RESOURCE CAPITAL CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2015
(unaudited)

NOTE 1 - ORGANIZATION AND BASIS OF PRESENTATION

Resource Capital Corp. and subsidiaries' (collectively the "Company") principal business activity is to purchase and manage a diversified portfolio of commercial real estate-related assets and commercial finance assets. The Company's investment activities are managed by Resource Capital Manager, Inc. ("Manager") pursuant to a management agreement (the "Management Agreement"). The Manager is a wholly-owned indirect subsidiary of Resource America, Inc. ("Resource America") (NASDAQ: REXI). In September 2013, it was determined that the Company is a variable interest entity ("VIE") and that Resource America is the primary beneficiary of the Company. Therefore, the Company's financial statements are consolidated into Resource America's financial statements. The following subsidiaries are consolidated in the Company's financial statements:

RCC Real Estate, Inc. ("RCC Real Estate") holds real estate investments, including commercial real estate loans, commercial real estate-related securities and investments in real estate. RCC Real Estate owns 100% of the equity of the following VIEs:

Resource Real Estate Funding CDO 2006-1, Ltd. ("RREF CDO 2006-1"), a Cayman Islands limited liability company and qualified real estate investment trust ("REIT") subsidiary ("QRS"). RREF CDO 2006-1 was established to complete a collateralized debt obligation ("CDO") issuance secured by a portfolio of commercial real estate ("CRE") loans and commercial mortgage-backed securities ("CMBS").

Resource Real Estate Funding CDO 2007-1, Ltd. ("RREF CDO 2007-1"), a Cayman Islands limited liability company and QRS. RREF CDO 2007-1 was established to complete a CDO issuance secured by a portfolio of CRE loans and CMBS.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The consolidated financial statements include the accounts of the Company.

All inter-company transactions and balances have been eliminated.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and all highly liquid investments with original maturities of three months or less at the time of purchase. At June 30, 2015 and December 31, 2014, the reported cash balances of \$145.0 million and \$79.9 million exceeded Federal Deposit Insurance Corporation deposit insurance limit of \$250,000 per institution, subjecting the Company to risk related to the uninsured balance. All of the Company's cash deposits are held at large, established financial institutions.

Investment in Unconsolidated Entities

The Company's non-controlling investments in unconsolidated entities are included in investments in unconsolidated entities on the balance sheet and may be accounted for under the equity method or the cost method.

Under the equity method, capital contributions, distributions, profits and losses of the entities are allocated in accordance with the terms of the entities' operating agreements. Such allocations may differ from the stated percentage interests, if any, as a result of preferred returned and allocation formulas as described in the entities' operating agreements.

The Company may account for an investment that does not qualify for equity method accounting using the cost method if the Company determines the investment in the unconsolidated investment is insignificant. Under the cost method, the Company records dividend income when declared to the extent it is not considered a return of capital, which is recorded as a reduction of the cost of the investment.

Recent Accounting Standards

In April 2015, the Financial Accounting Standards Board ("FASB") issued guidance that simplifies the presentation of debt issuance costs by requiring that debt issuance costs be presented in the balance sheet as a deduction from the carrying amount of the related debt liability, consistent with debt discounts or premiums. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. It is effective for annual reporting periods beginning after December 15, 2015, but early adoption is permitted. The Company has early adopted the provisions of this guidance. Note 12, Borrowings, reflects the presentation of debt issuance costs as prescribed by this accounting standards update. Adoption did not have a material impact on the Company's

consolidated financial statements.

(unaudited)

In February 2015, the FASB issued guidance that requires an entity to evaluate whether they should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. Specifically, the amendments: (1) modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities ("VIEs") or voting interest entities; (2) eliminate the presumption that a general partner should consolidate a limited partnership; (3) affect the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related-party relationships; and (4) provide a scope exception from consolidation guidance for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. This guidance is effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2015. Early application is permitted. The Company is currently evaluating the effect of adoption.

In November 2014, the FASB issued guidance to eliminate the use of different methods in practice and thereby reduce existing diversity under GAAP in the accounting for hybrid financial instruments issued in the form of shares. An entity that issues or invests in a hybrid financial instrument is required to separate an embedded derivative feature from the host contract (for example, an underlying share) and account for the feature as a derivative according to Accounting Standards Codification ("ASC") Subtopic 815-10 on derivatives and hedging if certain criteria are met. This guidance is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. The Company is currently evaluating the effect of adoption.

In August 2014, the FASB issued guidance that clarifies the disclosures management must make in its interim and annual financial statement footnotes when management has determined that conditions exist that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date the financial statements are issued (or within one year after the date the financial statements are available to be issued when applicable). In accordance with this guidance, management's assessment is required to be made each reporting period and should be based on relevant conditions and events that are known and reasonably knowable at the date the financial statements are issued. In all cases, to the extent that substantial doubt about the entity's ability to continue as a going concern is determined to be probable, management must disclose the principal conditions or events that gave rise to the substantial doubt about the entity's ability to continue as a going concern, management's evaluation of the significance of those conditions or events in relation to the entity's ability to meet its obligations, and management's plans that either alleviate or are intended to mitigate the conditions or events that gave rise to the substantial doubt about the entity's ability to continue as a going concern. Additionally, to the extent substantial doubt about the entity's ability to continue as a going concern is not alleviated by management's plans, management must indicate in the footnotes that there is substantial doubt about the entity's ability to continue as a going concern. This guidance is effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. Early adoption is permitted. The Company does not expect adoption will have a material impact on its consolidated financial statements.

In August 2014, the FASB issued guidance that provides for the election of a measurement alternative when a reporting entity determines that it is the primary beneficiary of a collateralized financing entity and, hence, is required to consolidate that collateralized financing entity. The measurement alternative allows a qualifying, consolidated collateralized financing entity to use the more observable of the fair value of the financial assets or the fair value of the financial liabilities adjusted by the carrying amount of non-financial assets, the fair value of any beneficial interests retained by the reporting entity (including those beneficial interest that represent compensation for services). Alternatively, if the measurement alternative is not elected for a qualifying, consolidated collateralized financing entity, this guidance requires that the financial assets and financial liabilities be measured in accordance with ASC

Topic 820, and any difference in the fair value of the financial assets and the fair value of the financial liabilities would be reflected in earnings and attributed to the reporting entity in the consolidated statement of operations. This guidance is effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted as of the beginning of an annual period. The Company is currently evaluating the effect of adoption.

In June 2014, the FASB issued guidance that changes the accounting for repurchase-to-maturity transactions to secured borrowing accounting and requires separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement for repurchase arrangements. This amendment also requires additional disclosure for certain transactions comprising a transfer of a financial asset accounted for as a sale and an agreement with the same transferee entered into in contemplation of the initial transfer that results in the transferor retaining substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. The Company adopted this accounting standards update on January 1, 2015. Upon

adoption, the Company unlinked its previously linked transactions and disclosed affected asset, liability, income and expense balances at their gross values in its consolidated financial statements.

In April 2014, the FASB issued guidance that changes the requirements for reporting discontinued operations. The amendments in this update require an entity to present, for each comparative period, the assets and liabilities of a disposal group that includes a discontinued operation separately in the asset and liability sections of the statement of financial position. The amendments in this update also require additional disclosures about discontinued operations and new disclosures for disposal transactions of individually significant components of an entity that do not meet the definition of a discontinued operation. Additionally, this guidance both permits and expands the disclosures about an entity's significant continuing involvement with a discontinued operation. This guidance is effective for all disposals or classifications as held for sale of components of an entity that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years. Early adoption was permitted for disposals that had not been reported in financial statements previously issued or available for issuance. The Company early adopted the provisions of this guidance. Adoption did not have a material impact on the Company's consolidated financial statements.

In January 2014, the FASB issued guidance that clarifies when a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan. Furthermore, the guidance requires interim and annual disclosure of the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. This guidance was effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. Adoption did not have a material impact on the Company's consolidated financial statements.

Reclassifications

Certain reclassifications have been made to the 2014 consolidated financial statements to conform to the 2015 presentation.

NOTE 3 - VARIABLE INTEREST ENTITIES

The Company has evaluated its securities, loans, investments in unconsolidated entities, liabilities to subsidiary trusts issuing preferred securities (consisting of unsecured junior subordinated notes) and its securitizations in order to determine if they are variable interests in VIEs. The Company monitors these legal interests and, to the extent it has determined that it has a variable interest, analyzes the entity for potential consolidation. A VIE is required to be consolidated by its primary beneficiary. The Company continuously analyzes entities in which it holds variable interests, including when there is a reconsideration event, to determine whether such entities are VIEs and whether such potential VIEs should be consolidated or deconsolidated. This analysis requires considerable judgment in determining the primary beneficiary of a VIE and could result in the consolidation of an entity that would otherwise not have been consolidated or the non-consolidation of an entity that otherwise would have been consolidated.

Consolidated VIEs (the Company is the primary beneficiary)

Based on management's analysis, the Company is the primary beneficiary of twelve VIEs at June 30, 2015: Apidos CDO I, Apidos CDO III, Apidos Cinco CDO, Apidos CLO VIII, RREF CDO 2006-1, RREF CDO 2007-1, Whitney CLO I, RCC CRE Notes 2013, RCC 2014-CRE2, RCC 2015-CRE3, Moselle CLO and RCM Global, LLC. In performing the primary beneficiary analysis for Apidos CDO I, Apidos CDO III, Apidos Cinco CDO, Apidos CLO VIII, RREF CDO 2006-1, RREF CDO 2007-1, RCC CRE Notes 2013, RCC 2014-CRE2, RCC 2015-CRE3 and RCM Global, LLC, it was determined that the parties that have the power to direct the activities that are most significant to each of these VIEs and who have the right to receive benefits and the obligation to absorb losses that could potentially

be significant to these VIEs, are a related-party group. It was then determined that the Company was the party within that group that is more closely associated with each such VIE considering the design of the VIE, the principal-agency relationship between the Company and other members of the related-party group, and the relationship and significance of the activities of the VIE to the Company compared to the other members of the related-party group.

Apidos CDO I, Apidos CDO III, Apidos Cinco CDO, Apidos CLO VIII, RREF CDO 2006-1, RREF CDO 2007-1, RCC CRE Notes 2013, RCC 2014-CRE2 and RCC 2015-CRE3 were formed on behalf of the Company to invest in real estate-related securities, CMBS, property available-for-sale, bank loans, corporate bonds and asset-backed securities and were financed by the issuance of debt securities. The Manager manages the commercial real estate-related entities on behalf of the Company, and CVC Credit Partners manages the commercial finance-related entities on behalf of the Company. By financing these assets with long-term borrowings through the issuance of bonds, the Company seeks to generate attractive risk-adjusted equity returns and to match the term of its assets and liabilities. The primary beneficiary determination for each of these VIEs was made at each VIE's inception and is continually assessed.

Moselle CLO was a European securitization in which the Company purchased a \$30.4 million interest in the form of subordinate notes representing 100% of the Class 1 Subordinated Notes and 67.9% of the Class 2 subordinated Notes in February 2014. The CLO was managed by an independent third-party, and such collateral management activities were determined to be the activities that most significantly impacted the economic performance of the CLO. Though neither the Company nor one of its related parties managed the CLO, due to certain unilateral kick-out rights within the collateral management agreement it was determined that the Company had the power to direct the activities that most significantly impacted the economic performance of Moselle CLO. Having both the power to direct the activities that most significantly impact Moselle CLO and a financial interest that was expected to absorb both positive and negative variability in the CLO that could potentially be significant, the Company was determined to be the primary beneficiary of Moselle CLO and, therefore, consolidated the CLO. During the fourth quarter of 2014, the CLO began the liquidation process and all assets were subsequently sold.

Whitney CLO I was a securitization in which the Company acquired rights to manage the collateral assets held by the entity in February 2011. For a discussion on the primary beneficiary analysis for Whitney, see “— Unconsolidated VIEs – Resource Capital Asset Management,” below.

On July 9, 2014, RCC Residential, together with Resource America and certain Resource America employees, acquired through RCM Global a portfolio of securities from JP Morgan for \$23.5 million. The portfolio is managed by Resource America. RCC Residential contributed \$15.0 million for a 63.8% membership interest. Each of the members of RCM Global is allocated revenues and expenses of RCM Global in accordance with his or her membership interest. RCM Global was determined to be a VIE based on the equity holders' inability to direct the activities that are most significant to the entity. The Company was determined to be the primary beneficiary of RCM Global and, therefore, consolidated the entity. The Company's ownership interest of the portfolio's remaining assets was 45.9% as of June 30, 2015.

For a discussion of the Company's securitizations, see Note 1, and for a discussion of the debt issued through the securitizations, see Note 12.

For consolidated CLOs in which the Company does not own 100% of the subordinated notes, the Company imputes an interest rate using expected cash flows over the life of the CLO and records the third party's share of the cash flows as interest expense on the consolidated statements of operations.

The Company has exposure to losses on its securitizations to the extent of its subordinated debt and preferred equity interests in them. The Company is entitled to receive payments of principal and interest on the debt securities it holds and, to the extent revenues exceed debt service requirements and other expenses of the securitizations, distributions with respect to its preferred equity interests. As a result of consolidation, debt and equity interests the Company holds in these securitizations have been eliminated, and the Company's consolidated balance sheets reflects both the assets held and debt issued by the securitizations to third parties and any accrued expense to third parties. The Company's

operating results and cash flows include the gross amounts related to the securitizations' assets and liabilities as opposed to the Company's net economic interests in the securitizations. Assets and liabilities related to the securitizations are disclosed, in the aggregate, on the Company's consolidated balance sheets.

The creditors of the Company's twelve consolidated VIEs have no recourse to the general credit of the Company. However, in its capacity as manager, the Company has voluntarily supported two credits in one of its commercial real estate CDOs as the credits went through a restructuring in order to maximize future cash flows from the CDO. For the three and six months ended June 30, 2015, the Company has provided no financial support. For the three and six months ended June 30, 2014, the Company provided financial support of \$10,000 and \$549,000, respectively. The Company has provided no other financial support to any other of its VIEs nor does it have any requirement to do so, although it may choose to do so in the future to maximize future cash flows on such investments by the Company. There are no explicit arrangements that obligate the Company to provide financial support to any of its consolidated VIEs.

Unconsolidated VIEs (the Company is not the primary beneficiary, but has a variable interest)

Based on management's analysis, the Company is not the primary beneficiary of the VIEs discussed below since it does not have both (i) the power to direct the activities that most significantly impact the VIE's economic performance and (ii) the obligation to absorb the losses of the VIE or the right to receive the benefits from the VIE, which could be significant to the VIE. Accordingly, the following VIEs are not consolidated in the Company's financial statements as of June 30, 2015. The Company's maximum exposure to risk for each of these unconsolidated VIEs is set forth in the "Maximum Exposure to Loss" column in the table below.

LEAF Commercial Capital, Inc.

On November 16, 2011, the Company together with LEAF Financial, Inc. ("LEAF Financial"), a subsidiary of Resource America, and LEAF Commercial Capital, Inc. ("LCC"), another subsidiary of Resource America, entered into a stock purchase agreement and related agreements (collectively the "SPA") with Eos Partners, L.P., a private investment firm, and its affiliates ("Eos"). In exchange for its prior interests in its lease related investments, the Company received 31,341 shares of Series A Preferred Stock (the "Series A Preferred Stock"), 4,872 shares of newly issued 8% Series B Redeemable Preferred Stock (the "Series B Preferred Stock") and 2,364 shares of newly issued Series D Redeemable Preferred Stock (the "Series D Preferred Stock"), collectively representing, on a fully-diluted basis, assuming conversion, a 26.7% interest in LCC. At the time of investment, the Company's investment in LCC was valued at \$36.3 million based on a third-party valuation at that time. During 2013, the Company entered into a third stock purchase agreement with LCC to purchase 3,682 shares of newly issued Series A-1 Preferred Stock (the "Series A-1 Preferred Stock") for \$3.7 million and 4,445 shares of newly issued Series E Preferred Stock (the "Series E Preferred Stock") for \$4.4 million. The Series E Preferred Stock has priority over all other classes of preferred stock. The Company's fully-diluted interest in LCC, assuming conversion, was 28.4% at June 30, 2015. The Company's investment in LCC was recorded at \$39.8 million and \$39.4 million as of June 30, 2015 and December 31,

RESOURCE CAPITAL CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

JUNE 30, 2015

(unaudited)

2014, respectively. The Company determined that it is not the primary beneficiary of LCC because it does not participate in any management or portfolio decisions, holds only two of six board positions, and only controls 28.4% of the voting rights in the entity. Furthermore, Eos holds consent rights with respect to significant LCC actions, including the incurrence of indebtedness, consummation of a sale of the entity, liquidation or initiating a public offering.

Unsecured Junior Subordinated Debentures

The Company has a 100% interest in the common shares of Resource Capital Trust I (“RCT I”) and RCC Trust II (“RCT II”), valued at \$1.5 million in the aggregate (or 3% of each trust). RCT I and RCT II were formed for the purposes of providing debt financing to the Company, as described below. The Company completed a qualitative analysis to determine whether or not it is the primary beneficiary of each of the trusts and determined that it was not the primary beneficiary of either trust because it does not have the power to direct the activities most significant to the trusts, which include the collection of principal and interest and protection of collateral through servicing rights. Accordingly, neither trust is consolidated into the Company’s consolidated financial statements.

The Company records its investments in RCT I and RCT II’s common shares as investments in unconsolidated trusts using the cost method and records dividend income when declared by RCT I and RCT II. The trusts each hold subordinated debentures for which the Company is the obligor in the amount of \$25.8 million for RCT I and \$25.8 million for RCT II. The debentures were funded by the issuance of trust preferred securities of RCT I and RCT II. The Company will continuously reassess whether it should be deemed to be the primary beneficiary of the trusts.

Resource Capital Asset Management CLOs

In February 2011, the Company purchased a company that managed bank loan assets through five CLOs. As a result, the Company became entitled to collect senior, subordinated and incentive management fees from these CLOs. The purchase price of \$22.5 million resulted in an intangible asset that was allocated to each of the five CLOs and is amortized over the expected life of each CLO. The unamortized balance of the intangible asset was \$8.5 million and \$9.4 million at June 30, 2015 and December 31, 2014, respectively. The Company recognized fee income of \$896,000 and \$1.9 million for the three and six months ended June 30, 2015, respectively and \$1.1 million and \$2.8 million for the three and six months ended June 30, 2014, respectively. With respect to four of these CLOs, the Company determined that it does not hold a controlling financial interest and, therefore, is not the primary beneficiary. One of the CLOs was liquidated in February 2013. With respect to the fifth CLO, Whitney CLO I, in October 2012, the Company purchased 66.6% of its preferred equity, which resulted in consolidation. Based upon that purchase, the Company determined that it had an obligation to absorb losses and/or the right to receive benefits that could potentially be significant to Whitney CLO I and that a related party had the power to direct the activities that are most significant to the VIE. As a result, together with the related party, the Company had both the power to direct and the right to receive benefits and the obligation to absorb losses. It was then determined that, between the Company and the related party, the Company was the party within that group that was more closely associated with Whitney CLO I because of its preferred equity interest in Whitney CLO I. The Company, therefore, consolidated Whitney CLO I. In May 2013, the Company purchased additional equity in this CLO which increased its equity ownership to 68.3% of the outstanding preferred equity of Whitney CLO I. In September 2013, the Company liquidated Whitney CLO I, and, as a result, all of the assets were sold.

Investment in ZAIS

In February 2015, the Company made an investment in ZAIS CLO 4 Limited, an offshore financing vehicle created to acquire and warehouse syndicated bank loans, through its wholly-owned, indirect subsidiary ZAIS and through its consolidated subsidiary Pelium Capital together with a certain Resource America employee. The Company, through ZAIS and Pelium Capital, committed to invest \$10.0 million and \$3.0 million, respectively, during the vehicles

warehousing period. The vehicle is managed by ZAIS Leveraged Loan Manager 4, LLC (the “Collateral Manager”), an unrelated entity to the Company or to Pelium Capital, and such collateral management activities were determined to be the activities that most significantly impacted the economic performance of the entity. The Collateral Manager can be replaced either by cause by the entity’s administrative agent in an event of default or by a unanimous vote of the entity’s equity investors, excluding any preference shares held by the collateral managers or its affiliates. Although the Company has an investment in the entity that is potentially significant, because it was determined that the Company did not have the ability to kick out the collateral manager, the Company was not determined to be the primary beneficiary and, hence, not required to consolidate ZAIS CLO 4, Limited. As of June 30, 2015, the Company had invested \$8.3 million and \$1.8 million through ZAIS and Pelium Capital, respectively.

Credit quality indicators

Bank Loans

The Company uses a risk grading matrix to assign grades to bank loans. Loans are graded at inception and updates to assigned grades are made continually as new information is received. Loans are graded on a scale of 1-5 with 1 representing the Company's highest rating and 5 representing its lowest rating. A loan with a rating of a 1 is considered performing within expectations, a loan with a rating of a 2 is considered watching closely with limited liquidity concerns, a loan with a rating of a 3 is considered to have possible future liquidity concerns, a loan with a rating of a 4 is considered to have nearer term liquidity concerns, and a loan with a rating of a 5 has defaulted. The Company also designates loans that are sold after the period end as held for sale at the lower of their fair market value or cost, net of any allowances and costs associated with the loan sales. The Company considers metrics such as performance of the underlying company, liquidity, collectability of interest, enterprise valuation, default probability, ratings from rating agencies and industry dynamics in grading its bank loans.

Credit risk profiles of bank loans were as follows (in thousands):

	Rating 1	Rating 2	Rating 3	Rating 4	Rating 5	Held for Sale	Total
As of June 30, 2015:							
Bank loans	\$ 162,007	\$ 12,577	\$ 4,249	\$ 2,450	\$ 474	\$ 6,028	\$ 187,785
As of December 31, 2014:							
Bank loans	\$ 291,214	\$ 32,660	\$ 5,424	\$ —	\$ 1,350	\$ 282	\$ 330,930

All of the Company's bank loans were current with respect to debt service with the exception of two loans with an aggregate amortized cost of \$474,000 as of June 30, 2015. As of December 31, 2014, all of the Company's bank loans were current with respect to debt service with the exception of two loans with an amortized aggregate cost of \$1.4 million, one of which defaulted as of March 31, 2014 and the other of which defaulted as of September 30, 2014.

Middle Market Loans

The Company uses a risk grading matrix to assign grades to middle market loans. At inception, all middle market loans are graded at a 2 and updates to assigned grades are made continually as new information is received. Loans are graded on a scale of 1-5 with 1 representing the Company's highest rating and 5 representing its lowest rating. A loan with a rating of a 1 is considered performing above expectations, a loan with a rating of a 2 is considered performing within expectations, a loan with a rating of a 3 is considered performing below expectations and requires close monitoring but no loss of interest or principal is expected, a loan with a rating of a 4 is considered to performing below expectations and some loss of interest or dividend is expected but no loss of principal, and a loan with a rating of a 5 is considered performing substantially below expectations, in default and some loss of principal is expected. The Company considers metrics such as performance of the underlying company, liquidity, collectability of interest and principal payments, enterprise valuation, default probability, and industry dynamics in grading its middle market loans.

Credit risk profiles of middle market loans were as follows (in thousands):

	Rating 1	Rating 2	Rating 3	Rating 4	Rating 5	Held for Sale	Total
As of June 30, 2015:							
Middle market loans	\$ 19,225	\$ 292,983	\$ 13,831	\$ —	\$ 4,956	\$ —	\$ 330,995

Commercial Real Estate Loans

The Company uses a risk grading matrix to assign grades to commercial real estate loans. Loans are graded at inception and updates to assigned grades are made continually as new information is received. Loans are graded on a scale of 1-4 with 1 representing the Company's highest rating and 4 representing its lowest rating. A loan with a rating of a 1 is considered to have satisfactory performance with no issues noted. A loan is graded with a rating of a 2 if a surveillance trigger event has occurred without mitigating circumstance to support such event. These loans are closely monitored and evaluated for possible migration to rating 3. A loan with a rating of 3 has experienced an extended decline in operating performance, a significant deviation from its origination plan or the occurrence of one or more surveillance trigger events which create an increased risk for potential default. A loan with a rating of a 4 is considered to be in default or that default is imminent and full recovery of the unpaid principal balance is improbable. The Company also designates loans that are sold after the period end at the lower of their fair market value or cost, net of any allowances and costs associated with the loan sales. In addition to the underlying performance of the loan collateral, the Company considers metrics such as the strength of underlying sponsorship, payment history, collectability of interest, structural credit enhancements, market trends and loan terms in grading its commercial real estate loans.

During the quarter ended June 30, 2015, the Company recorded an allowance for loan loss on a subordinated mezzanine loan position that was acquired in 2007. The outstanding loan balance of \$38.1 million was fully reserved and associated accrued interest of \$3.0 million was reversed against interest income, for a total charge to operations of \$41.1 million. The loan was originally supported by a portfolio of 13 hotel properties, most of which were luxury brand hotels. An impairment analysis showed that the fair value of the underlying collateral declined from that as of March 31, 2015. Contributing to this decline was a modification of the senior mortgage that accelerated the time horizon for disposing of the three remaining properties collateralizing the loan. Compounding this fact, the remaining three luxury brand hotel properties securing the loan are located in or near San Juan, Puerto Rico, and recent economic and credit disruptions in Puerto Rico resulted in events that caused the Company to determine that realizable values had declined rapidly and that the troubled debt restructuring should be fully reserved as of June 30, 2015.

Credit risk profiles of commercial real estate loans were as follows (in thousands):

	Rating 1	Rating 2	Rating 3	Rating 4	Held for Sale	Total
As of June 30, 2015

	\$1,292,596	\$54,434	\$—	\$—	\$—	\$1,347,030

The Company had no delinquent commercial real estate loans as of June 30, 2015 and December 31, 2014.

Residential Mortgage Loans

Residential mortgage loans are reviewed periodically for collectability in light of historical experience, the nature and amount of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any

underlying collateral, and prevailing underlying conditions. The Company also designates loans that are sold after the period end as held for sale at the lower of their fair market value or cost.

NOTE 10 - BUSINESS COMBINATIONS

On February 26, 2014, the Company made an additional capital contribution to LCF which gave the Company majority ownership at 50.2%. As a result, the Company began consolidating the LCF joint venture. The joint venture was established for the purpose of originating and acquiring life settlement contracts through a financing facility. On April 30, 2015, the Company committed to another capital contribution in the amount of \$750,000 increasing its ownership of LCF to 60.7%. The first installment of \$375,000 was funded on April 30, 2015 and the second installment of \$375,000 was funded on July 30, 2015.

The Company engaged a third party expert to assist in determining the fair values of the assets and liabilities assumed on this investment. Based on the final valuation, which determined an enterprise value of LCF of approximately \$4.1 million, and in accordance with FASB ASC Topic 805, the Company confirmed that no further adjustments are

necessary.

JUNE 30, 2015

(unaudited)

In November 2014, the Company called Moselle CLO S.A, substantially liquidating the securitization's assets. Proceeds from the sale of these assets, plus proceeds from previous sales and paydowns in the CLO, were used to pay down \$167.2 million of Senior Notes in full, and \$5.0 million of the securitized borrowings as of June 30, 2015.

In June 2015, the Company called Apidos CDO III, substantially liquidating the securitization's assets. Proceeds from the sale of these assets, plus proceeds from previous sales and paydowns in the CDO, were used to pay down the securitization's \$262.5 million of Senior Notes in full as of June 30, 2015.

The investments held by the Company's securitizations collateralize the securitization's borrowings and, as a result, are not available to the Company, its creditors, or stockholders. All senior notes retained at closing or subsequently repurchased by the Company as of June 30, 2015 eliminate in consolidation.

RCC 2015-CRE3

In February 2015, the Company closed RCC 2015-CRE3, a \$346.2 million CRE securitization transaction that provided financing for transitional commercial real estate loans. RCC 2015-CRE3 issued a total of \$282.1 million of senior notes at par to unrelated investors. RCC Real Estate purchased 100% of the Class E and Class F senior notes for \$20.8 million and \$15.6 million, respectively. In addition, Resource Real Estate Funding 2015-CRE3 Investor, LLC, a subsidiary of RCC Real Estate, purchased a \$27.7 million equity interest representing 100% of the outstanding preference shares. The senior notes purchased by RCC Real Estate are subordinated in right of payment to all other senior notes issued by RCC 2015-CRE3, but are senior in right of payment to the preference shares. The equity interest is subordinated in right of payment to all other securities issued by RCC 2015-CRE3.

At closing, the senior notes issued to investors by RCC 2015-CRE3 consisted of the following classes: (i) \$193.9 million of Class A notes bearing interest at one-month LIBOR plus 1.40%; (ii) \$17.3 million of Class A-S notes bearing interest at one-month LIBOR plus 1.65%; (iii) \$19.5 million of Class B notes bearing interest at one-month LIBOR plus 2.40%; (iv) \$20.8 million of Class C notes bearing interest at one-month LIBOR plus 3.15%; (v) \$30.7 million of Class D notes bearing interest at one-month LIBOR plus 4.00%; (vi) \$20.8 million of Class E notes bearing interest at one-month LIBOR plus 4.75%; (vii) and \$15.6 million of Class F notes bearing interest at one-month LIBOR plus 5.50%. All of the notes issued mature in March 2032, although the Company has the right to call the notes anytime after March 2017 until maturity. There is no reinvestment period in RCC 2015-CRE3; however, principal repayments, for a period ending in February 2017, may be used to purchase funding participations with respect to existing collateral held outside of the securitization.

8.0% Convertible Senior Notes

In January 2015, the Company issued and sold in a public offering \$100.0 million aggregate principal amount of its 8.0% Convertible Senior Notes due 2020, ("8.0% Convertible Senior Notes"). The 8.0% Convertible Senior Notes are convertible at the option of the holder at a current conversion rate of 187.4414 common shares per \$1,000 principal amount of 8.0% Convertible Senior Notes (equivalent to an initial conversion price of \$5.34 per common share).

Upon conversion of 8.0% Convertible Senior Notes by a holder, the holder will receive cash, the Company's common shares or a combination of cash and the Company's common shares, at the Company's election.

After deducting a \$1.0 million underwriting discount and deferred debt issuance costs totaling \$2.1 million, the Company received approximately \$97.0 million of net proceeds. In addition, the Company recorded a discount of \$2.5 million on the 8.0% Convertible Senior Notes that reflects the difference between the stated value of the debt and the fair value of the notes as if they were issued without a conversion feature.

The aforementioned market discounts and the deferred debt issuance costs will be amortized on a straight-line basis as additional interest expense through maturity on January 15, 2020. Interest on the 8.0% Convertible Senior Notes is paid semi-annually.

Residential Investments – Term Repurchase Facility

In June 2014, the Company's wholly-owned subsidiaries, RCC Resi Portfolio and RCC Resi TRS (the "Sellers") entered into a master repurchase and securities contract (the "2014 Facility") with Wells Fargo. Under the 2014 Facility, from time to time, the parties may enter into transactions in which the Sellers and Wells Fargo agree to transfer from the Sellers to Wells Fargo all of their right, title and interest to certain residential mortgage-backed securities and other assets against the transfer of funds by Wells Fargo to the Sellers, with a simultaneous agreement by Wells Fargo to transfer back to the Sellers such assets at a date certain or on demand, against the transfer of funds from the Sellers to Wells Fargo.

In January 2015, the Sellers amended the agreement with Wells Fargo to classify trust certificates as assets eligible for sale and repurchase under the 2014 Facility. The maximum borrowing amounts of the 2014 Facility under the amended agreement are \$110.0 million with respect to purchased residential mortgage-backed securities, and \$165.0 million with respect to trust certificates collateralized by jumbo mortgage loans. The 2014 Facility's maximum pricing margins are 1.45% and 3.00% on residential mortgage-backed securities and jumbo mortgage loans, respectively. In June 2015, the Company amended the agreement with Wells Fargo to extend the facility's termination date to August 21, 2015, with no other material changes made to the facility's terms.

Residential Mortgage Financing Agreements

PCM has master repurchase agreements with New Century Bank d/b/a Customer's Bank ("New Century") and Wells Fargo Bank, NA ("Wells Fargo") to finance the acquisition of residential mortgage loans. In June 2015, PCM amended its agreement with Wells Fargo to extend the facility's termination date to August 31, 2015, with no other material changes made to the facility's terms.

PCM was in compliance with all financial covenant requirements under the New Century and Wells Fargo agreements as of June 30, 2015.

Senior Secured Revolving Credit Agreement

On September 18, 2014, the Company's wholly-owned subsidiary, Northport LLC closed a \$110.0 million syndicated senior secured revolving credit facility ("Northport Credit Facility") with JP Morgan as agent bank to finance the origination of middle market and syndicated loans. The availability under the Northport Credit Facility was increased to \$125.0 million as of September 30, 2014 and again to \$140.0 million with an additional commitment from ING Bank early in March 2015. During the second quarter 2015, the Company entered into the first and second amendments of the Northport Credit Facility which increased the original commitment from \$225.0 million to \$300.0 million and secured \$85.0 million of additional availability, bringing the total available under the Northport Credit Facility to \$225.0 million as of June 30, 2015. As of June 30, 2015, \$151.0 million was outstanding on the Northport Credit Facility. Under the first amendment both the ability to access to draws on the Northport Credit Facility and maturity have been extended six months until March 31, 2018 and March 31, 2019 respectively.

Under the terms of the amendment the Northport Credit Facility applicable margins increased 25 basis points. The Northport Credit Facility bears interest rates, at the Company's election, on a per annum basis equal to (i) the applicable LIBOR rate plus 2.75% or (ii) the applicable base rate (prime rate of 3.25% as of June 30, 2015) plus 1.75%. During the six month period following September 18, 2014, the Company was charged a commitment fee on any unused balance of 0.375% per annum if the unused balance was greater than 35% of the total commitment or 0.50% per annum if it was less than 35% of the total commitment. Following that period, the commitment fee on any unused balance became 0.375% per annum if the outstanding balance is greater than 35% of the total commitment or 1.00% per annum if the outstanding balance is 35% or less of the total commitment. At June 30, 2015, there was an unused balance of \$74.0 million on the facility.

Amounts available to borrow under the Credit Facility are subject to compliance with a borrowing base computation that applies different advance rates to different types of assets held by Northport LLC that are pledged as collateral. Under the Northport Credit Facility, the Company has made certain customary representations and warranties and is required to comply with various covenants, including leverage restrictions, reporting requirements and other customary requirements for similar credit facilities. At June 30, 2015, the Company is in compliance with all covenants under the agreement. The Company guarantees Northport LLC's performance of its obligations under the Northport Credit Facility.

Contractual maturity dates of the Company's borrowings by category and year are present in the table below:

On or after October 2, 2017 the Company may, at its option, redeem the Series B preferred stock, in whole or part, at any time and from time to time, for cash at \$25.00 per share, plus accrued and unpaid dividends, if any, to the redemption date.

On or after July 30, 2024, the Company may, at its option, redeem the Series C preferred stock, in whole or part, at any time and from time to time, for cash at \$25.00 per share, plus accrued and unpaid dividends, if any, to the redemption date.

Under a dividend reinvestment plan authorized by the board of directors on March 21, 2013, the Company is authorized to issue up to 20,000,000 shares of common stock. During the three and six months ended June 30, 2015, the Company sold approximately 18,000 and 41,000 shares of common stock through this program, resulting in proceeds of approximately \$81,000 and \$187,000, respectively.

NOTE 14 - SHARE-BASED COMPENSATION

The following table summarizes restricted common stock transactions:

	Non-Employee Directors	Non-Employees	Employees	Total
Unvested shares as of January 1, 2015	49,203	1,812,853	161,583	2,023,639

Unvested shares as of June 30, 2015	61,067	2,438,598	268,144	2,767,809

The Company is required to value any unvested shares of restricted common stock granted to non-employees at the current market price. The estimated fair value of the unvested shares of restricted stock granted during the six months ended June 30, 2015 and 2014, including the grant date fair value of shares issued to the Company's seven non-employee directors, was \$5.7 million, and \$3.7 million, respectively.

The Company reports any unvested shares of restricted common stock granted to non-employee directors at the fair value on the grant date amortized over the service period. The amortization recognized during the three and six months ended June 30, 2015 and 2014 was \$64,000 and \$129,000 and \$64,000 and \$128,000, respectively.

As of June 30, 2015 the total unrecognized restricted common stock expense was \$4.9 million, with a weighted average amortization period remaining of 2.2 years.

The following table summarizes the restricted common stock grants during the six months ended June 30, 2015:

Date	Shares ⁽²⁾	Vesting/Year	Date(s)
February 3, 2015	7,276	100%	2/3/16
February 5, 2015	966,095	33.3%	2/5/16, 2/5/17, 2/5/18

June 8, 2015	8,495	100%	6/8/16

(1) In connection with a grant of restricted common stock made on September 24, 2014, the Company agreed to issue up to 70,728 additional shares of common stock if certain loan origination performance thresholds were achieved by personnel from the Company's loan origination team. The performance criteria is measured at the end of two annual measurement periods beginning April 1, 2014. The agreement also provided dividend equivalent rights pursuant to which the dividends that would have been paid on the shares had they been issued on the date of grant

Edgar Filing: Resource Capital Corp. - Form 10-Q

were paid at the end of each annual measurement period if the performance criteria were met. If the performance criteria is not met, the accrued dividends will be forfeited. As a consequence, the Company does not record the dividend equivalent rights until earned. On March 31, 2015, the first annual measurement period ended and 35,364 shares were earned. These shares will vest over the subsequent 12 months at a rate of one-fourth per quarter. In addition, approximately \$21,000 of accrued dividend equivalent rights were earned and paid.

(1) Non-employees are employees of Resource America.

There were no incentive fees paid to the Manager for the three and six months ended June 30, 2015 and 2014.

Apart from incentive compensation payable under the Management Agreement, the Company has established no formal criteria for the issuance of equity awards as of June 30, 2015. All awards are discretionary in nature and subject to approval by the Compensation Committee of the Company's board of directors.

On October 31, 2013, the Company, through its TRS, RCC Residential, completed a business combination whereby it acquired the assets of PCM, an Atlanta based company that originates and services residential mortgage loans, for approximately \$7.6 million in cash. As part of this transaction, a key employee of PCM was granted approximately \$800,000 of the Company's restricted stock. Any grants for employees of PCM are accounted for as compensation and amortized to equity compensation expense over the vesting period. Dividends declared on the stock while unvested are recorded as a general and administrative expense. Dividends declared after the stock vests are recorded as a distribution. For the three and six months ended June 30, 2015, \$184,000 and \$350,000 of amortization of the stock grants were recorded to equity compensation expense and \$43,000 and \$86,000 of expense related to dividends on unvested shares was recorded to general and administrative expense on the Company's consolidated statements of operations, respectively. For the three and six months ended June 30, 2014, \$163,000 and \$323,000 of amortization of the stock grants were recorded to equity compensation expense and \$52,000 and \$104,000 of expense related to dividends on unvested shares was recorded to general and administrative expense on the Company's consolidated statements of operations, respectively.

NOTE 17 - RELATED PARTY TRANSACTIONS

Relationship with Resource America and Certain of its Subsidiaries

Relationship with Resource America. On September 19, 2013, the Audit Committee of the Board of Directors of Resource America concluded that Resource America should consolidate the financial statements of the Company, which was previously treated as an unconsolidated variable interest entity. The Audit Committee reached this conclusion after consultations with the Office of the Chief Accountant of the Securities and Exchange Commission (the "Commission") following comments received from the staff of the Division of Corporation Finance of the Commission and the Audit Committee's discussion with the Company's management and its independent registered public accounting firm. Resource America's Audit Committee noted that consolidation of the Company was not expected to materially affect Resource America's previously reported net income attributable to common shareholders.

At June 30, 2015, Resource America owned 2,861,592 shares, or 2.1%, of the Company's outstanding common stock. In addition, Resource America held 2,166 options to purchase restricted stock which options expired on March 8, 2015.

The Company is managed by the Manager, which is a wholly-owned subsidiary of Resource America, pursuant to a Management Agreement that provides for both base and incentive management fees. For the three and six months ended June 30, 2015, the Manager earned base management fees of approximately \$3.4 million and \$6.8 million, respectively. For the three and six months ended June 30, 2014, the Manager earned base management fees of approximately \$3.2 million and \$6.1 million, respectively. No incentive management fees were earned for the three and six months ended June 30, 2015 or 2014. The Company also reimburses the Manager and Resource America for expenses, including the expenses of employees of Resource America who perform legal, accounting, due diligence and other services that outside professionals or consultants would otherwise perform, and for the wages, salaries and benefits of several Resource America personnel dedicated to the Company's operations. For the three and six months ended June 30, 2015 the Company paid the Manager \$1.6 million and \$2.7 million, respectively, and for the three and six months ended June 30, 2014, \$1.4 million and \$2.4 million, respectively, as expense reimbursements.

On November 24, 2010, the Company entered into an Investment Management Agreement with Resource Capital Markets, Inc. ("RCM"), a wholly-owned subsidiary of Resource America. The initial agreement provided that: (a) RCM may invest up to \$5.0 million of the Company's funds, with the investable amount being adjusted by portfolio gains (losses) and collections, and offset by expenses, taxes and realized management fees, and (b) RCM can earn a management fee in any year that the net profits earned exceed a preferred return. On June 17, 2011, the Company entered into a revised Investment Management Agreement with RCM which provided an additional \$8.0 million of the Company's funds. The management fee is 20% of the amount by which the net profits exceed the preferred return. During the three and six months ended June 30, 2015 and 2014, RCM earned no management fees. The portfolio began a partial liquidation during the year ended December 31, 2013 that has resulted in the outstanding portfolio balance being significantly decreased. The Company has reinvested gains from its activity and holds \$3.8 million in fair market value of trading securities as of June 30, 2015, an increase of \$400,000 from \$3.4 million at fair market value as of December 31, 2014. The Company and RCM also established an escrow account that allocates the net profit or net losses of the portfolio on a yearly basis based on the net asset value of the account. RCM did not earn profits from this account during the three and six months ended June 30, 2015 and 2014. The Company also reimburses RCM for expenses paid on the Company's behalf. For the three and six months ended June 30, 2015, the Company paid RCM \$65,000 and \$97,000, respectively, as expense reimbursements. For the three and six months ended June 30, 2014, the Company paid RCM \$51,000 and \$126,000, respectively, as expense reimbursements. At June 30, 2015, the Company was indebted to the Manager for \$1.7 million, comprised of base management fees of \$1.1 million and expense reimbursements of \$587,000. At December 31, 2014, the Company was indebted to the

Manager for \$1.6 million, comprised of base management fees of \$1.2 million and expense reimbursements of \$480,000. At June 30, 2015, the Company was indebted to RCM under the Company's Investment Management Agreement for \$185,000, comprised entirely of expense reimbursements. At December 31, 2014, the Company was indebted to RCM under the Company's Investment Management Agreement for \$121,000, comprised entirely of expense reimbursements. The Company's base management fee payable as well as expense reimbursements payable are recorded in accounts payable and other liabilities on the consolidated balance sheets.

During the year ended December 31, 2013, the Company, through one of its subsidiaries, began originating middle-market loans. Resource America is paid origination fees in connection with the Company's middle-market lending operations, which fees may not exceed 2% of the loan balance for any loan originated.

JUNE 30, 2015

(unaudited)

On November 7, 2013, the Company, through a wholly-owned subsidiary, purchased all of the membership interests in Elevation Home Loans, LLC, a start-up residential mortgage company, from an employee of Resource America for \$830,000, paid in the form of 136,659 shares of restricted Company common stock. The restricted stock vests in full on November 7, 2016, and includes dividend equivalent rights.

The Company had executed ten and nine securitizations as of June 30, 2015 and December 31, 2014, respectively, which were structured for the Company by the Manager. Under the Management Agreement, the Manager was not separately compensated by the Company for executing these transactions and is not separately compensated for managing the securitization's entities and their assets. The Company liquidated one of these securitizations in October 2013 and another in October 2014.

Relationship with LEAF Commercial Capital. LCC originated and managed equipment leases and notes on behalf of the Company. On March 5, 2010, the Company entered into agreements with Lease Equity Appreciation Fund II, L.P. ("LEAF II") (an equipment leasing partnership sponsored by LEAF Financial and of which a LEAF Financial subsidiary is the general partner), pursuant to which the Company provided and funded an \$8.0 million credit facility to LEAF II. The credit facility initially had a one year term with interest at 12% per year, payable quarterly, and was secured by all the assets of LEAF II, including its entire ownership interest in LEAF II Receivables Funding. The Company received a 1% origination fee in connection with establishing the facility. The facility originally matured on March 3, 2011 and was extended until September 3, 2011 with a 1% extension fee paid on the outstanding loan balance. On June 3, 2011, the Company entered into an amendment to extend the maturity to February 15, 2012 and to decrease the interest rate from 12% to 10% per annum resulting in a troubled-debt restructuring under current accounting guidance. On February 15, 2012, the credit facility was further amended to extend the maturity to February 15, 2013 with a 1% extension fee accrued and added to the amount outstanding. On January 11, 2013, the Company entered into another amendment to extend the maturity to February 15, 2014 with an additional 1% extension fee accrued and added to the amount outstanding. On December 17, 2013, the Company entered into another amendment to extend the maturity to February 15, 2015. At the end of 2014, the Company recorded a provision for loan loss on this loan of \$1.3 million before extinguishing the loan and bringing direct financing leases in the amount of \$2.1 million on the Company's books in lieu of the loan receivable. During the three and six months ended June 30, 2015, the Company recorded a partial recovery of this provision in the amount of \$28,000 and \$216,000. As of June 30, 2015, the Company held \$1.6 million of direct financing leases.

On November 16, 2011, the Company, together with LEAF Financial and LCC, entered into the SPA with Eos (see Note 3). The Company's resulting interest is accounted for under the equity method. For the three and six months ended June 30, 2015 the Company recorded gains of \$350,000 and \$402,000, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. For the three and six months ended June 30, 2014, the Company recorded losses of \$278,000 and \$872,000, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. The Company's investment in LCC was \$39.8 million and \$39.4 million as of June 30, 2015 and December 31, 2014, respectively.

Relationship with CVC Credit Partners. On April 17, 2012, Apidos Capital Management ("ACM"), a former subsidiary of Resource America, was sold to CVC Credit Partners, L.P. ("CVC Credit Partners"), a joint venture entity in which Resource America owns a 33% interest. CVC Credit Partners manages internally and externally originated bank loan assets on the Company's behalf. On February 24, 2011, a subsidiary of the Company purchased 100% of the ownership interests in Churchill Pacific Asset Management LLC ("CPAM") from Churchill Financial Holdings LLC for \$22.5 million. CPAM subsequently changed its name to RCAM. Through RCAM, the Company was initially entitled to collect senior, subordinated and incentive fees related to five CLOs holding approximately \$1.9 billion in

assets managed by RCAM. RCAM is assisted by CVC Credit Partners in managing these CLOs. CVC Credit Partners is entitled to 10% of all subordinated fees and 50% of the incentive fees received by RCAM. For the three and six months ended June 30, 2015, CVC Credit Partners earned subordinated fees of \$221,000 and \$458,000, respectively. For the three and six months ended June 30, 2014, CVC Credit Partners earned subordinated fees of \$330,000 and \$700,000, respectively. In October 2012, the Company purchased 66.6% of the preferred equity in one of the RCAM CLOs. In May 2013, the Company purchased additional equity in this CLO, increasing its ownership percentage to 68.3%. In September 2013, this CLO was called and the notes were paid down in full. Another RCAM-managed CLO also elected to redeem its outstanding notes in whole in February 2013.

JUNE 30, 2015

(unaudited)

In May, June and July 2013, the Company invested a total of \$15.0 million in CVC Global Credit Opportunities Fund, L.P. which generally invests in assets through the Master Fund (see Note 3). The fund will pay the investment manager a quarterly management fee in advance calculated at the rate of 1.5% annually based on the balance of each limited partner's capital account. The Company's management fee was waived upon entering the agreement because the Company is a related party of CVC Credit Partners. For the three and six months ended June 30, 2015, the Company recorded earnings of \$312,000 and \$920,000, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. For the three and six months ended June 30, 2014, the Company recorded earnings of \$1.1 million and \$2.0 million, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. In March 2015, the Company elected to withdraw \$5.0 million from the fund. The Company's investment balance was \$14.1 million as of June 30, 2015 as compared to \$18.2 million as of December 31, 2014. The investment is recorded as an investment in unconsolidated entities on the Company's consolidated balance sheets using the equity method.

Relationship with Resource Real Estate. Resource Real Estate, a subsidiary of Resource America, originates, finances and manages the Company's commercial real estate loan portfolio, including whole loans, B notes, mezzanine loans, and investments in real estate. The Company reimburses Resource Real Estate for loan origination costs associated with all loans originated. The Company had a receivable in the amount of \$150,000 and \$100,000 due from Resource Real Estate for loan origination costs in connection with the Company's commercial real estate loan portfolio as of June 30, 2015 and December 31, 2014, respectively.

On August 9, 2006, the Company, through its subsidiary, RCC Real Estate, originated a loan to Lynnfield Place, a multi-family apartment property, in the amount of \$22.4 million. The loan was then purchased by RREF CDO 2006-1. The loan, which was set to mature on May 9, 2018, carried an interest rate of LIBOR plus a spread of 3.50% with a LIBOR floor of 2.50%. On June 14, 2011, RCC Real Estate converted this loan, collateralized by a multi-family building, to equity. The loan was kept outstanding and was used as collateral in RREF CDO 2006-1. RREM was appointed as the asset manager as of August 1, 2011. RREM performed lease review and approval, debt service collection, loan workout, foreclosure, disposition and/or entitlements and permitting, as applicable. RREM was also responsible for engaging third parties to perform day-to-day property management, property leasing, rent collection, maintenance, and capital improvements. RREM was entitled to a monthly asset management fee equal to 4.0% of the gross receipts generated from the property. The Company incurred fees payable to RREM for the three and six months ended June 30, 2014 in the amount of \$35,000 and \$69,000, respectively. There were no fees incurred for the three and six months ended June 30, 2015, as the property was sold during the last quarter of 2014 for a gain of \$1.9 million.

On December 1, 2009, the Company purchased a membership interest in RRE VIP Borrower, LLC (an unconsolidated VIE that held an interest in a real estate joint venture) from Resource America for \$2.1 million, its book value. RREM was asset manager of the venture and received a monthly asset management fee equal to 1.0% of the combined investment calculated as of the last calendar day of the month. For the three and six months ended June 30, 2014, the Company paid RREM management fees of \$1,000 and \$6,000, respectively. There were no fees incurred for the three and six months ended June 30, 2015, as the last property associated with the joint venture was sold in July 2014. For the three and six months ended June 30, 2015, the Company recorded income of \$0 and \$46,000, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. For the three and six months ended June 30, 2014, the Company recorded income of \$870,000 and \$1.7 million, respectively, which was recorded in equity in earnings of unconsolidated subsidiaries on the consolidated statements of operations. The income recorded in 2015 was due to a liquidation of an existing bank account with respect to one of the properties.

On January 15, 2010, the Company loaned \$2.0 million to Resource Capital Partners, Inc. (“RCP”), a wholly-owned subsidiary of Resource America, so that it could acquire a 5.0% limited partnership interest in Resource Real Estate Opportunity Fund, L.P. (“RRE Opportunity Fund”). RCP is the general partner of the RRE Opportunity Fund. The loan was secured by RCP’s partnership interest in the RRE Opportunity Fund. The promissory note beared interest at a fixed rate of 8.0% per annum on the unpaid principal balance. In the event of default, interest would accrue and be payable at a rate of 5.0% in excess of the fixed rate. Interest was payable quarterly. Mandatory principal payments must also be made to the extent distributable cash or other proceeds from the partnership represent a return of RCP’s capital. The loan had an original maturity date of January 14, 2015, with two one-year extensions. RCP exercised the first option, extending the maturity to January 14, 2016. The loan balance was \$558,000 at December 31, 2014. In April 2015, RCP paid off the total loan balance of \$558,000.

On June 21, 2011, the Company entered into a joint venture with an unaffiliated third party to form CR SLH Partners, L.P. ("SLH Partners") to purchase a defaulted promissory note secured by a mortgage on a multi-family apartment building. The Company purchased a 10% equity interest in the venture and also loaned SLH Partners \$7.0 million to finance the project secured by a first mortgage lien on the property. The loan had a maturity date of September 21, 2012 and bore interest at a fixed rate of 10.0% per annum on the unpaid principal balance, payable monthly. The Company received a commitment fee equal to 1.0% of the loan amount at the origination of the loan and received a \$70,000 exit fee upon repayment. On May 23, 2012, SLH Partners repaid the \$7.0 million loan in its entirety. RREM was appointed as the asset manager of the venture. RREM performed lease review and approval, debt service collection, loan workout, foreclosure, disposition and permitting, as applicable. RREM was also responsible for engaging third parties to perform day-to-day property management, property leasing, rent collection, maintenance, and capital improvements. RREM received an annual asset management fee equal to 2.0% of the gross receipts generated from the property. The Company held a \$975,000 preferred equity investment in SLH Partners as of December 31, 2013. The investment was sold in 2014 for a \$912,000 gain, which was recorded on the Company's consolidated statements of operations in equity of earnings of unconsolidated subsidiaries.

In December 2013, the Company closed RCC CRE Notes 2013, a \$307.8 million real estate securitization that provides financing for commercial real estate loans. Resource Real Estate serves as special servicer. With respect to each Specialty Service Mortgage Loan, Resource Real Estate receives an amount equal to the product of (a) the Special Servicing Fee Rate, 0.25% per annum, and (b) the outstanding principal balance of such Specialty Service Mortgage Loan. The servicing fee is payable monthly, on an asset-by-asset basis. The Company utilizes the brokerage services of Resource Securities Inc. ("Resource Securities"), a wholly-owned broker-dealer subsidiary of Resource America, on a limited basis to conduct some of its asset trades. The Company paid Resource Securities a \$205,000 placement agent fee in connection with this transaction.

On July 30, 2014, the Company closed RCC 2014-CRE2, a \$353.9 million real estate securitization that provides financing for commercial real estate loans. Resource Real Estate serves as special servicer. With respect to each Specialty Service Mortgage Loan, Resource Real Estate receives an amount equal to the product of (a) the Special Servicing Fee Rate, 0.25% per annum, and (b) the outstanding principal balance of such Specialty Service Mortgage Loan. The servicing fee is payable monthly, on an asset-by-asset basis. The Company paid Resource Securities a \$175,000 placement agent fee in connection with this transaction.

On February 24, 2015, the Company closed RCC 2015-CRE3, a \$346.2 million real estate securitization that provides financing for transitional commercial real estate loans. Resource Real Estate serves as special servicer. With respect to each Specialty Service Mortgage Loan, Resource Real Estate receives an amount equal to the product of (a) the Special Servicing Fee Rate, 0.25% per annum, and (b) the outstanding principal balance of such Specialty Service Mortgage Loan. The servicing fee is payable monthly, on an asset-by-asset basis. The Company paid Resource Securities a \$100,000 placement agent fee in connection with this transaction.

In July 2014, the Company formed RCM Global Manager to invest in RCM Global, an entity formed to hold a portfolio of structured product securities. The Company contributed \$15.0 million for a 63.8% membership interest in RCM Global. A five member board manages RCM Global, and all actions including purchases and sales must be approved by no less than three of the five members of the board. The portion of RCM Global that the Company does not own is presented as non-controlling interests as of the dates and for the periods presented in the Company's consolidated financial statements. All intercompany accounts and transactions have been eliminated in consolidation. In March and June 2015, the Company requested and received a proportional, in-kind distribution in certain securities held by RCM Global. The distribution of and subsequent sale of those securities by the Company through its subsidiary, RCC Residential, resulted in the realization of \$5.6 million of gains for the six months ended June 30,

2015. The Company's ownership interest decreased to 45.9% as of June 30, 2015 as a result of these distributions.

In September 2014, the Company contributed \$17.5 million to Pelium Capital for an initial ownership interest of 80.4%. Pelium Capital is a specialized credit opportunity fund managed by Resource America. The Company funded its final commitment of \$2.5 million, as of February 1, 2015. The Company will receive 10% of the carried interest in the partnership for the first five years, and can increase its interest to 20% if the Company's capital contributions aggregate \$40.0 million. Resource America contributed securities valued at \$2.8 million to the formation of Pelium Capital. The portion of the fund that the Company does not own is presented as non-controlling interests as of the dates and for the periods presented in the Company's consolidated financial statements. Pelium Capital was determined not to be a VIE as there was sufficient equity at risk, the Company does not have disproportionate voting rights and Pelium Capital's partners have all of the following characteristics: (1) the power to direct the activities of Pelium; (2) the obligation to absorb losses; and (3) the right to receive residual returns. However, Pelium Capital was consolidated as a result of the Company's majority ownership and the Company's unilateral kick-out rights. The non-controlling interest in Pelium Capital is owned by Resource America and outside investors. All intercompany accounts and transactions have been eliminated in consolidation. The Company's ownership interest in Pelium Capital was 69.9% as of June 30, 2015.

On April 10, 2015, the Company entered into two first mortgage bridge loans in the amount of \$2.5 million and \$3.3 million with two funds sponsored by Resource America, Resource Real Estate Investors LP and Resource Real Estate Investors

II, LP. Each loan carried an interest rate of LIBOR plus 5.75% with a LIBOR floor of 0.25%. The loans had a maturity date of May 5, 2016, with two consecutive one-year options to extend upon the first maturity date. The loan in the amount of \$2.5 million was repaid in full with interest on April 29, 2015. The second loan in the amount of \$3.3 million was repaid in full with interest on July 31, 2015.

Relationship with Law Firm. Until 1996, Edward E. Cohen, a director who was the Company's Chairman from its inception until November 2009, was of counsel to Ledgewood, P.C., a law firm. In addition, one of the Company's executive officers, Jeffrey F. Brotman, was employed by Ledgewood until 2007. Mr. E. Cohen receives certain debt service payments from Ledgewood related to the termination of his affiliation with Ledgewood and its redemption of his interest in the firm. Mr. Brotman also receives certain debt service payments from Ledgewood related to the termination of his affiliation with the firm. For the three and six months ended June 30, 2015, the Company paid Ledgewood \$61,000 and \$334,000, respectively, in connection with legal services rendered to the Company. For the three and six months ended June 30, 2014, the Company paid Ledgewood \$120,000 and \$158,000, respectively, in connection with legal services rendered to the Company.

NOTE 18 - DISTRIBUTIONS

For the quarter ended June 30, 2015, the Company declared and subsequently paid a dividend of \$0.16 per common share.

In order to qualify as a REIT, the Company must currently distribute at least 90% of its taxable income. In addition, the Company must distribute 100% of its taxable income in order not to be subject to corporate federal income taxes on retained income. The Company anticipates it will distribute substantially all of its taxable income to its stockholders. Because taxable income differs from cash flow from operations due to non-cash revenues or expenses (such as provisions for loan and lease losses and depreciation), in certain circumstances, the Company may generate operating cash flow in excess of its distributions or, alternatively, may be required to borrow to make sufficient distribution payments.

The Company's 2015 dividends will be determined by the Company's board of directors which will also consider the composition of any dividends declared, including the option of paying a portion in cash and the balance in additional

common shares.

The Company's residential mortgage loan portfolio is comprised of both agency loans and non-agency jumbo loans. The fair values of the Company's agency loan portfolio are generally classified as Level 2 in the fair value hierarchy, as those values are determined based on quoted market prices or upon other observable inputs. The fair values of the Company's jumbo loan portfolio are generally classified as Level 3 in the fair value hierarchy, as those values are generally based upon valuation techniques that utilize unobservable inputs that reflect the assumptions that a market participant would use in pricing those assets.

As of June 30, 2015, except for a note balance of \$159,000, Moselle CLO paid off all of its outstanding CLO notes.

Loans held for sale consist of bank loans and CRE loans identified for sale due to credit concerns. Interest on loans held for sale is recognized according to the contractual terms of the loan and included in interest income on loans. The fair value of bank loans held for sale and impaired bank loans is based on what secondary markets are currently offering for these loans. As such, the Company classifies these loans as nonrecurring Level 2. For the Company's CRE loans where there is no primary market, fair value is measured using discounted cash flow analysis and other valuation techniques and these loans are classified as nonrecurring Level 3. The amounts of nonrecurring fair value losses for specifically impaired loans for the three and six months ended June 30, 2015 were \$38.9 million and \$41.4 million, respectively. The amounts of nonrecurring fair value losses for specifically impaired loans for the three and six months ended June 30, 2014 were \$440,000 and \$440,000, respectively. The amounts of nonrecurring fair value losses for loans held for sale for the three and six months ended June 30, 2015 were \$85,000 and \$806,000, respectively. The amounts of nonrecurring fair value losses for loans held for sale for the three and six months ended June 30, 2014 were \$60,000 and \$60,000, respectively.

In accordance with FASB ASC Topic 820-10-50-2-bbb, the Company is not required to disclose quantitative information with respect to unobservable inputs contained in fair value measurements that are not developed by the Company. As a consequence, the Company has not disclosed such information associated with fair values obtained from third-party pricing sources.

For Level 3 assets and liabilities measured at fair value on a recurring or non-recurring basis as of June 30, 2015, the significant unobservable inputs used in the fair value measurements were as follows (in thousands):

	Fair Value at June 30, 2015	Valuation Technique	Significant Unobservable Inputs	Significant Unobservable Input Value	
Interest rate swap agreements	\$6,300	Discounted cash flow	Weighted average credit spreads	4.55	%

Additionally, as of June 30, 2015, the Company also classified the valuation of its warrant derivative in Level 3 of the fair value hierarchy. The value of the warrant was determined using a Black-Scholes model using the following significant unobservable inputs: market capitalization of \$143.7 million and volatility of 50.0%.

The Company is required to disclose the fair value of financial instruments for which it is practicable to estimate that value. The fair values of the Company's short-term financial instruments such as cash and cash equivalents, restricted cash, principal paydown receivable, interest receivable, distribution payable, accrued interest expense, repurchase agreements and the secured revolving credit agreement approximate their carrying value on the consolidated balance sheets. The fair values of the Company's investment securities, trading are reported in Investment Securities, Trading (see Note 5). The fair values of the Company's investment securities available-for-sale are reported in Investment Securities Available-for-Sale (see Note 6). The fair values of the Company's derivative instruments and linked transactions are reported in Market Risk and Derivative Instruments (see Note 20).

Loans held-for-investment: The fair value of the Company's Level 2 Loans held-for-investment are primarily measured using a third-party pricing service. The fair value of the Company's Level 3 Loans held-for-investment are measured by discounting the expected future cash flows using the current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Loans receivable-related party are estimated by discounting the expected future cash flows using the current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

CDO notes are valued using the dealer quotes, typically the dealer who underwrote the CDO in which the notes are held. Moselle CLO was valued using a third party pricing specialist.

Junior subordinated notes are estimated by obtaining quoted prices for similar assets in active markets.

NOTE 20 - MARKET RISK AND DERIVATIVE INSTRUMENTS

The Company is directly and indirectly affected by changes in certain market conditions. These changes in market conditions may adversely impact the Company's financial performance and are referred to as "market risks." When deemed appropriate, the Company uses derivatives as a risk management tool to mitigate the potential impact of certain market risks. The primary market risks managed by the Company through the use of derivative instruments are interest rate risk and foreign currency exchange rate risk.

The Company may hold various derivatives in the ordinary course of business, including warrants, interest rate swaps, forward contracts, options and interest rate lock commitments. Warrants are securities that give the holder the right, but not the obligation, to purchase securities from an issuer at a specific price within a specified time period. Options are contracts sold by one party to another that give the buyer the right, but not the obligation, to buy or sell a financial asset at an agreed-upon price during a certain period of time or on a specific date. Interest rate swap agreements are contracts between two parties to exchange cash flows based on specified underlying notional amounts, assets and/or indices. Forward contracts represent future commitments to either purchase or to deliver loans, securities or a quantity of a currency at a predetermined future date, at a predetermined rate or price and are used to manage interest rate risk on loan commitments and mortgage loans held for sale as well as currency risk with respect to the Company's long positions in foreign currency-denominated investment securities. Rate lock commitments represent commitments to

fund loans at a specific rate and by a specified time and are used to mitigate risk of changes in interest rate in the Company's residential mortgage loan portfolio.

A significant market risk to the Company is interest rate risk. Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond the Company's control. Changes in the general level of interest rates can affect net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with the interest-bearing liabilities, by affecting the spread between the interest-earning assets and interest-bearing liabilities. Changes in the level of interest rates also can affect the value of the Company's interest-earning assets and the Company's ability to realize gains from the sale of these assets. A decline in the value of the Company's interest-earning assets pledged as collateral for borrowings could result in the counterparties demanding additional collateral pledges or liquidation of some of the existing collateral to reduce borrowing levels. The Company seeks to manage the extent to which net income changes as a function of changes in interest rates by matching adjustable-rate assets with variable-rate borrowings. During periods of changing interest rates, interest rate mismatches could negatively impact the Company's consolidated financial condition, consolidated results of operations and consolidated cash flows. In addition, the Company mitigates the potential impact on net income of periodic and lifetime coupon adjustment restrictions in its investment portfolio by entering into interest rate hedging agreements such as interest rate caps and interest rate swaps.

At June 30, 2015, the Company had 10 interest rate swap contracts outstanding whereby the Company paid an average fixed rate of 4.55% and received a variable rate equal to either one-month LIBOR or three-month LIBOR. The aggregate notional amount of these contracts was \$147.8 million at June 30, 2015. The counterparties for the Company's designated interest rate hedge contracts at such date were Credit Suisse International and Wells Fargo. The Company had master netting agreements with Credit Suisse International and Wells Fargo at June 30, 2015.

Regulations promulgated under the Dodd-Frank Act mandate that the Company clear certain new interest rate swap transactions through a central counterparty. Transactions that are centrally cleared result in the Company facing a clearing house, rather than a swap dealer, as counterparty. Central clearing requires the Company to post collateral in the form of initial and variation margin to our Futures Commission Merchant. As of June 30, 2015, the Company had centrally cleared derivative assets with a fair value of \$9,000. The Company classifies these hedges as cash flow hedges, which are hedges that eliminate the risk of changes in the cash flows of a financial asset or liability. The Company records changes in fair value of derivatives designated and effective as cash flow hedges in other comprehensive income, and records changes in fair value of derivatives designated and ineffective as cash flow hedges in earnings.

At December 31, 2014, the Company had 10 interest rate swap contracts outstanding whereby the Company paid an average fixed rate of 5.12% and received a variable rate equal to one-month LIBOR. The aggregate notional amount of these contracts was \$124.0 million at December 31, 2014. The counterparties for the Company's designated interest rate hedge contracts are Credit Suisse International and Wells Fargo with which the Company has master netting agreements.

The estimated fair value of the Company's liability related to interest rate swaps was \$6.3 million and \$8.7 million as of June 30, 2015 and December 31, 2014, respectively. The Company had aggregate unrealized losses of \$6.5 million and \$9.0 million on the interest rate swap agreements as of June 30, 2015 and December 31, 2014, respectively, which is recorded in accumulated other comprehensive income. The amortization is reflected in interest expense in the Company's consolidated statements of operations. In connection with the June 2007 close of RREF CDO 2007-1, the Company realized a swap termination gain of \$2.6 million, which is being amortized over the term of RREF CDO 2007-1. The accretion is reflected in interest expense in the Company's consolidated statements of operations. In connection with the termination of a \$53.6 million swap related to RREF CDO 2006-1 during the nine months ended September 30, 2008, the Company realized a swap termination loss of \$4.2 million, which is being amortized over the

term of a new \$45.0 million swap. The amortization is reflected in interest expense in the Company's consolidated statements of operations.

The Company is also exposed to currency exchange risk, a form of risk that arises from the change in price of one currency against another. Substantially all of the Company's revenues are transacted in U.S. dollars; however, a significant amount of the Company's capital is exposed to other currencies, primarily the Euro and the pound sterling. To address this market risk, the Company generally hedges foreign currency-denominated exposures (typically investments in debt instruments, including forecasted principal and interest payments) with currency forward contracts. The Company classifies these hedges as fair value hedges, which are hedges that eliminate the risk of changes in the fair values of assets, liabilities, and certain types of firm commitments. The Company records changes in fair value of derivatives designated and effective as fair value hedges in earnings, offset by corresponding changes in the fair values of the hedges items.

Forward contracts also contain an element of risk in that the counterparties may be unable to meet the terms of such agreements. In the event the parties to deliver commitments are unable to fulfill their obligations, the Company could potentially incur significant additional costs by replacing the positions at then current market rates. The Company manages its risk of exposure by limiting counterparties to those banks and institutions deemed appropriate by management. The Company does not expect any counterparty to default on its obligations and, therefore, the Company does not expect to incur any cost related to counterparty default.

The Company is exposed to interest rate risk on loans held for sale and interest rate lock commitments. As market interest rates increase or decrease, the fair value of mortgage loans held for sale and rate lock commitments will decline or increase accordingly. To offset this interest rate risk, the Company may enter into derivatives such as forward contracts to sell loans. The fair value of these forward sales contracts will change as market interest rates change, and the change in the value of these instruments is expected to largely, though not entirely, offset the change in fair value of loans held for sale and rate lock commitments. The objective of this activity is to minimize the exposure to losses on rate lock commitments and loans held for sale due to market interest rate fluctuations. The net effect of derivatives on earnings will depend on risk management activities and a variety of other factors, including market interest rate volatility, the amount of interest rate lock commitments that close, the ability to fill the forward contracts before expiration, and the time period required to close and sell loans.

During the warehousing phase of the Company's investments in structured vehicles, the Company may enter into total return swaps to finance the Company's exposure to assets that will ultimately be securitized. A total return swap is a swap agreement in which one party makes payments based on a set rate, while the other party makes payments based on the return of an underlying asset. Traditionally, the Company pays either an indexed or fixed interest payment to the warehousing lender and receives the net interest income and realized capital gains of the referenced portfolio of assets, generally loans, to be securitized that are owned and held by the warehousing lender. Upon the close of the warehousing period, the Company's invested equity plus net interest and any capital gains realized during the warehousing period are returned to the Company. Additionally, upon the close of the securitization, the Company may purchase beneficial interests in the securitization at fair value.

The following tables present the fair value of the Company's derivative financial instruments as well as their classification on the Company's consolidated balance sheets and on the consolidated statements of operations for the years presented:

The Company's linked transactions were evaluated on a combined basis, reported as forward (derivative) instruments and presented as assets on the Company's consolidated balance sheets in the line item linked transactions, net at fair value. The fair value of linked transactions reflected the value of the underlying CMBS, linked repurchase agreement borrowings and accrued interest payable on such instruments. The Company's linked transactions were not designated as hedging instruments and, as a result, the change in the fair value and net interest income from linked transactions was reported in unrealized gain (loss) and interest income on linked transactions, net on the Company's consolidated statements of operations.

As of December 31, 2014, the Company held non-hedging linked transactions, net at fair value of \$15.4 million. During the three months ended June 30, 2014, the Company recorded unrealized gain and net interest income on linked transactions of \$5.0 million.

The following table presents certain information about the components of the unrealized gain (loss) and net interest income from linked transactions, net, included in the Company's consolidated statements of operations for the periods presented as follows (in thousands):

In the Company's consolidated balance sheets, all balances associated with repurchase agreement and derivatives transactions are presented on a gross basis.

Certain of the Company's repurchase agreement and derivative transactions are governed by underlying agreements that generally provide for a right of offset in the event of default or in the event of a bankruptcy of either party to the

transaction.

NOTE 22 - COMMITMENTS AND CONTINGENCIES

From time to time, the Company may become involved in litigation on various matters, including disputes arising out of loans in the Company's portfolio and agreements to purchase or sell assets. Given the nature of the Company's business activities, the Company considers these matters to be routine and in the ordinary conduct of its business. The resolution of these matters may result in adverse judgments, fines, penalties, injunctions and other relief against the Company as well as monetary payments or other agreements and obligations. Alternately, the Company may engage in settlement discussions on certain matters in order to avoid the additional costs of engaging in litigation.

The Company is unaware of any contingencies arising from such routine litigation that would require accrual or disclosure in the consolidated financial statements as of June 30, 2015.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The following discussion provides information to assist you in understanding our financial condition and results of operations. This discussion should be read in conjunction with our consolidated financial statements and related notes appearing elsewhere in this report. This discussion contains forward-looking statements. Actual results could differ materially from those expressed in or implied by those forward-looking statements. Additionally, please see "Forward-Looking Statements" and "Risk Factors" for a discussion of certain risks, uncertainties and assumptions associated with those statements included in our Annual Report on Form 10-K for the year ended December 31, 2014. We are a diversified real estate investment trust that is primarily focused on originating, holding and managing commercial mortgage loans and other commercial real estate-related debt and equity investments. We also make other commercial finance investments. We are organized and conduct our operations to qualify as a real estate investment trust, or REIT, under Subchapter M of the Internal Revenue Code of 1986, as amended. Our objective is to provide our stockholders with total returns over time, including quarterly distributions and capital appreciation, while seeking to manage the risks associated with our investment strategies. We invest in a combination of real estate-related assets and, to a lesser extent, higher-yielding commercial finance assets. We have financed a substantial portion of our portfolio investments through borrowing strategies seeking to match the maturities and repricing dates of our financings with the maturities and repricing dates of those investments, and have sought to mitigate interest rate risk through derivative instruments.

We are externally managed by Resource Capital Manager, Inc., or the Manager, an indirect wholly-owned subsidiary of Resource America, Inc. (NASDAQ: REXI), or Resource America, a specialized asset management company that uses industry-specific expertise to evaluate, originate, service and manage investment opportunities through its commercial real estate, financial fund management and commercial finance operating segments. As of June 30, 2015, Resource America managed or co-managed approximately \$21.8 billion of assets in these sectors. To provide its services, the Manager draws upon Resource America, its management team and their collective investment experience.

We generate our income primarily from the spread between the revenues we receive from our assets and the cost to finance the purchase of those assets, from management of assets and from hedging interest rate risks. We generate revenues from the interest and fees we earn on our whole loans, A notes, B notes, mezzanine debt securities, commercial mortgage-backed securities, or CMBS, bank loans, middle market loans, other asset-backed securities, or ABS, and structured note investments. We also generate revenues from management of externally originated bank loans, from our residential mortgage origination business and from our investment in an equipment leasing business. Historically, we have used a substantial amount of leverage to enhance our returns and we have financed each of our different asset classes with different degrees of leverage. The cost of borrowings to finance our investments is a significant part of our expenses. Our net income depends on our ability to control these expenses relative to our revenue. In our bank loan, CMBS and ABS portfolios, we historically have used warehouse facilities as a short-term financing source and collateralized debt obligations, or CDOs, and collateralized loan obligations, or CLOs and, to a lesser extent, other term financing as long-term financing sources. In our commercial real estate loan portfolio, we historically have used repurchase agreements as a short-term financing source, and CDOs and, to a lesser extent, other term financing as long-term financing sources. Our other term financing has consisted of long-term, match-funded financing provided through long-term bank financing and asset-backed financing programs, depending upon market conditions and credit availability.

The current state of moderate growth in the United States economy continues to enable us to access the capital markets. Following the \$203.1 million in net capital we raised in 2014 through the offering of our Series C preferred stock, our dividend reinvestment program, or DRIP, and our at-the-market preferred stock program, in the first quarter of 2015 we completed an offering of \$100.0 million of our 8% Convertible Senior Notes due 2020, from which we netted \$97.0 million. The improving economy, along with our capital markets access, has allowed us to continue to increase our commercial real estate, or CRE, loan originations funded to \$340.4 million during the first half of 2015, as compared to \$295.5 during the first half of 2014.

Although economic conditions in the United States have improved, previous conditions in real estate and credit markets continue to affect both us and a number of our commercial real estate borrowers. During the quarter ended June 30, 2015, the Company recorded a substantial allowance for loan loss on a subordinated mezzanine loan position that was acquired in 2007. The outstanding loan balance of \$38.1 million was fully reserved, and associated accrued interest of \$3.0 million was reversed against interest income for a total charge to operations of \$41.1 million. The loan was originally supported by a portfolio of 13 hotel properties, most of which were luxury brand hotels. The last three luxury brand hotel properties securing the loan are located in or near San Juan, Puerto Rico, and recent economic and credit disruptions in Puerto Rico resulted in events that caused the Company to determine that the loan is impaired. In our bank and middle market loan portfolios, we recorded reserves of

approximately \$4.7 million for the six months ended June 30, 2015, which was primarily due to a significant increase in our middle market loan portfolio relating to a specific loan which had continued deterioration and defaulted in the second quarter of 2015. While we have recognized these losses in 2015, our credit quality on the balance of our loan portfolio is benign. In terms of delinquencies; only two bank loans, or \$474,000, are delinquent out of a portfolio of \$181.8 million; all but one, or \$5.0 million, of our middle market loans are current out of a portfolio of \$331.0 million; and none of our 87 CRE loans, totaling \$1.6 billion, are delinquent.

With respect to our investments and investment portfolio growth, we continued to see increased opportunities to deploy our capital. During 2014 and through June 30, 2015, we have underwritten 56 new CRE loans for a total of \$1.1 billion. These loans were initially financed in part through our CRE term facilities and then financed longer-term through our newest \$1.0 billion of CRE securitizations. We also purchased eight newly underwritten CMBS for \$22.8 million during the same time period all of which were financed through our Wells Fargo facility. In addition, we purchased 13 CMBS bonds for \$74.2 million that were financed by short-term repurchase agreements. We intend to use the existing capacity in our CMBS and CRE term credit facilities with Wells Fargo of \$70.1 million and \$225.3 million, respectively, and with Deutsche Bank of \$200.0 million, as of June 30, 2015, to help finance new CRE loans and CMBS investments.

Conversely, we also saw a decline in our commercial finance assets, as one of our bank loan CLOs was substantially liquidated in 2014 and another liquidated during the second quarter of 2015. This trend resulted in a substantial decline in our net interest income from bank loans in 2014, which continued into the second quarter of 2015. We began to mitigate this trend by investing in new CLOs and European structured notes in 2014 and expect to recycle additional capital in similar investments in 2015. We further expect to mitigate this trend by growing our real estate lending platform and, to a lesser extent, by deploying capital into our middle-market lending business, the loans of which are similar in nature to bank loans.

On October 31, 2013, we, through RCC Residential, Inc., a taxable REIT subsidiary, acquired a residential mortgage origination company, Primary Capital Mortgage LLC, or PCM, an Atlanta-based firm. Our acquisition of PCM represents a return to the residential mortgage investment market, by providing us with our first residential mortgage origination platform. On June 30, 2014, we also closed a residential jumbo loan-backed securitization where we retained approximately \$30 million of the structure's mezzanine securities, of which we sold approximately \$27 million in April 2015. PCM is now licensed in 41 states, up from seven states when we acquired the business. We intend to cautiously expand the origination business, including the residential jumbo loan area, over the coming year while continuing to add technology, staff and infrastructure.

In the past, we also had at our disposal the use of recycled capital in our bank loan CLO structures to make new investments. As of June 30, 2015, both of our remaining bank loan CLOs and two earlier real estate CDOs had ended their reinvestment periods. Additionally, our three most recent securitizations were structured as static deals, as such, they were not structured with reinvestment periods. As such, principal and interest received by these vehicles will be used to pay down their note balances and to provide distributions in accordance with their respective indentures. As these vehicles liquidate, we expect to use the returned capital to invest in strategic opportunities as they arise.

In the latter half of 2013, we seeded a middle market lending operation operated by our Manager with funds to invest on our behalf. These funds were derived from proceeds of sales from a partial liquidation of our trading portfolio. Our first investments were in bank loans purchased in the secondary market; however, in December 2013, we closed on a self-originated loan. We made additional investments of \$268.6 million in 2014 and \$102.0 million through the second quarter of 2015, which is a trend we expect to continue in 2015. We expect that, as our middle market loan operations grow, they will help to mitigate the revenues lost as a result of the liquidation and run-off of several bank loan CLOs. In September 2014, we closed a syndicated financing facility for this business with a capacity of \$125.0 million and an accordion feature to expand the capacity to \$225.0 million. As we previously projected, the facility has since been modified to a current maximum availability of \$225.0 million and the accordion feature was expanded to \$300.0 million. We had \$151.0 million outstanding on this facility as of June 30, 2015. We expect to utilize the accordion feature further and grow this business operation in 2015. As a result of the developments above, we expect to continue to modestly grow our net interest income in 2015. However, because we believe that economic conditions in the United States are fragile, and could be significantly harmed by occurrences over which we have no control, we

cannot assure you that we will be able to meet our expectations, or that we will not experience net interest income reductions.

As of June 30, 2015, we had allocated our invested equity capital among our targeted asset classes as follows: 68% in CRE assets, 29% in commercial finance assets and 3% in other investments. As of December 31, 2014, we had allocated our invested equity capital as follows: 67% in CRE assets, 29% in commercial finance assets and 4% in other assets. We plan to grow our equity allocation in CRE assets to a minimum 75% level.

Three and Six Months Ended June 30, 2015 as compared to Three and Six Months Ended June 30, 2014

Aggregate interest income increased \$5.9 million (19%) and \$16.5 million (29%) to \$36.5 million and \$74.2 million for the three and six months ended June 30, 2015, respectively, from \$30.6 million and \$57.7 million for the three and six months ended June 30, 2014, respectively. We attribute these changes to the following:

Interest Income from Loans

Bank loans. The weighted average loan balance of our bank loan portfolio decreased by \$341.4 million and \$260.9 million to \$259.5 million and \$288.9 million for the three and six months ended June 30, 2015, respectively, principally due to three of our CLOs, Apidos CDO I, Ltd. ("Apidos CDO I"), Moselle CLO S.A. ("Moselle CLO"), and Apidos CDO III, Ltd. ("Apidos CDO III") liquidating in October 2014, December 2014 and June 2015, respectively. Additionally, the remaining CLO, Apidos Cinco CDO, Ltd. ("Apidos Cinco CDO"), had matured and reached the end of its reinvestment period in early 2014, and, as a result, any principal collected is used to pay down notes instead of being reinvested in new assets. The change in the weighted average yield from 4.61% and 4.57% to 4.12% and 4.56% for the three and six months ended June 30, 2015, respectively, was primarily the result of the liquidation of Apidos CDO I in 2014 and liquidation of Apidos CDO III in June 2015.

Middle market loans. Through focused efforts to increase the investment in our middle market lending business, the portfolio grew from a weighted average balance of \$94.0 million and \$74.0 million for the three and six months ended June 30, 2014, respectively, to a weighted average balance of \$291.8 million and \$277.6 million for the three and six months ended June 30, 2015, respectively. Through strategic funding of new middle market loans, the weighted average yield on investments increased from 9.06% and 8.94% at June 30, 2014, respectively, to 9.93% and 9.91% at June 30, 2015, respectively.

Commercial real estate loans. Interest income on CRE loans increased \$2.9 million and \$11.7 million to \$19.9 million and \$42.1 million for the three and six months ended June 30, 2015, respectively, as compared to \$17.0 million and

\$30.4 million

[\(Back to Index\)](#)

69

[\(Back to Index\)](#)

for the three and six months ended June 30, 2014, respectively, due primarily to an increase in the weighted average balance of loans from \$1.0 billion and \$971.6 million to \$1.5 billion and \$1.5 billion, and to a lesser extent, a decrease in the weighted average yield from 6.59% and 6.25% to 5.18% and 5.69%, for the three and six months ended June 30, 2015, respectively. The increase in the weighted average balance of loans is due to our origination of loans for inclusion in our two newest CRE securitizations that closed in July 2014 and February 2015.

Interest Income from Securities

Asset-Backed Securities, or ABS. Interest income from ABS increased \$1.6 million and \$4.3 million to \$2.1 million and \$4.3 million for the three and six months ended June 30, 2015, respectively, as compared to \$490,000 and \$67,000 for the three and six months ended June 30, 2014, respectively. This increase is primarily due to the acquisitions of structured asset-backed securities by our consolidated variable interest entities, RCM Global, LLC, or RCM Global, and Pelium Capital Partners, L.P., or Pelium Capital, which significantly contributed to the increase in the weighted average balance of the ABS portfolio from \$41.5 million and \$33.3 million to \$53.1 million and \$51.6 million for the three and six months ended June 30, 2015, respectively. These purchases also increased the weighted average yield of our ABS portfolio from 4.78% and 4.75% to 16.16% and 16.87% in three and six months ended June 30, 2015, as these securities are higher-yielding, foreign-currency denominated CLO mezzanine and equity debt securities purchased at significant discounts to par.

Interest income - other. Interest income - other increased \$137,000 and decreased \$1.9 million to \$1.1 million and \$2.0 million for the three and six months ended June 30, 2015, respectively as compared to \$982,000 and \$3.8 million for the three and six months ended June 30, 2014, respectively. The slight increase for the three months ended June 30, 2015 is related to the income earned on our investment in ZWH4, LLC ("ZAIS") in 2015. This decrease for the six months ended June 30, 2015 is related to the decline in interest income provided by Moselle CLO, which liquidated in December 2014.

Three and Six Months Ended June 30, 2015 as compared to Three and Six Months Ended June 30, 2014

Aggregate interest expense increased \$5.2 million and \$10.5 million to \$15.8 million and \$30.7 million for the three and six months ended June 30, 2015, respectively, as compared to \$10.6 million and \$20.2 million for the three and six months ended June 30, 2014, respectively. We attribute this increase to the following:

Bank loans. Interest expense on bank loans decreased \$1.1 million and \$1.7 million to \$745,000 and \$1.6 million for the three and six months ended June 30, 2015, respectively as compared to \$1.8 million and \$3.3 million for the three and six months ended June 30, 2014, respectively. This was primarily due to a decrease in the weighted average note balance outstanding from \$635.6 million and \$582.1 million for the three and six months ended June 30, 2014, respectively, to \$271.8 million and \$293.9 million for the three and six months ended June 30, 2015, respectively, in our bank loan CLOs due to the call and liquidation of Apidos CDO I in October 2014, Moselle CLO in December 2014 and Apidos CDO III in June 2015, which resulted in the paydown of all of their outstanding notes. In addition Apidos Cinco CDO reached the end of its reinvestment period in May 2014; and, as a result, principal received from its collateral is being used to pay down the principal amounts of the notes.

Middle market loans. In September 2014, we closed on a senior revolving debt facility for our new middle market loan portfolio comprised of direct originations and syndicated loans. Interest expense on middle market loans was \$1.3 million and \$2.2 million for the three and six months ended June 30, 2015, respectively. There was no such expense for the three and six months ended June 30, 2014. The facility had a weighted average balance of \$138.6 million and \$124.1 million with a weighted average cost of funds of 3.12% and 2.93% during the three and six months ended June 30, 2015, respectively. As of June 30, 2015, we had approximately \$151.0 million outstanding on this facility. As we continue to focus on the growth of the middle market platform and its lending capabilities, we expect to expand our use of this facility throughout 2015 and may extend availability up to the full \$300.0 million of stated capacity.

Commercial real estate loans. Interest expense on CRE loans increased \$2.6 million and \$5.3 million to \$6.7 million and \$12.8 million for the three and six months ended June 30, 2015, respectively, as compared to \$4.1 million and \$7.5 million for the three and six months ended June 30, 2014, respectively. This was primarily as a result of the consolidation of Resource Capital Corp. 2014-CRE2, or RCC 2014-CRE2, a securitization that closed in July 2014, as well as the consolidation of Resource Capital Corp. 2015-CRE3, or RCC 2015-CRE3, a securitization that closed in February 2015. These increases were partially offset by senior note paydowns in Resource Real Estate Funding CDO 2006-1, or RREF CDO 2006-1, Resource Real Estate Funding CDO 2007-1, or RREF CDO 2007-1, and Resource Capital Corp. CRE Notes 2013, Ltd., or RCC CRE Notes 2013 as the underlying collateral paid down or paid off. In addition, there were increased borrowings on our two term facilities during the warehouse periods prior to closing on RCC 2014-CRE2 and RCC 2015-CRE3.

Securitized borrowings. Securitized borrowings expense was \$41,000 and \$255,000 for the three and six months ended June 30, 2015. The current year's interest expense is completely related to Moselle CLO, which was consolidated in 2014 and substantially liquidated in December 2014.

Convertible senior notes. Interest expense on convertible senior notes increased \$2.2 million and \$4.0 million to \$4.4 million and \$8.5 million for the three and six months ended June 30, 2015 as compared to \$2.1 million and \$4.5 million for the three and six months ended June 30, 2014. The current year interest expense includes interest expense taken on our \$100.0 million (at par) 8% Convertible Senior Notes which we issued in January 2015.

Rental income. Rental income decreased \$1.5 million and \$6.7 million to \$0 and \$0 for the three and six months ended June 30, 2015. This decrease relates to the sale of all of our rental properties during 2014. We do not hold any investments in commercial real estate as of June 30, 2015.

Fee income. Fee income increased \$1.1 million and \$229,000 to \$3.4 million and \$5.1 million for the three and six months ended June 30, 2015. This increase relates to increased income from our expanding mortgage servicing rights portfolio and its corresponding amortization offset by a decrease in income from the run-off of managed assets related to our investment in Resource Capital Asset Management, or RCAM, substantially accounted for this decrease.

RCAM holds asset-based, management contracts that entitle us to collect senior, subordinated, and incentive fees related to three CLO issuers.

Three and Six Months Ended June 30, 2015 as compared to Three and Six Months Ended June 30, 2014

Management fees – related party. Management fees-related party increased \$186,000 and \$666,000 to \$3.5 million and \$7.1 million for the three and six months ended June 30, 2015 as compared to \$3.3 million and \$6.4 million for the three and six months ended June 30, 2014. This expense represents compensation in the form of base management fees and incentive management fees pursuant to our management agreement as well as fees to the manager of our structured note portfolio. The changes are described below:

Base management fees increased by \$187,000 and \$667,000 for the three and six months ended June 30, 2015.

This increase was due to increased stockholders' equity, a component in the formula by which base management fees are calculated, primarily as a result of the receipt of \$30.5 million of proceeds from sales of common stock through our Dividend Reinvestment and Stock Purchase Plan, or DRIP, from January 1, 2014 through December 31, 2014. In addition, we issued approximately 388,000 shares, 2.3 million shares and 4.8 million shares of Series A preferred stock, Series B preferred stock, and Series C preferred stock, respectively, from January 1, 2014 through March 31, 2015, for which we received \$175.8 million of proceeds.

Incentive management fees are based upon the excess of adjusted operating earnings, as defined in the management agreement, over a variable base rate. There were no fees paid for the three or six months ended June 30, 2015 or the three or six months ended June 30, 2014.

Equity compensation - related party. Equity compensation - related party decreased \$1.2 million and \$1.9 million to \$791,000 and \$1.8 million for the three and six months ended June 30, 2015 as compared to \$2.0 million and \$3.7 million for the three and six months ended June 30, 2014, respectively. These expenses relate to the amortization of annual grants of restricted common stock to our non-employee independent directors, and annual and discretionary grants of restricted stock to employees of Resource America who provide investment management services to us through our Manager as well as employees through our recently acquired residential mortgage company subsidiary. The decrease in equity compensation expense was primarily attributable to a decrease in our stock price, which directly impacts our quarterly measurement of compensation expense due to the revaluation of unvested share-based compensation.

Rental operating expense. Rental operating expense decreased \$1.1 million and \$4.5 million to \$0 and \$6,000 for the three and six months ended June 30, 2015, respectively, as compared to \$1.1 million and \$4.5 million for the three and six months ended June 30, 2014, respectively. This decrease in expenses is due to the sale of our remaining properties in 2014. We held no investments in commercial real estate as of June 30, 2015.

General and administrative expense - Corporate. General and administrative expense - Corporate decreased \$683,000 and increased \$1.3 million to \$4.1 million and \$8.9 million for the three and six months ended June 30, 2015, respectively, as compared to \$4.8 million and \$7.6 million for the three and six months ended June 30, 2014, respectively. This decrease for the three months ended June 30, 2015 is primarily the result of non-recurring expenses of approximately \$900,000 relating to the sale of our hotel property in April 2014. The increase for the six months ended June 30, 2015 is primarily related to an increase in overall payroll costs year over year due to increased headcount and increased audit and legal expenses pertaining to the establishment and expansion of Northport LLC, our middle market lending operation, which began in September 2014.

General and administrative expense - PCM. General and administrative expense - PCM increased \$2.6 million and \$6.2 million to \$6.7 million and \$13.8 million for the three and six months ended June 30, 2015, respectively, as compared to \$4.1 million and \$7.6 million for the three and six months ended June 30, 2014, respectively. The increase reflects increased professional services and increased compensation costs to support PCM's geographic expansion during the three and six months ended June 30, 2015. PCM recently acquired licenses to operate in four additional states, California, Kansas, New Hampshire and Rhode Island, with license applications pending in New York as of the quarter's end.

Depreciation and amortization. Depreciation and amortization decreased \$139,000 and \$410,000 to \$621,000 and \$1.2 million for the three and six months ended June 30, 2015, respectively, as compared to \$760,000 and \$1.6 million for the three and six months ended June 30, 2014, respectively. The decrease was primarily the result of the sale of all of our investment properties during 2014. We held no investments in commercial real estate during the three and six months ended June 30, 2015.

Provision for loan losses. Provision for loan losses increased \$38.0 million and \$46.0 million to \$38.8 million and \$42.8 million for the three and six months ended June 30, 2015 as compared to a provision of \$782,000 and a benefit of \$3.2 million for the three and six months ended June 30, 2014. The following table summarizes the information relating to our provision for loan losses for the periods presented (in thousands):

CRE loan portfolio provision - The CRE loan specific provision significantly increased \$38.0 million and \$42.6 million for the three and six months ended June 30, 2015. During the quarter ended June 30, 2015 we recorded an allowance for loan loss on a subordinated mezzanine loan position that was acquired in 2007. The outstanding loan balance of \$38.1 million was fully reserved and associated accrued interest of \$3.0 million was reversed against interest income, for a total charge to operations of \$41.1 million. The loan was originally supported by a portfolio of 13 hotel properties, most of which were luxury brand hotels. As of June 30, 2015, of the original 13 hotel properties securing the loan, three properties remained, all of which were located in or near San Juan, Puerto Rico and recent economic and credit disruptions in Puerto Rico resulted in events that caused us to determine the loan was impaired and required a full reserve as of June 30, 2015.

Bank loan portfolio provision - The bank loan provision increased by \$323,000 and \$1.1 million for the three and six months ended June 30, 2015. The principal reason for the increased provision was the recognition of general reserves on two credits (increasing provisions approximately \$740,000 for the six months ended) as compared to one credit during the same period last year. We also recognized specific reserves of approximately \$182,000 on one additional credit that defaulted in June 2015 as well as additional impairment on an existing defaulted loan. Additionally, we recognized losses on positions that were subsequently sold. We record all such losses as an adjustment to the allowance for loan and lease losses, effectively increasing the provision for loan and lease losses.

Middle market loan portfolio provision - The middle market loan provision increased by \$755,000 and \$3.3 million for the three and six months ended June 30, 2015 due to a specific reserve taken on one position due to its decline in credit quality. There was no provision on the middle market loans for the three or six months ended June 30, 2014.

Residential mortgage loan provision - The residential mortgage loan provision decreased by \$333,000 and \$136,000 for the three and six months ended June 30, 2015 due to an unrealized gain taken on our jumbo loan portfolio. We had not established our jumbo loans portfolio until the second quarter of 2014.

Loan receivable related party provision - The loan receivable - related party provision decreased by \$728,000 and \$916,000 for the three and six months ended June 30, 2015 due to a recovery on losses that were previously recognized when we assumed lease collateral as payment in full of our related party loan in the fourth quarter of 2014.

Three and Six Months Ended June 30, 2015 as compared to Three and Six Months Ended June 30, 2014

Equity in earnings of unconsolidated subsidiaries. Equity in earnings of unconsolidated subsidiaries decreased \$1.1 million and \$2.4 million to \$662,000 and \$1.4 million for the three and six months ended June 30, 2015 as compared to \$1.8 million and \$3.8 million for the three and six months ended June 30, 2014. This decrease in earnings was primarily related to the properties in which we owned equity interests in a real estate joint venture. We recognized \$866,000 from the sale of a property for the six months ended June 30, 2014. We did not recognize any income from this joint venture in 2015 as all properties were sold during 2014. We also recognized \$984,000 of income in our investment in School Lane House during the six months ended June 30, 2014. We did not recognize any income from this investment in 2015 as the investment was sold during 2014.

Net realized and unrealized gain (loss) on sales of investment securities available-for-sale and loans. Net realized and unrealized gain (loss) on investment securities available-for-sale and loans increased \$8.1 million and \$20.4 million to \$9.7 million and \$24.2 million for the three and six months ended June 30, 2015 as compared to \$1.6 million and \$3.7 million for the three and six months ended June 30, 2014. This increase is primarily related to the gain on the sale and settlement of certain securities in the RCM Global portfolio, and the in-kind distribution and subsequent sale of those securities, realized gains on foreign exchange transactions from the settlement of contracts, unrealized gains on foreign exchange transactions due to a strengthening euro and unrealized gains on interest rate lock commitments on our residential loan portfolio.

Net realized and unrealized (loss) gain on investment securities, trading. Net realized and unrealized (loss) gain on investment securities, trading increased \$929,000 and \$4.6 million to \$279,000 and \$2.4 million during the three and six months ended June 30, 2015 as compared to a losses of \$650,000 and \$2.2 million for the three and six months ended June 30, 2014. The increase is primarily related to the unrealized and realized gains recognized by Pelium Capital, our consolidated subsidiary that invests in structured securities classified as trading securities. Pelium had significant realized gains in the three and six months ended June 30, 2015 from the sale of four and ten securities, respectively. We did not make a capital investment in Pelium Capital until September 2014, and, therefore, had no such income during the three and six months ended June 30, 2014.

Unrealized gain (loss) and net interest income on linked transactions, net. Unrealized gain (loss) and net interest income on linked transactions, net, decreased \$5.0 million and \$7.1 million to \$0 and \$235,000 for the three and six months ended June 30, 2015 as compared to \$5.0 million and \$7.3 million for the three and six months ended June 30, 2014. The amounts were related to our CMBS securities that were purchased with repurchase agreements with the same counterparty from whom the securities were purchased. These transactions were entered into contemporaneously or in contemplation of each other and were presumed not to meet sale accounting criteria. We accounted for these transactions on a net basis and recorded a forward purchase commitment to purchase securities (each, a “linked transaction”) at fair value. Due to a change in accounting guidance, as of January 1, 2015, the concept of linked transactions no longer exists.

Loss on reissuance/gain on extinguishment of debt. Loss on reissuance/gain on extinguishment of debt decreased \$362,000 and increased \$469,000 to losses of \$171,000 and \$1.1 million for the three and six months ended June 30, 2015 as compared to losses of \$533,000 and \$602,000 for the three and six months ended June 30, 2014. The transactions that give rise to the recognition of a loss on the reissuance of debt resulted from the reissuance of previously repurchased senior and junior notes in our consolidated variable interest entities in the open market. These senior and junior notes were originally repurchased at discounts to par and represent an opportunity to provide us strategic financing at beneficial rates upon reissuance. At the date these notes were repurchased, a gain, representative of the difference between the repurchase price and the par value of the note, was recognized. Because these same notes were reissued during the three and six months ended June 30, 2015, at a price less than par, an unrealized loss equal to the difference between the reissued price and the par value of the note was recognized in current earnings. Other income (expense). There was no other income (expense) for the three and six months ended June 30, 2015. During the same period in 2014, the Company recorded a loss on the consolidation of LCF, our entity which originates and acquires life settlement contracts, of \$1.3 million as a result of our additional investment in and acquisition of a controlling financial interest in the company during the first quarter of 2014.

Financial Condition

Summary.

Our total assets were \$2.8 billion at June 30, 2015 as compared to \$2.7 billion at December 31, 2014. The increase in total assets was principally due to the increase in CRE originations, slightly offset by the decline in our bank loan portfolios due to the liquidation of Apidos CDO III and the run-off of assets on Apidos Cinco CDO.

Investment Portfolio.

The table below summarizes the amortized cost and net carrying amount of our investment portfolio, classified by interest rate type. The following table includes both (i) the amortized cost of our investment portfolio and the related dollar price, which is computed by dividing amortized cost by par amount, and (ii) the net carrying amount of our investment portfolio and the related dollar price, which is computed by dividing the net carrying amount by par

We had no losses included in earnings due to other-than-temporary impairment charges during the three and six months ended June 30, 2015 and 2014, respectively, on positions that supported our CMBS investments. Securities classified as available-for-sale have increased on a net basis as of June 30, 2015 as compared to December 31, 2014 primarily due to the change in guidance on CMBS linked transactions and the effect of financial statement reclassification. We perform an on-going review of third-party reports and updated financial data on the underlying property financial information to analyze current and projected loan performance. Rating agency downgrades are considered with respect to our income approach when determining other-than-temporary impairment and, when inputs are stressed, the resulting projected cash flows reflect a full recovery of principal.

(6) Includes a \$799,000 junior mezzanine tranche of a whole loan that has a fixed rate of 10.0% as of June 30, 2015 and December 31, 2014.

Contracted interest rates and maturity dates do not include rates or maturity dates associated with one loan with an (7) amortized cost of \$38.1 million that was fully reserved as of June 30, 2015. We do not accrue interest on this loan as of June 30, 2015.

Bank Loans. At June 30, 2015, our consolidated securitization, Apidos Cinco CDO, held a total of \$185.8 million of bank loans at fair value. Apidos CDO I and Apidos CDO III, our liquidated CDOs, held a total of \$1.5 million of bank loans held for sale. The bank loans held by the securitizations secure the CDO notes they issued and are not available to satisfy the claims of our creditors. The aggregate fair value of bank loans held decreased by \$135.9 million from the fair value at December 31, 2014 due to the liquidation of Apidos III which occurred in June 2015.

Middle market loans. At June 30, 2015, Northport TRS, LLC, or Northport LLC, our middle market lending platform, held a total of \$327.7 million of middle market loans at fair value. The middle market loan portfolio is held as collateral under the senior secured revolving credit agreement. The aggregate fair value of middle market loans held increased by \$79.9 million over the fair value at December 31, 2014. This increase was primarily due to increased originations and purchases of loans in our middle market lending platform.

Asset-backed securities. At June 30, 2015, we held a total of \$63.2 million of ABS at fair value through Apidos Cinco CDO, RCM Global and RCC Commercial II. At December 31, 2014, we held a total of \$72.2 million of ABS at fair value through Apidos CDO III, Apidos Cinco CDO, RCM Global and RCC Commercial II. The decrease in total ABS was due to the sale of structured notes in RCM Global that occurred during the three and six months ended June 30, 2015.

Corporate bonds. At June 30, 2015, our consolidated securitization, Apidos Cinco CDO, held a total of \$2.4 million of corporate bonds at fair value, which secure the debt issued by this entity. These investments are held at fair value with any unrealized gain or loss reported in the equity section of the balance sheet. The aggregate fair value of corporate bonds held decreased by \$16,000 over those held at December 31, 2014. The decrease was primarily due to an increased unrealized losses attributable to market pricing during the six months ended June 30, 2015.

Credit quality indicators

Bank Loans

We use a risk grading matrix to assign grades to bank loans. Loans are graded at inception and updates to assigned grades are made continually as new information is received. We grade loans on a scale of 1-5 with 1 representing the our highest rating and 5 representing its lowest rating. A loan with a rating of a 1 is considered performing within expectations, a loan with a rating of a 2 is considered watching closely with limited liquidity concerns, a loan with a rating of a 3 is considered to have possible future liquidity concerns, a loan with a rating of a 4 is considered to have nearer term liquidity concerns, and a loan with a rating of a 5 has defaulted. We also designate loans that are sold after the period end as held for sale at the lower of their fair market value or cost, net of any allowances and costs associated with the loan sales. We consider metrics such as performance of the underlying company, liquidity, collectability of interest, enterprise valuation, default probability, ratings from rating agencies and industry dynamics in grading our bank loans.

Credit risk profiles of bank loans were as follows (in thousands):

	Rating 1	Rating 2	Rating 3	Rating 4	Rating 5	Held for Sale	Total
As of June 30, 2015:							
Bank loans	\$ 162,007	\$ 12,577	\$ 4,249	\$ 2,450	\$ 474	\$ 6,028	\$ 187,785

As of December 31, 2014:

Bank loans	\$ 291,214	\$ 32,660	\$ 5,424	\$ —	\$ 1,350	\$ 282	\$ 330,930
------------	------------	-----------	----------	------	----------	--------	------------

All of our bank loans were current with respect to debt service with the exception of two loans with an aggregate amortized cost of \$474,000 as of June 30, 2015. As of December 31, 2014, all of our bank loans were current with respect to debt service with the exception of two loans with an aggregate amortized cost of \$1.4 million, one of which defaulted as of March 31, 2014 and the other of which defaulted as of September 30, 2014.

Middle Market Loans

We use a risk grading matrix to assign grades to middle market loans. At inception, all middle market loans are graded at a 2 and updates to assigned grades are made continually as new information is received. Loans are graded on a scale of 1-5 with 1 representing our highest rating and 5 representing its lowest rating. A loan with a rating of a 1 is considered performing above expectations, a loan with a rating of a 2 is considered performing within expectations, a loan with a rating of a 3 is considered performing below expectations and requires close monitoring but no loss of interest or principal is expected, a loan with a rating of a 4 is considered to performing below expectations and some loss of interest or dividend is expected but no loss of principal, and a loan with a rating of a 5 is considered performing substantially below expectations, in default and some loss of principal is expected. We consider metrics such as performance of the underlying company, liquidity, collectability of interest and principal payments, enterprise valuation, default probability, and industry dynamics in grading our middle market loans.

Credit risk profiles of bank and middle market loans were as follows (in thousands):

	Rating 1	Rating 2	Rating 3	Rating 4	Rating 5	Held for Sale	Total
As of June 30, 2015:							
Middle market loans	\$ 19,225	\$ 292,983	\$ 13,831	\$ —	\$ 4,956	\$ —	\$ 330,995

As of December 31, 2014:

Middle market loans	\$ —	\$ 240,245	\$ 9,868	\$ —	\$ —	\$ —	\$ 250,113
---------------------	------	------------	----------	------	------	------	------------

As of June 30, 2015, one loan was in default with a risk rating of a 5, the rest of the Company's portfolio is current with respect to debt service. All of the Company's middle market loans were current with respect to debt service as of December 31, 2014.

[\(Back to Index\)](#)**Commercial Real Estate Loans**

We use a risk grading matrix to assign grades to commercial real estate loans. We grade loans at inception and continually update the assigned grades as we receive new information. We grade loans on a scale of 1-4 with 1 representing our highest rating and 4 representing our lowest rating. A loan with a rating of a 1 is considered to have satisfactory performance with no issues noted. A loan is graded with a rating of a 2 if a surveillance trigger event has occurred without mitigating circumstance to support such event. These loans are closely monitored and evaluated for possible migration to rating 3. A loan with a rating of 3 has experienced an extended decline in operating performance, a significant deviation from its origination plan or the occurrence of one or more surveillance trigger events which create an increased risk for potential default. A loan with a rating of a 4 is considered to be in default or that default is imminent and full recovery of the unpaid principal balance is improbable. We designate loans that are sold after the period end at the lower of fair market value or cost, net of any allowances and costs associated with the loan sales. In addition to the underlying performance of the loan collateral, we consider such metrics as the strength of underlying sponsorship, payment history, collectability of interest, structural credit enhancements, market trends and loan terms in grading our commercial real estate loans.

During the quarter ended June 30, 2015 we recorded an allowance for loan loss on a subordinated mezzanine loan position that was acquired in 2007. The outstanding loan balance of \$38.1 million was fully reserved and associated accrued interest of \$3.0 million was reserved reversed against interest income, for a total charge to operations of \$41.1 million. The loan was originally supported by a portfolio of 13 hotel properties, most of which were luxury brand hotels. As of June 30, 2015, of the original 13 hotel properties securing the loan, three properties remained, all of which were located in or near San Juan, Puerto Rico.

A confluence of several events led to the determination during the quarter that the loan was no longer collectible. First, the senior mortgage secured by the assets was refinanced in May 2015, and the new agreement contained certain terms and conditions that materially altered the original time horizon over which the borrower had originally planned to complete executing its business plan--which entailed holding the assets in an effort to maximize value. Namely, the new senior loan came with a one year term with no extension options, a high interest rate and a forced asset-sale mechanism that assured the new senior loan would be paid in full in 2016.

Second, the Commonwealth of Puerto Rico has been undergoing a very turbulent and volatile period regarding the Commonwealth's debt obligations. It has been working with the Federal Reserve Bank to attempt to restructure its \$73.0 billion of debt. The Puerto Rico debt crisis worsened through and after the second quarter, and within the last month, ultimately culminating in Puerto Rico defaulting on a \$58.0 million payment due to the Public Finance Corporation on August 1, 2015. The significant threats of a default by Puerto Rico have been publicized and the financial crisis there has quelled tourism and significantly impaired property values.

Likely due, at least in part, to the Puerto Rico debt crisis, one of the three remaining hotel properties went under contract in June 2015 and sold in July 2015 at an amount that would make it very difficult for the other two remaining properties to generate sufficient proceeds to repay the remaining debt. Given the forgoing, we concluded as of June 30, 2015, that the loan should be classified as a troubled-debt-restructuring and, further, that the loan should be fully reserved.

Residential Mortgage Loans

Residential mortgage loans are reviewed periodically for collectability in light of historical experience, the nature and amount of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, and prevailing underlying conditions. We also designate loans that are sold after the period ends as held for sale at the lower of their fair market value or cost.

Loans Receivable - Related Party

We recorded a recovery on loan losses of \$216,000 during the six months ended June 30, 2015 for a provision recorded during the year ended December 31, 2014. During the year ended December 31, 2014, we recorded a provision for loan losses on one related-party loan of \$1.3 million before extinguishing the loan and bringing direct financing leases in the amount of \$2.1 million on the our books in lieu of cash settlement of the loan receivable.

Troubled-Debt Restructurings

The following tables show troubled-debt restructurings in our loan portfolio (in thousands):

	Number of Loans	Pre-Modification Outstanding Recorded Balance	Post-Modification Outstanding Recorded Balance
Six Months Ended June 30, 2015			
Whole loans	2	\$67,459	\$67,459

Middle market loans	—	—	—
Residential mortgage loans	—	—	—
Loans receivable - related party	—	—	—
Total loans	3	\$105,531	\$67,459

We had no troubled-debt restructurings during the six months ended June 30, 2014. As of June 30, 2015 and 2014, there were no troubled-debt restructurings that subsequently defaulted.

Restricted Cash

At June 30, 2015, we had restricted cash of \$45.8 million, which consisted of \$44.0 million of restricted cash held by ten securitizations and \$1.8 million held in various reserve accounts. At December 31, 2014, we had restricted cash of \$122.1 million, which consisted of \$121.2 million of restricted cash on our ten securitizations and \$891,000 held in various reserve accounts. The decrease of \$76.3 million is primarily related to the liquidation of Moselle CLO S.A. and Apidos CDO III during the six months ended June 30, 2015.

Interest Receivable

At June 30, 2015, we had interest receivable of \$12.0 million, which consisted of \$12.0 million of interest on our securities and loans and \$5,000 of interest earned on escrow and sweep accounts. At December 31, 2014, we had interest receivable of \$16.3 million, which consisted of \$16.3 million of interest on our securities and loans and \$6,000 of interest earned on escrow and sweep accounts. The decrease resulted primarily from a decrease in interest receivable on mezzanine loans of \$3.1 million, a decrease in interest receivables on bank loans of \$691,000, a decrease in interest receivable on structured notes \$401,000, and a decrease of interest on RMBS of \$167,000, partially offset by an increase in interest receivable on CMBS of \$169,000 and an increase in interest receivable on middle market loans of \$97,000.

Prepaid Expenses

The following table summarizes our prepaid expenses at the periods indicated (in thousands):

	June 30, 2015	December 31, 2014	Net Change
Prepaid taxes	\$2,310	\$2,622	\$(312)
Prepaid insurance	697	191	506
Other prepaid expenses	906	1,383	(477)
Total	\$3,913	\$4,196	\$(283)

Prepaid expenses decreased \$283,000 to \$3.9 million as of June 30, 2015 from \$4.2 million as of December 31, 2014. The nominal decrease resulted from a decrease of \$312,000 of prepaid taxes and a decrease of \$477,000 in other prepaid expenses, partially offset by an increase of \$506,000 in prepaid insurance.

Other assets	8,733	8,172	561
Total	\$16,453	\$14,510	\$1,943

The increase of approximately \$1.9 million in other assets is due primarily to an increase in our investments in life settlement contracts from the net acquisition of new contracts during the period ended June 30, 2015 of \$1.5 million. Additionally, there was an increase to other assets of \$360,000, which consisted of a net increase in tax and other receivables.

With interest rates projected to remain relatively low, the scheduled maturity of one hedge, and the continued amortization of our swaps during 2015, we expect that the fair value of our interest rate swap hedges will modestly improve in 2015. We entered into a new swap contract during the three months ended June 30, 2015 in order to hedge against unfavorable rate movements against our jumbo residential mortgage loan portfolio, and we may continue to seek such hedges in the future.

Residential Investments – Term Repurchase Facility

In June 2014, our wholly-owned subsidiaries, RCC Residential Portfolio, Inc. and RCC Residential Portfolio TRS, Inc. entered into a master repurchase and securities contract with Wells Fargo Bank, or Wells Fargo, to be used as term repurchase facilities to finance the purchase of highly-rated RMBS and other residential investment assets. While there were no outstanding borrowings under these facilities as of June 30, 2015. We did utilize these facilities to finance investments in residential assets during the three and six months ended June 30, 2015. Furthermore, we intend to utilize this source of funds to finance residential investments in the future. As such, we amended our agreement with Wells Fargo in June 2015 to extend the facility's termination date to August 21, 2015, with no other material changes to the terms of the agreement. As of June 30, 2015, we had access to funds of \$110.0 million with respect to purchased RMBS, and \$165.0 million with respect to trust certificates collateralized by jumbo mortgage loans.

Residential Mortgage Financing Agreements

Our subsidiary, Primary Capital Mortgage, or PCM, has master repurchase agreements with New Century Bank d/b/a Customer's Bank, or New Century, and Wells Fargo Bank, NA, or Wells Fargo, to finance the acquisition of residential mortgage loans. In June 2015, PCM amended its agreement with Wells Fargo to extend the facility's termination date to August 31, 2015, with no other material changes made to the facility's terms. We were in compliance with all other financial covenant requirements under the agreements as of June 30, 2015.

Securitizations

As of June 30, 2015, we had executed ten and currently retain equity in eight of those securitizations. Pertinent information about our securitizations that occurred during the first six months of 2015 is as follows:

In May 2006, we closed Apidos CDO III, a \$285.5 million CDO transaction that provided financing for bank loans. The investments held by Apidos CDO III collateralized \$262.5 million of senior notes issued by the CDO vehicle. RCC Commercial purchased a \$23.0 million equity interest representing 100% of the outstanding preference shares. At December 31, 2014, the notes issued to outside investors had a weighted average borrowing rate of 1.18%. The reinvestment period expired in June 2012 and the CDO has begun paying down the senior notes as principal was collected. Through December 31, 2014, \$187.9 million of the Class A-1 senior notes had been paid down. In June 2015, Apidos CDO III was liquidated and, as a result, substantially all of the assets were sold. The remaining assets have been classified as held for sale as of June 30, 2015. Total proceeds from the sale of these assets, plus proceeds from previous sales and paydowns were used to pay down the notes in full.

In February 2014, we acquired the rights to manage the assets held by Moselle CLO S.A. and had the right to call the notes anytime after January 6, 2010 until maturity. We exercised the right in November 2014, substantially liquidating the securitization's assets. Proceeds from the sale of these assets, plus those from previous sales and paydowns in the CLO, were used to pay down the senior notes in full.

In February 2015, we closed Resource Capital Corp. 2015-CRE3, or RCC 2015-CRE3, a \$346.2 million CRE securitization transaction that provided financing for transitional CRE loans. The investments held by RCC 2015-CRE3 collateralized \$318.5 million of senior notes issued by the securitization, of which RCC Real Estate, a subsidiary of ours, purchased 100% of the Class E and Class F Senior Notes for \$36.4 million at closing. Additionally, Resource Real Estate Funding 2015-CRE3 Investor, LLC, a subsidiary of RCC Real Estate, purchased as \$27.7 million equity interest representing 100% of the outstanding preference shares. At March 31, 2015, the notes issued to outside investors had a weighted average borrowing rate of 2.07%. There is no reinvestment period for RCC 2015-CRE3,

[\(Back to Index\)](#)

98

[\(Back to Index\)](#)

which will result in the sequential paydown of notes as the underlying collateral matures and pays down, and none of the securitization's notes have been paid down as of March 31, 2015. There is no reinvestment period in RCC 2015-3; however, principal repayments, for a period ending in February 2017, may be used to purchase funding participations with respect to existing collateral held outside of the securitizations.

8% Convertible Senior Notes

In January 2015, we issued and sold in a public offering \$100.0 million aggregate principal amount of our 8.0% Convertible Senior Notes due 2020, ("8.0% Convertible Senior Notes"). The 8.0% Convertible Senior Notes are convertible at the option of the holder at a current conversion rate of 187.4414 common shares per \$1,000 principal amount of 8.0% Convertible Senior Notes (equivalent to an initial conversion price of 5.34 per common share). Upon conversion of 8.0% Convertible Senior Notes by a holder, the holder will receive cash, our common shares or a combination of cash and our common shares, at our election.

After deducting a \$1.0 million underwriting discount and deferred debt issuance costs totaling \$2.1 million, we received approximately \$97.0 million of net proceeds. In addition, we recorded a discount of \$2.5 million on the 8.0% Convertible Senior Notes that reflects the difference between the stated value of the debt and the fair value of the notes as if they were issued without a conversion feature.

The aforementioned market discounts and the deferred debt issuance costs will be amortized on a straight-line basis as additional interest expense through maturity on January 15, 2020. Interest on the 8.0% Convertible Senior Notes is paid semi-annually.

Senior Secured Revolving Credit Agreement

On September 18, 2014, our wholly-owned subsidiary, Northport LLC, closed a \$110.0 million syndicated senior secured revolving credit facility ("Northport Credit Facility") with JP Morgan as agent bank to finance the origination of middle market and syndicated loans. The availability under the Northport Credit Facility was increased to \$125.0 million as of September 30, 2014 and again to \$140.0 million with an additional commitment from ING Bank early in March 2015. During the second quarter 2015, we entered into the first and second amendments of the Northport Credit Facility which increased the original commitment from \$225.0 million to \$300.0 million and secured \$85.0 million of additional availability, bringing the total available under the Northport Credit Facility to \$225.0 million as of June 30, 2015. As of June 30, 2015, \$151.0 million was outstanding on the Northport Credit Facility. Under the first amendment both the ability to access to draws on the Northport Credit Facility and maturity have been extended six months until March 31, 2018 and March 31, 2019, respectively.

Under the terms of the amendment the Northport Credit Facility applicable margins increased 25 basis points. The Northport Credit Facility bears interest rates, at the our election, on a per annum basis equal to (i) the applicable LIBOR rate plus 2.75% or (ii) the applicable base rate (prime rate of 3.25% as of June 30, 2015) plus 1.75%. During the six month period following September 18, 2014, we were charged a commitment fee on any unused balance of 0.375% per annum if the unused balance was greater than 35% of the total commitment or 0.50% per annum if it was less than 35% of the total commitment. Following that period, the commitment fee on any unused balance became 0.375% per annum if the outstanding balance is greater than 35% of the total commitment or 1.00% per annum if the outstanding balance is 35% or less of the total commitment. At June 30, 2015, there was an unused balance of \$74.0 million on the facility.

Amounts available to borrow under the Credit Facility are subject to compliance with a borrowing base computation that applies different advance rates to different types of assets held by Northport LLC that are pledged as collateral. Under the Northport Credit Facility, we made certain customary representations and warranties and is required to comply with various covenants, including leverage restrictions, reporting requirements and other customary requirements for similar credit facilities. At June 30, 2015, we are in compliance with all covenants under the agreement. We guarantee Northport LLC's performance of its obligations under the Northport Credit Facility.

Equity

Total equity at June 30, 2015 was \$892.6 million and gave effect to \$6.5 million of unrealized losses on our cash flow hedges and \$7.8 million of net unrealized gains on our available-for-sale portfolio, shown as a component of accumulated other comprehensive income. Equity at December 31, 2014 was \$952.1 million and gave effect to \$9.0 million of unrealized losses on cash flow hedges and \$15.4 million of net unrealized gains on our available-for-sale portfolio, shown as a component of accumulated other comprehensive loss. The decrease in equity during the six months ended June 30, 2015 was principally due to distributions on the Company's common stock and preferred stock.

Funds from Operations

We evaluate our performance based on several performance measures, including funds from operations, or FFO, and adjusted funds from operations, or AFFO, in addition to net income. We compute FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts as net income (computed in accordance with GAAP), excluding gains or losses on the sale of depreciable real estate, the cumulative effect of changes in accounting principles, real estate-related depreciation and amortization, and after adjustments for unconsolidated/uncombined partnerships and joint ventures.

AFFO is a computation made by analysts and investors to measure a real estate company's operating performance. We calculate AFFO by adding or subtracting from FFO the impact of non-cash accounting items as well as the effects of items that we deem to be non-recurring in nature. We deem transactions to be non-recurring if a similar transaction has not occurred in the past two years, and if we do not expect a similar transaction to occur in the next two years. We adjust for these non-cash and nonrecurring items to analyze our ability to produce cash flow from on-going operations, which we use to pay dividends to our shareholders. Non-cash adjustments to FFO include the following: impairment losses resulting from fair value adjustments on financial instruments; provisions for loan losses; equity investment gains and losses; straight-line rental effects; share based compensation expense; amortization of various deferred items and intangible assets; gains on sales of property that are wholly owned or owned through a joint

venture; the cash impact of capital expenditures that are related to our real estate owned; and REIT tax planning adjustments, which primarily relate to accruals for owned properties for which we made a foreclosure election and adjustments to tax estimates with respect to the final resolution of foreclosed property when it is listed for sale. In addition,

[\(Back to Index\)](#)

100

[\(Back to Index\)](#)

we calculate AFFO by adding and subtracting from FFO the realized cash impacts of the following: extinguishment of debt, reissuances of debt, sales of property and capital expenditures.

Management believes that FFO and AFFO are appropriate measures of our operating performance in that they are frequently used by analysts, investors and other parties in the evaluation of REITs. Management uses FFO and AFFO as measures of its operating performance, and believes they are also useful to investors because they facilitate an understanding of our operating performance apart from non-cash and non-recurring items, that may not necessarily be indicative of current operating performance and that may not allow accurate period to period comparisons of our operating performance.

While our calculations of AFFO may differ from the methodology used for calculating AFFO by other REITs and our FFO and AFFO may not be comparable to FFO and AFFO reported by other REITs, we also believe that FFO and AFFO may provide us and our investors with an additional useful measure to compare our performance with some other REITs. Neither FFO nor AFFO is equivalent to net income or cash generated from operating activities determined in accordance with GAAP. Furthermore, FFO and AFFO do not represent amounts available for management's discretionary use because of needed capital replacement or expansion, debt service obligations or other commitments or uncertainties. Neither FFO nor AFFO should be considered as an alternative to GAAP net income as an indicator of our operating performance or as an alternative to cash flow from operating activities as a measure of its liquidity.

Liquidity and Capital Resources

For the six months ended June 30, 2015, our principal sources of liquidity were: net proceeds from our 8.0% convertible notes offering on January 13, 2015, of \$97.0 million, the return of equity at the close of RCC 2015-CRE3 on February 24, 2015 of \$78.0 million, liquidation of Moselle CLO S.A. which returned \$30.0 million (which includes \$1.0 million of proceeds from forward currency contracts), cash flow from operations and \$3.0 million of net proceeds from the sale of our 8.25% Series B Preferred Stock through our at the market, or ATM, program in January 2015. These sources of liquidity principally constitute our \$145.0 million of unrestricted cash at June 30, 2015. In addition, we had capital available through a CMBS term facility to help finance the purchase of CMBS securities of \$70.1 million and \$425.3 million combined from two CRE term facilities for the origination of commercial real estate loans. During the second quarter 2015, we entered into the first and second amendments of Northport TRS LLC's Senior Secured Revolving Credit Agreement, or Northport Credit Facility, which increased the original commitment from \$225.0 million to \$300.0 million and secured \$85.0 million of additional availability, bringing the total available under the Northport Credit Facility to \$225.0 million as of June 30, 2015. As of June 30, 2015, \$151.0 million was outstanding on the Northport Credit Facility. Under the first amendment both the ability to access to draws on the Northport Credit Facility and maturity have been extended six months until March 31, 2018 and March 31, 2019 respectively. At June 30, 2015, there was an unused balance of \$74.0 million on the facility.

For the year ended December 31, 2014, our principal sources of liquidity were net proceeds from the June offering of our 8.625% Series C Preferred Stock of \$116.2 million and \$56.6 million of net proceeds from the sale of our 8.25% Series B Preferred Stock and 8.50% Series A Preferred Stock through our ATM program. For the year ended December 31, 2014, we also received \$30.3 million of sale proceeds from our common stock DRIP. We ended the year with \$79.9 million of unrestricted cash on hand, availability of \$392.6 million on our CRE term facilities and availability of \$70.1 million on our CMBS term facility as of December 31, 2014.

Our on-going liquidity needs consist principally of funds to make investments, make debt repurchases, make distributions to our stockholders and pay our operating expenses, including management fees. Our ability to meet our on-going liquidity needs will be subject to our ability to generate cash from operations and, with respect to our investments, our ability to maintain and/or obtain additional debt financing and equity capital together with the funds referred to above.

During the past 14 months, we have been meeting a significant portion of our debt funding requirements for CRE loans through securitizations. In February 2015, we closed a \$346.2 million CRE securitization, our third in the past 17 months, which brings our total to just in excess of \$1 billion of mortgage loans financed during that time frame. We expect to derive substantial operating cash from our equity investments in the securitizations, which do not have the same asset and interest coverage tests as are required by our CDOs. These CRE securitizations do not have a reinvestment periods; however, principal payments, for a stipulated period, may be used to purchase funding participations with respect to existing collateral held outside of the securitizations. This will allow us to recycle some capital repaid and convert the designated principal for funded companion participation acquisition cash which would otherwise be used to pay down the most senior notes and reduce leverage and potential returns within the securitization.

Historically, we have financed a substantial portion of our portfolio investments through CDOs that essentially match the maturity and repricing dates of these financing vehicles with the maturities and repricing dates of our investments, and, in view of current market conditions, we expect to continue to seek CDO financing for at least the next 12 months. We derive substantial operating cash from our equity investments in our CDOs which, if the CDOs fail to meet certain tests, will cease. Through June 30, 2015, we have not experienced difficulty in maintaining our existing CDO financing and have passed all of the critical tests required by these financings. However, we cannot assure you that we will continue CDO financing to meet all such critical tests in the future. If we are unable to renew, replace or expand our sources of existing financing on substantially similar terms, we may be unable to implement our investment strategies successfully and may be required to liquidate portfolio investments. If required, a sale of portfolio investments could be at prices lower than the carrying value of such assets, which would result in losses and reduced income.

Moselle CLO S.A. ⁽⁷⁾	\$28,911	\$2,891	N/A	N/A	N/A

* The above table does not include Apidos CDO I, Apidos CLO VIII or Whitney CLO I, as these CLOs were previously called and were substantially liquidated.

Distributions on retained equity interests in CDOs (comprised of note investments and preference share ownership) (1) and principal paydowns on notes owned; RREF CDO 2006-1 includes \$0 and \$4.2 million of principal paydowns during the six months ended June 30, 2015 and the year ended December 31, 2014, respectively.

(2) Interest coverage includes annualized amounts based on the most recent trustee statements.

(3) Interest coverage cushion represents the amount by which annualized interest income expected exceeds the annualized amount payable on all classes of CDO notes senior to the Company's preference shares.

(4) Overcollateralization cushion represents the amount by which the collateral held by the CDO issuer exceeds the maximum amount required.

Apidos CDO III was called on June 12, 2015 and substantially all of its assets were liquidated. The Company (5) received a return of principal of \$7.6 million. There is an estimated \$4.8 million of principal remaining to be distributed upon collection, which is expected during the period ended September 30, 2015.

Resource Capital Corp. 2015-CRE3 closed on February 24, 2015; the first distribution was in March 2015. There is (6) no reinvestment period for the securitization. Additionally, the indenture contains no interest coverage test provisions.

Moselle CLO S.A. was acquired on February 24, 2014 and the reinvestment period for this securitization expired (7) prior to the acquisition. In December 2014, the Company liquidated Moselle CLO S.A. and, as a result, all of the assets were sold.

At July 31, 2015, after paying our second quarter 2015 common and preferred stock dividends, our liquidity is derived from three primary sources:

- unrestricted cash and cash equivalents of \$124.0 million, restricted cash of \$1.6 million in margin call accounts and \$144,000 in the form of real estate escrows, reserves and deposits;

- capital available for reinvestment in one of our CRE CDOs of \$250,000 and one of our CRE securitizations of \$1.7 million, all of which is designated to finance future funding commitments on CRE loans; and
- loan principal repayments of \$59.5 million that will pay down outstanding CLO note balances as well as interest collections of \$2.4 million.

In addition, at July 31, 2015, we have financing of \$199.4 million available through a term financing facility to finance the origination of CRE loans and \$70.8 million available through a term financing facility to finance the purchase of CMBS. We also have \$52.0 million available through a middle market syndicated revolving credit facility to finance the direct origination of middle market loans and purchase of syndicated bank loans.

Our leverage ratio may vary as a result of the various funding strategies we use. As of June 30, 2015 and December 31, 2014, our leverage ratio was 2.0 times and 1.8 times, respectively. Our leverage has increased as a result of the increase in borrowings with the issuance of \$100.0 million 8.0% Convertible Senior Notes, increased leverage on our CRE portfolio with the close of RCC 2015-CRE3 and increased borrowings on our Northport JPM syndicate facility offset by a reduction of the Wells CRE term facility combined with run-off of CDO and CLO borrowings.

Distributions

In order to maintain our qualification as a REIT and to avoid corporate-level income tax on our income, we intend to make regular quarterly distributions of all or substantially all of our net REIT taxable income to holders of our common stock. This requirement can impact our liquidity and capital resources.

Contractual commitments do not include \$24.1 million, \$10.9 million and \$16.8 million of interest expense payable through the stated maturity dates of May 2020, August 2046, and September 2046, respectively, on Apidos (1) Cinco CDO, RREF 2006-1, and RREF 2007-1. The maturity date represents the contractually stated maturity date of the CDO notes.

(2) Contractual commitments include \$238,000 of interest expense payable through the maturity date on our repurchase agreements.

(3) Contractual commitments do not include \$42.9 million and \$43.9 million of estimated interest expense payable through the maturity dates of June 2036 and October 2036, respectively, on our trust preferred securities.

(4) Contractual commitments do not include \$24.0 million of interest expense payable through the maturity date of December 1, 2018 on our 6.0% convertible senior notes.

(5) Contractual commitments do not include \$36.9 million of interest expense payable through the maturity date of January 15, 2020 on our 8.0% convertible senior notes.

(6) Unfunded commitments on our originated CRE loans generally fall into two categories: (1) pre-approved capital improvement projects; and (2) new or additional construction costs subject, in each case, to the borrower meeting specified criteria. Upon completion of the improvements or construction, we would receive additional loan interest income on the advanced amount.

(7) The financing or credit agreements on our originated middle market loans, in some cases, allow for subsequent advances. All advances require compliance with the contractual criteria and terms as specifically described in the individual financing or credit agreement, and therefore are subject to the approval of the appropriate portfolio manager. Loans earn income, typically in the form of interest and fees, as specifically outlined in the documentation of each loan.

(8) Calculated only for the next 12 months based on our current equity, as defined in our management agreement. Our management agreement also provides for an incentive fee arrangement that is based on operating performance. Because the incentive fee is not a fixed and determinable amount, it is not included in this table.

(9) Contractual commitments on borrowings are presented net of deferred debt issuance costs.

At June 30, 2015, we had ten interest rate swap contracts with a notional value of \$147.8 million. These contracts are fixed-for-floating interest rate swap agreements under which we contracted to pay a fixed rate of interest for the term of the hedge and will receive a floating rate of interest. As of June 30, 2015, the average fixed pay rate of our interest rate hedges was 4.55% and our receive rate was either one-month or three-month, LIBOR, or 0.19% or 0.28%,

respectively.

Off-Balance Sheet Arrangements

General

As of June 30, 2015, we did not maintain any relationships with unconsolidated entities or financial partnerships that were established for the purpose of facilitating off-balance sheet arrangements or contractually narrow or limited purposes, although we do have interests in unconsolidated entities not established for those purposes. Except as set forth below, as of June 30, 2015, we had not guaranteed obligations of any such unconsolidated entities or entered into any commitment or letter of intent to provide additional funding to any such entities.

Unfunded Commercial Real Estate Loan Commitments

In the ordinary course of business, we make commitments to borrowers whose loans are in our commercial real estate loan portfolio to provide additional loan funding in the future. These commitments generally fall into two categories: (1) pre-approved capital improvement projects; and (2) new or additional construction costs. Disbursement of funds pursuant to these commitments is subject to the borrower meeting pre-specified criteria. Upon disbursement of funds, we receive loan interest income on any such advanced funds. As of June 30, 2015, we had 43 loans with unfunded commitments totaling \$104.5 million, of which \$1.8 million will be funded by restricted cash in RCC CRE Notes 2013 and \$250,000 will be funded by restricted cash in RREF CDO 2007-1; we intend to fund the remaining \$102.4 million through cash flow from normal operating activities and principal repayments on other loans in our portfolio and the ability to fund in our newest securitizations within a specified time period. These commitments are subject to the same underwriting requirements and ongoing portfolio maintenance as are the on-balance sheet financial instruments that we hold. Since these commitments may expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements.

Unfunded Middle Market Loan Commitments

During 2014, we began originating middle-market loans through RCC Commercial, Inc and Resource TRS, LLC. In September 2014, RCC Commercial and Resource TRS, LLC transferred all of the middle-market loans to a newly formed subsidiary of ours, Northport LLC. Resource America is paid origination fees in connection with our middle-market lending operations, and such fees may not exceed 2% of the loan balance for any loan originated. The executed agreements between us and borrowers within our portfolio contain commitments to provide additional loan funding in the future. These commitments generally fall into two categories: (1) revolving credit facility; and (2) additional notes commitments. Disbursement of funds pursuant to these commitments are subject to the borrower meeting pre-specified criteria and in some instances at our discretion. Upon disbursement of funds, we receive loan interest income on any such advanced funds. As of June 30, 2015, we had five loans with unfunded commitments totaling \$17.9 million, all of which would be funded by Northport LLC. We intend to fund these commitments through cash flow from normal operating activities. Since these commitments may expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements.

ITEM 3 . QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As of June 30, 2015, the primary component of our market risk was interest rate risk, as described below. While we do not seek to avoid risk completely, we do seek to assume risk that can be quantified from historical experience, to actively manage that risk, to earn sufficient compensation to justify assuming that risk and to maintain capital levels consistent with the risk we undertake or to which we are exposed.

Effect on Fair Value

A component of interest rate risk is the effect changes in interest rates will have on the fair value of our assets. We face the risk that the fair value of our assets will increase or decrease at different rates than that of our liabilities, including our hedging instruments.

We primarily assess our interest rate risk by estimating the duration of our assets and the duration of our liabilities. Duration essentially measures the market price volatility of financial instruments as interest rates change. We generally calculate duration using various financial models and empirical data. Different models and methodologies can produce different duration numbers for the same securities.

Edgar Filing: Resource Capital Corp. - Form 10-Q

The following sensitivity analysis tables show, at June 30, 2015 and December 31, 2014, the estimated impact on the fair value of our interest rate-sensitive investments and liabilities of changes in interest rates, assuming rates instantaneously fall 100 basis points and rise 100 basis points (dollars in thousands):

	June 30, 2015		
	Interest rates fall 100 basis points	Unchanged	Interest rates rise 100 basis points
CMBS – private placement ⁽¹⁾ :			
Fair value	\$ 174,642	\$ 172,799	\$ 171,006
Change in fair value	\$ 1,843		\$(1,793)
Change as a percent of fair value	1.07	%	(1.04)%
Hedging instruments:			
Fair value	\$(8,175)	\$(6,300)	\$(3,739)
Change in fair value	\$(1,875)		\$2,561
Change as a percent of fair value	(29.76)%		40.65 %
	December 31, 2014		
	Interest rates fall 100 basis points	Unchanged	Interest rates rise 100 basis points
CMBS – private placement ⁽¹⁾ :			
Fair value	\$ 197,580	\$ 194,823	\$ 192,146
Change in fair value	2,757		(2,677)
Change as a percent of fair value	1.42	%	(1.37)%
Hedging instruments:			
Fair value	\$(9,883)	\$(8,680)	\$(6,847)
Change in fair value	(1,203)		1,833
Change as a percent of fair value	(13.86)%		21.12 %

(1)Includes the fair value of available-for-sale investments that are sensitive to interest rate change.

For purposes of the table, we have excluded our investments with variable interest rates that are indexed to LIBOR. Because the variable rates on these instruments are short-term in nature, we are not subject to material exposure to movements in fair value as a result of changes in interest rates.

It is important to note that the impact of changing interest rates on fair value can change significantly when interest rates change beyond 100 basis points from current levels. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change beyond 100 basis points from current levels. In addition, other factors impact the fair value of our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, in the event of changes in actual interest rates, the change in the fair value of our assets would likely differ from that shown above and such difference might be material and adverse to our stockholders.

Risk Management

To the extent consistent with maintaining our status as a REIT, we seek to manage our interest rate risk exposure to protect our portfolio of fixed-rate commercial real estate mortgages and CMBS and related debt against the effects of major interest rate changes. We generally seek to manage our interest rate risk by:

- monitoring and adjusting, if necessary, the reset index and interest rate related to our mortgage-backed securities and our borrowings;

[\(Back to Index\)](#)

attempting to structure our borrowing agreements for our CMBS to have a range of different maturities, terms, amortizations and interest rate adjustment periods; and using derivatives, financial futures, swaps, options, caps, floors and forward sales, to adjust the interest rate sensitivity of our fixed-rate commercial real estate mortgages and CMBS and our borrowing which we discuss in “Financial Condition-Hedging Instruments.”

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act of 1934 reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Under the supervision of our Chief Executive Officer and Chief Financial Officer, we have carried out an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the three and six months ended June 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
