Deferred taxes have been recorded based on the assumption of their future realization, as follows:

- a) Tax loss carryforwards: will be offset up to a limit of 30% of taxable income in the coming years. Based on projections of future results, it is estimated that that the total tax loss carryforwards will be set off in up to four years.
- b) Merged tax credit: consists of the net balance of goodwill and reserve for maintaining the integrity of shareholders' equity (see Note 27) and is realized proportionally to the amortization of the goodwill of the subsidiaries, with terms of five years. Studies by external consultants used in the corporate restructuring process supported recovery of the amount within this term.

c) Temporary differences: will be realized upon the payments of accruals, the effective losses on bad debts and the realization of inventories.

At the end of the 2004 fiscal year, the Company prepared technical feasibility studies, approved by the Board of Directors, which indicate full recovery of the deferred taxes recognized, as determined by CVM Resolution No. 371. Management did not identify any change that could affect the conclusion of these studies as of June 30, 2005.

#### 25. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONSOLIDATED)

#### a) Risk considerations

Tele Sudeste is the Parent Company of the operators Telerj and Telest, which provide mobile telephone services in the States of Rio de Janeiro and Espírito Santo according to the terms of the licenses granted by the Federal Government. Both operators also exploit the business of purchasing and distributing handsets through their own channels and distribution network to stimulate their core businesses.

The major market risks to which Telerj and Telest are exposed in conducting business are:

<u>Credit risk</u>: derived from the possible difficulty in collecting amounts of telecommunications services provided to customers, and the sales of handsets by the distribution network, together with the risks related with investments and swap operations.

<u>Interest rate risk</u>: derived from the portion of the debt and liability positions in derivatives contracted at floating rates, and involves the risk of financial expenses rising due to an unfavorable movement in interest rates (principally Libor and CDI).

<u>Currency risk</u>: the possibility of the Company incurring losses on account of fluctuations in interest rates that increase the balances of foreign currency denominated loan and financing liabilities.

Telerj and Telest take a positive attitude towards the management of the various risks to which they are subject, by means of a wide-ranging set of operational initiatives, procedures and policies that enable the risks inherent in the businesses to be attenuated.

#### Credit risk

The credit risk from providing telecommunications services is minimized by a strict control of the customer base and active management of default by means of clear policies related with selling postpaid sets. As of June 30, 2005, the subsidiaries had 70.3% (70.4% as of March 31, 2005) of their customer base under the prepaid system, which requires prepaid loading and, therefore, does not represent any credit risk.

The credit risk on the sale of handsets is managed by means of a conservative credit policy, using modern management methods that involve applying credit scoring techniques, balance sheet analysis and consulting commercial databases, together with the automatic control of sales release integrated with the SAP ERP software distribution module.

The Company is also subject to credit risk derived from the temporary investment and amounts receivable from swap operations. The Company operates in such a way as to diversify this exposure among first rate financial institutions.

#### Interest rate risk

Telerj and Telest are exposed to the risk of domestic interest rates fluctuations, due to the fact that the liability part of the operations with derivatives (exchange hedge) is associated with the cost of CDI. However, the balance of temporary investments, also indexed to the CDI, neutralizes this effect.

Foreign currency-denominated loans are also exposed to risk of a rise in the floating exchange rates (Libor). As of June 30, 2005, the principal of these operations amounted to R\$8,874 (R\$10,067 as of March 31, 2005).

# Currency risk

Telerj and Telest utilize derivative instruments to protect against currency risk on foreign currency-denominated loans. The instruments normally used are swap contracts.

The following table summarizes the net exposure of Telerj and Telest to the exchange rate factor as of June 30, 2005:

	Stated in thousands		
	US\$	€	
Loans and financing	(17,355)	-	
Suppliers	(19,593)	(657)	
Derivative contracts	36,948	639	
Total	-	(18)	
b) Derivative contracts			

The subsidiaries record derivative gains and losses as a component of financial expenses or income.

Book and market values of loans and financing and derivative instruments are estimated as follows:

	Book value	Market value	Unrealized gain (loss)
Trade payables	(47,919)	(47,919)	-
Loans and financing	(40,790)	(41,089)	(299)
Derivative contracts	(9,231)	(9,146)	85
Total	( 97,940 )	(98,154)	(214)

c) Market value of financial instruments

The market value of the loans and financing, together with the swap contracts, was established based on the discounted cash flow method, using available projections of interest rates.

The market values are calculated at a specific time based on information available and in-house valuation methodologies, and, therefore, the estimates indicated do not necessarily represent market realization values. The use of different assumptions could significantly affect the estimates.

#### 26. POST-RETIREMENT BENEFIT PLANS

The subsidiaries, together with the other companies of the former Telebrás system and their successors, sponsor private pension and healthcare plans for retired employees, managed by Fundação Sistel de Seguridade Social - SISTEL, as follows:

- a) PBS-A defined-benefit multi-sponsor plan for participants that were previously assisted and had such status on January 31, 2000.
- b) PBS-Tele Sudeste Celular a defined-benefit plan that serves approximately 1% of the Company's employees.
- c) PAMA a multi-sponsor healthcare plan for retired employees and their dependents, on a shared cost basis.

The contributions to the PBS-Tele Sudeste Celular Plan are determined based on actuarial valuations prepared by independent actuaries, in accordance with the rules in force in Brazil . Cost is determined using the capitalization method and the contribution due by the sponsor is equivalent to 13.5% of the payroll of the employees participating in the Plan, of which 12% is destined to funding the PBS-Tele Sudeste Celular Plan and 1.5% to the PAMA Plan.

d) Visão Celular Benefits Plan - a individual defined contribution plan - the Visão Celular Benefit Plan was introduced by SISTEL in August 2000.

The subsidiaries' contributions to the Visão Celular Plan are equal to those of the participants, varying between 2% and 9% of the participation salary, according to the percentage chosen by the participant. In the six-month period ended June 30, 2005, the subsidiaries made contributions to the PBS-Tele Sudeste Celular Plan and the Visão Celular Plan amounting to R\$1,599 (R\$1,302 as of June 30, 2004).

Up to June 30, 2005, the subsidiaries recognized proportionally the actuarial cost foreseen for the year 2005, recording R\$276 in relation to these costs, in the other operating expenses account.

#### 27. CORPORATE RESTRUCTURING

On November 30, 2000, the corporate restructuring plan was concluded, whereby the goodwill paid in the privatization process of the Company was transferred to the subsidiaries.

The financial statements, maintained for the corporate and tax purposes of the Company and its subsidiaries, record specific accounts related with the goodwill and the related reserve merged and the respective amortization, reversal and tax credit, the balances of which are as follows:

	Balances on date	Consolidated	
	of merger	06.30.05	03.31.05
Balance sheet:			
Merged goodwill	1,393,279	77,164	146,829
Merged reserve	(928,437)	(50,928)	(96,907)
Balance	464,842	26,236	49,922
		06.30.05	06.30.04
Statement of income:			
Amortization of goodwill		139,328	139,328
Reversal of reserve		(91,956)	(91,956)
Tax credit		(47,372)	(47,372)
Effect on the result		-	-

As demonstrated, the goodwill amortization, net of the reversal of the reserve and corresponding tax credit, results in a null effect on income and, consequently, on the calculation base of the statutory minimum compulsory dividend. To ensure a better presentation of the Company's financial and equity situation in the financial statements, the net amount of R\$26,236, as of June 30, 2005 (R\$49,922 as of March 31, 2005), which essentially represents the tax credit merged, was classified in the balance sheet under current and noncurrent assets as deferred taxes (see Note 6).

The merged tax credit is being capitalized as it is effectively realized. In the first semester of 2005, the subsidiaries realized R\$24,592 of the tax benefit on account of the restructuring. The subsidiaries did not realize the entire tax benefit and recorded R\$89,281 and R\$32,281 as tax credit carryforwards on tax loss and negative social contribution base, respectively.
