## Item 2.02 Results of Operations and Financial Condition.

## SUMMARY ANNUAL MEETING 13 DECEMBER 2014

John C. Lawrence, President of the Company, told shareholders at the 2014 Annual Meeting, that USAC's mission is to capture 50% of the domestic market for antimony which is approximately 55,000,000 pounds per year. The Company's strategy, he said, has been to control the source of raw materials. "Historically, Bolivia, Mexico, and China controlled the raw material sources. Bolivia and Mexico became dormant due to low prices, and China assumed more than 90% of the world supply. Our strategy was to gain control of the significant Mexican antimony mines, construct two mills, and increase our smelting capacity in Mexico," Lawrence said.

Lawrence reported that the Company achieved an all time 9-month record production of 1,358,518 pounds and expects to produce more than 1,800,000 pounds during 2014. From Q2 until Q3 of 2014, the Company's antimony sales increased approximately 60%, he said. "Four new furnaces were added to the Mexican smelter by early Q4 at a cost of \$600,000," Lawrence said. "They will increase our Mexican production by 50%. The natural gas line at the Mexican smelter was connected during the latter part of Q3 at a cost of approximately \$1,800,000. This will reduce our Mexican costs by approximately \$.70 per pound and company-wide costs by \$.25 per pound."

Lawrence reported that USAC has entered into an agreement with Hillgrove Mines of Australia to purchase, process and sell 200 tons per month of a 60% antimony concentrate that contains 20 grams of gold per ton. There is a provision in the contract, Lawrence said, that would allow Hillgrove to triple their off-take to the Company. He noted that USAC has developed a leach process to make a high recovery of the silver and gold from Los Juarez concentrates. The leaching plant is expected to be permitted, installed and operating by the second half of 2015 Lawrence said.

During 2015, Lawrence reported, the Company is expecting to produce 4,500,000 to 5,000,000 pounds of antimony, while a Canadian off-take agreement should provide approximately 1,200,000 pounds. "Mexican production should provide 1,000,000 pounds per year and is growing fast," Lawrence said. "Hillgrove production should start in the first quarter of 2015 and reach an annualized production of 3,000,000 pounds of antimony with 1,500 ounces of gold."

At the Annual Meeting, Lawrence displayed the following information in graph form:

Antimony Sales in pounds	2011	2012	2013	Estimated 2014
