Yes No

Rio de Janeiro, January 30, 2007.

CSN is a leading global steel producer with operations in Latin America, North America, and Europe. The Company is a fully integrated steel producer, the largest coated steel producer in Brazil, with current capacity of 5.6 million tons of crude steel, 5.1 million tons of rolled products and 2.9 million tons of coated steel capacity. Over 50% of CSN's production consists of high value added steel products. CSN is also the sole tin-plate producer in Brazil and the fifth largest producer of tin plate in the world.

CSN's process is based on the integrated steelworks concept that uses the Company's own sources of iron ore, limestone and dolomite. Besides its captive mines, CSN controls logistics assets - ports and railways - which enable an extremely cost efficient operation. This concept allows CSN to continuously capture important levels of synergies, thus assuring its position as one of the most cost competitive steel producers in the world.
