). This Codification Section defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements.

This Codification Section classifies and prioritizes inputs used in valuation techniques to measure fair value into the following three levels:

- Level 1 Inputs of quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly.
- Level 3 Unobservable inputs for the assets or liabilities.

This Codification Section differentiates between those assets and liabilities required to be carried at fair value at every reporting period (recurring) and those assets and liabilities that are only required to be adjusted to fair value under certain circumstances (nonrecurring). The Company and its subsidiaries measure mainly trading securities, available-for-sale securities, certain investment funds and derivatives at fair value on a recurring basis.

The following table presents recorded amounts of major financial assets and liabilities measured at fair value on a recurring basis as of March 31, 2011 and December 31, 2011:

March 31, 2011

	Millions of yen			
	Total Carrying Value in Consolidated Balance Sheets	Quoted Prices in Active Markets for Identical assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

	¥ 9,595	¥ 557	¥ 9,038	¥

* A subsidiary elected the fair value option under ASC825-10 (Financial Instruments Fair Value Option) on the loans held for sale originated on and after October 1, 2011. These loans are multi-family and seniors housing loans and are sold to Federal National Mortgage Association (Fannie Mae) or institutional investors. Included in other operating revenues in the consolidated statements of income are gains from the change in the fair value of the loans of ¥404 million and ¥404 million, for the nine months ended December 31, 2011 and for the three months ended December 31, 2011, respectively. No gains or losses were recognized in earnings during the nine months ended December 31, 2011 and for the three months ended December 31, 2011, attributable to changes in instrument-specific credit risk. The amounts of aggregate unpaid principal balance and aggregate fair value at December 31, 2011, are ¥8,492 million and ¥8,896 million, respectively, and the amount of aggregate fair value exceeds the amount of aggregate unpaid principal balance by ¥404 million. There are no loans that are 90 days or more past due, in non-accrual status, or both.

Changes in economic conditions or valuation methodologies may require the transfer of assets and liabilities from one fair value level to another. In such instances, the Company and its subsidiaries recognize the transfer at the beginning of the reporting period. The Company and its subsidiaries evaluate the significance of transfers between levels based upon size of the transfer relative to total assets, total liabilities or total earnings. For the nine months and the three months ended December 31, 2010 and 2011, there were no significant transfers between Level 1 and

Level 2.

35

Table of Contents

The following table presents the reconciliation for financial assets and liabilities (net) measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the nine months ended December 31, 2010 and 2011:

Table of Contents

From April 1, 2010, the Company and its subsidiaries adopted Accounting Standards Update 2009-16 (ASC 860 (Transfers and Servicing)), and Accounting Standards Update 2009-17 (ASC 810 (Consolidation)). As a result, there was an increase of ¥9,225 million in the Level 3 specified bonds issued by SPEs in Japan because these bonds are held by variable interest entities that have become subject to consolidation. On the other hand, there was a decrease of ¥49,408 million in the Level 3 CMBS and RMBS in the United States and other asset-backed securities, and a decrease of ¥1,296 million in the Level 3 specified bonds issued by SPEs in Japan, respectively, that are held by the Company and its subsidiaries, because these securities were issued by newly consolidated variable interest entities and accordingly have been eliminated in consolidation.

The following table presents recorded amounts of assets and liabilities measured at fair value on a nonrecurring basis as of March 31, 2011 and December 31, 2011. These assets are measured at fair value on a nonrecurring basis mainly to recognize impairment.

March 31, 2011

Table of Contents

The following is a description of the main valuation methodologies used for assets and liabilities measured at fair value.

Loans held for sale

Certain loans, which the Company and its subsidiaries have the intent and ability to sell to outside parties in the foreseeable future, are considered held for sale. The loans held for sale in the United States are classified as Level 2, because the Company and its subsidiaries measure their fair value based on a market approach using inputs other than quoted prices that are observable for the assets such as treasury rate, swap rate and market spread.

Real estate collateral-dependent loans

The valuation allowance for large balance non-homogeneous loans is individually evaluated based on the present value of expected future cash flows, the loan's observable market price or the fair value of the collateral securing the loans if the loans are collateral-dependent. According to ASC 820-10 (Fair Value Measurements and Disclosures), measurement for impaired loans determined using a present value technique is not considered a fair value measurement. However, measurement for impaired loans determined using the loan's observable market price or the fair value of the collateral securing the collateral-dependent loans are fair value measurements and are subject to the disclosure requirements for nonrecurring fair value measurements.

The Company and its subsidiaries determine the fair value of the real estate collateral of real estate collateral-dependent loans using appraisals prepared by independent third party appraisers or our own staff of qualified appraisers based on recent transactions involving sales of similar assets or other valuation techniques such as discounted cash flows methodologies using future cash flows estimated to be generated from operation of the existing assets or completion of development projects, as appropriate. We generally obtain a new appraisal once a fiscal year. In addition, we periodically monitor circumstances of the real estate collateral and then obtain a new appraisal in situations involving a significant change in economic and/or physical conditions, which may materially affect the fair value of the collateral. Real estate collateral-dependent loans whose fair values are estimated using an appraisal of the underlying collateral based on techniques other than recent transactions involving sales of similar assets are classified as Level 3 because such techniques involve unobservable inputs.

Investment in operating leases and other operating assets and Land and buildings undeveloped or under construction

Investment in operating leases measured at fair value is mostly real estate. The Company and its subsidiaries determine the fair value of Investment in operating leases and other operating assets and Land and buildings undeveloped or under construction using appraisals prepared by independent third party appraisers or the Company's own staff of qualified appraisers based on recent transactions involving sales of similar assets or other valuation techniques such as discounted cash flow methodologies using future cash flows estimated to be generated from operation of the existing assets or completion of development projects, as appropriate. The Company and its subsidiaries classified the assets as Level 3 because such techniques involve unobservable inputs.

Trading securities, Available-for-sale securities and Investment in affiliates

If active market prices are available, fair value measurement is based on quoted active market prices and, accordingly, these securities are classified as Level 1. If active market prices are not available, a fair value measurement is based on observable inputs other than quoted prices included within Level 1, such as prices for similar assets and accordingly these securities are classified as Level 2. If market prices are not available, then fair value is estimated by using valuation models including discounted cash flow methodology and commonly used option-pricing models. Such securities are classified as Level 3, as the valuation models are based on inputs that are unobservable in the market.

The Company and its subsidiaries classified CMBS and RMBS in the United States, as level 3 due to a certain market being inactive. In determining whether a market is active or inactive, the Company and its subsidiaries evaluate various factors such as the lack of recent transactions, price quotations that are not based on current information or vary substantially over time or among market makers, a significant increase in implied risk premium, a wide bid-ask spread, significant decline in new issuances, little or no public information (e.g. a principal-to-principal market) and other factors. With respect to the CMBS and RMBS in the United States, the Company and its subsidiaries judged that the market was inactive because there were few recent transactions and broker quotes or pricing evaluations from independent pricing service vendors for these securities were not available. As a result, the Company and its subsidiaries established internally developed pricing models (Level 3 inputs) using valuation techniques such as present value techniques in order to estimate fair value of these securities and classified them as Level 3. Under the models, the Company and its subsidiaries use anticipated cash flows of the security discounted at a risk-adjusted discount rate that incorporates our estimate of credit risk and liquidity risk that a market participant would consider. The cash flows are estimated based on a number of assumptions such as default rate and prepayment speed, as well as seniority of the security.

Table of Contents

The Company and its subsidiaries classified the specified bonds issued by SPEs in Japan as Level 3 because the Company and its subsidiaries measure their fair value using unobservable inputs. Since the specified bonds do not trade in an open market, no relevant observable market data is available. Accordingly the Company and its subsidiaries use a discounted cash flow model that incorporates significant unobservable inputs to measure their fair value. When evaluating the specified bonds issued by SPEs, the Company and its subsidiaries estimate the fair value by discounting future cash flows using a discount rate based on market interest rates and a risk premium. The future cash flows for the specified bonds issued by the SPEs are estimated based on contractual principal and interest repayment schedules on each of the specified bond issued by the SPEs. Since the discount rate is not observable for the specified bonds, the Company and its subsidiaries use an internally developed model to estimate a risk premium considering the value of the real estate collateral (which also involves unobservable inputs in many cases when using valuation techniques such as discounted cash flow methodology) and the seniority of the bonds. Under the model, the Company and its subsidiaries consider the loan-to-value ratio and other relevant available information to reflect both the credit risk and the liquidity risk in our own estimate of the risk premium. Generally, the higher the loan-to-value ratio, the larger the risk premium the Company and its subsidiaries estimate under the model. The fair value of the specified bonds issued by SPEs rises when the fair value of the collateral real estate rises and the discount rate declines. The fair value of the specified bonds issued by SPEs declines when the fair value of the collateral real estate declines and the discount rate rises.

Investment funds

The fair value is based on the net asset value if the investments meet certain requirements that the investees have all of the attributes specified in ASC 946-10 (Financial Services Investment Companies) and the investees calculate the net asset value. These investments are classified as Level 2, because they are not redeemable at the net asset value per share at the measurement date but they are redeemable at the net asset value per share in the near term after the measurement date.

Derivatives

For exchange-traded derivatives, fair value is based on quoted market prices, and accordingly, classified as Level 1. For non-exchange traded derivatives, fair value is based on commonly used models and discounted cash flow methodology. If the inputs used for these measurements including yield curves and volatilities, are observable, the Company and its subsidiaries classify it as Level 2. If the inputs are not observable, the Company and its subsidiaries classify it as Level 3.

4. Credit Quality of Financing Receivables and the Allowance for Credit Losses

The Company and its subsidiaries adopted Accounting Standards Update 2010-20 (Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses ASC 310 (Receivables)). This Update enhances disclosures about the credit quality of financing receivables and the allowance for credit losses, and requires an entity to provide the following information disaggregated by portfolio segment and class of financing receivable.

Allowance for credit losses by portfolio segment

Credit quality of financing receivables by class

Impaired loans

Credit quality indicators

Non-accrual and past-due financing receivables

Information about troubled debt restructurings by class

A portfolio segment is defined as the level at which an entity develops and documents a systematic methodology to determine its allowance for credit losses. The Company and its subsidiaries classify our portfolio segments by instruments of loans and direct financing leases. Classes of financing receivables are determined based on the initial measurement attribute, risk characteristics of the financing receivables and the method

Edgar Filing: ORIX CORP - Form 6-K

for monitoring and assessing obligors' credit risk, and are defined as the level of detail necessary for a financial statement user to understand the risks inherent in the financing receivables. Classes of financing receivables generally are a disaggregation of a portfolio segment, and the Company and its subsidiaries disaggregate our portfolio segments into classes by regions, instruments or industries of our debtors.

Table of Contents

*1 Purchased loans represent loans with evidence of deterioration of credit quality since origination and for which it is probable at acquisition that collection of all contractually required payments from the debtors is unlikely in accordance with ASC 310-30 (Receivables Loans and Debt Securities Acquired with Deteriorated Credit Quality).

*2 Other includes mainly foreign currency translation adjustments.

Table of Contents

In developing the allowance for credit losses, the Company and its subsidiaries consider, among other things, the following factors:

business characteristics and financial conditions of obligors;

current economic conditions and trends;

prior charge-off experience;

current delinquencies and delinquency trends; and

value of underlying collateral and guarantees.

The Company and its subsidiaries individually develop the allowance for credit losses for impaired loans. For non-impaired loans, including loans that are not individually evaluated for impairment, and direct financing leases, the Company and its subsidiaries evaluate prior charge-off experience as segmented by debtors' industry and the purpose of the loans and develop the allowance for credit losses based on such prior charge-off experience as well as current economic conditions.

In common with all portfolio segments, a deterioration of debtors' condition may increase the risk of delay in payments of principal and interest. For loans to consumer borrowers, the amount of the allowance for credit losses is changed by the variation of individual debtors' creditworthiness and value of underlying collateral and guarantees. For loans to corporate other borrowers and direct financing leases, the amount of the allowance for credit losses is changed by current economic conditions and trends, the value of underlying collateral and guarantees, and the prior charge-off experience in addition to the debtors' creditworthiness.

The decline of the value of underlying collateral and guarantees may increase the risk of inability to collect from the loans. Particularly for non-recourse loans for which cash flow from real estate is the source of repayment, their collection depends on the real estate collateral value, which may decline as a result of decrease in liquidity of the real estate market, rise in vacancy rate of rental properties, fall in rents and other factors. These risks may change the amount of the allowance for credit losses. For purchased loans, their collection may decrease due to a decline in the real estate collateral value and debtors' creditworthiness. Thus, these risks may change the amount of the allowance for credit losses.

In common with all portfolio segments, the Company and its subsidiaries charge off doubtful receivables when the likelihood of any future collection is believed to be minimal based upon an evaluation of the relevant debtors' creditworthiness and the liquidation status of collateral.

The following table provides information about the impaired loans as of March 31, 2011 and December 31, 2011:

*1 With no related allowance recorded represents impaired loans with no allowance for credit losses as all amounts due are considered to be collectible.

*2 With an allowance recorded represents impaired loans with the allowance for credit losses as all amounts due or a part of the amounts due are not considered to be collectible.

Table of Contents

The Company and its subsidiaries recognize installment loans other than purchased loans and loans to consumer borrowers as impaired loans when principal or interest is past-due 90 days or more, or it is probable that the Company and its subsidiaries will be unable to collect all amounts due according to the contractual terms of the loan agreements due to various debtor conditions, including insolvency filings, suspension of bank transactions, dishonored bills and deterioration of businesses. For non-recourse loans, in addition to these conditions, the Company and its subsidiaries perform an impairment review using financial covenants, acceleration clauses, loan-to-value ratios, and other relevant available information.

For purchased loans, the Company and its subsidiaries recognize them as impaired loans when it is probable that the Company and its subsidiaries will be unable to collect book values of the remaining investment due to factors such as a decline in the real estate collateral value and debtors' creditworthiness since the acquisition of these loans.

The Company and its subsidiaries consider that loans to consumer borrowers, including housing loans and other, are impaired when terms of these loans are modified in troubled debt restructurings.

Interest payments received on impaired loans other than purchased loans are recorded as interest income unless the collection of the remaining investment is doubtful at which time payments received are recorded as reductions of principal. For purchased loans, although the acquired assets may remain loans in legal form, collections on these loans often do not reflect the normal historical experience of collecting delinquent accounts, and the need to tailor individual collateral-realization strategies often makes it difficult to reliably estimate the amount, timing, or nature of collections. Accordingly, the Company and its subsidiaries use the cost recovery method of income recognition for such purchased loans regardless of whether impairment is recognized or not.

In common with all classes, impaired loans are individually evaluated for a valuation allowance based on the present value of expected future cash flows, the loan's observable market price or the fair value of the collateral securing the loans if the loans are collateral-dependent. For non-recourse loans, in principle, the estimated collectible amount is determined based on the fair value of the collateral securing the loans as they are collateral-dependent. Further for certain non-recourse loans, the estimated collectible amount is determined based on the present value of expected future cash flows. The fair value of the real estate collateral securing the loans is determined using appraisals prepared by independent third-party appraisers or our own staff of qualified appraisers based on recent transactions involving sales of similar assets or other valuation techniques such as discounted cash flows methodologies using future cash flows estimated to be generated from operation of the existing assets or completion of development projects, as appropriate. We generally obtain a new appraisal once a fiscal year. In addition, we periodically monitor circumstances of the real estate collateral and then obtain a new appraisal in situations involving a significant change in economic and/or physical conditions which may materially affect its fair value. Non-recourse loans in the U.S. consist mainly of commercial mortgage loans held by the newly consolidated VIEs resulting from the application of new accounting standards in the fiscal year ended March 31, 2011 relating to the consolidation of VIEs (see Note 7 - Variable Interest Entities). For impaired purchased loans, the Company and its subsidiaries develop the allowance for credit losses based on the difference between the book value and the estimated collectible amount of such loans.

The average recorded investments in impaired loans for the fiscal year ended March 31, 2011 were ¥368,539 million. The Company and its subsidiaries recognized interest income on impaired loans of ¥4,225 million, and collected in cash interest on impaired loans of ¥3,592 million for the fiscal year ended March 31, 2011.

Table of Contents

The following table provides information about the average recorded investments in impaired loans and interest income on impaired loans for the nine months ended December 31, 2011 and for the three months ended December 31, 2011:

		Nine months ended December 31, 2011

Total		¥ 3,260,984	¥ 281,957	¥ 28,890	¥ 310,847	¥ 3,571,831

In common with all classes, the Company and its subsidiaries monitor the credit quality indicators as performing and non-performing assets. The category of non-performing assets includes financing receivables for debtors who have filed for insolvency proceedings, whose bank transactions are suspended, whose bills are dishonored, whose businesses have deteriorated, or whose repayment is past-due 90 days or more, and performing assets include all other financing receivables. Regarding purchased loans, they are classified as non-performing assets when considered impaired, while all the other loans are included in the category of performing assets.

Edgar Filing: ORIX CORP - Form 6-K

Out of non-performing assets presented above, the Company and its subsidiaries consider smaller balance homogeneous loans, including housing loans which are not restructured and direct financing leases, as 90 days or more past-due financing receivables not individually evaluated for impairment, and consider the others as loans individually evaluated for impairment. After the Company and its subsidiaries have set aside provision for those non-performing assets, the Company and its subsidiaries continue to monitor at least on a quarterly basis the quality of any underlying collateral, the status of management of the debtors and other important factors in order to report to management and develop additional provision as necessary.

Table of Contents

Total		¥ 110,572	¥ 148,996	¥ 259,568	¥ 3,471,036	¥ 148,996

In common with all classes, the Company and its subsidiaries consider financing receivables as past-due financing receivables when principal or interest is past-due 30 days or more. Loans whose terms have been modified are not classified as past-due financing receivables if the principals and interests are not past-due 30 days or more in accordance with the modified terms.

The Company and its subsidiaries suspend accruing revenues on past-due installment loans and direct financing leases when principal or interest is past-due 90 days or more, or earlier, if management determines that their collections are doubtful based on factors such as individual debtors creditworthiness, historical loss experience, current delinquencies and delinquency trends.

Cash repayments received on non-accrual loans are applied first against past due interest and then any surpluses are applied to principal in view of the conditions of the contract and obligors. The Company and its subsidiaries return to accrual status non-accrual loans and lease receivables when it becomes certain that the Company and its subsidiaries will be able to collect all amounts due according to the contractual terms of these loans and receivables, as evidenced by continual payments from the debtors.

Edgar Filing: ORIX CORP - Form 6-K

A troubled debt restructuring is defined as a restructuring of a financing receivable in which the creditor grants a concession to the debtor for economic or other reasons related to the debtor's financial difficulties.

The Company and its subsidiaries offer various types of concessions to our debtors to protect as much of our investment as possible in troubled debt restructurings. For the debtors of non-recourse loans, the Company and its subsidiaries offer concessions including an extension of the maturity date at an interest rate lower than the current market rate for a debt with similar risk characteristics. For the debtors of all financing receivables other than non-recourse loans, the Company and its subsidiaries offer concessions such as a reduction of the loan principal, a temporary reduction in the interest payments, or an extension of the maturity date at an interest rate lower than the current market rate for a debt with similar risk characteristics. In addition, the Company and its subsidiaries may acquire collateral assets from the debtors in troubled debt restructurings to satisfy fully or partially the loan principal or past due interest.

Table of Contents

In common with all portfolio segments, financing receivables modified in troubled debt restructurings are recognized as impaired and are individually evaluated for a valuation allowance. In most cases, these financing receivables have already been considered impaired and individually evaluated for allowance for credit losses prior to the restructurings. However, as a result of the restructuring, the Company and its subsidiaries may recognize additional provision for the restructured receivables.

The information about troubled debt restructurings of financing receivables that occurred during the nine months ended December 31, 2011 and during the three months ended December 31, 2011 are as follows:

		Nine months ended December 31, 2011	
		Millions of yen	
	Class	Pre-modification Outstanding Recorded Investment	Post-modification Outstanding Recorded Investment
Consumer borrowers	Housing loans	¥ 1,468	¥ 1,359
Corporate borrowers		19,929	19,064
Non-recourse loans	Japan	943	943
	U.S.	5,171	5,035
Other	Real estate companies	4,601	4,395
	Other	9,214	8,691
Total		¥ 21,397	¥ 20,423

		Three months ended December 31, 2011	
		Millions of yen

In common with all portfolio segments, the Company and its subsidiaries suspend accruing revenues and may recognize additional provision as necessary for the defaulted financing receivables.

Table of Contents**5. Investment in Securities**

Investment in securities at March 31, 2011 and December 31, 2011 consists of the following:

	Millions of yen	
	March 31, 2011	December 31, 2011
Trading securities	¥ 71,991	¥ 33,818
Available-for-sale securities	883,410	880,582
Held-to-maturity securities	43,695	43,667
Other securities	176,285	209,653
	¥ 1,175,381	¥ 1,167,720

Other securities consist mainly of non-marketable equity securities, preferred capital shares carried at cost and investment funds carried at an amount that reflects equity income and loss based on the investor's share.

Table of Contents

The amortized cost basis amounts, gross unrealized holding gains, gross unrealized holding losses and fair values of available-for-sale securities and held-to-maturity securities in each major security type at March 31, 2011 and December 31, 2011 are as follows:

March 31, 2011

	Millions of yen			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value

449 and 326 investment securities were in an unrealized loss position as of March 31, 2011 and December 31, 2011, respectively. The gross unrealized losses on these securities are attributable to a number of factors including changes in interest rates, credit spreads and market trends.

For debt securities, in the case of the fair value being below the amortized cost, the Company and its subsidiaries consider that an other-than-temporary impairment has occurred if (1) the Company and its subsidiaries intend to sell the debt security; (2) it is more likely than not that the Company and its subsidiaries will be required to sell the debt security before recovery of its amortized cost basis, or (3) the Company and its subsidiaries do not expect to recover the entire amortized cost of the security (that is, a credit loss exists). In assessing whether a credit loss exists, the Company and its subsidiaries compare the present value of the expected cash flows to the security's amortized cost basis at the balance sheet date.

Debt securities with unrealized loss position mainly include specified bonds issued by special purpose entities in Japan and CMBS and RMBS.

Table of Contents

The unrealized loss associated with specified bonds is primarily due to changes in the market interest rate and risk premium because of deterioration in the domestic real estate market and the credit crunch in the capital and financial markets. Considering all available information to assess the collectibility of those investments (such as performance and value of the underlying real estate, and seniority of the bonds), the Company and its subsidiaries believe that the Company and its subsidiaries are able to recover the entire amortized cost basis of those investments. Because the Company and its subsidiaries do not intend to sell the investments and it is not more likely than not that the Company and its subsidiaries will be required to sell the investments before recovery of their amortized cost basis, the Company and its subsidiaries do not consider these investments to be other-than-temporarily impaired at December 31, 2011.

The unrealized loss associated with CMBS and RMBS is primarily caused by changes in credit spreads and interest rates. In order to determine whether a credit loss exists, the Company and its subsidiaries estimate the present value of anticipated cash flows, discounted at the current yield to accrete the security. The cash flows are estimated based on a number of assumptions such as default rate and prepayment speed, as well as seniority of the security. Then, a credit loss is assessed by comparing the present value of the expected cash flows to the security's amortized cost basis. Based on that assessment, the Company and its subsidiaries expect to recover the entire amortized cost basis. Because the Company and its subsidiaries do not intend to sell the investments and it is not more likely than not that the Company and its subsidiaries will be required to sell the investments before recovery of their amortized cost basis, the Company and its subsidiaries do not consider these investments to be other-than-temporarily impaired at December 31, 2011.

For equity securities with unrealized losses, the Company and its subsidiaries consider various factors to determine whether the decline is other-than-temporary, including the length of time and the extent to which the fair value has been less than the carrying value and the issuer's specific economic conditions as well as the ability and intent to hold these securities for a period of time sufficient to recover the securities carrying amounts. Based on our ongoing monitoring process, the Company and its subsidiaries do not consider these investments to be other-than-temporarily impaired at December 31, 2011.

The total other-than-temporary impairment with an offset for the amount of the total other-than-temporary impairment recognized in other comprehensive income (loss) for nine months ended December 31, 2010 and 2011 are as follows:

	Millions of yen	
	Nine months ended December 31, 2010	Nine months ended December 31, 2011
Total other-than-temporary impairment losses	¥ 18,136	¥ 10,463
Portion of loss recognized in other comprehensive income (before taxes)	(206)	(598)
Net impairment losses recognized in earnings	¥ 17,930	¥ 9,865

The total other-than-temporary impairment with an offset for the amount of the total other-than-temporary impairment recognized in other comprehensive income (loss) for three months ended in December 31, 2010 and 2011 are as follows:

	Millions of yen	
	Three months ended December 31, 2010	Three months ended December 31, 2011
Total other-than-temporary impairment losses	¥ 6,149	¥ 3,370
Portion of loss recognized in other comprehensive income (before taxes)	(115)	(134)
Net impairment losses recognized in earnings	¥ 6,034	¥ 3,236

In the tables above, other-than-temporary impairment losses related to debt securities are recognized mainly on certain specified bonds, which have experienced credit losses due to significant decline in the value of the underlying assets, as well as on certain mortgage-backed and other asset-backed securities, which have experienced credit losses due to a decrease in cash flows attributable to significant default and bankruptcies on the underlying loans. Because the Company and its subsidiaries do not intend to sell these securities and it is not more likely than not that the Company and its subsidiaries will be required to sell these securities before recovery of their amortized cost basis, the Company and its subsidiaries charged only the credit loss component of the total impairment to earnings with the remaining non-credit component recognized in

Edgar Filing: ORIX CORP - Form 6-K

other comprehensive income (loss). The credit loss assessment was made by comparing the securities' amortized cost basis with the portion of the estimated fair value of the underlying assets available to repay the specified bonds, or with the present value of the expected cash flows from the mortgage-backed and other asset-backed securities, that were estimated based on a number of assumptions such as default rate and prepayment speed, as well as seniority of the security.

Table of Contents

Roll-forwards of the amount related to credit losses on other-than-temporarily impaired debt securities recognized in earnings for nine months ended December 31, 2010 and 2011 are as follows:

Credit loss for which an other-than-temporary impairment was previously recognized	76	54
Reduction during the period:		
For securities sold		(947)
Due to change in intent to sell or requirement to sell	(1,005)	(265)
Ending	¥ 9,097	¥ 9,228

The aggregate carrying amount of other securities accounted for under the cost method totaled ¥67,366 million and ¥94,391 million at March 31, 2011 and December 31, 2011, respectively. Investments with an aggregated cost of ¥63,590 million and ¥93,253 million were not evaluated for impairment because the Company and its subsidiaries did not identify any events or changes in circumstances that might have had significant adverse effect on the fair value of these investments and it was not practicable to estimate the fair value of the investments.

The Company and its subsidiaries have adopted Accounting Standards Update 2009-12 (Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent) ASC 820 (Fair Value Measurements and Disclosures)). Under ASC 820, the information about fund investments that the Company and its subsidiaries hold at March 31, 2011 and December 31, 2011 are as follows:

March 31, 2011

Edgar Filing: ORIX CORP - Form 6-K

Type of fund investment	Fair value (Millions of yen)	Redemption frequency (If currently eligible)		Redemption notice period	
		Monthly	Quarterly	10 days	45 days
Hedge funds*	¥ 10,023				
Total	¥ 10,023				

Table of Contents**December 31, 2011**

Type of fund investment	Fair value (Millions of yen)	Redemption frequency (If currently eligible)		Redemption notice period	
		Monthly	Quarterly	10 days	45 days
Hedge fund *	¥ 5,239				
Total	¥ 5,239				

* This category includes several hedge funds that seek profits using investment strategies such as managed futures, global macro and relative value. The fair value of the investments in this category is calculated based on the net asset value of the investees. Included in interest on loans and investment securities in the consolidated statements of income is interest income on investment securities of ¥13,022 million and ¥11,235 million, for the nine months ended December 31, 2010 and 2011, respectively. Included in interest on loans and investment securities in the consolidated statements of income is interest income on investment securities of ¥4,183 million and ¥3,756 million, for the three months ended December 31, 2010 and 2011, respectively.

6. Securitization Transactions

The Company and its subsidiaries have securitized various financial assets such as direct financing lease receivables, installment loans (commercial mortgage loans, housing loans and other) and investment in securities.

In the securitization process, these financial assets are transferred to various vehicles (the SPEs), such as trusts and special-purpose companies that issue beneficial interests of the securitization trusts and securities backed by the financial assets to investors. The cash flows collected from these assets transferred to the SPEs are then used to repay these asset-backed beneficial interests and securities. As the transferred assets are isolated from the Company and its subsidiaries, the investors and the SPEs have no recourse to other assets of the Company and its subsidiaries in cases where the debtors or the issuers of the transferred financial assets fail to perform under the original terms of those financial assets. The Company and its subsidiaries often retain interests in the SPEs in the form of the beneficial interest of the securitization trusts. Those interests that continue to be held include interests in the transferred assets and are often subordinate to other tranche(s) of the securitization. Those beneficial interests that continue to be held by the Company and its subsidiaries are subject to credit risk, interest rate risk and prepayment risk on the securitized financial assets. With regards to these subordinated interests that the Company and its subsidiaries retain, they are subordinated to the senior investments and are exposed to different credit and prepayment risks, since they first absorb the risk of the decline in the cash flows from the financial assets transferred to the SPEs for defaults and prepayment of the transferred assets. If there is any excess cash remaining in the SPEs after payment to investors in the securitization of the contractual rate of returns, most of such excess cash is distributed to the Company and its subsidiaries for payments of the subordinated interests.

Until March 31, 2010, the Company and its subsidiaries did not consolidate qualified special-purpose entities (QSPEs) meeting certain requirements and the Company and its subsidiaries accounted for the transfer of financial assets to QSPEs as a sale when control over the financial assets was surrendered.

From April 1, 2010, the Company and its subsidiaries apply Accounting Standards Update 2009-16 (ASC860 (Transfers and Servicing)). This Update removes the concept of a QSPE and removes the exception from applying ASC 810-10 (Consolidation Variable Interest Entities) to variable interest entities that are QSPEs. This Update also modifies the financial-components approach used in former ASC 860 (Transfers and Servicing) and limits the circumstances in which a transferor derecognizes a portion or component of a financial asset. As a result, many SPEs for securitization which had not been consolidated because they met QSPE criteria have been consolidated in accordance with Accounting Standards Update 2009-17 ((ASC810 (Consolidation))). For further information, see Note 7 Variable Interest Entities.

During the nine months ended December 31, 2010 and nine months ended December 31, 2011, there was no securitization transaction accounted for as a sale. During the three months ended December 31, 2010 and three months ended December 31, 2011, there was no securitization transaction accounted for as a sale.

Table of Contents

Quantitative information about delinquencies, impaired loans and components of financial assets sold on securitization and other assets managed together as of March 31, 2011 and December 31, 2011, and quantitative information about net credit loss for the nine months ended December 31, 2011 and for the three months ended December 31, 2011 are as follows:

	Millions of yen			
	Total principal amount of receivables		Principal amount of receivables more than 90 days past-due and impaired loans	
	March 31, 2011	December 31, 2011	March 31, 2011	December 31, 2011
Direct financing lease	830,853	839,630	22,787	20,120
Installment loans	2,983,164	2,741,097	322,068	290,727
Assets recorded on the balance sheet	3,814,017	3,580,727	344,855	310,847
Direct financing lease sold on securitization	12,651	5,779		
Total assets managed together or sold on securitization	¥ 3,826,668	¥ 3,586,506	¥ 344,855	¥ 310,847

	Millions of yen			
	Credit loss			
	Nine months ended December 31, 2010	Nine months ended December 31, 2011	Three months ended December 31, 2010	Three months ended December 31, 2011
Direct financing lease	5,676	5,225	1,709	2,245
Installment loans	31,259	23,238	11,447	5,320
Assets recorded on the balance sheet	36,935	28,463	13,156	7,565
Direct financing lease sold on securitization				
Total assets managed together or sold on securitization	¥ 36,935	¥ 28,463	¥ 13,156	¥ 7,565

A certain subsidiary originates and sells loans into the secondary market, while retaining the obligation to service those loans. In addition, it undertakes obligations to service loans originated by others. The servicing assets related to those servicing activities are included in other operating assets and the balances of these servicing assets as of March 31, 2011 and December 31, 2011 were ¥11,577 million and ¥10,877 million, respectively. During the nine months ended December 31, 2011, the servicing assets were increased by ¥1,892 million mainly from loans sold with servicing retained and decreased by ¥1,834 million mainly from amortization and by ¥758 million from the effects of changes in foreign exchange rates. The fair value of the servicing assets as of March 31, 2011 and December 31, 2011 were ¥14,093 million and ¥12,635 million, respectively.

7. Variable Interest Entities

The Company and its subsidiaries use special purpose companies, partnerships and trusts (hereinafter referred to as SPEs) in the ordinary course of business.

These SPEs are not always controlled by voting rights, and there are cases where voting rights do not exist for those SPEs. ASC 810-10 (Consolidation Variable Interest Entities) addresses consolidation by business enterprises of SPEs within the scope of the ASC Section. Generally these SPEs are entities where (a) the total equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support provided by any parties including the equity holders or (b) as a group the holders of the equity investment at risk do not have (1) the ability to make decisions about an entity's activities that most significantly impact the entity's economic performance through voting rights or similar rights, or (2) the obligation to absorb the expected losses of the entity or (3) the right to receive the expected residual returns of the entity. Entities within the scope of the ASC Section are called variable interest entities (VIEs).

Until March 31, 2010, in accordance with ASC 810-10 before amendment, the Company and its subsidiaries were required to consolidate a VIE as the primary beneficiary if the Company and its subsidiaries had a variable interest to absorb a majority of the VIE's expected loss or receive a majority of the VIE's expected residual returns or meet both of these conditions by using quantitative analysis.

Table of Contents

Also, until March 31, 2010, if SPEs met the criteria for qualifying special-purpose entity (QSPE) status in accordance with ASC 860 (Transfer and Servicing) and ASC 810-10 before amendment, the Company and its subsidiaries excluded the QSPE from the scope of consolidation.

In June 2009, FASB Statement No. 166 (Accounting for Transfers of Financial Assets an amendment of FASB Statement No.140), which was codified by Accounting Standards Update 2009-16 (ASC860 (Transfers and Servicing)) and FASB Statement No. 167 (Amendment of FASB Interpretation No.46(R)), which was codified by Accounting Standards Update 2009-17 (ASC 810 (Consolidation)), were issued. These Updates remove the concept of a QSPE and remove the exception from applying ASC 810-10 to variable interest entities that are QSPEs and require the Company and its subsidiaries to perform a qualitative analysis to identify the primary beneficiary of all variable interest entities, including QSPEs. The Company and its subsidiaries adopted these Updates on April 1, 2010. The effect of adopting these Updates on our financial conditions at the initial adoption date was an increase of ¥1,147 billion on total assets, an increase of ¥1,169 billion on total liabilities, respectively, in the consolidated balance sheets. These are mainly included in (f) VIEs for securitizing financial assets such as direct financing lease receivable and loan receivable, and (g) VIEs for securitization of commercial mortgage loans originated by third parties.

According to these Updates, effective from April 1, 2010, the Company and its subsidiaries are required to perform a qualitative analysis to identify the primary beneficiary of variable interest entities. An enterprise that has both of the following characteristics is considered to be the primary beneficiary who shall consolidate a variable interest entity:

The power to direct the activities of a variable interest entity that most significantly impact the entity s economic performance

The obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity.

All facts and circumstances are taken into consideration when determining whether the Company and its subsidiaries have variable interests that would deem it the primary beneficiary and therefore require consolidation of the VIE. The Company and its subsidiaries make ongoing reassessment of whether they are the primary beneficiaries of a variable interest entity.

The following are the items that the Company and its subsidiaries are considering in a qualitative assessment.

Which activities most significantly impact the economic performance of the VIE and who has the power to direct such activities.

Characteristics of the Company and its subsidiaries variable interest or interests and other involvements (including involvement of related parties and de facto agents)

Involvement of other variable interest holders

The entity s purpose and design, including the risks that the entity was designed to create and pass through to its variable interest holders

The Company and its subsidiaries generally consider the following types of involvement to be significant, when determining the primary beneficiary.

designing the structuring of a transaction

providing an equity investment and debt financing

being the investment manager, asset manager or servicer and receiving variable fees

providing liquidity and other financial support

The Company does not have the power to direct activities of the VIEs that most significantly impact the VIEs' economic performance, if that power is shared. In that case, the Company and its subsidiaries do not consolidate such VIEs.

Table of Contents

Information about VIEs for the Company and its subsidiaries are as follows:

1. Consolidated VIEs
March 31, 2011

Types of VIEs	Millions of yen			
	Total assets (1)	Total liabilities (1)	Assets which are pledged as collateral (2)	Commitments (3)
(a) VIEs for liquidating customer assets	¥ 5,222	¥ 3,846	¥ 5,222	¥

Edgar Filing: ORIX CORP - Form 6-K

Note:

- (4) Maximum exposure to loss includes remaining balance of commitments that could require the Company and its subsidiaries to provide investments or loans to the VIE.

Table of Contents

(a) VIEs for liquidating customer assets

The Company and its subsidiaries may use VIEs in structuring financing for customers to liquidate specific customer assets. The VIEs are typically used to provide a structure that is bankruptcy remote with respect to the customer and the use of VIE structure is requested by such customer. Such VIEs typically acquire assets to be liquidated from the customer, borrow non-recourse loans from financial institutions and have an equity investment made by the customer. By using cash flows from the liquidated assets, these VIEs repay the loan and pay dividends to equity investors if sufficient funds exist.

The Company and its subsidiaries provide non-recourse loans to such VIEs and occasionally make investments in them. The Company and its subsidiaries have consolidated some of those VIEs because the Company or its subsidiary effectively controls the VIEs by acting as the asset manager of the VIEs. In the consolidated balance sheets, assets of the consolidated VIEs are mainly included in investment in operating leases and liabilities of the consolidated VIEs are mainly included in long-term debt, respectively.

With respect to the variable interests of non-consolidated VIEs, which the Company and its subsidiaries have, non-recourse loans are included in installment loans, and investments are mainly included in other operating assets in the consolidated balance sheets.

(b) VIEs for acquisition of real estate and real estate development projects for customers

Customers and the Company and its subsidiaries are involved with VIEs formed to acquire real estate and/or develop real estate projects. In each case, a customer establishes and makes an equity investment in a VIE that is designed to be bankruptcy remote from the customer. The VIEs acquire real estate and/or develop real estate projects.

The Company and its subsidiaries provide non-recourse loans to such VIEs and hold specified bonds issued by them and/or make investments in them. The Company and its subsidiaries have consolidated some of those VIEs because the Company or its subsidiary effectively controls the VIEs by acting as the asset manager of the VIEs. In the consolidated balance sheets, assets of the consolidated VIEs are mainly included in cash and cash equivalents, investment in operating leases and other operating assets and liabilities of those consolidated VIEs are mainly included in short-term debt, respectively.

With respect to the variable interests of non-consolidated VIEs, which the Company and its subsidiaries have, specified bonds are included in investment in securities, non-recourse loans are included in installment loans, and investments are mainly included in other operating assets and investment in securities in the consolidated balance sheets. The Company and its subsidiaries have commitment agreements by which the Company and its subsidiaries might be required to provide additional investment in certain non-consolidated VIEs, as long as the agreed-upon terms are met. Under these agreements, the Company and its subsidiaries are committed to invest in these VIEs with the other investors based on their respective ownership percentages.

The Company and its subsidiaries concluded that the VIEs are not consolidated because the power to direct these VIEs is held by unrelated parties. In some cases, the Company and its subsidiaries concluded that the VIEs are not consolidated because the power to direct these VIEs is shared among multiple unrelated parties.

(c) VIEs for acquisition of real estate for the Company and its subsidiaries real estate-related business

The Company and its subsidiaries establish VIEs and acquire real estate to borrow non-recourse loans from financial institutions and simplify the administration activities necessary for the real estate. The Company and its subsidiaries have consolidated such VIEs even though the Company and its subsidiaries may not have voting rights if substantially all of such VIEs' subordinated interests are issued to the Company and its subsidiaries, and therefore the VIEs are controlled by and for the benefit of the Company and its subsidiaries.

For the fiscal year ended March 31, 2011 and nine months ended December 31, 2011, the Company and its subsidiaries contributed additional funding to certain non-consolidated VIEs to support their repayment, since those VIEs had difficulty repaying debt and accounts payable. The amounts of those additional fundings for the fiscal year ended March 31, 2011 and nine months ended December 31, 2011 were ¥14,613 million and ¥135 million, respectively. As a result, the Company and its subsidiaries performed a reassessment and consolidated those VIEs.

In the consolidated balance sheets, assets of the consolidated VIEs are mainly included in investment in operating leases, office facilities, cash and cash equivalents and other assets and liabilities of those consolidated VIEs are mainly included in long-term debt, respectively. The Company has commitment agreements by which the Company might be required to make an additional investment in certain such consolidated VIEs.

Table of Contents

(d) VIEs for corporate rehabilitation support business

Financial institutions, the Company and its subsidiary are involved with VIEs established for the corporate rehabilitation support business. VIEs receive the funds from investors including the financial institutions, the Company and the subsidiary, and purchase loan receivables due from borrowers which have financial problems, but that are deemed to have the potential to recover in the future. The servicing operations for the VIEs are conducted by the subsidiary.

The Company and its subsidiary consolidated such VIEs since the Company and the subsidiary have the majority of the investment share of such VIEs, and have the power to direct the activities of the VIEs that most significantly impact the entities' economic performance through the servicing operations.

In the consolidated balance sheets, assets of the consolidated VIEs are mainly included in installment loans and liabilities of those consolidated VIEs are mainly included in accrued expenses, respectively.

(e) VIEs for investment in securities

The Company and its subsidiaries have interests in VIEs that are investment funds and mainly invest in equity and debt securities. Such VIEs are managed mainly by fund management companies that are independent of the Company and its subsidiaries.

The Company consolidated certain such VIEs since the Company has the majority of the investment share of them, and has the power to direct the activities of those VIEs that most significantly impact the entities' economic performance through involvement with the design of the VIEs and/or other means.

In the consolidated balance sheets, assets of the consolidated VIEs are mainly included in investment in securities, other receivables and investment in affiliates and liabilities of those consolidated VIEs are mainly included in short-term debt, long-term debt, trade notes, accounts payable and other liabilities, respectively. The Company has commitment agreements by which the Company might be required to make additional investment in certain such consolidated VIEs.

Variable interests of non-consolidated VIEs, which the Company and its subsidiaries have, are included in investment in securities. The Company has commitment agreements by which the Company might be required to make additional investment in certain such non-consolidated VIEs.

(f) VIEs for securitizing financial assets such as direct financing lease receivable and loan receivable

The Company and its subsidiaries use VIEs to securitize financial assets such as direct financing leases receivable and loans receivable. In the securitization process, these financial assets are transferred to SPEs, and the SPEs issue beneficial interests or securities backed by the transferred financial assets to investors. After the securitization, the Company and its subsidiaries continue to hold a subordinated part of the securities, and take a role as a servicer.

The Company and its subsidiaries consolidated such VIEs since the Company and its subsidiaries have the power to direct the activities that most significantly impact the entity's economic performance by designing the securitization scheme and conducting servicing activities, and have a responsibility to absorb losses of the VIEs that could potentially be significant to the entities by retaining the subordinated part of the securities.

In the consolidated balance sheets, assets of the consolidated VIEs are mainly included in investment in direct financing leases and installment loans and liabilities of those consolidated VIEs are mainly included in long-term debt, respectively.

(g) VIEs for securitization of commercial mortgage loans originated by third parties

The Company and its subsidiaries invest in CMBS originated by third parties. In some cases of such securitization, the Company's subsidiaries hold the subordinated portion of CMBS and the subsidiaries take a role as a special-servicer of the securitization transaction. As the special servicer, the subsidiaries have rights to dispose of real estate collateral related to the securitized commercial mortgage loans.

The subsidiaries consolidate certain of these VIEs when the subsidiaries have the power to direct the activities of the VIEs that most significantly impact the entities' economic performance through the role as special-servicer including the right to dispose of the collateral, and

Edgar Filing: ORIX CORP - Form 6-K

have a responsibility to absorb losses of the VIEs that could potentially be significant to the entities by holding the subordinated part of the securities.

In the consolidated balance sheets, assets of the consolidated VIEs are mainly included in installment loans and investment in securities and liabilities of those consolidated VIEs are mainly included in long-term debt, respectively.

Variable interests of non-consolidated VIEs are included in investment in securities.

Table of Contents

(h) Other VIEs

The Company and its subsidiaries are involved with other types of VIEs for various purposes. Consolidated and non-consolidated VIEs of this category are mainly kumiai structures. In addition, a subsidiary has consolidated a VIE which is not included in the categories (a) through (g) above, because the subsidiary holds the subordinated portion of the VIE and the VIE is effectively controlled by the subsidiary. The Company has commitment agreement by which the Company might be required to make additional investment in such consolidated VIEs.

In Japan, certain subsidiaries provide investment products to their customers that employ a contractual mechanism known as a kumiai, which in part result in the subsidiaries forming a type of SPE. As a means to finance the purchase of aircraft or other large-ticket items to be leased to third parties, the Company and its subsidiaries arrange and market kumiai products to investors, who invest a portion of the funds necessary into the kumiai structure. The remainder of the purchase funds is borrowed by the kumiai structure in the form of a non-recourse loan from one or more financial institutions. The kumiai investors (and any lenders to the kumiai structure) retain all of the economic risks and rewards in connection with purchasing and leasing activities of the kumiai structure, and all related gains or losses are recorded on the financial statements of investors in the kumiai. The Company and its subsidiaries are responsible for the arrangement and marketing of these products, and may act as servicer or administrator in kumiai transactions. The fee income for the arrangement and administration of these transactions is recognized in the consolidated statements of income.

In some cases, the Company and its subsidiaries make investments to the kumiai or its related SPE and these VIEs are consolidated because the Company and its subsidiaries have a responsibility to absorb any significant potential loss through the investments and have the power to direct the activities that most significantly impact their economic performance. In other cases, the Company and its subsidiaries are not considered to be the primary beneficiary of the VIEs or kumiais because the Company and its subsidiaries did not make significant investments or guarantee or otherwise have any significant financial commitments or exposure with respect to the kumiai or its related SPE.

The Company and its subsidiaries may use VIEs to finance. The Company and its subsidiaries transfer their own held assets to SPEs, which borrow non-recourse loan from financial institutions and effectively pledge such assets as collateral. The Company guarantees the performance of obligation of the SPEs. The Company and its subsidiaries continually hold subordinated interests in the SPEs and perform administrative work of such assets. The Company and its subsidiaries consolidate such SPEs because the Company and its subsidiaries have a right to direct the activities of them that most significantly impact their economic performance by setting up the scheme and performing administrative work of the assets and have the obligation to absorb losses expected of them by holding the subordinated interests. Assets of the consolidated SPEs are mainly included in investment in operating leases and other assets and liabilities are mainly included in long-term debt in the consolidated balance sheets, respectively.

Table of Contents**8. Investment in Affiliates**

Investment in affiliates at March 31 and December 31, 2011 consists of the following:

	Millions of yen	
	March 31, 2011	December 31, 2011
Shares	¥ 311,556	¥ 297,506
Loans	61,820	42,714
	¥ 373,376	¥ 340,220

Combined and condensed information relating to the affiliates as of and for the nine months ended December 31, 2010 and 2011 are as follows (results of operation of the affiliates reflect only the period since the Company and its subsidiaries made the investment and on a lag basis):

	Millions of yen	
	As of and for nine months ended December 31, 2010	As of and for nine months ended December 31, 2011
Operations:		
Total revenues	¥ 548,781	¥ 656,633
Income before income taxes	53,692	51,654
Net income	36,054	39,953
Financial position:		
Total assets	¥ 4,208,631	¥ 4,235,422
Total liabilities	3,116,168	3,236,067
Shareholders' equity	1,092,463	999,355

Table of Contents**9. Redeemable Noncontrolling Interests**

Changes in redeemable noncontrolling interests for the nine months ended December 31, 2010 and 2011 are as follows:

	Millions of yen	
	Nine months ended December 31, 2010	Nine months ended December 31, 2011
Beginning balance	¥ 28,095	¥ 33,902
Adjustment of redeemable noncontrolling interests to redemption value	448	(84)
Transaction with noncontrolling interests	992	934

Comprehensive income (loss)	(1,528)	(572)
Cash dividends	(5,961)	(124)
Ending balance	¥ 22,046	¥ 34,056

10. ORIX Corporation Shareholders Equity

Information about ORIX Corporation Shareholders Equity for the nine months ended December 31, 2010 and 2011, are as follows:

(1) Dividend payments

	Nine months ended December 31, 2010	Nine months ended December 31, 2011
Resolution	The board of directors on May 20, 2010	The board of directors on May 23, 2011
Type of shares	Common stock	Common stock
Total dividends paid	¥8,061 million	¥8,599 million
Dividend per share	¥75.00	¥80.00
Date of record for dividend	March 31, 2010	March 31, 2011
Effective date for dividend	June 2, 2010	June 2, 2011
Dividend resource	Retained earnings	Retained earnings

(2) Dividends for which the date of record is in the nine months ended December 31, 2010, and for which the effective date is after December 31, 2010

There are no applicable dividends.

Dividends for which the date of record is in the nine months ended December 31, 2011, and for which the effective date is after December 31, 2011

There are no applicable dividends.

Table of Contents**11. Selling, General and Administrative Expenses**

Selling, general and administrative expenses for the nine months ended December 31, 2010 and 2011, are as follows:

	Three months ended Millions of yen		Three months ended Millions of yen	
	Nine months ended December 31, 2010		Nine months ended December 31, 2011	
Personnel expenses	¥	98,998	¥	93,032
Selling expenses		12,089		11,929
Administrative expenses		37,499		34,809
Depreciation of office facilities		2,113		2,389
Total	¥	150,699	¥	142,159

Selling, general and administrative expenses for the three months ended December 31, 2010 and 2011, are as follows:

	Three months ended Millions of yen		Three months ended Millions of yen	
	Three months ended December 31, 2010		Three months ended December 31, 2011	
Personnel expenses	¥	35,263	¥	31,363
Selling expenses		4,238		5,015
Administrative expenses		13,220		11,737
Depreciation of office facilities		717		817
Total	¥	53,438	¥	48,932

The amounts that were previously reported for the nine months and the three months ended December 31, 2010 related to discontinued operations are reclassified.

12. Pension Plans

The Company and certain subsidiaries have contributory and non-contributory pension plans covering substantially all of their employees. Those contributory funded pension plans include defined benefit pension plans and defined contribution pension plans. Under the plans, employees are entitled to lump-sum payments at the time of termination of their employment or pension payments. Defined benefit pension plans consist of a plan of which the amounts of such payments are determined on the basis of length of service and remuneration at the time of termination and a cash balance plan.

The Company and its subsidiaries' funding policy is to contribute annually the amounts actuarially determined. Assets of the plans are invested primarily in interest-bearing securities and marketable equity securities.

Net pension cost of the plans for the nine months ended December 31, 2010 and 2011 consists of the following:

	Three months ended Millions of yen	Three months ended Millions of yen
--	---------------------------------------	---------------------------------------

Edgar Filing: ORIX CORP - Form 6-K

	Nine months ended December 31, 2010	Nine months ended December 31, 2011
Service cost	¥ 2,330	¥ 2,283
Interest cost	1,026	1,011
Expected return on plan assets	(1,525)	(1,514)
Amortization of transition obligation	(3)	42

Amortization of net actuarial loss	260		304
Amortization of prior service credit	(298)		(299)
Net periodic pension cost	¥ 571		¥ 612

Table of Contents
13. Write-Downs of Long-Lived Assets

In accordance with ASC 360-10 (Property, Plant, and Equipment Impairment or Disposal of Long-Lived Assets), the Company and its subsidiaries perform tests for recoverability on assets for which events or changes in circumstances indicated that the assets might be impaired. The Company and its subsidiaries consider an asset's carrying amount as not recoverable when such carrying amount exceeds the undiscounted future cash flows estimated to result from the use and eventual disposition of the asset. The net carrying amount of assets not recoverable is reduced to fair value if lower than the carrying amount. We determine the fair value using appraisals prepared by independent third party appraisers or our own staff of qualified appraisers based on recent transactions involving sales of similar assets or other valuation techniques such as discounted cash flows methodologies using future cash flows estimated to be generated from operation of the existing assets or completion of development projects, as appropriate.

For the nine months ended December 31, 2010 and 2011, the Company and certain subsidiaries recognized impairment losses for the difference between carrying amounts and fair values in the amount of ¥6,384 million and ¥15,531 million, respectively, which are reflected as write-downs of long-lived assets and income from discontinued operations. Of these amounts, ¥4,719 million and ¥11,482 million are reflected as write-downs of long-lived assets in the accompanying consolidated statements of income for the nine months ended December 31, 2010 and 2011, respectively.

Losses of ¥104 million in the Corporate Financial Services segment, ¥4,334 million in the Real Estate segment and ¥935 million in the Investment and Operation segment were recorded for the nine months ended December 31, 2010. Losses of ¥793 million in the Corporate Financial Services segment, ¥12,928 million in the Real Estate segment and ¥286 million in the Investment and Operation segment were recorded for the nine months ended December 31, 2011.

For the three months ended December 31, 2010 and 2011, the Company and certain subsidiaries recognized impairment losses for the difference between carrying amounts and fair values in the amount of ¥1,972 million and ¥12,573 million, respectively, which are reflected as write-downs of long-lived assets and income from discontinued operations. Of these amounts, ¥994 million and ¥9,582 million are reflected as write-downs of long-lived assets in the accompanying consolidated statements of income for the three months ended December 31, 2010 and 2011, respectively.

Losses of ¥1,218 million in the Real Estate segment and ¥417 million in the Investment and Operation segment were recorded for the three months ended December 31, 2010. Losses of ¥793 million in the Corporate Financial Services segment, ¥10,928 million in the Real Estate segment and ¥66 million in the Investment and Operation segment were recorded for the three months ended December 31, 2011.

The details of significant write-downs are as follows.

Office Buildings For the nine months ended December 31, 2010, write-downs of ¥159 million were recorded in relation to 3 office buildings due to a decline in the cash flow of each unit, and write-downs of ¥54 million were recorded for an office building held for sale. For the nine months ended December 31, 2011, write-downs of ¥967 million were recorded for 13 office buildings held for sale. For the three months ended December 31, 2010, write-downs of ¥25 million were recorded in relation to an office building due to a decline in the cash flow of each unit, and write-downs of ¥54 million were recorded for an office building held for sale. For the three months ended December 31, 2011, write-downs of ¥366 million were recorded for 4 office buildings held for sale.

Commercial Facilities other than Offices For the nine months ended December 31, 2010, write-downs of ¥1,702 million were recorded in relation to 7 commercial facilities other than office due to a decline in the cash flow of each unit. For the nine months ended December 31, 2011, write-downs of ¥248 million were recorded for 5 commercial facilities held for sale. For the three months ended December 31, 2010, write-downs of ¥918 million were recorded in relation to 3 commercial facilities due to a decline in the cash flow of each unit. For the three months ended December 31, 2011, write-downs of ¥214 million were recorded for 3 commercial facilities held for sale.

Table of Contents

Condominiums For the nine months ended December 31, 2010, write-downs of ¥1,294 million were recorded for 24 condominiums held for sale, and write-downs of ¥1,328 million were recorded in relation to 15 condominiums due to a decline in the cash flow of each unit. For the nine months ended December 31, 2011, write-downs of ¥738 million were recorded for 21 condominiums held for sale. For the three months ended December 31, 2010, write-downs of ¥66 million were recorded for 4 condominiums held for sale, and ¥689 million were recorded in relation to 7 condominiums due to a decline in the cash flow of each unit. For the three months ended December 31, 2011, write-downs of ¥282 million were recorded for 6 condominiums held for sale.

Land undeveloped or under construction There was no impairment for the nine months ended December 31, 2010. For the nine months ended December 31, 2011, write-downs of ¥2,077 million were recorded for land undeveloped or under construction held for sale, and write-downs of ¥6,631 million were recorded in relation to land undeveloped or under construction due to a decline in the estimated cash flow of each unit. There was no impairment for the three months ended December 31, 2010. For the three months ended December 31, 2011, write-downs of ¥2,077 million were recorded for land undeveloped or under construction held for sale, and write-downs of ¥6,631 million were recorded in relation to land undeveloped or under construction due to a decline in the estimated cash flow of each unit.

Others For the nine months ended December 31, 2010 and 2011, write-downs of ¥1,847 million and ¥4,870 million were recorded, respectively, for long-lived assets other than the above, mainly because the carrying amounts exceeded the estimated undiscounted future cash flow, which decreased due to deterioration in operating performance. For the three months ended December 31, 2010 and 2011, write-downs of ¥220 million and ¥3,003 million were recorded, respectively, for long-lived assets other than the above, mainly because the carrying amounts exceeded the estimated undiscounted future cash flow, which decreased due to deterioration in operating performance.

14. Discontinued Operations

ASC 205-20 (Presentation of Financial Statements Discontinued Operations) requires that the Company and its subsidiaries reclassify the operations sold or to be disposed of by sale without significant continuing involvement in the operations to discontinued operations. Under this Codification Section, the Company and its subsidiaries report the gains on sales and the results of these operations of subsidiaries, business units, and certain properties, which have been sold or are to be disposed of by sale, as income from discontinued operations in the accompanying consolidated statements of income. Revenues and expenses generated by the operations of such subsidiaries, business units and properties recognized for the nine months and for the three months ended December 31, 2010 have also been reclassified as income from discontinued operations in the accompanying consolidated statement of income.

The Company and its subsidiary finished a liquidation of the PFI contract for hospital management business in one of its subsidiaries in Japan during the three months ended December 31, 2010. As a result, a gain of ¥33 million was recognized for the three months ended December 31, 2010. The Company sold a subsidiary, which operated hairdressing business, and a gain of ¥5,896 million was recognized for the three months ended December 31, 2010. During the three months ended September 30, 2010, the Company wound up a subsidiary in Japan that was established in order to enter into derivative business. In addition, one of the subsidiaries of the Company sold its subsidiary, which operated a consulting business in medical and nursing care field. As a result of the sale, a gain of ¥263 million was recognized for the three months ended September 30, 2010.

The Company determined to wind up a subsidiary that operated an asbestos removing business in the fiscal year ended March 31, 2011 and completed the liquidation procedure for the subsidiary during the three months ended September 30, 2011. The Company sold a subsidiary, which operated real-estate rental business, during the three months ended June 30, 2011. As a result of the sale, a gain of ¥162 million was recognized for the three months ended June 30, 2011. There was no gain or loss from selling or liquidating subsidiaries for the three months ended September 30, 2011.

The Company determined to sell a subsidiary that operated a Japanese inn and a hotel and a subsidiary that operated a golf course in Japan during the three months ended September 30, 2011 and completed the procedure during the three months ended December 31, 2011. As a result of the sale, a gain of ¥377 million was recognized for the three months ended December 31, 2011. The Company also liquidated a *kumiai*, which was in effect a type of SPE, seeking for rent revenue during the three months ended December 31, 2011. As a result of the liquidation, a loss of ¥37 million was recognized for the three months ended December 31, 2011.

The Company and its subsidiaries own various real estate properties, including commercial and office buildings, for rental operations. For the nine months ended December 31, 2010 and 2011 and the three months ended December 31, 2011, the Company and its subsidiaries recognized ¥4,993 million, ¥3,398 million and ¥1,640 million of aggregated gains and for the three months ended December 31, 2010, the Company and its subsidiaries recognized ¥10 million of aggregated losses on sales of such real estate properties, respectively. In addition, the Company and its subsidiaries determined to dispose by sale of rental properties of ¥27,486 million and ¥22,820 million which are included in investment in

operating leases at March 31, 2011 and December, 31 2011, respectively.

Table of Contents

Discontinued operations for the nine months ended December 31, 2010 and 2011 and the three months ended December 31, 2010 and 2011 consist of the following:

	Millions of yen	
	Three months ended Nine months ended December 31, 2010	Three months ended Nine months ended December 31, 2011
Revenues	¥ 24,125	¥ 7,742
Income from discontinued operations, net*	6,785	1,018

	Millions of yen	
	Three months ended December 31, 2010	Three months ended December 31, 2011
Revenues	¥ 5,614	¥ 2,408
Income from discontinued operations, net*	3,660	(309)

* Income from discontinued operations, net includes aggregate gains and losses on sales and liquidation of subsidiaries, business units, and rental properties. The amounts of such gains for the nine months ended December 31, 2010 and 2011 and the three months ended December 31, 2010 and 2011 are ¥11,185 million, ¥3,900 million, ¥5,919 million and ¥1,980 million, respectively.

15. Per Share Data

Reconciliation of the differences between basic and diluted earnings per share (EPS) in the nine months ended December 31, 2010 and 2011 and the three months ended December 31, 2010 and 2011 is as follows:

During the nine months ended December 31, 2010, the diluted EPS calculation excludes stock options for 1,221 thousand shares, as they were antidilutive.

During the nine months ended December 31, 2011, the diluted EPS calculation excludes stock options for 1,049 thousand shares, as they were antidilutive.

During the three months ended December 31, 2010, the diluted EPS calculation excludes convertible bond for 2,493 thousand shares and stock options for 1,122 thousand shares, as they were antidilutive.

During the three months ended December 31, 2011, the diluted EPS calculation excludes stock options for 1,084 thousand shares, as they were antidilutive.

Table of Contents**16. Derivative Financial Instruments and Hedging****Risk management policy**

The Company and its subsidiaries manage interest rate risk through asset and liability management systems. The Company and its subsidiaries use derivative financial instruments to hedge interest rate risk and avoid changes in interest rates having a significant adverse effect on the Company's results of operations. As a result of interest rate changes, the fair value and/or cash flow of interest sensitive assets and liabilities will fluctuate. However, such fluctuation will generally be offset by using derivative financial instruments as hedging instruments. Derivative financial instruments that the Company and its subsidiaries use as part of the interest risk management include interest rate swaps.

The Company and its subsidiaries employ foreign currency borrowings, foreign exchange contracts, and foreign currency swap agreements to hedge risks that are associated with certain transactions and investments denominated in foreign currencies due to the potential for changes in exchange rates. Similarly, in general, overseas subsidiaries structure their liabilities to match the currency-denomination of assets in each region.

By using derivative instruments, the Company and its subsidiaries are exposed to credit risk in the event of nonperformance by counterparties. The Company and its subsidiaries attempt to manage the credit risk by carefully evaluating the content of transactions and the quality of counterparties in advance and regularly monitoring the amount of notional principal, fair value, type of transaction and other factors pertaining to each counterparty.

(a) Cash flow hedges

The Company and its subsidiaries designate interest rate swap agreements, foreign currency swap agreements and foreign exchange contracts as cash flow hedges for variability of cash flows originating from floating rate borrowings and forecasted transactions and for exchange fluctuations.

(b) Fair value hedges

The Company and its subsidiaries use financial instruments designated as fair value hedges to hedge their exposure to interest rate risk and foreign currency exchange risk. The Company and its subsidiaries designate foreign currency swap agreements and foreign exchange contracts to minimize foreign currency exposures on lease receivables, loan receivables and borrowings, denominated in foreign currency. The Company and its subsidiaries designate interest rate swap to hedge interest rate exposure of the fair values of loan receivables. The Company and certain overseas subsidiaries, which issued medium-term notes or bonds with fixed interest rates, use interest rate swap contracts to hedge interest rate exposure of the fair values of these medium-term notes or bonds. In cases where the medium-term notes were denominated in other than the subsidiaries' local currencies, foreign currency swap agreements are used to hedge foreign exchange rate exposure. A certain overseas subsidiary uses foreign currency long-term-debt to hedge foreign exchange rate exposure from unrecognized firm commitments.

(c) Hedges of net investment in foreign operations

The Company uses foreign exchange contracts and borrowings and bonds denominated in the subsidiaries' local currencies to hedge the foreign currency exposure of the net investment in overseas subsidiaries.

(d) Trading derivatives or derivatives not designated as hedging instruments

The Company and the subsidiaries engage in trading activities with various future contracts. Therefore, the Company and the subsidiaries are at various risks such as share price fluctuation risk, interest rate risk and foreign currency exchange risk. The Company and the subsidiaries check that these risks are below a certain level by using internal indicators and determine whether such contracts should be continued or not. The Company and the subsidiaries entered into interest rate swap agreements, foreign currency swap agreements and foreign exchange contracts for risk management purposes which are not qualified for hedge accounting under ASC 815 (Derivatives and Hedging).

ASC 815-10-50 (Derivatives and Hedging - Disclosures) requires companies to disclose the fair value of derivative instruments and their gains (losses) in tabular format, as well as information about credit-risk-related contingent features in derivative agreements.

Table of Contents

The effect of derivative instruments on the consolidated statement of income, pre-tax, for the nine months ended December 31, 2010 is as follows.

(1) Cash flow hedges

	Gains (losses) recognized in other comprehensive income on derivative (effective portion)	Gains (losses) reclassified from accumulated other comprehensive income (loss) into income (effective portion)	Gains (losses) recognized in income on derivative (ineffective portion and amount excluded from effectiveness testing)

Certain of the Company's derivative instruments contain provisions that require the Company to maintain an investment grade credit rating from each of the major credit rating agencies.

If the Company's credit rating were to fall below investment grade, it would be in violation of these provisions, and the counterparties to the derivative instruments could request immediate payment on derivative instruments that are in net liability positions.

Edgar Filing: ORIX CORP - Form 6-K

There are no derivative instruments with credit-risk-related contingent features that are in a liability position as of December 31, 2011.

Table of Contents

ASC 815-10-50 (Derivatives and Hedging Disclosures) requires sellers of credit derivatives to disclose additional information about credit-risk-related potential payment risk.

The Company and its subsidiaries have contracted credit derivatives for the purpose of trading. Details of credit derivatives written are as follows as of March 31, 2011. There are no credit derivatives written as of December 31, 2011.

March 31, 2011

Types of derivatives	The events or circumstances that would require the seller to perform under the credit derivative	Maximum potential amount of future payment under the credit derivative		Approximate remaining term of the credit derivative	Fair value of the credit derivative	
		Millions of yen			Millions of yen	
Credit default swap	In case of credit event (bankruptcy, failure to pay, restructuring) occurring in underlying reference company *1	¥	7,000	Less than one year	¥	48
Total return swap	In case of underlying reference CMBS price falling beyond certain extent *2		28,606	Less than one year		(236)

*1 Underlying reference company's credit ratings are BBB+ or better rated by rating agencies as of March 31, 2011.

*2 Underlying reference CMBS is highest grade tranche and its credit rating is BBB or better rated by rating agencies as of March 31, 2011. Unless such highest grade tranche of CMBS incurs a loss, the Company and its subsidiaries will not suffer a loss.

Table of Contents**17. Estimated Fair Value of Financial Instruments**

The following information is provided to help readers gain an understanding of the relationship between amounts reported in the accompanying consolidated financial statements and the related market or fair value.

The disclosures include financial instruments and derivatives financial instruments, other than investment in direct financing leases, investment in subsidiaries and affiliates, pension obligations and insurance contracts.

Estimation of fair value

The following methods and significant assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate a value:

Cash and cash equivalents, restricted cash, time deposits and short-term debt The carrying amounts recognized in the balance sheets were determined to be reasonable estimates of their fair values due to their short maturity.

Installment loans The carrying amounts of floating-rate installment loans with no significant changes in credit risk and which could be repriced within a short-term period were determined to be reasonable estimates of their fair values. The carrying amounts of purchased loans were determined to be reasonable estimates of their fair values because the carrying amounts (net of allowance) are considered to properly reflect the recoverability and value of these loans. For certain homogeneous categories of medium- and long-term fixed-rate loans, such as housing loans, the estimated fair values were calculated by discounting the future cash flows using the current interest rates charged by the Company and its subsidiaries for new loans made to borrowers with similar credit ratings and remaining maturities. Concerning above, if available, estimated fair values were based on quoted market prices or quotations provided by dealers.

Investment in securities For trading securities and available-for-sale securities other than specified bonds issued by SPEs and certain other mortgage-backed and asset-backed securities, the estimated fair values, which are also the carrying amounts recorded in the balance sheets, were generally based on quoted market prices or quotations provided by dealers. As for the specified bonds issued by the SPEs and certain other mortgage-backed and asset-backed securities included in available-for-sale securities, the Company and its subsidiaries estimated the fair value by discounting future cash flows (see Note 3). For held-to-maturity securities, the estimated fair values were based on quoted market prices, if available. If a quoted market price was not available, estimated fair values were determined using quoted market prices for similar securities or the carrying amounts (where carrying amounts were believed to approximate the estimated fair values). For certain investment funds included in other securities, the fair values are estimated based on net asset value per share. With regard to other securities other than the investment funds described above, the Company and its subsidiaries have not estimated the fair value, as it is not practicable to do so. Those other securities mainly consist of non-marketable equity securities and preferred capital shares. Because there were no quoted market prices for such other securities and each security has a different nature and characteristics, reasonable estimates of fair values could not be made without incurring excessive costs.

Table of Contents

Deposits The carrying amounts of demand deposits recognized in the consolidated balance sheets were determined to be reasonable estimates of their fair values. The estimated fair values of time deposits were calculated by discounting the future cash flows. The current interest rates offered for the deposits with similar terms and remaining average maturities were used as the discount rates.

Long-term debt The carrying amounts of long-term debt with floating rates which could be repriced within short-term periods were determined to be reasonable estimates of their fair values. For medium-and long-term fixed-rate debt, the estimated fair values were calculated by discounting the future cash flows. The borrowing interest rates that were currently available to the Company and its subsidiaries offered by financial institutions for debt with similar terms and remaining average maturities were used as the discount rates. Concerning above, if available, estimated fair values were based on quoted market prices or quotations provided by dealers.

Derivatives For exchange-traded derivatives, fair value is based on quoted market prices. Fair value estimates for other derivatives generally reflect the estimated amounts that the Company and its subsidiaries would receive or pay to terminate the contracts at the reporting date, thereby taking into account the current unrealized gains or losses of open contracts. Discounted amounts of future cash flows using the current interest rate are used when estimating the fair values for most of the Company's and its subsidiaries' derivatives.

18. Commitments, Guarantees, and Contingent Liabilities

Commitments The Company and its subsidiaries have commitments for the purchase of equipment to be leased, having a cost of ¥11,423 million and ¥13,608 million as of March 31, 2011 and December 31, 2011, respectively.

The minimum future rentals on non-cancelable operating leases are as follows:

	December 31, 2011		December 31, 2011	
	Millions of yen			
	March 31, 2011		December 31, 2011	
Within one year	¥	3,587	¥	3,439
More than one year		26,302		24,048
Total	¥	29,889	¥	27,487

The Company and its subsidiaries lease office space under operating lease agreements, which are primarily cancelable, and made rental payments totaling ¥6,113 million and ¥5,684 million for the nine months ended December 31, 2010 and 2011, respectively, and ¥2,022 million and ¥1,845 million for the three months ended December 31, 2010 and 2011, respectively.

Certain computer systems of the Company and its subsidiaries have been operated and maintained under non-cancelable contracts with third-party service providers. For such services, the Company and its subsidiaries made payments totaling ¥643 million and ¥401 million for the nine months ended December 31, 2010 and 2011, respectively, and ¥115 million and ¥116 million for the three months ended December 31, 2010 and 2011, respectively. As of March 31, 2011 and December 31, 2011, the amounts due are as follows:

	December 31, 2011		December 31, 2011	
	Millions of yen			
	March 31, 2011		December 31, 2011	
Within one year	¥	382	¥	160
More than one year		60		268
Total	¥	442	¥	428

Edgar Filing: ORIX CORP - Form 6-K

The Company and its subsidiaries have commitments to fund estimated construction costs to complete ongoing real estate development projects and other commitments, amounting in total to ¥135,567 million and ¥93,831 million as of March 31, 2011 and December 31, 2011, respectively.

Table of Contents

The Company and its subsidiaries have agreements to commit to execute loans for customers, and to invest in funds, as long as the agreed-upon terms are met. The total unused credit and capital amount available is ¥77,694 million and ¥79,479 million as of March 31, 2011 and December 31, 2011, respectively.

Guarantees The Company and its subsidiaries apply ASC 460-10 (Guarantees), and at the inception of a guarantee, recognize a liability in the consolidated balance sheets for the fair value of the guarantee within the scope of ASC 460-10. The following table represents the summary of potential future payments, book value recorded as guarantee liabilities of the guarantee contracts outstanding and maturity of the longest guarantee contracts as of March 31, 2011 and December 31, 2011:

	March 31, 2011			December 31, 2011		
	Potential future payment	Book value of guarantee liabilities	Fiscal year Maturity of the longest contract	Potential future payment	Book value of guarantee liabilities	Fiscal year Maturity of the longest contract
Guarantees						
Corporate loans	¥ 284,851	¥ 1,958	2018	¥ 318,832	¥ 1,496	2026
Transferred loans	166,936	2,218	2043	154,784	3,800	2043
Housing loans	16,949	2,353	2051	15,198	2,228	2051
Other	294	4	2018	1,453	5	2018
Total	¥ 469,030	¥ 6,533		¥ 490,267	¥ 7,529	

Guarantee of corporate loans: The Company and certain subsidiaries mainly guarantee corporate loans issued by financial institutions for customers. The Company and its subsidiaries are obliged to pay the outstanding loans when the guaranteed customers fail to pay principal and/or interest in accordance with the contract terms. In some cases, the corporate loans are secured by the guaranteed customers' assets. Once the Company and its subsidiaries assume the guaranteed customers' obligation, the Company and its subsidiaries obtain a right to claim the collateral assets. In other cases, certain contracts that guarantee corporate loans issued by financial institutions for customers include contracts that the amounts of performance guarantee are limited to a range of guarantee commissions. As of March 31, 2011 and December 31, 2011, total notional amount of the loans subject to such guarantees are ¥1,265,000 million and ¥1,288,700 million respectively, and book value of guarantee liabilities which amount is included in the table above are ¥755 million and ¥684 million, respectively. The potential future payment amounts included in the table above for these guarantees as are limited to the agreed range of the guarantee commissions, which are less than the total notional amounts of the loans subject to these guarantees.

Payment or performance risk of the guarantees is considered based on the historical experience of credit events. There have been no significant changes in the payment or performance risk of the guarantees for the nine months ended December 31, 2011.

Guarantee of transferred loans: A subsidiary in the United States is authorized to underwrite, originate, fund, and service multi-family and seniors housing loans without prior approval from Fannie Mae under Fannie Mae's Delegated Underwriting and Servicing program. As part of this program, Fannie Mae provides a commitment to purchase the loans.

Table of Contents

In return for the delegated authority, the subsidiary guarantees the performance of certain housing loans transferred to Fannie Mae and has the payment or performance risk of the guarantees to absorb some of the losses when losses arise from the transferred loans.

There have been no significant changes in the payment or performance risk of these guarantees for the nine months ended December 31, 2011.

Guarantee of housing loans: The Company and certain subsidiaries guarantee the housing loans issued by Japanese financial institutions to third party individuals. The Company and its subsidiaries are typically obliged to pay the outstanding loans when these loans become delinquent more than three months. The housing loans are usually secured by the real properties. Once the Company and its subsidiaries assume the guaranteed parties' obligation, the Company and its subsidiaries obtain a right to claim the collateral assets.

Other guarantees: Other guarantees include the guarantees to financial institutions and the guarantees derived from collection agency agreements. Pursuant to the contracts of the guarantees to financial institutions, a subsidiary pays to the financial institutions when customers of the financial institutions become debtors and default on the debts. Pursuant to the agreements of the guarantees derived from collection agency agreements, the Company and certain subsidiaries collect third parties' debt and pay the uncovered amounts.

Litigation The Company and its subsidiaries are involved in legal proceedings and claims in the ordinary course of business. In the opinion of management, none of such proceedings and claims will have a significant impact on the Company's financial position or results of operations.

Collateral Other than the assets of the consolidated variable interest entities pledged as collateral for financing described in Note 7 (Variable Interest Entities), the Company and certain subsidiaries provide the following assets as collateral for the short-term and long-term debt payables to financial institutions as of March 31, 2011 and December 31, 2011:

	Millions of yen	
	March 31, 2011	December 31, 2011
Minimum lease payments, loans and investment in operating leases	¥ 97,148	¥ 93,669
Investment in securities	50,679	84,610
Other operating assets	8,537	8,949
Other assets	14,399	3,398
Total	¥ 170,763	¥ 190,626

As of March 31, 2011 and December 31, 2011, investment in securities of ¥58,607 million and ¥27,358 million, respectively, were primarily pledged for collateral deposits.

Under loan agreements, the Company and certain subsidiaries are required to provide collateral pledged for short-term and long-term debt from commercial banks and certain insurance companies at anytime if requested by the lenders. The Company did not receive any such requests from the lenders as of December 31, 2011.

19. Segment Information

Financial information about the operating segments reported below is information that is separately available and evaluated regularly by the management in deciding how to allocate resources and in assessing performance.

In line with a change of management classification, from September 1, 2011, the environment and energy related businesses, which were heretofore included in the Corporate Financial Services segment, have been included in the Investment Banking segment, and the Investment Banking segment has been renamed the Investment and Operation segment.

Due to these changes, the reclassified figures are shown for the nine and three months ended December 31, 2010, and as of March 31, 2011.

Table of Contents

An overview of operations for each of the six segments follows below.

Corporate Financial Services	:	Lending, leasing and commission business for the sale of financial products
Maintenance Leasing	:	Automobile leasing and rentals, car sharing, and precision measuring and IT-related equipment rentals and leasing
Real Estate	:	Development and rentals of commercial real estate and office buildings, condominium development and sales, hotel, golf course, and training facility operation, senior housing development and management, REIT asset management, real estate investment and advisory services, and real estate finance
Investment and Operation	:	Loan servicing (asset recovery), principal investment, M&A advisory, venture capital, securities brokerage and environment and energy-related business
Retail	:	Life insurance, banking business and card loan business
Overseas Business	:	Leasing, lending, investment in bonds, investment banking, real estate-related operations, and ship- and aircraft-related operations

Financial information of the segments for the nine months ended December 31, 2010 is as follows:

	Millions of yen						
	Corporate Financial Services	Maintenance Leasing	Real Estate	Investment and Operation	Retail	Overseas Business	Total
Segment revenues	¥ 59,896	¥ 169,512	¥ 142,769	¥ 66,012	¥ 109,538	¥ 128,655	¥ 676,382
Segment profits	8,314	20,831	3,508	11,349	21,067	31,037	96,106

Financial information of the segments for the nine months ended December 31, 2011 is as follows:

	Millions of yen						
	Corporate Financial Services	Maintenance Leasing	Real Estate	Investment and Operation	Retail	Overseas Business	Total
Segment revenues	¥ 53,523	¥ 175,455	¥ 148,511	¥ 56,679	¥ 116,969	¥ 133,286	¥ 684,423
Segment profits (losses)	14,749	27,117	(2,877)	17,810	15,321	39,308	111,428

Financial information of the segments for the three months ended December 31, 2010 is as follows:

	Millions of yen						
	Corporate Financial Services	Maintenance Leasing	Real Estate	Investment and Operation	Retail	Overseas Business	Total
Segment revenues	¥ 19,777	¥ 57,001	¥ 43,262	¥ 20,120	¥ 34,301	¥ 44,758	¥ 219,219
Segment profits	4,148	6,790	1,116	4,917	5,892	8,559	31,422

Financial information of the segments for the three months ended December 31, 2011 is as follows:

	Millions of yen						
	Corporate Financial Services	Maintenance Leasing	Real Estate	Investment and Operation	Retail	Overseas Business	Total
Segment revenues	¥ 17,463	¥ 57,909	¥ 52,605	¥ 16,513	¥ 37,140	¥ 41,978	¥ 223,608
Segment profits (losses)	6,193	8,805	(6,331)	2,879	8,466	10,239	30,251

Table of Contents

Segment assets information as of March 31, 2011 and December 31, 2011 is as follows:

	Millions of yen						
	Corporate Financial Services	Maintenance Leasing	Real Estate	Investment and Operation	Retail	Overseas Business	Total
March 31, 2011	¥ 968,327	¥ 502,738	¥ 1,539,814	¥ 506,011	¥ 1,653,704	¥ 972,224	¥ 6,142,818
December 31, 2011	860,482	521,486	1,405,440	499,447	1,701,641	933,932	5,922,428

Segment figures reported in these tables include operations classified as discontinued operations in the accompanying consolidated statements of income.

The accounting policies of the segments are almost the same as those described in Note 2 Significant Accounting and Reporting Policies except for the treatment of income tax expenses, net income attributable to the noncontrolling interests, net income attributable to the redeemable noncontrolling interests, discontinued operations and the consolidation of certain variable interest entities (VIEs). Most of selling, general and administrative expenses, including compensation costs that are directly related to the revenue generating activities of each segment, have been accumulated by and charged to each segment. Since the Company and its subsidiaries evaluate performance for the segments based on profit or loss before income taxes, tax expenses are not included in segment profits or losses. Net income attributable to the noncontrolling interests, net income attributable to the redeemable noncontrolling interests and discontinued operations, which are recognized net of tax, are adjusted to profit or loss before income tax. Gains and losses that management does not consider for evaluating the performance of the segments, such as write-downs of certain securities and certain foreign exchange gains or losses are excluded from the segment profits or losses and are regarded as corporate items.

Assets attributed to each segment are investment in direct financing leases, installment loans, investment in operating leases, investment in securities, other operating assets, inventories, advances for investment in operating leases (included in other assets) and investment in affiliates. This has resulted in the depreciation of office facilities being included in each segment's profit or loss while the carrying amounts of corresponding assets are not allocated to each segment's assets. However, the effect resulting from this allocation is not significant.

For those VIEs that are used for securitization and are consolidated in accordance with ASC 810-10 (Consolidations), for which the VIE's assets can be used only to settle related obligations of those VIEs and the creditors (or beneficial interest holders) do not have recourse to other assets of the Company or its subsidiaries, segment assets are measured based on the amount of the Company and its subsidiaries' net investments in the VIEs, which is different from the amount of total assets of the VIEs, and accordingly, segment revenues are also measured at a net amount representing the revenues earned on the net investments in the VIEs.

Certain gains or losses related to assets and liabilities of consolidated VIEs, which are not ultimately attributable to the Company and its subsidiaries, are excluded from segment profits.

The reconciliation of segment totals to consolidated financial statement amounts is as follows.

	Millions of yen	
	Nine months ended December 31, 2010	Nine months ended December 31, 2011
Segment revenues:		
Total revenues for segments	¥ 676,382	¥ 684,423

ASC 280-10 (Segment Reporting) requires disclosure of revenues from external customers for each product and service as enterprise-wide information. The consolidated statements of income in which the revenues are categorized based on the nature of types of business conducted include the required information.

No single customer accounted for 10% or more of the total revenues for the three months and nine months ended December 31, 2010 and 2011.

20. Subsequent Event

There are no applicable subsequent events.
