

CALAVO GROWERS INC
Form 10-K
December 22, 2017
UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended October 31, 2017

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number: 000-33385

CALAVO GROWERS, INC.

(Exact name of registrant as specified in its charter)

California
(State of incorporation)

33-0945304
(I.R.S. Employer Identification No.)

1141-A Cummings Road, Santa Paula, CA 93060
(Address of principal executive offices) (Zip code)

Edgar Filing: CALAVO GROWERS INC - Form 10-K

Registrant's telephone number, including area code: (805) 525-1245

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name Of Each Exchange On Which Registered
Common Stock, \$0.001 Par Value per Share	Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.0405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Edgar Filing: CALAVO GROWERS INC - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company) Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Based on the closing price as reported on the Nasdaq Global Select Market, the aggregate market value of the Registrant's Common Stock held by non-affiliates on April 30, 2017 (the last business day of the Registrant's most recently completed second fiscal quarter) was approximately \$1.2 billion. Shares of Common Stock held by each executive officer and director and by each shareholder affiliated with a director or an executive officer have been excluded from this calculation because such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes. The number of outstanding shares of the Registrant's Common Stock as of November 30, 2017 was 17,533,179.

Documents Incorporated by Reference

Portions of the Registrant's Proxy Statement for the 2018 Annual Meeting of Shareholders, which we intend to hold on April 25, 2018 are incorporated by reference into Part III of this Form 10-K. The definitive Proxy Statement will be filed within 120 days after October 31, 2017.

CAUTIONARY STATEMENT

This Annual Report on Form 10-K, including "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Item 7, contains forward-looking statements that involve risks, uncertainties and assumptions. If the risks or uncertainties ever materialize or the assumptions prove incorrect, the results of Calavo Growers, Inc. and its consolidated subsidiaries (Calavo, the Company, we, us or our) may differ materially from those expressed or implied by such forward-looking statements and assumptions. All statements, other than statements of historical fact, are statements that could be deemed forward-looking statements, including, but not limited to, any projections of revenue, gross profit, expenses, earnings, earnings per share, tax provisions, cash flows, currency exchange rates, the impact of acquisitions or other financial items; any statements of the plans, strategies and objectives of management for future operations, including execution of restructuring and integration plans (including information technology systems integration); any statements regarding current or future macroeconomic trends or events and the impact of those trends and events on Calavo and its financial performance; any statements regarding pending investigations, legal claims or tax disputes; any statements of expectation or belief; and any statements of assumptions underlying any of the foregoing. Risks, uncertainties and assumptions include the impact of macroeconomic trends and events; the competitive pressures faced by Calavo's businesses; the development and transition of new products and services (and the enhancement of existing products and services) to meet customer needs; integration and other risks associated with business combinations; the hiring and retention of key employees; the resolution of pending investigations, legal claims and tax disputes; and other risks that are described herein, including, but not limited to, the items discussed in "Risk Factors" in Item 1A of this report, and that are otherwise described or updated from time to time in Calavo's Securities and Exchange Commission reports. Calavo assumes no obligation and does not intend to update these forward-looking statements.

.

2

PART I

Item 1. Business

General development of the business

Calavo Growers, Inc. (Calavo, the Company, we, us or our), is a global leader in the avocado industry and an expanding provider of value-added fresh food. Our expertise in marketing and distributing avocados, prepared avocados, and other perishable foods allows us to deliver a wide array of fresh and prepared food products to retail grocery, foodservice, club stores, mass merchandisers, food distributors and wholesalers on a worldwide basis. We procure avocados from California, Mexico and other growing regions around the world. Through our various operating facilities, we (i) sort, pack, and/or ripen avocados, tomatoes and/or Hawaiian grown papayas, (ii) create, process and package a portfolio of healthy fresh foods including fresh-cut fruit, fresh-cut vegetables and prepared foods and (iii) process and package guacamole and salsa. We distribute our products both domestically and internationally and report our operations in three different business segments: Fresh products, Calavo Foods and Renaissance Food Group (“RFG”). See Note 11 in our consolidated financial statements for further information about our business segments. Our principal executive offices are located at 1141-A Cummings Road, Santa Paula, California 93060; telephone (805) 525-1245.

On October 9, 2001, we completed a series of transactions whereby common and preferred shareholders of Calavo Growers of California (the Cooperative), an agricultural marketing cooperative association, exchanged all of their outstanding shares for shares of our common stock. Concurrent with this transaction, the Cooperative was merged into us with Calavo Growers, Inc. (Calavo) emerging as the surviving entity. These transactions had the effect of converting the legal structure of the business from a non-profit cooperative to a for-profit corporation.

In December 2014, Calavo formed a wholly owned subsidiary Calavo Growers de Mexico, S. de R.L. de C.V. (Calavo Sub). In July 2015, Calavo Sub entered into a Shareholder Agreement with Grupo Belo del Pacifico, S.A. de C.V., (Belo) a Mexican Company owned by Agricola Belher, and formed Agricola Don Memo, S.A. de C.V. (“Don Memo” or “ADM”). Belo and Calavo Sub have an equal one-half ownership interest in Don Memo in exchange for \$2 million each. Pursuant to a management service agreement, Belo, through its officers and employees, has day-to-day power and authority to manage the operations. Belo is entitled to a management fee, as defined, which is payable annually in July of each year. Additionally, Calavo Sub is entitled to commission, for the sale of produce in the Mexican National Market, United States, Canada, and any other overseas market.

In August 2015, we entered into Shareholder’s Agreement with various partners and created Avocados de Jalisco, S.A.P.I. de C.V. (“Avocados de Jalisco” or “ADJ”). Avocados de Jalisco is a Mexican corporation created to engage in procuring, packing and selling avocados. This entity is approximately 80% owned by Calavo and is consolidated in

our financial statements. Avocados de Jalisco built a new packinghouse located in Jalisco, Mexico which commenced operations in the fiscal third quarter of 2017.

In fiscal 2016, we expanded and refurbished our plant facilities in Houston, TX and Jacksonville, FL to add additional capacity and in-plant capabilities. We invested approximately \$7.3 million into the Houston facility and \$13.3 million into the Jacksonville facility.

On November 1, 2016, we acquired certain real property, consisting of land, a refrigerated building and select production and office equipment located at 1730 Eastridge Avenue, Riverside, California from Fresh Foods, LLC for total consideration of approximately \$19.4 million. We intend to operate the refrigerated facility as part of our network of USDA and organic certified fresh food facilities.

Available information

We maintain an Internet website at <http://ir.calavo.com>. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to such reports filed or furnished pursuant to section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, and other information related to us, are available, free of charge, on our website as soon as reasonably practicable after we electronically file those documents with, or otherwise furnish

them to, the Securities and Exchange Commission (SEC). Our Internet website and the information contained therein, or connected thereto, is not and is not intended to be incorporated into this Annual Report on Form 10-K.

We have a code of business conduct and ethics that applies to all employees, including our executive officers, as well as our Board of Directors. Our code of business conduct and ethics is available for review on our corporate website. We intend to disclose any changes in, or waivers from, this code by posting such information on the same website or by filing a Form 8-K, in each case to the extent such disclosure is required by rules of the SEC or NASDAQ.

Fresh products

Calavo was founded in 1924 to market California avocados. We now sell avocados sourced from a variety of locations (including but not limited to California, Mexico, and Peru) to a diverse group of retail grocers, foodservice operators, club stores, mass merchandisers, food distributors and wholesalers, under the Calavo family of brand labels, as well as private labels. From time to time, some of our larger customers seek short-term sales contracts that formalize their pricing and volume requirements. Generally, these contracts contain provisions that establish a price floor and/or ceiling during the contract duration. In our judgment, the shift by our customers to requiring sales contracts as well as their desire for more consistent year round supply requiring multiple sourcing location benefit large handlers like us, which have the ability to fulfill the terms of these contracts. We believe we have developed strong long-term relationships with our customers that provides a solid base for our business. During fiscal year 2017, our 5 and 25 largest fresh customers represented approximately 18% and 39% of our total consolidated revenues. During fiscal year 2016, our 5 and 25 largest fresh products customers represented approximately 15% and 36% of our total consolidated revenues. During fiscal year 2017, 2016 and 2015 none of our fresh customers represented more than 10% of total consolidated revenues.

The Hass variety is the predominant avocado variety marketed on a worldwide basis. In California, the growing area stretches from San Diego County to Monterey County, with the majority of the growing areas located approximately 100 miles north and south of Los Angeles County. Generally, California grown Hass avocados are available year-round, with peak production periods occurring from April through August. In Mexico, we procure fruit from the growing regions of Uruapan Michoacán, Mexico and Jalisco, Mexico. The Mexican avocado harvest is year-round (though generally most significant from September to June in Michoacán and from June to January for Jalisco). Other significant harvest areas from which we have sourced, or from which we may source, avocados include Peru, Chile and Colombia. The storage life of fresh avocados (once picked from the tree) is limited, typically ranging from one to four weeks depending upon the maturity of the fruit, the growing methods used, and the handling conditions in the distribution chain.

Avocados delivered to our packinghouses are graded, sized, packed and cooled. The actual size and timing of the delivery of the annual avocado crop, has a substantial impact on both our costs and the sales price we receive for the fruit. To that end, our field personnel maintain direct contact with growers and farm managers and coordinate harvest plans. The feedback from our field-managers is used by our sales department to prepare sales plans used by our direct sales force. The process by which avocados are purchased from growers differs slightly across our different sourcing

regions. In California, avocado growers are provided daily field quotes, on a per pound basis, for most fruit. These quotes are based on the variety, size, and grade of California avocados and are calculated based on our expectations of how much we believe we will sell the fruit for, less our anticipated costs and our desired margin. Ultimately, we pay/settle with our California growers once a month. The purchase price we pay for fruit acquired from Mexican growers is generally negotiated for substantially all the fruit in a particular grove, by bloom. The Mexican avocado crop will typically have three to four blooms in a single year. Once a purchase price is tentatively agreed to, the fruit is then harvested and delivered to our packinghouses located in Mexico. We also purchase fruit directly from third-party Mexican packers as supplemental source and is packed to our standards for shipment to either our customers' or our operating facilities. Peruvian, Chilean and Colombian avocados are primarily handled on a commission basis, which is usually calculated as a percentage of the overall selling price.

Apart from the cost of fruit, significant portions of our avocado handling costs are fixed. As a result, significant fluctuations in the volume of avocados delivered have a considerable impact on the per pound packing costs of avocados we handle. Generally, larger crops will result in a lower per pound handling cost. As a result of our investment in

packinghouse equipment, distribution centers with value-added ripening and packing capabilities and personnel, we believe that our cost structure is geared to optimally handle larger avocado crops. We believe that our continued success in marketing avocados is largely dependent upon securing a reliable, high-quality supply of avocados at reasonable prices, and keeping the handling costs low as we ship avocados to our packinghouses and distribution centers. We are subject to USDA and other regulatory inspections to ensure the safety and the quality of the fruit being delivered.

We have also developed a series of value-added programs that are designed to differentiate our products and services from those offered by our competitors. Some of these key programs are as follows:

- Value-Added Ripening: We continue to have success with our ProRipeVIP™ avocado ripening program. This proprietary program allows us to deliver avocados ~evenly ripened to our customers' specifications. We have invested in TasteTech Near Infrared (NIR) technology and equipment. The most significant reason we invested in the TasteTech systems is because the NIR technology measures internal qualities of the entire piece of fruit, as opposed to competitive mechanical tests that use pressure and calculated averages to measure firmness. We believe that ripened avocados help our customers address the consumers' immediate needs and accelerate the sale of avocados through their stores.
- Value-Added Packaging: We have developed various display techniques and packages that appeal to consumers and, in particular, impulse buyers. Some of our techniques include the bagging of avocados and the strategic display of the bags within the produce section of retail stores. Our research has demonstrated that consumers generally purchase a larger quantity of avocados when presented in a bag as opposed to the conventional bulk displays. We also believe that the value proposition of avocados in a bag provides for a higher level of sales to grocery stores.

The avocado market is highly competitive with over one hundred U.S. avocado marketers and/or importers, such as Calavo, seeking to source avocados from over 20,000 independent avocado growers worldwide. Based on the information we have from various industry sources, we believe that Calavo is consistently among the largest avocado marketers in the US from a volume, sales and profitability perspective. We attribute our solid position as one of the top avocado distributors to the competitiveness of the per pound returns we pay and the communication and service we maintain with our growers. In addition, we believe our diversified, product assortment, consistent product quality and value-added programs provide us with a competitive advantage in servicing retail and foodservice customers.

Our Fresh business segment also markets and distributes select other perishable food products such as tomatoes and papayas ("Other Fresh Products"). Tomatoes are primarily handled on a consigned basis, while papayas are handled on a pooling basis, generally at a fixed fee per papaya delivered. Sales of our Other Fresh Products generally experience fluctuations related to seasonality. We believe our efforts in distributing our other various types of fruit complement our offerings of avocados.

The Calavo Foods segment was originally conceived as a mechanism to stabilize the price of California avocados by reducing the volume of fresh, whole avocados available to the marketplace. In the 1960's and early 1970's, we pioneered the process of freezing avocado pulp and developed a wide variety of guacamole recipes to address the diverse tastes of consumers and buyers in both the retail and foodservice industries. One of the key benefits of frozen products is their relatively longer shelf-life. With the introduction of low cost processed products delivered from Mexican based processors and the growing customer demand for more prepared avocado products we shifted the fruit procurement and pulp processing functions of our Foods segment to Mexico.

We utilize ultra-high pressure technology equipment, which is designed to protect and safeguard foods without the need of preservatives on all of our prepared avocado and guacamole products. This procedure substantially destroys the cells of any bacteria that could lead to spoilage, food safety, or oxidation issues without affecting the taste profile of the finished product. Once the procedure is complete, our packaged guacamole can be frozen to ensure a longer shelf-life or shipped fresh to various retail, club, and foodservice customers throughout the markets we service in the U.S and abroad. While the overwhelming majority of our Calavo Foods products are produced in our Uruapan, Mexico

production facility, we also utilize high-quality co-packers (using similar ultra-high pressure technology) from time-to-time, as we did in fiscal year 2017, to produce several of our retail and foodservice products.

For fiscal 2018, we believe our capacity will be sufficient for our expected growth due to a combination of production-enhancing initiatives at our facility and the further development of our network of co-packers. Net sales of our fresh, refrigerated (non-frozen) products, typically sold to retail customers, represented approximately 53% and 50% of total guacamole sales within the Calavo Foods segment for the years ended October 31, 2017 and 2016.

Sales in the U.S. and Canada are made principally through a commissioned nationwide broker network, which is supported by our regional sales managers. We believe that our marketing strength is distinguished by providing quality products, innovation, year-round product availability, strategically located warehouses, and market relationships. During fiscal year 2017, our 5 and 25 largest Calavo Foods customers represented approximately 3% and 6% of our total consolidated revenues. During fiscal year 2016, our 5 and 25 largest processed product customers represented approximately 3% and 6% of our total consolidated revenues. During fiscal years 2017, 2016 and 2015 none of our processed product customers represented more than 10% of total consolidated revenues.

RFG

Acquired in June of 2011, Renaissance Food Group is a leader in the fast-growing refrigerated fresh packaged foods category. RFG creates, markets, and distributes nationally a portfolio of healthy, high quality fresh packaged food products for consumers via the retail channel, including national and regional supermarkets, club stores, mass merchandisers, convenience stores, and specialty/natural retailers. As a leader in refrigerated fresh packaged foods, RFG utilizes a network of company-operated and independently-operated USDA and organic certified fresh food facilities strategically located across the U.S. These facilities allow RFG to offer national retailers high quality, refrigerated fresh foods that can be delivered within hours from time of production. Consumer demand is high for quality refrigerated fresh packaged foods and RFG's speed to market, product innovation and broad product range positions the Company well to serve retailers addressing this consumer trend. RFG products include fresh-cut fruit and vegetables, fresh prepared entrée salads, wraps, sandwiches and fresh snacking products as well as ready-to-heat entrees and other hot bar and various deli items, meals kits and related components and salad kits. RFG products are marketed under the Garden Highway Fresh Cut, Garden Highway, and Garden Highway Chef Essentials brands, as well as store-brand, private label programs. Backed by Calavo's resources, the business unit continues to expand its footprint in the retail grocery channel.

During fiscal year 2017, our 5 and 25 largest RFG product customers represented approximately 29% and 39% of our total consolidated revenues. During fiscal year 2016, our 5 and 25 largest RFG product customers represented approximately 25% and 36% of our total consolidated revenues. During fiscal years 2017 and 2016, RFG had one customer that represented more than 10% of total consolidated revenues. During fiscal year 2015, none of our RFG product customers represented more than 10% of total consolidated revenues.

Sales and Other Financial Information by Business Segment and Product Category

Sales and other financial information by business segment are provided in Note 11 to our consolidated financial statements that are included in this Annual Report.

Patents and Trademarks

Our trademarks include the Calavo and RFG brand name and related logos. We also utilize the following trademarks in conducting our business: Avo Fresco, Bueno, Calavo Gold, Calavo Salsa Lisa, Salsa Lisa, Celebrate the Taste, El Dorado, Fresh Ripe, Select, Taste of Paradise, The First Name in Avocados, Tico, Mfresh, Maui Fresh International, Triggered Avocados, ProRipeVIP™, Garden Highway Fresh Cut, Garden Highway, and Garden Highway Chef Essentials.

Working Capital Requirements

Generally, we make payments to our avocado growers and other suppliers in advance of collecting all of the related accounts receivable. We generally bridge the timing between vendor payments and customer receipts by using operating cash flows and commercial bank borrowings. In addition, we provide crop loans and other advances to some of our growers, which are also funded through operating cash flows and borrowings.

Non-California sourced avocados and other perishable food products often require working capital to finance the payment of advances to suppliers and collection of accounts receivable. These working capital needs are also financed through the use of operating cash flows and bank borrowings.

With respect to our Calavo Foods and RFG segments, we require working capital to finance the production of our prepared food products, building and maintaining an adequate supply of finished product, and collecting our accounts receivable balances. These working capital needs are financed through the use of operating cash flows and bank borrowings.

Backlog

Our customers do not place product orders significantly in advance of the requested product delivery dates. Customers typically order perishable products one to ten days in advance of shipment, and typically order Calavo Foods within thirty days in advance of shipment.

Research and Development

Prior to the acquisition of RFG, we did not undertake significant research and development efforts. Research and development programs, if any, were limited to the continuous process of refining and developing new techniques to enhance the effectiveness and efficiency of our Calavo Foods operations and the handling, ripening, storage, and packing of fresh avocados. With the acquisition of RFG, however, we have increased research and development for new and improved products which is driven by customer requests, changes in product specifications, customer and market research and/or innovative ideas generated by our own team of experts with food processing and culinary backgrounds. We solicit customer and supplier input, review process and product trends and conduct sensory and shelf life testing, all to expand the category and drive new sales for our customers. Research and development costs are charged to expense when incurred. Total research and development costs for fiscal years 2017, 2016 and 2015 were less than \$0.1 million.

Compliance with Government Regulations

As a manufacturer and marketer of consumable products, our operations are subject to extensive regulation by various federal government agencies, including the Food and Drug Administration (FDA), the USDA and the Federal Trade Commission (FTC), as well as state and local agencies, with respect to production processes, product attributes, packaging, labeling, storage and distribution. Under various statutes and regulations, these agencies prescribe requirements and establish standards for safety, purity and labeling. In addition, advertising of our products is subject to regulation by the FTC, and our operations are subject to certain health and safety regulations, including those issued under the Occupational Safety and Health Act. Our manufacturing facilities and products are subject to periodic inspection by federal, state and local authorities. In addition, we are subject to Mexican regulations through the Secretary of Agriculture, Livestock, Rural Development, Fisheries and Food/Plant Protection.

The California State Department of Food and Agriculture oversees the packing and processing of California avocados and conducts tests for fruit quality and packaging standards. All of our packages are stamped with the state seal as meeting standards. Various states have instituted regulations providing differing levels of oversight with respect to weights and measures, as well as quality standards.

As a result of our agricultural and food processing activities, we are subject to numerous environmental laws and regulations. These laws and regulations govern the treatment, handling, storage and disposal of materials and waste and the remediation of contaminated properties.

We seek to comply at all times with all such laws and regulations and to obtain any necessary permits and licenses, and we are not aware of any instances of material non-compliance. We believe our facilities and practices are sufficient to maintain compliance with applicable governmental laws, regulations, permits and licenses.

Employees

As of October 31, 2017, we had 2,516 employees, of which 954 were located in the United States and 1,562 were located in Mexico. We do not have a significant number of United States employees covered by a collective bargaining agreement. Approximately 1,300 of Calavo's Mexican employees are represented by a union. We consider the relationship with our employees to be good and we have never experienced a significant work stoppage.

The following is a summary of the number of "salaried" and "hourly" employees as of October 31, 2017.

Location	Salaried	Hourly	Total
United States	365	589	954
Mexico	257	1,305	1,562
TOTAL	622	1,894	2,516

Item 1A. Risk Factors

Risks Related to Our Business

We are subject to increasing competition that may adversely affect our operating results.

The market for avocados and processed avocado products is highly competitive and affects each of our businesses. Each of our businesses is subject to competitive pressures, including the following:

- The market for California avocados is impacted by an increasing volume of foreign grown avocados being imported into the United States. Recently, there have been significant plantings of avocados in Mexico, Chile, the Dominican Republic, Peru, Colombia and other parts of the world, which have had, and will continue to have, the effect of increasing the volume of foreign grown avocados entering the United States market.
- Avocados are subject to competition from other avocado handlers. If we are unable to consistently pay growers a competitive price for their avocados, these growers may choose to have their avocados marketed by alternate handlers.
- Mexican sourced avocados and perishable food products are impacted by competitors operating in Mexico. Generally, handlers of Mexican grown avocados operate facilities that are substantially smaller than our facility in Uruapan, Mexico. If we are unable to pack and market a sufficient volume of Mexican grown avocados, smaller handlers will have a lower per unit cost and be able to offer Mexican avocados at a more competitive price to our customers.

We rely on co-packers for a portion of our manufacturing needs.

We utilize high-quality co-packers to produce a portion of our retail and foodservice products. If we are unable to utilize quality co-packers effectively, we may not be able to meet our manufacturing needs for our expected growth. We closely monitor and audit the quality of our co-packers; and furthermore, our co-packers are required to maintain insurance. But we are still subject to risks related to the production or processed foods.

Environmental and other regulation of our business, including potential climate change regulation, could adversely impact us by increasing our production cost or restricting our ability to import certain products into the United States.

There has been a broad range of proposed and promulgated state, national and international regulation aimed at reducing the effects of climate change. Such regulations apply or could apply in countries where we have interests or could have interests in the future. In the United States, there is a significant possibility that some form of regulation will be enacted at the federal level to address the effects of climate change. Such regulation could take several forms that could result in additional costs in the form of taxes, the restriction of output, investments of capital to maintain compliance with laws and regulations, or required acquisition or trading of emission allowances. Climate change regulation continues to evolve, and while it is not possible to accurately estimate either a timetable for implementation or our future compliance costs relating to implementation, we do not believe that such regulation is reasonably likely to have a material effect in the foreseeable future on our business, results of operations, capital expenditures or financial position.

We could be subject to changes in tax rates, the adoption of new U.S. or international tax legislation or exposure to additional tax liabilities.

We are subject to taxes in the U.S. and Mexico. Due to economic and political conditions, tax rates in various jurisdictions may be subject to significant change. Our effective tax rates could be affected by changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of deferred tax assets and liabilities, or changes in tax laws or their interpretation.

We are also subject to the examination of our tax returns and other tax matters by the U.S. Internal Revenue Service (the "IRS") and other tax authorities. We regularly assess the likelihood of an adverse outcome resulting from these examinations to determine the adequacy of its provision for taxes. There can be no assurance as to the outcome of these examinations. If our effective tax rates were to increase, or if the ultimate determination of our taxes owed is for an amount in excess of amounts previously accrued, our financial condition, operating results and cash flows could be adversely affected.

We are subject to the risks of doing business internationally.

We conduct a substantial amount of business with growers and customers who are located outside the United States. We purchase avocados from foreign growers and packers, sell fresh avocados and processed avocado products to foreign customers, and operate a packinghouse and a processing plant in Mexico. In the most recent years, there has been an increase in organized crime in Mexico. This has not had a significant impact on our operations, but this does increase the risk of doing business in Mexico. We are also subject to regulations imposed by the Mexican government, and also to examinations by the Mexican tax authorities. Significant changes to these government regulations and to assessments by the Mexican tax authorities can have a negative impact on our operations and operating results in Mexico. For additional information about our Mexican sourced fruit, see the "Business" section included in this Annual Report.

Our current international operations are subject to a number of inherent risks, including:

- Local economic and political conditions, including disruptions in supply, trading and capital markets;
- Restrictive US and foreign governmental actions, such as restrictions on transfers of funds and trade protection measures, including import/export duties and quotas and customs duties and tariffs; and
- Changes in legal or regulatory requirements affecting foreign investment, loans, taxes (including value-added taxes), imports, and exports.

Currency exchange fluctuations may impact the results of our operations.

Currency exchange rate fluctuations, depending upon the nature of the changes, may make our domestic-sourced products more expensive compared to foreign grown products or may increase our cost of obtaining foreign-sourced products. Because we do not hedge against our foreign currency exposure, our business has increased susceptibility to foreign currency fluctuations.

We and our growers are subject to the risks that are inherent in farming.

Our results of operations may be adversely affected by numerous factors over which we have little or no control and that are inherent in farming, including reductions in the market prices for our products, adverse weather (including but not limited to drought, high winds, earthquakes and/or wildfire) and growing conditions, pest and disease problems, and new government regulations regarding farming and the marketing of agricultural products.

Our earnings are sensitive to fluctuations in market prices and demand for our products.

Excess supplies often cause severe price competition in our industry. Growing conditions in various parts of the world, particularly weather conditions such as windstorms, floods, droughts and freezes, as well as diseases and pests, are primary factors affecting market prices because of their influence on the supply and quality of product.

Fresh produce is highly perishable and generally must be brought to market and sold soon after harvest. The selling price received for each type of produce depends on all of these factors, including the availability and quality of the produce item in the market, and the availability and quality of competing types of produce.

In addition, general public perceptions regarding the quality, safety or health risks associated with particular food products could reduce demand and prices for some of our products. To the extent that consumer preferences evolve away from products that we produce for health or other reasons, and we are unable to modify our products or to develop products that satisfy new consumer preferences, there will be a decreased demand for our products.

Increases in commodity or raw product costs, such as fuel, packaging, and paper, could adversely affect our operating results.

Many factors may affect the cost and supply of fresh produce, including external conditions, commodity market fluctuations, currency fluctuations, changes in governmental laws and regulations, agricultural programs, severe and prolonged weather conditions and natural disasters. Increased costs for purchased fruit have in the past negatively impacted our operating results, and there can be no assurance that they will not adversely affect our operating results in the future.

The price of various commodities can significantly affect our costs. Fuel and transportation cost is a significant component of the price of much of the produce that we purchase from growers, and there can be no assurance that we

will be able to pass on to our customers the increased costs we incur in these respects.

The cost of paper is also significant to us because most of our products are packed in cardboard boxes. If the price of paper increases and we are not able to effectively pass these price increases along to our customers, then our operating income will decrease.

We are subject to the risk of product liability claims.

The sale of food products for human consumption involves the risk of injury to consumers. Such injuries may result from tampering by unauthorized third parties, product contamination or spoilage, including the presence of foreign objects, substances, chemicals, other agents, or residues introduced during the growing, storage, handling or transportation phases. While we are subject to governmental inspection and regulations and believe our facilities comply in all material respects with all applicable laws and regulations, we cannot be sure that consumption of our products will not cause a health-related illness in the future or that we will not be subject to claims or lawsuits relating to such matters. Even if a product liability claim is unsuccessful or is not fully pursued, the negative publicity surrounding any assertion that our products caused illness or injury could adversely affect our reputation with existing and potential customers and our corporate and brand image.

We are subject to possible changing USDA and FDA regulations which govern the importation of foreign avocados into the United States and the processing of processed avocado products.

The USDA has established, and continues to modify, regulations governing the importation of avocados into the United States. Our permits that allow us to import foreign-sourced avocados into the United States generally are contingent on our compliance with these regulations. Our results of operations may be adversely affected if we are unable to comply with existing and modified regulations and are unable to secure avocado import permits in the future.

The FDA establishes, and continues to modify, regulations governing the production of processed avocado products, such as the new Food Safety Modernization Act, which implements mandatory preventive controls for food facilities and compliance with mandatory produce safety standards. Our results of operations may be adversely affected if we are unable to comply with these existing and modified regulations.

If a transaction intended to qualify as a Section 1031 Exchange is later determined to be taxable, we may face adverse consequences, and if the laws applicable to such transactions are amended or repealed, we may not be able to dispose of properties on a tax deferred basis.

From time to time we may dispose of properties in transactions that are intended to qualify as tax deferred exchanges under Section 1031 (Section 1031 Exchanges). It is possible that the qualification of a transaction as a Section 1031 Exchange could be successfully challenged and determined to be currently taxable. In addition, if a Section 1031 Exchange were later determined to be taxable, we may be required to amend our tax returns for the applicable year in question, including any information reports we sent our stockholders. Moreover, it is possible that legislation could be enacted that could modify or repeal the laws with respect to Section 1031 Exchanges, which could make it more difficult or not possible for us to dispose of properties on a tax deferred basis.

The acquisition of other businesses could pose risks to our operating income.

We intend to review acquisition prospects that would complement our business. While we are not currently a party to any definitive agreement with respect to any acquisitions, we may acquire other businesses in the future. Future acquisitions by us could result in accounting charges, potentially dilutive issuances of equity securities, and increased debt and contingent liabilities, any of which could have a material adverse effect on our business and the market price of our common stock. Acquisitions entail numerous risks, including the integration of the acquired operations, diversion of management's attention to other business concerns, risks of entering markets in which we have limited prior experience, and the potential loss of key employees of acquired organizations. We may be unable to successfully integrate businesses or the personnel of any business that might be acquired in the future, and our failure to do so could have a material adverse effect on our business and on the market price of our common stock.

Our ability to competitively serve our customers is a function of reliable and low cost transportation. Disruption of the supply of these services and/or significant increases in the cost of these services could impact our operating income.

We use multiple forms of transportation to bring our products to market. They include ocean, truck, and air-cargo. Disruption to the timely supply of these services or dramatic increases in the cost of these services for any reason including availability of fuel for such services, labor disputes, or governmental restrictions limiting specific forms of transportation could have an adverse effect on our ability to serve our customers and consumers and could have an adverse effect on our financial performance.

We depend on our infrastructure to have sufficient capacity to handle our annual production needs.

We have an infrastructure that has sufficient capacity for our production needs, but if we lose machinery or facilities due to natural disasters or mechanical failure, we may not be able to operate at a sufficient capacity to meet our production needs. This could have a material adverse effect on our business, which could impact our results of operations and our financial condition.

We depend on our key personnel and if we lose the services of any of these individuals, or fail to attract and retain additional key personnel, we may not be able to implement our business strategy or operate our business effectively.

Our future success largely depends on the contributions of our management team. We believe that these individuals' expertise and knowledge about our industry and their respective fields and their relationships with other individuals in our industry are critical factors to our continued growth and success. We do not carry key person insurance. The loss of the services of any member of our senior management team could have a material adverse effect on our business and prospects. Our success also depends upon our ability to attract and retain additional qualified sales, marketing and other personnel.

A portion of our workforce is unionized and labor disruptions could decrease our profitability.

While we believe that our relations with our employees are good, we cannot assure you that we will be able to negotiate collective bargaining agreements on favorable terms, or at all, and without production interruptions, including labor stoppages. A prolonged labor dispute, which could include a work stoppage, could have a material adverse effect on the portion of our business affected by the dispute, which could impact our business, results of operations and financial condition.

System security risks, data protection breaches, cyber-attacks and systems integration issues could disrupt our internal operations or services provided to customers, and any such disruption could reduce our expected revenue, increase our expenses, damage our reputation and adversely affect our stock price.

Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate or compromise our confidential information or that of third parties, create system disruptions or cause shutdowns. Computer programmers and hackers also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our products or otherwise exploit any security vulnerabilities of our products. In addition, sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the system. The costs to us to eliminate or alleviate cyber or other security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and our efforts to address these problems may not be successful and could result in interruptions, delays, cessation of service and loss of existing or potential customers that may impede our sales, manufacturing, distribution or other critical functions.

Portions of our IT infrastructure may also experience interruptions, delays or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. We may not be successful in implementing new systems and transitioning data, which could cause business disruptions and be more expensive, time consuming, disruptive and resource-intensive. Such disruptions could adversely impact our ability to fulfill orders and interrupt other processes. Delayed sales, lower profit or lost customers resulting from these disruptions

have adversely affected us in the past, and in the future could adversely affect, our financial results, stock price and reputation.

Risks Related to Our Common Stock

The value of our common stock may be adversely affected by market volatility.

The trading price of our common stock fluctuates and may be influenced by many factors, including:

- Our operating and financial performance and prospects;
 - Announcements we make about our business, financial performance and prospects;
- Short-interest in our common stock, which may be significant from time-to-time;
- The depth and liquidity of the market for our common stock;
- Investor perception of us and the industry and markets in which we operate;
- Our inclusion in, or removal from, any equity market indices;
- Changes in earnings estimates or buy/sell recommendations by analysts;
- Whether or not we meet earnings estimates of analysts who follow our Company; and

- General financial, domestic, international, economic and other market conditions.

Our ability to raise capital in the future may be limited, and our failure to raise capital when needed could prevent us from executing our growth strategy.

The timing and amount of our working capital and capital expenditure requirements may vary significantly depending on many factors, including:

- Market acceptance of our products; and
- The existence of opportunities for expansion.

If our capital resources are not sufficient to satisfy our liquidity needs, we may seek to sell additional equity or obtain additional debt financing. The sale of additional equity would result in dilution to our shareholders. Additional debt would result in increased expenses and could result in covenants that would restrict our operations. With the exception of our existing credit facility, we have not made arrangements to obtain additional financing. We may not be able to obtain additional financing, if required, in amounts or on terms acceptable to us, or at all.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We lease our corporate headquarters building from Limoneira Company (Limoneira) located in Santa Paula, California. In addition, RFG leases their corporate office in Rancho Cordova, California. We have numerous facilities throughout the United States and three facilities in Mexico. See the following table for a summary of our locations:

United States Locations:

Packinghouses:

Leased or Owned:	City	State	Description
Owned	Santa Paula	California	Primarily handles fresh avocados. The facility was purchased in 1955 and has been improved in capacity and efficiency since then. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.
Owned	Temecula	California	Primarily handles fresh avocados. The facility was built in 1985 and has been improved in capacity and efficiency since then. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.

Operating and Distributing Facilities:

Leased or Owned:	City	State	Description
Owned	Santa Paula	California	Primarily ripens, sorts, packs and ships fresh avocados. We sort and pack certain other fresh products as well. We believe that the annual capacity of this facility will be sufficient to pack and ripen, if necessary, its expected annual volume of avocados and other fresh products delivered to us.
Leased	Swedesboro	New Jersey	Primarily ripens, sorts, packs, and ships avocados. Additionally, it also serves to store and ship certain other fresh products, as well as prepared foods and prepared guacamole products. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.
Leased	Garland	Texas	Primarily ripens, sorts, packs and ships fresh avocados. Additionally, it also serves to store and ship prepared guacamole products as well. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.
Leased	Jacksonville	Florida	Opened in the first fiscal quarter of 2016, this facility ripens, sorts, packs and ships fresh avocados and stores and ships prepared guacamole. This facility also processes fresh-cut fruits and vegetables, and prepared foods. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.
Leased	Nogales	Arizona	Primarily ripens, sorts, packs and ships tomatoes. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.
Leased	Hilo	Hawaii	Primarily sorts, packs, and ships papayas. We believe that the annual capacity will be sufficient to handle its forecasted annual production needs.
Owned	Hilo	Hawaii	Primarily provides irradiation services for produce grown in Hawaii. We believe that the annual capacity will be sufficient to handle its forecasted annual production needs.
Leased	St. Paul	Minnesota	CSL facility that produces salsa. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.
Leased	Houston	Texas	RFG facility that primarily processes fresh-cut fruits and vegetables, and prepared foods. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.
Owned	Riverside	California	Purchased in November 2016, this RFG facility primarily processes fresh-cut fruits and vegetables, and prepared foods. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.

Leased	Sacramento	California	RFG facility that primarily processes fresh-cut fruits and vegetables, and prepared foods. We believe that the annual capacity of this facility will be sufficient to handle its forecasted annual production needs.
--------	------------	------------	--

Mexico Locations:

Packinghouse and Processing Facility:

Leased or Owned:	City	State	Description
Owned	Uruapan	Michoacan	Our Calavo Foods processing facility produces our guacamole products. While we believe this capacity is reasonable given our current sales, we are considering various plans to meet our future expected growth.
Owned	Uruapan	Michoacan	Handles avocados delivered to us by Mexican growers. The facility was built in 1985 and has been significantly improved in capacity and efficiency since then. We believe that the annual capacity of this facility will be sufficient to process its forecasted annual production needs.
Owned	Ciudad Guzman	Jalisco	Opened in the third quarter of 2017, this ADJ facility handles avocados delivered to us by Mexican growers. We believe that the annual capacity of this facility will be sufficient to process its forecasted annual production needs.

Executive Officers of the Registrant

The following table sets forth the name, age and position of individuals who hold positions as executive officers of our company. There are no family relationships between any director or executive officer and any other director or executive officer of our company. Executive officers are elected by the Board of Directors and serve at the discretion

of the Board.

Name	Age	Position
Lecil E. Cole	78	Chairman of the Board, President and Chief Executive Officer
B. John Lindeman	47	Chief Financial Officer and Corporate Secretary
Robert J. Wedin	68	Vice President, Sales and Fresh Marketing
Michael A. Browne	59	Vice President, Fresh Operations
Ronald A. Araiza	58	Vice President, Foods Division Sales and Operations
James E. Gibson	55	President, RFG

Lecil E. Cole has been a member of our board of directors since February 1982 and has served as Chairman of the Board since 1988. Mr. Cole has also served as our Chief Executive Officer since February 1999. He served as an executive of Safeway Stores from 1964 to 1976 and as Chairman of Central Coast Federal Land Bank from 1986 to 1996. Mr. Cole farms approximately 4,400 acres in California on which avocados and cattle are produced and raised.

B. John Lindeman has served as our Chief Financial Officer and Corporate Secretary since August 2015. Prior to joining Calavo, Mr. Lindeman served as Managing Director at Sageworth Trust Company. Prior to joining Sageworth, Mr. Lindeman served as Managing Director at Janney Montgomery Scott from August 2009 to March 2015. Prior to joining Janney, Mr. Lindeman served as Managing Director at Stifel Nicolaus from December 2005 to August 2009 and as Principal at Legg Mason from October 1999 to December 2005. Prior to joining Legg Mason, Mr. Lindeman was a Manager at PricewaterhouseCoopers LLP.

Robert J. Wedin has served as our Vice President since 1993. Mr. Wedin joined us in 1973 at our then Santa Barbara packinghouse. Beginning in 1990, Mr. Wedin served as a director of the California Avocado Commission for a period of ten years. Mr. Wedin currently is a board member of Producesupply.org and serves as a member of that organization's executive committee.

Michael A. Browne has served as our Vice President since May 2005. From 1997 until joining us, Mr. Browne served as the founder and co-owner of Fresh Directions International, a closely held multinational fresh produce company, which marketed fresh avocados from Mexico, Chile, and the Dominican Republic.

Ronald A. Araiza has served as our Vice President since January 2017. Mr. Araiza has approximately twenty years of experience as a Vice President at Mission Produce and Del Rey Avocado.

James E. Gibson has served as President of RFG since October 26, 2017. Prior to his recent appointment as President of RFG, Mr. Gibson served as Chief Operating Officer of RFG since 2003.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

In March 2002, our common stock began trading on the OTC Bulletin Board under the symbol "CVGW." In July 2002, our common stock began trading on the Nasdaq National Market under the symbol "CVGW" and currently trades on the Nasdaq Global Select Market.

The following tables set forth, for the periods indicated, the high and low sales prices per share of our common stock as reported on the Nasdaq Global Select Market.

Fiscal 2017	High	Low
First Quarter	\$ 66.35	\$ 53.65
Second Quarter	\$ 66.60	\$ 51.20
Third Quarter	\$ 76.15	\$ 64.43
Fourth Quarter	\$ 74.80	\$ 66.35

Fiscal 2016	High	Low
First Quarter	\$ 56.58	\$ 48.12
Second Quarter	\$ 57.54	\$ 47.64
Third Quarter	\$ 67.43	\$ 55.10
Fourth Quarter	\$ 69.78	\$ 58.78

As of November 30, 2017, there were approximately 810 stockholders of record of our common stock, which includes shareholders whose shares were held in brokerage firms, depositories and other institutional firms in “street name”.

Dividend Policy

Our dividend policy is to provide for an annual dividend payment, as determined by the Board of Directors. We anticipate paying dividends in the first quarter of our fiscal year.

On December 8, 2017, we paid a \$0.95 per share dividend in the aggregate amount of \$16.7 million to shareholders of record on November 17, 2017. On December 8, 2016, we paid a \$0.90 per share dividend in the aggregate amount of \$15.7 million to shareholders of record on November 17, 2016.

Item 6. Selected Financial Data

SELECTED CONSOLIDATED FINANCIAL DATA

The following summary of consolidated financial data (other than pounds information) for each of the years in the five-year period ended October 31, 2017, are derived from the audited consolidated financial statements of Calavo Growers, Inc.

Historical results are not necessarily indicative of results that may be expected in any future period. The following data should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements and notes thereto that are included elsewhere in this Annual Report.

	Fiscal Year Ended October 31,				
	2017	2016	2015	2014	2013
	(In thousands, except per share data)				
Income Statement Data: (1)(2)(5)(6)					
Net sales	\$ 1,075,565	\$ 935,679	\$ 856,824	\$ 782,510	\$ 691,451
Gross profit	114,544	107,534	85,227	71,228	59,448
Selling, general and administrative	56,651	46,440	41,558	36,605	33,485
Net income attributable to Calavo Growers, Inc.	37,270	38,022	27,199	97	(1,795)
Basic net income per share	\$ 2.14	\$ 2.19	\$ 1.57	\$ 0.01	\$ (0.12)
Diluted net income per share	\$ 2.13	\$ 2.18	\$ 1.57	\$ 0.01	\$ (0.12)
Balance Sheet Data as of End of Period:					
Working capital	\$ 3,661	\$ 25,612	\$ 18,964	\$ 22,047	\$ (3,252)
Total assets	364,117	327,933	284,945	283,464	239,810
Accrued expenses	39,946	31,095	21,311	25,303	36,541
Current portion of long-term obligations	129	138	2,206	5,099	5,258
Long-term obligations, less current portion	439	445	586	2,791	7,792
Shareholders' equity	244,122	215,069	185,982	179,406	119,093
Cash Flows Provided by (Used in):					
Operations	\$ 62,140	\$ 61,968	\$ 37,283	\$ 24,547	\$ 13,712
Investing(2)(3)(4)	(53,668)	(21,731)	(21,054)	(21,753)	(7,746)
Financing(4)	(15,689)	(33,566)	(15,802)	(4,069)	(5,050)
Other Data:					

Edgar Filing: CALAVO GROWERS INC - Form 10-K

Cash dividends declared per share	\$ 0.95	\$ 0.90	\$ 0.80	\$ 0.75	\$ 0.70
Net book value per share	\$ 13.92	\$ 12.33	\$ 10.70	\$ 10.37	\$ 7.58
Pounds of California avocados sold	53,875	109,545	75,538	74,438	141,400
Pounds of non-California avocados sold	245,463	278,200	312,710	258,940	218,244
Pounds of processed avocados products sold	29,911	26,773	27,182	26,451	21,636

(1) In July 2013, we entered into an Amended and Restated Limited Liability Company Agreement of FreshRealm. When we deconsolidated FreshRealm (see below), principal operations had not yet commenced. As a result, FreshRealm had no sales or cost of sales. FreshRealm had incurred \$1.0 million and \$1.9 million of expenses related to its development as of October 31, 2014 and 2013, which are included in selling, general and administrative expenses.

(2) In May 2014, we deconsolidated FreshRealm (see above). We recorded a gain on the deconsolidation of FreshRealm of \$12.6 million, which has been recorded on the face of the income statement as other income. For fiscal 2017 and 2016, we contributed \$7.5 million and \$3.2 million as investments in FreshRealm. Our total investment of \$28.4 million and \$21.0 million in FreshRealm as of October 31, 2017 and 2016, has been recorded as investment in unconsolidated subsidiaries on our balance sheet.

- (3) In July 2015, Calavo Growers de Mexico entered into a Shareholder Agreement with Belo, a Mexican Company owned by Agricola Belher, and Don Memo. Don Memo, a Mexican corporation created in July 2013, is engaged in the business of owning and improving land in Jalisco, Mexico for the growing of tomatoes and other produce and the sale and distribution of tomatoes and other produce. In fiscal 2017, 2016, 2015, and 2013, we contributed \$0.5 million, \$2.3 million, \$1.0 million, and \$1.0 million as investments in Don Memo. In fiscal 2015 and 2014, we advanced \$0.8 million and \$3.2 million. These monies totaling \$4.0 million, effectively a bridge loan, were repaid in the first quarter of fiscal 2016. We had recorded such loans in prepaids and other current assets.
- (4) Cost of Sales for fiscal 2014 and 2013 include non-cash compensation expenses related to the acquisition of RFG totaling \$1.8 million, and \$0.7 million. These non-cash expenses will not continue in the future.
- (5) Selling, General, and Administrative expenses for fiscal 2014 and 2013 include non-cash compensation expenses related to the acquisition of RFG totaling \$0.7 million, and \$0.3 million. These non-cash expenses will not continue in the future.
- (6) Included in accrued liabilities as of October 31, 2013 is a non-cash, contingent consideration liability totaling \$15.6 million related to the acquisition of RFG. This liability resolved during fiscal 2014 and will not continue in the future.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of our financial condition and results of operations together with "Selected Consolidated Financial Data" and our consolidated financial statements and notes thereto that appear elsewhere in this Annual Report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties, and assumptions. Actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including, but not limited to, those presented under "Risks related to our business" included in Item 1A and elsewhere in this Annual Report.

Overview

We are a leader in the distribution of avocados, prepared avocado products, and other perishable food products throughout the United States. Our expertise in marketing and distributing avocados, prepared avocados, and other perishable foods allows us to deliver a wide array of fresh and prepared food products to retail grocery, foodservice, club stores, mass merchandisers, food distributors and wholesalers on a worldwide basis. We procure avocados from California, Mexico and other growing regions around the world. Through our various operating facilities, we (i) sort, pack, and/or ripen avocados, tomatoes and/or Hawaiian grown papayas, (ii) process and package a portfolio of healthy fresh foods including fresh-cut fruit, fresh-cut vegetables, and prepared foods and (iii) process and package guacamole and salsa. We report our operations in three different business segments: Fresh products, Calavo Foods and RFG. See Note 11 to our consolidated financial statements for further discussion.

Our Fresh products business grades, sizes, packs, cools, and ripens (if desired) avocados for delivery to our customers. During fiscal 2017, we operated two packinghouses and four operating and distributing facilities that handle avocados across the United States. We believe that our continued success in marketing avocados is largely dependent upon securing a reliable, high-quality supply of avocados at reasonable prices, and keeping the handling costs low as we ship avocados to our packinghouses and distribution centers. We believe our diversified avocado sources help provide a level of relative supply stability that may, over time, serve to increase the availability and demand for avocados among consumers in the United States and elsewhere in the world. Significant fluctuations in the volume of avocados delivered have an impact on the per pound packing costs of avocados we handle. Generally, larger crops will result in a lower per pound handling cost. As a result of our investment in packinghouse equipment, distribution centers with value-added ripening and packing capabilities, and personnel, we believe that our cost structure is geared to optimally handle larger avocado volume. We believe our efforts in distributing our other various perishable foods, such as tomatoes and papayas, complement our offerings of avocados. From time to time, we continue to explore the distribution of other crops that provide reasonable returns to our business.

Our Calavo Foods business procures avocados, processes avocados into a wide variety of guacamole products, and distributes the processed product to our customers. All of our prepared avocado products shipped to North America are "cold pasteurized" and include both frozen and fresh guacamole. Due to the freshness of our refrigerated guacamole and relatively longer shelf-life of our frozen guacamole, we believe that we are well positioned to address the diverse taste and needs of today's foodservice and retail customers. Additionally, we also prepare various fresh salsa products. Our Calavo Foods segment maintains relationships with foodservice companies and food retailers. We

continue to seek to expand our relationships with major foodservice companies and food retailers and develop alliances that will allow our products to reach a larger percentage of the marketplace.

Net sales of frozen products represented approximately 47% and 50% of total processed segment sales for the years ended October 31, 2017 and 2016. Net sales of our refrigerated products represented approximately 53% and 50% of total processed segment sales for the years ended October 31, 2017 and 2016.

Our RFG business produces, markets and distributes nationally a portfolio of healthy, high quality fresh packaged food products for consumers sold through the retail channel. RFG products include fresh-cut fruit and vegetables, fresh prepared entrée salads, wraps, sandwiches and fresh snacking products, as well as ready-to-heat entrees and other hot bar and various deli items, meals kits and salad kits. RFG products are marketed under the Garden Highway Fresh Cut, Garden Highway, and Garden Highway Chef Essentials brands, as well as store-brand and private label programs.

The operating results of all of our businesses have been, and will continue to be, affected by quarterly and annual fluctuations and market downturns due to a number of factors, including but not limited to pests and disease, weather patterns, changes in demand by consumers, the timing of the receipt, reduction, or cancellation of significant customer orders, the gain or loss of significant customers, market acceptance of our products, our ability to develop, introduce, and market new products on a timely basis, availability and cost of avocados and supplies from growers and vendors, new product introductions by our competitors, the utilization of production capacity at our various plant locations, change in the mix of avocados and Calavo Foods and RFG products we sell, and general economic conditions. We believe, however, that we are currently positioned to address these risks and deliver favorable operating results for the foreseeable future.

Recent Developments

Dividend Payment

On October 4, 2017, the Company declared a \$0.95 per share cash dividend to shareholders of record on November 17, 2017. On December 8, 2017, the Company paid this cash dividend which totaled \$16.7 million.

Riverside facility

On November 1, 2016, we acquired certain real property, consisting of land, a refrigerated building and select production and office equipment located at 1730 Eastridge Avenue, Riverside, California from Fresh Foods, LLC for total consideration of approximately \$19.4 million. We intend to operate the refrigerated facility as part of our network of USDA and organic certified fresh food facilities.

The Thomas fire

We have multiple facilities located in Santa Paula, California, most notably our corporate headquarters. None of our facilities sustained damage from the Thomas fire in California and disruption to our operations was minimal. We do not expect the fires in Ventura County to have a significant impact on our avocado volumes or earnings. We expect to manage through any shortfall in the Ventura County avocado supply through our diversified avocado sourcing.

Litigation

We are currently a named defendant in two class action lawsuits filed in Superior state courts in California alleging violations of California wage-and-hour laws, failure to pay overtime, failure to pay for missed meal and rest periods, failure to provide accurate itemized wage statements, failure to pay all wages due at the time of termination or resignation, as well as statutory penalties for violation of the California Labor Code and Minimum Wage Order-2014.

In August 2017, the parties reached a tentative settlement of the case, whereby we agreed to pay \$0.4 million to resolve the allegations and avoid further distraction that would result if the litigation continued. The settlement is subject to court approval. The Company recorded \$0.4 million as a selling, general and administrative expense in the third quarter of fiscal 2017.

From time to time, we are also involved in other litigation arising in the ordinary course of our business that we do not believe will have a material adverse impact on our financial statements.

Mexico tax audits

We conduct business internationally and, as a result, one or more of our subsidiaries files income tax returns in U.S. federal, U.S. state and certain foreign jurisdictions. Accordingly, in the normal course of business, we are subject to examination by taxing authorities, primarily in Mexico and the United States. During our third quarter of fiscal 2016, our wholly-owned subsidiary, Calavo de Mexico (“CDM”), received a written communication from the Ministry of Finance and Administration of the government of the State of Michoacan, Mexico (“MFM”) containing preliminary observations related to a fiscal 2011 tax audit of such subsidiary. MFM’s preliminary observations outline certain

proposed adjustments primarily related to intercompany funding, deductions for services from certain vendors/suppliers and Value Added Tax (“VAT”). During our fourth fiscal quarter of 2016, we provided a written rebuttal to MFM’s preliminary observations and requested the adoption of a conclusive agreement before the PRODECON (Local Tax Ombudsman) so that a full discussion of the case between us, the MFM and the PRODECON, as appropriate, can lead to a reconsideration of the MFM findings. During our third and fourth fiscal quarters of 2017, several meetings between MFM, PRODECON and us took place and on November 28, 2017, the PRODECON process concluded. As a result, the MFM is expected to issue its final assessment within the following five months. If the MFM’s final assessment does not differ materially from their preliminary observations, then we will resolve the matter through legal means. We believe we have the legal arguments and documentation to sustain the positions challenged by tax authorities.

Additionally, we also received notice from Mexico's Federal Tax Administration Service, Servicio de Administracion Tributaria (SAT), that our wholly-owned Mexican subsidiary, Calavo de Mexico, is currently under examination related to fiscal year 2013. In January 2017 we received preliminary observations from SAT outlining certain proposed adjustments primarily related to intercompany funding deductions for services from certain vendors/suppliers and VAT. We provided a written rebuttal to these preliminary observations during our second fiscal quarter of 2017 which the SAT is in process of analyzing. During our third fiscal quarter of 2017, we requested the adoption of a conclusive agreement before the PRODECON (Local Tax Ombudsman) so that a full discussion of the case between us, the SAT and the PRODECON, as appropriate, can lead to a reconsideration of the SATs findings. We expect that several formal meetings between us, the SAT and the PRODECON will be required before the SAT will reach a conclusion. Note that during the meeting and discussion process, the fiscal year 2013 final assessment (previously expected no later September 2017) has been suspended.

We believe that the ultimate resolution of these matters is unlikely to have a material effect on our consolidated financial position.

Critical Accounting Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an ongoing basis, we re-evaluate all of our estimates, including those related to the areas of customer and grower receivables, inventories, useful lives of property, plant and equipment, promotional allowances, equity income/losses from unconsolidated entities, income taxes, retirement benefits, and commitments and contingencies. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Additionally, we frequently engage third party valuation experts to assist us with estimates described below. Actual results may materially differ from these estimates under different assumptions or conditions as additional information becomes available in future periods.

Management has discussed the development and selection of critical accounting estimates with the Audit Committee of the Board of Directors and the Audit Committee has reviewed our disclosure relating to critical accounting estimates in this Annual Report.

We believe the following are the more significant judgments and estimates used in the preparation of our consolidated financial statements.

Promotional allowances. We provide for promotional allowances at the time of sale, based on our historical experience. Our estimates are generally based on evaluating the relationship between promotional allowances and gross sales. The derived percentage is then applied to the current period's sales revenues in order to arrive at the appropriate debit to sales allowances for the period. The offsetting credit is made to accrued liabilities. When certain amounts of specific customer accounts are subsequently identified as promotional, they are written off against this allowance. Actual amounts may differ from these estimates and such differences are recognized as an adjustment to net sales in the

period they are identified. We estimate that a one percent (100 basis point) change in the derived percentage for the entire year would impact results of operations by approximately \$0.9 million.

Income taxes. We account for deferred tax liabilities and assets for the future consequences of events that have been recognized in our consolidated financial statements or tax returns. Measurement of the deferred items is based on enacted tax laws. In the event the future consequences of differences between financial reporting bases and tax bases of our assets and liabilities result in a deferred tax asset, we perform an evaluation of the probability of being able to realize the future benefits indicated by such asset. A valuation allowance related to a deferred tax asset is recorded when it is more likely than not that some portion or all of the deferred tax asset will not be realized.

As a multinational corporation, we are subject to taxation in many jurisdictions, and the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax laws and regulations in various taxing jurisdictions. If we ultimately determine that the payment of these liabilities will be unnecessary, the liability will be reversed and we will recognize a tax benefit during the period in which it is determined the liability no longer applies. Conversely, we record additional tax charges in a period in which it is determined that a recorded tax liability is less than the ultimate assessment is expected to be.

The application of tax laws and regulations is subject to legal and factual interpretation, judgment and uncertainty. Tax laws and regulations themselves are subject to change as a result of changes in fiscal policy, changes in legislation, the evolution of regulations and court rulings. Therefore, the actual liability for U.S. or foreign taxes may be materially different from management's estimates, which could result in the need to record additional tax liabilities or potentially reverse previously recorded tax liabilities.

Goodwill and acquired intangible assets. Goodwill, defined as unidentified asset(s) acquired in conjunction with a business acquisition, is tested for impairment on an annual basis and between annual tests whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Goodwill is tested at the reporting unit level, which is defined as an operating segment or one level below the operating segment. We can use a qualitative test, known as "Step 0," or a two-step quantitative method to determine whether impairment has occurred. In Step 0, we elect to perform an optional qualitative analysis and based on the results skip the two step analysis. In fiscal 2017, 2016 and 2015, we elected to implement Step 0 and were not required to conduct the remaining two step analysis. Goodwill impairment testing requires significant judgment and management estimates, including, but not limited to, the determination of (i) the number of reporting units, (ii) the goodwill and other assets and liabilities to be allocated to the reporting units and (iii) the fair values of the reporting units. The estimates and assumptions described above, along with other factors such as discount rates, will significantly affect the outcome of the impairment tests and the amounts of any resulting impairment losses. The results of our Step 0 assessments indicated that it was more likely than not that the fair value of its reporting unit exceeded its carrying value and therefore we concluded that there were no impairments for the years ended October 31, 2017, 2016 or 2015.

Allowance for accounts receivable. We provide an allowance for estimated uncollectible accounts receivable balances based on historical experience and the aging of the related accounts receivable. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances

may be required.

22

Results of Operations

The following table sets forth certain items from our consolidated statements of income, expressed as percentages of our total net sales, for the periods indicated:

	Year ended October 31,					
	2017		2016		2015	
Net sales	100	%	100	%	100	%
Gross profit	10.6	%	11.5	%	9.9	%
Selling, general and administrative	5.3	%	5.0	%	4.9	%
Operating income	5.4	%	6.5	%	5.1	%
Interest income	0.0	%	0.0	%	0.0	%
Interest expense	(0.1)	%	(0.1)	%	(0.1)	%
Other income, net	0.0	%	0.0	%	0.0	%
Net income	3.5	%	4.1	%	3.2	%

Net Sales

We believe that the fundamentals for our products continue to be favorable. Firstly, United States (U.S.) avocado demand continues to grow, with per capita use in 2016/17 reaching 7.1 pounds per person, up 2 percent from the previous year, and approximately double the estimate from a decade ago. We believe that the healthy eating trend that has been developing in the United States contributes to such growth, as avocados, which are cholesterol and sodium free, dense in fiber, vitamin B6, antioxidants, potassium, folate, and contain unsaturated fat, which help lower cholesterol. Also, a growing number of research studies seem to suggest that phytonutrients, which avocados are rich in, help fight chronic illnesses, such as heart disease and cancer.

Additionally, we believe that the demographic changes in the U.S. will impact the consumption of avocados and avocado-based products. The Hispanic community currently accounts for approximately 18% of the U.S. population and the total number of Hispanics is estimated to double by the year 2050. Avocados are considered a staple item purchased by Hispanic consumers, as the per-capita avocado consumption in Mexico is significantly higher than that of the U.S.

We anticipate avocado products will further penetrate the United States marketplace driven by year-round availability of fresh avocados due to imports, a rapidly growing Hispanic population, and the promotion of the health benefits of avocados. As one of the largest marketers of avocado products in the United States, we believe that we are well positioned to leverage this trend and to grow our Fresh products and Calavo Foods segments of our business. Additionally, we also believe that avocados and avocado based products will further penetrate other marketplaces that we currently operate in as interest in avocados continues to expand.

In October 2002, the USDA announced the creation of a Hass Avocado Board to promote the sale of Hass variety avocados in the U.S. marketplace. This board provides a basis for a unified funding of promotional activities based on an assessment on all avocados sold in the U.S. marketplace. The California Avocado Commission, which receives its funding from California avocado growers, has historically shouldered the promotional and advertising costs supporting avocado sales. We believe that the incremental funding of promotional and advertising programs in the U.S. will, in the long term, positively impact average selling prices and will favorably impact our avocado businesses. During fiscal 2017, 2016 and 2015, on behalf of avocado growers, we remitted approximately \$1.7 million, \$2.4 million and \$1.7 million to the California Avocado Commission. During fiscal 2017, 2016 and 2015, we remitted approximately \$5.8 million, \$8.2 million and \$8.3 million to the Hass Avocado Board related to avocados.

We also believe that our other fresh products, primarily tomatoes, are positioned for future growth.

The tomato is the fourth most popular fresh-market vegetable (though a fruit scientifically speaking, tomatoes are more commonly considered a vegetable) behind potatoes, lettuce, and onions in the United States. Although stabilizing in the first decade of the 2000s, annual average fresh-market tomato consumption remains well above that of the previous decade. Over the past few decades, per capita use of tomatoes has been on the rise due to the enduring popularity of salads, salad bars, and submarine sandwiches. Perhaps of greater importance has been the introduction of

Edgar Filing: CALAVO GROWERS INC - Form 10-K

improved and new tomato varieties, the increased development of hot-house grown tomatoes (such as those grown by our ADM affiliate), heightened consumer interest in a wider range of tomatoes, a surge of new immigrants who eat vegetable-intensive diets, and expanding national emphasis on health and nutrition.

Papayas have become more popular as the consumption in the United States has more than doubled in the past decade. Papayas have high nutritional benefits. They are rich in anti-oxidants, the B vitamins, folate and pantothenic acid, potassium and magnesium; and fiber.

Additionally, through the acquisition of RFG, we substantially expanded and accelerated the Company's presence in the fast-growing refrigerated fresh packaged foods category through an array of retail product lines for produce, deli, and foodservice departments. RFG products include fresh-cut fruit and vegetables, fresh prepared entrée salads, wraps, sandwiches and fresh snacking products as well as ready-to-heat entrees and other hot bar and various deli items, meals kits and salad kits. RFG products are marketed under the Garden Highway Fresh Cut, Garden Highway, and Garden Highway Chef Essentials brands, as well as store-brand, private label programs.

The following tables set forth sales by product category and sales incentives, by segment (dollars in thousands):

	Year ended October 31, 2017				Year ended October 31, 2016

Net sales to third parties by segment exclude inter-segment sales and cost of sales. For fiscal year 2017, 2016 and 2015, inter-segment sales and cost of sales of \$1.3 million, \$4.3 million and \$1.5 million between Fresh products and RFG were eliminated. For fiscal year 2017, 2016 and 2015, inter-segment sales and cost of sales of \$3.2 million, \$2.7 million and \$1.9 million between Calavo Foods and RFG were eliminated.

Edgar Filing: CALAVO GROWERS INC - Form 10-K

The following table summarizes our net sales by business segment:

	2017	Change	2016	Change	2015
	(Dollars in thousands)				
Net sales:					
Fresh products	\$ 582,662	8.2 %	\$ 538,687	7.6 %	\$ 500,711
Calavo Foods	74,395	17.2 %	63,494	2.2 %	62,156

Total net sales	\$ 1,075,565	15.0 %	\$ 935,679	9.2 %	\$ 856,824
As a percentage of net sales:					
Fresh products	54.2 %		57.6 %		58.4 %
Calavo Foods	6.9 %		6.8 %		7.3 %
RFG	38.9 %		35.6 %		34.3 %
	100 %		100 %		100 %

Summary

Net sales for the year ended October 31, 2017, as compared to 2016, increased by \$139.9 million, or 15.0%. The increase in sales, when compared to the same corresponding prior year periods, is related to growth from all segments.

For fiscal year 2017, our largest percentage increase in sales was RFG, followed by Calavo Foods and our Fresh products segment, as shown above. Our increase in RFG sales was due primarily to increased sales from fresh prepared food products and fresh-cut fruit and vegetable products. We experienced an increase in our Calavo Foods segment during fiscal year 2017, which was due primarily to an increase in the sales of our prepared avocado products. Our increase in Fresh product sales was due primarily to increased sales of avocados, which was partially offset by decreased sales of tomatoes. See discussion below for further details.

All three segments of our business are subject to seasonal trends, which can impact the volume and/or quality of fruit sourced in any particular quarter.

Net sales to third parties by segment exclude value-added services billed by our Uruapan packinghouse and our Uruapan processing plant to the parent company. Additionally, net sales to third parties by segment exclude sales between Avocados de Jalisco and the parent company. All intercompany sales are eliminated in our consolidated results of operations.

Fresh products

Fiscal 2017 vs. Fiscal 2016:

Net sales delivered by the Fresh products business increased by approximately \$44.0 million, or 8.2%, for the year ended October 31, 2017, when compared to fiscal 2016. As discussed above, this increase in Fresh product sales during fiscal 2017 was primarily related to increased sales of avocados, which was partially offset by decreased sales of tomatoes.

Sales of avocados increased \$53.4 million, or 10.9%, for the year ended October 31, 2017, when compared to the same prior year period. The increase in avocado sales was primarily due to an increase in the sales price per carton of 46.0%, compared to fiscal 2016. The increase in sales price per carton was partially offset by a decrease in volume of avocados sold of 88.4 million pounds, or 23%. We attribute much of the change in price to market conditions during the year, in which consumer demand continued to exceed available industry supply.

Sales of tomatoes decreased to \$27.9 million for the year ended October 31, 2017, compared to \$36.0 million for the same period for fiscal 2016. The decrease in sales of tomatoes is due to a decrease in the sales price per carton of

approximately 23.5% due primarily to a change in weather patterns which resulted in wider availability of tomatoes in the market.

We anticipate that sales volume of avocados will increase in fiscal 2018, due to larger expected avocado crops, when compared to the same prior year period. We do not expect the fires in Ventura County to have a significant impact on our avocado volumes or earnings. We expect to manage through any shortfall in the Ventura County avocado supply through our diversified avocado sourcing.

Fiscal 2016 vs. Fiscal 2015:

Net sales delivered by the Fresh products business increased by approximately \$38.0 million, or 7.6%, for the year ended October 31, 2016, when compared to fiscal 2015. The increase in Fresh product sales during fiscal 2016 was primarily related to increased sales of avocados and tomatoes. See details below.

Sales of avocados increased \$21.9 million, or 4.7%, for the year ended October 31, 2016, when compared to the same prior year period. The increase in avocados was primarily due to an increase of pounds sold of \$1.4 million, or 0.4%. We attribute most of this increase in volume to the larger California avocado crop in fiscal 2016, compared to the same prior year period. Partially offsetting the California avocado crop increase was a decrease in Mexican sourced avocados, due to supply disruptions in July and October which stalled the harvesting of avocados for the entire industry. In addition to the overall increase in pounds sold, is an increase in the sales price per carton. The sales price per carton for avocados increased by approximately 3.4%. We attribute much of this change in price to a lower overall supply of avocados in the market during the fourth quarter of fiscal 2016.

Sales of tomatoes increased to \$36.0 million for the year ended October 31, 2016, compared to \$18.7 million for the same period for fiscal 2015. The increase in sales of tomatoes is due to an increase in cartons sold of approximately 1.1 million cartons or 62.9%. In addition, tomatoes experienced an increase in the sales price per carton of approximately 18.2%, most notable during our fiscal first quarter, primarily resulting from a change in weather patterns.

Calavo Foods

Fiscal 2017 vs. Fiscal 2016:

Sales for Calavo Foods for the year ended October 31, 2017, when compared to the same period for fiscal 2016, increased \$10.9 million, or 17.2%. This increase is primarily due to an increase in sales of prepared avocado products

of approximately \$10.8 million, or 18.0%, for the year ended October 31, 2017, when compared to the same prior year period. The increase in sales of prepared avocado products was related to an increase in overall pounds sold and the price per pound.

Fiscal 2016 vs. Fiscal 2015:

Sales for Calavo Foods for the year ended October 31, 2016, when compared to the same period for fiscal 2015, increased \$1.3 million, or 2.2%. This increase is primarily due to an increase in sales of salsa products of approximately \$1.4 million, or 66.8%, for the year ended October 31, 2016, when compared to the same prior year period. The increase in sales of salsa was primarily related to an increase in overall pounds sold.

RFG

Fiscal 2017 vs. Fiscal 2016:

Sales for RFG for the year ended October 31, 2017, when compared to the same period for fiscal 2016, increased \$85.0 million, or 25.5%. This increase is due primarily to increased sales from prepared foods, fresh-cut fruit and vegetable products. The overall increase in sales is primarily due to an increase in sales volume, which we believe results from our ability to develop new retail relationships and expand current retail partnerships into additional geographies and product categories as we continue to build out our national manufacturing capabilities.

26

Fiscal 2016 vs. Fiscal 2015:

Sales for RFG for the year ended October 31, 2016, when compared to the same period for fiscal 2015, increased \$39.5 million, or 13.5%. This increase is due primarily to increased sales from fresh prepared food and fresh-cut fruit and vegetable products. The overall increase in sales is primarily due to an increase in sales volume, which we believe results from an increase in demand for the variety of innovative and convenient products that we offer, as well as our ability to expand retail relationships by providing high-quality, fresh foods solutions from our growing national production footprint.

Gross Profit

The following table summarizes our gross profit and gross profit percentages by business segment:

	2017	Change	2016	Change	2015
	(Dollars in thousands)				
Gross Profit:					
Fresh products	\$ 72,376	24.8 %	\$ 57,997	56.5 %	\$ 37,064
Calavo Foods	13,353	(40.5) %	22,448	9.4 %	20,511
RFG	28,815	6.4 %	27,089	(2.0) %	27,652
Total gross profit	\$ 114,544	6.5 %	\$ 107,534	26.2 %	\$ 85,227
Gross profit percentages:					
Fresh products	12.4 %		10.8 %		7.4 %
Calavo Foods	17.9 %		35.4 %		33.0 %
RFG	6.9 %		8.1 %		9.4 %
Consolidated	10.6 %		11.5 %		9.9 %

Summary

Our cost of goods sold consists predominantly of ingredient costs (primarily fruit and other whole foods), packing materials, freight and handling, labor and overhead (including depreciation) associated with preparing food products and other direct expenses pertaining to products sold. Gross profit increased by approximately \$7.0 million, or 6.5%, for the year ended October 31, 2017, when compared to the same period for fiscal 2016. The increase was attributable to gross profit increases across the Fresh products and RFG segments, partially offset by a decrease in our Calavo Foods segment.

Fresh products

Fiscal 2017 vs. Fiscal 2016:

During fiscal 2017, as compared to the same prior year period, the increase in our Fresh products segment gross profit percentage was the result of increased profit for avocados, partially offset by a decreased profit for tomatoes. For the year ended October 31, 2017, compared to the same prior year period, the gross profit percentage for avocados increased from 10.9% in 2016 to a gross profit percentage of 12.7% in 2017. The profit improvement during fiscal 2017, was primarily the result of management's focus and execution on continuous improvement across the operation which helped to complement the current market conditions, in which consumer demand continued to exceed available industry supply. In addition, U.S. Dollar to Mexican Peso exchange rate was stronger in fiscal 2017, when compared to fiscal 2016. Note that any significant fluctuations in the exchange rate between the U.S. Dollar and the Mexican Peso may have a material impact on future gross margins for our Fresh products segment.

For the year ended October 31, 2017 we generated gross profit of \$2.7 million from tomato sales, down 36.3% from \$4.2 million in the corresponding prior year period. The decline in tomato gross profit is due primarily to a decrease in the sales price per carton of approximately 23.5%. The majority of our tomato sales are done on a consignment basis, in

which the gross profit we earn is generally based on a commission agreed to with each party, which usually is a percent of the overall selling price; however, we also purchase some tomatoes on the spot market to meet specific customer requests and have certain fixed overhead costs associated with our tomato operations which impact the overall gross profit realized from tomato sales. The gross profit percentage for consignment sales are dependent on the volume of fruit we handle, the average selling prices, and the competitiveness of the returns that we provide to third-party growers/packers. Although we generally do not take legal title to such consigned products prior to sale, we do assume responsibilities (principally assuming credit risk, inventory loss and delivery risk, and pricing risk) that are consistent with acting as a principal in the transaction. Accordingly, our results of operations include sales and cost of sales from the sale of products procured under consignment arrangements.

Fiscal 2016 vs. Fiscal 2015:

During fiscal 2016, as compared to the same prior year period, the increase in our Fresh products segment gross profit percentage was the result of increased profit for avocados and tomatoes. For the year ended October 31, 2016, compared to the same prior year period, the gross profit percentage for avocados increased from 7.3% in 2015 to a gross profit percentage of 10.9% in 2016. For fiscal 2016, we were able to effectively manage our fruit costs during select periods within the year and better leverage our fixed handling costs. In addition, the U.S. Dollar to Mexican Peso exchange rate continued to strengthen in fiscal 2016. Note that any significant fluctuations in the exchange rate between the U.S. Dollar and the Mexican Peso may have a material impact on future gross profit for our Fresh products segment.

For the year ended October 31, 2016 we generated gross profit of \$4.2 million from consigned tomato sales, up 107% from \$2.0 million in the corresponding prior year period. This improvement in tomato gross profit, is due to an overall increase in tomato sales, which increased \$17.3 million for the year ended October 31, 2016, compared to the same period for fiscal 2015. The increase in sales of tomatoes is due to an increase in cartons sold of approximately 1.1 million cartons or 62.9%. In addition, tomatoes experienced an increase in the sales price per carton of approximately 18.2%, most notable during our fiscal first quarter, primarily resulting from a change in weather patterns.

Calavo Foods

Fiscal 2017 vs. Fiscal 2016:

The Calavo Foods segment gross profit percentage during our year ended October 31, 2017 decreased to 17.9%, compared to the same prior year period gross profit percentage of 35.4%. This decrease was primarily due to an increase in fruit input costs for the year ended October 31, 2017, as compared to the same period year period. Note that any significant fluctuation in the cost of fruit used in the production process or the exchange rate between the U.S. Dollar and the Mexican Peso may have a material impact on future gross profit for our Calavo Foods segments.

Fiscal 2016 vs. Fiscal 2015:

The Calavo Foods segment gross profit percentage during our year ended October 31, 2016 increased to 35.4%, compared to the same prior year period gross profit percentage of 33.0%. This increase was primarily due to (i) lower guacamole production costs resulting from the U.S. Dollar to Mexican Peso exchange rate strengthening by approximately 18% for the year ended October 31, 2016, as compared to the same period year period and (ii) lower salsa production costs. Note that any significant fluctuation in the cost of fruit used in the production process or the exchange rate between the U.S. Dollar and the Mexican Peso may have a material impact on future gross profit for our Calavo Foods segments.

RFG

Fiscal 2017 vs. Fiscal 2016:

RFG's gross profit percentage during our fiscal year ended October 31, 2017 was 6.9%, compared 8.1% in the same prior year period. This lower gross profit percentage was primarily the result of additional costs incurred during the year associated with growth initiatives currently underway for the segment. Specifically, these costs relate to the start-up and

28

ramping up periods at new or recently expanded RFG plants, as well as higher costs related to the development and optimization of new product categories. The gross profit of fiscal 2017 was enhanced, in part, by a change in the presentation of broker commission expenses, totaling \$3.0 million in fiscal 2017, which was moved to selling, general and administrative expense, rather than shown as a reduction in net sales, as was done in prior year. Without the broker commission impact, gross profit would have decreased \$1.2 million for year ended October 31, 2017 when compared to the same prior year period.

Fiscal 2016 vs. Fiscal 2015:

RFG's decreased gross profit percentage for the year ended October 31, 2016, is due in part to the lingering effects of adverse weather conditions (related to El Nino) that impacted certain fruit and vegetable growing regions and caused reduced raw material availability, increased raw material prices, and reduced processing yields in our first fiscal quarter of 2016 and to a lesser extent in our second fiscal quarter of 2016. Similar to the Calavo Foods segment, RFG often has agreed upon pricing with many of their customers. Note that any significant fluctuation in raw material availability, price and/or quality may have a material impact on future gross profit for our RFG segment.

RFG invested throughout fiscal year 2016 by expanding its production facilities and adding capabilities to meet growing customer demand. Certain expenses associated with the start-up and initial optimization of those facilities temporarily reduced gross profit percentage in the year ended October 31, 2016.

Selling, General and Administrative

	2017	Change	2016	Change	2015
	(Dollars in thousands)				
Selling, general and administrative	\$ 56,651	22.0 %	\$ 46,440	11.7 %	\$ 41,558
Percentage of net sales	5.3 %		5.0 %		4.9 %

Selling, general and administrative expenses in fiscal 2017 include costs of marketing and advertising, sales expenses (including broker commissions) and other general and administrative costs. Selling, general and administrative expenses increased \$10.2 million, or 22.0%, for the year ended October 31, 2017, when compared to the same prior year period. This increase was partly related to three factors that do not reflect changes in the overall cost structure of the Company, specifically a change in presentation of broker commissions (approximately \$3.0 million) to include such costs in selling, general and administrative expenses, which had historically been presented as a reduction in net sales, non-recurring expenses related to the resignation and retirement of two corporate officers (approximately \$1.2 million) and a \$0.4 million settlement (see Note 7 for further information). In addition to these items, the increase was related to an increase in salaries and benefits (approximately \$2.3 million, due in part to higher headcount), an increase in bad debt (approximately \$1.2 million), and an increase in stock based compensation (approximately \$1.0 million) and legal fees (approximately \$0.2 million), which were partially offset by a decrease in accrued management

bonuses (approximately \$0.6 million).

Selling, general and administrative expenses in fiscal 2016 include costs of marketing and advertising, sales expenses and other general and administrative costs. Selling, general and administrative expenses increased \$4.9 million, or 11.7%, for the year ended October 31, 2016, when compared to the same prior year period. This increase was primarily related to higher corporate costs, including, but not limited to, general and administrative costs related to salaries (approximately \$2.5 million), accrued management bonuses (approximately \$1.3 million), insurance (approximately \$0.6 million), depreciation (approximately \$0.3 million), and employee benefits (approximately \$0.2 million), partially offset by decreases in administration fees (approximately \$0.4 million) and legal fees (approximately \$0.2 million).

Income (Loss) from Unconsolidated Entities

	2017	Change	2016	Change	2015
	(Dollars in thousands)				
Income (loss) from unconsolidated entities	\$ 401	(170.4) %	\$ (570)	1,290.2 %	\$ (41)
Percentage of net sales	— %		(0.1) %		— %

Income (loss) from unconsolidated entities includes our proportionate share of earnings or losses from our investment in Agricola Don Memo, S.A. de C.V. (Don Memo). We use the equity method of accounting to account for this investment.

Interest Income

	2017	Change	2016	Change	2015
	(Dollars in thousands)				
Interest income	\$ 24	(81.8) %	\$ 132	71.4 %	\$ 77
Percentage of net sales	— %		— %		— %

Interest income was primarily generated from our loans to growers. The decrease in interest income in fiscal 2017 as compared to 2016 is due to the borrowings by California avocado growers decreasing in the current year compared to the prior year.

The increase in interest income in fiscal 2016 as compared to 2015 is due to the borrowings by California avocado growers increasing in the current year compared to the prior year.

Interest Expense

	2017	Change	2016	Change	2015
	(Dollars in thousands)				
Interest expense	\$ 1,023	35.3 %	\$ 756	(8.9) %	\$ 830
Percentage of net sales	0.1 %		0.1 %		0.1 %

Interest expense is primarily generated from our line of credit borrowings with Farm Credit West, PCA (FCW) and Bank of America, N.A. (BoA), as well as our former term loan agreements with FCW and BofA (prior to June 2016). For fiscal 2017, as compared to fiscal 2016, the increase in interest expense was primarily related to higher average debt balance due primarily to the purchase of property in Riverside, California and other capital expenditures, as well as higher LIBOR rates which increased our interest rate. For fiscal 2016, as compared to fiscal 2015, the decrease in interest expense was primarily related to the payoff of our term loans with FCW and BoA, and the lower average outstanding balance on our non-collateralized, revolving credit facility.

Other Income, Net

	2017	Change	2016	Change	2015
	(Dollars in thousands)				
Other income, net	\$ 479	11.9 %	\$ 428	2.6 %	\$ 417
Percentage of net sales	0.0 %		0.0 %		0.0 %

Other income, net includes dividend income, as well as certain other transactions that are outside of the normal course of operations. Other Income stayed relatively consistent in fiscal 2017 compared to fiscal 2016 and 2015. During fiscal 2017, 2016 and 2015, we received \$0.4 million, \$0.3 million and \$0.3 million as dividend income from Limoneira.

Provision for Income Taxes

	2017	Change	2016	Change	2015
	(Dollars in thousands)				
Provision for income taxes	\$ 20,450	(6.5) %	\$ 21,869	35.9 %	\$ 16,093
Effective tax rate	35.4 %		36.3 %		37.2 %

For fiscal year 2017, our provision for income taxes was \$20.5 million, as compared to \$21.9 million recorded for the comparable prior year period. For fiscal year 2016, our provision for income taxes was \$21.9 million, as compared to \$16.1 million recorded for the comparable prior year period.

Any change in the U.S. tax law has the potential to materially impact our consolidated financial statements.

Net income attributable to noncontrolling interest

	2017	Change	2016	Change	2015
	(Dollars in thousands)				
Net income attributable to noncontrolling interest	\$ (54)	(87.6) %	\$ (437)	NM %	\$ -
Percentage of net sales	0.0 %		0.0 %		0.0 %

For fiscal 2016, the noncontrolling interest for Salsa Lisa is recorded at the greater of the noncontrolling interest balance adjusted for the attribution of loss or the amount redeemable pursuant to the buyout process contained in the amended and restated limited liability company agreement of Calavo Salsa Lisa LLC. For fiscal 2016, we recorded an adjustment of \$486,000 to increase the noncontrolling interest balance to the currently expected redeemable amount of \$771,000. This adjustment has been included in net loss attributed to noncontrolling interest. See Note 2 in our consolidated financial statements for further information.

Quarterly Results of Operations

The following table presents our operating results for each of the eight fiscal quarters in the period ended October 31, 2017. The information for each of these quarters is derived from our unaudited interim financial statements and should be read in conjunction with our audited consolidated financial statements included in this Annual Report. In our opinion, all necessary adjustments, which consist only of normal and recurring accruals, have been included to fairly present our unaudited quarterly results. Historically, we receive and sell a substantially smaller volume of California avocados in our first fiscal quarter.

Liquidity and Capital Resources

Operating activities for fiscal 2017, 2016 and 2015 provided cash flows of \$62.1 million, \$62.0 million and \$37.3 million. Fiscal year 2017 operating cash flows reflect our net income of \$37.3 million, net increase of noncash charges (depreciation and amortization, income from unconsolidated entities, provision for losses on accounts receivable, interest on deferred compensation, deferred income taxes, and stock compensation expense) of \$18.6 million and a net increase from changes in the non-cash components of our working capital accounts of approximately \$6.2 million.

Fiscal year 2017 increases in operating cash flows, caused by working capital changes, includes an increase in trade accounts payable, accrued expenses, and other long-term liabilities of \$14.7 million, a decrease in inventory of \$1.0 million, an increase in deferred rent of \$0.4 million, and a decrease in advances to suppliers of \$0.1 million, partially offset by, a decrease in payable to growers of \$4.2 million, an increase in other assets of \$2.4 million, an increase in prepaid expenses and other current assets of \$1.4 million, and an increase in accounts receivable of \$0.9 million.

The increase in accounts payable and accrued expenses is primarily related to an increase in our payables related to RFG. The decrease in our inventory balance is primarily related to a decrease in fruit cost included in Mexican avocado inventory on hand at October 31, 2017 as compared to the same prior year period. The decrease in payable to our growers primarily reflects a decrease in our Mexican avocado grower payable due to lower avocado prices in October 2017 compared to October 2016. The increase in other assets is due to an increase in Mexican IVA tax receivable (see Note 16 to our consolidated condensed financial statements). The increase in our accounts receivable, as of October 31, 2017 when compared to October 31, 2016, primarily reflects higher sales recorded in the month of October 2017, as compared to October 2016.

Cash used in investing activities was \$53.7 million, \$21.7 million and \$21.1 million for fiscal years 2017, 2016, and 2015. Fiscal year 2017 cash flows used in investing activities include capital expenditures of \$44.5 million of property, plant and equipment items for expansion projects in the RFG segment (including more than \$19 million for purchase of the new Riverside plant which was financed under our existing credit facilities as noted below) and Fresh products

segments. It also includes additional investment in FreshRealm of \$9.1 million, and additional investment in Agricola Don Memo of \$0.5 million, partially offset by proceeds received from the repayment of the loans to San Rafael of \$0.4 million.

Cash used in financing activities was \$15.7 million, \$33.6 million and \$15.8 million for fiscal years 2017, 2016 and 2015. Cash used during fiscal year 2017 primarily related to receipts on our credit facilities totaling \$1.0 million, partially offset by the payment of our \$15.7 million dividend and the purchase of the noncontrolling interest of Salsa Lisa for \$1.0 million.

Our principal sources of liquidity are our existing cash reserves, cash generated from operations and amounts available for borrowing under our existing credit facilities. Cash and cash equivalents as of October 31, 2017 and 2016 totaled \$6.6 million and \$13.8 million. Our working capital at October 31, 2017 was \$3.7 million, compared to \$25.6 million at October 31, 2016.

We believe that cash flows from operations and the available Credit Facility will be sufficient to satisfy our future capital expenditures, grower recruitment efforts, working capital and other financing requirements for the next twelve months. We will continue to evaluate grower recruitment opportunities, expanded relationships with retail and club customers, and exclusivity arrangements with food service companies to fuel growth in each of our business segments. We have a revolving credit facility with Bank of America as administrative agent and Merrill Lynch, Pierce, Fenner & Smith Inc. as joint lead arranger and sole bookrunner, and Farm Credit West, as joint lead arranger. Under the terms of this agreement, we are advanced funds for both working capital and long-term productive asset purchases. Total credit available under this agreement is \$80 million, and will expire in June 2021. Upon notice to Bank of America, we may from time to time, request an increase in the Credit Facility by an amount not exceeding \$50 million. For our current and past line of credit agreements the weighted-average interest rate was 2.2% and 1.9% at October 31, 2017 and 2016. Under these credit facilities, we had \$20.0 million and \$19.0 million outstanding as October 31, 2017 and 2016.

This new Credit Facility contains customary affirmative and negative covenants for agreements of this type, including the following financial covenants applicable to the Company and its subsidiaries on a consolidated basis: (a) a quarterly consolidated leverage ratio of not more than 2.50 to 1.00 and (b) a quarterly consolidated fixed charge coverage ratio of not less than 1.15 to 1.00. We were in compliance with all such covenants at October 31, 2017.

The following table summarizes contractual obligations pursuant to which we are required to make cash payments. The information is presented as of our fiscal year ended October 31, 2017:

Contractual Obligations (in thousands)	Total	Payments due by period			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
Long-term debt obligations (including interest)	\$ 594	\$ 153	\$ 269	\$ 172	\$ —

Edgar Filing: CALAVO GROWERS INC - Form 10-K

Revolving credit facilities	20,000	20,000	—	—	—
Defined benefit plan	176	38	76	62	—
Operating lease commitments	53,067	5,360	9,860	8,246	29,601
Total	\$ 73,837	\$ 25,551	\$ 10,205	\$ 8,480	\$ 29,601

The California avocado industry is subject to a state marketing order whereby handlers are required to collect assessments from the growers and remit such assessments to the California Avocado Commission (CAC). The assessments are primarily for advertising and promotions. The amount of the assessment is based on the dollars paid to the growers for their fruit, and, as a result, is not determinable until the value of the payments to the growers has been calculated.

With similar precision, amounts remitted to the Hass Avocado Board (HAB) in connection with their assessment program are likewise not determinable until the fruit is actually delivered to us. HAB assessments are primarily used to fund marketing and promotion efforts.

Recently Adopted Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board ("FASB") issued an Accounting Standards Update ("ASU"), Improvements to Employee Share-Based Payment Accounting, which simplified several areas of accounting for share-based compensation arrangements, including the income tax impact, classification on the statement of cash flows and forfeitures. The new standard requires excess tax benefits or deficiencies for share-based payments to be recognized as income tax benefit or expense, rather than within additional paid-in capital, when the awards vest or are settled. Furthermore, cash flows related to excess tax benefits are required to be classified as operating activities in the statement of cash flows rather than financing activities. We have elected to account for forfeitures of stock-based awards as they occur. The Company's early adoption of the amendments resulted in an income tax benefit of approximately \$0.3 million on the Company's net earnings in the first quarter of fiscal year 2017.

In July 2015, the FASB issued an ASU for measuring inventory. The core principal of the guidance is that an entity should measure inventory at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. The Company adopted this new standard beginning in the three months ended January 31, 2017. The adoption of the amendment did not have a material impact on the Company's consolidated financial statements.

Recently Issued Accounting Standards

In May 2017, the FASB issued an ASU, Stock Compensation (Topic 718), Scope of Modification Accounting. This ASU clarifies when changes to the terms or conditions of a share-based payment award must be accounted for as modifications. The guidance clarifies that modification accounting will be applied if the value, vesting conditions or classification of the award changes. This ASU will be effective for us beginning the first day of our 2018 fiscal year. We do not anticipate a significant impact on our financial condition, results of operations or cash flows upon adoption.

In March 2017, the FASB issued an ASU, Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. This ASU requires that the service cost component of net periodic benefit costs from defined benefit and other postretirement benefit plans be included in the same Statement of Earnings captions as other compensation costs arising from services rendered by the covered employees during the period. The other components of net benefit cost will be presented in the Statement of Earnings separately from service costs. Following adoption, only service costs will be eligible for capitalization into manufactured inventories, which should reduce diversity in practice. This ASU will be effective for us beginning the first day of our 2019 fiscal year. We do not anticipate a significant impact on our financial condition, results of operations or cash flows upon adoption.

In January 2017, the FASB issued an ASU, Business Combinations: Clarifying the Definition of a Business, which adds guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. This ASU will be effective for us beginning the first day of our 2019 fiscal year. Early adoption is permitted. We do not expect this ASU to have an impact until an applicable transaction takes place.

In October 2016, the FASB issued an ASU, Intra-Entity Transfers of Assets Other Than Inventory, which will require companies to recognize the income tax effects of intra-entity sales and transfers of assets other than inventory, particularly those asset transfers involving intellectual property, in the period in which the transfer occurs. The ASU will be effective for us beginning the first day of our 2019 fiscal year and is not expected to have a significant impact upon adoption.

In January 2017, the FASB issued an ASU, Simplifying the Test for Goodwill Impairment, which removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step 2 of the goodwill impairment test. The ASU permits an entity to perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and to recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. This ASU will be effective for us beginning the first day of our 2021 fiscal year. Early adoption is permitted. We are evaluating the impact of adoption of this ASU on our financial condition,

results of operations and cash flows, and as such, we are not able to estimate the effect the adoption of the new standard will have on our financial statements.

In February 2016, the FASB issued an ASU,
