INDEX TO EXHIBITS

<u>Exhibit No.</u>	<u>Description</u>
1.	Quarter 1 Results 2005/2006

GOOD Q1 RESULTS

Pre-tax profit of £124 million

- Operating profit of £176 million
- Operating margin of 8.5 per cent
- Revenue up 8.3 per cent to £2.1 billion

- Net unit costs improve 0.1 per cent

- Net debt down at £2.5 billion

British Airways today reported its quarterly financial results for the period ending June 30th, 2005, prepared under International Financial Reporting Standards (IFRS). All comparative results are also reported under IFRS.

The airline reported a pre-tax profit of £124 million (2004: £75 million profit) for the first quarter to June 30, 2005.

The operating profit for the first quarter was £176 million (2004: £129 million profit) delivering an operating margin of 8.5 per cent (2004: 6.8 per cent).

Sir Rod Eddington, British Airways' chief executive, said: "These are good results despite a

37.6 per cent increase in fuel costs. The improvement in passenger revenue is driven by more customers flying in our premium cabins.

"During the quarter we continued to improve the service we offer to our customers. Online customers can now book hotels, car hire and sightseeing tours on ba.com, as well as flights, in a single transaction. Online boarding passes are now accepted at 53 airports and the use of e-tickets continues to rise with 94 per cent of our customers using them on eligible routes.

"We began new services to Shanghai, announced plans to increase flights to India and will next year add four new European destinations to our network. We have fitted our award winning Club World flat beds on four Boeing 767s. We have improved our Skyflyers service for families with a refurbished lounge at Heathrow Terminal 1. We were also delighted to back the winning bid to stage the Olympics in London in 2012.

"Finally, these are my last quarterly financial results at the airline and I would like to thank our staff for their support during the last five years. Their commitment to rebuilding our business has helped return British Airways to the top of the airline operating profit league table.

"There is still much work to be done to achieve a 10 per cent operating margin and I am confident that under Willie Walsh's leadership, our people will continue to rise to the challenge."

Martin Broughton, British Airways' chairman, said: "Record passenger loads in July indicate that the short term impact of the London bombings was not material although it is too early to say what the long term impact will be. When taken together with the uncertain economic outlook and volatility in both fuel prices and the US Dollar exchange rate, accurate forecasting is even more of a challenge than usual. Market conditions, however, remain broadly unchanged.

"The continuing strength of the US Dollar and increased surcharges have improved the revenue outlook. We now expect total revenue for the year to March 2006 to grow by 5.5 - 6.5 per cent. Capacity and volume are still expected to increase by about 3 per cent with total yield flat.

"We now expect fuel costs, net of hedging, to be about £525 million more than last year, a further increase of £75 million, largely driven by the stronger US Dollar."

In a tribute to Sir Rod Eddington, he added: "British Airways has become a leaner and more robust company under Rod's leadership, with a loyal, motivated workforce. His legacy is the culture change he has introduced across the company, in particular, the widespread acceptance and understanding of the need to achieve a 10 per cent operating margin."

Passenger capacity, measured in available seat kilometres (ASKs), increased by 1.5 per cent for the quarter and revenue passenger kilometres (RPKs) were up 2.5 per cent. Seat factor was up 0.7 points at a record 75.6 per cent in the quarter.

Yield measured as pence per RPK increased by 1.5 per cent - driven by more premium traffic.

Cargo volumes, measured in cargo tonne kilometres (CTKs), were down 2.6 per cent compared with last year, with yields up 2.7 per cent. Overall load factor was 69 per cent, down 0.2 points on last year.

Pre-tax profit of £124 million

Total costs were up by 6.2 per cent largely driven by a 37.6 per cent increase in the cost of fuel. Selling costs reduced by 21.7 per cent due to travel agents' commission restructuring and increased online sales. Net unit costs improved by 0.1 per cent in the same period.

Employee costs rose 5.4 per cent reflecting wage awards and increased pension costs, only partially offset by manpower reductions.

Revenue in the quarter, at £2.1 billion, was up 8.3 per cent. Net debt was £2,527 million, down £395 million since the start of the financial year.

Notes to Editors

- Plans for new European routes from Gatwick include Grenoble this year and Tirana, Varna, Izmir and Reykjavik next year.
- For all periods up to and including March 2005, British Airways has previously prepared its Group financial statements under UK Generally Accepted Accounting Practice (UK GAAP).
- British Airways restated its 2004/05 accounts to International Financial Reporting Standards (IFRS). The restated accounts were published on July 4, 2005. All comparators referred to are based on these restated accounts.

A webcast of British Airways' conference call to city analysts can be accessed via the internet www.bashares.com - on Friday, August 5 at 2pm.

Certain information included in this statement is forward-looking and involves risks and uncertainties that could cause actual results to differ materially from those expressed or implied by the forward looking statements.

Forward-looking statements include, without limitation, projections relating to results of operations and financial conditions and the Company's plans and objectives for future operations, including, without limitation, discussions of the Company's 'Future Size and Shape' programme, expected future revenues, financing plans and expected expenditures and divestments. All forward-looking statements in this report are based upon information known to the Company on the date of this report. The Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

It is not reasonably possible to itemise all of the many factors and specific events that could cause the Company's forward looking statements to be incorrect or that could otherwise have a material adverse effect on the future operations or results of an airline operating in the global economy. Information on some factors which could result in material difference to the results is available in the Company's SEC filings, including, without limitation the Company's Report on Form 20-F for the year ended March 2005.

CHAIRMAN'S STATEMENT

International Financial Reporting Standards

British Airways consolidated financial statements are now prepared under International Financial Reporting Standards (IFRS). As permitted under IFRS 1, the group decided to defer the adoption of IAS 39 and IAS 32 until April 1, 2005. As a consequence the comparative information for 2004/05 (published on July 4, 2005) was prepared applying IFRS standards with the exception of IAS 32 and 39 - these standards are applied for the first time this quarter. (The basis of preparation is detailed on page 8).

Group Performance

Group profit before tax for the three months to June 30 was £124 million; this compares with a profit of £75 million last year.

Operating profit - - at £176 million - - was £47 million better than last year. The improvement in operating profit primarily reflects an increase in passenger revenue, partially offset by the increase in the cost of fuel net of fuel surcharges and higher engineering and employment costs.

The operating margin was 8.5%, 1.7 points better than last year.

Cash inflow from operating activities was £349 million for the quarter, with closing cash, cash equivalents and short term deposits at £1,936 million representing a £254 million increase versus March 31. Net debt fell by £395 million from March 31, 2005 to £2,527 million.

Turnover

For the three month period, Group turnover - - at £2,059 million - - was up 8.3%, including passenger revenue up 4.0%. The flying programme was 1.2% larger in ATKs. Passenger yield (pence per RPK) for the three months improved by 1.5% compared with last year, largely driven by cabin mix; seat factor was up 0.7 points at a record 75.6% on capacity 1.5% higher in ASKs.

Cargo revenue was flat compared with last year, reflecting yields up 2.7%, offset by reduced volumes (CTKs were down 2.6%).

Overall load factor was down 0.2 points at 69.0%.

Costs

For the quarter, group net unit costs (pence/ATK) improved by 0.1% on the same period last year. This reflects the net cost increase of 1.1% on capacity 1.2% higher in ATKs.

Total expenditure from operations was up by 6.2%. Fuel costs increased by 37.6% due to increases in fuel price net of hedging partially offset by exchange; engineering costs increased by 21.9% due primarily to the phasing of engine inputs and costs for an additional cargo freighter; employee costs increased by 5.4% mainly reflecting wage awards and increased pension service costs, only partially offset by manpower reductions. These increases were partially offset by continued reductions in selling costs, down 21.7% due to agents' commission restructuring and increased online sales.

Non Operating Items

Interest expense reduced by £7 million from last year to £59 million reflecting the impact of lower debt. Interest income at £21 million was £3 million higher than last year reflecting higher cash balances.

Retranslation of currency borrowings generated a charge of £9 million, (prior year: £12 million credit), due to the retranslation of dollar and yen debt. The retranslation - - a non-cash item required by standard accounting practice - - results from the strengthening of the dollar and yen against sterling.

Loss on disposals of fixed assets and investments was £3 million.

Tax

The tax rate for the quarter was 27%, largely as a result of non-taxable income. The company expects to return to a UK taxpaying position this year, and accordingly we anticipate paying £50 million in Corporation tax in the current year.

Earnings Per Share

The earnings attributable to shareholders for the three months was equivalent to 8.3 pence per share, compared with last year's earnings per share of 3.7 pence.

Net Debt / Total Capital Ratio

Borrowings, net of cash and short term loans and deposits, were £2,527 million at June 30 - - down £395 million since the start of the year (partly due to the conversion of the £112 million of bonds from debt to equity) and £4.1 billion from the December 2001 peak. The net debt/total capital ratio reduced by 9.1 points from March 31 to 58.6%. The net debt/total capital ratio including operating leases was 65.0%, a 7.4 point reduction from March 31. The reduction in adjusted gearing is partly due to the conversion of the convertible capital bonds from debt to equity (2.2 points) and partly due to the adoption of IAS 39 from April 1, 2005. The adoption of IAS 39 resulted in equity increasing by £183 million versus last year, and gearing reducing by 2.4 points.

Cash Flow

During the quarter we generated a positive cash flow from operating activities of £349 million, £28 million higher than last year. Including current interest bearing deposits, the cash position at June 30, 2005 was £1.9 billion, an increase of £254 million compared with March 31, 2005.

Aircraft Fleet

During the quarter the Group fleet in service reduced by three to 287 aircraft, following the sale of a BAe 146 and returns to lessors of a Boeing 737-500 aircraft and a de Havilland Canada DHC-8 aircraft.

Outlook

Record passenger loads in July indicate that the short term impact of the London bombings was not material although it is too early to say what the long term impact will be. When taken together with the uncertain economic outlook and volatility in both fuel prices and the US Dollar exchange rate, accurate forecasting is even more of a challenge than usual.

Market conditions, however, remain broadly unchanged.

The continuing strength of the US Dollar and increased surcharges have improved the revenue outlook. We now expect total revenue for the year to March 2006 to grow by 5.5 - 6.5%. Capacity and volume are still expected to increase by about 3% with total yield flat.

We now expect fuel costs, net of hedging, to be about £525 million more than last year, a further increase of £75 million, largely driven by the stronger US Dollar.

As announced in our latest Business Plan, our focus is on preparing for the move to Terminal 5 in 2008, investing in products for our customers and continuing to drive simplification to deliver a competitive cost base.

Certain information included in these statements is forward-looking and involves risks and uncertainties that could cause actual results to differ materially from those expressed or implied by the forward looking statements.

Forward-looking statements include, without limitation, projections relating to results of operations and financial conditions and the Company's plans and objectives for future operations, including, without limitation, discussions of the Company's Business Plan programs, expected future revenues, financing plans and expected expenditures and divestments. All forward-looking statements in this report are based upon information known to the Company on the date of this report. The Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

It is not reasonably possible to itemize all of the many factors and specific events that could cause the Company's forward looking statements to be incorrect or that could otherwise have a material adverse effect on the future operations or results of an airline operating in the global economy. Information on some factors which could result in material difference to the results is available in the Company's SEC filings, including, without limitation the Company's Report on Form 20-F for the year ended March 2005.

NOTES TO THE ACCOUNTS (unaudited)

For the period ended June 30, 2005

1 BASIS OF PREPARATION

These summary financial statements have been prepared in accordance with the recognition and measurement criteria of International Financial Reporting Standards (IFRS)* issued by the International Accounting Standards Board (IASB) and with those of the Standing Interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) of the IASB with the exception of the disclosure requirements of IAS 34 - 'Interim Reporting'. The accounting policies and basis of preparation differ from those set out in the Report and Accounts for the year ended March 31, 2005 which were prepared in accordance with United Kingdom accounting standards and the Companies Act 1985 (UK GAAP).

A summary of the significant accounting policies used in the preparation of these financial statements under IFRS and a summary of the impact of the change from UK GAAP to IFRS on comparative periods as required by IFRS 1 - 'First-time adoption of International Financial Reporting Standards' were included in the group's 'Release of financial information for 2004/05 under International Financial Reporting Standards' published on July 4, 2005. The release included the quarterly results for the quarters ended June 30, 2004, September 30, 2004, December 31, 2004 and

March 31, 2005 restated under the recognition and measurement rules of IFRS and a summary of the significant differences to UK GAAP. The release also included restated balance sheets at those dates in addition to the restated balance sheet at April 1, 2004, the group's transition date to IFRS.

As permitted under IFRS 1, the group elected to apply the requirements of IAS 32 - 'Financial Instruments - Disclosure and Presentation' and IAS 39 - 'Financial Instruments - Recognition and Measurement' from April 1, 2005. As a consequence certain assets and liabilities are required to be recognised and measured at fair value. As a result of the application of IAS 39 the opening net assets of the group increased by £183 million at April 1, 2005. The increase represents the fair value of financial instruments and available for sale financial assets (£193 million, net of deferred tax), partially offset by the impact of the group's share of the opening reserves adjustments of associated undertakings (£10 million). The adoption of IAS 32 had no impact on the reserves or net assets of the group except for minor presentational differences between minority interests and shareholders' equity.

Under IAS 39, financial instruments are recorded initially at fair value. Subsequent measurement of those instruments at the balance sheet date reflects the designation of the financial instrument.

Listed investments (other than interests in associates) are designated as available-for-sale assets and are recorded at fair value. Any change in the fair value is reported in reserves until the investment is sold when the cumulative reserves movement is recognised in income. Any provisions for impairment of the carrying value are reflected in income when they arise. Exchange gains and losses on monetary items are taken to income unless the item has been designated as a hedging instrument. Exchange gains and losses on non-monetary investments are reflected in reserves until the investment is sold when the balance is recognised in income.

Derivative financial instruments, comprising interest rate swap agreements, foreign exchange derivatives and fuel hedging derivatives (including options, swaps and collars) are measured at fair value on the group balance sheet. Changes in the fair value are reported through operating income or financing according to the nature of the derivative financial instrument unless the derivative financial instrument has been designated as a hedge of a highly probable expected future cashflow. Gains and losses on forward exchange contracts to hedge capital expenditure commitments are recognised as part of the total sterling carrying cost of the relevant tangible asset as the contracts mature or are closed out. Gains and losses on derivative financial instruments designated as hedging instruments that are expected to be highly effective at inception and were highly effective for the period are taken to reserves and reflected in the income statement when the cashflow either occurs or ceases to be highly probable.

Certain loan repayment instalments denominated in US dollars and Japanese yen are designated as hedges of highly probable future foreign currency revenues. Exchange differences arising from the translation of these loan repayment instalments are taken to reserves until the future revenue occurs when the cumulative exchange difference is recognised in income.

The hedging relationships are tested for effectiveness in accordance with IAS 39 - 'Financial Instruments'.

Long term borrowings, finance leases and hire purchase agreements are recorded at amortised cost. Certain leases contain interest rate swaps that are closely related to the underlying financing and, as such, are not accounted for as an embedded derivative. The carrying value of the interest rate swap is reflected within the carrying value of the long term borrowing.

NOTES TO THE ACCOUNTS (unaudited) (Continued)

For the period ended June 30, 2005

BASIS OF PREPARATION (continued)

The financial information presented has been prepared on the basis of those Standards and Interpretations of the International Financial Reporting Interpretations Committee (IFRIC) and Standing Interpretations Committee (SIC) that are expected to be applicable to 2005/06 financial reporting. These are subject to ongoing review and endorsement by the European Commission, whilst the application of the Standards continues to be subject to interpretation by IFRIC as well as emerging industry consensus. As a consequence, further adjustments to the accounting policies and treatments may need to be made in the first complete set of IFRS financial statements for 2005/06 for the year ending March 31, 2006.

These financial statements have been prepared on a historical cost convention except for certain financial assets and liabilities, including derivative financial instruments and available-for-sale financial assets, that are measured at fair value. The carrying value of recognised assets and liabilities that are hedged are adjusted to record changes in the fair values attributable to the risks that are being hedged.

* For the purposes of these statements IFRS also include International Accounting Standards (IAS).

2 FINANCE COSTS / INCOME

	2005 £m	Three months ended June 30 2004 £m
INTEREST EXPENSE		
Interest payable on bank and other loans and finance charges payable under finance leases and hire purchase contracts	59	66
Interest capitalised		
Total interest costs	59	66

Balance at April 1	940	557	557
Transitional effects from the adoption of IAS 39 and IAS 32	383		
Profit for the period	90	43	392
Distributions to perpetual preferred security holders	(3)	(3)	(14)
Conversion of Convertible Capital Bonds 2005	100		
Exchange and other movements	2	(20)	5
	1,512	577	940

9 The figures for the three months ended June 30, 2005 and 2004 are unaudited and do not constitute full accounts within the meaning of Section 240 of the Companies Act 1985. The financial statements for the year ended March 31, 2005 have been delivered to the Registrar of Companies and on which the auditors have issued an unqualified audit report and did not contain a statement under Section 237 of the Companies Act 1985.

INDEPENDENT REVIEW REPORT TO BRITISH AIRWAYS Plc

Introduction

We have been instructed by the Company to review the financial information for the three months ended June 30, 2005, which comprises the Consolidated Income Statement, Consolidated Balance Sheet, Consolidated Cash Flow Statement and Notes to the Accounts. We have read the other information contained in the first quarter results and considered whether it contains any apparent misstatements or material inconsistencies with the financial information.

This report is made solely to the Company in accordance with guidance contained in Bulletin 1999/4 'Review of Interim Financial Information' issued by the Auditing Practices Board. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company, for our work, for this report, or for the conclusions we have formed.

Directors' responsibilities

The first quarter results, including the financial information contained therein, is the responsibility of, and has been approved by the directors. The directors are responsible for preparing the interim report in accordance with the Listing Rules of the Financial Services Authority.

As disclosed in note 1, the next annual financial statements of the Group will be prepared in accordance with those IFRSs adopted for use by the European Union.

The accounting policies are consistent with those that the directors intend to use in the next financial statements. There is, however, a possibility that the directors may determine that some changes to these policies are necessary when preparing the full annual financial statements for the first time in accordance with those IFRS adopted for use by the European Union.

Review work performed

We conducted our review in accordance with guidance contained in Bulletin 1999/4 'Review of interim financial information' issued by the Auditing Practices Board for use in the United Kingdom. A review consists principally of making enquiries of Group management and applying analytical procedures to the financial information and underlying financial data, and based thereon, assessing whether the accounting policies have been applied. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is

substantially less in scope than an audit performed in accordance with United Kingdom Auditing Standards and therefore provides a lower level of assurance than an audit.

Accordingly we do not express an audit opinion on the financial information.

Review conclusion

On the basis of our review we are not aware of any material modifications that should be made to the financial information as presented for the three months ended June 30, 2005.

UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES (US GAAP) INFORMATION

(unaudited and for information only)

The accounts have been prepared in accordance with the measurement and recognition requirements of International Financial Reporting Standards (IFRS) that differ in certain respects from those generally accepted in the United States.

The group has restated the comparatives to recognise the adoption of IFRS.

The adjusted net income and shareholders' equity applying US GAAP are set out below:

	2005 £m	Three months ended June 30 2004 £m
Profit for the period as reported in the Group profit and loss account	90	43
US GAAP adjustments	(59)	15
Net income as so adjusted to accord with US GAAP	31	58
Net income per Ordinary Share as so adjusted		
Basic	2.9p	5.4p
Diluted	2.7p	5.4p
Net income per American Depositary Share as so adjusted		
Basic	29p	54p
Diluted	27p	54p

Outlook

	2005 £m	June 30 2004 £m	March 31 2005 £m
Shareholders' equity and minority interests as reported in the Group balance sheet	1,783	1,028	1,397
US GAAP adjustments	530	980	766
Shareholders' equity and minority interests as so adjusted to accord with US GAAP	2,313	2,008	2,163
