Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called creation units and otherwise can be bought and sold only through exchange trading.

Creation units are issued and redeemed principally in kind or in cash. Shares may trade at a premium or discount to their NAV in the secondary market. You will incur brokerage expenses when trading Fund shares in the secondary market.

Investing involves substantial risk and high volatility, including possible loss of principal. Bond and bond funds will decrease in value as interest rates rise.

An investor should consider the investment objective, risks, charges and expenses of a Fund carefully before investing. To obtain a prospectus and summary prospectus, which contain this and other information, call 800.826.2333 or visit [vaneck.com](http://vaneck.com). Please read the prospectus and summary prospectus carefully before investing.

Van Eck Merk Gold Trust: This material must be preceded or accompanied by a prospectus (<http://www.vaneck.com/library/commodity-etfs-literature/>). Before investing, you should carefully consider the Trust's investment objectives, risks, charges and expenses. Please read the prospectus carefully before you invest.

Investing involves risk, including possible loss of principal. The Trust is not an investment company registered under the Investment Company Act of 1940 or a commodity pool for the purposes of the Commodity Exchange Act. Shares of the Trust are not subject to the same regulatory requirements as mutual funds. Because shares of the Trust are intended to reflect the price of the gold held in the Trust, the market price of the shares is subject to fluctuations similar to those affecting gold prices. Additionally, shares of the Trust are bought and sold at market price, not at net asset value ( NAV ). Brokerage commissions will reduce returns.
