DineEquity, Inc. and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

1. General

The accompanying unaudited consolidated financial statements of DineEquity, Inc. (the “Company”) have been prepared in accordance with United States generally accepted accounting principles (“U.S. GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The operating results for the six months ended June 30, 2015 are not necessarily indicative of the results that may be expected for the twelve months ending December 31, 2015.

The consolidated balance sheet at December 31, 2014 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by U.S. GAAP for complete financial statements.

These consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2014.

2. Basis of Presentation

The Company’s fiscal quarters end on the Sunday closest to the last day of each quarter. For convenience, the fiscal quarters of each year are referred to as ending on March 31, June 30, September 30 and December 31. The first quarter of fiscal 2015 began on December 29, 2014 and ended on March 29, 2015; the second quarter of fiscal 2015 ended on June 28, 2015. The first quarter of fiscal 2014 began on December 30, 2013 and ended on March 30, 2014; the second quarter of fiscal 2014 ended on June 29, 2014.

The accompanying consolidated financial statements include the accounts of the Company and its subsidiaries that are consolidated in accordance with U.S. GAAP. All intercompany balances and transactions have been eliminated.

The preparation of financial statements in conformity with U.S. GAAP requires the Company’s management to make assumptions and estimates that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities, if any, at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant areas requiring the use of management estimates in the calculation and assessment of reported or disclosed amounts include: (a) impairment of tangible and intangible assets, (b) income taxes, (c) allowance for doubtful accounts and notes receivables, (d) lease accounting estimates, (e) stock-based compensation and (f) contingencies. On an ongoing basis, the Company evaluates its estimates based on historical experience, current conditions and various other assumptions that are believed to be reasonable under the circumstances. The Company adjusts such estimates and assumptions when facts and circumstances dictate. Actual results could differ from those estimates.

3. Accounting Policies

Accounting Standards Adopted in the Current Fiscal Year

In April 2014, the Financial Accounting Standards Board (“FASB”) issued an amendment to the guidance on the reporting of discontinued operations. The amendment changed the criteria for the reporting of discontinued operations

such that only disposals resulting in a strategic shift that will have a major effect on an entity's operations and financial results will be reported as discontinued operations. The amendment also removed the requirement that an entity not have any significant continuing involvement in the operations of the component after disposal to qualify for reporting of the disposal as a discontinued operation. The Company adopted the amendment as of January 1, 2015 and adoption did not have an impact on the Company's consolidated financial statements.

Newly Issued Accounting Standards Not Yet Adopted

In May 2014, the FASB issued new accounting guidance on revenue recognition, which provides for a single five-step model to be applied to all revenue contracts with customers. The new standard also requires additional financial statement disclosures that will enable users to understand the nature, amount, timing and uncertainty of revenue and cash flows relating to customer contracts. Companies have an option to use either a retrospective approach or cumulative effect adjustment approach to implement the standard. In July 2015, the FASB deferred the effective date of the new guidance by one year such that the Company will be required to adopt the guidance beginning with its first fiscal quarter of 2018.

Table of Contents

DineEquity, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

3. Accounting Policies (Continued)

This amendment supersedes nearly all of the existing general revenue recognition guidance under U.S. GAAP as well as most industry-specific revenue recognition guidance, including guidance with respect to revenue recognition by franchisors. The Company believes the recognition of the majority of its revenues, including franchise royalty revenues, sales of IHOP pancake and waffle dry mix and retail sales at company-operated restaurants will not be affected by the new guidance. Additionally, lease rental revenues are not within the scope of the new guidance. The Company is currently evaluating the impact of the new guidance on its financial statements and related disclosures and which method of adoption will be used.

In April 2015, the FASB issued an amendment that modifies the presentation of debt issuance costs. The amendment requires debt issuance costs be presented in the balance sheet as a direct reduction of the related debt liability rather than as an asset. The amendment is effective commencing with the Company's first fiscal quarter of 2016 and is required to be applied on a retrospective basis. As the amendment does not change the underlying accounting for debt issuance costs, adoption of this standard is not expected to have a material effect on the Company's consolidated financial statements.

The Company reviewed all other newly issued accounting pronouncements and concluded that they either are not applicable to the Company or are not expected to have a material effect on the Company's consolidated financial statements as a result of future adoption.

4. Stockholders' Equity

Dividends

During the six months ended June 30, 2015, the Company paid dividends on common stock of \$33.3 million, representing the dividends declared in the fourth quarter of 2014 and first quarter of 2015. On May 19, 2015, the Company's Board of Directors declared a second quarter 2015 cash dividend of \$0.875 per share of common stock. This dividend was paid on July 10, 2015 to the Company's stockholders of record at the close of business on June 12, 2015. The Company reported a payable for this dividend of \$16.5 million at June 30, 2015.

Stock Repurchase Program

In October 2014, the Company's Board of Directors approved a stock repurchase authorization of up to \$100 million of DineEquity common stock. Under this program, the Company may repurchase shares on an opportunistic basis from time to time in open market transactions and in privately negotiated transactions based on business, market, applicable legal requirements and other considerations. The repurchase program does not require the repurchase of a specific number of shares and may be terminated at any time. During the six months ended June 30, 2015, the Company repurchased 344,890 shares of common stock at a cost of \$35.0 million. As of June 30, 2015, the Company has repurchased a cumulative total of 365,225 shares of common stock under the current Board authorization at a total cost of \$37.0 million. The Company may repurchase up to an additional \$63.0 million of common stock under the current Board authorization.

Treasury Stock

Repurchases of DineEquity common stock are included in treasury stock at the cost of shares repurchased plus any transaction costs. Treasury stock may be re-issued when stock options are exercised, when restricted stock awards are

granted and when restricted stock units settle in stock upon vesting. The cost of treasury stock re-issued is determined using the first-in, first-out (“FIFO”) method. During the six months ended June 30, 2015, the Company re-issued 292,648 treasury shares at a total FIFO cost of \$10.6 million.

Table of Contents

DineEquity, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

5. Income Taxes

The Company's effective tax rate was 38.3% for the six months ended June 30, 2015 and 2014.

The total gross unrecognized tax benefit as of June 30, 2015 and December 31, 2014 was \$3.3 million and \$3.4 million, respectively, excluding interest, penalties and related tax benefits. The Company estimates the unrecognized tax benefit may decrease over the upcoming 12 months by an amount up to \$0.7 million related to settlements with taxing authorities and the lapse of statutes of limitations. For the remaining liability, due to the uncertainties related to these tax matters, the Company is unable to make a reasonably reliable estimate when cash settlement with a taxing authority will occur.

As of June 30, 2015, accrued interest was \$4.3 million and accrued penalties were less than \$0.1 million, excluding any related income tax benefits. As of December 31, 2014, accrued interest was \$3.9 million and accrued penalties were less than \$0.1 million, excluding any related income tax benefits. The Company recognizes interest accrued related to unrecognized tax benefits and penalties as a component of its income tax provision recognized in the Consolidated Statements of Comprehensive Income.

The Company files federal income tax returns and the Company or one of its subsidiaries files income tax returns in various state and foreign jurisdictions. With few exceptions, the Company is no longer subject to federal, state or non-United States tax examinations by tax authorities for years before 2008. In the second quarter of 2013, the Internal Revenue Service ("IRS") issued a Revenue Agent's Report related to its examination of the Company's U.S federal income tax return for each of the tax years 2008 to 2010. The Company disagrees with a portion of the proposed assessments and has contested them through the IRS administrative appeals procedures. The appeal process is ongoing. The Company continues to believe that adequate reserves have been provided relating to all matters contained in the tax periods open to examination.

6. Stock-Based Compensation

The following table summarizes the components of stock-based compensation expense included in general and administrative expenses in the Consolidated Statements of Comprehensive Income for the three and six months ended June 30, 2015 and 2014:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(In millions)			
Total stock-based compensation expense:				
Equity classified awards expense	\$2.2	\$2.4	\$4.6	\$5.5
Liability classified awards (credit) expense	(1.1) 0.6	(0.8) 0.5
Total pre-tax stock-based compensation expense	1.1	3.0	3.8	6.0
Book income tax benefit	(0.4) (1.1) (1.4) (2.3
Total stock-based compensation expense, net of tax	\$0.7	\$1.9	\$2.4	\$3.7

As of June 30, 2015, total unrecognized compensation costs of \$16.0 million related to restricted stock and restricted stock units and \$5.2 million related to stock options are expected to be recognized over a weighted average period of 1.85 years for restricted stock and restricted stock units and 1.67 years for stock options.

Equity Classified Awards - Stock Options

The estimated fair value of the stock options granted during the six months ended June 30, 2015 was calculated using a Black-Scholes option pricing model. The following summarizes the assumptions used in the Black-Scholes model:

Risk-free interest rate	1.54 %
Weighted average historical volatility	36.8 %
Dividend yield	3.17 %
Expected years until exercise	4.5
Weighted average fair value of options granted	\$27.20

Table of Contents

DineEquity, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

6. Stock-Based Compensation (Continued)

Stock option balances as of June 30, 2015 and related activity for the six months ended June 30, 2015 were as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in Years)	Aggregate Intrinsic Value (in Millions)
Outstanding at December 31, 2014	618,115	\$53.10		
Granted	133,814	111.54		
Exercised	(197,591)	42.38		
Forfeited	(14,348)	96.83		
Outstanding at June 30, 2015	539,990	70.35	7.4	\$17.1
Vested at June 30, 2015 and Expected to Vest	507,678	68.37	7.2	\$16.9
Exercisable at June 30, 2015	324,927	\$51.87	6.2	\$15.3

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the closing stock price of the Company's common stock on the last trading day of the second quarter of 2015 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on June 30, 2015. The aggregate intrinsic value will change based on the fair market value of the Company's common stock and the number of in-the-money options.

Equity Classified Awards - Restricted Stock and Restricted Stock Units

Outstanding balances as of June 30, 2015 and activity related to restricted stock and restricted stock units for the six months ended June 30, 2015 were as follows:

	Restricted Stock	Weighted Average Grant Date Fair Value	Restricted Stock Units	Weighted Average Grant Date Fair Value
Outstanding at December 31, 2014	233,818	\$70.14	41,622	\$66.92
Granted	95,057	108.02	9,985	113.72
Released	(63,414)	52.93	(16,567)	52.19
Forfeited	(15,232)	79.83	(72)	113.72
Outstanding at June 30, 2015	250,229	\$88.30	34,968	\$86.49

Liability Classified Awards - Long-Term Incentive Awards

The Company has granted cash long-term incentive awards ("LTIP awards") to certain employees. Annual LTIP awards vest over a three-year period and are determined using a multiplier from 0% to 200% of the target award based on the total shareholder return of DineEquity, Inc. common stock compared to the total stockholder returns of a peer group of companies. Although LTIP awards are both denominated and paid only in cash, because the multiplier is based on the price of the Company's common stock, the awards are considered stock-based compensation in accordance with U.S. GAAP. For the three months ended June 30, 2015 and 2014, a credit of \$1.1 million and an expense of \$0.6 million, respectively, were included in total stock-based compensation expense related to the LTIP awards. For the six months ended June 30, 2015 and 2014, a credit of \$0.8 million and an expense of \$0.5 million, respectively, were included in total stock-based compensation expense related to the LTIP awards. At June 30, 2015 and December 31, 2014, liabilities of \$1.1 million and \$4.0 million, respectively, related to LTIP awards were included as part of accrued employee compensation and benefits in the Consolidated Balance Sheets.

7. Segments

The Company has two reportable segments: franchise operations (an aggregation of Applebee's and IHOP franchise operations) and rental operations. The Company also has company-operated restaurant operations and financing operations, but neither of these operations exceeded 10% of consolidated revenues, income before income tax provision or total assets.

As of June 30, 2015, the franchise operations segment consisted of (i) 1,993 restaurants operated by Applebee's franchisees in the United States, two U.S. territories and 15 countries outside the United States and (ii) 1,645 restaurants operated by IHOP franchisees and area licensees in the United States, two U.S. territories and eight countries outside the United States. Franchise operations revenue consists primarily of franchise royalty revenues, sales of proprietary products to franchisees (primarily

DineEquity, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

7. Segments (Continued)

pancake and waffle dry mixes for the IHOP restaurants), IHOP franchise advertising fees and franchise fees. Franchise operations expenses include IHOP advertising expenses, the cost of IHOP proprietary products, IHOP and Applebee's pre-opening training expenses and other franchise-related costs.

Rental operations revenue includes revenue from operating leases and interest income from direct financing leases. Rental operations expenses are costs of operating leases and interest expense from capital leases on franchisee-operated restaurants.

At June 30, 2015, the company restaurant operations segment consisted of 23 Applebee's company-operated restaurants and 13 IHOP company-operated restaurants, all of which are located in the United States. Company restaurant sales are retail sales at company-operated restaurants. Company restaurant expenses are operating expenses at company-operated restaurants and include food, labor, utilities, rent and other restaurant operating costs.

Financing operations revenue primarily consists of interest income from the financing of franchise fees and equipment leases and sales of equipment associated with refranchised IHOP restaurants. Financing expenses are primarily the cost of restaurant equipment associated with refranchised IHOP restaurants.

Information on segments and a reconciliation to income before income tax provision for the three and six months ended June 30, 2015 and 2014 were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(In millions)			
Revenues from external customers:

8. Net Income per Share

The computation of the Company's basic and diluted net income per share for the three and six months ended June 30, 2015 and 2014 was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(In thousands, except per share data)			
Numerator for basic and dilutive income per common share:				
Net income	\$26,897	\$19,167	\$55,309	\$39,991
Less: Net income allocated to unvested participating restricted stock	(359)	(307)	(726)	(649)
Net income available to common stockholders - basic	26,538	18,860	54,583	39,342
Effect of unvested participating restricted stock in two-class calculation	1	1	2	2
Net income available to common stockholders - diluted	\$26,539	\$18,861	\$54,585	\$39,344
Denominator:				
Weighted average outstanding shares of common stock - basic	18,763	18,776	18,819	18,785
Dilutive effect of stock options	132	179	140	218
Weighted average outstanding shares of common stock - diluted	18,895	18,955	18,959	19,003
Net income per common share:				
Basic	\$1.41	\$1.00	\$2.90	\$2.09
Diluted	\$1.40	\$1.00	\$2.88	\$2.07

9. Fair Value Measurements

The Company does not have a material amount of financial assets or liabilities that are required under U.S. GAAP to be measured on a recurring basis at fair value. The Company is not a party to any derivative financial instruments. The Company does not have a material amount of non-financial assets or non-financial liabilities that are required under U.S. GAAP to be measured at fair value on a recurring basis. The Company has not elected to use the fair value measurement option, as permitted under U.S. GAAP, for any assets or liabilities for which fair value measurement is not presently required.

The Company believes the fair values of cash equivalents, accounts receivable and accounts payable approximate their carrying amounts due to their short duration.

The fair values of the Company's Series 2014-1 Class A Notes at June 30, 2015 and December 31, 2014 were as follows:

	June 30, 2015		December 31, 2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In millions)			
Long-term debt	\$1,300.0	\$1,317.1	\$1,300.0	\$1,302.0

The fair values were determined based on Level 2 inputs, including information gathered from brokers who trade in the Company's notes and information on notes that are similar to that of the Company.

DineEquity, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

10. Commitments and Contingencies

Litigation, Claims and Disputes

The Company is subject to various lawsuits, administrative proceedings, audits and claims arising in the ordinary course of business. Some of these lawsuits purport to be class actions and/or seek substantial damages. The Company is required under U.S. GAAP to record an accrual for litigation loss contingencies that are both probable and reasonably estimable. Legal fees and expenses associated with the defense of all of the Company's litigation are expensed as such fees and expenses are incurred. Management regularly assesses the Company's insurance coverage, analyzes litigation information with the Company's attorneys and evaluates the Company's loss experience in connection with pending legal proceedings. While the Company does not presently believe that any of the legal proceedings to which it is currently a party will ultimately have a material adverse impact on the Company, there can be no assurance that the Company will prevail in all the proceedings the Company is party to, or that the Company will not incur material losses from them.

Lease Guarantees

In connection with the sale of Applebee's restaurants or previous brands to franchisees and other parties, the Company has, in certain cases, guaranteed or has potential continuing liability for lease payments totaling \$368.1 million as of June 30, 2015. This amount represents the maximum potential liability for future payments under these leases. These leases have been assigned to the buyers and expire at the end of the respective lease terms, which range from 2015 through 2048. In the event of default, the indemnity and default clauses in the sale or assignment agreements govern the Company's ability to pursue and recover damages incurred. No lease payment guarantee liabilities have been recorded as of June 30, 2015.

11. Subsequent Event

On July 23, 2015, the Company completed the previously announced refranchising and sale of related restaurant assets of 23 Applebee's company-operated restaurants located in a two-state market area geographically centered around Kansas City, Missouri. The Company received proceeds of approximately \$9 million and expects to recognize a gain of approximately \$2 million on the transaction.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Cautionary Statement Regarding Forward-Looking Statements

Statements contained in this report may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements involve known and unknown risks, uncertainties and other factors, which may cause actual results to be materially different from those expressed or implied in such statements. You can identify these forward-looking statements by words such as "may," "will," "should," "expect," "anticipate," "believe," "estimate," "intend," "plan" and other similar expressions. You should consider our forward-looking statements in light of the risks discussed under the heading "Risk Factors" in our most recent Annual Report on Form 10-K, as well as our consolidated financial statements, related notes, and the other financial information appearing elsewhere in this report and our other filings with the United States Securities and Exchange Commission. The forward-looking statements contained in this report are made as of the date hereof and the Company assumes no obligation to update or supplement any forward-looking statements.

You should read the following Management's Discussion and Analysis of Financial Condition and Results of Operations in conjunction with the consolidated financial statements and the related notes that appear elsewhere in this report.

Overview

The following discussion and analysis provides information we believe is relevant to an assessment and understanding of our consolidated results of operations and financial condition. The discussion should be read in conjunction with the consolidated financial statements and the notes thereto included in Item 1 of Part I of this Quarterly Report and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014. Except where the context indicates otherwise, the words "we," "us," "our" and the "Company" refer to DineEquity, Inc., together with its subsidiaries that are consolidated in accordance with United States generally accepted accounting principles ("U.S. GAAP").

Through various subsidiaries, we own, franchise and operate two restaurant concepts: Applebee's Neighborhood Grill & Bar® ("Applebee®"), in the bar and grill segment within the casual dining category of the restaurant industry, and International House of Pancakes® ("IHOP®"), in the family dining category of the restaurant industry. References herein to Applebee's and IHOP restaurants are to these two restaurant concepts, whether operated by franchisees, area licensees or by us. With over 3,600 restaurants combined, 99% of which are franchised, we believe we are one of the largest full-service restaurant companies in the world. The June 15, 2015 issue of Nation's Restaurant News recently reported that IHOP and Applebee's were the largest restaurants in their respective categories in terms of United States system-wide sales during 2014. This marks the eighth consecutive year our two brands have achieved the number one ranking.

⁽¹⁾ Amortization of intangible assets, closure and impairment charges, loss on extinguishment of debt and gain or loss on disposition of assets.

Net income for the three and six months ended June 30, 2015 increased 40.3% and 38.3%, respectively, compared with the same periods of the prior year. In each case, the improvement was due to (i) significantly lower interest expense resulting from the refinancing of our long-term debt in the fourth quarter of 2014 at a fixed interest rate approximately 3% lower than prior to the refinancing and (ii) revenue and gross profit growth, primarily stemming from an increase in IHOP and Applebee's domestic same-restaurant sales and IHOP restaurant development over the past twelve months.

Table of Contents

Key Performance Indicators

In evaluating the performance of each restaurant concept, we consider the key performance indicators to be net franchise restaurant development and the percentage change in domestic system-wide same-restaurant sales. Since we are a 99% franchised company, expanding the number of Applebee's and IHOP franchise restaurants is an important driver of revenue growth because we currently do not plan to open any new company-operated restaurants. Further, while refranchising or renewals may result in new rental and financing agreements, we currently do not plan to significantly expand our rental and financing operations, legacies from the IHOP business model we operated under prior to 2003. Growth in both the number of franchise restaurants and sales at those restaurants will drive franchise revenues in the form of higher royalty revenues, additional franchise fees and, in the case of IHOP restaurants, sales of proprietary pancake and waffle dry mix.

An overview of these key performance indicators for the three and six months ended June 30, 2015 is as follows:

	Three Months Ended		Six Months Ended	
	June 30, 2015		June 30, 2015	
	Applebee's	IHOP	Applebee's	IHOP
Percentage increase in domestic system-wide same-restaurant sales	1.0%	6.2%	2.0%	5.5%
Net franchise restaurant (reduction) development ⁽¹⁾	2	8	(1)	8

⁽¹⁾ Franchise and area license openings, net of closings

The 6.2% increase in IHOP domestic system-wide same-restaurant sales for the three months ended June 30, 2015 was the ninth consecutive quarter of positive same-restaurant sales for IHOP and was the largest quarterly increase since the first quarter of 2004. Coupled with an increase of 4.8% in the first quarter of 2015, IHOP domestic system-wide same-restaurant sales increased 5.5% for the six months ended June 30, 2015. The increases for both the three and six months ended June 30, 2015 resulted from a higher average customer check and an increase in customer traffic. According to industry data, IHOP has outperformed the overall restaurant industry as well as the family dining segment in domestic system-wide same-restaurant sales in the first half of 2015. Based on data from Black Box Intelligence, a restaurant sales reporting firm ("Black Box"), during the six months ended June 30, 2015, both the family dining segment and the overall restaurant industry experienced an increase in average customer check that was partially offset by a decrease in customer traffic.

The 1.0% increase in Applebee's domestic system-wide same-restaurant sales for the three months ended June 30, 2015 was the fifth consecutive quarter of positive same-restaurant sales for Applebee's. This represents a decline from the 2.9% increase in the first quarter of 2015, and as a result, for the six months ended June 30, 2015, Applebee's domestic system-wide same-restaurant sales increased 2.0%. The increases for both the three and six months ended June 30, 2015 were due to a higher average customer check partially offset by a decline in customer traffic. Based on data from Black Box, Applebee's domestic system-wide same-restaurant sales performance during the six months ended June 30, 2015 was slightly lower than that of the casual dining segment, which experienced a larger increase in average customer check that was partially offset by a similar decrease in customer traffic.

During the six months ended June 30, 2015, Applebee's franchisees opened 14 new restaurants and closed 15 restaurants, resulting in a net decrease of one Applebee's franchise restaurant for the first half of 2015. IHOP franchisees opened 18 new restaurants and closed 10 restaurants, resulting in net IHOP franchise restaurant development of eight restaurants during 2015 to date. Typically, the majority of gross and net franchise restaurant development for each brand takes place in the second half of any given year.

Franchise restaurant closures take place each year for a variety of reasons. The number of Applebee's and IHOP restaurants that were closed during the first six months of 2015 is slightly less than the number that were closed during the first six months of 2014, but that is not considered to be indicative of any trend.

In 2015, we expect IHOP franchisees to open between 50 to 60 new restaurants and Applebee's franchisees to open between 30 to 40 new restaurants. The majority of openings for each brand is expected to be in domestic markets. The

actual number of openings in 2015 may differ from both our expectations and development commitments. Historically, the actual number of restaurants developed in a particular year has been less than the total number committed to be developed due to various factors, including economic conditions and franchisee noncompliance with restaurant opening commitments in development agreements. The timing of new restaurant openings also may be affected by various factors including weather-related and other construction delays, difficulties in obtaining timely regulatory approvals and the impact of currency fluctuations on our international franchisees.

Table of Contents

Additional detail on each of these key performance indicators is presented under the captions “Restaurant Development Activity” and “Restaurant Data” that follow.

In evaluating the performance of the consolidated enterprise, we consider the key performance indicators to be cash flows from operating activities and free cash flow (cash from operations, plus net receipts from notes and equipment contract receivables, less capital expenditures).

Our cash flows from operating activities and free cash flow for the six months ended June 30, 2015 and 2014 were as follows:

	Six Months Ended		Increase (Decrease)
	June 30, 2015	2014	
Cash flows from operating activities	\$48.1	\$56.0	\$(7.9)
Free cash flow	\$49.7	\$54.6	\$(4.9)

The decrease in cash flows from operating activities and free cash flow was primarily due to the impact on working capital of the timing of income tax and interest payments, partially offset by an increase in net income. Additional detail is presented under the caption “Liquidity and Capital Resources.”

Table of Contents

Restaurant Data

The following table sets forth the number of “Effective Restaurants” in the Applebee’s and IHOP systems and information regarding the percentage change in sales at those restaurants compared to the same periods in the prior year. Sales at restaurants that are owned by franchisees and area licensees are not attributable to the Company. However, we believe that presentation of this information is useful in analyzing our revenues because franchisees and area licensees pay us royalties and advertising fees that are generally based on a percentage of their sales, and, where applicable, rental payments under leases that partially may be based on a percentage of their sales. Management also uses this information to make decisions about future plans for the development of additional restaurants as well as evaluation of current operations.

Table of Contents

(a) “Effective Restaurants” are the weighted average number of restaurants open in a given fiscal period, adjusted to account for restaurants open for only a portion of the period. Information is presented for all Effective Restaurants in the Applebee’s and IHOP systems, which includes restaurants owned by franchisees and area licensees as well as those owned by the Company.

(b) “System-wide sales” are retail sales at Applebee’s restaurants operated by franchisees and IHOP restaurants operated by franchisees and area licensees, as reported to the Company, in addition to retail sales at company-operated restaurants. Sales at restaurants that are owned by franchisees and area licensees are not attributable to the Company. Unaudited reported sales for Applebee’s domestic franchise restaurants, IHOP franchise restaurants and IHOP area license restaurants were as follows:

	Three Months Ended		Six Months Ended	
	June 30, 2015	2014	June 30, 2015	2014
Reported sales (unaudited)	(In millions)			
Applebee's domestic franchise restaurant sales	\$ 1,174.6	\$ 1,150.7	\$ 2,400.6	\$ 2,333.8
IHOP franchise restaurant sales	\$ 715.1	\$ 669.5	\$ 1,436.4	\$ 1,349.8
IHOP area license restaurant sales	\$ 69.8	\$ 64.8	\$ 144.8	\$ 134.9

(c) “Sales percentage change” reflects, for each category of restaurants, the percentage change in sales in any given fiscal period compared to the prior fiscal period for all restaurants in that category.

(d) “Domestic same-restaurant sales percentage change” reflects the percentage change in sales in any given fiscal period, compared to the same weeks in the prior fiscal period, for domestic restaurants that have been operated throughout both fiscal periods that are being compared and have been open for at least 18 months. Because of new unit openings and restaurant closures, the domestic restaurants open throughout both fiscal periods being compared may be different from period to period. Domestic same-restaurant sales percentage change does not include data on IHOP area license restaurants.

Table of Contents

Significant Known Events, Trends or Uncertainties Impacting or Expected to Impact Comparisons of Reported or Future Results

Same-restaurant Sales Trends

Applebee's domestic system-wide same-restaurant sales increased 1.0% for the three months ended June 30, 2015 from the same period in 2014. This marks the fifth consecutive quarter of positive same-restaurant sales. The increase resulted from a higher average customer check partially offset by a decline in customer traffic. Same-restaurant sales for the second quarter of 2015 are not necessarily indicative of results expected for the full year.

IHOP's domestic system-wide same-restaurant sales increased 6.2% for the three months ended June 30, 2015 from the same period in 2014. The increase resulted from a higher average customer check and an increase in customer traffic, which increased for the fourth consecutive quarter. The increased annual contribution percentage of restaurant gross sales to the IHOP National Advertising Fund by a large majority of IHOP franchisees continues to have a positive impact on sales and traffic. Same-restaurant sales for the second quarter of 2015 are not necessarily indicative of results expected for the full year.

Based on data from Black Box, during the six months ended June 30, 2015, customer traffic declined for the overall restaurant industry as well as for both the casual dining and family dining segments of the restaurant industry. During the second quarter of 2015, we experienced an increase in IHOP customer traffic and a decline in Applebee's customer traffic. In the short term, a decline in customer traffic may be offset by an increase in average customer check resulting from an increase in menu prices, a favorable change in product sales mix, or a combination thereof. A sustained decline in same-restaurant customer traffic that cannot be offset by an increase in average customer check could have an adverse effect on our business, results of operations and financial condition.

Table of Contents

We strive to identify and create opportunities for growth in customer traffic and frequency, average check and same-restaurant sales. We focus on building our brands with a long-term view through a strategic combination of menu, media, remodel and development initiatives to continually innovate and evolve both brands. To drive each brand forward, we seek to innovate and remain actively focused on driving sustainable sales and traffic.

53rd Week in Fiscal 2015

We have a 52/53 week fiscal year that ends on the Sunday nearest to December 31 of each year. In a 52-week fiscal year, each fiscal quarter contains 13 weeks, comprised of two, four-week fiscal months followed by a five-week fiscal month. In a 53-week fiscal year, the last month of the fourth fiscal quarter contains six weeks. Our fiscal 2015, which began on December 29, 2014, will end on January 3, 2016 and will contain 53 weeks.

CONSOLIDATED RESULTS OF OPERATIONS

Comparison of the Three and Six Months Ended June 30, 2015 and 2014

REVENUE	Three Months Ended		Favorable (Unfavorable) Variance	Six Months Ended		Favorable (Unfavorable) Variance
	June 30, 2015	2014		June 30, 2015	2014	
	(In millions)					
Franchise operations	\$ 120.3	\$ 110.7	\$ 9.6	\$ 244.8	\$ 226.3	\$ 18.5
Rental operations	31.1	30.7	0.4	62.5	61.4	1.1
Company restaurant operations	17.4	15.7	1.7	34.8	32.0	2.8
Financing operations	2.7	3.4	(0.7)	5.3	8.0	(2.7)
Total revenue	\$ 171.5	\$ 160.5	\$ 11.0	\$ 347.4	\$ 327.7	\$ 19.7
Change vs. prior period	6.9	%		6.0	%	

The improvement in total revenue for the three months ended June 30, 2015 compared with the same period of the prior year was primarily due to (i) higher IHOP advertising revenues resulting from an agreement with a large majority of franchisees to increase the advertising contribution as a percentage of gross sales, (ii) higher franchise and rental revenues that resulted from a 6.2% increase in IHOP domestic same-restaurant sales, (iii) a 1.0% increase in Applebee's domestic same-restaurant sales and (iv) IHOP restaurant development over the past twelve months. These favorable items were partially offset by the expected progressive decline in interest revenue from rental and financing operations.

The improvement in total revenue for the six months ended June 30, 2015 compared with the same period of the prior year was primarily due to (i) higher IHOP advertising revenues resulting from an agreement with a large majority of franchisees to increase the advertising contribution as a percentage of gross sales, (ii) higher franchise and rental revenues that resulted from a 5.5% increase in IHOP domestic same-restaurant sales, (iii) a 2.0% increase in Applebee's domestic same-restaurant sales and (iv) IHOP restaurant development over the past twelve months. These favorable items were partially offset by a decline in financing revenues of \$1.4 million associated with the early termination of two leases in the first quarter of 2014 that did not recur in 2015, as well as the expected progressive decline in interest revenue from rental and financing operations.

Change vs. prior period	2.4	%		2.9	%	

Table of Contents

The improvement in total gross profit for the three months ended June 30, 2015 compared with the same period of the prior year was primarily due to higher franchise and rental revenues that resulted from the increase in IHOP domestic same-restaurant sales, IHOP restaurant development over the past twelve months and the increase in Applebee's domestic same-restaurant sales, partially offset by the expected progressive decline in interest revenue from rental and financing operations. The improvement in total gross profit for the six months ended June 30, 2015 compared with the same period of the prior year was due to these same factors, offset in part by the decline in financing revenues of \$1.4 million associated with the early termination of two leases as discussed under "Revenue" above.

(1) Effective Franchise Restaurants are the weighted average number of franchise and area license restaurants open in a given fiscal period, adjusted to account for restaurants open for only a portion of the period.

(2) Percentages calculated on actual amounts, not rounded amounts presented above.

Applebee's franchise revenue for the three months ended June 30, 2015 decreased slightly from the same period of the prior year, as lower franchise extension and transfer fees were partially offset by a 1.0% increase in domestic same-restaurant sales. Applebee's franchise revenue for the six months ended June 30, 2015 increased 1.5% from the same period of the prior year, primarily due to a 2.0% increase in domestic same-restaurant sales and a 0.3% increase in the number of Effective Franchise Restaurants open during the period, partially offset by lower franchise extension and transfer fees.

Applebee's franchise expenses for the three and six months ended June 30, 2015 increased primarily due to adjustments to insurance reserves.

The 10.2% increase in IHOP franchise revenue (other than advertising) for the three months ended June 30, 2015 was primarily due to higher royalty revenues resulting from a 6.2% increase in domestic same-restaurant sales, a \$1.6 million increase in sales volumes of pancake and waffle dry mix and a 1.4% increase in Effective Franchise

Restaurants. The 7.1% increase in IHOP franchise revenue (other than advertising) for the six months ended June 30, 2015 was primarily due to higher royalty revenues resulting from a 5.5% increase in domestic same-restaurant sales a \$1.8 million increase in sales volumes of pancake and waffle dry mix and a 1.7% increase in Effective Franchise Restaurants.

The increases in IHOP franchise expenses (other than advertising) for the three and six months ended June 30, 2015 compared with the same periods of the prior year were due to higher purchase volumes of pancake and waffle dry mix, as well as an increase in bad debt expense. The majority of the increase in bad debt expense was due to the favorable recovery of fully reserved receivables in 2014 that did not recur in 2015.

Table of Contents

IHOP's total franchise expenses are substantially higher than Applebee's, primarily due to advertising expenses. Advertising contributions designated for IHOP's national advertising fund and local marketing and advertising cooperatives are recognized as revenue and expense of franchise operations. However, because we have less contractual control over Applebee's advertising expenditures, that activity is considered to be an agency relationship and therefore is not recognized as franchise revenue and expense. The increases in IHOP advertising revenue and expense for the three and six months ended June 30, 2015 were due to higher contributions to marketing funds by IHOP franchisees. Franchisee contributions to marketing funds were impacted by an agreement with a large majority of franchisees to increase the advertising contribution as a percentage of gross sales effective June 30, 2014, as well as by the increases in domestic franchise same-restaurant sales and the new franchise restaurants that favorably impacted IHOP franchise revenue (other than advertising) as discussed above.

RENTAL OPERATIONS	Three Months Ended		Favorable (Unfavorable) Variance	Six Months Ended		Favorable (Unfavorable) Variance
	June 30, 2015	2014		June 30, 2015	2014	
	(In millions)					
Rental revenues	\$31.1	\$30.7	\$ 0.4	\$62.5	\$61.4	\$ 1.1
Rental expenses	23.3	23.6	0.3	46.8	47.5	0.7
Rental operations segment profit	\$7.8	\$7.1	\$ 0.7	\$15.7	\$13.9	\$ 1.8
Gross profit as % of revenue ⁽¹⁾	25.1	% 23.0	%	25.1	% 22.7	%

⁽¹⁾ Percentages calculated on actual amounts, not rounded amounts presented above.

Rental operations relate primarily to IHOP franchise restaurants. Rental income includes revenue from operating leases and interest income from direct financing leases. Rental expenses are costs of prime operating leases and interest expense on prime capital leases on certain franchise restaurants.

Rental segment revenue for the three and six months ended June 30, 2015 increased compared to the same periods of the prior year primarily due to the favorable impact of the increase in IHOP same-restaurant sales on operating leases with sales-contingent rental provisions, partially offset by expected progressive declines of \$0.2 million and \$0.5 million, respectively, in interest income as direct financing leases are repaid. Rental segment expenses decreased for the three and six months ended June 30, 2015 compared to the same period of the prior year due to the expected progressive decline in interest expense as capital lease obligations are repaid.

FINANCING OPERATIONS	Three Months Ended		Favorable (Unfavorable) Variance	Six Months Ended		Favorable (Unfavorable) Variance
	June 30, 2015	2014		June 30, 2015	2014	
	(In millions)					
Financing revenues	\$2.7	\$3.4	\$ (0.7)	\$5.3	\$8.0	\$ (2.7)
Financing expenses	—	0.3	0.3	0.0	0.8	0.8
Financing operations segment profit	\$2.7	\$3.1	\$ (0.4)	\$5.3	\$7.2	\$ (1.9)
Gross profit as % of revenue ⁽¹⁾	100.0	% 92.9	%	99.8	% 89.7	%

⁽¹⁾ Percentages calculated on actual amounts, not rounded amounts presented above.

All financing operations relate to IHOP franchise restaurants. Financing revenues primarily consist of interest income from the financing of equipment leases and franchise fees, as well as sales of equipment associated with refranchised IHOP restaurants. Financing expenses are primarily the cost of restaurant equipment associated with refranchised IHOP restaurants.

The decrease in financing revenue for the three months ended June 30, 2015 was due to a decrease in sales of equipment associated with refranchised IHOP restaurants and the expected progressive decline in interest revenue as note balances are repaid. The decrease in financing revenue for the six months ended June 30, 2015 was primarily due to fees of \$1.4 million associated with the negotiated early termination of two leases in the first quarter of 2014 that did not recur in 2015, a decrease in sales of equipment associated with refranchised IHOP restaurants and the expected progressive decline in interest revenue as note balances are repaid. The decrease in financing expenses for the three and six months ended June 30, 2015 was due to a decrease in the cost of sales of restaurant equipment associated with refranchised IHOP restaurants.

Table of Contents

COMPANY RESTAURANT OPERATIONS

As of June 30, 2015, company restaurant operations comprised 23 Applebee's company-operated restaurants in the Kansas City market, 10 IHOP company-operated restaurants in the Cincinnati market and three IHOP restaurants reacquired from franchisees we are operating on a temporary basis until they are refranchised. For the three months ended June 30, 2015, revenue from company restaurant operations increased \$1.7 million and segment profit was flat compared to the same period of the prior year. For the six months ended June 30, 2015, revenue and segment profit from company restaurant operations increased \$2.8 million and \$0.7 million, respectively, compared to the same period of the prior year. The higher revenue in each period was due to an increase in same-restaurant sales and an increase in the number of temporarily operated IHOP restaurants. The improvement in segment profit for the six months ended June 30, 2015 was primarily due to the increase in same-restaurant sales.

On July 23, 2015, we completed the previously announced refranchising and sale of related restaurant assets of the 23 Applebee's company-operated restaurants. We received proceeds of approximately \$9 million and expect to recognize a gain of approximately \$2 million on the transaction.

OTHER EXPENSE AND INCOME ITEMS

	Three Months Ended June 30, 2015		Favorable (Unfavorable) Variance	Six Months Ended June 30, 2015		Favorable (Unfavorable) Variance
	2014	2014		2014	2014	
	(In millions)					
General and administrative expenses	\$34.6	\$34.8	\$ 0.2	\$68.8	\$69.0	\$ 0.2
Interest expense	15.7	24.9	9.2	31.3	49.9	18.6
Amortization of intangible assets	2.5	3.1	0.6	5.0	6.1	1.1
Closure and impairment charges	0.5	0.6	0.1	2.3	0.8	(1.5)
Loss (gain) on disposition of assets	0.1	(0.1)	(0.2)	0.1	0.8	0.7
Income tax provision	16.6	12.0	(4.6)	34.3	24.9	(9.4)

Interest Expense

Interest expense for the three and six months ended June 30, 2015 decreased by \$9.2 million and \$18.6 million, respectively, compared to the same periods of the prior year. In the fourth quarter of 2014 we refinanced \$1.225 billion of long-term debt that bore interest at a weighted average rate of approximately 7.3% with \$1.3 billion of new long-term debt bearing interest at a fixed rate of 4.277%. Additionally, deferred financing costs associated with the new long-term debt were smaller than those associated with the old long-term debt, resulting in lower non-cash interest expense for the amortization of the deferred financing costs. These items were partially offset by a small increase in the principal amount of long-term debt outstanding.

Amortization of Intangible Assets

Amortization of intangible assets for the three and six months ended June 30, 2015 decreased compared to the same respective periods of the prior year because certain intangible assets that arose from the November 2007 acquisition of Applebee's became fully amortized in November 2014.

Closure and Impairment Charges

Closure and impairment charges were \$0.5 million for the three months ended June 30, 2015, comprised of \$0.4 million in impairment charges and \$0.1 million of closure charges. The impairment charges related to individually insignificant assets at eight IHOP company-operated restaurants. Closure and impairment charges were \$2.3 million for the six months ended June 30, 2015, comprised of \$1.6 million of closure charges and \$0.7 million of impairment charges. Approximately \$1.1 million of closure charges related to two IHOP franchise restaurants closed during 2015, with approximately \$0.4 million related to adjustments for IHOP and Applebee's restaurants closed in prior periods. There were no individually significant closure or impairment charges for the three and six months ended June 30, 2014.

During the six months ended June 30, 2015, we performed assessments of whether events or changes in circumstances have occurred that potentially indicate the carrying value of tangible long-lived assets may not be recoverable. No significant impairments were noted in performing the assessments. We also considered whether there were any indicators of potential impairment to our goodwill and indefinite-lived intangible assets. No such indicators were noted.

Table of Contents

Gain/Loss on Disposition of Assets

There were no individually significant asset dispositions during the three and six months ended June 30, 2015 and 2014, respectively.

Provision for Income Taxes

Our effective tax rate of 38.2% for the three months ended June 30, 2015 was consistent with our effective rate of 38.4% for the three months ended June 30, 2014. Our effective tax rate was 38.3% for both the six months ended June 30, 2015 and 2014, respectively.

Liquidity and Capital Resources

At June 30, 2015, our outstanding long-term debt consisted of \$1.3 billion of Series 2014-1 4.277% Fixed Rate Senior Notes, Class A-2 (the "Class A-2 Notes"). We also have a revolving financing facility consisting of Series 2014-1 Variable Funding Senior Notes, Class A-1 (the "Variable Funding Notes"), which allows for drawings of up to \$100 million of Variable Funding Notes and the issuance of letters of credit. The Class A-2 Notes and the Variable Funding Notes are referred to collectively as the "Notes." The Notes were issued in a private securitization transaction pursuant to which substantially all of our domestic revenue-generating assets and our domestic intellectual property are held by certain special-purpose, wholly-owned indirect subsidiaries of the Company (the "Guarantors") that act as guarantors of the Notes and that have pledged substantially all of their assets to secure the Notes.

While the Notes are outstanding, payment of principal and interest is required to be made on the Class A-2 Notes on a quarterly basis. The payment of principal on the Class A-2 Notes may be suspended when the leverage ratio for the Company and its subsidiaries is less than or equal to 5.25x. At June 30, 2015, our leverage ratio was 4.70x (see Exhibit 12.1).

The Variable Funding Notes were not drawn upon at June 30, 2015 and we have not drawn on them since issuance. At June 30, 2015, \$8.4 million was pledged against the Variable Funding Notes for outstanding letters of credit, leaving \$91.6 million of Variable Funding Notes available for borrowings. The letters of credit are used primarily to satisfy insurance-related collateral requirements.

The Notes are subject to customary rapid amortization events for similar types of financing, including events tied to our failure to maintain the stated debt service coverage ratio ("DSCR"), the sum of domestic retail sales for all restaurants being below certain levels on certain measurement dates, certain manager termination events, certain events of default and the failure to repay or refinance the Notes on the Class A-2 Anticipated Repayment Date in September 2021. The Notes are also subject to certain customary events of default, including events relating to non-payment of required interest, principal or other amounts due on or with respect to the Notes, failure to maintain the stated DSCR, failure to comply with covenants within certain time frames, certain bankruptcy events, breaches of specified representations and warranties and certain judgments.

Failure to maintain a prescribed DSCR can trigger a Cash Trapping Event, A Rapid Amortization Event, a Manager Termination Event or a Default Event as described below. In a Cash Trapping Event, the Trustee is required to retain a certain percentage of cash flow in a restricted account. In a Rapid Amortization Event, all excess Cash Flow is retained and used to retire principal amounts of debt. Key DSCRs are as follows:

- DSCR less than 1.75x but equal to or greater than 1.50x - Cash Trapping Event, 50% of Net Cash Flow
- DSCR less than 1.50x - Cash Trapping Event, 100% of Net Cash Flow
- DSCR less than 1.30x - Rapid Amortization Event

- DSCR less than 1.20x - Manager Termination Event
- DSCR less than 1.10x - Default Event

Our DSCR for the reporting period ended June 30, 2015 was 5.05x (see Exhibit 12.1).

Table of Contents

Dividends

During the six months ended June 30, 2015, we paid dividends on common stock of \$33.3 million, representing dividends declared in the fourth quarter of 2014 and first quarter of 2015 of \$0.875 per share of common stock. On May 19, 2015, our Board of Directors declared a second quarter 2015 cash dividend of \$0.875 per share of common stock. This dividend was paid on July 10, 2015 to our stockholders of record at the close of business on June 12, 2015. We evaluate dividend payments on common stock within the context of our overall capital allocation strategy with our Board of Directors on an ongoing basis, giving consideration to our current and forecast earnings, financial condition, cash requirements and other factors.

Share Repurchases

In October 2014, our Board of Directors approved a stock repurchase authorization of up to \$100 million of DineEquity common stock. Under this program, we may repurchase shares on an opportunistic basis from time to time in open market transactions and in privately negotiated transactions based on business, market, applicable legal requirements and other considerations. The repurchase program does not require the repurchase of a specific number of shares and may be terminated at any time. During the six months ended June 30, 2015, we repurchased 344,890 shares of common stock at a cost of \$35.0 million. As of June 30, 2015, we have repurchased a cumulative total of 365,225 shares of common stock under the current Board authorization at a total cost of \$37.0 million. We may repurchase up to an additional \$63.0 million of common stock under the current Board authorization. We evaluate repurchases of common stock within the context of our overall capital allocation strategy with our Board of Directors on an ongoing basis, giving consideration to our current and forecast earnings, financial condition, cash requirements and other factors.

Cash Flows

In summary, our cash flows for the six months ended June 30, 2015 and 2014 were as follows:

	Six Months Ended		
	June 30,		
	2015	2014	Variance
	(In millions)		
Net cash provided by operating activities	\$48.1	\$56.0	\$(7.9)
Net cash provided by investing activities	5.6	2.7	2.9
Net cash used in financing activities	(53.3)	(64.4)	11.1
Net increase (decrease) in cash and cash equivalents	\$0.4	\$(5.7)	\$6.1

Operating Activities

Cash provided by operating activities for the six months ended June 30, 2015 decreased \$7.9 million compared with the six months ended June 30, 2014. Net income for the six months ended June 30, 2015 increased compared to the same period of 2014, primarily due to lower interest expense resulting from the refinancing of our long-term debt in the fourth quarter of 2014 and an increase in gross profit, primarily due to increases in IHOP and Applebee's domestic same-restaurant sales and IHOP restaurant development over the past twelve months. However, net changes in working capital used cash of \$13.3 million during the first six months of 2015 compared to providing cash of \$6.7 million during the first six months of 2014, an unfavorable variance of \$20.0 million.

The unfavorable variance in working capital changes is primarily due to the timing of interest payments on long-term debt, higher income tax payments and marketing accruals. Our Notes require quarterly interest payments, whereas

interest payments on a significant portion of our old long-term debt were required semi-annually in April and October. We had approximately 25 days of interest accrued at June 30, 2015 as compared to two months of interest accrued at June 30, 2014. This timing negatively impacted the change in working capital, although total cash provided by operating activities was benefited by overall lower interest payments.

Additionally, we made higher estimated income tax payments in 2015 compared to 2014. Our estimated tax payments during the six months ended June 30, 2014 were lower relative to that period's current tax provision in anticipation that deductible expenses related to our refinancing of long-term debt would be incurred in the latter half of 2014. The higher tax payments in 2015 had an unfavorable impact on both the change in working capital and total cash from operations.

Table of Contents

Investing Activities

Investing activities provided net cash of \$5.6 million for the six months ended June 30, 2015. Principal receipts from notes, equipment contracts and other long-term receivables of \$9.5 million were partially offset by \$4.6 million in capital expenditures. Capital expenditures are expected to be approximately \$9 million for fiscal 2015.

Financing Activities

Financing activities used net cash of \$53.3 million for the six months ended June 30, 2015. Cash used in financing activities primarily consisted of cash dividends on our common stock totaling \$33.3 million, repurchases of our common stock totaling \$35.0 million and repayments of capital lease and financing obligations of \$6.0 million. Cash provided by financing activities primarily consisted of a decrease in restricted cash of \$11.0 million and a net cash inflow of approximately \$10.0 million related to equity compensation awards.

Cash and Cash Equivalents

At June 30, 2015, our cash and cash equivalents totaled \$104.4 million, including \$59.9 million of cash held for gift card programs and advertising funds.

Based on our current level of operations, we believe that our cash flow from operations, available cash and available borrowing capacity under our Variable Funding Notes will be adequate to meet our liquidity needs for the next twelve months.

Free Cash Flow

We define “free cash flow” for a given period as cash provided by operating activities, plus net receipts from notes and equipment contract receivables, less additions to property and equipment. We believe this information is helpful to investors to determine our cash available for general corporate purposes and for the return of cash to stockholders pursuant to our capital allocation strategy.

Free cash flow is considered to be a non-U.S. GAAP measure. Reconciliation of the cash provided by operating activities to free cash flow is as follows:

	Six Months Ended		
	2015	2014	Variance
	June 30,		
	(In millions)		
Cash flows provided by operating activities	\$48.1	\$56.0	\$(7.9)
Net receipts from notes and equipment contracts receivable	6.2	2.7	3.5
Additions to property and equipment	(4.6)	(4.1)	(0.5)
Free cash flow	\$49.7	\$54.6	\$(4.9)

This non-U.S. GAAP measure is not defined in the same manner by all companies and may not be comparable to other similarly titled measures of other companies. Non-U.S. GAAP measures should be considered in addition to, and not as a substitute for, the U.S. GAAP information contained within our financial statements.

The decline in free cash flow for the six months ended June 30, 2015 compared to the same period of the prior year is primarily due to the decrease in cash from operating activities discussed above.

Off-Balance Sheet Arrangements

As of June 30, 2015, we had no off-balance sheet arrangements, as defined in Item 303(a)(4) of SEC Regulation S-K.

Contractual Obligations and Commitments

There were no material changes to the contractual obligations table as disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014.

Table of Contents

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with U.S. GAAP requires we make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of net revenues and expenses in the reporting period. We base our estimates and assumptions on current facts, historical experience and various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. We continually review the estimates and underlying assumptions to ensure they are appropriate for the circumstances. Accounting assumptions and estimates are inherently uncertain and actual results may differ materially from our estimates.

A summary of our critical accounting estimates is included in Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2014. During the six months ended June 30, 2015, there were no significant changes in our estimates and critical accounting policies.

See Note 3, "Accounting Policies," in the Notes to Consolidated Financial Statements for a discussion of recently adopted accounting standards and newly issued accounting standards.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

There were no material changes from the information contained in the Company's Annual Report on Form 10-K as of December 31, 2014.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures.

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting.

There have been no changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings.

We are subject to various lawsuits, administrative proceedings, audits and claims arising in the ordinary course of business. Some of these lawsuits purport to be class actions and/or seek substantial damages. We are required to record an accrual for litigation loss contingencies that are both probable and reasonably estimable. Legal fees and expenses associated with the defense of all of our litigation are expensed as such fees and expenses are incurred. Management regularly assesses our insurance deductibles, analyzes litigation information with our attorneys and evaluates our loss experience in connection with pending legal proceedings. While we do not presently believe that any of the legal proceedings to which we are currently a party will ultimately have a material adverse impact on us, there can be no assurance that we will prevail in all the proceedings we are party to, or that we will not incur material losses from them.

Table of Contents

Item 1A. Risk Factors.

There are no material changes from the risk factors set forth under Item 1A of Part I of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Purchases of Equity Securities by the Company

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs (b)	Approximate dollar value of shares that may yet be purchased under the plans or programs (b)
March 30, 2015 – April 26, 2015	—	—	—	\$83,000,000
April 27, 2015 – May 24, 2015 ^(a)	154,470	\$97.17	154,398	\$68,000,000
May 25, 2015 – June 28, 2015 ^(a)	50,826	\$99.23	50,396	\$63,000,000
Total	205,296	\$97.68	204,794	\$63,000,000

^(a) These amounts include 72 shares owned and tendered by employees at an average price of \$95.81 to satisfy tax withholding obligations arising upon vesting of restricted awards during the fiscal month ended May 24, 2015 and 430 shares tendered at an average price of \$99.08 during the fiscal month ended June 28, 2015.

^(b) In October 2014, our Board of Directors approved a stock repurchase authorization of up to \$100 million of our common stock. Repurchases are subject to prevailing market prices and may take place in open market transactions and in privately negotiated transactions, based on business, market, applicable legal requirements and other considerations. The program does not require the repurchase of a specific number of shares and may be terminated at any time.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not Applicable.

Item 5. Other Information.

None.
