China Precision Steel, Inc.
Notes to the Consolidated Financial Statements
(Unaudited)

1. Description of Business

China Precision Steel, Inc. (the “Company,” “CPSL” or “we”) is a steel processing company principally engaged in the manufacture and sale of cold-rolled precision steel products for downstream applications including automobile components and spare parts, kitchen tools, electrical appliances, roofing and food packaging materials. Raw materials, hot-rolled steel coils, will go through certain reduction, heating and cutting processing procedures to give steel coils or plates different thickness and specifications for deliveries in accordance with customers’ requirements. Specialty precision steel offers specific control of thickness, shape, width, surface finish and other special quality features that compliment the need for highly engineered end use applications. Precision steel pertains to the precision of measurements and tolerances of the above factors, especially thickness tolerance.

We have five wholly-owned subsidiaries, Partner Success Holdings Limited (“PSHL”), Blessford International Limited (“Blessford International”), Shanghai Chengtong Precision Strip Company Limited (“Chengtong”), Shanghai Blessford Alloy Company Limited (“Shanghai Blessford”) and Shanghai Tuorong Precision Strip Company Limited (“Tuorong”). The Company’s principal activities are conducted through our two operating subsidiaries, Chengtong and Shanghai Blessford with manufacturing facilities located in Shanghai, the People’s Republic of China (the “PRC”). The sole activity of Tuorong is the ownership of land use rights with respect to facilities utilized by Chengtong and Shanghai Blessford. PSHL and Blessford International are both British Virgin Islands companies with the sole purpose of investment holding.

2. Basis of Preparation of Financial Statements

The financial statements have been prepared in order to present the consolidated financial position and consolidated results of operations in accordance with generally accepted accounting principles in the United States of America (“US GAAP”) and are expressed in terms of US dollars (see Note 3 “Functional Currency and Translating Financial Statements” below).

In June and July 2012, the Company defaulted on the repayment obligations of its short-term and long-term bank loans totaling \$44,311,165. The Company is currently in discussions with its banks regarding the restructuring of these loans for repayment but has not yet agreed on specific terms. There can be no assurance that the Company will be able to successfully work out a repayment plan or otherwise fulfill its obligations under the loans. The uncertainty surrounding the successful restructuring of our bank loans and our current lack of readily available liquidity provided

by other third party sources raise substantial doubt about our ability to continue as a going concern. Our consolidated financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

The accompanying unaudited consolidated financial statements as of September 30, 2013 and for the periods ended September 30, 2013 and 2012 have been prepared in accordance with US GAAP and with the instructions to Form 10-Q and Regulation S-X applicable to smaller reporting companies. In the opinion of management, these unaudited consolidated financial statements include all adjustments considered necessary to make the financial statements not misleading. The results of operations for the three months ended September 30, 2013 are not necessarily indicative of the results to be expected for the full year ending June 30, 2014.

3. Summary of Significant Accounting Policies

The following is a summary of significant accounting policies:

Cash and Cash Equivalents – The Company considers all highly liquid debt instruments purchased with a maturity period of three months or less to be cash equivalents. The carrying amounts reported in the accompanying consolidated balance sheets for cash and cash equivalents approximate their fair value.

Accounts Receivable – Credit periods vary substantially across industries, segments, types and size of companies in the PRC where we operate our business. Because of the niche products that we process, our customers are usually also niche players in their own respective segment, who then sell their products to end product manufacturers. The business cycle is relatively long, as well as the credit periods. The Company offers credit to its customers for periods of 60 days, 90 days, 120 days and 180 days. We generally offer longer credit terms to long-standing recurring customers with good payment histories and sizable operations. Accounts receivable are recorded at the time revenue is recognized and are stated net of allowance for doubtful accounts.

Allowance for Doubtful Accounts – The Company maintains an allowance for doubtful accounts based on its assessment of the collectability of the accounts receivable. Management determines the collectability of outstanding accounts by maintaining regular communication with such customers and obtaining confirmation of their intent to fulfill their obligations to the Company. Management also considers past collection experience, our relationship with customers and the impact of current economic conditions on our industry and market. We note that the continuation or intensification of the credit tightening in China and the slowdown of the Chinese economy had and will continue to have negative consequences on the business operations of our customers and adversely impact their ability to meet their financial obligations. To reserve for potentially uncollectible accounts receivable, management has made a 50% provision for all accounts receivable that are over 180 days past due and full provision for all accounts receivable over 1 year past due. We also regularly review these credit periods, along with our collection experience and the other factors discussed above, to evaluate the adequacy of our allowance for doubtful accounts, and to make changes to the allowance, if necessary. If our actual collection experience or other conditions change, revisions to our allowances may be required, including a further provision which could adversely affect our operating income, or write back of provision when estimated uncollectible accounts are actually collected. At September 30, 2013 and June 30, 2013, the Company had \$35,802,825 and \$30,642,373 of allowances for doubtful accounts, respectively.

Bad debts are written off for past due balances over two years or when it becomes known to management that such amount is uncollectible. There was a provision for accounts receivable bad debts of \$5,065,438 and \$1,373,000 recognized for the three months ended September 30, 2013 and 2012, respectively.

Inventories – Inventories are stated at the lower of cost or market. Cost is determined using the weighted average method.

Cost of inventories comprises all costs of purchases, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Costs of conversion of inventories include fixed and variable production overheads, taking into account the stage of completion.

As of September 30, 2013 and June 30, 2013, the Company had \$940,453 and \$937,695 of inventory provision, respectively.

Intangible Assets and Amortization – Intangible assets represent land use rights in China acquired by the Company and are stated at cost less amortization and impairment, if any. Amortization of land-use rights is calculated on the straight-line method, based on the period over which the right is granted by the relevant authorities in China.

Advances to Suppliers – In order to ensure a steady supply of raw materials, the Company is required to regularly make cash advances to its suppliers when placing purchase orders, for a guaranteed minimum delivery quantity at future times when raw materials are required. The advance is seen as a deposit to suppliers and guarantees our access to raw materials during periods of shortages and market volatility, and is therefore considered an important component of our operations. Contracted raw materials are priced at prevailing market rates when the advance purchase contracts are entered into. Advances to suppliers are shown net of an allowance which represents potentially unrecoverable cash advances at each balance sheet date. Such allowances are based on an analysis of past raw materials receipt experience and the credibility of each supplier according to its size and background. Our allowances for advances to suppliers are subjective critical estimates that have a direct impact on reported net earnings, and are reviewed quarterly at a minimum to reflect changes from our historic raw materials receipt experience and to ensure the appropriateness of the allowance in light of the circumstances present at the time of the review. It is reasonably possible that the Company's estimate of the allowance will change, such as in the case when the Company becomes aware of a supplier's inability to deliver the contracted raw materials or meet its financial obligations. As of September 30, 2013 and June 30, 2013, the Company had made allowances of advances to suppliers of \$19,803,917 and \$19,689,609, respectively.

Allowances for advances to suppliers are written off when all efforts to collect the materials or recover the cash advances have been unsuccessful, or when it has become known to the management that there is no intention by the suppliers to deliver the contracted raw materials or refund the cash advances. There was a provision for advances to suppliers bad debts of \$56,339 and \$nil recognized for the three months ended September 30, 2013 and 2012, respectively.

Property, Plant and Equipment – Property, plant and equipment are stated at cost less accumulated depreciation. The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to its present working condition and location for its intended use.

Depreciation is computed on a straight-line basis over the estimated useful lives of the related assets for financial reporting purposes. The estimated useful lives for significant property and equipment are as follows:

Buildings	10 years
Plant and machinery	10 years
Motor vehicles	5 years
Office equipment	5 years

Repairs and maintenance costs are normally charged to the statement of operations in the year in which they are incurred. In situations where it can be clearly demonstrated that the expenditure has resulted in an increase in the future economic benefits expected to be obtained from the use of the asset, the expenditure is capitalized as an additional cost of the asset.

Impairment of Long-Lived Assets – The Company accounts for impairment of property, plant and equipment and amortizable intangible assets in accordance with ASC Topic No. 360 “Property, Plant and Equipment” (“ASC 360”), which requires the Company to evaluate a long-lived asset for recoverability when there is an event or circumstance that indicates the carrying value of the asset may not be recoverable. An impairment loss is recognized when the carrying amount of a long-lived asset or asset group is not recoverable (when carrying amount exceeds the gross, undiscounted cash flows from use and disposition) and is measured as the excess of the carrying amount over the asset’s (or asset group’s) fair value. We primarily use the income valuation approach to determine the fair value of our long-lived assets, with fair value being the price that would be received from selling an asset in an orderly transaction between market participants at the measurement date.

Capitalized Interest – The Company capitalizes interest cost on borrowings incurred during the new construction or upgrade of qualified assets. Capitalized interest is added to the cost of the underlying assets and is amortized over the useful lives of the assets. During the three months ended September 30, 2013 and 2012, the Company capitalized \$nil interest to construction-in-progress.

Construction-in-Progress – Plant and production lines currently under development are accounted for as construction-in-progress. Construction-in-progress is recorded at acquisition cost, including land rights cost, development expenditure, professional fees and the interest expenses capitalized during the course of construction for the purpose of financing the project. Upon completion and readiness for use of the project, the cost of construction-in-progress is to be transferred to property, plant and equipment.

Contingent Liabilities and Contingent Assets – A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. It can also be a present obligation arising from past events that is not recognized because it is not probable that outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

A contingent liability is not recognized but is disclosed in the notes to the financial statements. When a change in the probability of an outflow occurs so that outflow is probable, the contingency is then recognized as a provision.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain events not wholly within the control of the Company.

Contingent assets are not recognized but are disclosed in the notes to the financial statements when an inflow of economic benefits is probable. When inflow is virtually certain, an asset is recognized.

Advances from Customers – Advances from customers represent advance cash receipts from customers and for which goods have not been delivered or services have not been rendered at each balance sheet date. Advances from customers for goods to be delivered or services to be rendered in the subsequent period are carried forward as deferred revenue.

Revenue Recognition – Revenue from the sale of goods and services is recognized on the transfer of risks and rewards of ownership, which generally coincides with the time when the goods are delivered to customers and the title has passed and services have been rendered. Revenue is reported net of all VAT taxes. Other income is recognized when it is earned.

Functional Currency and Translating Financial Statements – The Company’s principal country of operations is the PRC. Our functional currency is Chinese Renminbi; however, the accompanying consolidated financial statements have been expressed in United States Dollars (“USD”). The consolidated balance sheets have been translated into USD at the exchange rates prevailing at each balance sheet date. The consolidated statements of operations and cash flows have been translated using the weighted-average exchange rates prevailing during the periods of each statement. The registered equity capital denominated in the functional currency is translated at the historical rate of exchange at the time of capital contribution. All translation adjustments resulting from the translation of the financial statements into the reporting currency are dealt with as other comprehensive income in stockholders’ equity.

Accumulated Other Comprehensive Income – Accumulated other comprehensive income represents the change in equity of the Company during the periods presented from foreign currency translation adjustments.

Taxation – Taxation on overseas profits has been calculated on the estimated assessable profits for the year at the rates of taxation prevailing in the country in which the Company operates.

United States

China Precision Steel, Inc. is subject to United States federal income tax at a tax rate of 34%. No provision for income taxes in the United States has been made as China Precision Steel, Inc. had no taxable income in three months ended September 30, 2013 and 2012.

At September 30, 2013 and June 30, 2013, the Company had no unrecognized income tax positions recorded. The Company does not expect its unrecognized tax positions to change significantly in the next twelve months. If unrecognized tax positions existed, the interest and penalties related to the unrecognized tax positions would be recorded as income tax expense in the consolidated statements of operation and comprehensive income.

The Company is subject to United States federal income taxes, as well as income taxes in various states and foreign jurisdictions. The Company's tax years 2009 through 2012 remain open to examination for U.S. federal income taxes. With few exceptions, the Company is no longer subject to state or non-U.S. income tax examinations prior to 2009.

BVI

PSHL and Blessford International were incorporated in the British Virgin Islands and, under the current laws of the British Virgin Islands, are not subject to income taxes.

PRC

Provision for the PRC enterprise income tax is calculated at the prevailing rate based on the estimated assessable profits less available tax relief for losses brought forward. The Company does not accrue taxes on unremitted earnings from foreign operations as it is the Company's intention to invest these earnings in the foreign operations indefinitely.

Enterprise income tax

On March 16, 2007, the National People's Congress of China passed The Enterprise Income Tax Law (the "New EIT Law"), and on December 6, 2007, the State Council of China passed the Implementing Rules for the EIT Law ("Implementing Rules") which took effect on January 1, 2008. The New EIT Law and Implementing Rules impose a unified enterprise income tax ("EIT") of 25% on all domestic-invested enterprises and foreign invested entities ("FIEs"), unless they qualify under certain limited exceptions. Therefore, nearly all FIEs are subject to the new tax rate alongside other domestic businesses rather than benefiting from the old FIE tax laws, and its associated preferential tax treatments, beginning January 1, 2008.

Despite these changes, the EIT Law gives the FIEs established before March 16, 2007 ("Old FIEs") a five-year grandfather period during which they can continue to enjoy their existing preferential tax treatments, commonly referred to as "tax holidays", until these holidays expire. As an Old FIE, Chengtong's tax holiday of a 50% reduction in the 25% statutory rates expired on December 31, 2008. Shanghai Blessford's full tax exemption from the enterprise income tax expired on December 31, 2009, and its 50% income tax reduction for the three subsequent years expired on December 31, 2012. Both Chengtong and Shanghai Blessford are currently subject to the 25% statutory rates. The discontinuation of any such special or preferential tax treatment or other incentives would have an adverse effect on any organization's business, fiscal condition and current operations in China.

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets, including tax loss and credit carry forwards, and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income tax expense represents the change during the period in the deferred tax assets and deferred tax liabilities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on their characteristics. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The Company follows the provisions of the ASC Topic No. 740 “Accounting for Income Taxes” and “Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109” (“ASC 740”). ASC 740 requires the recognition of tax benefits or expenses based on the estimated future tax effects of temporary differences between the financial statements and tax bases of its assets and liabilities. Deferred tax assets and liabilities primarily relate to tax basis differences on unrealized gains on corporate equities, stock-based compensation, amortization periods of certain intangible assets and differences between the financial statements and tax bases of assets acquired.

The Company recognizes that virtually all tax positions in the PRC are not free of some degree of uncertainty due to tax law and policy changes in the PRC. However, the Company cannot reasonably quantify political risk factors and thus must depend on guidance issued by current officials in the PRC.

Based on all known facts and circumstances and current tax law, the Company believes that the total amount of unrecognized tax benefits as of September 30, 2013 is not material to its results of operations, financial condition or cash flows. The Company also believes that the total amount of unrecognized tax benefits as of September 30, 2013, if recognized, would not have a material effect on its effective tax rate. The Company further believes that there are no tax positions for which it is reasonably possible, based on current Chinese tax law and policy, that the unrecognized tax benefits will significantly increase or decrease over the next 12 months producing, individually or in the aggregate, a material effect on the Company’s results of operations, financial condition or cash flows.

Value added tax

Under the Provisional Regulations of the People's Republic of China Concerning Value Added Tax and its Implementing Rules, value added tax is imposed on goods sold in or imported into the PRC and on processing, repair and replacement services provided within the PRC.

Value added tax payable in the PRC is charged on an aggregated basis at a rate of 13% or 17% (depending on the type of goods involved) on the full price collected for the goods sold or, in the case of taxable services provided, at a rate of 17% on the charges for the taxable services provided, but excluding, in respect of both goods and services, any amount paid in respect of value added tax included in the price or charges, and less any deductible value added tax already paid by the taxpayer on purchases of goods and services in the same financial year.

The revised People's Republic of China Tentative Regulations on Value Added Tax became effective on January 1, 2009 with the issuance of Order of the State Council No. 538. With the implementation of this VAT reform, input VAT associated with the purchase of fixed assets is now deductible against output VAT.

Retirement Benefit Costs – According to the PRC regulations on pension, Chengtong and Shanghai Blessford contribute to a defined contribution retirement scheme organized by municipal government in the province in which Chengtong and Shanghai Blessford were registered and all qualified employees are eligible to participate in the scheme. Contributions to the scheme are calculated at 37% of the employees' salaries above a fixed threshold amount and the employees contribute 11%, while Chengtong and Shanghai Blessford contribute the balance contribution of 26%. The Group has no other material obligation for the payment of retirement benefits beyond the annual contributions under this scheme.

For the three months ended September 30, 2013 and 2012, the Company's pension cost charged to the statements of operations under the plan amounted to \$71,010 and \$64,741, respectively, all of which have been paid to the National Social Security Fund.

Fair Value of Financial Instruments – The carrying amounts of certain financial instruments, including cash, accounts receivable, other receivables, short-term loans, accounts payable, accrued expenses, and other payables approximate their fair values as at September 30, 2013 and June 30, 2013 because of the relatively short-term maturity of these instruments. The Company considers the carrying amount of long-term loans to approximate their fair values based on the interest rates of the instruments and the current market rate of interest.

Use of Estimates – The preparation of financial statements in accordance with US GAAP requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates inherent in the preparation of the consolidated financial statements include allowance for doubtful accounts, provision for advances to suppliers bad debts, inventory and cost of sales, income taxes, and useful lives and impairment of long-lived assets.

4. Concentrations of Business and Credit Risk

The Company's list of customers whose purchases from us were 10% or more of total sales during the three months ended September 30, 2013 and 2012 is as follows:

a. Customers	2013		2012	
	\$	% to sales	\$	% to sales
ChangshuJiacheng Steel Plate Co., Ltd.	1,939,400	16	699,359	12
Hangzhou Pugang Steel Materials Co., Ltd.	1,290,449	11	-	*
Unimax& Far Corporation	-	*	* 637,147	11
Shanghai WoziJintian Blade Co., Ltd.	-	*	* 607,652	10

* *Not 10% customers for the relevant periods*

The Company's list of suppliers whose sales to us were 10% or more of our total purchases during the three months ended September 30, 2013 and 2012 is as follows:

b. Suppliers	2013		2012	
	\$	% to Purchases	\$	% to purchases
Maoxun Trading Co., Ltd.	4,064,780	37	-	* - *
ChangshuJiacheng Steel Plate Co., Ltd.	1,778,000	16	-	* - *
Zhongchuan Industrial Logistics Co., Ltd.	1,427,571	13	-	* - *
HebeiNuojin Trading Co., Ltd.	-	* -	* 1,611,038	29
Shanghai Tuoda Metal Materials Co., Ltd.	-	* -	* 1,174,399	21

** Not 10% suppliers for the relevant periods*

Our management continues to take appropriate actions to perform ongoing business and credit reviews of our customers to reduce our exposure to new and recurring customers who have been deemed to pose a high credit risk to our business based on their commercial credit reports, our collection history, and our perception of the risk posed by their geographic location.

5. Accounts Receivable

The Company provides credit in the normal course of business. The Company performs ongoing credit evaluations of its domestic and international customers and clients and maintains allowances for bad and doubtful accounts based on factors surrounding the credit risk of specific customers and clients, historical trends, and other information. Trade accounts receivable, net totaled \$24,264,027 and \$29,480,738 as of September 30, 2013 and June 30, 2013, respectively.

Accounts receivable are regularly reviewed for changes from the historic collection experience to ensure the appropriateness of the allowances. These estimates have been relatively accurate in the past and currently there is no need to revise such estimates. However, we will review such estimates more frequently when needed, and make revisions if necessary. The continuation or intensification of the credit tightening in China and the slowdown of the Chinese economy had and will continue to have negative consequences on the business operations of our customers and adversely impact their ability to meet their financial obligations to us. A significant change in our collection experience, deterioration in the aging of receivables and collection difficulties could require that we increase our estimate of the allowance for doubtful accounts. Any such additional bad debt charges could materially and adversely affect our future operating results.

6. Inventories

ASC 330-10-35, "Adjustments to Lower of Cost or Market", requires us to reduce the carrying value of inventory when there is evidence that the utility of goods will be less than cost, whether due to physical deterioration, obsolescence, changes in price levels or other causes. The Company recorded inventory write-downs in the amounts of \$nil and \$400,762 for the three months ended September 30, 2013 and 2012, respectively. These amounts were recognized as a loss of the current period.

As of September 30, 2013 and June 30, 2013, inventories consisted of the following:

	September 30, 2013	June 30, 2013
At cost:		
Raw materials	\$ 1,294,882	\$ 1,502,235
Work in progress	384,342	1,483,490
Finished goods	8,865,491	7,383,617
Consumable items	6,955,879	6,405,554
	17,500,594	16,774,896
Less: provision	(940,453)	(937,695)
	\$ 16,560,141	\$ 15,837,201

F-11

Costs of finished goods include direct labor, direct materials, and production overhead before the goods are ready for sale.

Consumable items represent parts used in our cold rolling mills and other equipment that need to be replaced from time to time when necessary to ensure optimal operating results, such as bearings and rollers.

Inventories amounting to \$7,327,441 (June 30, 2013: \$6,832,699) were pledged for short-term loans totaling \$19,915,518 at September 30, 2013 (June 30, 2013: \$19,857,110).

7. Advances to Suppliers

Cash advances are shown net of allowances of \$19,803,917 and \$19,689,609 at September 30, 2013 and June 30, 2013, respectively.

Due to an overall negative operating environment for steel businesses in China at present, caused by oversupply, increased cost of imported iron ore and tightened credit, we will regularly review our suppliers and our policy for provision for allowance for advances to suppliers to reflect changes from our historic raw materials receipt experience and to ensure the appropriateness of the allowance in light of the circumstances present at the time of the review.

8. Property, Plant and Equipment

Property, plant and equipment, stated at cost less accumulated depreciation, consisted of the following:

	September 30, 2013	June 30, 2013
Plant and machinery	\$ 80,387,064	\$ 80,161,729
Buildings	24,340,111	24,268,727
Motor vehicles	736,925	734,764
Office equipment	559,122	564,087
	106,023,222	105,729,307
Less: Accumulated depreciation	(46,733,738)	(44,362,562)
	\$ 59,289,484	\$ 61,366,745

Depreciation expense related to manufacturing is included as a component of cost of goods sold. During the three months ended September 30, 2013 and 2012, depreciation totaling \$1,454,038 and \$1,782,079, respectively, was included as a component of cost of goods sold.

Plant and machinery amounting to \$30,412,371 (June 30, 2013: \$31,431,182) and \$16,889,524 (June 30, 2013: \$17,513,168) were pledged for short-term loans totaling \$28,111,165 and long-term loan including current portion totaling \$16,200,000, respectively, at September 30, 2013 (June 30, 2013: \$28,028,722 and \$16,200,000, respectively).

9. Construction-In-Progress

As of September 30, 2013 and June 30, 2013, construction-in-progress consisted of the following:

	September 30, 2013	June 30, 2013
Construction costs	\$ 280,046	\$255,996

Construction-in-progress represents construction and installations of annealing furnaces.

10. Intangible Assets

Land use rights amounting to \$1,895,730 (June 30, 2013: \$1,900,914) were pledged for short-term loans totaling \$28,111,165 at September 30, 2013 (June 30, 2013: \$28,028,722).

The Company acquired land use rights in August 2004 and December 2006 for 50 years that expire in August 2054 and December 2056, respectively. The land use rights are amortized over a fifty-year term. An amortization amount of approximately \$37,000 is to be recorded each year starting from the financial year ended June 30, 2009 for the remaining lease period.

Amortizable intangible assets of the Company are reviewed when there are triggering events to determine whether their carrying value has become impaired, in conformity with ASC 360. The Company also re-evaluates the periods of amortization to determine whether subsequent events and circumstances warrant revised estimates of useful lives.

11. Short-Term Loans

Short-term loans consisted of the following:

	September 30, 2013	June 30, 2013
Bank loan dated June 29, 2011, due July 31, 2012, with an interest rate at 115% of the standard market rate set by the People's Bank of China ("PBOC") (6.9% at September 30, 2013) per annum (Notes 6 and 8)	8,195,647	8,171,612
Bank loan dated June 29, 2011, due July 31, 2012 with an interest rate at 115% of the standard market rate set by PBOC (6.9% at September 30, 2013) per annum (Notes 6, 8 and 10)	19,915,518	19,857,110
	\$ 28,111,165	\$ 28,028,722

The above bank loans outstanding at September 30, 2013 are Renminbi ("RMB") loans. Other than the bank loan dated January 19, 2011 that was secured by bills receivable, all other short-term loans carry an interest rate of 1.15 times of the standard market rate set by the PBOC, and are secured by inventories, land use rights, buildings and plant and machinery, and guaranteed by PSHL and our former Chairman, Mr. Wo Hing Li. In addition, pursuant to a bank loan agreement entered into between the Company and RaiffeisenZentralbankOsterreich AG ("RZB"), Mr. Li undertakes to

maintain a shareholding percentage in the Company of not less than 33.4% unless otherwise agreed to with RZB.

The weighted-average interest rate on short-term loans at September 30, 2013 and June 30, 2013 was 6.9% and 7.26%, respectively. Principal and interest under the short-term loans totaling \$28,111,165 with RZB were to be repaid in full on July 31, 2012, but the Company has defaulted on this repayment obligation. The Company is currently in discussions with RZB regarding the restructuring of the loans for repayment but has not yet agreed on specific terms. Any restructuring will be subject to approval by RZB's governing bodies, and to the Company's ability to meet certain conditions and requirements that may be imposed by the Bank. RZB also has the right to take possession of the collateral granted in connection with its respective loan agreements, which action would have a material adverse impact on the Company.

As part of the ongoing discussions with RZB to potentially restructure our short-term loans, we have implemented and will continue to implement a series of measures to remain viable and improve overall profitability including expanding our customer base to increase total demand, strategizing our product mix to re-focus on our competitive advantage and niche capabilities including the ultra-thin low-carbon and high strength high-carbon products, improve our production management and increase quality control, and continuing to carry out research and development ("R&D") to improve profitability of existing products and launch new high value-add products.

12. Long-Term Loan – Current Portion

	September 30, 2013	June 30, 2013
Bank loan dated June 29, 2010, due June 15, 2016 with an interest rate of the London Interbank Offered Rate (“LIBOR”) plus 4.5% (4.893% at September 30, 2013) per annum (Note 8)	\$ 16,200,000	\$ 16,200,000

On January 29, 2010, Shanghai Blessford entered into a Senior Loan Agreement with DEG-Deutsche Investitions-Und EntwicklungsgesellschaftMbh (“DEG”) for a loan amount up to \$18,000,000 at an annual interest rate of 4.5% above the six-month USD LIBOR rate. The loan is to be repaid semi-annually over five years starting on December 15, 2011 and is secured by a mortgage on the new cold rolling line and annealing furnaces at Shanghai Blessford’s facilities and guaranteed by the Company.

In June 2012, the Company defaulted on its semi-annual principal and interest repayment obligation. The Company is currently in discussions with DEG regarding a possibility to restructure the loan for repayment but has not yet agreed on specific terms. Until such agreement is reached, DEG has the right to cancel the total outstanding commitment of the loan, demand immediate repayment of all or part of the loan with accrued interest, and/or terminate the loan agreement. DEG also has the right to take possession of the collateral granted in connection with its respective loan agreements, which action would have a material adverse impact on the Company.

13. Stockholders’ Equity*Reverse Stock Split*

In June 2012, the stockholders of the Company approved the authority of the Company’s Board of Directors to effect a one-for-twelve reverse stock split of the Company’s outstanding common stock. The reverse stock split became effective on August 27, 2012 and as a result of the reverse stock split, the issued and outstanding shares of the Company’s common stock decreased to 3,880,866 shares, without any change in the par value of such shares. These consolidated financial statements and accompanying notes to the consolidated financial statements give retroactive effect to the reverse stock split for all periods presented.

Reduction in Authorized Shares

In June 2013, the stockholders of the Company approved the authority of the Company's Board of Directors to amend the Company's Amended and Restated Articles of Incorporation to reduce the number of shares of common stock and preferred stock. On August 27, 2013, the Company's Board of Directors approved an amendment of our Amended and Restated Articles of Incorporation to effect a reduction in the number of authorized shares of the Company's common stock and preferred stock to (i) 10,000,000 shares of common stock, par value \$0.001 per share and (ii) 500,000 shares of preferred stock, par value \$0.001 per share. The amendment became effective upon filing with the Delaware Secretary of State on September 6, 2013.

14. Income Taxes

Significant components of the Group's deferred tax assets and liabilities as of September 30, 2013 and June 30, 2013 are as follows:

	September 30, 2013	June 30, 2013
Deferred tax assets and liabilities:		
Net operating loss carried forward	\$ 12,328,700	\$ 11,247,441
Temporary differences resulting from allowances	14,136,799	12,805,597
Net deferred income tax asset	\$ 26,465,499	\$ 24,053,038
Valuation allowance	(26,465,499)	(24,053,038)
	\$-	\$-

The Company has not recognized a deferred tax liability as its foreign subsidiaries do not have any undistributed earnings as of September 30, 2013. A deferred tax liability will be recognized when the Company no longer plans to permanently reinvest undistributed earnings.

A reconciliation of the provision for income taxes with amounts determined by the PRC income tax rate to income tax expense per books is as follows:

	Three months ended September 30,	
	2013	2012
Computed tax at the PRC statutory rate of 25%	\$ (2,403,987)	\$ (1,080,297)
Valuation allowance	2,412,461	1,450,196
Income not subject to tax	(8,488)	-
Expenses not deductible for tax	14	(369,899)
Income tax per books	\$ -	\$ -

15. (Loss) Per Share

ASC 260-10 requires a reconciliation of the numerator and denominator of the basic and diluted (loss) per share (EPS) computations.

For the three months ended September 30, 2012, warrants to purchase 118,333 shares at an exercise price of \$101.40 were not included as their effect would have been anti-dilutive.

The following reconciles the components of the EPS computation:

	Income (Numerator)	Shares (Denominator)	Per Share Amount
For the three months ended September 30, 2013:			
Net (loss)	\$ (9,577,140)		
Basic EPS (loss) available to common shareholders	\$ (9,577,140)	3,880,866	\$ (2.47)
Effect of dilutive securities:			
Warrants		-	
Diluted EPS (loss) available to common shareholders	\$ (9,577,140)	3,880,866	\$ (2.47)
For the three months ended September 30, 2012:			
Net (loss)	\$ (4,222,283)		
Basic EPS (loss) available to common shareholders	\$ (4,222,283)	3,880,866	\$ (1.09)
Effect of dilutive securities:			
Warrants		-	
Diluted EPS (loss) available to common shareholders	\$ (4,222,283)	3,880,866	\$ (1.09)

16. Contingencies and Commitments

Legal Proceedings

The Company is subject to various legal proceedings and claims that have arisen in the ordinary course of business.

On March 15, 2012, the Company received notice of a complaint filed by a Mr. Haining Zhang and China Venture Partners, Inc. in the U.S. Southern District Court of New York on March 9, 2012, against several defendants, including the Company, as successor to OraLabs Holding Corp. In the complaint Mr. Zhang alleges, among other things, breach of contract by the Company and certain of our former officers, directors and control persons, in connection with our December 2006 acquisition of Partner Success Holdings Limited. Mr. Zhang asserts a breach of an agreement to compensate him for services he allegedly performed in connection with seeking out a merger candidate for the Company. The Company filed a motion to dismiss, as did the other defendants, and that motion was granted on or about March 13, 2013. The Plaintiff had the right to appeal within 30 days of the court decision, and has done so. The Plaintiff has filed an appellate brief and the Company has filed a brief in opposition. We expect a decision within the next eight (8) months. Although an estimate of any potential loss cannot be made at this time, the Company does not believe that its business or financial condition is materially adversely affected.

F-15

In addition to the above, certain former officers and directors have filed a lawsuit against the Company claiming that they are entitled to defense and indemnification from the Company for the claims of Mr. Zhang and China Venture Partners. Because the underlying case was dismissed without any award to the plaintiffs, these former officers and directors are seeking to recover their costs and attorney's fees expended in defending against the claims of Mr. Zhang and China Venture Partners. This action is in its early stages. Although an estimate of any potential loss cannot be made at this time, the Company does not believe that its business or financial condition is or will be materially adversely affected.

Capital Commitments

As of September 30, 2013, the Company did not have any capital commitments (June 30, 2013: \$nil).

17. Impairment

We determine impairment of long-lived assets, including property, plant and equipment and amortizable intangible assets, by measuring the estimated undiscounted future cash flows generated by these assets, comparing the result to the assets' carrying values and, if necessary, adjusting the assets to the lower of its carrying value or fair value and charging current operations for the measured impairment. The determination of the undiscounted future cash flows and fair value of these assets are subject to significant judgment.

The assets are subject to impairment consideration under ASC 360-10-35-17 if events or circumstances indicate that their carrying amounts might not be recoverable. In accordance with ASC360, as of September 30, 2013, as the Company's market capitalization was lower than the carrying value of its assets and the Company experienced continuing losses, management performed an impairment test pursuant to the guidance outlined in ASC 360-10-35-21 and no impairment charges were recognized for the current period. As of September 30, 2013, the Company expects these assets to be fully recoverable based on the result of the impairment test. Goodwill amounting to \$99,999 as at September 30, 2013 was considered immaterial and not tested for impairment in accordance with ASC 350.

18. Recent Accounting Pronouncements

In July 2013, the FASB issued ASU No. 2013-11, *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists* ("ASU 2013-11"). The objective of ASU 2013-11 is to eliminate the diversities that exist in financial statement presentation. The amendments aim at attaining this objective by giving explicit guidance on the financial statement presentation of an unrecognized

tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amendments in this Update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. The amendments of ASU 2013-11, when adopted, are not expected to have a material impact on the Company's consolidated financial statements.

Special Note Regarding Forward Looking Statements

In addition to historical information, this report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We use words such as “believe,” “expect,” “anticipate,” “project,” “target,” “plan,” “optimistic,” “intend,” “aim,” “will” or similar expressions which are intended to identify forward-looking statements. Such statements include, among others, those concerning market and industry segment growth and demand and acceptance of new and existing products; any projections of sales, earnings, revenue, margins or other financial items; any statements of the plans, strategies and objectives of management for future operations; and any statements regarding future economic conditions or performance, as well as all assumptions, expectations, predictions, intentions or beliefs about future events. You are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, as well as assumptions, which, if they were to ever materialize or prove incorrect, could cause the results of the Company to differ materially from those expressed or implied by such forward-looking statements. Potential risks and uncertainties include, among other things, factors such as: plans to expand our exports outside of China; plans to increase our production capacity and the anticipated dates that such facilities may commence operations; our ability to obtain additional funding for our continuing operations and to fund our expansion; our ability to meet our financial projections for any financial year; our ability to retain our key executives and to hire additional senior management; continued growth of the Chinese economy and industries demanding our products; our ability to secure at acceptable prices the raw materials we need to produce our products; political changes in China that may impact our ability to produce and sell our products in our target markets; general business conditions and competitive factors, including pricing pressures and product development; and changes in our relationships with customers and suppliers. You should carefully review the risk factors described in other documents we file from time to time with the U.S. Securities and Exchange Commission, including our Annual Report on Form 10-K for our fiscal year ended June 30, 2013.

The following discussion should be read in conjunction with our unaudited consolidated financial statements and the related notes that appear in Part I, Item 1, “Financial Statements,” of this quarterly report. Our unaudited consolidated financial statements are stated in United States Dollars and are prepared in accordance with United States Generally Accepted Accounting Principles. The following discussion and analysis covers the Company’s unaudited consolidated financial condition at September 30, 2013 and June 30, 2013, the end of its prior fiscal year, and its unaudited consolidated results of operation for the three months ended September 30, 2013 and 2012.

Overview of the Company’s Business

We are a value-added steel processing company principally engaged in the manufacture and sale of high precision cold-rolled steel products, in the provision of heat treatment and in the cutting and slitting of medium and high-carbon hot-rolled steel strips. We use commodity steel to create a specialty premium steel. Specialty precision steel pertains to the precision of measurements and tolerances of thickness, shape, width, surface finish and other special quality features of highly engineered end-use applications.

We produce and sell precision ultra-thin and high strength cold-rolled steel products ranging from 7.5 mm to 0.03 mm. We also provide heat treatment and cutting and slitting of medium and high-carbon hot-rolled steel strips not exceeding 7.5 mm thickness. Our process puts hot-rolled de-scaled (pickled) steel coils through a cold-rolling mill, utilizing our patented systems and high technology reduction processing procedures, to make steel coils and sheets in customized thicknesses according to customer specifications. Currently, our precision products are mainly used in the manufacture of automobile parts and components, steel roofing, plane friction discs, appliances, food packaging materials, saw blades, textile needles, and micro electronics.

We conduct our operations principally in China through our wholly-owned operating subsidiaries, Chengtong and Shanghai Blessford, which are wholly owned subsidiaries of our direct subsidiary, PSHL. Most of our sales are made domestically in China; however, we began exporting during fiscal 2007 and our overseas market currently covers Indonesia, Thailand, the Caribbean, Nigeria, Ethiopia and Turkey. We intend to further expand into additional overseas markets in the future, subject to suitable market conditions and favorable regulatory controls.

To remodel our business to make it sustainable, we have implemented and will continue to implement a series of measures to remain viable and improve profitability. These measures include: (1) initiating additional sales and marketing efforts to expand our customer base and increase total demand; (2) strategizing our product mix to re-focus on our niche capabilities including the ultra-thin low-carbon and high-strength high-carbon products; (3) improve production management and increase quality control; (4) continuing to carry out R&D to improve profitability of existing products and launch new high value-add products; and (5) improving working capital efficiency by increasing turnovers of advances to suppliers and accounts receivables. We will also continue to take appropriate actions to

perform business and credit reviews of customers and suppliers with the downward pressure in the Chinese economy and credit crunch which have caused many difficulties faced by businesses.

First Quarter Financial Performance Highlights

During the three months ended September 30, 2013, we saw a substantial increase in our sales volume, period-on-period. This is a direct result of the measures we have been taking during the past year including expanding customer base and improving production management, as mentioned above. However, as we further work to improve our operating results to achieve profitability, tightened credit and slowing growth in China continued to cause a negative impact on our business and a slow turnover of our accounts receivable for the three months ended September 30, 2013, a trend that is strongly correlated to the experience of other companies in the coal and steel sectors in China during the past year.

During the three months ended September 30, 2013, we sold a total of 20,449 tons of products, an increase of 12,696 tons from 7,753 tons a year ago, due to increase in domestic sales across all product categories. Our average cost per unit sold decreased 24.5% while average selling prices decreased 25.1% period-on-period. Low average selling price coupled with a large allowance for bad and doubtful debts of \$5,121,777 led to a gross loss of \$2,994,259 and a net loss of \$9,577,140 for the three months ended September 30, 2013. Total company backlog as of September 30, 2013 was \$8,165,118.

In June and July 2012, we defaulted on the repayment obligations of our short-term and long-term bank loans totaling \$44,311,165. We are currently in discussions with our banks regarding the possibility to restructure these loans for repayment but have not yet agreed on specific terms. Any restructuring will be subject to approval by the banks' governing bodies, and to our ability to meet certain conditions and requirements that may be imposed by the banks. There can be no assurance that the Company will be able to successfully work out a repayment plan or otherwise fulfill its obligations under the loans. Each of the banks also have the right to take possession of the collateral (which collectively constitutes substantial assets of the Company) granted in connection with their respective loan agreements, which action would have a material adverse impact on the Company. We have implemented and will continue to implement a series of measures, discussed above, to remodel our business to make it sustainable, and as part of the ongoing discussions with banks to potentially restructure our bank loans.

The Company continued to suffer a significant loss in the period ended September 30, 2013. Operating cash flows have also been adversely impacted by the slow turnover of our accounts receivable. We also expect the ongoing credit tightening in China and the slowdown of the Chinese economy to continue to have negative consequences on the business operations of our customers and suppliers and adversely impact their ability to meet their financial obligations to us. There can be no assurance that the Company will be able to generate sufficient positive cash flow from operations to address all of its cash flow needs, and to continue as a going concern.

The following are some financial highlights for the third fiscal quarter:

Revenues: Our revenues were approximately \$11.8 million for the quarter, an increase of 97.5% from last year.

Gross Margin: Gross margin was (25.4%) for the quarter, compared to (24.6%) last year.

Loss from operations before tax: Loss from operations before tax was approximately \$9.6 million for the quarter, compared to a loss of approximately \$4.2 million last year.

Net loss: Net loss was approximately \$9.6 million for the quarter, compared to a net loss of approximately \$4.2 million last year.

Fully diluted loss per share: Fully diluted loss per share was \$2.47 for the quarter, compared to a loss per share of \$1.09 last year.

Results of Operations

The following table sets forth key components of our results of operations for the three months ended September 30, 2013 and 2012 and as a percentage of revenues.

Edgar Filing: China Precision Steel, Inc. - Form 10-Q

(All amounts in U.S. dollars)

	2013		2012	
	Amount	% of Revenues	Amount	% of Revenues
Sales Revenues	11,765,387	100.0	5,956,760	100.0
Cost of goods sold (including depreciation and amortization)	14,759,646	125.4	7,423,709	124.6
Gross (loss)	(2,994,259)	(25.4)	(1,466,949)	(24.6)
Selling expenses	31,168	0.3	29,273	0.5
Administrative expenses	447,431	3.8	442,615	7.4
Allowance for bad and doubtful debts	5,121,777	43.5	1,373,000	23.0
Depreciation and amortization expense	48,142	0.4	51,961	0.9
(Loss) from operations	(8,642,777)	(73.5)	(3,363,798)	(56.5)

Basic (loss) per share	(2.47)		(1.09)	
Diluted (loss) per share	(2.47)		(1.09)	

Sales Revenues

Sales volume increased by 12,696 tons, or 163.7%, period-on-period, to 20,449 tons for the three months ended September 30, 2013, from 7,753 tons for the three months ended September 30, 2012 and as a result, sales revenues increased by \$5,808,627, or 97.5%, period-on-period, to \$11,765,387 for the three months ended September 30, 2013, from \$5,956,760 for the three months ended September 30, 2012. The increase in sales revenues period-on-period is mainly attributable to the increase in production and sales as a result of management's sales and marketing efforts in the domestic market, as detailed more fully below.

Sales by Product Line

A break-down of our sales by product line for the periods ended September 30, 2013 and 2012 is as follows:

Product Category	2013		2012			Period-on-Period Qty.	Variance
	Quantity (tons)	\$ Amount	% of Sales	Quantity (tons)	\$ Amount		
Low carbon hard-rolled	442	407,106	4	1,470	1,133,619	19	(1,028)
Low carbon cold-rolled	11,047	5,818,783	49	3,513	2,047,911	34	7,534
High-carbon hot-rolled	3,695	982,361	8	37	13,197	<1%	3,658
High-carbon cold-rolled	4,850	4,118,910	35	2,838	2,545,164	43	2,012
Subcontracting income	415	66,385	1	(105)	9,024	<1%	520
Sales of scrap metal	-	371,842	3	-	207,845	4	-
Total	20,449	11,765,387	100	7,753	5,956,760	100	12,696

During the three months ended September 30, 2013, sales increased across all product categories for domestic sales, but due to a strong RMB against USD, export sales were negatively impacted. Low-carbon cold-rolled steel products accounted for 49% of the current sales mix at an average selling price of \$527 per ton for the three months ended September 30, 2013, compared to 34% of the sales mix at an average selling price per ton of \$583 for the three months ended September 30, 2012. Low-carbon hard-rolled steel products accounted for 4% of the current sales mix at an average selling price of \$921 per ton for the three months ended September 30, 2013, compared to 19% of the sales mix at an average selling price per ton of \$771 for the three months ended September 30, 2012. Although average selling price increased period-on-period, there was less demand for this export category due to a strong RMB against USD. High-carbon cold-rolled steel products accounted for 35% of the current sales mix at an average selling price of \$849 per ton for the three months ended September 30, 2013, compared to 43% of the sales mix at an average selling price of \$897 for the three months ended September 30, 2012. The products in this category are mainly used in the automobile industry and the increase in sales volume period-on-period was a result of our sales and marketing

efforts targeted at the automobiles components manufactures in the PRC market. We believe there is growth opportunity in this market segment and will continue to expand our customer base. Subcontracting income revenues accounted for \$66,385, or 1%, of the sales mix for the three months ended September 30, 2013, increased from \$9,024, or less than 1%, of the sales mix for the three months ended September 30, 2012, due to increased demand. The negative quantity in 2012 was due to the return of one batch of sample products with a small sales revenue.

	2013	2012	Variance	
Average Selling Prices	(\$)	(\$)	(\$)	(%)
Low-carbon hard-rolled	921	771	150	19.5
Low-carbon cold-rolled	527	583	(56)	(9.6)
High-carbon hot-rolled	266	353	(87)	(24.6)
High-carbon cold-rolled	849	897	(48)	(5.4)
Subcontracting income	160	(86)	246	(286.0)

The average selling price per ton decreased to \$575 for the three months ended September 30, 2013, compared to \$768 in 2012, representing a decrease of \$193, or 25.1%, period-on-period. This decrease was mainly due to decreases in general steel prices and therefore our selling prices during the quarter. Average selling prices decreased across all product categories during the three months ended September 30, 2013 except for low-carbon hard-rolled products.

Sales Breakdown by Major Customer

Customers	2013	% of	2012	% of
	\$		\$	
		Sales		Sales
ChangshuJiacheng Steel Plating Co., Ltd.	1,939,400	16	699,359	12

	5,814,260	49	2,761,774	46
Others	5,951,127	51	3,194,986	54
Total	11,765,387	100	5,956,760	100

* Not major customers for the relevant periods

Sales revenue generated from our top five major customers as a percentage of total sales was 49% for the three months ended September 30, 2013, as compared to 46% in 2012. The change in customer mix reflects management's continuous efforts in expanding our customer base and geographical coverage during the course of the quarter.

Cost of Goods Sold

Cost of sales increased by \$7,335,937, or 98.8%, period-on-period, to \$14,759,646 for the three months ended September 30, 2013, from \$7,423,709 for the three months ended September 30, 2012. Cost of sales represented 125.4% of sales revenues for the three months ended September 30, 2013, compared to 124.6% for the three months ended September 30, 2012. Average cost per unit sold decreased to \$722 for the three months ended September 30, 2013, compared to \$957 for the three months ended September 30, 2012, representing a decrease of \$235 per ton, or 24.5%, period-on-period.

	2013	2012	Variance	
	(\$)	(\$)	(\$)	(%)
Cost of goods sold				
- Raw materials	12,020,483	4,435,761	7,584,722	171.0
- Direct labor	139,908	139,068	840	0.6
- Manufacturing overhead	2,599,255	2,848,880	(249,625)	(8.8)
	14,759,646	7,423,709	7,335,937	98.8
Cost per unit sold				
Total units sold (tons)	20,449	7,753	12,696	163.8
Average cost per unit sold (\$/ton)	722	957	(235)	(24.5)

The decrease in average per unit cost of sales is represented by the combined effect of:

a decrease in factory overhead per unit sold of \$240, or 65.4%, from \$367 for the three months ended September 30, 2012, to \$127 for the three months ended September 30, 2013;

a decrease in direct labor per unit sold of \$11, or 61.1%, from \$18 for the three months ended September 30, 2012, to \$7 for the three months ended September 30, 2013, offset by;

an increase in cost of raw materials per unit sold of \$16, or 2.8%, from \$572 for the three months ended September 30, 2012, to \$588 for the three months ended September 30, 2013.

The cost of raw materials consumed increased by \$7,584,722, or 171.0%, period-on-period, to \$12,020,483 for the three months ended September 30, 2013, from \$4,435,761 for the three months ended September 30, 2012. This increase was mainly due to a substantial increase in total units sold during the three months ended September 30, 2013.

Direct labor costs decreased by \$840, or 0.6%, period-on-period, to \$139,908 for the three months ended September 30, 2013, from \$139,068 for the three months ended September 30, 2012. Manufacturing overhead costs decreased by \$249,625, or 8.8%, period-on-period, to \$2,599,255 for the three months ended September 30, 2013, from \$2,848,880 for the three months ended September 30, 2012. The decrease was mainly attributable to the combined effect of a decrease in depreciation of \$328,041, or 18.4%, period-on-period, to \$1,454,038 for the three months ended September 30, 2013, from \$1,782,079 for the three months ended September 30, 2012, and partially offset by an increase in consumables of \$106,755, or 33.3%, period-on-period, to \$427,372 for the three months ended September 30, 2013, from \$320,617 for the three months ended September 30, 2012.

Gross Loss

Gross loss in absolute terms increased by \$1,527,310 or 104.1%, period-on-period, to \$2,994,259 for the three months ended September 30, 2013, from a gross loss of \$1,466,949 for the three months ended September 30, 2012. Gross profit margin decreased to (25.4%) for the three months ended September 30, 2013, from (24.6%) for the three months ended September 30, 2012. The decrease in gross profit margin is mainly attributable to a 25.1% period-on-period decrease in average selling price.

Selling Expenses

Selling expenses increased by \$1,895, or 6.5%, period-on-period, to \$31,168 for the three months ended September 30, 2013, from \$29,273 for the three months ended September 30, 2011. The increase was mainly attributable to higher transportation costs and traveling expenses period-on-period.

Administrative Expenses

Administrative expenses slightly increased by \$4,816 or 1.1%, period-on-period, to \$447,431 for the three months ended September 30, 2013, compared to \$442,615 for the three months ended September 30, 2011.

Allowance for Bad and Doubtful Debts

Allowance for bad and doubtful debts increased by \$3,748,777, or 273.0%, period-on-period. Allowance recognized for the three months ended September 30, 2013 was in the amount of \$5,121,777 in accordance with our policy for allowance for doubtful accounts.

Loss from Operations

Loss from operations increased by \$5,278,979, or 156.9%, period-on-period, to \$8,642,777 for the three months ended September 30, 2013, from \$3,363,798 for the three months ended September 30, 2012, as a result of the factors discussed above.

Other Income

Other income increased by \$2,425, or 2,354.4%, to \$2,528 for the three months ended September 30, 2013, from \$103 for the three months ended September 30, 2012, due to higher interest income period-on-period.

Interest Expense

Total interest expense increased by \$78,303, or 9.1%, to \$936,891 for the three months ended September 30, 2013, from \$858,588 for the three months ended September 30, 2012, due to the accrual of overdue and penalty interest as resulting from our loan default.

Income Tax

For the three months ended September 30, 2013 and 2012, we recognized no income tax expense due to a net loss position.

Net Loss

Net loss increased by \$5,354,857, or 126.8%, period-on-period, to \$9,577,140 for the three months ended September 30, 2013, from \$4,222,283 for the three months ended September 30, 2012. The increase in net loss is attributable to a combination of all the factors discussed above, principally the negative gross margin and the increase in allowance for bad and doubtful debts.

Liquidity and Capital Resources

Our business is capital intensive and requires substantial expenditures for, among other things, the purchase and maintenance of equipment used in our operations. Our short-term and long-term liquidity needs arise primarily from capital expenditures, working capital requirements and principal and interest payments related to our outstanding indebtedness. We have met these liquidity requirements with cash provided by operations, equity financing, and bank debt. As of September 30, 2013, we had cash and cash equivalents of approximately \$0.1 million.

The following table provides detailed information about our net cash flows for all financial statement periods presented in this report:

CASH FLOWS

	Three Months Ended September 30,	
	2013	2012
Net cash provided by operating activities	\$55,331	\$171,468
Net cash (used in) investing activities	(14,633)	(7,424)
Net cash (used in) financing activities	(47,650)	-
Net cash flow	(8,747)	(7,238)

Operating Activities

Net cash flows provided by operating activities for the three months ended September 30, 2013 were \$55,331, as compared to \$171,468 provided by operating activities for the three months ended September 30, 2012, resulting in a net decrease of \$116,137. This decrease was mainly due to an increase in cash outflows for advances to suppliers of \$3,174,279, offset by an increase in cash inflow from advances from customers of \$2,498,417, during the three months ended September 30, 2013.

For the three months ended September 30, 2013, sales revenues generated from the top five major customers as a percentage of total sales was 49%, as compared to 46% in the prior period. The loss of all or portion of the sales volume from a significant customer would have an adverse effect on our operating cash flows. We note that the continuation or intensification of the credit tightening in China and the slowdown of the Chinese economy have had and will continue to have negative consequences on the business operations of our customers and adversely impact their ability to meet their financial obligations to us, resulting in further unrecoverable losses on our accounts receivable. We will regularly review credit periods offered, along with our collection experience and the other relevant factors, to evaluate the adequacy of our allowance for doubtful accounts, and to make changes to the allowance, if necessary. Delays or non-payment of accounts receivable would have an adverse effect on our operating cash flows.

Investing Activities

Net cash flows used in investing activities for the three months ended September 30, 2013 were \$14,633, as compared with \$7,424 for the three months ended September 30, 2012. Our main uses of cash for investing activities during the period ended September 30, 2013 were for the purchase of property, plant and equipment to complement our existing production facilities.

We forecast low capital expenditures in the coming years as the Company does not have any expansion plans as at September 30, 2013.

Financing Activities

Net cash flows used in financing activities for the three months ended September 30, 2013 were \$47,650, as compared to \$nil for the three months ended September 30, 2012, as the Company made a partial repayment of short-term loans during the three months ended September 30, 2013.

Our working capital requirements and the cash flow provided by future operating activities will vary from quarter to quarter, and are dependent on factors such as volume of business and payment terms with our customers. As such, we may need to rely on access to the financial markets to provide us with significant discretionary funding capacity. However, the current uncertainty arising out of domestic and global economic conditions, including the continuing disruption in credit markets, poses a risk to the economies in which we operate and may adversely impact our potential sources of capital financing. The general unavailability of credit could make capital financing more expensive for us or impossible altogether. Even if we are able to obtain credit, the incurrence of indebtedness could result in increased debt service obligations. In June and July 2012, we defaulted on the repayment obligations of our short-term and long-term bank loans totaling \$44,311,165. We are currently in discussions with our banks regarding the possibility to restructure these loans for repayment but have not yet agreed on specific terms. There can be no assurance that the Company will be able to successfully work out a repayment plan or otherwise fulfill its obligations under the loans. Further, each of these lenders has the right to take possession of the collateral (which collectively constitute substantial assets of the Company) granted in connection with their respective loan agreements. The unavailability of debt financing as a result of economic pressures on the credit and equity markets could have a material adverse effect on our business operations.

Going Concern

Historically, we have funded our operations and expansion expenditures from cash generated by operating activities, bank borrowings and issuance of common stock. We believe that we have the financial resources needed to meet business requirements for the next twelve months if we are able to work out a repayment plan acceptable to us with our banks for the defaulted loans. The uncertainty surrounding the successful restructuring of our bank loans and our current lack of readily available liquidity provided by other third party sources raise substantial doubt about our ability to continue as a going concern. Our consolidated financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

Current Assets

Current assets decreased by \$2,415,974, or 4.3%, period-on-period, to \$53,885,289 as of September 30, 2013, from \$56,301,263 as of June 30, 2013, principally as a result of an decrease in accounts receivable of \$5,216,711, or 17.7%, period-on-period, offset by an increase in advances to suppliers of \$2,255,470, or 24.2%, and an increase in inventories of \$722,940, or 4.6%, period-on-period.

Accounts receivable, representing 45.0% of total current assets as of September 30, 2013, is a significant asset of the Company. We offer credit to our customers in the normal course of our business and accounts receivable is stated net of allowance for doubtful accounts.

As we expect the continuation or intensification of the credit tightening in China and the slowdown of the Chinese economy to continue to have negative consequences on the business operations of our customers and adversely impact their ability to meet their financial obligations to us, we have largely limited further credit sales and will only offer credit terms to customers with good payment histories.

To reserve for potentially uncollectible accounts receivable, we have made a 50% provision for all accounts receivable that are over 180 days past due and full provision for all accounts receivable over one year past due. We will also regularly review these credit periods, along with our collection experience and the other factors discussed above, to evaluate the adequacy of our allowance for doubtful accounts, and to make changes to the allowance, if necessary. If our actual collection experience or other conditions change, revisions to our allowances may be required, including a further provision which could adversely affect our operating income, or write back of provision when estimated uncollectible accounts are actually collected. Any such additional bad debt charges could materially and adversely affect our future operating results.

The following table reflects the aging of our accounts receivable based on due date as of September 30, 2013 and June 30, 2013:

September 30, 2013

US\$	Total	Current	1 to 30 days	31 to 90 days	91 to 180 days	181 to 360 days	over 1 year
TOTAL	60,066,852	232,597	4,635,519	1,501,116	4,918,489	25,950,273	22,828,858
%	100	<1	8	2	8	43	38

June 30, 2013

US\$	Total	Current	1 to 30 days	31 to 90 days	91 to 180 days	181 to 360 days	over 1 year
TOTAL	60,123,111	6,328,112	1,605,948	955,364	8,932,972	23,314,353	18,986,362

%	100	10	3	1	15	39	32
---	-----	----	---	---	----	----	----

Current Liabilities

Current liabilities increased by \$4,955,958, or 7.4%, period-on-period, to \$71,973,901 as of September 30, 2013, from \$67,017,943 as of June 30, 2013. The increase was mainly attributable to an increase in accounts payable and accrued liabilities of \$2,042,926, or 29.0%, period-on-period, and an increase in advances from customers of \$3,022,451, or 207.5%, period-on-period.

As of September 30, 2013, we had \$28,111,165 in short-term loans and \$16,200,000 in long-term loan current portion. Principal and interest under these loans were to be repaid in full in July and June 2012, but the Company has defaulted on these repayment obligations. The Company is currently in discussion with its banks regarding the possibility to restructure these loans but there can be no assurance that the Company will be able to successfully work out a repayment plan or otherwise fulfill its obligations under the loan.

Capital Expenditures

During the three months ended September 30, 2013 we invested \$14,633 in purchases of additional property, plant and equipment.

Loan Facilities

The following table illustrates our credit facilities as of September 30, 2013, providing the name of the lender, the amount of the facility, the date of issuance and the maturity date:

All amounts in U.S. dollars

Lender	Date of Loan	Maturity Date	Duration	Interest Rate	Principal Amount
Raiffeisen Zentralbank Österreich AG (“RZB”)	June 29, 2011	July 31, 2012	1 year	1.15 times of the PBOC rate	\$ 8,195,647 RMB (50,154,084)
Raiffeisen Zentralbank Österreich AG	June 29, 2010	July 31, 2012	1 year	1.15 times of the PBOC rate	\$ 19,915,517 RMB (121,875,000) \$ 28,111,165
DEG – Deutsche Investitions – und Entwicklungsgesellschaft mbH	June 29, 2010	June 15, 2016	6 years	6 month USD LIBOR + 4.5%	\$ 16,200,000 RMB (99,137,520) \$ 16,200,000
Total					\$ 44,311,165

On January 29, 2010, Shanghai Blessford entered into a Senior Loan Agreement with DEG -Deutsche Investitions-Und Entwicklungsgesellschaft Mbh, or “DEG,” for a loan amount up to \$18,000,000 at an annual interest rate of 4.5% above the six-month USD LIBOR rate. The loan is secured by a mortgage on the new cold rolling line and annealing furnaces at Shanghai Blessford’s facilities and guaranteed by the Company. The loan was to have been repaid semi-annually over five years starting on December 15, 2011, but the Company has defaulted on this repayment obligation, as well as on repayment of the June 15, 2011 installment. The Company is currently in discussions with DEG regarding the possibility to restructure the loan for repayment but has not yet agreed on specific terms. Until such agreement is reached, DEG has the right to cancel the total outstanding commitment of the loan, demand immediate repayment of the loan or any part thereof together with accrued interest, and/or terminate the loan agreement. DEG may also take possession of the collateral granted in connection with their respective loan agreements, which would have a material adverse impact on the Company. There can be no assurance that the Company will be able to successfully work out a repayment plan with DEG or otherwise fulfill its obligations under the loan.

On June 29, 2011, the Company entered into two short-term loan agreements with RaiffeisenZentralbankOsterreich AG, or "RZB," pursuant to which the Company borrowed an aggregate of \$28,111,165 at an annual interest rate of 1.15 times the standard market rate set by the People's Bank of China. The loans are secured by inventories, land use rights, buildings and plant and machinery, and is guaranteed by PSHL and our former Chairman, Mr. Wo Hing Li. Mr. Li also undertook to maintain a shareholding percentage in the Company of not less than 33.4% unless otherwise agreed to with RZB. Principal and interest under the loans were to be repaid in full on July 31, 2012, but the Company has defaulted on this repayment obligation. The Company is currently in discussions with RZB regarding the possibility to restructure the loans for repayment but has not yet agreed on specific terms. Any restructuring will be subject to approval by RZB's governing bodies, and to the Company's ability to meet certain conditions and requirements that may be imposed by the Bank. Until such agreement is reached, RZB has the right to take possession of the collateral granted in connection with the loan agreement, which action would have a material adverse impact on the Company. There can be no assurance that the Company will be able to successfully work out a repayment plan with RZB or otherwise fulfill its obligations under the loan.
