Islet Sciences, Inc. and Subsidiary
(A DEVELOPMENT STAGE COMPANY)
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Unaudited Interim financial statements

The accompanying unaudited interim condensed consolidated financial statements have been prepared by Islet Sciences, Inc. pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). In the opinion of management, all adjustments (which include only normal recurring adjustments except as noted in management's discussion and analysis of financial condition and results of operations) necessary to present fairly the financial position, results of operations and changes in cash flows have been made.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. It is suggested that these financial statements be read in conjunction with the 2013 financial statements and notes thereto included within the report on Form 10-K filed with the SEC on August 13, 2013. The results of operations for the three and nine months ended January 31, 2014, are not necessarily indicative of the operating results for the full year.

NOTE 1. DESCRIPTION OF BUSINESS

Description of Business

Islet Sciences, Inc., a Nevada corporation ("Islet Sciences"), is a biopharmaceutical company developing novel technologies for the diagnosis and treatment of patients suffering from diabetes. The Company is developing an encapsulated islet cell transplantation therapy for the treatment of type 1 diabetes and insulin-dependent type 2 diabetes. In addition, Islet Sciences is developing first-in-class immune-modulating small molecule drugs that protect insulin-producing beta-cells from cytokines responsible for cell destruction. These next generation immune modulators show promise to provide a new therapeutic approach to treat both type 1 or type 2 diabetes. Islet Sciences is also developing a PCR based molecular diagnostic measuring hypomethylated beta cell-derived DNA as a biomarker of beta cell loss due to autoimmune response responsible for the onset of type 1 diabetes or beta cell exhaustion associated with type 2 diabetes. Islet Sciences intends to continue its research and development efforts and ultimately to introduce products to the market.

Islet Sciences was incorporated under the name One E-Commerce Corporation on September 14, 1994 in the State of Nevada. Effective February 23, 2012, the Company changed its name to Islet Sciences, Inc. On March 14, 2012, Islet Sciences acquired DiaKine Therapeutics, Inc., a Delaware corporation ("DTI"). Islet Sciences together with its subsidiaries, Islet Sciences Inc., a Delaware corporation ("ISI"), and DTI are referred to as the Company.

Going Concern

The condensed consolidated financial statements have been prepared assuming the Company will continue as a going concern. As of January 31, 2014, the Company had cash of \$31,830. Further, the Company has incurred net losses of \$2,377,176 and negative operating cash flows of \$598,235 for the nine months ended January 31, 2014. Since inception, the Company has incurred operating losses of \$19,819,480 and has had negative operating cash flows of \$7,064,076. Further, several contracts and licenses the Company has had have been terminated as a result of management's determination that these contracts and licenses have no future value to the Company. The condensed consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

The Company's future cash requirements will depend on many factors, including continued scientific progress in our research and development programs, the scope and results of pre-clinical and clinical trials, the time and costs involved in obtaining regulatory approvals, the costs involved in filing, prosecuting and enforcing patents, competing technological and market developments, and the cost of product commercialization. The Company does not expect to generate a positive cash flow from operations at least until the commercial launch of its first product and possibly later given the expected spending for research and development programs and the cost of commercializing product candidates. The Company's continued operations will depend on its ability to raise funds through various potential sources such as debt and equity financing. There can be no assurance that such capital will be available on favorable terms or at all. If the Company is unable to raise additional capital, the Company will likely be forced to curtail its desired development activities, which would delay the development of its product candidates.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying condensed consolidated financial statements include the accounts of Islet Sciences and its wholly-owned subsidiaries, ISI and DTI. All significant intercompany balances have been eliminated.

The Company's planned principal operations have not yet commenced. Accordingly, the Company's activities have been accounted for as those of a development stage enterprise in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 915-10, Accounting and Reporting by Development Stage Enterprises (FASB ASC 915). All losses since inception have been considered as part of the Company's development stage activities.

Use of Estimates

The preparation of the condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include the recoverability of long-lived assets, the valuation of intangible assets and goodwill, the valuation of common stock, derivative liability, warrants and stock options and the valuation of deferred tax assets. Actual results could differ from those estimates.

Intangible Assets

A portion of the Company's intangible assets represent a patent acquired from a third party, which is recorded at cost and amortized over the remaining life of the patent. This patent was fully impaired and written off to expense during the quarter ended October 31, 2013. Intangible assets also include the purchase of DiaKine Therapeutics, Inc. patent portfolio and know-how as in-process research and development ("IPR&D"). IPR&D has an indefinite life and is not amortized until completion and development of the project, at which time the IPR&D becomes an amortizable asset. If the related project is not completed in a timely manner or the project is terminated or abandoned, the Company may have an impairment related to the IPR&D, calculated as the excess of the asset's carrying value over its fair value. The intangible assets with estimable useful lives are amortized on a straight line basis over their respective estimated useful lives to their estimated residual values. This method of amortization approximates the expected future cash flow generated from their use. Definite lived intangibles are reviewed for impairment in accordance with FASB ASC 360, Property, Plant and Equipment (FASB ASC 360).

Goodwill

Goodwill represents the excess of the purchase price over the estimated fair value of the identifiable assets acquired and liabilities assumed in business acquisitions. Goodwill is reviewed at least annually for impairment in the fourth quarter of the fiscal year, at the Company level, which is the sole reporting unit, and at any other time at which events occur or circumstances indicate that the carrying amount of goodwill may exceed its fair value. Such indicators would include a significant reduction in the Company's market capitalization, a decrease in operating results or a deterioration in the Company's financial position.

Impairment of Long-Lived Assets

The Company applies the provisions of FASB ASC 360, where applicable, to all long-lived assets. FASB ASC 360 addresses accounting and reporting for impairment and disposal of long-lived assets. The Company periodically evaluates the carrying value of long-lived assets to be held and used in accordance with FASB ASC 360. FASB ASC 360 requires impairment losses to be recorded on long-lived assets used in operations when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than the assets' carrying amounts. In that event, a loss is recognized based on the amount by which the carrying amount exceeds the fair market value of the long-lived assets. Loss on long-lived assets to be disposed of is determined in a similar manner, except that fair market values are reduced for the cost of disposal.

Loss Per Share Data

Basic loss per share is calculated based on the weighted average common shares outstanding during the period. Diluted earnings per share also give effect to the dilutive effect of restricted common stock and warrants. The Company does not present diluted earnings per share for years in which it incurred net losses as the effect is anti-dilutive.

At January 31, 2014, 371,250 unvested shares of restricted common stock and warrants to exercise 7,576,798 shares of common stock were outstanding, but were not included in the computation of diluted earnings per share as their effect would be anti-dilutive. At January 31, 2013, 3,389,584 unvested shares of restricted common stock and warrants to exercise 6,566,798 shares of common stock were outstanding, but were not included in the computation of diluted earnings per share as their effect would be anti-dilutive.

Research and Development

Research and development expenses consist of expenses incurred in performing research and development activities including salaries and benefits, facilities and other overhead expenses, contract services and other outside expenses. Research and development costs are charged to operations when incurred.

Stock Based Compensation

Stock awards

FASB ASC 718, Compensation-Stock Compensation (FASB ASC 718), requires the fair value of all share-based payments to employees, including grants of stock options, to be recognized in the statement of operations over the requisite service period. Under FASB ASC 718, employee option grants are generally valued at the grant date and those valuations do not change once they have been established. The fair value of each stock award is estimated on the date of grant using the then available price of shares that have most recently been traded or sold through a private offering and the portion that is ultimately expected to vest is recognized as compensation cost over the requisite service period. The Company accounts for share-based payments to non-employees, with guidance provided by FASB ASC 505-50, Equity-Based Payments to Non-Employees (FASB ASC 505). The Company has not issued any stock options to-date.

Warrants

Warrants granted to service providers are normally valued at the fair value of the instrument on the date of the grant (grant date) and are recognized in the statement of operations over the requisite service period or when they vest. When the requisite service period precedes the grant date and a market condition exists in the warrant, the Company

values the warrant using the Black-Scholes Method. Warrants issued in connection with capital raises are normally valued at the fair value of the instrument on the date of the grant (grant date) and valued for disclosure purposes if they meet all the criteria under FASB ASC 718. The Company values these warrant using the Black-Scholes Method as well. As allowed by FASB ASC 718 for companies with a short period of publicly traded stock history, the Company's estimate of expected volatility is based on the average volatilities of a sampling of companies with similar attributes to the Company, including industry, stage of life cycle, size and financial leverage. The risk-free rate for periods within the contractual life of the warrant is based on the U.S. Treasury yield curve in effect at the time of grant valuation.

Segment Reporting

The Company currently operates in a single operating segment. In addition, financial results are prepared and reviewed by management as a single operating segment. The Company continually evaluates its operating activities and the method utilized by management to evaluate such activities and will report on a segment basis if and when appropriate to do so.

NOTE 3. INTANGIBLE ASSETS AND GOODWILL

On May 4, 2010, the Company was assigned the intellectual property rights for a patent that was issued on December 1, 1999. The rights to this patent were purchased out of the bankruptcy proceedings of MicroIslet, Inc. for \$200,000 and then assigned to ISI in exchange for the issuance of 3,000,000 shares of common stock. The patent is being amortized based on the remaining life of the patent, which was 6.5 years at May 4, 2010, the date of assignment. The amount amortized to expense was \$7,061 per fiscal quarter. The Company does not expect to realize economic benefit from the claims associated with this intellectual property, therefore, the Company incurred an impairment of this asset of \$93,586 during the nine months ended January 31, 2014.

On March 14, 2012, the Company acquired the IPR&D from DiaKine Therapeutics, Inc. As of January 31, 2014, \$1.3 million of acquired IPR&D including a \$547,000 derivative tax liability is classified as an indefinite life asset which is not being amortized. In conjunction with this acquisition, the Company recognized \$2.1 million of goodwill. The Company has not identified any triggering events at January 31, 2014 that would require additional analysis for potential impairment of its intangible asset and goodwill.

NOTE 4. STOCKHOLDERS' EQUITY

On July 31, 2013, an aggregate of 247,500 shares of its common stock issuable to members of the Board of Directors fully vested. The Company valued these shares based on the July 31, 2013 share price of \$0.40 per share, or \$99,000, and recorded it to accrued stock compensation expense until the common stock is issued. The Company has included these costs as general and administrative expenses within the condensed consolidated statements of operations for the nine months ended January 31, 2014.

On July 31, 2013, an aggregate of 350,000 shares of its common stock issuable to members of the Scientific Advisory Board fully vested. The Company valued these shares based on the July 31, 2013 share price of \$0.40 per share, or \$140,000, and recorded it to accrued stock compensation expense until the common stock is issued. The Company has included these costs as general and administrative expenses within the condensed consolidated statements of operations for the nine months ended January 31, 2014.

On August 20, 2013, an aggregate of 200,000 shares of its common stock issuable to members of the Scientific Advisory Board fully vested. The Company valued these shares based on the October 31, 2013 share price of \$0.40 per share, or \$80,000, and recorded it to accrued stock compensation expense until the common stock is issued. The Company has included these costs as research and development expenses within the condensed consolidated statements of operations for the nine months ended January 31, 2014.

On October 31, 2013, an aggregate of 185,625 shares of its common stock issuable to members of the Board of Directors fully vested. The Company valued these shares based on the October 31, 2013 share price of \$0.25 per share, or \$46,406, and recorded it to accrued stock compensation expense until the common stock is issued. The Company has included these costs as general and administrative expenses within the condensed consolidated statements of operations for the nine months ended January 31, 2014.

At April 30, 2013, the Company had an indemnification agreement with a third-party, whereby, the Company received \$80,000 in cash for shares of common stock of the Company that were to be provided by the same third party. On October 31, 2013, the Company was notified that the third-party did not transfer shares of Company common stock in accordance with the terms of the agreement. The Board of Directors has approved the issuance of Company common stock to fulfill the requirements of the indemnification agreement. On November 19, 2013, the Company issued 320,000 shares of common stock to satisfy its subscribed shares valued at \$80,000. For the nine months ended January 31, 2014, the Company has recorded \$80,000 in general and administrative expense within the

condensed consolidated statements of operations.

10

On October 30, 2013, as part of the employee agreements with the new CEO and COO, the Board of Directors granted each of them an option to purchase 1.5 million shares of Company common stock at an exercise price of \$0.265. These options vest at various times over the next 18 months.

On December 4, 2013, the Company received net proceeds of \$41,500 for the sale of 200,000 shares of common stock at \$0.25 per share as part of a private offering. The investors in the private offering were also issued for no additional consideration, warrants to purchase 100,000 shares of common stock at an exercise price of \$0.35 per share. The warrants were valued at approximately \$39,000 based on the assumptions used in Note 2. The Company has not issued these shares as of January 31, 2014 and has recorded these proceeds as subscribed shares - not issued. The Company issued these shares on February 11, 2014.

On January 7, 2014, the Company received net proceeds of \$56,700 for the sale of 260,000 shares of common stock at \$0.25 per share as part of a private offering. The investors in the private offering were also issued for no additional consideration, warrants to purchase 130,000 shares of common stock at an exercise price of \$0.35 per share. The warrants were valued at approximately \$50,000 based on the assumptions used in Note 2. The Company has not issued these shares as of January 31, 2014, and has recorded these proceeds as subscribed shares - not issued. The Company issued these shares on February 11, 2014.

On January 8, 2014, the Company issued 700,000 shares of Company common stock as part of a collateral agreement for the benefit of the legal firms that are representing the Company in the Sand Dollar Partners, LLC complaint in the Superior Court of Arizona and the complaint that was filed against the Company and John Steel for infringement and misappropriation of MicroIslet patent in the United States District Court for the District of Utah, Central Division (see Note 5). These shares are to be held in escrow to secure payment of the legal fees incurred in the defense of the complaint. Since these shares are being held in escrow until a future date to potentially satisfy the Company's obligations, the Company has recorded these shares at par value or \$700 to prepaid expenses. If common stock shares are issued from escrow to pay the legal fees, the common stock will be valued on the date of settlement. Legal fees incurred relating to this matter are included in accounts payable on the accompanying condensed consolidated balance sheet.

On January 17, 2014, the Company received net proceeds of \$206,300 for the sale of 940,000 shares of common stock at \$0.25 per share as part of a private offering. The investors in the private offering were also issued for no additional consideration, warrants to purchase 470,000 shares of common stock at an exercise price of \$0.35 per share. The warrants were valued at approximately \$182,000 based on the assumptions used in Note 2. The Company has not issued these shares as of January 31, 2014, and has recorded these proceeds as subscribed shares - not issued. The Company issued these shares on February 11, 2014.

On January 27, 2014, the Company received net proceeds of \$135,900 for the sale of 620,000 shares of common stock at \$0.25 per share as part of a private offering. The investors in the private offering were also issued for no additional consideration, warrants to purchase 310,000 shares of common stock at an exercise price of \$0.35 per share. The warrants were valued at approximately \$120,000 based on the assumptions used in Note 2. The Company has not issued these shares as of January 31, 2014, and has recorded these proceeds as subscribed shares - not issued. The Company issued these shares on February 11, 2014.

On January 31, 2014, an aggregate of 185,625 shares of its common stock issuable to members of the Board of Directors fully vested. The Company valued these shares based on the January 31, 2014 share price of \$0.55 per share, or \$102,094, and recorded it to accrued stock compensation expense until the common stock is issued. The Company has included these costs as general and administrative expenses within the condensed consolidated statements of operations for the three and nine months ended January 31, 2014.

On January 24, 2014, the Board of Directors approved the termination of the existing Scientific Advisory Board (“SAB”). The SAB members will not be entitled to the 550,000 unvested shares.

NOTE 5. COMMITMENTS AND CONTINGENCIES

Contracts

On January 10, 2012, the Company entered into an agreement with Progenitor Cell Therapy (“PCT”), which was amended by an agreement dated May 15, 2012 by and between the Company and NeoStem, PCT’s parent company. Under the agreements, PCT provided the protocols, procedures, systems, equipment, testing, quality controls, and manufacturing and distribution services to support the development and commercialization of the Company’s encapsulated porcine islet cells for the treatment of diabetes. On February 7, 2013, the Company sent to NeoStem a termination letter, terminating the agreement with Progenitor Cell Therapy, Inc. dated January 10, 2012. The Company and NeoStem are still in negotiations on terms of the termination.

On July 23, 2012, the Company entered into a long-term supply agreement with Spring Point Project, a source animal facility to purchase pigs for use in the Company’s xenotransplantation research. During the nine months ended January 31, 2014 the Company expensed as research and development expense within the condensed consolidated statements of operations of approximately \$350,000 related to this contract. On August 12, 2013, the Company received from Spring Point Project a notice of termination of the supply agreement, effective November 10, 2013, unless the Company cures the default before that date. The default was not cured and the agreement with Spring Point Project has been terminated.

In August 2012, the Company entered into an agreement with the Regents of the University of California, Los Angeles, (“UCLA”), whereby UCLA will provide work dealing with small molecule mediated porcine islet proliferation. Work under this agreement will be performed for a period of six months with an estimated cost of \$23,100. The Company has continued to work with UCLA on a month to month basis. During the nine months ended January 31, 2014, the Company expensed as research and development expense within the condensed consolidated statements of operations of approximately \$19,000, related to this contract.

In May 2013, the Company entered into a sales and services agreement with the Regents of the University of California, Irvine (“UCI”) to provide materials consisting of isolated islets to be supplied to the Spring Point Project. During the nine months ended January 31, 2014, the Company expensed as research and development expense within the condensed consolidated statements of operations of approximately \$73,000, related to this contract.

In September 2013, the Company entered into a consulting agreement with American Capital Ventures, Inc. to provide consulting services for implementation of the Company’s corporate and business development plan and to plan review and create corporate communications. On September 12, 2013, 200,000 shares vested and were valued at \$0.29 per share, or \$58,000 and recorded to accrued stock compensation expenses until the common stock was issued. The Company terminated this agreement on January 23, 2014. The Company will issue 25,000 shares valued at \$0.60 per share of common stock as part of the termination agreement. An adjustment of \$43,000 was made to accrued stock compensation expenses and has included this adjustment in general and administrative expenses within the condensed consolidated statements of operations for the three and nine months ended January 31, 2014. The Company issued the shares on February 11, 2014.

Licenses

On May 2, 2012, the Company, entered into a license agreement with the Yale University (“Yale”). Under the agreement, the Company received exclusive license to the technology patented by Yale. In consideration of the license granted under the agreement, the Company paid Yale a license issue royalty of \$10,000 (plus a \$10,000 annual renewal fee) and issued 20,000 shares of its common stock, and agreed to pay certain milestones royalties by issuing an aggregate of 160,000 shares of common stock. The Company also agreed to pay to Yale a royalty of 5% of net

sales. The agreement will expire automatically, on a country-by-country basis, on the date on which the last of the claims of the subject patents expires. The agreement can be terminated by Yale if the Company defaults on its obligations under the agreement and fails to cure such default within 60 days of a written notice by the university. The Company can terminate the agreement upon a six month notice subject to payment of all amounts due Yale under the agreement. During the three months ended January 31, 2014, the Company expensed approximately \$10,000. During the nine months ended January 31, 2014, the Company expensed approximately \$87,000 net a credit of approximately \$118,000 for current and past year services.

On July 23, 2012, the Company entered into a licensing agreement with the Winthrop University Hospital (“Winthrop”) to license certain patents and technology. In consideration of the license granted under the agreement, the Company agreed to pay to Winthrop a license issue royalty of \$10,000 (plus a \$10,000 annual renewal fee) and issue 20,000 shares of its common stock, and to pay certain milestones royalties by issuing an aggregate of 160,000 shares of common stock. The Company also agreed to pay to Winthrop a royalty of 5% of net sales. The agreement will expire automatically, on a country-by-country basis, on the date on which the last of the claims of the subject patents expires. It can be terminated by Winthrop if the Company defaults on its obligations under the agreement and fails to cure such default within 60 days of a written notice by the university. The Company can terminate the agreement upon a six month notice subject to payment of all amounts due Winthrop under the agreement. During the nine months ended January 31, 2014, the Company expensed as research and development expense within the condensed consolidated statements of operations of approximately \$62,000, related to this contract. The Company is currently in default regarding its payment obligations under the foregoing license and research agreements.

On January 22, 2014, the Company terminated its licensing agreement dated, July 25, 2012, with The Regents of The University of California, Los Angeles. The total amount due is \$2,688.

Related Party Transactions

The Company borrowed \$25,880 from its former CEO. Promissory notes were issued for these amounts. No repayments have been made as of January 31, 2014.

During the nine months ended January 31, 2014, one of the Company’s Board Members loaned the Company a total of \$76,452. A promissory note was issued for this amount. No repayments have been made as of January 31, 2014.

A contractor of the Company loaned the Company \$15,624. No repayments have been made as of January 31, 2014.

Litigation

In April 2012, Sand Dollar Partners, LLC, a shareholder of the Company filed a complaint in the Superior Court of Arizona, Pima County against, among other parties, ISI, DTI, John Steel, the Company’s former CEO and Director, and Jonathan Lakey, the Company’s Director. In 2010, Sand Dollar invested \$357,000 in ISI through the purchase of a convertible promissory note which was converted into 3,591,729 shares of the Company’s common stock. The plaintiff contended that it was entitled to issuance of additional shares and nomination of one board member.

On October 25, 2013 the Company entered into a settlement agreement with Sand Dollar Partners, LLC, whereby, it agreed to pay a total of \$500,000 by January and April of 2014 and issue 100,000 warrants that will vest over the next three years. The warrants were valued at \$14,288 which the Company expensed as general and administrative expense within the condensed consolidated statement of operations for nine months ended January 31, 2014. Upon payment of \$500,000 by the Company, 3,591,729 shares held by Sand Dollar will be cancelled. The stock certificate representing such shares is to be surrendered by Sand Dollar to an escrow agent to be held in escrow pending the payment of its obligations under the settlement agreement by the Company. Under the settlement agreement, the escrow agent is authorized to retain on behalf of Sand Dollar the broker-dealer named in the agreement to sell the shares for net proceeds of at least \$500,000 to be credited towards the Company’s obligations under the agreement.

At a hearing on February 21, 2014, the Company and Sand Dollar agreed to amend the settlement agreement according to the following additional terms: (i) the first settlement installment payment was increased from \$242,000 to \$245,000, which covers any accrued interest, (ii) the interest rate on any late settlement payments was increased to 10%, or the highest interest rate permitted by California law, whichever is lower; (iii) the second settlement installment payment by the Company of \$258,000 remains due on April 9, 2014; (iv) a third settlement installment of \$30,000 is now due from the Company to Sand Dollar on May 15, 2014; (v) the total number of warrants to be issued to Sand Dollar was increased from 100,000 warrants to 130,000.

The Company made a payment of \$245,000 as its first installment per the settlement agreement on January 29, 2014. The amount was recorded to prepaid expenses on the accompanying condensed consolidated balance sheet until the surrender of the Sand Dollar stock certificate as per the agreement. Based on the current trading price of the Company's common stock, management believes proceeds received from the sale of the common stock in escrow will exceed the remaining settlement amount of \$255,000, and thus, no liability has been recorded for this settlement.

In July 2012, a complaint was filed against the Company and John Steel for infringement and misappropriation of MicroIslet patent in the United States District Court for the District of Utah, Central Division. The plaintiffs contend that they were the actual purchasers of the MicroIslet patent out of MicroIslet's bankruptcy proceedings in 2009 and that the respective intellectual property rights have been never assigned to either ISI or the Company. As a result, they allege that the Company's claim to the ownership of the MicroIslet patent based on the assignment of the patent by its founders are baseless. The complaint seeks monetary damages including punitive damages of at least \$12 million, costs, attorneys' fees, and declaratory judgment. The complaint filed in Utah has been dismissed without prejudice. On April 18, 2013, the Company, the plaintiffs and certain other parties thereto entered into a settlement agreement. Because of a subsequent failure of certain outside parties to the settlement agreement to fulfill their obligations thereunder, the settlement has not been completed and as a result, the plaintiffs withdrew from it. On July 3, 2013, the plaintiffs filed an amended complaint in the United States District Court for the District of Utah, Central Division. Management believes the plaintiffs' claims to be without merit and intends to vigorously defend against this action.

NOTE 6. SUBSEQUENT EVENTS

On February 11, 2014, the Company issued 2,020,000 shares of common stock relating to the shares sold in the private offerings in Note 4 and warrants to purchase 1,010,000 shares of common stock at an exercise price of \$0.35 per share.

On February 13, 2014, as compensation for the new Board of Director, the Board of Directors granted to the new Board Member 70,000 shares of its common stock valued at \$0.32 per share or \$22,400.

On February 20, 2014, the Company received net proceeds of \$166,700 for the sale of 760,000 shares of common stock at \$0.25 per share as part of a private offering. The investors in the private offering were also issued for no additional consideration, warrants to purchase 380,000 shares of common stock at an exercise price of \$0.35 per share. The warrants were valued at approximately \$113,000 based on the assumptions used in Note 2. The shares and the warrants were issued on February 25, 2014.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION.

CERTAIN STATEMENTS IN THIS REPORT, INCLUDING STATEMENTS IN THE FOLLOWING DISCUSSION, ARE WHAT ARE KNOWN AS "FORWARD-LOOKING STATEMENTS", WHICH ARE BASICALLY STATEMENTS ABOUT THE FUTURE. FOR THAT REASON, THESE STATEMENTS INVOLVE RISK AND UNCERTAINTY SINCE NO ONE CAN ACCURATELY PREDICT THE FUTURE. WORDS SUCH AS "PLANS", "INTENDS", "WILL", "HOPES", "SEEKS", "ANTICIPATES", "EXPECTS" AND THE LIKE OFTEN IDENTIFY SUCH FORWARD-LOOKING STATEMENTS, BUT ARE NOT THE ONLY INDICATION THAT A STATEMENT IS A FORWARD-LOOKING STATEMENT. SUCH FORWARD-LOOKING STATEMENTS INCLUDE STATEMENTS CONCERNING OUR PLANS AND OBJECTIVES WITH RESPECT TO THE PRESENT AND FUTURE OPERATIONS OF THE COMPANY, AND STATEMENTS WHICH EXPRESS OR IMPLY THAT SUCH PRESENT AND FUTURE OPERATIONS WILL OR MAY PRODUCE REVENUES, INCOME OR PROFITS. NUMEROUS FACTORS AND FUTURE EVENTS COULD CAUSE THE COMPANY TO CHANGE SUCH PLANS AND OBJECTIVES OR FAIL TO SUCCESSFULLY IMPLEMENT SUCH PLANS OR ACHIEVE SUCH OBJECTIVES, OR CAUSE SUCH PRESENT AND FUTURE OPERATIONS TO FAIL TO PRODUCE REVENUES, INCOME OR PROFITS. THEREFORE, THE READER IS ADVISED THAT THE FOLLOWING DISCUSSION SHOULD BE CONSIDERED IN LIGHT OF THE DISCUSSION OF RISKS AND OTHER FACTORS CONTAINED IN THIS REPORT ON FORM 10-Q AND IN THE COMPANY'S OTHER FILINGS WITH THE SECURITIES AND EXCHANGE COMMISSION. NO STATEMENTS CONTAINED IN THE FOLLOWING DISCUSSION SHOULD BE CONSTRUED AS A GUARANTEE OR ASSURANCE OF FUTURE PERFORMANCE OR FUTURE RESULTS.

Unless the context otherwise requires, the "Company", "we," "us," and "our," refer to (i) Islet Sciences, Inc., a Nevada corporation; (ii) Islet Sciences, Inc., a Delaware corporation ("ISI"), and (iii) DiaKine Therapeutics, Inc. ("DTI"), a Delaware corporation.

Overview

Islet Sciences, Inc., a Nevada corporation ("Islet Sciences"), is a biopharmaceutical company developing novel technologies for the diagnosis and treatment of patients suffering from diabetes. The Company is developing an encapsulated islet cell transplantation therapy for the treatment of type 1 diabetes and insulin-dependent type 2 diabetes. In addition, Islet Sciences is developing first-in-class immune-modulating small molecule drugs that protect insulin-producing beta-cells from cytokines responsible for cell destruction. These next generation immune modulators show promise to provide a new therapeutic approach to treat both type 1 or type 2 diabetes. Islet Sciences is also developing a PCR based molecular diagnostic measuring hypomethylated beta cell-derived DNA as a biomarker of beta cell loss due to autoimmune response responsible for the onset of type 1 diabetes or beta cell exhaustion associated with type 2 diabetes. Islet Sciences intends to continue its research and development efforts and ultimately to introduce products to the market.

Recent Developments

On October 30, 2013, Mr. James Green accepted the Company's appointment as the Chief Executive Officer and Director of the Company, and the Company entered into an employment agreement with Mr. Green, dated October 30, 2013.

On October 30, 2013, Dr. William Wilkison accepted the Company's appointment as the Chief Operating Officer of the Company and as the Company's Board of Directors observer, and the Company entered into an employment

agreement with Dr. Wilkison dated October 30, 2013.

On January 3, 2014, Dr. Eric Barnett was appointed a member of the Board of Directors of the Company.

Going Concern

The condensed consolidated financial statements included elsewhere in this current report on Form 10-Q have been prepared assuming we will continue as a going concern. We incurred operating losses and negative operating cash flows through January 31, 2014, and as of that date our cash position was \$31,830. We have incurred net losses of \$2,377,176 and negative operating cash flows of \$598,935 for the nine months ended January 31, 2014. Further, several contracts and licenses we had have been terminated as a result of management's view that those contracts and licenses did not represent value for the Company. The condensed consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Our future cash requirements will depend on many factors, including continued scientific progress in our research and development programs, the scope and results of pre-clinical and clinical trials, the time and costs involved in obtaining regulatory approvals, the costs involved in filing, prosecuting and enforcing patents, competing technological and market developments, and the cost of product commercialization. We do not expect to generate a positive cash flow from operations at least until the commercial launch of our first product and possibly later given the expected spending for research and development programs and the cost of commercializing product candidates. Although we have had success in raising capital in the past, there cannot be any assurance that this success will continue in future periods which is necessary to fund our future capital requirements, research, and operations.

As the Company continues to execute its business strategy of developing its pipeline, it will continue to evaluate its goodwill and any determination of a reduction in value of the underlying intangibles will result in an impairment of goodwill. At this time, management does not believe there has been a reduction in value of intangibles associated with the Company's Goodwill.

Results of Operations

Three Months Ended January 31, 2014 and 2013

There were no revenues for the three months ended January 31, 2014 and 2013.

During the three month ended January 31, 2014, general and administrative expenses totaled \$303,187 compared to \$1,997,166 for the three months ended January 31, 2013. The primary reason for the reduction in general and administrative expenses was due to the reduced operating activity during the current quarter. General and administrative expenses for the three months ended January 31, 2014 included approximately \$177,000 for professional fees and approximately \$102,000 for stock compensation for the Board of Directors.

During the three months ended January 31, 2013, general and administrative expenses totaled \$1,997,166. General and administrative expenses consisted of professional fees incurred during the our continued costs in seeking additional funding, legal costs associated with litigation matters (both settled and ongoing) of approximately \$160,000, Director and executive stock compensation in the amount of approximately \$1,250,000, consulting expenses in the amount of approximately \$321,000, and travel expenses of approximately \$170,000.

During the three months ended January 31, 2014, research and development expenses totaled \$60,671 compared to \$796,494 for the three months ended January 31, 2013. The research and development expenses were reduced due to a negotiated termination of a license agreement and other credits totaling \$25,300. During this period, consulting expenses totaled approximately \$85,000.

During the three months ended January 31, 2013, research and development expenses totaled \$796,494. Research and development expenses resulted from the continued development of protocols for the treatment and commercialization of patented technologies. This includes monthly charges of \$93,000-\$117,000 under the PCT contract plus common stock issued under the agreement, resulting in expenses of approximately \$57,000 and \$100,000 per month for the supply of designated pathogen free pigs and other various contracted services.

Nine Months Ended January 31, 2014 and 2013

There were no revenues for the nine months ended January 31, 2014 and 2013.

During the nine months ended January 31, 2014, general and administrative expenses totaled \$1,448,539 compared to \$7,316,496 for the same period in 2013. The primary reason for the decrease in general and administrative expenses was due to lower professional fees and consulting fees for the nine month period. General and administrative expenses consisted of professional and consulting fees of approximately \$932,000, stock compensation expense for the Board of Directors and consultants of approximately \$262,000, travel expenses of approximately \$56,000, settlement of a past indemnification agreement of \$80,000 and impairment expense of the intangible asset of approximately \$94,000.

During the nine months ended January 31, 2013, general and administrative expenses totaled \$7,316,496. General and administrative expenses consisted of professional fees incurred during the negotiations and execution of significant supplier agreements, our continued costs in seeking additional funding, legal costs associated with litigation matters (both settled and ongoing) of approximately \$628,000, a consulting agreement with a financial advisor in the amount of \$525,000, Director and executive stock compensation in the amount of approximately \$1.8 million, the settlement of a placement agent dispute in the amount of approximately \$2.5 million, consulting expenses in the amount of approximately \$328,000, and travel expenses of approximately \$440,000.

During the nine months ended January 31, 2014, research and development expenses totaled \$826,672 compared to \$2,819,790, for the same period in 2013. The primary reason for the decrease in research and development expenses was due to the limited capital available to perform any such activities. In addition, the Company negotiated the termination of a research grant and obtained credits totaling approximately \$167,000. The research and development expenses were also reduced due to the reduction of the derivative liability for NeoStem by approximately \$54,000. The Company incurred consulting expenses of approximately \$142,000 and work performed by universities amounting to approximately \$279,000. Development of protocols for the treatment and commercialization of patented technologies relating to the Spring Point Project were approximately \$350,000 and were reduced due to the termination of their contracts. Scientific Advisory Board expenses were approximately \$276,000 which includes stock compensation expense of \$220,000.

During the nine months ended January 31, 2013, research and development expenses totaled \$2,819,790. Research and development expenses resulted from the continued development of protocols for the treatment and commercialization of patented technologies. This includes monthly charges of \$93,000-\$117,000 under the PCT contract plus common stock issued under the agreement resulting in an expense of approximately \$313,000 and changes in the Company's derivative liability to PCT of approximately \$123,000, \$100,000 per month for the supply of designated pathogen free pigs which began in August, various tests and studies conducted by universities of approximately \$246,000, and other various licenses of approximately \$170,000.

During the nine months ending January 31, 2014, Management determined that the Company does not expect to realize economic benefit from the claims associated with the Microislet Intellectual Property; therefore, the Company incurred an impairment of this asset of \$93,586.

Liquidity and Capital Resources

We have historically financed our operations primarily through the issuance of common stock and debt. We have not generated revenues from sales of products and have had losses since inception. We anticipate that we will incur substantial additional operating losses in the future as we progress in our research and development programs. We do not expect to produce revenues from product sales for the foreseeable future so our revenues will be limited to research grants we are able to obtain.

Management has determined that to allow us to continue our operations, we will need additional funding, either through equity or debt financings or partnering arrangements, or we will be forced to curtail or cease operations. As of January 31, 2014, we had \$31,830 cash on hand.

Operating Activities

During the nine month periods ending January 31, 2014 and 2013, cash used in operating activities was \$598,235 and \$3,812,721, respectively. The decrease of cash used in operating activities is primarily attributable to the losses incurred, which were offset by non-cash adjustments and increases in accounts payable.

Financing Activities

We have financed our operating activities primarily from the proceeds of private placements of common stock. During the nine months ended January 31, 2014, there was \$520,400 of cash provided by financing activities from the private placement of common stock and \$106,076 of proceeds from the issuance of notes payable from related parties. During the nine months ended January 31, 2013, of the total net cash provided by financing activities, \$1,891,182 was from the net proceeds received from private placements of our common stock.

Critical Accounting Policies

Our significant accounting policies are disclosed in Note 2 to our condensed consolidated financial statements. Certain of our policies require the application of management judgment in making estimates and assumptions which affect the amounts reported in the financial statements and disclosures made in the accompanying notes. Those estimates and assumptions are based on historical experience and various other factors deemed to be applicable and reasonable under the circumstances. The use of judgment in determining such estimates and assumptions is by nature, subject to a degree of uncertainty. Accordingly, actual results could differ from the estimates made.

Off-Balance Sheet Arrangements

We do not have off-balance sheet arrangements, financings, or other relationships with unconsolidated entities or other persons, also known as "special purpose entities" (SPEs).

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We do not invest in or trade instruments that are sensitive to market risk. We also do not have any material foreign operations or foreign sales so we have no exposure to foreign currency exchange rate risk.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures.

The Securities and Exchange Commission defines the term "disclosure controls and procedures" to mean controls and other procedures of an issuer that are designed to ensure that information required to be disclosed in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Securities Exchange Act of 1934 is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. The Company maintains such a system of controls and procedures in an effort to ensure that all information which it is required to disclose in the reports it files under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified under the SEC's rules and forms and that information required to be disclosed is accumulated and communicated to principal executive and principal financial officers to allow timely decisions regarding disclosure.

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") (the Company's principal financial and accounting officer), of the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, the Company's CEO and CFO concluded that the Company's disclosure controls and procedures are not effective.

In our Annual Report, we indicated that we had a material weakness in our internal control over financial reporting due to the lack of sufficient controls in place to ensure that all disclosures required were addressed in our financial statements, lack of an internal audit function and lack of segregation of duties, all of which may result in ineffective oversight in the establishment and monitoring of required internal controls and procedures. Management believes that the appointment of additional management personnel will lead to increased oversight over the accounting and reporting function. We have added additional accounting personnel and as soon as we can raise sufficient capital or our operations generate sufficient cash flow, we will hire additional personnel to handle our accounting and reporting functions.

As a remediation initiative, the Company has implemented internal controls regarding the approval and payment of their payables, liabilities and any distribution of cash. All distribution of funds for payables must be documented, approved and authorized by the Company's CEO before payments are made. The Company has distributed responsibilities in processing payables to ensure review and correctness. These new procedures distribute the responsibility for approval of the distribution of all funds.

Changes in Internal Control over Financial Reporting.

There have been no changes in our internal control over financial reporting identified in connection with the evaluation that occurred during our last fiscal quarter that has materially affected, or that is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In April 2012, Sand Dollar Partners, L.L.C., a shareholder of the Company filed a complaint in the Superior Court of Arizona, Pima County against, among other parties, ISI, our wholly-owned subsidiary, John Steel, our former CEO and director, and Jonathan Lakey, our director. In 2010, Sand Dollar invested \$357,000 in ISI through the purchase of a convertible promissory note which was converted into 3,591,729 shares of the Company's common stock. The plaintiff contends that it was entitled to issuance of additional shares and nomination of one board member.

On October 25, 2013 the Company entered into a settlement agreement with Sand Dollar Partners, LLC, whereby, it agreed to pay a total of \$500,000 by January and April of 2014 and issue 100,000 warrants that will vest over the next three years. The warrants were valued at \$14,288 which the Company expensed as general and administrative expense within the condensed consolidated statement of operations for nine months ended January 31, 2014. Upon payment of \$500,000 by the Company, 3,591,729 shares held by Sand Dollar will be cancelled. The stock certificate representing such shares is to be surrendered by Sand Dollar to an escrow agent to be held in escrow pending the payment of its obligations under the settlement agreement by the Company. Under the settlement agreement, the escrow agent is authorized to retain on behalf of Sand Dollar the broker-dealer named in the agreement to sell the shares for net proceeds of at least \$500,000 to be credited towards the Company's obligations under the agreement.

At a hearing on February 21, 2014, the Company and Sand Dollar agreed to amend the settlement agreement according to the following additional terms: (i) the first settlement installment payment was increased from \$242,000 to \$245,000, which covers any accrued interest, (ii) the interest rate on any late settlement payments was increased to 10%, or the highest interest rate permitted by California law, whichever is lower; (iii) the second settlement installment payment by the Company of \$258,000 remains due on April 9, 2014; (iv) a third settlement installment of \$30,000 is now due from the Company to Sand Dollar on May 15, 2014; (v) the total number of warrants to be issued to Sand Dollar was increased from 100,000 warrants to 130,000.

The Company made a payment of \$245,000 as its first installment per the settlement agreement on January 29, 2014. The amount was recorded to prepaid expenses on the accompanying condensed consolidated balance sheet until the surrender of the Sand Dollar stock certificate as per the agreement. Based on the current trading price of the Company's common stock, management believes proceeds received from the sale of the common stock in escrow will exceed the remaining settlement amount of \$255,000, and thus, no liability has been recorded for this settlement.

In July 2012, a complaint was filed against the Company and John Steel for infringement and misappropriation of MicroIslet patent in the United States District Court for the District of Utah, Central Division. The plaintiffs contend that they were the actual purchasers of the MicroIslet patent out of MicroIslet's bankruptcy proceedings in 2009 and that the respective intellectual property rights have been never assigned to either ISI or the Company. As a result, they allege that the Company's claim to the ownership of the MicroIslet patent based on the assignment of the patent by its founders are baseless. The complaint seeks monetary damages including punitive damages of at least \$12 million, costs, attorneys' fees, and declaratory judgment. We believe the plaintiffs' claims to be without merit and intend to vigorously defend against this action.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

On January 8, 2014, the Company issued 700,000 shares of common stock as compensation to its legal counsel.

On February 11, 2014, the Company issued to investors 2,020,000 shares of common stock and warrants to purchase 1,010,000 shares of common stock at an exercise price of \$0.35 per share.

On February 25, 2014, the Company issued to investors 760,000 shares of common stock and warrants to purchase 380,000 shares of common stock at an exercise price of \$0.35 per share.

The foregoing issuances of the shares were effectuated pursuant to the exemption from the registration requirements of the Securities Act of 1933, as amended (the "Securities Act"), provided by Section 4(2) of the Securities Act and/or Regulation D promulgated thereunder.

The Company will use the proceeds to fund the continuation of its operations and payment of its accounts payables.

ITEM 5. OTHER INFORMATION

In December 2013 and January and February 2014, the Company consummated a private placement of an aggregate of 2,780,000 shares of common stock for gross proceeds of \$695,000 at a per share price of \$0.25 pursuant to a series of subscription agreements with a number of accredited investors. The investors in the private placement were also issued for no additional consideration warrants to purchase 1,390,000 shares of common stock at an exercise price of \$0.35 per share.

The subscription agreements contain representations and warranties of the Company and the investors which are customary for transactions of this type. It also obligates the parties to the agreements to indemnify each other for any losses arising out of any breach of the agreement or failure by such party to perform with respect to the representations, warranties or covenants contained in the agreement. The Company also granted to the investors piggy-back registration rights for their shares if the Company files a registration statement relating to an offering for its own account or the account of others of any of its equity securities (other than for an underwritten offering or on Form S-4 or Form S-8), provided that none of the shares may be sold at that time under Rule 144 under the Securities Act of 1933, as amended.

The foregoing description of the subscription agreements is qualified in its entirety by the form of the subscription agreement annexed hereto as Exhibit 10.1.
