FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2016

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from to

Commission file number: 1-13395

SONIC AUTOMOTIVE, INC.

(Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization)	56-2010790 (I.R.S. Employer Identification No.)
---	---

4401 Colwick Road Charlotte, North Carolina (Address of principal executive offices)	28211 (Zip Code)
--	---------------------

Registrant's telephone number, including area code: (704) 566-2400

Edgar Filing: SONIC AUTOMOTIVE INC - Form 10-K

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Class A common stock, \$0.01 par value	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company)	Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting common stock held by non-affiliates of the registrant was approximately \$554.9 million based upon the closing sales price of the registrant's Class A common stock on June 30, 2016 of \$17.11 per share.

As of February 21, 2017, there were 32,855,850 shares of Class A common stock, par value \$0.01 per share, and 12,029,375 shares of Class B common stock, par value \$0.01 per share, outstanding.

Documents incorporated by reference. Portions of the registrant's definitive Proxy Statement for the 2017 Annual Meeting of Stockholders to be held April 18, 2017 are incorporated by reference into Part III of this Form 10-K.

UNCERTAINTY OF FORWARD-LOOKING STATEMENTS AND INFORMATION

This Annual Report on Form 10-K contains, and written or oral statements made from time to time by us or by our authorized officers may contain, “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements address our future objectives, plans and goals, as well as our intent, beliefs and current expectations regarding future operating performance, results and events, and can generally be identified by words such as “may,” “will,” “should,” “believe,” “expect,” “estimate,” “anticipate,” “intend,” “plan,” “foresee” or similar words or phrases.

These forward-looking statements are based on our current estimates and assumptions and involve various risks and uncertainties. As a result, you are cautioned that these forward-looking statements are not guarantees of future performance, and that actual results could differ materially from those projected in these forward-looking statements. Factors which may cause actual results to differ materially from our projections include those risks described in “Item 1A. Risk Factors” of this Annual Report on Form 10-K and elsewhere in this report, as well as:

- the number of new and used vehicles sold in the United States as compared to our expectations and the expectations of the market;
- our ability to generate sufficient cash flows or obtain additional financing to fund our EchoPark® expansion, our One Sonic-One Experience initiative, capital expenditures, our share repurchase program, dividends on our common stock, acquisitions and general operating activities;
- our business and growth strategies, including, but not limited to, our EchoPark® initiative and our One Sonic-One Experience initiative;
- the reputation and financial condition of vehicle manufacturers whose brands we represent, the financial incentives vehicle manufacturers offer and their ability to design, manufacture, deliver and market their vehicles successfully;
- our relationships with manufacturers, which may affect our ability to obtain desirable new vehicle models in inventory or complete additional acquisitions;
- adverse resolution of one or more significant legal proceedings against us or our dealerships or EchoPark® stores;
- changes in laws and regulations governing the operation of automobile franchises, accounting standards, taxation requirements and environmental laws;
- general economic conditions in the markets in which we operate, including fluctuations in interest rates, employment levels, the level of consumer spending and consumer credit availability;
- high competition in the automotive retailing industry, which not only creates pricing pressures on the products and services we offer, but also on businesses we may seek to acquire;
- our ability to successfully integrate potential future acquisitions; and
- the rate and timing of overall economic recovery or decline.

These forward-looking statements speak only as of the date of this report or when made, and we undertake no obligation to revise or update these statements to reflect subsequent events or circumstances, except as required under the federal securities laws and the rules and regulations of the Securities and Exchange Commission.

SONIC AUTOMOTIVE, INC.

PART I

Item 1. Business.

Sonic Automotive, Inc. was incorporated in Delaware in 1997. We are one of the largest automotive retailers in the United States (as measured by total revenue). As of December 31, 2016, we operated 116 franchises in 13 states (representing 25 different brands of cars and light trucks) and 18 collision repair centers. For management and operational reporting purposes, we group certain franchises together that share management and inventory (principally used vehicles) into “stores.” As of December 31, 2016, we operated 107 franchised dealership stores and five EchoPark stores.

Our franchised dealerships provide comprehensive services, including (1) sales of both new and used cars and light trucks; (2) sales of replacement parts and performance of vehicle maintenance, manufacturer warranty repairs, and paint and collision repair services (collectively, “Fixed Operations”); and (3) arrangement of extended warranties, service contracts, financing, insurance and other aftermarket products (collectively, “F&I”) for our customers.

EchoPark® provides the same services (excluding new vehicle sales and manufacturer warranty repairs) in unique stand-alone specialty retail locations. Our EchoPark® business operates independently from our franchised new and used dealership sales operations. Sales operations in our first EchoPark® market in Denver, Colorado began in the fourth quarter of 2014. As of December 31, 2016, we had five EchoPark® stores in operation, and we expect to open another store in Colorado in the first half of 2017. During the second quarter of 2016, we announced that we have begun the process of expanding EchoPark® operations into additional markets in North Carolina, South Carolina and Texas with operations in these markets expected to begin in 2017 and 2018. We believe that our EchoPark® business will provide long-term benefits to us, our stockholders and guests. However, in the short term, this initiative may negatively impact our overall operating results as we allocate management and capital resources to this business.

References to “Sonic,” the “Company,” “we,” “us,” and “our” used throughout this Annual Report on Form 10-K refer to Sonic Automotive, Inc. and its subsidiaries.

The following charts depict the multiple sources of continuing operations revenue and gross profit for the year ended December 31, 2016:

SONIC AUTOMOTIVE, INC.

As of December 31, 2016, we operated in the following states:

Market	Percent of	
	2016 Number of Franchises	Total Revenue
California	24	30.3 %
Texas	29	25.0 %
Tennessee	11	7.3 %
Florida	9	6.1 %
Alabama	13	5.3 %
Colorado	4	4.7 %
Georgia	4	3.5 %
North Carolina	4	3.2 %
Virginia	2	2.9 %
Ohio	5	2.7 %
Maryland	3	2.7 %
South Carolina	5	2.4 %
Nevada	3	2.1 %
Disposed franchises and holding companies	-	0.5 %
Total Franchised Dealerships	116	98.7 %
EchoPark® - Colorado	5	1.3 %
Total	121	100.0 %

In the future, we may purchase dealerships and open new stores that we believe will enrich our portfolio and divest dealerships or close stores that we believe will not yield acceptable returns over the long term. The automotive retailing industry remains highly fragmented, and we believe that further consolidation may occur. We believe that attractive acquisition opportunities continue to exist for dealership groups with the capital and experience to identify, acquire and professionally manage dealerships. Our ability to complete acquisitions and open new stores in the future will depend on many factors, including the availability of financing and the existence of any contractual provisions that may restrict our acquisition activity.

See “Item 7 Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources,” for a discussion of our plans for the use of capital generated from operations.

Operating Segments

As of December 31, 2016, we had two operating segments: Franchised Dealerships and EchoPark®. The Franchised Dealerships segment is comprised of retail automotive franchises that sell new vehicles and buy and sell used vehicles, sell replacement parts, perform vehicle repair and maintenance services, and arrange finance and insurance products. The EchoPark® segment is comprised of stand-alone specialty retail locations that provide customers an opportunity to search, buy, service, finance and sell pre-owned vehicles.

For the year ended December 31, 2016, EchoPark® revenue represented approximately 1.3% of total revenue. See Note 14, “Segment Information,” to the accompanying consolidated financial statements for additional financial information regarding our two operating segments.

Unless otherwise noted, the following discussion of our business is presented on a consolidated basis.

Business Strategy

Execute our Stand-Alone Pre-Owned Store Initiative. We have augmented our manufacturer-franchised dealership operations with our EchoPark® stand-alone pre-owned specialty retail locations. Our EchoPark® business operates independently from our franchised new and used dealership sales operations and offers customers an exciting shopping and buying experience. Sales operations for our EchoPark® initiative began in Denver, Colorado in the fourth quarter of 2014. As of December 31, 2016, we had five EchoPark® stores in operation, and expect to open an additional EchoPark® store in Colorado in the first half of 2017.

Execute our Customer Experience Initiative. Our One Sonic-One Experience (“OSOE”) initiative includes several new processes and proprietary technologies from inventory management, electronic desking and pricing tools to a fully developed “customer-centric” Customer Relationship Management tool. We believe that the development of these processes and technologies

SONIC AUTOMOTIVE, INC.

will allow us to better serve our customers across our entire platform of stores. Our goal is to allow our guests to control the buying process and move at their pace so that once the vehicle has been selected our team can utilize these processes and technologies to allow our guests to complete a new or pre-owned vehicle sales transaction in less than an hour. During the latter half of 2014 and throughout 2015, we rolled out the OSOE initiative at our dealerships in Charlotte, North Carolina. In 2016, we introduced the technology component of the initiative to 14 additional stores in our Alabama, Tennessee and California markets.

Achieve High Levels of Customer Satisfaction. We focus on maintaining high levels of customer satisfaction. Our personalized sales process is designed to satisfy customers by providing high-quality vehicles and service in a positive, “consumer friendly” buying environment. Several manufacturers offer specific financial incentives on a per vehicle basis if certain Customer Satisfaction Index (“CSI”) levels (which vary by manufacturer) are achieved by a dealership. In addition, all manufacturers consider CSI scores in approving acquisitions or awarding new dealership open points. In order to keep dealership and executive management focused on customer satisfaction, we include CSI results as a component of our incentive-based compensation programs for certain groups of associates.

Invest in Dealership Properties. Historically, we have operated our dealerships primarily on property financed through long-term operating leases. As these leases mature, or as we have an opportunity to purchase the underlying real estate prior to renewal, we take actions to own more of our dealership properties when the effect is financially or operationally favorable to us. We remain opportunistic in purchasing existing properties or relocating dealership operations to owned real estate where the returns are favorable. We believe owning our properties will, over the long term, strengthen our balance sheet and reduce our overall cost of operating and financing our facilities.

Improve Capital Structure. As we generate cash through operations, we will opportunistically repurchase our Class A common stock in open-market or structured transactions.

Maximize Asset Returns Through Process Execution. We have developed standardized operating processes that are documented in operating playbooks for our dealerships. Through the continued implementation of our operating playbooks, we believe organic growth opportunities exist by offering a more favorable buying experience to our customers and creating efficiencies in our business processes. We believe the development, refinement and implementation of these operating processes will enhance the customer experience, make us more competitive in the markets we serve and drive profit growth across each of our revenue streams.

Maintain Diverse Revenue Streams. We have multiple revenue streams. In addition to new vehicle sales, our revenue sources include used vehicle sales, which we believe are less sensitive to economic cycles and seasonal influences that exist with new vehicle sales. Our Fixed Operations sales carry a higher gross margin than new and used vehicle sales and, in the past, have not been as economically sensitive as new vehicle sales. We also offer customers assistance in obtaining financing and a range of automobile related warranty, aftermarket and insurance products.

Manage Portfolio. Our long-term growth and acquisition strategy is focused on large metropolitan markets, predominantly in the Southeast, Southwest, Midwest and California. We seek to add like-branded dealerships to our portfolio that exist in regions in which we already operate; however, we may look outside of our existing geographic footprint when considering the location of new EchoPark® stores. A majority of our franchised dealerships are either luxury or mid-line import brands. For the year ended December 31, 2016, approximately 88.1% of our total new vehicle revenue was generated by luxury and mid-line import dealerships, which usually have higher operating margins, more stable Fixed Operations departments, lower associate turnover and lower inventory levels.

SONIC AUTOMOTIVE, INC.

The following table depicts the breakdown of our new vehicle revenues from continuing operations by brand:

Brand	Percentage of New Vehicle Revenue Year Ended December 31,					
	2016		2015		2014	
Luxury:						
BMW	20.2	%	21.7	%	21.8	%
Mercedes	10.6	%	9.7	%	9.6	%
Lexus	5.9	%	5.6	%	5.2	%
Audi	5.3	%	4.8	%	5.0	%
Land Rover	3.3	%	4.0	%	2.8	%
Cadillac	3.3	%	3.2	%	4.1	%
Porsche	2.3	%	2.5	%	2.4	%
MINI	1.6	%	1.9	%	2.1	%
Other luxury (1)	3.0	%	3.1	%	3.1	%
Total Luxury	55.5	%	56.5	%	56.1	%
Mid-line Import:						
Honda	16.8	%	15.5	%	14.9	%
Toyota	11.4	%	11.1	%	10.4	%
Volkswagen	1.5	%	1.7	%	1.9	%
Hyundai	1.2	%	1.4	%	1.6	%
Other imports (2)	1.7	%	1.6	%	2.3	%
Total Mid-line Import	32.6	%	31.3	%	31.1	%
Domestic:						
Ford	6.8	%	6.8	%	7.3	%
General Motors (3)	5.1	%	5.4	%	5.5	%
Total Domestic	11.9	%	12.2	%	12.8	%
Total	100.0	%	100.0	%	100.0	%

(1) Includes Volvo, Acura, Infiniti, Jaguar and Smart.

(2) Includes Nissan, Kia, Scion and Subaru.

(3) Includes Buick, Chevrolet and GMC.

Expand our eCommerce Capabilities. Automotive customers have become increasingly more comfortable using technology to research their vehicle buying alternatives and communicate with dealership personnel. The internet presents a marketing, advertising and automotive sales channel that we will continue to utilize to drive value for our dealerships and enhance the customer experience. Our technology platforms give us the ability to leverage technology

to efficiently integrate systems, customize our dealership websites and use our data to improve the effectiveness of our advertising and interaction with our customers. These platforms also allow us to market all of our products and services to a national audience and, at the same time, support the local market penetration of our individual dealerships.

Train, Develop and Retain Associates. We believe our associates are the cornerstone of our business and crucial to our financial success. Our goal is to develop our associates and foster an environment where our associates can contribute and grow with the Company. Associate satisfaction is very important to us, and we believe a high level of associate satisfaction reduces associate turnover and enhances our customers' experience at our dealerships by pairing our customers with well-trained associates. We believe that our comprehensive training of all employees provides us with a competitive advantage over other dealership groups.

Increase Sales of Higher-Margin Products and Services. We continue to pursue opportunities to increase our sales of higher-margin products and services by expanding the following:

Finance, Insurance and Other Aftermarket Products. Each sale of a new or used vehicle gives us an opportunity to provide our customers with financing and insurance options and earn financing fees and insurance commissions. We also offer our customers the opportunity to purchase extended warranties, service contracts and other aftermarket products. We currently offer a wide range of non-recourse financing, leasing, other aftermarket products, extended warranties, service contracts and insurance

SONIC AUTOMOTIVE, INC.

products to our customers. We emphasize menu-selling techniques and other best practices to increase our sales of F&I products at our dealerships.

Parts, Service and Collision Repair. Each of our franchised dealerships offers a fully integrated service and parts department. Manufacturers permit warranty work to be performed only at franchised dealerships such as ours. As a result, our franchised dealerships are uniquely qualified and positioned to perform work covered by manufacturer warranties on increasingly complex vehicles. We believe we can continue to grow our profitable parts and service business over the long term by increasing service capacity, investing in sophisticated equipment and well-trained technicians, using variable rate pricing structures, focusing on customer service and efficiently managing our parts inventory. In addition, we believe our emphasis on selling extended service contracts associated with new and used vehicle retail sales will drive further service and parts business in our dealerships as we increase the potential to retain current customers beyond the term of the standard manufacturer warranty period.

Certified Pre-Owned Vehicles. Various manufacturers provide franchised dealers the opportunity to sell certified pre-owned (“CPO”) vehicles. This certification process extends the standard manufacturer warranty on the CPO vehicle, which we believe increases our potential to retain the pre-owned purchaser as a future parts and service customer. Since CPO warranty work can only be performed at franchised dealerships, we believe CPO warranty work adds additional stability and will increase our Fixed Operations business.

Relationships with Manufacturers

Each of our dealerships operates under a separate franchise or dealer agreement that governs the relationship between the dealership and the manufacturer. Each franchise or dealer agreement specifies the location of the dealership for the sale of vehicles and for the performance of certain approved services in a specified market area. The designation of such areas generally does not guarantee exclusivity within a specified territory. In addition, most manufacturers allocate vehicles on a “turn and earn” basis that rewards high unit sales volume. A franchise or dealer agreement incentivizes the dealer to meet specified standards regarding showrooms, facilities and equipment for servicing vehicles, inventories, minimum net working capital, personnel training and other aspects of the business. Each franchise or dealer agreement also gives the related manufacturer the right to approve the dealer operator and any material change in management or ownership of the dealership. Each manufacturer may terminate a franchise or dealer agreement under certain circumstances, such as a change in control of the dealership without manufacturer approval, the impairment of the reputation or financial condition of the dealership, the death, removal or withdrawal of the dealer operator, the conviction of the dealership or the dealership’s owner or dealer operator of certain crimes, the failure to adequately operate the dealership or maintain new vehicle financing arrangements, insolvency or bankruptcy of the dealership or a material breach of other provisions of the applicable franchise or dealer agreement.

Many automobile manufacturers have developed and implemented policies regarding public ownership of dealerships, which include the ability to force the sale of their respective franchises:

- upon a change in control of our company or a material change in the composition of our Board of Directors;
- if an automobile manufacturer or distributor acquires more than 5% of the voting power of our securities; and
- if an individual or entity (other than an automobile manufacturer or distributor) acquires more than 20% of the voting power of our securities, and the manufacturer disapproves of such individual’s or entity’s ownership interest.

To the extent that new or amended manufacturer policies restrict the number of dealerships that may be owned by a dealership group or the transferability of our common stock, such policies could have a material adverse effect on us.

We believe that we will be able to renew at expiration all of our existing franchise and dealer agreements.

Many states have placed limitations upon manufacturers' and distributors' ability to sell new motor vehicles directly to customers in their respective states in an effort to protect dealers from practices they believe constitute unfair competition. In general, these statutes make it unlawful for a manufacturer or distributor to compete with a new motor vehicle dealer in the same brand operating under an agreement or franchise from the manufacturer or distributor in the relevant market area. Certain states, including Florida, Georgia, North Carolina, South Carolina and Virginia, limit the amount of time that a manufacturer or distributor may temporarily operate a dealership.

In addition, all of the states in which our dealerships currently do business require manufacturers or distributors to show "good cause" for terminating or failing to renew a dealer's franchise or dealer agreement. Further, each of the states provides some method for dealers to challenge manufacturer attempts to establish dealerships of the same brand in their relevant market area.

5

SONIC AUTOMOTIVE, INC.

Competition

The retail automotive industry is highly competitive. Depending on the geographic market, we compete both with dealers offering the same brands and product lines as ours and dealers offering other manufacturers' vehicles. We also compete for vehicle sales with auto brokers, leasing companies and services offered on the internet that provide customer referrals to other dealerships or who broker vehicle sales between customers and other dealerships. We compete with small, local dealerships and with large multi-franchise and pre-owned automotive dealership groups.

We believe that the principal competitive factors in vehicle sales are the customer experience provided, the location of dealerships, the marketing campaigns conducted by manufacturers, the ability of dealerships to offer an attractive selection of the most popular vehicles and the quality of services and pricing (including manufacturer rebates and other special offers). In particular, pricing has become more important as a result of price-savvy customers using sources available on the internet to determine current market retail prices. Other competitive factors include customer preference for makes of automobiles and coverage under manufacturer warranties.

In addition to competition for vehicle sales, we also compete with other auto dealers, service stores, auto parts retailers and independent mechanics in providing parts and service. We believe that the principal competitive factors in parts and service sales are price, the use of factory-approved replacement parts, factory-trained technicians, the familiarity with a manufacturer's makes and models and the quality of customer service. A number of regional and national chains offer selected parts and services at prices that may be lower than our prices.

In arranging or providing financing for our customers' vehicle purchases, we compete with a broad range of financial institutions. In addition, financial institutions are now offering F&I products through the internet. We believe the principal competitive factors in providing financing are convenience, interest rates and contract terms.

Our success depends, in part, on national and regional automobile-buying trends, local and regional economic factors and other regional competitive pressures. Conditions and competitive pressures affecting the markets in which we operate, such as price-cutting by dealers in these areas, or in any new markets we enter, could adversely affect us, even though the retail automobile industry as a whole might not be affected.

Governmental Regulations and Environmental Matters

Numerous federal and state regulations govern our business of marketing, selling, financing and servicing automobiles. We are also subject to laws and regulations relating to business corporations.

Under the laws of the states in which we currently operate as well as the laws of other states into which we may expand, we must obtain a license in order to establish, operate or relocate a dealership or operate an automotive repair service. These laws also regulate our conduct of business, including our sales, operating, advertising, financing and employment practices, including federal and state wage-hour, anti-discrimination and other employment practices laws.

Our financing activities with customers are subject to federal truth-in-lending, consumer privacy, consumer leasing and equal credit opportunity regulations as well as state and local motor vehicle finance laws, installment finance laws, usury laws and other installment sales laws. Some states regulate finance fees that may be paid as a result of vehicle sales.

Federal, state and local environmental regulations, including regulations governing air and water quality, the clean-up of contaminated property and the use, storage, handling, recycling and disposal of gasoline, oil and other materials, also apply to us and our dealership properties.

As with automobile dealerships generally, and service, parts and body shop operations in particular, our business involves the use, storage, handling and contracting for recycling or disposal of hazardous or toxic substances or wastes and other environmentally sensitive materials. Our business also involves the past and current operation and/or removal of above ground and underground storage tanks containing such substances, wastes or materials.

Accordingly, we are subject to regulation by federal, state and local authorities that establish health and environmental quality standards, provide for liability related to those standards and provide penalties for violations of those standards. We are also subject to laws, ordinances and regulations governing remediation of contamination at facilities we own or operate or to which we send hazardous or toxic substances or wastes and other environmentally sensitive materials for treatment, recycling or disposal.

We do not have any known material environmental liabilities, and we believe that compliance with environmental laws and regulations will not, individually or in the aggregate, have a material adverse effect on our results of operations, financial condition

SONIC AUTOMOTIVE, INC.

and cash flows. However, soil and groundwater contamination is known to exist at certain properties owned and used by us. Further, environmental laws and regulations are complex and subject to frequent change. In addition, in connection with our past or future acquisitions, it is possible that we will assume or become subject to new or unforeseen environmental costs or liabilities, some of which may be material.

Executive Officers of the Registrant

Our executive officers as of the date of this Form 10-K, are as follows:

Name	Age	Position(s) with Sonic
O. Bruton Smith	89	Executive Chairman and Director
B. Scott Smith	49	Chief Executive Officer, President and Director
David Bruton Smith	42	Vice Chairman and Director
Heath R. Byrd	50	Executive Vice President and Chief Financial Officer
Jeff Dyke	49	Executive Vice President of Operations

O. Bruton Smith is the Founder of Sonic and has served as Sonic's Executive Chairman since July 2015. Prior to his appointment as Executive Chairman, Mr. Smith had served as Chairman and Chief Executive Officer of the Company since its organization in January 1997. Mr. Smith has also served as a director of Sonic since its organization in January 1997. Mr. Smith is also a director of many of Sonic's subsidiaries. Mr. Smith has worked in the retail automobile industry since 1966. Mr. Smith is also the Executive Chairman and a director of Speedway Motorsports, Inc. ("SMI"), which is controlled by Mr. Smith and his family. SMI is a public company whose shares are traded on the New York Stock Exchange (the "NYSE"). Among other things, SMI owns and operates the following Speedways: Atlanta Motor Speedway, Bristol Motor Speedway, Charlotte Motor Speedway, Kentucky Speedway, Las Vegas Motor Speedway, New Hampshire Motor Speedway, Sonoma Raceway and Texas Motor Speedway. He is also a director of most of SMI's operating subsidiaries.

B. Scott Smith is the Co-Founder of Sonic. He is also Chief Executive Officer, President and a director of Sonic. Prior to his appointment as Chief Executive Officer in July 2015, Mr. Smith had served as President and Chief Strategic Officer of Sonic since March 2007. Prior to that, Mr. Smith served as Sonic's Vice Chairman and Chief Strategic Officer from October 2002 to March 2007 and President and Chief Operating Officer from April 1997 to October 2002. Mr. Smith has been a director of Sonic since its organization in January 1997. Mr. Smith also serves as a director and executive officer of many of Sonic's subsidiaries. Mr. Smith, who is the son of O. Bruton Smith and the brother of David Bruton Smith, has been an executive officer of Town & Country Ford since 1993, and was a minority owner of both Town & Country Ford and Fort Mill Ford before Sonic's acquisition of those dealerships in 1997. Mr. Smith became the General Manager of Town & Country Ford in November 1992 where he remained until his appointment as President and Chief Operating Officer of Sonic in April 1997. Mr. Smith has over 27 years of experience in the automobile dealership industry.

David Bruton Smith was appointed to the office of Vice Chairman in March 2013. He has served as Executive Vice President and a director of Sonic since October 2008 and has served in Sonic's organization since 1998. Prior to being named a director and Executive Vice President in 2008, Mr. Smith served as Sonic's Senior Vice President of Corporate Development. Mr. Smith served as Sonic's Vice President of Corporate Strategy from October 2005 to March 2007, and also served prior to that time as Dealer Operator and General Manager of several Sonic

dealerships. He is the son of Mr. O. Bruton Smith and the brother of Mr. B. Scott Smith.

Heath R. Byrd has served as Sonic's Executive Vice President and Chief Financial Officer since April 2013. Mr. Byrd was previously a Vice President and Sonic's Chief Information Officer from December 2007 to March 2013, and has served our organization since 2007. Prior to joining Sonic, Mr. Byrd served in a variety of management positions at HR America, Inc., a workforce management firm that provided customized human resource and workforce development through co-sourcing arrangements, including as a director, as President and Chief Operating Officer and as Chief Financial Officer and Chief Information Officer. Prior to HR America, Mr. Byrd served as a Manager in the Management Consulting Division of Ernst & Young LLP.

Jeff Dyke has served as Sonic's Executive Vice President of Operations since October 2008 and is responsible for direct oversight for all of Sonic's retail automotive operations. From March 2007 to October 2008, Mr. Dyke served as our Division Chief Operating Officer – Southeast Division, where he oversaw retail automotive operations for the states of Alabama, Florida, Georgia, North Carolina, South Carolina, Tennessee and Texas. Mr. Dyke first joined Sonic in October 2005 as our Vice President of Retail Strategy, a position that he held until April 2006, when he was promoted to Division Vice President – Eastern Division, a position he held from April 2006 to March 2007. Prior to joining Sonic, Mr. Dyke worked in the automotive retail industry at AutoNation, Inc. from 1996 to 2005, where he held several positions in divisional, regional and dealership management with that company.

SONIC AUTOMOTIVE, INC.

Employees

As of December 31, 2016, we employed approximately 9,800 associates. We believe that our relationships with our associates are good. Approximately 275 of our associates, primarily service technicians in our northern California markets, are represented by a labor union. Although only a small percentage of our associates is represented by a labor union, we may be affected by labor strikes, work slowdowns and walkouts at automobile manufacturers' manufacturing facilities.

Company Information

Our website is located at www.sonicautomotive.com. Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and all amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as well as proxy statements and other information we file with, or furnish to, the Securities and Exchange Commission (the "SEC") are available free of charge on our website. We make these documents available as soon as reasonably practicable after we electronically transmit them to the SEC. Except as otherwise stated in these documents, the information contained on our website or available by hyperlink from our website is not incorporated into this Annual Report on Form 10-K or other documents we transmit to the SEC.

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

Item 1A. Risk Factors.

Our business, financial condition, results of operations, cash flows, prospects and the prevailing market price and performance of our Class A common stock may be adversely affected by a number of factors, including the material risks noted below. Our stockholders and prospective investors should consider these risks, uncertainties and other factors prior to making an investment decision.

Risks Related to Our Sources of Financing and Liquidity

Our significant indebtedness could materially adversely affect our financial health, limit our ability to finance future acquisitions, expansion plans and capital expenditures and prevent us from fulfilling our financial obligations.

As of December 31, 2016, our total outstanding indebtedness was approximately \$2.4 billion, which includes floor plan notes payable, long-term debt and short-term debt.

We have up to \$250.0 million of maximum borrowing availability under a syndicated revolving credit facility (the “2016 Revolving Credit Facility”) and up to \$1.0 billion of maximum borrowing availability for combined syndicated new and used vehicle inventory floor plan financing (the “2016 Floor Plan Facilities”). We refer to the 2016 Revolving Credit Facility and the 2016 Floor Plan Facilities collectively as our “2016 Credit Facilities.” Based on balances as of December 31, 2016, we had approximately \$207.0 million available for additional borrowings under the 2016 Revolving Credit Facility based on the borrowing base calculation, which is affected by numerous factors including eligible asset balances. We are able to borrow under our 2016 Revolving Credit Facility only if, at the time of the borrowing, we have met all representations and warranties and are in compliance with all financial and other covenants contained therein. We also have capacity to finance new and used vehicle inventory purchases under floor plan agreements with various manufacturer-affiliated finance companies and other lending institutions (the “Silo Floor Plan Facilities”) as well as our 2016 Floor Plan Facilities. In addition, the indentures relating to our 5.0% Senior Subordinated Notes due 2023 (the “5.0% Notes”), our 7.0% Senior Subordinated Notes due 2022 (the “7.0% Notes”) and our other debt instruments allow us to incur additional indebtedness, including secured indebtedness, as long as we comply with the terms thereunder.

In addition, the majority of our dealership properties are leased under long-term operating lease arrangements that commonly have initial terms of fifteen to twenty years with renewal options generally ranging from five to ten years. These operating leases require compliance with financial and operating covenants similar to those under our 2016 Credit Facilities, and monthly payments of rent that may fluctuate based on interest rates and local consumer price indices. The total future minimum lease payments related to these operating leases and certain equipment leases are significant and are disclosed in Note 12, “Commitments and Contingencies,” to the accompanying consolidated financial statements.

Our failure to comply with certain covenants in these agreements or indentures could materially adversely affect our ability to access our borrowing capacity, subject us to acceleration of our outstanding debt, result in a cross default on other indebtedness and could have a material adverse effect on our ability to continue our business.

An acceleration of our obligation to repay all or a substantial portion of our outstanding indebtedness or lease obligations would have a material adverse effect on our business, financial condition or results of operations.

Our 2016 Credit Facilities, the indentures governing the 5.0% Notes and the 7.0% Notes and many of our operating leases contain numerous financial and operating covenants. A breach of any of these covenants could result in a default under the applicable agreement or indenture. In addition, a default under one agreement or indenture could result in a default and acceleration of our repayment obligations under the other agreements or indentures, including the indentures governing our outstanding 5.0% Notes and 7.0% Notes. If a cross default were to occur, we may not be able to pay our debts or borrow sufficient funds to refinance them. Even if new financing were available, it may not be on terms acceptable to us. If a default were to occur, we may be unable to adequately finance our operations and the value of our common stock would be materially adversely affected because of acceleration and cross-default provisions. As a result of this risk, we could be forced to take actions that we otherwise would not take, or not take actions that we otherwise might take, in order to comply with the covenants in these agreements and indentures.

9

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

Our ability to make interest and principal payments when due to holders of our debt securities depends upon our future performance and our receipt of sufficient funds from our subsidiaries.

Our ability to meet our debt obligations and other expenses will depend on our future performance, which will be affected by financial, business, domestic and foreign economic conditions, the regulatory environment and other factors, many of which we are unable to control. Substantially all of our consolidated assets are held by our subsidiaries and substantially all of our consolidated cash flow and net income are generated by our subsidiaries. Accordingly, our cash flow and ability to service debt depend to a substantial degree on the results of operations of our subsidiaries and upon the ability of our subsidiaries to provide us with cash. We may receive cash from our subsidiaries in the form of dividends, loans or distributions. We may use this cash to service our debt obligations or for working capital. Our subsidiaries are separate and distinct legal entities and have no obligation, contingent or otherwise, to distribute cash to us or to make funds available to service debt.

If our cash flow is not sufficient to service our debt as it becomes due, we may be required to refinance the debt, sell assets or sell shares of our common stock on terms that we do not find attractive. Further, our failure to comply with the financial and other restrictive covenants relating to the 2016 Credit Facilities and the indentures pertaining to our outstanding notes could result in a default under these agreements and indentures that would prevent us from borrowing under the 2016 Credit Facilities, which could materially adversely affect our business, financial condition and results of operations. If a default and acceleration of repayment were to occur, we may be unable to adequately finance our operations and the value of our Class A common stock could be materially adversely affected.

We have financed the purchase of certain dealership properties with mortgage notes that require balloon payments at the end of the notes' terms.

Many of our mortgage notes' principal and interest payments are based on an amortization period longer than the actual terms (maturity dates) of the notes. We will be required to repay or refinance the remaining principal balances for certain of our mortgages with balloon payments at the notes' maturity dates, which range from 2017 to 2033. The amounts to be repaid or refinanced at the maturity dates could be significant. We may not have sufficient liquidity to make such payments at the notes' maturity dates. In the event we do not have sufficient liquidity to completely repay the remaining principal balances at maturity, we may not be able to refinance the notes at interest rates that are acceptable to us, or depending on market conditions, refinance the notes at all. Our inability to repay or refinance these notes could have a material adverse effect on our business, financial condition and results of operations.

We depend on the performance of subleases to offset costs related to certain of our lease agreements.

In many cases, when we sell a dealership, the buyer of the dealership will sublease the dealership property from us, but we are not released from the underlying lease obligation to the primary landlord. We rely on the sublease income from the buyer to offset the expense incurred related to our obligation to pay the primary landlord. We also rely on the buyer to maintain the property in accordance with the terms of the sublease (which in most cases mirror the terms of the lease we have with the primary landlord). Although we assess the financial condition of a buyer at the time we sell the dealership, and seek to obtain guarantees of the buyer's sublease obligation from the stockholders or affiliates of the buyer, the financial condition of the buyer and/or the sublease guarantors may deteriorate over time. In the event the buyer does not perform under the terms of the sublease agreement (due to the buyer's financial condition or other factors), we may not be able to recover amounts owed to us under the terms of the sublease agreement or the related guarantees. Our operating results, financial condition and cash flows may be materially adversely affected if

sublessees do not perform their obligations under the terms of the sublease agreements.

Our use of hedging transactions could limit our financial gains or result in financial losses.

To reduce our exposure to fluctuations in cash flow due to interest rate fluctuations, we have entered into, and in the future expect to enter into, certain derivative instruments (or hedging agreements). No hedging activity can completely insulate us from the risks associated with changes in interest rates. As of December 31, 2016, we had interest rate swap agreements to effectively convert a portion of our LIBOR-based variable rate debt to a fixed rate. See the heading "Derivative Instruments and Hedging Activities" under Note 6, "Long-Term Debt," to the accompanying consolidated financial statements. We intend to hedge as much of the interest rate risk as management determines is in our best interests given the cost of such hedging transactions.

Our hedging transactions expose us to certain risks and financial losses, including, among other things:

- counterparty credit risk;
- available interest rate hedging may not correspond directly with the interest rate risk for which we seek protection;

10

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

- the duration or the amount of the hedge may not match the duration or the amount of the related liability;
- the value of derivatives used for hedging may be adjusted from time to time in accordance with accounting rules to reflect changes in fair value, downward adjustments, or “mark-to-market losses,” which would affect our stockholders’ equity; and
- all of our hedging instruments contain terms and conditions with which we are required to meet. In the event those terms and conditions are not met, we may be required to settle the instruments prior to the instruments’ maturity with cash payments which could significantly affect our liquidity.

A failure on our part to effectively hedge against interest rate changes may adversely affect our financial condition and results of operations.

We may not be able to satisfy our debt obligations upon the occurrence of a change of control.

Upon the occurrence of a change of control, as defined in the 5.0% Notes and the 7.0% Notes, holders of these instruments will have the right to require us to purchase all or any part of such holders’ notes at a price equal to 101% of the principal amount thereof, plus accrued and unpaid interest, if any. The events that constitute a change of control under these indentures may also constitute a default under our 2016 Credit Facilities. Any future debt instruments that we may incur may contain similar provisions regarding repurchases in the event of a change of control triggering event. There can be no assurance that we would have sufficient resources available to satisfy all of our obligations under these debt instruments in the event of a change of control. In the event we were unable to satisfy these obligations, it could have a material adverse impact on our business and our stockholders.

Risks Related to Our Relationships with Vehicle Manufacturers

Our operations may be adversely affected if one or more of our manufacturer franchise or dealer agreements is terminated or not renewed.

Each of our dealerships operates under a separate franchise or dealer agreement with the applicable automobile manufacturer. Without a franchise or dealer agreement, we cannot obtain new vehicles from a manufacturer or advertise as an authorized factory service center. As a result, we are significantly dependent on our relationships with the manufacturers.

Moreover, manufacturers exercise a great degree of control over the operations of our dealerships through the franchise and dealer agreements. The franchise and dealer agreements govern, among other things, our ability to purchase vehicles from the manufacturer and to sell vehicles to customers. Each of our franchise or dealer agreements provides for termination or non-renewal for a variety of causes, including certain changes in the financial condition of the dealerships and any unapproved change of ownership or management. Manufacturers may also have a right of first refusal if we seek to sell dealerships.

We cannot guarantee that any of our existing franchise and dealer agreements will be renewed or that the terms and conditions of such renewals will be favorable to us. Actions taken by manufacturers to exploit their superior bargaining position in negotiating the terms of franchise and dealer agreements or renewals of these agreements or otherwise could also have a material adverse effect on our business, results of operations, financial condition and cash flows.

Our failure to meet a manufacturer's customer satisfaction, financial and sales performance and facility requirements may adversely affect our profitability and our ability to acquire new dealerships.

A manufacturer may condition its allotment of vehicles, participation in bonus programs, or acquisition of additional franchises upon our compliance with its brand and facility standards. These standards may require investments in technology and facilities that we otherwise would not make. This may put us in a competitive disadvantage with other competing dealerships and may ultimately result in our decision to sell a franchise when we believe it may be difficult to recover the cost of the required investment to reach the manufacturer's brand and facility standards.

11

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

In addition, many manufacturers attempt to measure customers' satisfaction with their sales and warranty service experiences through manufacturer-determined CSI scores. The components of CSI vary by manufacturer and are modified periodically. Franchise and dealer agreements may also impose financial and sales performance standards. Under our agreements with certain manufacturers, a dealership's CSI scores and financial and sales performance standards may be considered as factors in evaluating applications for additional dealership acquisitions. From time to time, some of our dealerships have had difficulty meeting various manufacturers' CSI requirements or performance standards. We cannot assure you that our dealerships will be able to comply with these requirements or performance standards in the future. A manufacturer may refuse to consent to an acquisition of one of its franchises if it determines our dealerships do not comply with its CSI requirements or performance standards, which could impair the execution of our acquisition strategy. In addition, we receive incentive payments from the manufacturers based, in part, on CSI scores, which could be materially adversely affected if our CSI scores decline.

If state dealer laws are repealed or weakened, our dealerships will be more susceptible to termination, non-renewal or renegotiation of their franchise and dealer agreements.

State dealer laws generally provide that a manufacturer may not terminate or refuse to renew a franchise or dealer agreement unless it has first provided the dealer with written notice setting forth good cause and stating the grounds for termination or non-renewal. Some state dealer laws allow dealers to file protests or petitions or attempt to comply with the manufacturer's criteria within the notice period to avoid the termination or non-renewal. Manufacturers' lobbying efforts (including those of Tesla) may lead to the repeal or revision of state dealer laws. If dealer laws are repealed or weakened in the states in which we operate, manufacturers may be able to terminate our franchises without providing advance notice, an opportunity to cure or a showing of good cause. Without the protection of state dealer laws, it may also be more difficult for our dealerships to renew their franchise or dealer agreements upon expiration.

The ability of a manufacturer to grant additional franchises is based on several factors which are not within our control. If manufacturers grant new franchises in areas near or within our existing markets, this could significantly impact our revenues and/or profitability. In addition, current state dealer laws generally restrict the ability of automobile manufacturers to enter the retail market and sell directly to consumers. However, if manufacturers obtain the ability to directly retail vehicles and do so in our markets, such competition could have a material adverse effect on us.

Our sales volume and profit margin on each sale may be materially adversely affected if manufacturers discontinue or change their incentive programs.

Our dealerships depend on the manufacturers for certain sales incentives, warranties and other programs that are intended to promote and support dealership new vehicle sales. Manufacturers routinely modify their incentive programs in response to changing market conditions. Some of the key incentive programs include:

- customer rebates or below market financing on new and used vehicles;
- employee pricing;
- dealer incentives on new vehicles;
- manufacturer floor plan interest and advertising assistance;
- warranties on new and used vehicles; and
- sponsorship of certified pre-owned vehicle sales by authorized new vehicle dealers.

Manufacturers frequently offer incentives to potential customers. A reduction or discontinuation of a manufacturer's incentive programs may materially adversely impact vehicle demand and affect our results of operations.

Our sales volume may be materially adversely affected if manufacturer captives change their customer financing programs or are unable to provide floor plan financing.

One of the primary finance sources used by consumers in connection with the purchase of a new or used vehicle is the manufacturer captive finance companies. These captive finance companies rely, to a certain extent, on the public debt markets to provide the capital necessary to support their financing programs. In addition, the captive finance companies will occasionally change their loan underwriting criteria to alter the risk profile of their loan portfolio. A limitation or reduction of available consumer financing for these or other reasons could affect consumers' ability to purchase a vehicle and, thus, could have a material adverse effect on our sales volume.

12

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

Our parts and service sales volume and margins are dependent on manufacturer warranty programs.

Franchised automotive retailers perform factory authorized service work and sell original replacement parts on vehicles covered by warranties issued by the automotive manufacturer. Dealerships which perform work covered by a manufacturer warranty are reimbursed at rates established by the manufacturer. For the year ended December 31, 2016, approximately 17.1% of our parts, service and collision repair revenue was for work covered by manufacturer warranties. To the extent a manufacturer reduces the labor rates or markup of replacement parts for such warranty work, our parts and service sales volume and margins could be adversely affected.

Adverse conditions affecting one or more key manufacturers or lenders may negatively impact our results of operations.

Our results of operations depend on the products, services, and financing and incentive programs offered by major automobile manufacturers, and could be negatively impacted by any significant changes to these manufacturers' financial condition, marketing strategy, vehicle design, publicity concerning a particular manufacturer or vehicle model, production capabilities, management, reputation and labor relations.

Events such as labor strikes or other disruptions in production, including those caused by natural disasters, that may adversely affect a manufacturer may also adversely affect us. In particular, labor strikes at a manufacturer that continue for a substantial period of time could have a material adverse effect on our business. Similarly, the delivery of vehicles from manufacturers at a time later than scheduled, which may occur during critical periods of new product introductions, could limit sales of those vehicles during those periods. This has been experienced at some of our dealerships from time to time. Adverse conditions affecting these and other important aspects of manufacturers' operations and public relations may adversely affect our ability to sell their automobiles and, as a result, significantly and detrimentally affect our business and results of operations.

Moreover, our business could be materially adversely impacted by the bankruptcy of a major vehicle manufacturer or related lender. For example:

- a manufacturer in bankruptcy could attempt to terminate all or certain of our franchises, in which case we may not receive adequate compensation for our franchises;
 - consumer demand for such manufacturer's products could be substantially reduced;
 - a lender in bankruptcy could attempt to terminate our floor plan financing and demand repayment of any amounts outstanding;
 - we may be unable to arrange financing for our customers for their vehicle purchases and leases through such lender, in which case we would be required to seek financing with alternate financing sources, which may be difficult to obtain on similar terms, if at all;
 - we may be unable to collect some or all of our significant receivables that are due from such manufacturer or lender, and we may be subject to preference claims relating to payments made by such manufacturer or lender prior to bankruptcy; and
 - such manufacturer may be relieved of its indemnification obligations with respect to product liability claims.
- Additionally, any such bankruptcy may result in us being required to incur impairment charges with respect to the inventory, fixed assets and intangible assets related to certain dealerships, which could adversely impact our results of operations, financial condition and our ability to remain in compliance with the financial ratios contained in our debt agreements.

Manufacturer stock ownership restrictions may impair our ability to maintain or renew franchise or dealer agreements or issue additional equity.

Some of our franchise and dealer agreements prohibit transfers of any ownership interests of a dealership and, in some cases, its parent, without prior approval of the applicable manufacturer. Our existing franchise and dealer agreements could be terminated if a person or entity acquires a substantial ownership interest in us or acquires voting power above certain levels without the applicable manufacturer's approval. While the holders of our Class B common stock currently maintain voting control of Sonic, their future investment decisions as well as those of holders of our Class A common stock are generally outside of our control and could result in the termination or non-renewal of existing franchise or dealer agreements or impair our ability to negotiate new franchise or dealer agreements for dealerships we acquire in the future. In addition, if we cannot obtain any requisite approvals on a timely basis, we may not be able to issue additional equity or otherwise raise capital on terms acceptable to us. These restrictions may also prevent or deter a prospective acquirer from acquiring control of us.

13

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

We depend on manufacturers to supply us with sufficient numbers of popular new models.

Manufacturers typically allocate their vehicles among dealerships based on the sales history of each dealership. Supplies of popular new vehicles may be limited by the applicable manufacturer's production capabilities. Popular new vehicles that are in limited supply typically produce the highest profit margins. We depend on manufacturers to provide us with a desirable mix of popular new vehicles. Our operating results may be materially adversely affected if we do not obtain a sufficient supply of these vehicles on a timely basis.

A decline in the quality of vehicles we sell, or consumers' perception of the quality of those vehicles, may adversely affect our business.

Our business is highly dependent on consumer demand and preferences. Events such as manufacturer recalls, negative publicity or legal proceedings related to these events may have a negative impact on the products we sell. If such events are significant, the profitability of our dealerships related to those manufacturers could be adversely affected and we could experience a material adverse effect on our overall results of operations, financial position and cash flows.

For instance, negative publicity and legal proceedings related to events such as the well-known Volkswagen/Audi emissions issue may have a negative impact on the products we sell and the profitability of our dealerships related to those manufacturers could be adversely affected. Depending on the ultimate outcome of the Volkswagen/Audi emissions issue and whether or not other manufacturers have implemented similar technologies, the resulting impact could result in a material adverse effect on our overall results of operations, financial position and cash flows. As of December 31, 2016, we operated five Volkswagen and five Audi franchised dealerships. During the year ended December 31, 2016, these dealerships generated revenues of approximately \$647.3 million, representing approximately 6.7% of our total revenues.

In the event that consumer or other related lawsuits are filed against our Volkswagen and Audi dealerships related to this issue, we believe that our dealerships are entitled to indemnification and assumption of defense from Volkswagen Group of America, Inc. related to such claims.

Risks Related to Our Growth Strategy

Our investment in new business strategies, services and technologies is inherently risky, and could disrupt our ongoing business or have a material adverse effect on our overall business and results of operations.

We have invested and expect to continue to invest in new business strategies, services and technologies, including our EchoPark® stores and our OSOE initiative. Such endeavors may involve significant risks and uncertainties, including allocating management resources away from current operations, insufficient revenues to offset expenses associated with these new investments, inadequate return of capital on our investments and unidentified issues not discovered in our due diligence of such strategies and offerings. Because these ventures are inherently risky, no assurance can be given that such strategies and offerings will be successful and will not have a material adverse effect on our

reputation, financial condition and operating results.

Our ability to make acquisitions, execute our stand-alone pre-owned store initiative and grow organically may be restricted by the terms and limits of the 2016 Credit Facilities.

The amount of capital available to us is limited to the liquidity available under our 2016 Credit Facilities and capital generated through operating activities. Pursuant to the 2016 Credit Facilities, we are restricted from making dealership acquisitions in any fiscal year if the aggregate cost of all such acquisitions is in excess of certain amounts, without the written consent of the required lenders (as that term is defined in the 2016 Credit Facilities). Our pace and scale of growing our stand-alone pre-owned store initiative may be limited in the event other sources of capital are unavailable. These restrictions may limit our growth strategy.

We may not be able to capitalize on future real estate and dealership acquisition opportunities because our ability to obtain capital to fund these acquisitions is limited.

We intend to finance future real estate and dealership acquisitions with cash generated from operations, through issuances of our stock or debt securities and through borrowings under credit arrangements. We may not be able to obtain additional financing by issuing stock or debt securities due to the market price of our Class A common stock, overall market conditions or covenants under our 2016 Credit Facilities that restrict our ability to issue additional indebtedness, or the need for manufacturer consent to the issuance of equity securities. Using cash to complete acquisitions could substantially limit our operating or financial flexibility.

In addition, we are dependent to a significant extent on our ability to finance our new and certain of our used vehicle inventory under the 2016 Floor Plan Facilities or the Silo Floor Plan Facilities (“floor plan financing”). Floor plan financing arrangements allow

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

us to borrow money to buy a particular new vehicle from the manufacturer or a used vehicle on trade-in or at auction and pay off the loan when we sell that particular vehicle. We must obtain floor plan financing or obtain consents to assume existing floor plan financing in connection with our acquisition of dealerships. In the event that we are unable to obtain such financing, our ability to complete dealership acquisitions could be limited.

Substantially all the assets of our dealerships are pledged to secure the indebtedness under our Silo Floor Plan Facilities and the 2016 Credit Facilities. These pledges may impede our ability to borrow from other sources. Moreover, because certain lending institutions are either owned by or affiliated with an automobile manufacturer, any deterioration of our relationship with the particular manufacturer-affiliated finance subsidiary could adversely affect our relationship with the affiliated manufacturer, and vice-versa.

Manufacturers' restrictions on acquisitions could limit our future growth.

We are required to obtain the approval of the applicable manufacturer before we can acquire an additional franchise of that manufacturer. In determining whether to approve an acquisition, manufacturers may consider many factors such as our financial condition and CSI scores.

Certain manufacturers also limit the number of its dealerships that we may own, our national market share of that manufacturer's sales of new vehicles or the number of dealerships we may own in a particular geographic area. In addition, under an applicable franchise or dealer agreement or under state law, a manufacturer may have a right of first refusal to acquire a dealership that we seek to acquire.

A manufacturer may condition approval of an acquisition on the implementation of material changes in our operations or extraordinary corporate transactions, facilities improvements or other capital expenditures. If we are unable or unwilling to comply with these conditions, we may be required to sell the assets of that manufacturer's dealerships or terminate our franchise or dealer agreement. We cannot assure you that manufacturers will approve future acquisitions or do so on a timely basis, which could impair the execution of our acquisition strategy.

Failure to effectively integrate acquired dealerships with our existing operations could adversely affect our future operating results.

Our future operating results depend on our ability to integrate the operations of acquired dealerships with our existing operations. In particular, we need to integrate our management information systems, procedures and organizational structures, which can be difficult. Our growth strategy has focused on the pursuit of strategic acquisitions or brand development that either expand or complement our business.

We cannot assure you that we will effectively and profitably integrate the operations of these dealerships without substantial costs, delays or operational or financial problems, due to:

- the difficulties of managing operations located in geographic areas where we have not previously operated;
- the management time and attention required to integrate and manage newly acquired dealerships;
- the difficulties of assimilating and retaining employees;
- the challenges of keeping customers; and
- the challenge of retaining or attracting appropriate dealership management personnel.

These factors could have a material adverse effect on our financial condition and results of operations.

We may not adequately anticipate all of the demands that growth through acquisitions or brand development will impose.

We face risks growing through acquisitions or expansion. These risks include, but are not limited to:

- incurring significantly higher capital expenditures and operating expenses;
- failing to assimilate the operations and personnel of acquired dealerships;
- entering new markets with which we are unfamiliar;
- potential undiscovered liabilities and operational difficulties at acquired dealerships;

15

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

- disrupting our ongoing business;
- diverting our management resources;
- failing to maintain uniform standards, controls and policies;
- impairing relationships with employees, manufacturers and customers as a result of changes in management;
- increased expenses for accounting and computer systems, as well as integration difficulties;
- failure to obtain a manufacturer's consent to the acquisition of one or more of its franchises or renew the franchise or dealer agreement on terms acceptable to us; and
- incorrectly valuing entities to be acquired or assessing markets entered.

We may not adequately anticipate all of the demands that growth will impose on our business.

We may not be able to execute our growth strategy without the costs escalating.

We have grown our business primarily through acquisitions in the past. We may not be able to consummate any future acquisitions at acceptable prices and terms or identify suitable candidates. In addition, increased competition for acquisition candidates could result in fewer acquisition opportunities for us and higher acquisition prices. The magnitude, timing, pricing and nature of future acquisitions or growth opportunities will depend upon various factors, including:

- the availability of suitable acquisition candidates;
- competition with other dealer groups or institutional investors for suitable acquisitions;
- the negotiation of acceptable terms with the seller and with the manufacturer;
- our financial capabilities and ability to obtain financing on acceptable terms;
- our stock price; and
- the availability of skilled employees to manage the acquired companies.

We may not be able to determine the actual financial condition of dealerships we acquire until after we complete the acquisition and take control of the dealerships.

The operating and financial condition of acquired businesses cannot be determined accurately until we assume control. Although we conduct what we believe to be a prudent level of investigation regarding the operating and financial condition of the businesses we purchase, in light of the circumstances of each transaction, an unavoidable level of risk remains regarding the actual operating condition of these businesses. Similarly, many of the dealerships we acquire, including some of our largest acquisitions, do not have financial statements audited or prepared in accordance with generally accepted accounting principles. We may not have an accurate understanding of the historical financial condition and performance of our acquired entities. Until we actually assume control of business assets and their operations, we may not be able to ascertain the actual value or understand the potential liabilities of the acquired entities and their operations.

Risks Related to the Automotive Retail Industry

Our facilities and operations are subject to extensive governmental laws and regulations. If we are found to be in violation of or subject to liabilities under any of these laws or regulations, or if new laws or regulations are enacted that adversely affect our operations, business, operating results, financial condition, cash flows and prospects could suffer.

The automotive retail industry, including our facilities and operations, is subject to a wide range of federal, state, and local laws and regulations, such as those relating to motor vehicle sales, retail installment sales, leasing, sales of finance, insurance and vehicle protection products, licensing, consumer protection, consumer privacy, employment practices, escheatment, anti-money laundering, environmental, vehicle emissions and fuel economy, and health and safety. With respect to motor vehicle sales, retail installment sales, leasing, and sales of finance, insurance and vehicle protection products at our stores, we are subject to various laws and regulations, the violation of which could subject us to consumer class action or other lawsuits or governmental investigations and adverse publicity, in addition to administrative, civil or criminal sanctions. With respect to employment practices, we are subject to various laws and regulations, including complex federal, state, and local wage and hour and anti-discrimination laws. We are also subject to lawsuits and governmental investigations alleging violations of these laws and regulations, including purported class action lawsuits, which could result in significant liability, fines and penalties. The violation of other laws and regulations to which we are

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

subject also can result in administrative, civil or criminal sanctions against us, which may include a cease and desist order against the subject operations or even revocation or suspension of our license to operate the subject business, as well as significant liability, fines and penalties. We currently devote significant resources to comply with applicable federal, state and local regulation of health, safety, environmental, zoning and land use regulations, and we may need to spend additional time, effort and money to keep our operations and existing or acquired facilities in compliance. In addition, we may be subject to broad liabilities arising out of contamination at our currently and formerly owned or operated facilities, at locations to which hazardous substances were transported from such facilities, and at such locations related to entities formerly affiliated with us. Although for some such liabilities we believe we are entitled to indemnification from other entities, we cannot assure you that such entities will view their obligations as we do or will be able to satisfy them. Failure to comply with applicable laws and regulations may have an adverse effect on our operations, business, operating results, financial condition, cash flows and prospects.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), which was signed into law on July 21, 2010, established the Consumer Financial Protection Bureau (the “CFPB”), a new independent federal agency funded by the U.S. Federal Reserve with broad regulatory powers and limited oversight from the U.S. Congress. Although automotive dealers are generally excluded, the Dodd-Frank Act has led to additional, indirect regulation of automotive dealers, in particular, their sale and marketing of finance and insurance products, through its regulation of automotive finance companies and other financial institutions. In March 2013, the CFPB issued supervisory guidance highlighting its concern that the practice of automotive dealers being compensated for arranging customer financing through discretionary markup of wholesale rates offered by financial institutions (“dealer markup”) results in a significant risk of pricing disparity in violation of The Equal Credit Opportunity Act (the “ECOA”). The CFPB recommended that financial institutions under its jurisdiction take steps to ensure compliance with the ECOA, which may include imposing controls on dealer markup, monitoring and addressing the effects of dealer markup policies, and eliminating dealer discretion to markup buy rates and fairly compensating dealers using a different mechanism that does not result in disparate impact to certain groups of consumers. In addition, we believe that the Patient Protection and Affordable Care Act, which was signed into law on March 23, 2010, has increased and will continue to increase our annual employee health care costs that we fund, and has also increased our cost of compliance and compliance risk related to offering health care benefits.

Furthermore, we expect that new laws and regulations, particularly at the federal level, in other areas such as a proposed “border adjustment tax” on imported goods, may be enacted, which could also materially adversely impact our business. The labor policy of the prior administration led to increased unionization efforts for U.S. companies, which could lead to higher labor costs for our company, disrupt our store operations, and adversely affect our results of operations.

Climate change legislation or regulations restricting emission of greenhouse gases could result in increased operating costs and reduced demand for the vehicles we sell.

The U.S. Environmental Protection Agency has adopted rules under existing provisions of the federal Clean Air Act that require a reduction in emissions of greenhouse gases from motor vehicles, require certain construction and operating permit reviews for greenhouse gas emissions from certain large stationary sources, and require monitoring and reporting of greenhouse gas emissions from specified sources on an annual basis. The adoption of any laws or regulations requiring significant increases in fuel economy requirements or new federal or state restrictions on emissions of greenhouse gases from our operations or on vehicles and automotive fuels in the United States could adversely affect demand for those vehicles and require us to incur costs to reduce emissions of greenhouse gases

associated with our operations.

Increasing competition among automotive retailers and the use of the internet reduces our profit margins on vehicle sales and related businesses.

Automobile retailing is a highly competitive business. Our competitors include publicly and privately owned dealerships, some of which are larger and have greater financial and marketing resources than we do. Many of our competitors sell the same or similar makes of new and used vehicles that we offer in our markets at competitive prices. We do not have any cost advantage in purchasing new vehicles from manufacturers due to economies of scale or otherwise. We typically rely on advertising, merchandising, sales expertise, customer service reputation and dealership location to sell new vehicles. Our revenues and profitability could be materially adversely affected if laws permit manufacturers to enter the retail market directly.

Our F&I business and other related businesses, which have higher margins than sales of new and used vehicles, are subject to strong competition from various financial institutions and other third parties.

Moreover, customers are using the internet to compare pricing for vehicles and related F&I services, which may further reduce margins for new and used vehicles and profits for related F&I services. If internet new vehicle sales are allowed to be conducted without the involvement of franchised dealers, our business could be materially adversely affected. In addition, other dealership

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

groups have aligned themselves with services offered on the internet or are investing heavily in the development of their own internet capabilities, which could materially adversely affect our business.

Our franchise and dealer agreements do not grant us the exclusive right to sell a manufacturer's product within a given geographic area. Our revenues or profitability could be materially adversely affected if any of our manufacturers award franchises to others in the same markets where we operate or if existing franchised dealers increase their market share in our markets.

We may face increasingly significant competition as we strive to gain market share through acquisitions or otherwise. Our operating margins may decline over time as we expand into markets where we do not have a leading position.

The effect of companies entering into the automotive space may affect our ability to grow or maintain the business over the long-term.

Large and well-capitalized technology companies have begun to enter into the automotive space in recent years. Companies such as Google, Apple, Tesla, Uber and Lyft may challenge the existing automotive manufacturing, transportation and retail models. Tesla has been challenging state dealer franchise laws in many states with mixed results, but its business model has been accepted by many consumers. Although Tesla's participation in the competitive landscape has had minimal impact on the overall retail automotive space thus far, these other large technology companies may continue to change consumers' view on how automobiles should be manufactured, equipped, used and retailed in the future. Because these companies have the ability to connect with each individual consumer easily through their technology platforms, we may ultimately be at a competitive disadvantage in marketing, financing, selling and servicing vehicles.

Our dealers depend upon new vehicle sales and, therefore, their success depends in large part upon customer demand for the particular vehicles they carry.

The success of our dealerships depends in large part on the overall success of the vehicle lines they carry. New vehicle sales generate the majority of our total revenue and lead to sales of higher-margin products and services such as finance, insurance, vehicle protection products and other aftermarket products, and parts and service operations. Our new vehicle sales operations are comprised primarily of luxury and mid-line import brands, which exposes us to manufacturer concentration risks. Although our parts and service operations and used vehicle sales may serve to offset some of this risk, changes in automobile manufacturers' vehicle models and customer demand for particular vehicles may have a material adverse effect on our business.

Our business will be harmed if overall consumer demand suffers from a severe or sustained downturn.

Our business is heavily dependent on consumer demand and preferences. Retail vehicle sales are cyclical and historically have experienced periodic downturns characterized by oversupply and weak demand. These cycles are often dependent on economic conditions, consumer confidence, the level of discretionary personal income and credit availability. Deterioration in any of these conditions may have a material adverse effect on our retail business, particularly sales of new and used automobiles.

In addition, severe or sustained changes in gasoline prices may lead to a shift in consumer buying patterns. Availability of preferred models may not exist in sufficient quantities to satisfy consumer demand and allow our stores

to meet sales expectations.

A decline of available financing in the lending market may adversely affect our vehicle sales volume.

A significant portion of vehicle buyers, particularly in the used car market, finance their purchases of automobiles. Sub-prime lenders have historically provided financing for consumers who, for a variety of reasons including poor credit histories and lack of down payment, do not have access to more traditional finance sources. In the event lenders tighten their credit standards or there is a decline in the availability of credit in the lending market, the ability of these consumers to purchase vehicles could be limited, which could have a material adverse effect on our business, revenues and profitability.

Our business may be adversely affected by import product restrictions and foreign trade risks that may impair our ability to sell foreign vehicles profitably.

A significant portion of our new vehicle business involves the sale of vehicles, parts or vehicles composed of parts that are manufactured outside the United States. As a result, our operations are subject to risks of importing merchandise, including fluctuations in the relative values of currencies, import duties or tariffs, exchange controls, trade restrictions, work stoppages and general political and socio-economic conditions in other countries. The United States or the countries from which our products are imported may, from time to time, impose new quotas, duties, tariffs or other restrictions, or adjust presently prevailing quotas, duties or tariffs, which may affect our operations and our ability to purchase imported vehicles and/or parts at reasonable prices.

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

Natural disasters and adverse weather events can disrupt our business.

Our dealerships are concentrated in states and regions in the United States, including California, Colorado, Florida and Texas, in which actual or threatened natural disasters and severe weather events (such as hail storms, floods, hurricanes, earthquakes, fires and landslides) may disrupt our store operations, which may adversely impact our business, financial condition, results of operations and cash flows. In addition to business interruption, the automotive retailing business is subject to substantial risk of property loss due to the significant concentration of property values at store locations. Although we have substantial insurance, subject to certain deductibles, limitations and exclusions, we may be exposed to uninsured or underinsured losses that could have a material adverse effect on our business, financial condition, results of operations or cash flows.

In addition, the automotive manufacturing supply chain spans the globe. As such, supply chain disruptions resulting from natural disasters and adverse weather events may affect the flow of inventory or parts to us or our manufacturing partners. Such disruptions could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Security breaches and other disruptions could compromise our information and expose us to liability, which would cause our business and reputation to suffer.

We have invested in internal and external business applications to execute our strategy of employing technology to benefit our business. In the ordinary course of business, we collect and store sensitive data, including intellectual property, our proprietary business information and that of our customers, suppliers and business partners, and personally identifiable information of our customers and employees. Although we have attempted to mitigate the cyber-security risk of both our internal and outsourced functions by implementing various cyber-security controls, we remain subject to cyber-security risks.

These cyber-security risks include:

- vulnerability to cyber-attack of our internal or externally hosted business applications;
- interruption of service or access to systems may affect our ability to deliver vehicles or complete transactions with customers;
- unauthorized access or theft of customer or employee personal confidential information, including financial information, or strategically sensitive data;
- disruption of communications (both internally and externally) that may affect the quality of information used to make informed business decisions; and
- damage to our reputation as a result of a breach in security that could affect the financial security of our customers.

Moreover, significant technology-related business functions of ours are outsourced, including:

- payroll and human resources management systems, including expense reimbursement management;
- customer relationship management, ecommerce hosting and marketing campaign management;
- dealer management, inventory management and financial reporting systems;
 - consumer credit application management, fund transfers/ACH/online banking; and
- IP telephony and WAN/LAN administration (switch & router configuration).

Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breaches due to employee error, malfeasance or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, regulatory penalties, damage our reputation, and cause a loss of confidence in our services, which could materially adversely affect our competitive position, results of operations and financial condition.

General Risks Related to Investing in Our Securities

Concentration of voting power and anti-takeover provisions of our charter, our bylaws, Delaware law and our franchise and dealer agreements may reduce the likelihood of a potential change of control from a third party. At the same time, such voting power concentration also could increase the likelihood of a change of control notwithstanding other factors.

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

Our common stock is divided into two classes with different voting rights. This dual class stock ownership allows the present holders of the Class B common stock to control us. Holders of Class A common stock have one vote per share on all matters. Holders of Class B common stock have 10 votes per share on all matters, except that they have only one vote per share on any transaction proposed or approved by the Board of Directors or a Class B common stockholder or otherwise benefiting the Class B common stockholders constituting a:

- “going private” transaction;
- disposition of substantially all of our assets;
- transfer resulting in a change in the nature of our business; or
- merger or consolidation in which current holders of common stock would own less than 50% of the common stock following such transaction.

The holders of Class B common stock (which include Mr. O. Bruton Smith, Sonic’s Executive Chairman and Director, his family members and entities they control) currently hold less than a majority of our outstanding common stock, but a majority of our voting power. As a result, the holders of Class B common stock may be able to control fundamental corporate matters and transactions, subject to the above limitations. The concentration of voting power may also discourage, delay or prevent a change of control of us from a third party even if the action was favored by holders of Class A common stock. In addition, a sale or transfer of shares by one or more of the holders of Class B common stock could result in a change of control or put downward pressure on the market price of our Class A common stock. The perception among the public that these sales or transfers will occur could also contribute to a decline in the market price of our Class A common stock.

Our charter and bylaws make it more difficult for our stockholders to take corporate actions at stockholders’ meetings. In addition, stock options, restricted stock and restricted stock units granted under the Sonic Automotive, Inc. 2004 Stock Incentive Plan or the Sonic Automotive, Inc. 2012 Stock Incentive Plan and other obligations become immediately exercisable or automatically vest upon a change in control. Delaware law also makes it difficult for stockholders who have recently acquired a large interest in a company to consummate a business combination transaction with the company against its directors’ wishes. Finally, restrictions imposed by our franchise and dealer agreements may impede or prevent any potential takeover bid. Our franchise and dealer agreements allow the manufacturers the right to terminate the agreements upon a change of control of our company and impose restrictions upon the transferability of any significant percentage of our stock to any one person or entity that may be unqualified, as defined by the manufacturer, to own one of its dealerships. The inability of a person or entity to qualify with one or more of our manufacturers may prevent or seriously impede a potential takeover bid. In addition, there may be provisions of our lending arrangements that create an event of default upon a change in control. These agreements, corporate governance documents and laws may have the effect of discouraging, delaying or preventing a change in control or preventing stockholders from realizing a premium on the sale of their shares if we were acquired.

The outcome of legal and administrative proceedings we are or may become involved in could have a material adverse effect on our future business, financial condition, results of operations, cash flows or prospects.

We are involved, and expect to continue to be involved, in numerous legal and administrative proceedings arising out of the conduct of our business, including regulatory investigations and private civil actions brought by plaintiffs purporting to represent a potential class or for which a class has been certified.

Although we vigorously defend ourselves in all legal and administrative proceedings, the outcomes of pending and future proceedings arising out of the conduct of our business, including litigation with customers, employment-related lawsuits, contractual disputes, class actions, purported class actions and actions brought by governmental authorities, cannot be predicted with certainty. An unfavorable resolution of one or more of these matters could have a material adverse effect on our business, financial condition, results of operations, cash flows or prospects.

Our business may be adversely affected by claims alleging violations of laws and regulations in our advertising, sales and finance and insurance activities.

Our business is highly regulated. In the past several years, private plaintiffs and state attorneys general have increased their scrutiny of advertising, sales and finance and insurance activities in the sale and leasing of motor vehicles. The conduct of our business is subject to numerous federal, state and local laws and regulations regarding unfair, deceptive and/or fraudulent trade practices (including advertising, marketing, sales, insurance, repair and promotion practices), truth-in-lending, consumer leasing, fair credit practices, equal credit opportunity, privacy, insurance, motor vehicle finance, installment finance, closed-end credit, usury and other installment sales. Claims arising out of actual or alleged violations of law may be asserted against us or any of our dealers by

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

individuals, either individually or through class actions, or by governmental entities in civil or criminal investigations and proceedings. Such actions may expose us to substantial monetary damages and legal defense costs, injunctive relief and criminal and civil fines and penalties, including suspension or revocation of our licenses and franchise or dealer agreements to conduct dealership operations.

Our business may be adversely affected by unfavorable conditions in our local markets, even if those conditions are not prominent nationally.

Our performance is subject to local economic, competitive, weather and other conditions prevailing in geographic areas where we operate. We may not be able to expand geographically and any geographic expansion may not adequately insulate us from the adverse effects of local or regional economic conditions. In addition, due to the provisions and terms contained in our operating lease agreements, we may not be able to relocate a dealership operation to a more favorable location without incurring significant costs or penalties.

The loss of key personnel and limited management and personnel resources could adversely affect our operations and growth.

Our success depends to a significant degree upon the continued contributions of our management team, particularly our senior management, and service and sales personnel. Additionally, franchise or dealer agreements may require the prior approval of the applicable manufacturer before any change is made in dealership general managers. We do not have employment agreements with most members of our senior management team, our dealership managers and other key dealership personnel. Consequently, the loss of the services of one or more of these key employees could have a material adverse effect on our results of operations.

In addition, as we expand, we may need to hire additional managers. The market for qualified employees in the industry and in the regions in which we operate, particularly for general managers and sales and service personnel, is highly competitive and may subject us to increased labor costs during periods of low unemployment. The loss of the services of key employees or the inability to attract additional qualified managers could have a material adverse effect on our results of operations. In addition, the lack of qualified management or employees employed by potential acquisition candidates may limit our ability to consummate future acquisitions.

Potential conflicts of interest between us and our officers or directors could adversely affect our future performance.

Mr. O. Bruton Smith serves as the Executive Chairman of SMI. Accordingly, we compete with SMI for the management time of Mr. Smith.

We have in the past and will likely in the future enter into transactions with Mr. Smith, entities controlled by Mr. Smith and his family or our other affiliates. We believe that all of our existing arrangements with affiliates are as favorable to us as if the arrangements were negotiated between unaffiliated parties, although the majority of these transactions have neither been verified by third parties in that regard nor are likely to be so verified in the future. Potential conflicts of interest could arise in the future between us and our officers or directors in the enforcement, amendment or termination of arrangements existing between them.

We may be subject to substantial withdrawal liability assessments in the future related to a multiemployer pension plan to which certain of our dealerships make contributions pursuant to collective bargaining agreements.

Six of our dealership subsidiaries in northern California currently make fixed-dollar contributions to the Automotive Industries Pension Plan (the “AI Pension Plan”) pursuant to collective bargaining agreements between our subsidiaries and the International Association of Machinists (the “IAM”) and the International Brotherhood of Teamsters (the “IBT”). The AI Pension Plan is a “multiemployer plan” as defined under the Employee Retirement Income Security Act of 1974, as amended, and our six dealership subsidiaries are among approximately 149 employers that are obligated to make contributions to the AI Pension Plan pursuant to collective bargaining agreements with the IAM, the IBT and other unions. In March 2008, the AI Pension Plan’s actuary, in accordance with the requirements of the federal Pension Protection Act of 2006, issued a certification that the AI Pension Plan was in critical status effective with the plan year commencing January 1, 2008. In conjunction with the AI Pension Plan’s critical status, the Board of Trustees of the AI Pension Plan implemented a requirement on all participating employers to increase employer contributions to the AI Pension Plan for a seven-year period commencing in 2013. According to publicly available information, in September 2016, the AI Pension Plan made a formal application for approval of suspension of benefits with the U.S. Treasury Department, which, if approved by the Treasury Department, would implement a benefit reduction effective July 1, 2017 for participants in the AI Pension Plan. The filing included an Actuarial Certification of Plan Status as of January 1, 2016 that the AI Pension Plan previously filed with the U.S. Internal Revenue Service on March 30, 2016, which reported that the AI Pension Plan was in critical and declining status as of January 1, 2016 and further notified that the AI Pension Plan is making the scheduled progress in meeting the requirements of the plan’s previously-adopted Rehabilitation Plan. The September 2016 filing with the Treasury Department also included an Actuarial Certification of Plan Solvency as of July 1, 2016 with the actuarial firm’s projection that the proposed suspensions of benefits are reasonably estimated to enable the AI Pension Plan to avoid insolvency assuming the proposed

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

RISK FACTORS

suspensions of benefits continue indefinitely and the benefit accrual reduction becomes effective upon the proposed July 1, 2017 suspension effective date. Under applicable federal law, any employer contributing to a multiemployer pension plan that completely ceases participating in the plan while the plan is underfunded is subject to payment of such employer's assessed share of the aggregate unfunded vested benefits of the plan. In certain circumstances, an employer can be assessed withdrawal liability for a partial withdrawal from a multiemployer pension plan. If any of these adverse events were to occur in the future, it could result in a substantial withdrawal liability assessment that could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Tax positions may exist related to our tax filings that could be challenged by governmental agencies and result in higher income tax expenses and affect our overall liquidity if we are unable to successfully defend these tax positions.

The California Franchise Tax Board examined our 2006 – 2008 California combined tax returns and challenged the “Method of Filing” of Sonic Automotive, Inc., Sonic Financial Corporation, SPR, LLC (i.e., Speedway Motorsports, Inc.), Oil-Chem Research Corporation (a privately held entity) and Sold, Inc. (a privately held entity) and asserted that all these companies should be filing one combined California tax return. In conjunction with this challenge, the State of California issued an assessment for each of the three years totaling \$7.4 million. During 2012 and 2013, we responded on behalf of Sonic Automotive, Inc. and noted that we disagreed with the adjustments, amounts, facts, legal analysis and conclusion listed in the State's assessment. We believe the State of California's argument does not have merit and we will vigorously fight this through both the State's administrative levels and through judicial means. However, if we are unsuccessful in our defense, it could result in a substantial tax charge that could have a material adverse effect on our business, financial condition, results of operations or cash flows.

A change in historical experience and/or assumptions used to estimate reserves could have a material impact on our earnings.

As described in “Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Use of Estimates and Critical Accounting Policies,” management relies on estimates in various areas of accounting and financial reporting. For example, our estimates for finance, insurance and service contracts and insurance reserves are based on historical experience and assumptions. Differences between actual results and our historical experiences and/or our assumptions could have a material impact on our earnings in the period of the change and in periods subsequent to the change.

Our internal control over financial reporting may not be effective.

If we fail to maintain the adequacy of our internal controls, including any failure to implement or difficulty in implementing required new or improved controls, our business and results of operations could be harmed, the results of operations we report could be subject to adjustments, we could incur remediation costs, we could fail to be able to provide reasonable assurance as to our financial results or the effectiveness of our internal controls, or fail to meet our reporting obligations under SEC regulations and the terms of our debt agreements on a timely basis and there could be a material adverse effect on the price of our Class A common stock.

Impairment of our goodwill could have a material adverse impact on our earnings.

Pursuant to applicable accounting pronouncements, we evaluate goodwill for impairment annually or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. We describe the process for testing goodwill more thoroughly in “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations - Use of Estimates and Critical Accounting Policies.” If we determine that the amount of our goodwill is impaired at any point in time, we are required to reduce goodwill on our balance sheet. If goodwill is impaired based on a future impairment test, we will be required to record a significant non-cash impairment charge that may also have a material adverse effect on our results of operations for the period in which the impairment of goodwill occurs. As of December 31, 2016, our balance sheet reflected a carrying amount of approximately \$472.4 million in goodwill.

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our principal executive offices are located at a property owned by us at 4401 Colwick Road, Charlotte, North Carolina 28211, and our telephone number at that location is (704) 566-2400.

Our dealerships are generally located along major U.S. or interstate highways. One of the principal factors we consider in evaluating a potential acquisition is its location. We prefer to acquire dealerships or build dealership facilities located along major thoroughfares, which can be easily visited by prospective customers.

We lease the majority of the properties utilized by our dealership operations from affiliates of Capital Automotive REIT and other individuals and entities. Under the terms of our franchise and dealer agreements, each of our dealerships must maintain an appropriate appearance and design of its dealership facility and is restricted in its ability to relocate. The properties utilized by our dealership operations that are owned by us or one of our subsidiaries are pledged as security for our 2016 Credit Facilities or mortgage financing arrangements. We believe that our facilities are adequate for our current needs.

Item 3. Legal Proceedings.

We are involved, and expect to continue to be involved, in numerous legal and administrative proceedings arising out of the conduct of our business, including regulatory investigations and private civil actions brought by plaintiffs purporting to represent a potential class or for which a class has been certified. Although we vigorously defend ourselves in all legal and administrative proceedings, the outcomes of pending and future proceedings arising out of the conduct of our business, including litigation with customers, employment-related lawsuits, contractual disputes, class actions, purported class actions and actions brought by governmental authorities, cannot be predicted with certainty. Similarly, except as reflected in reserves we have provided for in other accrued liabilities and other long-term liabilities in the accompanying consolidated balance sheets, we are currently unable to estimate a range of reasonably possible loss, or a range of reasonably possible loss in excess of the amount accrued, for pending proceedings. An unfavorable resolution of one or more of these matters could have a material adverse effect on our business, financial condition, results of operations, cash flows or prospects. Included in other accrued liabilities and other long-term liabilities at December 31, 2016 was approximately \$0.3 million and \$0.2 million, respectively, in reserves that we were holding for pending proceedings.

Item 4. Mine Safety Disclosures.

Not applicable.

23

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our Class A common stock is currently traded on the NYSE under the symbol “SAH.” Our Class B common stock is not traded on a public market.

As of February 21, 2017, there were 32,855,850 shares of our Class A common stock and 12,029,375 shares of our Class B common stock outstanding. As of February 21, 2017, there were 83 record holders of the Class A common stock and four record holders of the Class B common stock. The closing stock price for the Class A common stock on February 21, 2017 was \$25.95.

Our Board of Directors approved four quarterly cash dividends on all outstanding shares of common stock totaling approximately \$0.20 per share during the year ended December 31, 2016 and \$0.11 and \$0.10 per share during the years ended December 31, 2015 and 2014, respectively. Subsequent to December 31, 2016, our Board of Directors approved a cash dividend on all outstanding shares of common stock of \$0.05 per share for stockholders of record on March 15, 2017 to be paid on April 14, 2017. The declaration and payment of any future dividend is subject to the business judgment of our Board of Directors, taking into consideration our historic and projected results of operations, financial condition, cash flows, capital requirements, covenant compliance, share repurchases, current economic environment and other factors considered by our Board of Directors to be relevant. These factors are considered each quarter and will be scrutinized as our Board of Directors determines our future dividend policy. There is no guarantee that additional dividends will be declared and paid at any time in the future. See Note 6, “Long-Term Debt,” to the accompanying consolidated financial statements and “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources” for additional discussion of dividends and for a description of restrictions on the payment of dividends.

The following table sets forth the high and low closing sales prices for our Class A common stock for each calendar quarter during the periods indicated as reported by the NYSE Composite Tape and the dividends declared during such periods:

	Market Price		Cash
	High	Low	Dividend Declared
2016			
Fourth Quarter	\$24.00	\$16.90	\$ 0.050
Third Quarter	\$19.19	\$16.68	\$ 0.050
Second Quarter	\$19.04	\$16.15	\$ 0.050
First Quarter	\$22.35	\$15.91	\$ 0.050

2015

Fourth Quarter	\$25.30	\$20.73	\$ 0.038
Third Quarter	\$24.78	\$20.35	\$ 0.025
Second Quarter	\$25.37	\$23.25	\$ 0.025
First Quarter	\$26.74	\$23.16	\$ 0.025

24

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

Issuer Purchases of Equity Securities

The following table sets forth information about the shares of Class A common stock we repurchased during the three months ended December 31, 2016:

	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
October 2016	-	\$ -	-	\$ 47,518
November 2016	147	\$ 16.90	147	\$ 45,033
December 2016	-	\$ -	-	\$ 45,033
Total	147		147	

(1) On January 20, 2016, we announced that our Board of Directors had increased the dollar amount authorized for us to repurchase shares of our Class A common stock pursuant to our previously announced share repurchase program. Our share repurchase program does not have an expiration date and current remaining availability under the program is as follows:

	(In thousands)
January 2016 authorization	\$ 100,000
Total active program repurchases prior to December 31, 2016	(54,967)
Current remaining availability as of December 31, 2016	\$ 45,033

Subsequent to December 31, 2016, our Board of Directors authorized an additional \$100.0 million to repurchase shares of our Class A common stock, increasing our remaining repurchase authorization to approximately \$145.0 million before including the effect of any share repurchases subsequent to December 31, 2016.

Item 6. Selected Financial Data.

This selected consolidated financial data should be read in conjunction with “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the consolidated financial statements and the related notes thereto included elsewhere in this Annual Report on Form 10-K.

25

SONIC AUTOMOTIVE, INC. AND SUBSIDIARIES

We have accounted for all of our dealership acquisitions using the purchase method of accounting and, as a result, we do not include in our consolidated financial statements the results of operations of these dealerships prior to the date we acquired them. Our selected consolidated financial data reflects the results of operations and financial positions of each of our dealerships acquired prior to December 31, 2016. As a result of the effects of our acquisitions and other potential factors in the future, the historical consolidated financial information described in the selected consolidated financial data is not necessarily indicative of the results of our operations and financial position in the future or the results of our operations and financial position that would have resulted had such acquisitions occurred at the beginning of the periods presented in the selected consolidated financial data.

	Year Ended December 31,

(1) As discussed in “Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources” and Notes 2, 5 and 6 to the accompanying consolidated financial statements, impairment charges, business combinations and dispositions and debt refinancings have had a material impact on our reported historical consolidated financial information.

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of financial condition and results of operations should be read in conjunction with the consolidated financial statements and the related notes thereto included elsewhere in this Annual Report on Form 10-K. The financial and statistical data contained in the following discussion for all periods presented reflects our December 31, 2016 classification of dealerships between continuing and discontinued operations in accordance with "Presentation of Financial Statements" in the Accounting Standards Codification (the "ASC").

Except to the extent that differences among operating segments are material to an understanding of our business taken as a whole, we present the discussion in Management's Discussion and Analysis of Financial Condition and Results of Operations on a consolidated basis.

Unless otherwise noted, all discussion of increases or decreases are compared to the same prior year period, as applicable. The following discussion of new vehicles, used vehicles, wholesale vehicles, parts, service and collision repair and finance, insurance and other are on a same store basis, except where otherwise noted. All continuing operations stores are included within the same store group in the first full month following the first anniversary of the store's opening or acquisition. During the year ended December 31, 2016, we acquired three stand-alone used vehicle stores, opened two new manufacturer-awarded open point franchised dealerships and opened two new EchoPark® stores, which are included in reported figures for 2016, but are excluded from same store reporting for all periods. During the year ended December 31, 2015, we opened one EchoPark® store, which is included in reported figures for all periods and same store reporting for 2016 compared to 2015, but is excluded from same store reporting for 2015 compared to 2014. During the year ended December 31, 2014, we acquired one mid-line import franchise and two luxury franchises, which are included in both reported figures and same store reporting for all periods. During the year ended December 31, 2014, we opened two EchoPark® stores, which are included in reported figures for all periods and same store reporting for 2016 compared to 2015, but are excluded from same store reporting for 2015 compared to 2014.

We did not dispose of any dealership franchises during the year ended December 31, 2016 and we had no franchises held for sale as of December 31, 2016. We disposed of four franchises during the year ended December 31, 2015. We disposed of nine dealership franchises during the year ended December 31, 2014. The results of operations of these disposed stores are included in continuing operations on the accompanying consolidated statements of income for all periods presented. We elected to adopt and apply the guidance of Accounting Standards Update ("ASU") 2014-08 beginning with our Quarterly Report on Form 10-Q for the period ended June 30, 2014. Dealership franchises disposed of subsequent to March 31, 2014 have not been reclassified to discontinued operations since they did not meet the criteria in ASU 2014-08. See Note 2, "Business Acquisitions and Dispositions," to the accompanying consolidated financial statements for tabular disclosure of the effects of disposed stores that remain in continuing operations.

Overview

We are one of the largest automotive retailers in the United States (as measured by total revenue). As of December 31, 2016, we operated 116 franchises in 13 states (representing 25 different brands of cars and light trucks) and 18 collision repair centers. For management and operational reporting purposes, we group certain franchises together that share management and inventory (principally used vehicles) into “stores.” As of December 31, 2016, we operated 107 franchised dealership stores and five EchoPark® stores.

As a result of the way we manage our business, as of December 31, 2016, we had two operating segments: Franchised Dealerships and EchoPark®. Our franchised dealerships provide comprehensive services, including (1) sales of both new and used cars and light trucks; (2) sales of replacement parts and performance of vehicle maintenance, manufacturer warranty repairs, and paint and collision repair services (collectively, “Fixed Operations”); and (3) arrangement of extended warranties, service contracts, financing, insurance and other aftermarket products (collectively, “F&I”) for our customers. EchoPark® provides the same services (excluding new vehicles sales and manufacturer warranty repairs) in unique stand-alone specialty retail locations. Our EchoPark® business operates independently from our franchised new and used dealership sales operations and offers customers an exciting shopping and buying experience. Sales operations in our first EchoPark® market in Denver, Colorado began in the fourth quarter of 2014. As of December 31, 2016, we had five EchoPark® stores in operation, and we expect to open another store in Colorado in the first half of 2017. During the second quarter of 2016, we announced that we have begun the process of expanding EchoPark® operations into additional markets in North Carolina, South Carolina and Texas with operations in these markets expected to begin in 2017 and 2018. We believe that our EchoPark® business will provide long-term benefits to us, our stockholders and guests. However, in the short term, this initiative may negatively impact our overall operating results as we allocate management and capital resources to this business.

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In the fourth quarter of 2013, we announced a new customer experience initiative known as "One Sonic-One Experience" ("OSOE"). This initiative includes several new processes and proprietary technologies from inventory management, electronic deskings and pricing tools to a fully developed "customer-centric" Customer Relationship Management tool. We believe that the development of these processes and technologies will allow us to better serve our customers across our entire platform of stores. Our goal is to allow our guests to control the buying process and move at their pace so that once the vehicle has been selected our team can utilize these processes and technologies to allow our guests to complete a new or pre-owned vehicle sales transaction in less than an hour. During the latter half of 2014 and throughout 2015, we rolled out the OSOE initiative at our dealerships in Charlotte, North Carolina. During 2016, we introduced the technology component of the initiative to 14 additional stores in our Alabama, Tennessee and California markets. Additional market implementations will continue upon completion of migration activities and required market/brand specific technology modifications. We believe that our OSOE initiative will provide long-term benefits to us, our stockholders and guests. However, in the short term, this initiative may negatively impact our overall operating results as we allocate management and capital resources to this initiative.

Executive Summary

The U.S. retail automotive industry's new vehicle unit sales volume increased 0.6% to 17.5 million vehicles in 2016, from 17.4 million vehicles in 2015, according to Bloomberg Financial Markets, via Stephens Inc. For 2017, analysts' average industry expectation for the new vehicle seasonally adjusted annual rate of sales ("SAAR") is approximately 17.4 million to 17.5 million vehicles, flat compared to the industry volume level in 2016. We estimate the 2017 new vehicle SAAR will be between 17.0 million and 17.5 million vehicles. Changes in consumer confidence, availability of consumer financing or changes in the financial stability of the automotive manufacturers could cause actual 2017 new vehicle SAAR to vary from expectations. Many factors such as brand and geographic concentrations have caused our past results to differ from the industry's overall trend, as well as the industry sales mix between retail and fleet new vehicle sales volume. Our current operational goal focuses on growing our retail new vehicle sales, as opposed to fleet new vehicle sales, and, as a result, we believe it is appropriate to compare our retail new vehicle unit sales volume to the retail SAAR (which excludes fleet new vehicle sales). According to PIN from J.D. Power, retail new vehicle unit sales volume decreased 0.7% to 14.1 million vehicles in 2016, from 14.2 million vehicles in 2015.

Our same store retail new vehicle revenue was flat during 2016 in spite of a 2.3% decrease in retail new vehicle unit volume. Retail new vehicle gross profit decreased 2.8% on lower retail new vehicle unit volume and lower retail new vehicle gross profit per unit, which decreased \$11 per unit, or 0.6%, to \$1,936 per unit. We believe that lower gross margins on retail new vehicles are a result of downward pressure on pricing due to the availability of pricing information to consumers, increased competition for sales between similar branded dealerships and higher overall inventory levels. We anticipate that this trend may continue into 2017 and continue to impact new vehicle gross margins.

Our same store used vehicle unit volume increased 2.0% during 2016, driving a 0.9% increase in used vehicle revenue. Used vehicle gross profit decreased 3.0%, driven by a decrease in used vehicle gross profit per unit of \$69 per unit, or 4.9%, to \$1,331 per unit. Our same store wholesale vehicle gross loss increased approximately \$0.1 million, or 1.3%, during 2016, driven by a 16.5% increase in wholesale unit volume. Our used vehicle inventories were elevated during much of 2016, due to a significant number of vehicles held in inventory as a result of open safety recalls on certain models where the manufacturer instructed dealers not to sell the particular model until the recall work was performed. These “stop-sale” vehicles increased our inventory on-hand and associated floor plan interest expense and negatively affected our retail used vehicle unit volume and gross profit per unit and may continue to negatively affect our dealerships’ results of operations until warranty replacement parts become available or as additional models and model years become included in these safety recalls. As of December 31, 2016, we had approximately 600 “stop-sale” used vehicles in our inventory, which increased our used vehicle days’ supply by approximately two days. We focus on maintaining used vehicle inventory days’ supply in the 30- to 35-day range in order to limit our exposure to market pricing volatility. Adjusted for “stop-sale” vehicles, our used vehicle inventory days’ supply was approximately 34 days as of December 31, 2016.

Our same store Fixed Operations revenue increased 4.3% during 2016, driving a 2.2% increase in Fixed Operations gross profit impacted by a 100 basis point decrease in the Fixed Operations gross margin rate. Our same store customer pay, warranty and internal, sublet and other gross profit increased on higher activity levels in our service bays and increased used vehicle reconditioning volume during 2016, offset partially by a decrease in our wholesale parts business. Although vehicle sales and sales of associated finance, insurance and other aftermarket products are cyclical and are affected by many factors, including overall economic conditions, consumer confidence, levels of discretionary personal income, interest rates and available credit, our parts, service and collision repair services are not closely tied to vehicle sales and are not as dependent upon near-term sales volume. However, significant changes to the level of manufacturer recall and warranty activity could negatively impact our Fixed Operations results in the future.

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our same store F&I revenue increased 4.7% during 2016, driven by a 5.1% increase in F&I gross profit per retail unit, which increased \$65 per unit to \$1,346 per unit, offsetting the effect of flat combined retail new and used vehicle unit sales volume. We believe that our proprietary software applications, playbook processes and customer-centric selling approach drove increases in gross profit per F&I contract and penetration rates (the number of F&I products sold per vehicle) across our finance contract and service contract product lines. We believe we will continue to improve in this area as we refine our processes, train our associates and continue to sell high levels of retail new and used vehicles at our stores.

Results of Operations

The following table summarizes the percentages of total revenues represented by certain items reflected in our consolidated statements of income:

	Percentage of Total Revenues		
	Year Ended December 31,		
	2016	2015	2014
Revenues:			
New vehicles	53.8 %	54.7 %	55.7 %
Used vehicles	26.0 %	26.1 %	25.1 %

Income (loss) from continuing operations	1.0 %	0.9 %	1.1 %

New Vehicles

New vehicle revenues include the sale of new vehicles to retail customers (“retail new vehicles”), as well as the sale of fleet vehicles. New vehicle revenues and gross profit can be influenced by manufacturer incentives to consumers, which vary from cash-back incentives to low interest rate financing, among other things. New vehicle revenues and gross profit are also dependent on vehicle manufacturers providing adequate inventory allocations to our dealerships to meet customer demands and the availability of consumer credit. The automobile manufacturing industry is cyclical and historically has experienced periodic downturns characterized by oversupply and weak demand. As an automotive retailer, we seek to mitigate the effects of this cyclicity by maintaining a diverse brand mix of dealerships. Our brand diversity allows us to offer a broad range of products at a wide range of prices from lower priced, or economy vehicles, to luxury vehicles.

The U.S. retail automotive industry’s new vehicle unit sales volume below reflects all brands marketed or sold in the United States. This industry sales volume includes brands we do not sell and markets in which we do not operate, therefore our new vehicle sales volume may not trend directly in line with industry sales volume. We believe that retail unit sales volume is a more meaningful metric for comparing our new vehicles sales volume to the industry due to our minimal fleet vehicle business.

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(In millions of vehicles)	Year Ended December 31,			Year Ended December 31,		
	2016	2015	% Change	2015	2014	% Change
U.S. industry volume - Retail (1)	14.1	14.2	(0.7 %)	14.2	13.6	4.4 %
U.S. industry volume - Fleet	3.4	3.2	6.3 %	3.2	2.8	14.3 %

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

During the year ended December 31, 2016, we believe our retail new vehicle unit sales volume was negatively affected by "stop-sale" vehicles held in inventory as a result of open safety recalls on certain models where the manufacturer instructed dealers not to sell the particular model until the recall work was performed. These "stop-sale" vehicles increased our inventory on-hand and associated floor plan interest expense and may continue to negatively affect our dealerships' results of operations until warranty replacement parts become available or as additional models and model years are included in these safety recalls. As of December 31, 2016, we had approximately 400 "stop-sale" new vehicles in our inventory, which increased our new vehicle days' supply by approximately one day.

2016 Compared to 2015

Excluding fleet sales, our retail new vehicle revenue was flat and our retail new vehicle unit sales volume decreased 2.3% driven primarily by decreases in retail new vehicle unit sales volume at our BMW, Toyota, Ford, MINI and Land Rover dealerships, offset partially by increases in retail new vehicle unit sales volume at our Honda dealerships. Our retail new vehicle gross profit decreased approximately \$7.6 million, or 2.8%, primarily driven by decreases in retail new vehicle gross profit at our Land Rover, Ford, Porsche, General Motors (excluding Cadillac) and MINI dealerships, offset partially by increases in retail new vehicle gross profit at our Honda, Audi and Jaguar dealerships. Our gross profit per retail new unit decreased \$11 per unit, or 0.6%, to \$1,936 per unit, primarily driven by decreases in gross profit per retail new unit at our Land Rover, Porsche and Ford dealerships, offset partially by increases in gross profit per retail new unit at our Honda, Audi and Jaguar dealerships.

We believe the decline in retail new vehicle gross profit per unit is primarily due to downward pricing pressure in the Houston market as a result of a downturn in the energy sector and its effect on the local economy in addition to a higher supply of certain luxury models, including Land Rover, and downward pressure on pricing due to the availability of pricing information to consumers, increased competition for sales between similar branded dealerships and higher overall inventory levels. We anticipate that this trend may continue into 2017 and continue to impact new vehicle gross margins.

2015 Compared to 2014

Excluding fleet sales, our retail new vehicle revenue increased 4.9% and our retail new vehicle unit sales volume increased 3.4% driven primarily by increases in retail new vehicle unit sales volume at our Toyota, Honda, Land Rover and Mercedes dealerships, offset partially by decreases in retail new vehicle unit sales volume at our MINI, Volkswagen and Hyundai dealerships. Excluding fleet sales, our retail new vehicle gross profit decreased approximately \$14.5 million, or 5.2%, primarily driven by decreases in retail new vehicle gross profit at our Toyota and Honda dealerships, offset partially by increases in retail new vehicle gross profit at our Land Rover and Lexus dealerships. Our gross profit per retail new unit decreased \$176 per unit, or 8.3%, to \$1,943 per unit, primarily driven by decreases in gross profit per retail new unit at our BMW, Audi, Toyota and Honda dealerships, offset partially by increases in gross profit per retail new unit at our Land Rover dealerships.

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Used Vehicles

Used vehicle revenues are directly affected by a number of factors including the level of manufacturer incentives on new vehicles, the number and quality of trade-ins and lease turn-ins, the availability and pricing of used vehicles acquired at auction and the availability of consumer credit.

The following tables provide a reconciliation of same store basis and reported basis for retail used vehicles:

	Year Ended December		Better / (Worse)

Gross profit as a % of revenue	6.5 %	6.9 %	(40)	bps

During the year ended December 31, 2016, manufacturer “stop-sale” instructions for safety recalls on certain models increased our inventory on-hand by approximately 1,600 vehicles at March 31, 2016, approximately 4,200 vehicles at June 30, 2016, approximately 1,800 vehicles at September 30, 2016, and approximately 600 vehicles at December 31, 2016, primarily in certain BMW, Honda and Mercedes models. We believe the “stop-sale” inventory negatively affected both our retail unit sales volume and

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

gross profit per unit during the year ended December 31, 2016 due to the inability to retail these units, which typically are in higher demand and can yield higher gross profit per unit.

In addition to the factors discussed below, incremental used vehicle unit sales volume during the year ended December 31, 2016 contributed to additional Fixed Operations gross profit (via reconditioning) and F&I gross profit as discussed under the headings "Parts, Service and Collision Repair ("Fixed Operations")" and "Finance, Insurance and Other, Net ("F&I")" below.

2016 Compared to 2015

Retail used vehicle revenue increased 0.9%, driven primarily by a 2.0% increase in retail used vehicle unit sales volume. This increase in retail used vehicle unit sales volume was primarily driven by increases in retail used vehicle unit sales volume at our BMW, Mercedes and Toyota dealerships and EchoPark[®] stores, offset partially by decreases in retail used vehicle unit sales volume at our Honda, Ford and General Motors (excluding Cadillac) dealerships. Retail used vehicle gross profit decreased approximately \$4.9 million, or 3.0%, driven primarily by lower retail used vehicle unit sales volume and retail used vehicle gross profit per unit at our dealerships in the Houston market as a result of ongoing economic challenges in that market. Retail used vehicle gross profit per unit decreased \$69 per unit, or 4.9%, driven primarily by lower retail used vehicle gross profit per unit at our Honda, General Motors (excluding Cadillac) and Mercedes dealerships. We believe that the decrease in overall retail used vehicle gross profit per unit is due in part to the positive effects of newly redesigned models in certain brands on new vehicle demand, which, in turn, put downward pricing pressure on similar pre-owned models in those brands. In addition, our Houston dealerships, particularly our General Motors (excluding Cadillac), Ford, Volkswagen and BMW dealerships, experienced significant decreases in retail used vehicle gross profit per unit based on both "stop-sale" vehicles in inventory and their exposure to the Houston energy market.

2015 Compared to 2014

Retail used vehicle revenue increased 8.3%, driven primarily by a 5.8% increase in retail used vehicle unit sales volume. This increase in retail used vehicle unit sales volume was primarily driven by increases in retail used vehicle unit sales volume at our BMW, Audi and Honda dealerships. Retail used vehicle gross profit increased approximately \$3.1 million, or 2.0%, driven primarily by higher retail used vehicle unit sales volume, offset partially by a \$51 per unit decrease in retail used vehicle gross profit per unit, driven primarily by lower retail used vehicle gross profit per unit at our Mercedes, Ford and Toyota dealerships. We believe that the decrease in overall retail used vehicle gross profit per unit is due in part to the positive effects of newly redesigned models in certain brands on new vehicle demand, which, in turn, put downward pricing pressure on similar pre-owned models in those brands. In addition, our Houston dealerships, particularly our Ford, General Motors (excluding Cadillac), BMW and Jaguar dealerships, experienced significant decreases in retail used vehicle gross profit per unit based on their exposure to the Houston energy market.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Wholesale Vehicles

Wholesale vehicle revenues are highly correlated with new and used vehicle retail sales and the associated trade-in volume. Wholesale vehicle revenues are also significantly affected by our corporate inventory management policies, which are designed to optimize our total used vehicle inventory.

The following tables provide a reconciliation of same store basis and reported basis for wholesale vehicles:

	Year Ended December 31,		Better / (Worse) %

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Wholesale vehicle revenue and unit sales volume fluctuations are typically a result of retail new and used vehicle unit sales volumes that generate additional trade-in vehicle volume that we are not always able to sell as retail used vehicles and choose to sell at auction. Whenever possible, we prefer to sell a used vehicle through retail channels rather than wholesaling the vehicle at auction.

2016 Compared to 2015

Wholesale vehicle revenue, gross loss and unit sales volume increased due to higher levels of wholesale activity as a result of elevated inventory levels during the first quarter of 2016. Wholesale vehicle unit sales volume as a percentage of total used vehicle unit sales volume (retail plus wholesale) increased 230 basis points as we optimized our used vehicle inventory for current consumer demand heading into the fourth quarter.

2015 Compared to 2014

Wholesale vehicle revenue and unit sales volume decreased, while wholesale gross loss increased due to changes in auction prices and vehicle model mix. Wholesale vehicle unit sales volume as a percentage of total used vehicle unit sales volume (retail plus wholesale) decreased 110 basis points.

Parts, Service and Collision Repair ("Fixed Operations")

Parts, service and collision repair revenue consists of customer requested orders ("customer pay"), warranty repairs, wholesale parts and internal, sublet and other. Parts and service revenue is driven by the mix of warranty repairs versus customer pay repairs, available service capacity, vehicle quality, manufacturer recalls, customer loyalty and manufacturer prepaid maintenance programs. Internal, sublet and other primarily relates to preparation and reconditioning work performed on vehicles that are sold to customers. When that work is performed by one of our dealerships, the work is classified as internal. In the event the work is performed by a third party on our behalf, it is classified as sublet.

We believe that over time, vehicle quality will improve, but vehicle complexity and the associated demand for repairs at franchised dealerships will offset any revenue lost from improvement in vehicle quality. We also believe that over the long term we have the ability to continue to add service capacity and increase revenues. Manufacturers continue to extend new vehicle warranty periods and have also begun to include regular maintenance items in the warranty coverage. These factors, over the long term, combined with the extended manufacturer warranties on certified

pre-owned vehicles, should facilitate long-term growth in our service and parts business. Barriers to long-term growth may include reductions in the rate paid by manufacturers to dealers for warranty work performed, as well as the improved quality of vehicles that may affect the level and frequency of future warranty related revenues.

2016 Compared to 2015

Our Fixed Operations customer pay revenue increased approximately \$11.7 million, or 2.1%. Customer pay gross profit increased approximately \$2.4 million, or 0.8%, driven primarily by increases at our Audi, Lexus, Honda and Land Rover dealerships, offset partially by a decrease at our BMW dealerships. Warranty revenue increased approximately \$14.5 million, or 6.4%, driven primarily by increases at our Toyota, Honda and Mercedes dealerships, offset partially by decreases at our Lexus and Volkswagen dealerships. Warranty gross profit increased approximately \$4.5 million, or 3.6%, driven primarily by increases at our Toyota, Honda, Mercedes and Land Rover dealerships, offset partially by a decrease at our Lexus dealerships. Wholesale parts revenue decreased approximately \$2.1 million, or 1.2%, and wholesale parts gross profit decreased approximately \$1.0 million, or 3.2%, driven primarily by a decrease at our BMW dealerships. Internal, sublet and other revenue increased approximately \$33.4 million, or 8.9%, and internal, sublet and other gross profit increased approximately \$8.3 million, or 4.4%, on higher levels of used vehicle reconditioning and hail damage repairs.

The increase in Fixed Operations revenue contributed approximately \$28.0 million in additional gross profit, offset partially by a 100 basis point decrease in the gross margin rate, which reduced the revenue impact by approximately \$13.8 million, for a net \$14.2 million increase in Fixed Operations gross profit. The gross margin rate decreased primarily due to a customer pay gross margin decrease at our BMW dealerships and a shift in revenue mix from

higher margin customer pay work to lower margin sublet business as a result of hail damage repairs and cost associated with loaner vehicles related to customer vehicles subject to safety recalls.

2015 Compared to 2014

Our Fixed Operations customer pay revenue increased approximately \$21.6 million, or 4.0%, and customer pay gross profit increased approximately \$11.2 million, or 3.8%, driven primarily by increases at our BMW, Audi, Mercedes and Porsche dealerships. Warranty revenue increased approximately \$37.4 million, or 20.0%, and warranty gross profit increased approximately \$22.3 million, or 21.8%, led by increases in warranty activity at our BMW, Honda, Cadillac and Audi dealerships. Wholesale parts revenue decreased approximately \$3.8 million, or 2.1%, and wholesale parts gross profit increased approximately \$0.3 million, or 1.0%, driven primarily by higher levels of sales activity and gross margin rate at our Audi dealerships. Internal, sublet and other revenue increased approximately \$30.1 million, or 9.0%, and internal, sublet and other gross profit increased approximately \$16.8 million, or 10.0%, on higher levels of used vehicle reconditioning.

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The increase in Fixed Operations revenue contributed approximately \$41.0 million in additional gross profit, which, combined with \$9.6 million of additional gross profit due to a 70 basis point increase in the gross margin rate, resulted in a net \$50.6 million increase in Fixed Operations gross profit. The gross margin rate increased primarily due to a shift in revenue mix away from lower margin wholesale parts to higher margin warranty work compared to the prior year.

Finance, Insurance and Other, Net ("F&I")

Finance, insurance and other, net revenues include commissions for arranging vehicle financing and insurance, sales of third-party extended warranties and service contracts for vehicles, and other aftermarket products. In connection with vehicle financing, extended warranties, service contracts, other aftermarket products and insurance contracts, we receive commissions from the providers for originating contracts. F&I revenues are recognized net of estimated chargebacks and other costs associated with originating contracts. F&I revenues are driven by the level of new and used vehicle unit sales, manufacturer financing or leasing incentives and our F&I penetration rate. The F&I penetration rate represents the number of finance contracts, extended warranties and service contracts, other aftermarket products or insurance contracts that we are able to originate per vehicle sold, expressed as a percentage.

Rate spread is another term for the commission earned by our dealerships for arranging vehicle financing for consumers. The amount of the commission could be zero, a flat fee or an actual spread between the interest rate charged to the consumer and the interest rate provided by the direct financing source (bank, credit union or manufacturers' captive finance company). We have established caps on the potential rate spread our dealerships can earn with all finance sources. We believe the rate spread we earn for arranging financing represents value to the consumer in numerous ways, including the following:

- lower cost, below-market financing is often available only from the manufacturers' captives and franchised dealers;
- generally easy access to multiple high-quality lending sources;
- lease-financing alternatives are largely available only from manufacturers' captives or other indirect lenders;
- customers with substandard credit frequently do not have direct access to potential sources of sub-prime financing;
- and
- customers with significant "negative equity" in their current vehicle (i.e., the customer's current vehicle is worth less than the balance of their vehicle loan or lease obligation) frequently are unable to pay off the loan on their current vehicle and finance the purchase or lease of a replacement new or used vehicle without the assistance of a franchised dealer.

The following tables provide a reconciliation of same store basis and reported basis for F&I:

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

	Year Ended December 31,		Better / (Worse) %		
	2015	2014	Change	Change	
(In thousands, except per unit data)					
Total F&I revenue:					
Same store	\$318,476	\$290,368	\$28,108	9.7	%
Acquisitions and dispositions	8,112	9,727	(1,615)	(16.6)	%
Total as reported	\$326,588	\$300,095	\$26,493	8.8	%
Total F&I gross profit per retail unit (excludes fleet):					
Same store	\$1,288	\$1,227	\$61	5.0	%
Total as reported	\$1,279	\$1,220	\$59	4.8	%

2016 Compared to 2015

F&I revenues increased approximately \$15.2 million, or 4.7%, and F&I gross profit per retail unit increased \$65 per unit, or 5.1%, to \$1,346 per unit. The growth in F&I revenues and gross profit is attributed to improved penetration rates on finance and service contracts as a result of increased visibility into performance drivers provided by our proprietary internal software applications, which more than offset the impact of lower combined retail new and used vehicle unit sales volume. Finance contract revenue increased 2.5% due to a 290 basis point increase in penetration rate and a 3.6% increase in finance contract volume, partially offset by a 1.0% decrease in gross profit per finance contract. Finance contract gross profit, particularly on new vehicles, may be under pressure in future periods if manufacturers offer attractive financing rates from their captive finance affiliates because we tend to earn lower commissions under these programs. Service contract gross profit increased 12.3% due to a 210 basis point increase in penetration rate, driving a 5.8% increase in service contract volume, in addition to a 6.2% increase in gross profit per service contract. Other aftermarket contract gross profit increased 0.3%, partially offset by a 1,000 basis point decrease in penetration rate. Finance, service and other aftermarket penetration rates were positively impacted by a strengthening economy and increasing consumer confidence, combined with continued positive results from our F&I playbook processes and customer-centric selling approach.

2015 Compared to 2014

F&I revenues increased approximately \$28.1 million, or 9.7%, primarily due to a 4.4% increase in total retail (excluding fleet) new and used vehicle unit sales volume and a 5.0% increase in F&I gross profit per unit to \$1,288 per unit. Finance contract gross profit increased 9.4%, due to a 240 basis point increase in penetration rate, driving an 8.0% increase in finance contract volume and a 1.3% increase in gross profit per finance contract. Service contract gross profit increased 7.0%, due to a 100 basis point increase in penetration rate, driving a 7.6% increase in service contract volume, partially offset by a 0.6% decrease in gross profit per service contract. Other aftermarket contract gross profit increased 12.1% due to a 440 basis point increase in penetration rate, driving a 7.8% increase in aftermarket contract volume and a 3.9% increase in gross profit per aftermarket contract.

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Franchised Dealerships

See the previous headings "New Vehicles," "Used Vehicles," "Wholesale Vehicles," "Parts, Service and Collision Repair ("Fixed Operations")" and "Finance, Insurance and Other, Net ("F&I")" for further discussion of the operating results of our Franchised Dealerships segment. The previous analyses and discussion include operating results for our EchoPark® segment as the results for EchoPark® are not material to the combined operating results.

EchoPark®

We opened the first two EchoPark® locations in November and December 2014, and we opened the third location in January 2015 and the fourth and fifth locations in June 2016. We expect to open an additional EchoPark® store in Colorado in the first half of 2017, and have begun the process of expanding EchoPark® operations into additional markets in North Carolina, South Carolina and Texas with operations in these markets expected to begin in 2017 and 2018. Our EchoPark® business operates independently from our franchised new and used dealership sales operations and offers customers an exciting shopping and buying experience.

During the year ended December 31, 2016, EchoPark® generated approximately \$129.2 million of revenue, up \$52.2 million, or 67.7%, from the prior year, and gross profit of approximately \$15.7 million, up \$6.0 million, or 61.8%, from the prior year. EchoPark® retail used vehicle unit sales volume was 4,865 units, up 1,640 units, or 50.9%, from the prior year, and retail used vehicle gross profit per unit was \$1,133 per unit, a decrease of \$208 per unit, or 15.5%, from the prior year, due primarily to the costs of acquiring sufficient inventory for two additional store openings in 2016. EchoPark® F&I gross profit per unit was \$1,339 per unit, up \$396 per unit, or 42.0%, from the prior year, as our training and playbook processes enabled our customer experience guides to more effectively provide F&I products to our customers. EchoPark® incurred a \$12.7 million operating loss during the year ended December 31, 2016, compared to a \$17.7 million operating loss in the prior year, which includes the effects of a \$1.4 million impairment charge in 2015.

Selling, General and Administrative ("SG&A") Expenses

SG&A expenses are comprised of four major groups: compensation expense, advertising expense, rent expense and other expense. Compensation expense primarily relates to dealership personnel who are paid a commission or a salary plus commission and support personnel who are paid a fixed salary. Commissions paid to dealership personnel typically vary depending on gross profits realized and sales volume objectives. Due to the salary component for certain dealership and corporate personnel, gross profits and compensation expense do not change in direct proportion to one another. Advertising expense and other expense vary based on the level of actual or anticipated business

activity and number of dealerships in operation. Rent expense typically varies with the number of dealerships owned, investments made for facility improvements and interest rates. Other expense includes various fixed and variable expenses, including certain customer-related costs, insurance, training, legal and IT expenses, which may not change in proportion to gross profit levels.

The following tables set forth information related to our reported SG&A expenses:

	Year Ended December 31,		Better / (Worse)	
	2016	2015	Change	Change
	(In thousands)			%
SG&A expenses:

Total SG&A expenses as a % of gross profit	78.5 %	78.1 %	(40)	bps

2016 Compared to 2015

Overall SG&A expenses were flat in dollar amount and decreased 80 basis points as a percentage of gross profit, primarily due to an original equipment manufacturer (“OEM”) legal settlement benefit, offset partially by higher compensation and employee benefit-related expenses and IT expenses. Compensation costs increased both in dollar amount and as a percentage of gross profit, primarily due to higher levels of employee benefit-related expenses, Fixed Operations compensation and F&I compensation, offset partially by lower medical insurance costs. Advertising expense was relatively flat both in dollar amount and as a percentage of gross profit as we focused on targeted advertising where we would expect the best returns for our business. Rent expense was relatively flat both in dollar amount and as a percentage of gross profit, primarily due to our strategy to own more of our dealership properties, offset by higher rent expense for additional inventory storage needs. Other SG&A expenses decreased both in dollar amount and as a percentage of gross profit, primarily due to a \$14.8 million benefit as a result of an OEM-related settlement, offset partially by higher IT expenses, repairs and maintenance expenses and a net gain on disposal of franchises in the prior year. On an adjusted basis, SG&A expenses as a percentage of gross profit were 78.5%, flat compared to the prior year. For the year ended December 31, 2016, adjusted SG&A expenses exclude an OEM legal settlement benefit of approximately \$14.8 million, offset partially by charges of approximately \$3.0 million related to hail damage and approximately \$0.3 million of lease exit and other charges. For the year ended December 31, 2015, adjusted SG&A expenses exclude charges of approximately \$3.5 million related to storm-related physical damage and approximately \$1.7 million of legal and severance expenses, offset partially by a net gain on disposal of franchises of approximately \$3.3 million.

2015 Compared to 2014

Overall SG&A expenses increased both in dollar amount and as a percentage of gross profit, due in part to costs related to our EchoPark[®], OSOE and other strategic initiatives, among other cost drivers as discussed below. Overall SG&A expenses as a percentage of gross profit increased 40 basis points. Excluding the effect of EchoPark[®] expenses, total SG&A expenses as a percentage of gross profit increased 50 basis points. Compensation costs increased both in dollar amount and as a percentage of gross profit, primarily due to lower gross margins on new vehicles, increased headcount related to EchoPark[®] staffing and higher medical insurance costs. Advertising expense increased both in dollar amount and as a percentage of gross profit due to increased advertising programs for expansion at EchoPark[®] and our OSOE initiative. Rent expense decreased both in dollar amount and as a percentage of gross profit, primarily due to higher gross profit levels and the purchase of certain properties that were previously leased. Other SG&A expenses increased both in dollar amount and as a percentage of gross profit, primarily due to a gain on disposal of franchises in the prior year, increases in IT expenses related to EchoPark[®] and our OSOE initiative, legal fees and real estate taxes.

On an adjusted basis, SG&A expenses as a percentage of gross profit were 78.4%, down 20 basis points from the prior year. For the year ended December 31, 2015, adjusted SG&A expenses exclude charges of approximately \$3.5 million related to storm-related physical damage and approximately \$1.7 million of legal and severance expenses, offset partially by a net gain on disposal of franchises of approximately \$3.3 million. For the year ended December 31, 2014, adjusted SG&A expenses exclude a net gain on

46

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

disposal of franchises of approximately \$10.7 million, offset partially by charges of approximately \$4.0 million related to storm-related physical damage and approximately \$1.1 million of legal settlement and environmental expense.

Impairment Charges

Impairment charges decreased approximately \$9.9 million for the year ended December 31, 2016 compared to the prior year. Impairment charges increased \$11.4 million for the year ended December 31, 2015 compared to the prior year. Impairment charges for the year ended December 31, 2016 include approximately \$8.1 million of property and equipment charges due to the abandonment of construction and software development projects as well as our estimate that certain dealerships would not be able to recover these balances through operating activities. Impairment charges for the year ended December 31, 2015 include \$5.2 million of franchise asset impairment charges and approximately \$4.8 million of goodwill and franchise asset impairment charges related to the disposition of a dealership franchise, \$0.9 million of franchise asset impairment charges and \$7.1 million of property and equipment charges due to the abandonment of construction and software development projects as well as our estimate that certain dealerships would not be able to recover these balances through operating activities. Impairment charges for the year ended December 31, 2014 include \$2.2 million of franchise asset impairment charges and approximately \$4.4 million of property and equipment charges due to the abandonment of construction and software development projects as well as our estimate that certain dealerships would not be able to recover these balances through operating activities.

Depreciation and Amortization

Depreciation expense increased approximately \$8.6 million, or 12.6%, in the year ended December 31, 2016, compared to the prior year, and \$10.5 million, or 18.1%, in the year ended December 31, 2015, compared to the prior year. The increases were primarily related to continuing operations net additions to gross property and equipment (excluding land and construction in progress) of approximately \$144.1 million and \$140.7 million in the years ended December 31, 2016 and 2015, respectively.

Interest Expense, Floor Plan

2016 Compared to 2015

Interest expense, floor plan for new vehicles incurred by continuing operations increased approximately \$5.5 million, or 27.8%. The average new vehicle floor plan notes payable balance for continuing operations increased approximately \$137.5 million, resulting in an increase in new vehicle floor plan interest expense of approximately

\$2.2 million. The average new vehicle floor plan interest rate incurred by continuing operations dealerships was 1.85%, up from 1.61% in the prior year, which resulted in an increase in interest expense of approximately \$3.3 million.

Interest expense, floor plan for used vehicles incurred by continuing operations increased approximately \$0.9 million, or 54.7%. The average used vehicle floor plan notes payable balance for continuing operations increased approximately \$49.3 million, resulting in an increase in new vehicle floor plan interest expense of approximately \$0.8 million. The average used vehicle floor plan interest rate incurred by continuing operations dealerships was 1.78%, up from 1.72% in the prior year, which resulted in an increase in interest expense of approximately \$0.1 million.

2015 Compared to 2014

Interest expense, floor plan for new vehicles incurred by continuing operations increased approximately \$2.1 million, or 11.8%. The average new vehicle floor plan notes payable balance for continuing operations increased approximately \$101.4 million, resulting in an increase in new vehicle floor plan interest expense of approximately \$1.6 million. The average new vehicle floor plan interest rate incurred by continuing operations dealerships was 1.61%, up from 1.57% in the prior year, which resulted in an increase in interest expense of approximately \$0.5 million.

Interest expense, floor plan for used vehicles incurred by continuing operations increased approximately \$0.5 million, or 37.7%. The average used vehicle floor plan notes payable balance for continuing operations increased approximately \$30.4 million, resulting in an increase in new vehicle floor plan interest expense of approximately \$0.6 million. The average used vehicle floor plan interest rate incurred by continuing operations dealerships was 1.72%, down from 1.80% in the prior year, which resulted in a decrease in interest expense of approximately \$0.1 million, partially offsetting the impact of the higher average floor plan notes payable balances discussed above.

SONIC AUTOMOTIVE, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Interest Expense, Other, Net

Interest expense, other, net is summarized in the tables below:

	Year Ended		Better / (Worse)		
	December 31,		%		
	2016	2015	Change	Change	
	(In thousands)				
Stated/coupon interest	\$44,689	\$42,321	\$ (2,368)	(5.6) %
Discount/premium amortization	163	152	(11)	(7.2 %)
Deferred loan cost amortization	2,641	2,489	(152)	(6.1 %)
Cash flow swap interest	4,934	7,178	2,244	31.3	%
Capitalized interest	(2,750)	(1,912)	838 43.8 %
Other interest	429	682	253	37.1	%
Total interest expense, other, net	\$50,106	\$50,910	\$804	1.6	%

	Year Ended		Better / (Worse)			
	December 31,		%			
	2015	2014	Change	Change		
	(In thousands)					
Stated/coupon interest	\$42,321	\$41,456	\$ (865)	(2.1 %)	
Discount/premium amortization	152	141	(11)	(7.8 %)	
Deferred loan cost amortization	2,489	2,675	186	7.0	%	
Cash flow swap interest	7,178	10,125	2,947	29.1	%	
Capitalized interest	(1,912)	(1,921)	(9) (0.5 %)
Other interest	682	714	32	4.5	%	
Total interest expense, other, net	\$50,910	\$53,190	\$2,280	4.3	%	

2016 Compared to 2015

Interest expense, other, net decreased approximately \$0.8 million, primarily due to a \$2.2 million decrease in cash flow swap interest as a result of the expiration of several interest rate cash flow swaps that were replaced with cash flow swaps at a lower fixed rate and a \$0.8 million decrease in capitalized interest associated with construction and software development projects, offset partially by a \$2.4 million increase in stated/coupon interest as a result of additional mortgage notes payable.

2015 Compared to 2014

Interest expense, other, net decreased approximately \$2.3 million, primarily due to a \$2.9 million decrease in cash flow swap interest as a result of the expiration of several interest rate cash flow swaps that were replaced with cash flow swaps at a lower fixed rate, offset partially by a \$0.9 million increase in stated/coupon interest as a result of additional mortgage notes payable.

Provision for Income Taxes

The effective tax rate from continuing operations was 39.1%, 39.3% and 39.1% for the years ended December 31, 2016, 2015 and 2014, respectively. Our effective tax rate varies from year to year based on the distribution of taxable income between states in which we operate and other tax adjustments. We expect the effective tax rate in future periods to fall within a range of 38.0% to 40.0% before the impact, if any, of changes in valuation allowances related to deferred income tax assets or unusual discrete tax adjustments. The effective tax rate in the future will be impacted by the required adoption of ASU 2016-09 which will require all book-tax differences related to the exercise of stock options or vesting of restricted stock to flow through the provision for income taxes rather than possibly be applied directly to equity.
