OPERATING PERFORMANCE

WIRELINTELEPHONY

Network

By the end of 4Q06, Brasil Telecom's plant had 10.4 million installed lines, of which 8.4 million were in service (Annex XV and XVI). The utilization rate reached 80.8%, a 0.9 p.p. increase as compared to the previous quarter. In comparison to 4Q05, the utilization rate decreased 7.8 p.p. due to the adoption by the Company as of 3Q06 of stricter measures in its collection and charging policy

398.2 thousand terminals which were blocked and were not generating revenue by the end of 3Q06 were the focus of the intensification of efforts in the collection and charging, mainly via call center and subcontracted collectors. During the 4Q06, the Company cancelled 119.2 thousand of those blocked terminals. By the end of this period, Brasil Telecom had 8,139.6 thousand active lines and 279.0 thousand blocked lines.

Fixed line ARPU reached R\$73.5 in 4Q06, a 2.8% increase in comparison to the previous quarter.

TRAFFIC

In 4Q06, Brasil Telecom reached 2.1 billion billed pulses, a 5.1% reduction in comparison to 3Q06 (Annex XIV). This performance was impacted by fewer business days during the quarter, by the increase in the ADSL accesses and by the migration of fixed calls to mobile calls.

Long distance traffic increased 1.6% in comparison to 3Q06, thus Brasil Telecom **registered 1.4 billion minutes in 4Q06** (Annex XIV). Such performance is explained by the increase in VC-2 and VC-3 minutes, due to a restructuring of its line of products and strategic partnership.

PS: The market shares hereby presented refer to Brasil Telecom's concession area (Region II of the PGO - General Concession Plan).

At the end of 4Q06, Brasil Telecom reached a 62.9% market share in the interregional segment and a 36.6% market share in the international segment (quarterly average). By the end of December, Brasil Telecom's quarterly average long distance market share reached 85.8% in the intra-regional segment, 0.4 p.p. superior than the 85.4% market share registered in 3Q06. In the interregional and international segments, Brasil Telecom increased its market share by 4.3 p.p. and 2.8 p.p., respectively, in 12 months. In the intra-sector segment, Brasil Telecom reached 90.7% market share.

MOBILE TELEPHONY

BrT Mobile reached 3,376.8 thousand mobile accesses in service (Annex XIX), a net addition of 325.8 thousand accesses in the quarter and 1,163.9 thousand accesses in 2006, surpassing by 76.8 thousand accesses the 3.3 million accesses target established for the end of 2006. At the end of 4Q06, BrT Mobile's subscriber base was 10.7% higher than 3Q06 and had a 52.6% increase against 4Q05.

BrT Mobile's market share in region II reached 12.1% by the end of 4Q06, 0.7 p.p. above 3Q06's and 3.4 p.p. above 4Q05's. BrT Mobile is in third place in terms of market share in area 7 of the General Concession Plan (GO, TO, AC and RO) and in the Federal District (Annex XX).

In 4Q06, BrT Mobile launched new plans and promotions and readjusted the Plans Empresa (Corporate) and Conta (Post-paid). The new plans offered by BrT Mobile seek to adjust to the new regulatory condition of the Full Bill. In the post-paid plan, the minutes included (*franquia*) is designated for intra-network calls only and the incoming calls from other operators are transformed in credits for the client to make extra-network calls in the following month. The new pre-paid plan increased the bonus limit that each client is entitled to receive, from R\$30 to R\$100, however these credits can only be used in intra-network calls. Readjustments were also made in the subscription and exceeding minute prices for other operators of the post-paid plans, the main generators of traffic for other mobile operators, in the Plans Empresa (Corporate) and Conta (Post-paid). Despite these readjustments, BrT Mobile's prices are still very competitive and lower than most of our peers.

Throughout 4Q06, BrT Mobile increased its coverage to 819 localities. Currently, its coverage reaches 87% of Region II's population.

At the end of December, BrT Mobile's subscriber base was composed of 993.8 thousand post-paid subscribers (29.4% of total subscribers).

In the fourth quarter, gross revenue from subscription fees totaled R\$881.4 million, a 1.1% increase in comparison to R\$871.6 million registered in 3Q06, explained by an average tariff readjustment of 8% in the alternative plans.

Gross revenues with VC-1 calls reached R\$490.5 million in 4Q06, 0.6% inferior than 3Q06. Despite a 1.0% increase in VC-1 traffic, the reduction in revenues is explained by the increase in volume of disputed calls in the period. **In comparison to 4Q05, gross revenues with VC-1 calls reduced 5.7%**, due to a 9.1% reduction in traffic.

Gross revenue with public telephony reached R\$138.4 million in 4Q06, a 2.1% increase in comparison to 3Q06 and 4.9% reduction in comparison with the revenue obtained in 4Q05. Gross revenue with public telephony reached R\$540.6 million, which represents a 8.8% increase in comparison to 2005.

The reduction in comparison to the previous quarter is due to the recovery of revenue related to the remuneration for network usage with another telephony operator in 3Q06, while the reduction in comparison to 4Q05 is explained by the interconnection tariff reduction which amounted to 19.1% in January 2006.

In 4Q06, gross revenue from data communications and other services reached R\$649.7 million, a 5.4% increase as compared to the previous quarter and a 17.5% increase in comparison to 4Q05. ADSL revenues amounted to R\$288.9 million, representing 44.5% of the total data communications revenues.

The consolidated gross revenue from mobile telephony in 4Q06 registered an increase of 22.3% and 82.1% in comparison to 3Q06 and 4Q05, respectively.

In comparison to 3Q06 and 4Q05, respectively, **gross revenues from services with mobile telephony in 4Q06 exceeded in 17.2% and 166.0%, respectively**, due to the increase in the subscriber base, the launch of new plans and services, the restructuring of the Pula-Pula plans and the Christmas sales. Gross revenues with sales of handsets and accessories were 46.7% greater than the revenues registered in 3Q06.

The blended mobile ARPU in the 4Q06 reached R\$37.0 (Annex XVII). The post-paid ARPU amounted to R\$50.9 and the pre-paid ARPU reached R\$30.9. In comparison to 3Q06, **the blended mobile ARPU increased 4.0%** due to the launch of new plans and the restructuring of the Pula-Pula plans.

Contract readjustment in technical operational services of the plant;

Increase of mailing expenses related to the Christmas Charging and Collection Campaign;

Issuance of new phone books and implementation of marketing folders.

In the 4Q06, interconnection costs amounted to R\$573.8 million, a 2.1% and 11.5% increase in comparison to 3Q06 and 4Q05, respectively. The increase in comparison to 3Q06 is explained by the increase in the mobile

operation while the increase in comparison to 4Q05 is related to the effects of the Full Bill, implemented in 3Q06.
