Citizens Communications Reports
2003 Third-Quarter Results

Stamford, Conn., November 6, 2003 -- Citizens Communications (NYSE:CZN) today reported third quarter 2003 consolidated revenues of \$595 million; consolidated operating income of \$133.2 million; and consolidated net income of \$11.4 million, or 4 cents per share. Consolidated net income for the quarter includes a loss of \$16.8 million associated with the sale of the company's utility divisions, \$10.9 million of costs associated with the early retirement of debt and a \$4 million impairment charge related to the Vermont Electric division. Excluding these items and their tax effect, consolidated net income was \$32.2 million, or 11 cents per share.

The company produced free cash flow of \$106.9 million for the third quarter 2003 and achieved a ratio of net debt to annualized cash generated by operations of 3.3x and a ratio of net debt to annualized operating income of 7.1x. The company retired \$267.4 million of debt during the quarter and ended the quarter with

Edgar Filing: CITIZENS COMMUNICATIONS CO - Form 8-K

\$597.1 million in cash. The company has produced \$365.6 million of free cash flow and has retired \$622.4 million of debt during 2003.

Telecommunications

Third quarter 2003 revenue from the company's ILEC operations was \$511.6 million, down \$8.2 million or 1.6 percent from \$519.8 million in the third quarter of 2002. The decrease is due primarily to loss of access lines, the sale of our North Dakota exchanges and reduced network access and long distance revenues. These decreases were partially offset by continued increases in enhanced service and data revenues.

The company added a record 13,400 DSL customers during the quarter and had more than 105,000 DSL subscribers at September 30, 2003. The company's primary access line count, which does not take into account DSL subscriptions, decreased 14,600 lines during the quarter. Taking into account DSL subscriptions, total subscriptions decreased 1,200 for the quarter.

ILEC operating income for the third quarter of 2003 was \$133.8 million and operating income margin was 26.2 percent, compared to ILEC operating income of \$131.2 million and operating income margin of 25.2 percent in the third quarter of 2002.

ILEC cash generated by operations for the third quarter of 2003 was \$280 million. ILEC cash generated by operations margin for the third quarter of 2003 was 54.7 percent, compared to 53.9 percent in the third quarter of 2002.

Capital expenditures for the ILEC were \$67 million for the third quarter 2003.

Third quarter 2003 revenue from Electric Lightwave totaled \$40.4 million, operating income was \$3.8 million, cash generated by operations was \$9.4 million and capital expenditures were \$3.1 million.

Public Service

The gas and electric segments accounted for \$43 million of third quarter 2003 consolidated revenue, a \$4.4 million operating loss, and \$5.9 million of capital expenditures. The sale of the Company's Arizona and Hawaii utility businesses for an aggregate of \$343.4 million was completed during the third quarter.

The company uses certain non-GAAP financial measures in evaluating its performance. These include cash generated by operations, cash generated by operations margin, net income excluding certain items, free cash flow and the ratio of net debt to annualized cash generated by operations. A reconciliation of the differences between these non-GAAP financial measures and the most comparable financial measure calculated and presented in accordance with GAAP is included in the tables that follow. The non-GAAP financial measures are by definition not measures of financial performance under generally accepted accounting principles and are not alternatives to operating income or net income reflected in the statement of operations or to cash flow as reflected in the statement of cash flows and are not necessarily indicative of cash available to fund all cash flow needs. The non-GAAP financial measures used by the company may not be comparable to similarly titled measures of other companies.

Cash generated by operations is operating income plus (i) depreciation and amortization, (ii) reserve for certain telecom bankruptcies (Global Crossing, WorldCom and Touch America), (iii) restructuring and other expenses (primarily the write-off of software costs and severance costs and expenses), (iv) loss on impairment charges and (v) restricted stock related compensation expense. Cash generated by operations margin is cash generated by operations divided by revenue. Net income excluding certain items is net income without taking into account the items described in the first paragraph. Free cash flow is operating

Edgar Filing: CITIZENS COMMUNICATIONS CO - Form 8-K

income plus depreciation and amortization, loss on impairment charges and restricted stock related compensation minus capital expenditures, interest expense and cash taxes. Net debt to annualized cash generated by operations is the ratio of (i) total debt (excluding equity units and convertible preferred) net of cash and cash equivalents to (ii) cash generated by operations for the period indicated multiplied by four (for a quarter) or by one and one-third (for a nine month period).

The company believes that presentation of these non-GAAP financial measures is useful to investors because it (i) reflects management's view of core operations and cash flow generation upon which management bases financial, operational, compensation and planning decisions, (ii) presents measurements that investors and rating agencies have indicated to management are important in assessing the company and (iii) is indicative of the company's actual performance compared to the covenant limiting the ratio of net debt to cash generated by operations contained in certain of its debt agreements. Management uses these non-GAAP financial measures to plan and measure the performance of its core operations and its divisions measure performance and report to management based upon these measures. In addition, the company believes that free cash flow, as the company defines it, can assist in comparing performance from period to period, without taking into account factors affecting cash flow reflected in the statement of cash flows, including changes in working capital and the timing of purchases and payments.

While the company utilizes these non-GAAP financial measures in managing and analyzing its business and financial condition and believes they are useful to management and to investors for the reasons described above, these non-GAAP financial measures have certain shortcomings. In particular, cash generated by operations and net income excluding certain items do not take into account the items described above, some of which will recur in future periods, in order to focus on core operations. In addition, free cash flow does not represent the residual cash flow available for discretionary expenditures, since items such as debt repayments are not deducted from such measure. Management compensates for the shortcomings of these measures by utilizing them in conjunction with their comparable GAAP financial measures. In addition, annualized cash generated by operations and annualized operating income present quarterly or nine month information for purposes of ratio analysis as annualized information, without representing in any way a forecast, projection or estimate of cash generated by operations or operating income for future periods. The information in this press release should be read in conjunction with the financial statements and footnotes contained in our documents to be filed with the U.S. Securities and Exchange Commission.

About Citizens Communications
