#### Assurant, Inc.

**Notes to Consolidated Financial Statements (unaudited)** 

Three and Six Months Ended June 30, 2012 and 2011

(In thousands, except number of shares and per share amounts)

#### 1. Nature of Operations

Assurant, Inc. (the Company ) is a holding company whose subsidiaries provide specialized insurance products and related services in North America and select worldwide markets.

The Company is traded on the New York Stock Exchange under the symbol AIZ.

Through its operating subsidiaries, the Company provides debt protection administration, credit-related insurance, warranties and service contracts, pre-funded funeral insurance, lender-placed homeowners insurance, manufactured housing homeowners insurance, individual health and small employer group health insurance, group dental insurance, group disability insurance, and group life insurance.

#### 2. Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ( GAAP ) for interim financial information. Accordingly, these statements do not include all of the information and footnotes required by GAAP for complete financial statements.

On January 1, 2012, the Company adopted the amendments to existing guidance on accounting for costs associated with acquiring or renewing insurance contracts. This guidance was adopted retrospectively and has been applied to all prior period financial information contained in these consolidated financial statements.

The interim financial data as of June 30, 2012 and for the three and six months ended June 30, 2012 and 2011 is unaudited; in the opinion of management, the interim data includes all adjustments, consisting only of normal recurring adjustments, necessary to a fair statement of the results for the interim periods. The unaudited interim consolidated financial statements include the accounts of the Company and all of its wholly owned subsidiaries. All inter-company transactions and balances are eliminated in consolidation. Certain prior period amounts have been reclassified to conform to the 2012 presentation.

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010, and the rules and regulations thereunder (together, the Affordable Care Act ) was signed into law in March 2010. One provision of the Affordable Care Act, effective January 1, 2011, established a minimum medical loss ratio (MLR) designed to ensure that a minimum level of benefits are paid to health insurance policyholders. The Affordable Care Act established an MLR of 80% for individual and small group business and 85% for large group business. If the actual loss ratios, calculated in a manner prescribed by the Department of Health and Human Services (HHS), are less than the required MLR, rebates are payable to the policyholders by August 1 of the subsequent year.

Operating results for the three and six months ended June 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012. The accompanying unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in the Company s Annual Report on Form 10-K for the year ended December 31, 2011.

#### 3. Recent Accounting Pronouncements

Recent Accounting Pronouncements Adopted

On January 1, 2012, the Company adopted the guidance on fair value measurement. This amended guidance changes certain fair value measurement principles and expands required disclosures to include quantitative and qualitative information about unobservable inputs in Level 3 measurements to achieve common fair value measurement and disclosure requirements in GAAP and International Financial Reporting Standards (IFRS). The adoption of this guidance did not have an impact on the Company s financial position or results of operations.

#### Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2012 and 2011

(In thousands, except number of shares and per share amounts)

On January 1, 2012, the Company adopted the amendments to existing guidance on accounting for costs associated with acquiring or renewing insurance contracts. The amendments modified the definition of the types of costs incurred by insurance entities that can be capitalized in the acquisition of new and renewal contracts. Under this amended guidance, only direct incremental costs associated with successful insurance contract acquisitions or renewals are deferrable. This guidance was adopted retrospectively and has been applied to all prior period financial information contained in these consolidated financial statements. As of January 1, 2011, the beginning of the earliest period presented, the cumulative effect adjustment recorded to reflect this guidance resulted in a decrease of \$148,811 in retained earnings, an increase of \$1,411 in accumulated other comprehensive income and a decrease of \$147,400 in total stockholders equity.

The effect of adoption of this new guidance on the December 31, 2011 consolidated balance sheet was as follows:

	As Previously Reported	Effect of Change	As Currently Reported
Deferred acquisition costs	\$ 2,632,720	\$ (139,863)	\$ 2,492,857
Deferred income taxes, net	0	44,280	44,280
Total assets	27,115,445	(95,583)	27,019,862
Future policy benefits and expenses	8,269,343	89,863	8,359,206
Deferred income taxes, net	32,460	(32,460)	0
Total liabilities	22,088,509	57,403	22,145,912
Retained earnings	3,742,479	(155,695)	3,586,784
Accumulated other comprehensive income	554,867	2,709	557,576
Total stockholders equity	5,026,936	(152,986)	4,873,950
Total liabilities and stockholders equity	27,115,445	(95,583)	27,019,862

The effect of adoption of this new guidance on the consolidated statement of operations for the three months ended June 30, 2011 was as follows:

	As Previously Reported	Effect of Change	As Currently Reported
Policyholder benefits	\$ 988,197	\$ (1,353)	\$ 986,844

Recent Accounting Pronouncements Not Yet Adopted

In July 2011, the Financial Accounting Standards Board (FASB) issued amendments to the other expenses guidance to address how health insurers should recognize and classify in their income statements fees mandated by the Affordable Care Act. The Affordable Care Act imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The amendments specify that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense ratably over the calendar year during which it is payable. The guidance is effective for calendar years beginning after December 31, 2013, when the fee initially becomes effective. Therefore, the Company is required to adopt this guidance on January 1, 2014. The Company is currently evaluating the requirements of the amendments and the potential impact on the Company is financial position and results of operations.

Three and Six Months Ended June 30, 2012 and 2011

(In thousands, except number of shares and per share amounts)

portfolio as of June 30, 2012 and December 31, 2011. At June 30, 2012 and December 31, 2011, the securities include general obligation and revenue bonds issued by states, cities, counties, school districts and similar issuers, including \$165,115 and \$164,347, respectively, of advance refunded or escrowed-to-maturity bonds (collectively referred to as pre-refunded bonds), which are bonds for which an irrevocable trust has been established to fund the remaining payments of principal and interest. As of June 30, 2012 and December 31, 2011, revenue bonds account for 52% and 51% of the holdings, respectively. Excluding pre-refunded bonds, sales tax, highway, water, fuel sales, transit and miscellaneous (which includes bond banks, finance authorities and appropriations) provide for 80% of the revenue sources, as of June 30, 2012 and December 31, 2011.

The Company s investments in foreign government fixed maturity securities are held mainly in countries and currencies where the Company has policyholder liabilities, which allow the assets and liabilities to be more appropriately matched. At June 30, 2012 and December 31, 2011, approximately 65%, 14%, 7% and 63%, 13%, 7% of the foreign government securities were held in the Canadian government/provincials and the governments of Brazil and Germany, respectively. No other country represented more than 4% and 5% of our foreign government securities as of June 30, 2012 and December 31, 2011, respectively.

The Company has European investment exposure in its corporate fixed maturity and equity securities of \$914,889 with an unrealized gain of \$78,859 at June 30, 2012 and \$868,012 with an unrealized gain of \$61,387 at December 31, 2011. Approximately 29% and 31% of the corporate European exposure is held in the financial industry at June 30, 2012 and December 31, 2011, respectively. No European country represented more than 5% of the fair value of our corporate securities as of June 30, 2012 and December 31, 2011. Approximately 5% of the fair value of the corporate European securities are pound and euro-denominated and are not hedged to U.S. dollars, but held to support those foreign-denominated liabilities. Our international investments are managed as part of our overall portfolio with the same approach to risk management and focus on diversification.

The cost or amortized cost and fair value of fixed maturity securities at June 30, 2012 by contractual maturity are shown below. Expected maturities may differ from contractual maturities because issuers of the securities may have the right to call or prepay obligations with or without call or prepayment penalties.

#### Other-Than-Temporary Impairments

The Company follows the OTTI guidance which requires entities to separate an OTTI of a debt security into two components when there are credit related losses associated with the impaired debt security for which the Company asserts that it does not have the intent to sell, and it is more likely than not that it will not be required to sell before recovery of its cost basis. Under the OTTI guidance, the amount of the OTTI related to a credit loss is recognized in earnings, and the amount of the OTTI related to other, non-credit, factors ( e.g., interest rates, market conditions, etc.) is recorded as a component of other comprehensive income. In instances where no credit loss exists but the Company intends to sell the security or it is more likely than not that the Company will have to sell the debt security prior to the anticipated recovery, the decline in market value below amortized cost is recognized as an OTTI in earnings. In periods after the recognition of an OTTI on debt securities, the Company accounts for such securities as if they had been purchased on the measurement date of the OTTI at an amortized cost basis equal to the previous amortized cost basis less the OTTI recognized in earnings. For debt securities for which OTTI was recognized in earnings, the difference between the new amortized cost basis and the cash flows expected to be collected will be accreted or amortized into net investment income.

For the six months ended June 30, 2012, the Company recorded \$1,936, of OTTI, of which \$1,839 was related to credit losses and recorded as net OTTI losses recognized in earnings, with the remaining \$97 related to all other factors and recorded as an unrealized loss component of AOCI. For the three months ended June 30, 2012 the Company did not incur any OTTI. For the three and six months ended June 30, 2011, the Company recorded \$1,191 and \$3,145, respectively, of OTTI, of which \$1,456 and \$3,035 was related to credit losses and recorded as net OTTI losses recognized in earnings, with the remaining \$(265) and \$110, respectively, related to all other factors and recorded as an unrealized (gain)

loss component of AOCI.

Balance, June 30,	\$ 98,588	\$ 105,634

We regularly monitor our investment portfolio to ensure investments that may be other-than-temporarily impaired are identified in a timely fashion, properly valued, and charged against earnings in the proper period. The determination that a security has incurred an other-than-temporary decline in value requires the judgment of management. Assessment factors include, but are not limited to, the length of time and the extent to which the market value has been less than cost, the financial condition and rating of the issuer, whether any collateral is held, the intent and ability of the Company to retain the investment for a period of time sufficient to allow for recovery for equity securities and the intent to sell or whether it is more likely than not that the Company will be required to sell for fixed maturity securities. Inherently, there are risks and uncertainties involved in making these judgments. Changes in circumstances and critical assumptions such as a continued weak economy, a more pronounced economic downturn or unforeseen events which affect one or more companies, industry sectors, or countries could

result in additional impairments in future periods for other-than-temporary declines in value. Any equity security whose price decline is deemed other-than-temporary is written down to its then current market value with the amount of the impairment reported as a realized loss in that period. The impairment of a fixed maturity security that the Company has the intent to sell or that it is more likely than not that the Company will be required to sell is deemed other-than-temporary and is written down to its market value at the balance sheet date with the amount of the impairment reported as a realized loss in that period. For all other-than-temporarily impaired fixed maturity securities that do not meet either of these two criteria, the Company is required to analyze its ability to recover the amortized cost of the security by calculating the net present value of projected future cash flows. For these other-than-temporarily impaired fixed maturity securities, the net amount recognized in earnings is equal to the difference between the amortized cost of the fixed maturity security and its net present value.

#### Assurant, Inc.

**Notes to Consolidated Financial Statements (unaudited)** 

Three and Six Months Ended June 30, 2012 and 2011

(In thousands, except number of shares and per share amounts)

The Company considers different factors to determine the amount of projected future cash flows and discounting methods for corporate debt and residential and commercial mortgage-backed or asset-backed securities. For corporate debt securities, the split between the credit and non-credit losses is driven principally by assumptions regarding the amount and timing of projected future cash flows. The net present value is calculated by discounting the Company s best estimate of projected future cash flows at the effective interest rate implicit in the security at the date of acquisition. For residential and commercial mortgage-backed and asset-backed securities, cash flow estimates, including prepayment assumptions, are based on data from widely accepted third-party data sources or internal estimates. In addition to prepayment assumptions, cash flow estimates vary based on assumptions regarding the underlying collateral including default rates, recoveries and changes in value. The net present value is calculated by discounting the Company s best estimate of projected future cash flows at the effective interest rate implicit in the fixed maturity security prior to impairment at the balance sheet date. The discounted cash flows become the new amortized cost basis of the fixed maturity security.

In periods subsequent to the recognition of an OTTI, the Company generally accretes the discount (or amortizes the reduced premium) into net investment income, up to the non-discounted amount of projected future cash flows, resulting from the reduction in cost basis, based upon the amount and timing of the expected future cash flows over the estimated period of cash flows.

The investment category and duration of the Company s gross unrealized losses on fixed maturity securities and equity securities at June 30, 2012 and December 31, 2011 were as follows:

	June 30, 2012 Less than 12 Months 12 Months or More						Total

Total gross unrealized losses represent less than 6% and 8% of the aggregate fair value of the related securities at June 30, 2012 and December 31, 2011, respectively. Approximately 32% and 44% of these gross unrealized losses have been in a continuous loss position for less than twelve months at June 30, 2012 and December 31, 2011, respectively. The total gross unrealized losses are comprised of 217 and 389 individual securities at June 30, 2012 and December 31, 2011, respectively. In accordance with its policy described above, the Company concluded that for these securities an adjustment to its results of operations for other-than-temporary impairments of the gross unrealized losses was not warranted at June 30, 2012 and December 31, 2011. These conclusions are based on a detailed analysis of the underlying credit and expected cash flows of each security. As of June 30, 2012, the gross unrealized losses that have been in a continuous loss position for twelve months or more were concentrated in the Company s corporate fixed maturity securities and in non-redeemable preferred stocks. Within the Company s corporate fixed maturity securities, the majority of the loss position relates to securities in the financial industry sector. For these concentrations, gross unrealized losses of twelve months or more were \$9,193, or 65%, of the total. The non-redeemable preferred stocks are perpetual preferred securities that have characteristics of both debt and equity securities. To evaluate these securities, we apply an impairment model similar to that used for our fixed maturity securities. As of June 30, 2012, the Company did not intend to sell these securities and it was not more likely than not that the Company would be required to sell them and no underlying cash flow issues were noted. Therefore, we did not recognize an OTTI on those perpetual preferred securities that had been in a continuous unrealized loss position for twelve months or more. As of June 30, 2012, the Company did not intend to sell the fixed maturity securities and it was not more likely than not that the Company would be required to sell the securities before the anticipated recovery of their amortized cost basis. The gross unrealized losses are primarily attributable to widening credit spreads associated with an underlying shift in overall credit risk premium.

The Company has made commercial mortgage loans, collateralized by the underlying real estate, on properties located throughout the U.S. and Canada. At June 30, 2012, approximately 39% of the outstanding principal balance of commercial mortgage loans was concentrated in the states of California, New York, and Utah. Although the Company has a diversified loan portfolio, an economic downturn could have an adverse impact on the ability of its debtors to repay their loans. The outstanding balance of commercial mortgage loans range in size from \$45 to \$16,114 at June 30, 2012 and from \$36 to \$16,285 at December 31, 2011.

Credit quality indicators for commercial mortgage loans are loan-to-value and debt-service coverage ratios. Loan-to-value and debt-service coverage ratios are measures commonly used to assess the credit quality of commercial mortgage loans. The loan-to-value ratio compares the principal amount of the loan to the fair value of the underlying property collateralizing the loan, and is commonly expressed as a percentage. The debt-service coverage ratio compares a property s net operating income to its debt-service payments and is commonly expressed as a ratio. The loan-to-value and debt-service coverage ratios are generally updated annually in the third quarter.

#### Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2012 and 2011

(In thousands, except number of shares and per share amounts)

The following summarizes our loan-to value and average debt-service coverage ratios as of the dates indicated:

		June 30, 2012 % of Gross	
	Carrying	Mortgage	Debt-Service
Loan-to-Value	Value	Loans	Coverage ratio
70% and less	\$ 1,056,652	80.5%	2.05
71 80%	165,201	12.6%	1.39
81 95%	55,422	4.2%	1.20
Greater than 95%	35,659	2.7%	0.78
Gross commercial mortgage loans	1,312,934	100.0%	1.89
Less valuation allowance	(10,325)		
Net commercial mortgage loans	\$ 1,302,609		

Loan-to-Value	Carrying Value	December 31, 2011 % of Gross Mortgage Loans	Debt-Service Coverage ratio
70% and less	\$ 1,018,927	77.1%	2.09
71 80%	188,816	14.3%	1.37
81 95%	74,657	5.7%	1.16
Greater than 95%	37,697	2.9%	0.76
Gross commercial mortgage loans	1,320,097	100.0%	1.90
Less valuation allowance	(10,410)		
Net commercial mortgage loans	\$ 1,309,687		

All commercial mortgage loans that are individually impaired have an established mortgage loan valuation allowance for losses. Changing economic conditions affect our valuation of commercial mortgage loans. Changing vacancies and rents are incorporated into the discounted cash flow analysis that we perform for monitored loans and may contribute to the establishment of (or an increase or decrease in) a commercial mortgage loan valuation allowance for losses. In addition, we continue to monitor the entire commercial mortgage loan portfolio to identify risk. Areas of emphasis are properties that have exposure to earthquakes, have deteriorating credits or have experienced a reduction in debt-service coverage ratio. Where warranted, we have established or increased a valuation allowance based upon this analysis.

#### Collateralized Transactions

The Company engages in transactions in which fixed maturity securities, especially bonds issued by the U.S. government, government agencies and authorities, and U.S. corporations, are loaned to selected broker/dealers. Collateral, greater than or equal to 102% of the fair value of the securities lent, plus accrued interest, is received in the form of cash and cash equivalents held by a custodian bank for the benefit of the Company. The use of cash collateral received is unrestricted. The Company reinvests the cash collateral received, generally in investments of high credit quality that are designated as available-for-sale. The Company monitors the fair value of securities loaned and the collateral received, with additional collateral obtained, as necessary. The Company is subject to the risk of loss to the extent there is a loss on the re-investment of cash collateral.

As of June 30, 2012 and December 31, 2011, our collateral held under securities lending, of which its use is unrestricted, was \$94,608 and \$95,221, respectively, and is included in the consolidated balance sheets under the collateral held/pledged under securities agreements. Our liability to the borrower for collateral received was \$94,615 and \$95,494, respectively, and is included in the consolidated balance sheets under the obligation under securities agreements. The difference between the collateral held and obligations under securities lending is recorded as an unrealized loss and is included as part of AOCI. All securities with unrealized losses have been in a continuous loss position for twelve months or longer as of June 30, 2012 and December 31, 2011. The Company includes the available-for-sale investments purchased with the cash collateral in its evaluation of other-than-temporary impairments.

**Notes to Consolidated Financial Statements (unaudited)** 

Three and Six Months Ended June 30, 2012 and 2011

(In thousands, except number of shares and per share amounts)

Cash proceeds that the Company receives as collateral for the securities it lends and subsequent repayment of the cash are regarded by the Company as cash flows from financing activities, since the cash received is considered a borrowing. Since the Company reinvests the cash collateral generally in investments that are designated as available-for-sale, the reinvestment is presented as cash flows from investing activities.

#### 5. Fair Value Disclosures

Fair Values, Inputs and Valuation Techniques for Financial Assets and Liabilities Disclosures

The fair value measurements and disclosures guidance defines fair value and establishes a framework for measuring fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In accordance with this guidance, the Company has categorized its recurring basis financial assets and liabilities into a three-level fair value hierarchy based on the priority of the inputs to the valuation technique.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company s assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

The levels of the fair value hierarchy are described below:

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access.

Level 2 inputs utilize other than quoted prices included in Level 1 that are observable for the asset, either directly or indirectly, for substantially the full term of the asset. Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active and inputs other than quoted prices that are observable in the marketplace for the asset. The observable inputs are used in valuation models to calculate the fair value for the asset.

Level 3 inputs are unobservable but are significant to the fair value measurement for the asset, and include situations where there is little, if any, market activity for the asset. These inputs reflect management s own assumptions about the assumptions a market participant would use in pricing the asset.

A review of fair value hierarchy classifications is conducted on a quarterly basis. Changes in the observability of valuation inputs may result in a reclassification of levels for certain securities within the fair value hierarchy.

The following tables present the Company s fair value hierarchy for assets and liabilities measured at fair value on a recurring basis as of June 30, 2012 and December 31, 2011. The amounts presented below for Collateral held/pledged under securities agreements, Other investments, Cash equivalents, Other assets, Assets and Liabilities held in separate accounts and Other liabilities differ from the amounts presented in the consolidated balance sheets because only certain investments or certain assets and liabilities within these line items are

measured at estimated fair value. Other investments are comprised of investments in the Assurant Investment Plan, American Security Insurance Company Investment Plan, Assurant Deferred Compensation Plan, a modified coinsurance arrangement and other derivatives. Other liabilities are comprised of investments in the Assurant Investment Plan and other derivatives. The fair value amount and the majority of the associated levels presented for Other investments and Assets held in separate accounts are received directly from third parties.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2012 and 2011

(In thousands, except number of shares and per share amounts)

There were no transfers between Level 2 and Level 3 financial assets during the period. However, there were transfers between Level 2 and Level 3 financial assets during the period, which are reflected in the Transfers in and Transfers out columns below. Transfers between Level 2 and Level 3 most commonly occur when market observable inputs that were previously available become unavailable in the current period. The remaining unpriced securities are submitted to independent brokers who provide non-binding broker quotes or are priced by other qualified sources.

The following tables summarize the change in balance sheet carrying value associated with Level 3 financial assets and liabilities carried at fair value during the three and six months ended June 30, 2012 and 2011:

	Balance, beginning of period	Total (losses) gains (realized/ unrealized) included in earnings	Three Montl Net unrealized gains (losses) included in stockholders equity	ns Ended Jun Sales	Transfers in (1)	Transfers out (1)	Balance, end of period
