Introduction

Infinera Corporation (the “Company”) provides optical transport networking equipment, software and services to communications service providers, internet content providers, cable operators, subsea network operators and bandwidth wholesalers (collectively, “Service Providers”) across the globe. Optical transport networks are deployed by Service Providers facing significant demands for transmission capacity prompted by increased use of high-speed Internet access, mobile broadband, high-definition video streaming services, business Ethernet services, cloud-based services and wholesale bandwidth services. The Company calls its solution for Service Providers the Infinera Intelligent Transport Network.

The Company’s products include the (i) DTN platform; (ii) DTN-X platform; and (iii) ATN platform. The DTN, DTN-X and ATN platforms are built upon and connected to one another using an optical “line system,” which we refer to as the Infinera Line System, and collectively, which we refer to as the “Covered Products.”

The Company has adopted a Conflict Minerals Policy, which is available on its website at www.infinera.com. The content of any website referred to in this Form SD is included for general information only and is not incorporated by reference in this Form SD.
