- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

INFORMATION TO BE INCLUDED IN REPORT

Item 2.02. Results of Operations and Financial Condition

On July 21, 2014, registrant issued a press release entitled "Halliburton Announces Second Quarter Income From Continuing Operations of \$0.91 Per Diluted Share."

The text of the Press Release is as follows:

HALLIBURTON ANNOUNCES SECOND QUARTER INCOME FROM CONTINUING OPERATIONS OF \$0.91 PER DILUTED SHARE

Share repurchase authorization increased to \$6 billion

HOUSTON, Texas - Halliburton (NYSE:HAL) announced today that income from continuing operations for the second quarter of 2014 was \$776 million, or \$0.91 per diluted share. This compares to income from continuing operations for the first quarter of 2014 of \$623 million, or \$0.73 per diluted share.

Halliburton's total revenue in the second quarter of 2014 was a record \$8.1 billion, compared to \$7.3 billion in the first quarter of 2014. Operating income was \$1.2 billion in the second quarter of 2014, 23% higher than operating income of \$970 million in the first quarter of 2014 resulting from significant activity improvements in North America and the Eastern Hemisphere.

"I am very pleased with Halliburton's second quarter results and continue to be very excited about the momentum of our business for the rest of the year and beyond. Once again, we delivered industry-leading revenue growth both sequentially and year over year, compared to our primary peers," commented Dave Lesar, chairman, president and chief executive officer.

"In North America, second quarter revenue increased 11% and operating income was up 31% compared to the first quarter of 2014, outpacing a 4% increase in the United States land rig count. Service intensity levels continued to expand, as completion volumes per well were up more than 35% compared to the second quarter of last year.

"We expect North America activity levels to continue to improve, with margins approaching 20% in the third quarter. We have concluded based on the strength of this outlook that we will immediately accelerate additions to our hydraulic fracturing fleet and logistics capabilities, with new crews available for service beginning later this year.

-more-

Halliburton/Page 2

“In the Eastern Hemisphere, we are successfully executing our growth strategy. Relative to the first quarter of 2014, we grew Eastern Hemisphere revenue by 9% and operating income by 26%. We continue to forecast full-year Eastern Hemisphere revenue growth in the low double digits, with average full year margins in the upper teens.

“In the Middle East/Asia region, revenue increased 11% and operating income increased 25% sequentially. Saudi Arabia continued to lead the growth, and we expect this region to have the highest growth rate for the full-year 2014, despite the potential for activity disruptions or project delays in Iraq later this year.

“In Europe/Africa/CIS, sequential revenue and operating income increased 6% and 27%, respectively. The growth resulted from seasonal recovery in the North Sea and in Russia, as well as activity gains in sub-Saharan Africa.

“In Latin America, revenue increased 4% sequentially, while operating income declined 39%. While we are very encouraged about the prospects for Energy Reform in Mexico, the land rig count was near historic low levels during the second quarter. Our results for the second quarter of 2014 were also negatively impacted by the late receipt of our blanket order for consulting and project management work, which impacted our ability to book revenue and offset costs. In addition, margins were impacted by mobilization costs for our integrated projects in Mexico. Both of these issues are expected to turn around in the second half of the year. We believe full year Latin America margins should improve sufficiently to be in line with 2013 assuming the timely approval of our billings under the blanket order in Mexico, as well as a swift resolution of the retender of our Brazil drilling contract.

“Our strategy is working well and we intend to stay the course. We see strong, sustainable growth opportunities across the mature field, deepwater and unconventional markets. We continue to be excited about the North America market, and although there may be near-term choppiness in certain international markets, we see a strong pipeline of opportunities.

“Our recent strong financial performance has enabled us to increase our shareholder distributions while maintaining robust liquidity to fund future growth. Our board recently approved an additional \$4.8 billion in stock repurchase authorization, to a new total repurchase capacity of \$6 billion. This reflects our confidence in the strength of our long-term business outlook, our commitment to shareholder distributions, and our focus on delivering best-in-class returns,” concluded Lesar.

2014 Second Quarter Results

Completion and Production

Completion and Production (C&P) revenue in the second quarter of 2014 was \$4.9 billion, an increase of \$522 million, or 12%, from the first quarter of 2014. This increase was primarily driven by higher stimulation activity in the United States land market and strong growth in our international operations, which more than offset the effects of the seasonal Canadian spring break-up.

-more-

Halliburton/Page 3

C&P operating income in the second quarter of 2014 was \$887 million, an increase of \$226 million, or 34%, from the first quarter of 2014. North America C&P operating income improved by \$184 million, or 41%, sequentially, mainly due to increased stimulation activity in the United States land market. Latin America C&P operating income was flat compared to the first quarter, primarily due to higher cementing activity in Mexico, which was offset by lower activity in Venezuela. Europe/Africa/CIS C&P operating income increased \$18 million, or 23%, compared to the first quarter of 2014, due to seasonal activity increases in Russia and Europe and higher activity in Congo, which were partially offset by lower completion tools sales in Angola. Middle East/Asia C&P operating income rose \$24 million, or 27%, sequentially, due to increased activity for most product lines in Saudi Arabia, Australia, and Malaysia.

Drilling and Evaluation

Drilling and Evaluation (D&E) revenue in the second quarter of 2014 was \$3.1 billion, an increase of \$181 million, or 6%, from the first quarter of 2014. This increase was primarily driven by higher wireline and fluid services in the Eastern Hemisphere and the United States, which more than offset the effects of the seasonal Canadian spring break-up and lower activity in Mexico.

D&E operating income in the second quarter of 2014 was \$414 million, an increase of \$16 million, or 4%, from the first quarter of 2014. North America D&E operating income increased \$4 million, or 3%, sequentially, due to increased logging and fluid services in the United States, which were partially offset by reduced software sales in the United States and the effects of the Canadian spring break-up. Latin America D&E operating income decreased \$39 million, or 75% from the first quarter of 2014, primarily due to lower activity in Mexico and reduced drilling activity in Brazil, which were partially offset by higher wireline activity in Venezuela. Europe/Africa/CIS D&E operating income improved by \$22 million, or 32%, sequentially, due to increased drilling activity in Norway and Angola, which was partially offset by lower drilling services in the United Kingdom and Eurasia. Middle East/Asia D&E operating income increased \$29 million, or 24%, compared to the first quarter of 2014, mainly due to higher drilling activity in Saudi Arabia and increased direct sales in China, which were partially offset by lower demand for drilling services in Malaysia.

Corporate and Other

During the second quarter of 2014, Halliburton invested an additional \$15 million, pre-tax, in strategic projects aimed at strengthening Halliburton's North America service delivery model and repositioning technology, supply chain, and manufacturing infrastructure to support projected international growth. Halliburton expects the cost of these strategic projects to wind down during the remainder of 2014.

Halliburton/Page 4

Significant Recent Events and Achievements

Halliburton announced the release of the CYPHERSM 2.0 Seismic-to-Stimulation Service, a proprietary and collaborative workflow that links geoscience with reservoir, drilling, and completion engineering to allow operators to better predict and produce unconventional reserves. The CYPHER 2.0 service builds on the complete full-field solution and provides enhanced capabilities through innovative software applications allowing operators to optimize the development of their unconventional reservoirs and reduce their cost per barrel of oil equivalent (BOE).

Halliburton announced that its TDReamTM tool was one of the winners of the Offshore Technology Conference's Spotlight on New TechnologySM Awards. The TDReam tool is an innovation over traditional reamers, which are typically housed above rotary steerable and logging-while-drilling tools in the reaming-while-drilling assembly.

Halliburton announced that its FlexRite[®] Multibranch Inflow Control (MIC) system was awarded E&P magazine's Meritorious Award for Engineering Innovation at the Offshore Technology Conference. It is the world's first multilateral completion system that provides sand control at the junction and the ability to remotely control the flow of each individual branch of a multilateral well with three or more legs, without costly subsea intervention.

Halliburton acquired Neflex Petroleum Consultants Limited, the industry leader in sequence stratigraphy-based products and consulting focused on subsurface risk reduction. Neflex's four-dimensional subsurface model is driven by a proprietary framework which allows geoscientists to use a single global platform to search, discover, analyze and integrate geoscience data essential to understanding and managing subsurface risk. By integrating the Neflex Earth Model with Landmark's DecisionSpace[®] application platform, Halliburton expects to improve its customers' ability to explore prospects more rapidly, and better predict the probability of drilling success.

Halliburton acquired Europump Systems Inc., an industry leader in the design, fabrication, distribution, and service of progressive cavity pump systems, progressive cavity wellhead drives, and surface drive units. These offerings will expand Artificial Lift's reach into a variety of customer well challenges that include, but are not limited to, heavy oil applications and high sand producing wells.

Halliburton was recognized by the American Petroleum Institute (API) for its strong support and contributions to the development of API Specification Q2, the advanced industry certification standard for oil and natural gas service providers. API Spec Q2 focuses heavily on defect prevention, waste reduction, and reliability of services. In addition to helping develop the standard, Halliburton hosted two beta audits, was the first company to go through a stage 1 audit in both the Gulf of Mexico and Indonesia, the first to apply for certification of multiple facilities worldwide, and the first company to receive an API Q2 certification in the Gulf of Mexico.

Halliburton/Page 5

Founded in 1919, Halliburton is one of the world's largest providers of products and services to the energy industry. With more than 80,000 employees, representing 140 nationalities in approximately 80 countries, the company serves the upstream oil and gas industry throughout the lifecycle of the reservoir - from locating hydrocarbons and managing geological data, to drilling and formation evaluation, well construction and completion, and optimizing production through the life of the field. Visit the company's website at www.halliburton.com. Connect with Halliburton on Facebook, Twitter, LinkedIn, Oilpro and YouTube.

NOTE: The statements in this press release that are not historical statements, including statements regarding future financial performance, are forward-looking statements within the meaning of the federal securities laws. These statements are subject to numerous risks and uncertainties, many of which are beyond the company's control, which could cause actual results to differ materially from the results expressed or implied by the statements. These risks and uncertainties include, but are not limited to: results of litigation, settlements, and investigations; actions by third parties, including governmental agencies; whether a settlement relating to the Macondo multi-district litigation will be reached at the amounts contemplated by our reserve or at all; settlement discussions relating to the Macondo incident do not cover all possible parties and claims, and there are additional reasonably possible losses relating to the Macondo incident that we cannot reasonably estimate at this time; with respect to repurchases of Halliburton common stock, the continuation or suspension of the repurchase program, the amount, the timing and the trading prices of Halliburton common stock and the availability and alternative uses of cash; changes in the demand for or price of oil and/or natural gas can be significantly impacted by weakness in the worldwide economy; consequences of audits and investigations by domestic and foreign government agencies and legislative bodies and related publicity and potential adverse proceedings by such agencies; indemnification and insurance matters; protection of intellectual property rights and against cyber attacks; compliance with environmental laws; changes in government regulations and regulatory requirements, particularly those related to offshore oil and natural gas exploration, radioactive sources, explosives, chemicals, hydraulic fracturing services, and climate-related initiatives; compliance with laws related to income taxes and assumptions regarding the generation of future taxable income; risks of international operations, including risks relating to unsettled political conditions, war, the effects of terrorism, foreign exchange rates and controls, international trade and regulatory controls, and doing business with national oil companies; weather-related issues, including the effects of hurricanes and tropical storms; changes in capital spending by customers; delays or failures by customers to make payments owed to us; execution of long-term, fixed-price contracts; structural changes in the oil and natural gas industry; maintaining a highly skilled workforce; availability and cost of raw materials; and integration and success of acquired businesses and operations of joint ventures. Halliburton's Form 10-K for the year ended December 31, 2013, Form 10-Q for the quarter ended March 31, 2014, recent Current Reports on Form 8-K, and other Securities and Exchange Commission filings discuss some of the important risk factors identified that may affect Halliburton's business, results of operations, and financial condition. Halliburton undertakes no obligation to revise or update publicly any forward-looking statements for any reason.
