National Municipal Opportunities Trust (EOT)

Annual Report

March 31, 2018

**Commodity Futures Trading Commission Registration.** Effective December 31, 2012, the Commodity Futures Trading Commission ( CFTC ) adopted certain regulatory changes that subject registered investment companies and advisers to regulation by the CFTC if a fund invests more than a prescribed level of its assets in certain CFTC-regulated instruments (including futures, certain options and swap agreements) or markets itself as providing investment exposure to such instruments. The Fund has claimed an exclusion from the definition of the term commodity pool operator under the Commodity Exchange Act. Accordingly, neither the Fund nor the adviser with respect to the operation of the Fund is subject to CFTC regulation. Because of its management of other strategies, the Fund s adviser is registered with the CFTC as a commodity pool operator and a commodity trading advisor.

**Fund shares are not insured by the FDIC and are not deposits or other obligations of, or guaranteed by, any depository institution. Shares are subject to investment risks, including possible loss of principal invested.**

#### Management's Discussion of Fund Performance

##### Economic and Market Conditions

The 12-month period that began on April 1, 2017 was characterized by a significant flattening of the municipal bond yield curve. Long-term interest rates drifted downward from April through October 2017 despite Federal Reserve Board (the Fed) rate hikes in March and June 2017 that put upward pressure on short-term rates. Mixed U.S. economic data, including anemic inflation, put downward pressure on long-term rates that increased as the period wore on.

In November and December 2017, however, the municipal market experienced considerable volatility after the GOP-controlled House and Senate released and then passed new tax legislation. The most significant change to the municipals market was the elimination of an issuer's ability to refinance debt prior to its call date through the issuance of advanced refunding bonds which accounted for just under 20% of new issuance over the past 10 years. As a result, December 2017 witnessed the largest-ever one-month issuance of new municipal debt, as issuers rushed to beat the December 31, 2017 deadline for issuing advanced refunding bonds. Investors sold short maturity bonds to buy new-issue longer maturity bonds in anticipation of significantly lower supply going forward. The net result was rising prices on longer-term debt that drove more dramatic flattening of the yield curve in December 2017.

As the new year began, bond prices reversed direction. In January 2018, signs of increasing inflation, higher wage growth, and fears that the new tax legislation might overheat the economy pushed interest rates up and caused longer-term bond prices to decline. Rates rose in February despite a spike in stock market volatility, as incoming Fed chairman Jerome Powell, testifying before U.S. congressional representatives, suggested the strength of the U.S. economy might warrant four interest rate hikes in 2018 one more than previously projected. Upward pressure on rates continued in March as the Fed announced its first rate hike of the year. But in the closing days of the period, fears of a global trade war sparked by new tariffs proposed by the Trump administration initiated a flight to quality that pushed long-term bond prices up and rates downward.

For the 12-month period ended March 31, 2018, the Bloomberg Barclays Municipal Bond Index,<sup>2</sup> a broad measure of the asset class, returned 2.66%. For the period as a whole, the municipal bond yield curve flattened significantly. Rates rose for AAA-rated<sup>7</sup> bonds with maturities of one-to-14 years and declined for issues with maturities of 15-to-30 years. On a price basis, longer maturities in general outperformed

shorter maturities, and lower-rated bonds generally outperformed higher-rated issues. Across the curve, municipal bonds outperformed comparable U.S. Treasuries.

##### Fund Performance

For the 12-month period ended March 31, 2018, Eaton Vance National Municipal Opportunities Trust (the Fund) shares at net asset value (NAV) had a total return of 3.59%, outperforming the 2.66% return of the Bloomberg Barclays Municipal Bond Index (the Index).

The Fund's investment objective is to provide current income exempt from federal income tax. While the Fund's investments were primarily investment grade (rated BBB and higher) as of the end of the fiscal year, the Fund may invest up to 30% of its assets in obligations rated below investment grade.

Management employs leverage through Residual Interest Bond (RIB) financing<sup>6</sup> to seek to enhance the Fund's tax-exempt income. The use of leverage has the effect of achieving additional exposure to the municipal market, magnifying the Fund's exposure to its underlying investments in both up and down markets. During this period of positive performance by municipal bonds, leverage helped Fund performance relative to the

## Edgar Filing: Eaton Vance National Municipal Opportunities Trust - Form N-CSR

unleveraged Index.

In addition to leverage, contributors to Fund performance versus the Index included security selection and an overweight, relative to the Index, in zero-coupon bonds, which were the best performing coupon structure in the Index during the period; security selection and an overweight in the health care sector, which was the best performing sector in the Index during the period; and security selection and an overweight in the industrial development revenue (IDR) sector. The Fund's allocation to below-investment-grade debt, which included some of its holdings in the health care and IDR sectors, helped Fund performance versus the Index during a period when lower-rated bonds in general outperformed higher-rated bonds.

In contrast, detractors from relative performance versus the Index included an overweight in prerefunded, or escrowed, bonds and security selection in state general obligation bonds.

*See Endnotes and Additional Disclosures in this report.*

*Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) or market price (as applicable) with all distributions reinvested and include management fees and other expenses. Fund performance at market price will differ from its results at NAV due to factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for Fund shares, or changes in Fund distributions. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance less than or equal to one year is cumulative. Performance is for the stated time period only; due to market volatility, current Fund performance may be lower or higher than the quoted return. For performance as of the most recent month-end, please refer to [eatonvance.com](http://eatonvance.com).*

#### Endnotes and Additional Disclosures

- <sup>1</sup> The views expressed in this report are those of the portfolio manager(s) and are current only through the date stated at the top of this page. These views are subject to change at any time based upon market or other conditions, and Eaton Vance and the Fund(s) disclaim any responsibility to update such views. These views may not be relied upon as investment advice and, because investment decisions are based on many factors, may not be relied upon as an indication of trading intent on behalf of any Eaton Vance fund. This commentary may contain statements that are not historical facts, referred to as forward looking statements. The Fund's actual future results may differ significantly from those stated in any forward looking statement, depending on factors such as changes in securities or financial markets or general economic conditions, the volume of sales and purchases of Fund shares, the continuation of investment advisory, administrative and service contracts, and other risks discussed from time to time in the Fund's filings with the Securities and Exchange Commission.
- <sup>2</sup> Bloomberg Barclays Municipal Bond Index is an unmanaged index of municipal bonds traded in the U.S. Bloomberg Barclays Long (22+) Year Municipal Bond Index is an unmanaged index of municipal bonds traded in the U.S. with maturities of 22 years or more. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index.
- <sup>3</sup> Performance results reflect the effects of leverage. Performance since inception for an index, if presented, is the performance since the Fund's or oldest share class inception, as applicable.
- <sup>4</sup> The shares of the Fund often trade at a discount or premium from their net asset value. The discount or premium of the Fund may vary over time and may be higher or lower than what is quoted in this report. For up-to-date premium/discount information, please refer to <http://eatonvance.com/closedend>.
- <sup>5</sup> The Distribution Rate is based on the Fund's last regular distribution per share in the period (annualized) divided by the Fund's NAV or market price at the end of the period. The Fund's distributions may be comprised of amounts characterized for federal income tax purposes as tax-exempt income, qualified and non-qualified ordinary dividends, capital gains and nondividend distributions, also known as return of capital. The Fund will determine the federal income tax character of distributions paid to a shareholder after the end of the calendar year. This is reported on the IRS form 1099-DIV and provided to the shareholder shortly after each year-end. For information about the tax character of distributions made in prior calendar years, please refer to Performance-Tax Character of Distributions on the Fund's webpage available at [eatonvance.com](http://eatonvance.com). The Fund's distributions are determined by the investment adviser based on its current assessment of the Fund's long-term return potential. Fund distributions may be affected by numerous factors including changes in Fund performance, the cost of financing for leverage, portfolio holdings, realized and projected returns, and other factors. As portfolio and market conditions change, the rate of distributions paid by the Fund could change. Taxable-equivalent performance is based on the highest combined federal and state income tax rates, where applicable. Lower tax rates would result in lower tax-equivalent performance. Actual tax rates will vary depending on your income, exemptions and deductions. Rates do not include local taxes.
- <sup>6</sup> Fund employs RIB financing. The leverage created by RIB investments provides an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of NAV). The cost of leverage rises and falls with changes in short-term interest rates. See Floating Rate Notes Issued in Conjunction with Securities Held in the notes to the financial statements for more information about RIB financing. RIB leverage represents the amount of Floating Rate Notes outstanding at period end as a percentage of Fund net assets plus Floating Rate Notes.
- <sup>7</sup> Ratings are based on Moody's, S&P or Fitch, as applicable. If securities are rated differently by the ratings agencies, the highest rating is applied. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by S&P or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. Holdings designated as Not Rated (if any) are not rated by the national ratings agencies stated above.
