Item 2.05 Costs Associated with Exit or Disposal Activities.

On January 4, 2018, iCAD, Inc. (the Company) adopted a plan (the Plan) to discontinue offering radiation therapy professional services to practices that provide the Company's electronic brachytherapy solution for the treatment of non-melanoma skin cancer under the subscription service model within its Cancer Therapy Segment. As a result, the Company will no longer offer the subscription service model to customers. The Company estimates that less than 20% of the electronic brachytherapy skin cancer treatments delivered in 2017 were completed by subscription customers and that revenue associated with these customers totaled approximately \$2.0 million dollars in 2017. The Company will continue to offer its capital sales model for both skin cancer treatment and IORT, which provides a brachytherapy system and related source and service agreements. The discontinuance of the subscription service model is expected to reduce radiation therapy professional services delivery costs, decrease cash burn, and re-focus the Company on the higher margin capital product and service offerings.

As a result of the Plan, the Company expects to reduce headcount across the skin subscription business by approximately 21 employees or 18% of the workforce. In addition, the Company currently expects to incur a charge of approximately \$200,000 related to employee severance costs, which will be accrued as a pre-tax charge in the first quarter of 2018. The Company expects to substantially complete the implementation of the Plan, including payment of the accrued severance charges in cash, by February 28, 2018.
