Introduction and basis for preparation		

Introduction and basis for preparation

Introduction and basis for preparation

Scope and location of Basel III Pillar 3 disclosures

The Basel III capital adequacy framework consists of three complementary pillars. Pillar 1 provides a framework for measuring minimum capital requirements for the credit, market, operational and non-counterparty-related risks faced by banks. Pillar 2 addresses the principles of the supervisory review process, emphasizing the need for a qualitative approach to supervising banks. Pillar 3 requires banks to publish a range of disclosures, mainly covering risk, capital, leverage, liquidity and remuneration.

This report provides Pillar 3 disclosures for UBS Group AG on a consolidated basis, as well as prudential key figures and regulatory information for our significant regulated subsidiaries and sub-groups. These Pillar 3 disclosures are supplemented by specific additional requirements of the Swiss Financial Market Supervisory Authority (FINMA) and voluntary disclosures on our part.

As UBS is considered a systemically relevant bank (SRB) under Swiss banking law, UBS Group AG and UBS AG are required to comply with regulations based on the Basel III framework as applicable to Swiss SRBs on a consolidated basis. Capital information as of 30 September 2018 for UBS Group AG consolidated is provided in the "Capital management" section of our third quarter 2018 report under "Quarterly reporting" at www.ubs.com/investors. Capital and other regulatory information as of 30 September 2018 for UBS AG consolidated is provided in the UBS AG third quarter 2018 report, which will be available as of 31 October 2018 under "Quarterly reporting" at www.ubs.com/investors.

We are also required to disclose certain regulatory information for our significant regulated subsidiaries and sub-groups, including UBS AG, UBS Switzerland AG and UBS Limited, each on a standalone basis, as well as UBS Americas Holding LLC on a consolidated basis. This information is provided under "Significant regulated subsidiaries and sub-groups" in this report.

Local regulators may also require publication of Pillar 3 information at a subsidiary or sub-group level. Where applicable, these local disclosures are provided under "Holding company and significant regulated subsidiaries and sub-groups" atwww.ubs.com/investors.

Significant BCBS and FINMA capital adequacy, liquidity and funding and related disclosure requirements

This report has been prepared in accordance with FINMA Pillar 3 disclosure requirements (FINMA Circular 2016 / 01 "Disclosure – banks," effective for disclosures before 31 December 2018), the underlying Basel Committee on Banking Supervision (BCBS) guidance ("Revised Pillar 3 disclosure requirements") issued in January 2015 and related "Frequently asked questions on the revised Pillar 3 disclosure requirements" issued in August 2016. The legal entities UBS AG and UBS Switzerland AG are subject to standalone capital adequacy, liquidity and funding and disclosure requirements defined by FINMA. This information is provided under "Significant regulated subsidiaries and sub-groups" in this report.

Changes to significant BCBS and FINMA capital adequacy, liquidity and funding and related disclosure requirements

Information on developments that have occurred in the first half of 2018 are provided on pages 2–3 of our 30 June 2018 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups under "Pillar 3 disclosures" atww.ubs.com/investors.

Changes to Pillar 1 requirements in the third quarter of 2018

As agreed with FINMA, we revised the methodology applied for structured margin lending transactions in this quarter, resulting in a methodology change of CHF 3.2 billion on other counterparty credit risk as of 30 September 2018. This change is reflected accordingly in "OV1: Overview of RWA" table.

→ Refer to "Risk weighted assets" in the "Capital Management" section on page 62 of our third quarter 2018 report available under "Quarterly reporting" at www.ubs.com/investors for more information on the methodology and policy changes

Changes to Pillar 3 disclosure requirements from the fourth guarter of 2018

In March 2017, the BCBS issued the "Pillar 3 disclosure requirements – consolidated and enhanced framework," which represents the second phase of the BCBS review of the Pillar 3 disclosure framework and builds on the revisions to the Pillar 3 disclosure requirements published in January 2015. On 16 July 2018, FINMA issued a revised Circular 2016 / 01 "Disclosure – banks" including the aforementioned second phase revisions, which requires banks to gradually implement the requirements from 31 December 2018 onwards.

We expect to disclose the following tables and / or narratives for the first time in our 31 December 2018 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups:

- KM1: Key metrics (at consolidated group level)
- PV1: Prudential valuation adjustments
- CC1: Composition of regulatory capital, replacing "Composition of capital" table
- CCyB1: Geographical distribution of credit exposures used in the countercyclical buffer
- LIQA: Liquidity risk management

In addition, further disclosure requirements will be adopted in first half of 2019, according to the applicable effective dates.

Format, frequency and comparability of Pillar 3 disclosures

FINMA has specified the reporting frequency for each disclosure. We generally provide quantitative comparative information for all disclosures as of 30 June 2018. For more information on disclosure frequency, refer to our 31 December 2017 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups under "Pillar 3 disclosures" at www.ubs.com/investors.

UBS Group AG consolidated	

Section 1 Risk-weighted assets

Our approach to measuring risk exposure and risk-weighted assets

Depending on the intended purpose, the measurement of risk exposure that we apply may differ. Exposures may be measured for financial accounting purposes under International Financial Reporting Standards (IFRS), for deriving our regulatory capital requirement or for internal risk management and control purposes. Our Pillar 3 disclosures are generally based on measures of risk exposure used to derive the regulatory capital required under Pillar 1. Our risk-weighted assets (RWA) are calculated according to the Basel Committee on Banking Supervision (BCBS) Basel III framework, as implemented by the Swiss Capital Adequacy Ordinance issued by the Swiss Federal Council and by the associated circulars issued by the Swiss Financial Market Supervisory Authority (FINMA).

For information on the measurement of risk exposures and RWA, refer to pages 8–10 of the 31 December 2017 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups under "Pillar 3 disclosures" atww.ubs.com/investors.

RWA development in the third quarter 2018

The "OV1: Overview of RWA" table on the next page provides an overview of RWA and the related minimum capital requirements by risk type.

During the third quarter of 2018, RWA were broadly unchanged at CHF 252.2 billion as the decreases in market risk RWA and RWA from credit valuation adjustments of CHF 1 billion and CHF 0.7 billion, respectively, were more than offset by a net increase in counterparty credit risk RWA of CHF 1.9 billion. This increase in counterparty credit risk RWA included a CHF 3.2 billion revision of the methodology applied for structured margin lending transactions, which was partly offset by RWA decreases from derivatives and securities financing transactions.

The flow tables on the subsequent pages provide further detail on the movements in credit risk, counterparty credit risk and market risk RWA in the third quarter of 2018. More information on capital management and RWA, including detail on movements in RWA during the third quarter of 2018, is provided on pages 62–63 of our third quarter 2018 report under "Quarterly reporting" atww.ubs.com/investors.

27	Total	252,247	252,373	20,180

1 Calculated based on 8% of RWA. 2 Includes non-counterparty-related risk not subject to the threshold deduction treatment (30 September 2018: RWA CHF 9,207 million; 30 June 2018: RWA CHF 9,264 million). Non-counterparty-related risk (30 September 2018: RWA CHF 8,636 million; 30 June 2018: RWA CHF 8,526 million), which is subject to the threshold treatment, is reported in line 25 "Amounts below thresholds for deduction (250% risk 3 Excludes settlement risk, which is separately reported in line 15 "Settlement risk." Includes RWA with central counterparties. New regulation for the calculation of RWA for exposure to central counterparties will be implemented by 1 January 2020. The split between the subcomponents of counterparty credit risk refers to the calculation of the exposure 4 Calculated in accordance with the current exposure method (CEM), until SA-CCR is implemented by 1 January 2020. 5 Includes investments in funds. Items subject to threshold deduction treatments that do not exceed their respective threshold are risk weighted at 250% (30 September 2018: RWA CHF 2,003 million; 30 June 2018: RWA CHF 2,002 million) and are separately included in line 25 "Amounts below thresholds for deduction (250% risk weight)." 6 New regulation for the calculation of RWA for investments in funds will be implemented by 1 January 2020. 7 Includes items subject to threshold deduction treatments that do not exceed their respective threshold and risk weighted at 250%. Items subject to threshold deduction treatments are significant investments in common shares of non-consolidated financial institutions (banks, insurance and other financial entities) and deferred tax assets arising from temporary differences, both of which are measured against their respective threshold. 8 No floor effect, as 80% of our Basel I RWA including the RWA equivalent of the Basel I capital deductions do not exceed our Basel III RWA including the RWA equivalent of the Basel III capital deductions. For the status of the finalization of the Basel III capital framework, refer to the "Regulatory and legal developments" section of our Annual Report 2017, available under "Annual reporting" at www.ubs.com/investors, which outlines how the proposed floor calculation would differ in significant aspects from the current approach.

The "CR8: RWA flow statements of credit risk exposures under IRB" and "CCR7: RWA flow statements of CCR exposures under internal model method (IMM) and value-at-risk (VaR)" tables below provide a breakdown of the credit risk and counterparty credit risk (CCR) RWA movements in the third quarter of 2018 across BCBS-defined movement categories. These categories are described on page 42 of our 31 December 2017 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups, which is available under "Pillar 3 disclosures" at www.ubs.com/investors.

Credit risk RWA development in the third quarter 2018

Credit risk RWA under the advanced internal ratings-based (A-IRB) approach decreased by CHF 0.1 billion to CHF 84.1 billion as of 30 September 2018.

As presented in the "CR8: RWA flow statements of credit exposures under IRB" table below, RWA decreased by CHF 1.4 billion due to asset size, primarily reflecting exposure decreases in unutilized credit facilities in the Investment Bank's Corporate Client Solutions Business.

Model updates of CHF 3.0 billion, presented in the table below, were primarily driven by the continued phase-in of RWA increases related to probability of default (PD) and loss given default (LGD) changes from the implementation of revised models for Swiss residential mortgages and income-producing real estate, the new LGD model for unsecured financing and commercial self-used real estate and calibration of aircraft leasing PD and LGD parameters resulting in an increase of CHF 2.7 billion in Personal & Corporate Banking and CHF 0.3 billion in Global Wealth Management.

The increase from methodology and policy changes was driven by a higher internal ratings-based (IRB) multiplier on Investment Bank exposures to corporates of CHF 0.3 billion. This was offset by a decrease of CHF 0.5 billion, driven by foreign exchange movements.

CR8: RWA flow statements of credit risk exposures under IRB

CHF million		RWA

9	RWA as of 30.9.18	84,079

Counterparty credit risk RWA development in the third quarter 2018

CCR RWA under internal model method (IMM) and value-at-risk (VaR) remained stable at CHF 22.8 billion during the third quarter of 2018, as increases from model updates and methodology and policy changes were offset by asset size, credit quality of counterparties and foreign exchange movements.

Market risk RWA development in the third quarter 2018

The four main components that contribute to market risk RWA are VaR, stressed value-at-risk (SVaR), incremental risk charge (IRC) and comprehensive risk measure (CRM). VaR and SVaR components include the RWA charge for risks-not-in-VaR.

The "MR2: RWA flow statements of market risk exposures under an internal models approach" table below provides a breakdown of the market risk RWA movement in the third quarter of 2018 across these components, according to BCBS-defined movement categories. These categories are described on page 75 of our 31 December 2017 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups, which is available under "Pillar 3 disclosures" at www.ubs.com/investors.

Market risk RWA decreased by CHF 0.9 billion in the third quarter of 2018, primarily due to asset size and other movements resulting from lower average regulatory VaR and SVaR levels observed in the Investment Bank, mainly due to its credit trading business. The VaR multiplier remained unchanged at 3.0.

1 This table includes a rebate equal to 35% of the maximum rebate on the gone concern requirements, which was granted by FINMA and will be phased in until 1 January 2020. This table does not include a rebate for the usage of low-trigger loss-absorbing additional tier 1 or tier 2 capital instruments to meet the gone concern requirements. 2 Going concern capital ratio requirements include countercyclical buffer requirements of 0.27%. applicable add-ons of 1.44% for RWA and 0.5% for leverage ratio denominator (LRD). Includes applicable add-ons of 0.72% for RWA and 0.25% for LRD and a rebate of 1.25% for RWA and 0.42% for LRD. 5 Includes applicable add-ons of 1.44% for RWA and 0.5% for LRD and a rebate of 2% for RWA and 0.7% for LRD. 6 Includes outstanding low-trigger loss-absorbing additional tier 1 (AT1) capital instruments, which are available under the transitional rules of the Swiss SRB framework to meet the going concern requirements until their first call date, even if the first call date is after 31 December 2019. As of their first call date, these instruments are eligible to meet the gone concern requirements. outstanding high- and low-trigger loss-absorbing tier 2 capital instruments, which are available under the transitional rules of the Swiss SRB framework to meet the going concern requirements until the earlier of (i) their maturity or first call date or (ii) 31 December 2019, and to meet gone concern requirements thereafter. Outstanding low-trigger loss-absorbing tier 2 capital instruments are subject to amortization starting five years prior to their maturity, with the amortized portion qualifying as gone concern loss-absorbing capacity. Instruments available to meet gone concern requirements are eligible until one year before maturity, with a haircut of 50% applied in the last year of eligibility. 8

Explanation of the difference between the IFRS and regulatory scope of consolidation

The scope of consolidation for the purpose of calculating Group regulatory capital is generally the same as the consolidation scope under International Financial Reporting Standards (IFRS) and includes subsidiaries that are directly or indirectly controlled by UBS Group AG and active in banking and finance. However, subsidiaries consolidated under IFRS whose business is outside the banking and finance sector are excluded from the regulatory scope of consolidation.

The key difference between the IFRS and regulatory capital scope of consolidation as of 30 September 2018 relates to investments in insurance, real estate and commercial companies as well as investment vehicles that are consolidated under IFRS, but not for regulatory capital purposes, where they are subject to risk-weighting.

The table below provides a list of the most significant entities that were included in the IFRS scope of consolidation, but not in the regulatory capital scope of consolidation. These entities account for most of the difference between the "Balance sheet in accordance with IFRS scope of consolidation" and the "Balance sheet in accordance with regulatory scope of consolidation" columns in the "Reconciliation of accounting balance sheet to balance sheet under the regulatory scope of consolidation" table and such difference is mainly related to financial assets at fair value not held for trading and other financial liabilities designated at fair value. As of 30 September 2018, entities consolidated under either the IFRS or the regulatory scope of consolidation did not report any significant capital deficiencies.

In the banking book, certain equity investments are consolidated neither under IFRS nor under the regulatory scope. As of 30 September 2018, these investments mainly consisted of infrastructure holdings and joint operations (e.g., settlement and clearing institutions, stock and financial futures exchanges) and included our participation in the SIX Group. These investments were risk-weighted based on applicable threshold rules.

More information on the legal structure of the UBS Group and on the IFRS scope of consolidation is provided on pages 12–13 and 325–326, respectively, of our Annual Report 2017, available under "Annual reporting" artww.ubs.com/investors.

→ Refer to "Financial and regulatory key figures for our significant regulated subsidiaries and sub-groups" on page 142 of our third quarter 2018 report under "Quarterly reporting" at www.ubs.com/investors for more information on transfer of funds or capital within the Group

Composition of capital

The table below and on the following pages provides the "Composition of capital" as defined by the BCBS and FINMA. Reference is made to items reconciling to the balance sheet under the regulatory scope of consolidation as disclosed in the "Reconciliation of accounting balance sheet to balance sheet under the regulatory scope of consolidation" table.

Refer to "Capital instruments of UBS Group AG consolidated and UBS AG consolidated and standalone – key features" and "UBS Group AG consolidated capital instruments and TLAC-eligible senior unsecured debt" under "Bondholder information" www.ubs.com/investors for an overview of the key features of our regulatory capital instruments, as well as the full terms and conditions.

1 References link the lines of this table to the respective reference numbers provided in the "References" column in the "Reconciliation of accounting balance sheet to balance sheet under the regulatory scope of consolidation" table. 2 IFRS netting for deferred tax assets and liabilities is reversed for items deducted from CET1 capital. 3 Includes CHF 429 million in DCCP-related charge for regulatory capital purposes. 4 Consists of own instruments for loss-absorbing tier 2 capital of CHF 0.1 million and for phase-out tier 2 capital of CHF 15.4 million. 5 BCBS requirements are exceeded by our Swiss SRB requirements. Refer to the "Capital management" section of our Annual Report 2017 for more information on the Swiss SRB requirements.

Section 3 Leverage ratio

BCBS Basel III leverage ratio

The Basel Committee on Banking Supervision (BCBS) leverage ratio is calculated by dividing the period-end tier 1 capital by the period-end leverage ratio denominator (LRD). The LRD consists of IFRS on-balance sheet assets and off-balance sheet items. Derivative exposures are adjusted for a number of items, including replacement value and eligible cash variation margin netting, the current exposure method add-on and net notional amounts for written credit derivatives. The LRD also includes an additional charge for counterparty credit risk related to securities financing transactions. In addition, balance sheet assets deducted from our tier 1 capital are excluded from LRD, which led to a difference between phase-in and fully applied LRD for deferred tax assets and net defined benefit pension plan assets until 31 December 2017.

The "Reconciliation of IFRS total assets to BCBS Basel III total on-balance sheet exposures excluding derivatives and securities financing transactions" table below shows the difference between total IFRS assets per IFRS consolidation scope and the BCBS total on-balance sheet exposures, which are the starting point for calculating the BCBS LRD as shown in the "BCBS Basel III leverage ratio common disclosure" table on the next page. The difference is due to the application of the regulatory scope of consolidation for the purpose of the BCBS calculation. In addition, carrying values for derivative financial instruments and securities financing transactions are deducted from IFRS total assets. They are measured differently under BCBS leverage ratio rules and are therefore added back in separate exposure line items in the "BCBS Basel III leverage ratio common disclosure" table on the next page.

As of 30 September 2018, our BCBS Basel III leverage ratio was 5.0% and the BCBS Basel III LRD was CHF 898 billion. Information on our Swiss SRB leverage ratio and the movement in our LRD compared with the prior quarter is provided on pages 64-65 of our third quarter 2018 report, available under "Quarterly reporting" atww.ubs.com/investors.

Difference between the Swiss SRB and BCBS leverage ratio

The LRD is the same under Swiss SRB and BCBS rules. However, there is a difference in the capital numerator between the two frameworks. Under BCBS rules, only common equity tier 1 and additional tier 1 capital are included in the numerator. Under Swiss SRB we are required to meet going as well as gone concern leverage ratio requirements. Therefore, depending on the requirement, the numerator includes tier 1 capital instruments, tier 2 capital instruments and / or total loss-absorbing capacity (TLAC)-eligible senior unsecured debt.

Section 4 Liquidity coverage ratio

High-quality liquid assets

High-quality liquid assets (HQLA) must be easily and immediately convertible into cash at little or no loss of value, especially during a period of stress. HQLA are assets that are of low risk and are unencumbered. Other characteristics of HQLA are ease and certainty of valuation, low correlation with risky assets, listing on a developed and recognized exchange, an active and sizeable market and low volatility. Based on these characteristics, HQLA are categorized as Level 1 (primarily central bank reserves and government bonds) or Level 2 (primarily US and European agency bonds as well as non-financial corporate covered bonds). Level 2 assets are subject to regulatory haircuts and caps.

¹ Calculated based on an average of 63 data points in the third quarter of 2018 and 65 data points in the second quarter of 2018. 2 Calculated after the application of haircuts. 3 Includes cash and balances with central banks and other eligible balances as prescribed by FINMA. 4 Calculated in accordance with FINMA requirements.

Liquidity coverage ratio

In the third quarter of 2018, the UBS Group liquidity coverage ratio (LCR) decreased by 9 percentage points to 135%, remaining above the 110% Group LCR minimum communicated by FINMA. The LCR decreased due to reduced HQLA, primarily driven by an increase in assets subject to transfer restrictions in the US branches of UBS AG. In addition, net cash outflows increased, mainly driven by higher outflows related to secured financing transactions.

Significant regulated subsidiaries and sub-groups

Section 1 Introduction

The sections below include capital and other regulatory information for UBS AG standalone, UBS Switzerland AG standalone, UBS Limited standalone and UBS Americas Holding LLC consolidated. UBS AG consolidated capital and other regulatory information is provided in the UBS AG third quarter 2018 report, which will be available as of 31 October 2018 under "Quarterly reporting" atww.ubs.com/investors.

Capital information in this section is based on Pillar 1 capital requirements. Entities may be subject to significant additional Pillar 2 requirements, which represent additional amounts of capital considered necessary and agreed with regulators based on the risk profile of the entities.

Section 2 UBS AG standalone

Swiss SRB going concern requirements and information

Under Swiss systemically relevant bank (SRB) regulations, article 125 "Reliefs for financial groups and individual institutions" of the Capital Adequacy Ordinance stipulates that Swiss Financial Market Supervisory Authority (FINMA) may grant, under certain conditions, capital relief to individual institutions to ensure that an individual institution's compliance with the capital requirements does not lead to a de facto overcapitalization of the group of which it is a part.

FINMA granted relief concerning the regulatory capital requirements of UBS AG on a standalone basis by means of decrees issued on 20 December 2013 and 20 October 2017, the latter effective as of 1 July 2017 and partly replacing the former.

More information is provided in "Section 2 UBS AG standalone" of the 31 December 2017 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups under Pillar 3 disclosures" atwww.ubs.com/investors.

1 By FINMA decree, requirements exceed those based on the transitional arrangements of the Swiss Capital Adequacy Ordinance, i.e., a total going concern capital ratio requirement of 12.86% plus the effect of countercyclical buffer (CCB) requirements of 0.05%, of which 9.46% plus the effect of CCB requirements of 0.05% must be satisfied with CET1 capital, and a total going concern leverage ratio requirement of 4%, of which 2.9% must be satisfied with CET1 capital. 2 Going concern capital ratio requirements as of 30 September 2018 include CCB requirements of 0.05%. 3 Includes applicable add-ons of 1.44% for RWA and 0.5% for LRD. 4 Includes outstanding low-trigger loss-absorbing tier 2 capital instruments, which are available under the transitional rules of the Swiss SRB framework to meet the going concern requirements until the earlier of (i) their maturity or first call date or (ii) 31 December 2019. Outstanding low-trigger loss-absorbing tier 2 capital instruments are subject to amortization starting five years prior to their maturity.

Section 3 UBS Switzerland AG standalone

Swiss SRB going and gone concern requirements and information

UBS Switzerland AG is considered a systemically relevant bank (SRB) under Swiss banking law and is subject to capital regulations on a standalone basis. As of 30 September 2018, the transitional going concern capital and leverage ratio requirements for UBS Switzerland AG standalone were 13.42% and 4.0%, respectively. The gone concern requirements under transitional arrangements were 7.65% for the RWA-based requirement and 2.58% for the LRD-based requirement.

1 This table includes a rebate equal to 35% of the maximum rebate on the gone concern requirements, which was granted by FINMA and will be phased in until 1 January 2020. Refer to the "Capital management" section of our Annual Report 2017 for more information. 2 The total loss-absorbing capacity ratio requirement of 21.07% is the current requirement based on the transitional rules of the Swiss Capital Adequacy Ordinance including the aforementioned rebate on the gone concern requirements. In addition, FINMA has defined a total capital ratio requirement, which is the sum of 14.4% and the effect of countercyclical buffer (CCB) requirements of 0.56%, of which 10% plus the effect of CCB requirements must be satisfied with CET1 capital. These FINMA requirements will be effective until they are exceeded by the Swiss SRB requirements based on the transitional rules. 3 Going concern capital ratio requirements include CCB requirements of 0.56%. 4 Includes applicable add-ons of 1.44% for RWA and 0.5% for LRD. 5 Includes applicable add-ons of 0.72% for RWA and 0.25% for LRD and a rebate of 1.25% for RWA and 0.42% for LRD. 6 Includes applicable add-ons of 1.44% for RWA and 0.5% for LRD and a rebate of 2% for RWA and 0.7% for LRD.

Cautionary Statement | This report and the information contained herein are provided solely for information purposes, and are not to be construed as solicitation of an offer to buy or sell any securities or other financial instruments in Switzerland, the United States or any other jurisdiction. No investment decision relating to securities of or relating to UBS Group AG, UBS AG or their affiliates should be made on the basis of this report. Refer to UBS's third quarter 2018 report and its Annual Report 2017, available at www.ubs.com/investors, for additional information.

Rounding | Numbers presented throughout this report may not add up precisely to the totals provided in the tables and text. Starting in 2018, percentages, absolute and percent changes, and adjusted results are calculated on the basis of unrounded figures, with the exception of movement information provided in text that can be derived from figures displayed in the tables, which is calculated on a rounded basis. For prior periods, these values are calculated on the basis of rounded figures displayed in the tables and text.

Tables | Within tables, blank fields generally indicate that the field is not applicable or not meaningful, or that information is not available as of the relevant date or for the relevant period. Zero values generally indicate that the respective figure is zero on an actual or rounded basis. Percentage changes are presented as a mathematical calculation of the change between periods.
