

Seneca Foods Corp
Form 10-K
June 08, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of
The Securities Exchange Act of 1934

For the fiscal year ended March 31, 2012 Commission File Number 0-01989

SENECA FOODS CORPORATION
(Exact name of registrant as specified in its charter)

New York 16-0733425
(State or other jurisdiction of (I.R.S. Employer Identification No.)
incorporation or organization)

3736 South Main Street, Marion, New York 14505
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area (315) 926-8100
code

Securities registered pursuant to Section 12(b) of the Exchange Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Stock Class A, \$.25 Par	NASDAQ Global Market
Common Stock Class B, \$.25 Par	NASDAQ Global Market

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No X

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Edgar Filing: Seneca Foods Corp - Form 10-K

Yes No X

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes X No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes X No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. X

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer X Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act)

Yes No X

The aggregate market value of the Registrant's voting and non-voting common equity held by non-affiliates based on the closing sales price per market reports by the NASDAQ Global Market System on October 1, 2011 was approximately \$194,707,000.

As of May 26, 2012, there were 9,595,437 shares of Class A common stock and 2,097,312 shares of Class B common stock outstanding.

Documents Incorporated by Reference:

- (1) Portions of the Annual Report to shareholders for fiscal year ended March 31, 2012 (the "2012 Annual Report") applicable to Part I, Item 1, Part II, Items 5-9A and Part IV, Item 15 of Form 10-K.
- (2) Portion of the Proxy Statement to be issued in connection with the Registrant's annual meeting of stockholders (the "Proxy Statement") applicable to Part III, Items 10-14 of Form 10-K.

Forward-Looking Statements

Certain of the statements contained in this annual report on Form 10-K are forward-looking statements made within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 (Exchange Act). Forward-looking statements involve numerous risks and uncertainties. Forward-looking statements are not in the present or past tense and, in some cases, can be identified by the use of the words "will," "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "seeks," "should," "likely," "targets," "may", "can" and other expressions that indicate future trends and events. A forward-looking statement speaks only as of the date on which such statement is made and reflects management's analysis only as of the date thereof. The Company undertakes no obligation to update any forward-looking statement. The following factors, among others discussed herein and in the Company's filings under the Exchange Act, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: costs and availability of raw materials, competition, cost controls, sales levels, governmental regulation, consumer preferences, industry trends, weather conditions, crop yields, natural disasters, recalls, litigation, reliance on third-parties, wage rates, and other factors. See also the factors described in "Part I, Item 1A. Risk Factors" and elsewhere in this report, and those described in the Company's filings under the Exchange Act.

PART I

Item 1

Business

History and Development of Seneca Foods Corporation

SENECA FOODS CORPORATION (the "Company") is a leading low cost producer and distributor of high quality processed fruits and vegetables. The Company's product offerings include canned, frozen and bottled produce and snack chips and its products are sold under private label as well as national and regional brands that the Company owns or licenses, including Seneca, Libby's, Aunt Nellie's Farm Kitchen, Stokely's, Read, Taste of the West, Cimarron, and Tendersweet. The Company packs Green Giant, Le Sueur and other brands of canned vegetables as well as select Green Giant frozen vegetables for General Mills Operations, LLC ("GMOL") under our long-term Alliance Agreement that was amended and restated during the second quarter of fiscal year 2010.

As of March 31, 2012, the Company's facilities consisted of 21 processing plants strategically located throughout the United States, two can manufacturing plants, two seed processing operations, a small farming operation and a limited logistical support network. The Company also maintains warehouses which are generally located adjacent to its processing plants. The Company is a New York corporation and its headquarters is located at 3736 South Main Street, Marion, New York and its telephone number is (315) 926-8100.

The Company was founded in 1949 and during its 63 years of operation, the Company has made over 50 strategic acquisitions including the purchase of the long-term license for the Libby's brand in 1983, the purchase of General Mills' Green Giant processing assets and entry into the Alliance Agreement with GMOL in 1995 and the acquisition of Chiquita Processed Foods in 2003. The Company believes that these acquisitions have enhanced the Company's leadership position in the private label and foodservice canned vegetable markets in the United States and significantly increased its international sales. In August 2006, the Company acquired Signature Fruit Company, LLC, a leading producer of canned fruits located in Modesto, California. This acquisition allowed the Company to broaden its product offerings to become a leading producer and distributor of canned fruit and to achieve cost advantages through the realization of distribution and other synergies with the Company's canned vegetable business. In August 2010, the Company acquired 100% of the partnership interest in Lebanon Valley Cold Storage, LP and the assets of Unilink, LLC (collectively "Lebanon") from Pennsylvania Food Group, LLC and related entities. The rationale for the

acquisition was twofold: (1) to broaden the Company's product offerings in the frozen food business; and (2) to take advantage of distribution efficiencies by combining shipments since the customer bases of the Company and Lebanon are similar.

Available Information

The Company's Internet address is www.senecafoods.com. The Company's annual report on Form 10-K, the Company's quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act are available on the Company's web site, as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. All such filings on the Company's web site are available free of charge.

In addition, the Company's website includes items related to corporate governance matters, including charters of various committees of the Board of Directors and the Company's Code of Business Conduct and Ethics. The Company intends to disclose on its website any amendment to or waiver of any provision of the Code of Business Conduct and Ethics that would otherwise be required to be disclosed under the rules of the SEC and NASDAQ.

Financial Information about Industry Segments

The Company manages its business on the basis of two reportable segments – the primary segment is the processing and sale of fruits and vegetables and the secondary segment is the processing and sale of chip products. These two segments constitute the food operation. The food operation constitutes 98% of total sales, of which approximately 69% is canned vegetable processing, 18% is canned fruit processing, 12% is frozen fruit and vegetable processing and 1% is fruit chip processing. The non-food operation, which is primarily related to the sale of cans and ends and outside revenue generated from our trucking and aircraft operations, represents 2% of the Company's total sales.

Narrative Description of Business

Principal Products and Markets

Food Processing

The principal products include canned fruits and vegetables, frozen vegetables and other food products. The products are sold nationwide by major grocery outlets, including supermarkets, mass merchandisers, limited assortment stores, club stores and dollar stores. Additionally, products are sold to food service distributors, industrial markets, other food processors, export customers in 80 countries and federal, state and local governments for school and other feeding programs. Food processing operations are primarily supported by plant locations in New York, California, Wisconsin, Washington, Idaho, Illinois, and Minnesota. See Note 13 of Item 8, Financial Statements and Supplementary Data, for additional information about the Company's segments.

The following table summarizes net sales by major product category for the years ended March 31, 2012, 2011, and 2010:

Classes of similar products/services:	2012	2011	2010
	(In thousands)		
Net Sales:			
GMOL *	\$ 166,231	\$ 191,526	\$ 239,622
Canned vegetables	746,535	692,574	750,751
Frozen *	96,870	86,904	48,320
Fruit	220,788	195,427	200,391
Snack	11,730	10,604	21,287
Other	19,667	17,577	19,739
Total	\$ 1,261,821	\$ 1,194,612	\$ 1,280,110

* GMOL includes frozen vegetable sales exclusively for GMOL.

Source and Availability of Raw Materials

The Company's food processing plants are located in major vegetable producing states and in two fruit producing states. Fruits and vegetables are primarily obtained through supply contracts with independent growers.

Intellectual Property

The Company's most significant brand name, Libby's®, is held pursuant to a trademark license granted to the Company in March 1982 and renewable by the Company every 10 years for an aggregate period expiring in March 2081. The original licensor was Libby, McNeill & Libby, Inc., then an indirect subsidiary of Nestlé, S. A. ("Nestlé") and the license was granted in connection with the Company's purchase of certain of the licensor's canned vegetable operations in the United States. Corlib Brands Management, LTD acquired the license from Nestlé during 2006. The license is limited to vegetables which are shelf-stable, frozen, and thermally processed, and includes the Company's major vegetable varieties – corn, peas and green beans – as well as certain other thermally processed vegetable varieties and sauerkraut.

The Company is required to pay an annual royalty and Corlib Brands may terminate the license for non-payment of royalty, use of the trademark in sales outside the licensed territory, failure to achieve a minimum level of sales under the licensed trademark during any calendar year or a material breach or default by the Company under the agreement (which is not cured within the specified cure period). With the purchase of Signature Fruit Company, LLC, which also uses the Libby's® brand name, the Company re-negotiated the license agreement and created a new, combined agreement based on Libby's® revenue dollars for fruits, vegetables, and dry beans. A total of \$271,000 was paid as a royalty fee for the year ended March 31, 2012.

The Company also sells canned fruits and vegetables, frozen vegetables and other food products under several other brands for which the Company has obtained registered trademarks, including Blue Boy®, Aunt Nellie's Farm Kitchen®, Stokely®, Read®, Festal®, Seneca Farms®, and Seneca® and other regional brands.

Seasonal Business

While individual fruits and vegetables have seasonal cycles of peak production and sales, the different cycles are somewhat offsetting. Minimal food processing occurs in the Company's last fiscal quarter ending March 31, which is

the optimal time for maintenance, repairs and equipment changes in its processing plants. The supply of commodities, current pricing, and expected new crop quantity and quality affect the timing and amount of the Company's sales and earnings. When the seasonal harvesting periods of the Company's major fruits and vegetables are newly completed, inventories for these processed fruits and vegetables are at their highest levels. For peas, the peak inventory time is mid-summer and for corn, the Company's highest volume vegetable, the peak inventory is in mid-autumn. For peaches, the Company's highest volume fruit, the peak inventory time is early-autumn. For pears, the peak inventory is late-summer.

These seasonal fluctuations, are illustrated in the following table, which presents certain unaudited quarterly financial information for the periods indicated:

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
	(In thousands)			
Year ended March 31, 2012:				
Net sales	\$259,083	\$283,616	\$447,918	\$271,204
Gross margin	5,856	21,353	50,037	15,573
Net (loss) earnings	(7,975)	2,883	18,530	(2,182)
Inventories	431,862	733,143	537,863	432,433
Revolver outstanding	115,460	237,413	206,346	144,149
Year ended March 31, 2011:				
Net sales	\$219,942	\$275,448	\$446,250	\$252,972
Gross margin	25,284	19,127	34,514	14,300
Net earnings (loss)	5,275	2,811	11,462	(1,877)
Inventories	467,569	757,783	545,072	455,236
Revolver outstanding	92,126	195,000	180,095	135,763

Backlog

In the food processing business, an end of year sales order backlog is not considered meaningful. Traditionally, larger customers provide tentative bookings for their expected purchases for the upcoming season. These bookings are further developed as data on the expected size of the related national harvests becomes available. In general, these bookings serve as a yardstick rather than as a firm commitment, since actual harvest results can vary notably from early estimates. In actual practice, the Company has substantially all of its expected seasonal production identified to potential sales outlets before the seasonal production is completed.

Competition and Customers

Competition in the food business is substantial with brand recognition and promotion, quality, service, and pricing being the major determinants in the Company's relative market position. The Company believes that it is a major producer of canned fruits and vegetables, but some producers of canned, frozen and other forms of fruit and vegetable products have sales which exceed the Company's sales. The Company is aware of approximately 16 competitors in the U.S. processed vegetable industry, many of which are privately held companies. The Company is aware of approximately eight competitors in the U.S. processed fruit industry. In addition, there are significant quantities of fruit that are imported from Europe, Asia and South America.

During the past year, approximately 9% of the Company's processed foods sales were packed for retail customers under the Company's branded labels of Libby's®, Blue Boy®, Aunt Nellie's Farm Kitchen®, Stokely®, Read®, Festal®, Seneca Farms™, and Seneca®. About 23% of processed foods sales were packed for institutional food distributors and 55% were retail packed under the private label of our customers. The remaining 13% was sold under the Alliance Agreement with GMOL (see note 13 of Item 8, Financial Statements and Supplementary Data). Termination of the Alliance Agreement would substantially reduce the Company's sales and profitability unless the Company was to enter into a new substantial supply relationship with GMOL or another major vegetable marketer. The non-Alliance customers represent a full cross section of the retail, institutional, distributor, and industrial markets; and the Company does not consider itself dependent on any single sales source other than sales attributable to the Alliance Agreement.

The Company's principal branded products are its Libby's canned fruit and vegetable products, which rate among the top five national brands according to a leading market research firm.

The information under the heading "Results of Operations in Management's Discussion and Analysis of Financial Condition and Results of Operations" in the 2012 Annual Report is incorporated by reference.

Environmental Regulation

Environmental Protection

Environmental protection is an area that has been worked on diligently at each food processing facility. In all locations, the Company has cooperated with federal, state, and local environmental protection authorities in developing and maintaining suitable antipollution facilities. In general, we believe our pollution control facilities are equal to or somewhat superior to those of our competitors and are within environmental protection standards. The Company does not expect any material capital expenditures to comply with environmental regulations in the near future.

There has been a broad range of proposed and promulgated state, national and international regulations aimed at reducing the effects of climate change. In the United States, there is a significant possibility that some form of regulation will be forthcoming at the federal level to address the effects of climate change. Such regulation could result in the creation of additional costs in the form of taxes, the restriction of output, investments of capital to maintain compliance with laws and regulations, or required acquisition or trading of emission allowances.

Environmental Litigation and Contingencies

In the ordinary course of its business, the Company is made a party to certain legal proceedings seeking monetary damages, including proceedings involving product liability claims, worker's compensation and other employee claims, tort and other general liability claims, for which it carries insurance as well as patent infringement and related litigation. The Company is in a highly regulated industry and is also periodically involved in government actions for regulatory violations and other matters surrounding the manufacturing of its products, including, but not limited to, environmental, employee, and product safety issues. While it is not feasible to predict or determine the ultimate outcome of these matters, the Company does not believe that an adverse decision in any of these legal proceedings would have a material adverse impact on its financial position, results of operations, or cash flows.

Employment

At our fiscal year end 2012, the Company had approximately 3,400 employees of which 2,900 full time and 400 seasonal employees work in food processing and 100 full time employees work in other activities. The number increases to approximately 10,000 due to an increase in seasonal employees during our peak pack season.

The Company has six collective bargaining agreements with three unions covering approximately 900 of its full-time employees. The terms of these agreements result in wages and benefits which are substantially the same for comparable positions for the Company's non-union employees. There is one agreement that will expire this year and is currently under negotiation. There are 2 agreements that will expire in calendar 2014, two agreements in calendar 2015 and one agreement in calendar 2016.

Domestic and Export Sales

The following table sets forth domestic and export sales:

	2012	Fiscal Year 2011		2010		
	(In thousands, except percentages)					
Net Sales:						
United States	\$1,143,073	\$1,088,036		\$1,178,553		
Export	118,748	106,576		101,557		
Total Net Sales	\$1,261,821	\$1,194,612		\$1,280,110		
As a Percentage of Net Sales:						
United States	90.6	%	91.1	%	92.1	%
Export	9.4	%	8.9	%	7.9	%
Total	100.0	%	100.0	%	100.0	%

Item 1A

Risk Factors

The following factors as well as factors described elsewhere in this Form 10-K or in other filings by the Company with the Securities and Exchange Commission, could adversely affect the Company's consolidated financial position, results of operations or cash flows. Other factors not presently known to us or that we presently believe are not material could also affect our business operations or financial results. The Company refers to itself as "we", "our" or "us" in this section.

Fruit and Vegetable Processing Risks

Excess capacity in the fruit and vegetable industry has a downward impact on selling price.

Our financial performance and growth are related to conditions in the United States' fruit and vegetable processing industry which is a mature industry with a modest growth rate during the last 10 years. Our net sales are a function of product availability and market pricing. In the fruit and vegetable processing industry, product availability and market prices tend to have an inverse relationship: market prices tend to decrease as more product is available and to increase if less product is available. Product availability is a direct result of plantings, growing conditions, crop yields and

inventory levels, all of which vary from year to year. Moreover, fruit and vegetable production outside the United States, particularly in Europe, Asia and South America, is increasing at a time when worldwide demand for certain products, such as peaches, is being impacted by the global economic slowdown. These factors may have a significant effect on supply and competition and create downward pressure on prices. In addition, market prices can be affected by the planting and inventory levels and individual pricing decisions of our competitors. Generally, market prices in the fruit and vegetable processing industry adjust more quickly to variations in product availability than an individual processor can adjust its cost structure; thus, in an oversupply situation, a processor's margins likely will weaken. We typically have experienced lower margins during times of industry oversupply.

In the past, the fruit and vegetable processing industry has been characterized by excess capacity, with resulting pressure on our prices and profit margins. We have closed processing plants in past years in response to the downward pressure on prices. There can be no assurance that our margins will improve in response to favorable market conditions or that we will be able to operate profitably during depressed market conditions.

Growing cycles and adverse weather conditions may decrease our results from operations.

Our operations are affected by the growing cycles of the fruits and vegetables we process. When the fruits and vegetables are ready to be picked, we must harvest and process them quickly or forego the opportunity to process fresh picked fruits and vegetables for an entire year. Most of our fruits and vegetables are grown by farmers under contract with us. Consequently, we must pay the contract grower for the fruits and vegetables even if we cannot or do not harvest or process them. Most of our production occurs during the second quarter (July through September) of our fiscal year, which corresponds with the quarter that the growing season ends for most of the produce processed by us. A majority of our sales occur during the third and fourth quarters of each fiscal year due to seasonal consumption patterns for our products. Accordingly, inventory levels are highest during the second and third quarters, and accounts receivable levels are highest during the third and fourth quarters. Net sales generated during our third and fourth fiscal quarters have a significant impact on our results of operations. Because of these seasonal fluctuations, the results of any particular quarter, particularly in the first half of our fiscal year, will not necessarily be indicative of results for the full year or for future years.

We set our planting schedules without knowing the effect of the weather on the crops or on the entire industry's production. Weather conditions during the course of each fruit and vegetable crop's growing season will affect the volume and growing time of that crop. As most of our vegetables are produced in more than one part of the U.S., this somewhat reduces the risk that our entire crop will be subject to disastrous weather. The upper Midwest is the primary growing region for the principal vegetables which we pack, namely peas, green beans and corn, and it is also a substantial source of our competitors' vegetable production. California is the primary growing region for the fruits we pack, namely peaches, pears, apricots and grapes. The adverse effects of weather-related reduced production may be partially mitigated by higher selling prices for the fruits and vegetables which are produced.

The commodity materials that we process or otherwise require are subject to price increases that could adversely affect our profitability.

The materials that we use, such as fruits and vegetables, steel (used to make cans), ingredients and packaging materials as well as the electricity and natural gas used in our business, are commodities that may experience price volatility caused by external factors, including market fluctuations, availability, currency fluctuations and changes in governmental regulations and agricultural programs. For example, demand for corn has been significantly affected by U.S. governmental policies designed to encourage the production of ethanol, which is diverting acreage previously used for the production of food for human consumption. The Federal Farm Bill further restricts available acreage by prohibiting the planting of fruits and vegetables on "base" acres used for soybeans and field corn, although a trial program that reduces the impact of the prohibition may be helpful in increasing available acreage. General inventory positions of major commodities, such as field corn, soybeans and wheat, all commodities with which we must compete for acreage, can have dramatic effects on prices for those commodities, which can translate into similar swings in prices needed to be paid for our contracted commodities. These programs and other events can result in reduced supplies of these commodities, higher supply costs or interruptions in our production schedules. If prices of these commodities increase beyond what we can pass along to our customers, our operating income will decrease.

Risks Associated With Our Operations

The termination or non-renewal of the Alliance Agreement with GMOL could negatively affect our business and operations.

We have an Alliance Agreement with GMOL, whereby we process canned and frozen vegetables for GMOL, primarily under the Green Giant brand name. GMOL continues to be responsible for all of the sales, marketing and customer service functions for the Green Giant products. General Mills, Inc. guarantees various GMOL financial obligations under the Alliance Agreement.

The Alliance Agreement ends December 31, 2019 but may be extended indefinitely unless terminated by either party in accordance with the provisions of the Alliance Agreement. We are subject to extensive covenants in the Alliance Agreement with respect to quality and delivery of products, maintenance of the Alliance Agreement production plants and other standards of our performance. If we were to fail in our performance of these covenants, GMOL would be entitled to terminate the Alliance Agreement. Upon virtually all of the causes of termination enumerated in the Alliance Agreement, GMOL will acquire legal title to three production plants and certain of the other assets which we acquired under the Alliance Agreement and various financial adjustments between the parties will occur. If GMOL or the Company terminates the Alliance Agreement without cause, the terminating party must pay a substantial termination payment.

Termination of the Alliance Agreement would, in most cases, entitle our principal lenders, including our long-term lenders, to declare a default under our loan agreements with them. The principal lenders have a security interest in certain payments that we receive from GMOL both during and upon termination of the Alliance Agreement. Unless we were to enter into a new substantial supply relationship with GMOL or another major vegetable marketer and

acquire substantial production capacity to replace the GMOL production plants, any such termination would substantially reduce our sales and net income and the Company's business, financial condition and results of operations may be materially and adversely affected.

We depend upon key customers.

Our products are sold in a highly competitive marketplace, which includes increased concentration and a growing presence of large-format retailers and discounters. Dependence upon key customers could lead to increased pricing pressure by these customers.

Green Giant products packed by us in fiscal years 2012 and 2011 constituted approximately 13% and 16%, respectively, of our total sales. Our sales of Green Giant product and financial performance under the Alliance Agreement depend to a significant extent on our success in producing quality Green Giant vegetables at competitive costs and GMOL's success in marketing the products produced by us. The ability of GMOL to successfully market these products will depend upon GMOL's sales efforts as well as the factors described above under "Excess capacity in the fruit and vegetable industry has a downward impact on selling price." We cannot give assurance as to the volume of GMOL's sales and cannot control many of the key factors affecting that volume. Sales to GMOL declined \$86 million, from \$252 million to \$166 million, between fiscal year 2003 and fiscal year 2012 based on changes in GMOL's demand for the commodities we produce for them.

Additionally, purchases by the United States Department of Agriculture ("USDA") in fiscal year 2012 represented approximately 5% of our total sales. The purchase of our products by the USDA is done through the government's competitive bid process. We bid on stated product requirements and needs as presented by the USDA and, if we are the successful bidder, we fulfill the contract and deliver the product. The government contracting process is complex and subject to numerous regulations and requirements. Failure by us to comply with the regulations and requirements for government contracts could jeopardize our ability to contract with the government and could result in reduced sales or prohibition on submitting bids to the USDA. The government procurement process could also change and result in our inability to meet the new requirements. Additionally, the government's need for our products could decrease, which would result in reduced sales to the USDA.

If we lose a significant customer or if sales to a significant customer materially decrease, our business, financial condition and results of operations may be materially and adversely affected.

If we do not maintain the market shares of our products, our business and revenues may be adversely affected.

All of our products compete with those of other national and regional food processing companies under highly competitive conditions. The vegetable products which we sell under our own brand names not only compete with vegetable products produced by vegetable processing competitors, but also compete with products we produce and sell to other companies who market those products under their own brand names, such as the Green Giant vegetables we sell to GMOL under the Alliance Agreement and the fruits and vegetables we sell to various retail grocery chains which carry our customer's own brand names.

The customers who buy our products to sell under their own brand names control the marketing programs for those products. In recent years, many major retail food chains have been increasing their promotions, offerings and shelf space allocations for their own fruit and vegetable brands, to the detriment of fruit and vegetable brands owned by the processors, including our own brands. We cannot predict the pricing or promotional activities of our customers/competitors or whether they will have a negative effect on us. There are competitive pressures and other factors, which could cause our products to lose market share or result in significant price erosion that could materially and adversely affect our business, financial condition and results of operations.

Increases in logistics and other transportation-related costs could materially adversely impact our results of operations.

Our ability to competitively serve our customers depends on the availability of reliable and low-cost transportation. We use multiple forms of transportation to bring our products to market. They include trucks, intermodal, rail cars, and ships. Disruption to the timely supply of these services or increases in the cost of these services for any reason, including availability or cost of fuel, regulations affecting the industry, or labor shortages in the transportation industry, could have an adverse effect on our ability to serve our customers, and could materially and adversely affect our business, financial condition and results of operations.

If we are subject to product liability claims, we may incur significant and unexpected costs and our business reputation could be adversely affected.

Food processors are subject to significant liability should the consumption of their products cause injury or illness. We work with regulators, the industry and suppliers to stay abreast of developments. A product liability judgment against us could also result in substantial and unexpected expenditures, affect consumer confidence in our products, and divert management's attention from other responsibilities. Product liability claims may also lead to increased scrutiny by federal and state regulatory agencies and could have a material adverse effect on our financial condition and results of operation. Although we maintain product liability insurance coverage, there can be no assurance that this level of coverage is adequate or that we will be able to continue to maintain our existing insurance or obtain comparable insurance at a reasonable cost, if at all. A product recall or a partially or completely uninsured judgment against us could materially and adversely affect our business, financial condition and results of operations.

We generate agricultural food processing wastes and are subject to substantial environmental regulation.

As a food processor, we regularly dispose of produce wastes (silage) and processing water as well as materials used in plant operation and maintenance, and our plant boilers, which generate heat used in processing, produce generally small emissions into the air. These activities and operations are regulated by federal and state laws and the respective federal and state environmental agencies. Occasionally, we may be required to remediate conditions found by the regulators to be in violation of environmental law or to contribute to the cost of remediating waste disposal sites, which we neither owned nor operated, but in which, we and other companies deposited waste materials, usually

through independent waste disposal companies. Future possible costs of environmental remediation, contributions and penalties could materially and adversely affect our business, financial condition and results of operations.

Our production capacity for certain products and commodities is concentrated in a limited number of facilities, exposing us to a material disruption in production in the event that a disaster strikes.

We only have one plant that produces fruit products and one plant that produces pumpkin products. We have two plants that manufacture empty cans, one with substantially more capacity than the other, which are not interchangeable since each plant cannot necessarily produce all the can sizes needed. Although we maintain property and business interruption insurance coverage, there can be no assurance that this level of coverage is adequate in the event of a catastrophe or significant disruption at these or other Company facilities. If such an event occurs, it could materially and adversely affect our business, financial condition and results of operations.

We may undertake acquisitions or product innovations and may have difficulties integrating them or may not realize the anticipated benefits.

In the future, we may undertake acquisitions of other businesses or introduce new products, although there can be no assurances that these will occur. Such undertakings involve numerous risks and significant investments. There can be no assurance that we will be able to identify and acquire acquisition candidates on favorable terms, to profitably manage or to successfully integrate future businesses it may acquire or new products it may introduce without substantial costs, delays or problems. Any of these outcomes could materially and adversely affect our business, financial condition and results of operations.

We are dependent upon a seasonal workforce and our inability to hire sufficient employees may adversely affect our business.

At the end of our 2012 fiscal year, we had approximately 3,400 employees of which 2,900 full time and 400 seasonal employees worked in food processing and 100 employees worked in other activities. During the peak summer harvest period, we hire approximately 6,700 seasonal employees to help process fruits and vegetables. Many of our processing operations are located in rural communities that may not have sufficient labor pools, requiring us to hire employees from other regions. An inability to hire and train sufficient employees during the critical harvest period could materially and adversely affect our business, financial condition and results of operations.

There may be increased governmental legislative and regulatory activity in reaction to consumer perception related to BPA.

There has been increased state and federal legislative activity to ban Bisphenol-A ("BPA") from food contact packaging. These legislative decisions are predominantly driven by consumer perception that BPA may be harmful. These actions have been taken despite the scientific evidence and general consensus of United States and international government agencies that BPA is safe and does not pose a risk to human health. The legislative actions combined with growing public perception about food safety may require us to change some of the materials used as linings in our packaging materials. Failure to do so could result in a loss of sales as well as loss in value of the inventory utilizing BPA containing materials. The Company, in collaboration with other can makers as well as enamel suppliers, has decided to aggressively work to find BPA-free alternatives for its products. However, commercially acceptable alternatives are not immediately available for some applications and there can be no assurance that these steps will be successful.

The implementation of the Food Safety Modernization Act of 2011 may affect operations

The Food Safety Modernization Act ("FSMA") was enacted with the goal of enabling the Food and Drug Administration ("FDA") to better protect public health by strengthening the food safety system. FSMA was designed to focus the efforts of FDA on preventing food safety problems rather than relying primarily on reacting to problems after they occur. The law also provides FDA with new enforcement authorities designed to achieve higher rates of compliance with prevention and risk-based food safety standards and to better respond to and contain problems when they do occur. The increased inspections, mandatory recall authority of the FDA, increased scrutiny of foreign sourced or supplied food products, and increased records access may have an impact on our business. As we are already in a highly regulated business, operating under the increased scrutiny of more FDA authority does not appear likely to negatively impact our business. The law also gives FDA important new tools to hold imported foods to the same standards as domestic foods.

The Company's results are dependent on successful marketplace initiatives and acceptance by consumers of the Company's products.

The Company's product introductions and product improvements, along with its other marketplace initiatives, are designed to capitalize on new customer or consumer trends. The FDA recently issued a statement on sodium which referred to an Institute of Medicine statement that too much sodium is a major contributor to high blood pressure. Some of our products contain a moderate amount of sodium per recommended serving, which is based on consumer's preferences for taste. In order to remain successful, the Company must anticipate and react to these new trends and develop new products or processes to address them. While the Company devotes significant resources to meeting this goal, we may not be successful in developing new products or processes, or our new products or processes may not be accepted by customers or consumers.

Financing Risks

Global economic conditions may materially and adversely affect our business, financial condition and results of operations.

Unfavorable economic conditions, including the impact of recessions in the United States and throughout the world, may negatively affect our business and financial results. These economic conditions could negatively impact (i) consumer demand for our products, (ii) the mix of our products' sales, (iii) our ability to collect accounts receivable on a timely basis, (iv) the ability of suppliers to provide the materials required in our operations and (v) our ability to obtain financing or to otherwise access the capital markets. The strength of the U.S. dollar versus other world currencies could result in increased competition from imported products and decreased sales to our international customers. A prolonged recession could result in decreased revenue, margins and earnings. Additionally, the economic situation could have an impact on our lenders or customers, causing them to fail to meet their obligations to us. The occurrence of any of these risks could materially and adversely affect our business, financial condition and

results of operations.

Our ability to manage our working capital and our Revolver is critical to our success.

As of March 31, 2012, we had approximately \$234.2 million of total indebtedness, including various debt agreements and a \$144.1 million outstanding balance on our \$250.0 to \$350.0 million revolving credit facility (“Revolver”). Scheduled debt service for fiscal 2013 is \$7.3 million. During our second and third fiscal quarters, our operations generally require more cash than is available from operations. In these circumstances, it is necessary to borrow under our Revolver. We renewed our Revolver during fiscal 2012 for five years so it now matures on July 20, 2016. Our ability to obtain financing in the future through credit facilities will be affected by several factors, including our creditworthiness, our ability to operate in a profitable manner and general market and credit conditions. Significant changes in our business or cash outflows from operations could create a need for additional working capital. An inability to obtain additional working capital on terms reasonably acceptable to us or access the Revolver would materially and adversely affect our operations. Additionally, if we need to use a portion of our cash flows to pay principal and interest on our debt, it will reduce the amount of money we have for operations, working capital, capital expenditures, expansions, acquisitions or general corporate or other business activities.

Failure to comply with the requirements of our debt agreements and Revolver could have a material adverse effect on our business.

Our debt agreements and Revolver contain financial and other restrictive covenants which, among other things, limit our ability to borrow money, including with respect to the refinancing of existing indebtedness. These provisions may limit our ability to conduct our business, take advantage of business opportunities and respond to changing business, market and economic conditions. In addition, they may place us at a competitive disadvantage relative to other companies that may be subject to fewer, if any, restrictions. Failure to comply with the requirements of our Revolver and debt agreements could materially and adversely affect our business, financial condition and results of operations. We have pledged our accounts receivable, inventory and the capital stock or other ownership interests that we own in our subsidiaries to secure the credit facility. If a default occurred and was not cured, secured lenders could foreclose on this collateral.

Risks Relating to Our Stock

Our existing shareholders, if acting together, may be able to exert control over matters requiring shareholder approval.

Holders of our Class B common stock are entitled to one vote per share, while holders of our Class A common stock are entitled to one-twentieth of a vote per share. In addition, holders of our 10% Cumulative Convertible Voting Preferred Stock, Series A, our 10% Cumulative Convertible Voting Preferred Stock, Series B and, solely with respect to the election of directors, our 6% Cumulative Voting Preferred Stock, which we refer to as our voting preferred stock, are entitled to one vote per share. As of March 31, 2012, holders of Class B common stock and voting preferred stock held 86.2% of the combined voting power of all shares of capital stock then outstanding and entitled to vote. These shareholders, if acting together, would be in a position to control the election of our directors and to effect or prevent certain corporate transactions that require majority or supermajority approval of the combined classes, including mergers and other business combinations. This may result in us taking corporate actions that you may not consider to be in your best interest and may affect the price of our common stock.

As of March 31, 2012, our current executive officers and directors beneficially owned 9.7% of our outstanding shares of Class A common stock, 38.6% of our outstanding shares of Class B common stock and 82.4% of our voting preferred stock, or 47.1% of the combined voting power of our outstanding shares of capital stock. This concentration of voting power may inhibit changes in control of the Company and may adversely affect the market price of our common stock.

Our certificate of incorporation and bylaws contain provisions that discourage corporate takeovers.

Certain provisions of our certificate of incorporation and bylaws and provisions of the New York Business Corporation Law may have the effect of delaying or preventing a change in control. Various provisions of our certificate of incorporation and bylaws may inhibit changes in control not approved by our directors and may have the effect of depriving shareholders of any opportunity to receive a premium over the prevailing market price of our common stock in the event of an attempted unsolicited takeover. In addition, the existence of these provisions may adversely affect the market price of our common stock. These provisions include:

- a classified board of directors;
- a requirement that special meetings of shareholders be called only by our directors or holders of 25% of the voting power of all shares outstanding and entitled to vote at the meeting;
- our board of directors has the power to classify and reclassify any of our unissued shares of capital stock into shares of capital stock with such preferences, rights, powers and restrictions as the board of directors may determine;
- the affirmative vote of two thirds of the shares present and entitled to vote is required to amend our bylaws or remove a director; and
- under the New York Business Corporation Law, in addition to certain restrictions which may apply to “business combinations” involving us and an “interested shareholder”, a plan for our merger or consolidation must be approved by two-thirds of the votes of all outstanding shares entitled to vote thereon. See “Our existing shareholders, if acting together, may be able to exert control over matters requiring shareholder approval.”

We do not pay dividends on our common stock and do not expect to pay common dividends in the future.

We have not declared or paid any cash dividends on our common stock in more than 25 years and we have no intention to do so in the near future. In addition, payment of cash dividends on our common stock is not permitted by the terms of our revolving credit facility.

Other Risks

Tax legislation could impact future cash flows.

The Company uses the Last-In, First-Out (LIFO) method of inventory accounting. As of March 31, 2012, we had a LIFO reserve of \$137.2 million which, at the U.S. corporate tax rate, represents approximately \$48.0 million of income taxes, payment of which is delayed to future dates based upon changes in inventory costs. From time-to-time, discussions regarding changes in U.S. tax laws have included the potential of LIFO being repealed. Should LIFO be repealed, the \$48.0 million of postponed taxes, plus any future benefit realized prior to the date of repeal, would likely have to be repaid over some period of time. Repayment of these postponed taxes will reduce the amount of cash that we would have available to fund our operations, working capital, capital expenditures, expansions, acquisitions or general corporate or other business activities. This could materially and adversely affect our business, financial condition and results of operation.

Item 1B

Unresolved Staff Comments

The Company does not have any unresolved comments from the SEC staff regarding its periodic or current reports under the Exchange Act.

Item 2

Properties

The following table details the Company's manufacturing plants and warehouses:

Manufacturing Plants and Warehouses

	Square Footage (‘000)	Acres
Food Group		
Modesto, California	2,213	114

Non-Food Group		
Penn Yan, New York	27	4
Total	12,012	9,473

These facilities primarily process and package various fruit and vegetable products. Most of the facilities are owned by the Company. The Company is a lessee under a number of operating leases for equipment and real property used for processing and warehousing.

The Company believes that these facilities are suitable and adequate for the purposes for which they are currently intended. All locations, although highly utilized, have the ability to expand as sales requirements justify. Because of the seasonal production cycles, the exact extent of utilization is difficult to measure. In certain circumstances, the theoretical full efficiency levels are being reached; however, expansion of the number of production days or hours could increase the output by up to 20% for a season.

Certain of the Company's facilities are mortgaged to financial institutions to secure long-term debt. See Notes 4, 5 and 6 of Item 8, Financial Statements and Supplementary Data, for additional information about the Company's long-term debt and lease commitments.

Item 3

Legal Proceedings

In the ordinary course of its business, the Company is made a party to certain legal proceedings seeking monetary damages, including proceedings involving product liability claims, workers' compensation and other employee claims, tort and other general liability claims, for which it carries insurance, as well as patent infringement and related litigation. The Company is in a highly regulated industry and is also periodically involved in government actions for regulatory violations and other matters surrounding the manufacturing of its products, including, but not limited to, environmental, employee, and product safety issues. While it is not feasible to predict or determine the ultimate outcome of these matters, the Company does not believe that an adverse decision in any of these legal proceedings would have a material adverse impact on its financial position, results of operations, or cash flows.

On August 2, 2007, the Company received two civil citations from CalOSHA (the California state agency responsible for enforcing occupational safety and health regulations), relating to the accidental death of a warehouse employee at the Company's Modesto facility on February 5, 2007. The Company appealed the citations to the California Occupational Safety and Health Appeals Board, and a hearing was held in early June 2010. The result of the hearing was that the citations were modified by agreement with CalOSHA and a civil penalty was imposed and paid by the Company during fiscal year 2011, thereby resolving the issue without a material adverse impact on the Company's financial position, results of operations, or cash flows.

In June, 2010, the Company received a Notice of Violation of the California Safe Drinking Water and Toxic Enforcement Act of 1986, commonly known as Proposition 65, from the Environmental Law Foundation ("ELF"). This notice was made to the California Attorney General and various other government officials, and to 49 companies including Seneca Foods Corporation whom ELF alleges manufactured, distributed or sold packaged peaches, pears, fruit cocktail and fruit juice that contain lead without providing a clear and reasonable warning to consumers. Under California law, proper notice must be made to the State and involved firms at least 60 days before any suit under Proposition 65 may be filed by private litigants like ELF. That 60-day period has expired and to date neither the California Attorney General nor any appropriate district attorney or city attorney has initiated an action against the Company. However, private litigant ELF filed an action against the Company and 27 other named companies on September 28, 2011, in Superior Court of Alameda County, California, alleging violations of Proposition 65 and seeking various measures of relief, including injunctive and declaratory relief and civil penalties. The Company, along with the other named companies, is vigorously defending itself from such claim and has filed a responsive answer. The discovery process is ongoing and the litigation is proceeding in accordance with court schedules. As this matter is still at a very early stage, we are not able to predict the probability of the outcome or estimate of loss, if any, related to this matter. Additionally, in the ordinary course of its business, the Company is made party to certain legal proceedings seeking monetary damages, including proceedings invoking product liability claims, either directly or through indemnification obligations, and we are not able to predict the probability of the outcome or estimate of loss, if any, related to any such matter.

Item 5

Market for Registrant's Common Stock, Related Security Holder Matters and Issuer Purchases of Equity Securities

Each class of preferred stock receives preference as to dividend payment and declaration over any common stock. In addition, refer to the information in the 2012 Annual Report, "Shareholder Information and Quarterly Results", which is incorporated by reference.

Securities Authorized for Issuance Under Equity Compensation Plans

On August 10, 2007, the 2007 Equity Incentive Plan (the "2007 Equity Plan") was approved by shareholders at the Company's annual meeting. The 2007 Equity Plan has a 10-year term and authorized the issuance of up to 100,000 shares of either Class A Common Stock and Class B Common Stock or a combination of the two classes of stock. A total of 3,834 shares were awarded in fiscal year 2008, 4,879 shares were awarded in fiscal year 2009, 3,744 shares were awarded in fiscal year 2010, 3,760 were awarded in fiscal year 2011 and 4,870 were awarded in fiscal year 2012 under the terms of the 2007 Equity Plan. As of March 31, 2012, there were 78,913 shares available for distribution as part of future awards under the 2007 Equity Plan. No additional shares have been awarded under the 2007 Equity Plan through the date of this Form 10-K.

Common Stock Performance Graph

Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Acting Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act), as of March 31, 2012. Based upon this evaluation, our Chief Executive Officer and Acting Chief Financial Officer concluded that, as of March 31, 2012, the Company's disclosure controls and procedures: (1) were designed to ensure that material information relating to the Company is made known to our Chief Executive Officer and Acting Chief Financial Officer by others within those entities, particularly during the period in which this report was being prepared, so as to allow timely decisions regarding required disclosure and (2) were effective, in that they provide reasonable assurance that information required to be disclosed by the Company in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over the Company's financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act). Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of the Company's internal control over financial reporting as of March 31, 2012. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on our assessment, management believes that, as of March 31, 2012, our internal control over financial reporting is effective based on those criteria.

The Company's independent registered public accountant has issued its report on the effectiveness of the Company's internal control over financial reporting. The report appears on the next page.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders
Seneca Foods Corporation
Marion, New York

We have audited Seneca Foods Corporation's internal control over financial reporting as of March 31, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Item 9A, Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2012, based on the COSO criteria.

We have also audited, in accordance with the standards of the Public Company Accounting Standards Board (United States), the consolidated balance sheets of Seneca Foods Corporation as of March 31, 2012 and 2011, and the related consolidated statements of net earnings, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended March 31, 2012 and our report dated June 8, 2012 expressed an unqualified opinion thereon.

/s/ BDO USA, LLP
Milwaukee, Wisconsin

June 8, 2012

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting (as defined in rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended March 31, 2012 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders
Seneca Foods Corporation
Marion, New York

The audits referred to in our report dated June 8, 2012 relating to the consolidated financial statements of Seneca Foods Corporation, which is incorporated in Item 8 of Form 10-K by reference to the annual report to stockholders for the year ended March 31, 2012, also included the audit of the financial statement schedule listed in the accompanying index. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement schedule based on our audits.

In our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.
