Claymore/Guggenheim Strategic Opportunities Fund

(Exact name of registrant as specified in charter)

2455 Corporate West Drive, Lisle, IL 60532

(Address of principal executive offices) (Zip code)

J. Thomas Futrell
2455 Corporate West Drive, Lisle, IL 60532

(Name and address of agent for service)

Registrant's telephone number, including area code: (630) 505-3700

Date of fiscal year end: May 31

Date of reporting period: November 30, 2008

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. Section 3507.

ITEM 1. REPORTS TO STOCKHOLDERS.

The registrant's semi-annual report transmitted to shareholders pursuant to Rule 30e-1 under the Investment Company Act of 1940, as amended (the "Investment Company Act"), is as follows:

The shareholder report you are reading right now is just the beginning of the story. Online at WWW.CLAYMORE.COM/GOF, you will find:

- o Daily, weekly and monthly data on share prices, net asset values, distributions, dividends and more
- o Portfolio overviews and performance analyses
- o Announcements, press releases and special notices
- o Fund and adviser contact information

Guggenheim Partners Asset Management, Inc. and Claymore are continually updating and expanding shareholder information services on the Fund's website, in an ongoing effort to provide you with the most current information about how your Fund's assets are managed, and the results of our efforts. It is just one more small way we are working to keep you better informed about your investment in the Fund.

2 SemiAnnual Report | November 30, 2008

GOF | Claymore/Guggenheim Strategic Opportunities Fund

Dear SHAREHOLDER|

We thank you for your investment in the Claymore/Guggenheim Strategic Opportunities Fund (the "Fund"). This report covers the Fund's performance for the semi-annual period ended November 30, 2008. This has been an extraordinarily difficult time for all investors and we are disappointed to report that the Fund's return was negative for the period. However, given the Fund's objective and investment strategy, we believe that it has performed well considering the extremely challenging economic and investment environment that has existed since it was launched. We believe this is a testament to our rigorous process of individual security selection in addition to our commitment to keeping the Fund highly diversified.

The Fund's investment objective is to maximize total return through a combination of current income and capital appreciation. The Fund's sub-adviser is Guggenheim Partners Asset Management, Inc. ("GPAM" or "Sub-Adviser"), a wholly owned subsidiary of Guggenheim Partners, LLC ("Guggenheim"). GPAM seeks

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

to achieve that objective by combining a credit-managed fixed-income portfolio with access to a diversified pool of alternative investments and equity strategies. The Fund pursues a relative value-based investment philosophy, which utilizes quantitative and qualitative analysis to seek to identify securities or spreads between securities that deviate from their perceived fair value and/or historical norms.

Guggenheim is a diversified financial services firm with wealth management, capital markets, investment management and proprietary investing businesses. As of November 30, 2008, Guggenheim managed or supervised more than \$100 billion in assets.

All Fund returns cited--whether based on net asset value ("NAV") or market price--assume the reinvestment of all distributions. For the semi-annual period ended November 30, 2008, the Fund provided a total return based on market price of -35.12% and a return of -26.24% based on NAV. The closing price of the Fund's shares as of November 30, 2008, was \$10.15, which represented a discount of 16.46% to the Fund's NAV of \$12.15. Past performance is not a guarantee of future results.

The market value of the Fund's shares fluctuates from time to time, and it may be higher or lower than the Fund's NAV. We believe that, over the long term, the progress of the NAV will be reflected in the market price return to shareholders. We believe that the current discount represents a good opportunity for investors, as common shares of the Fund are now available in the market at prices significantly below the value of the securities in the underlying portfolio.

We encourage shareholders to consider the opportunity to reinvest their distributions from the Fund through the Dividend Reinvestment Plan ("DRIP"), which is described in detail on page 30 of the Fund's semi-annual report. When shares trade at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the monthly dividend distribution in common shares of the Fund purchased in the market at a price less than NAV. Conversely, when the market price of the Fund's common shares is at a premium above NAV, the DRIP reinvests participants' dividends in newly-issued common shares at NAV, subject to an IRS limitation that the purchase price cannot be more than 5% below the market price per share. The DRIP provides a cost-effective means to accumulate additional shares and enjoy the benefits of compounding returns over time and effectively provides an income averaging technique, which causes shareholders to accumulate a larger number of Fund shares when the market price is depressed than when the price is higher.

SemiAnnual Report | November 30, 2008 3

GOF | Claymore/Guggenheim Strategic Opportunities Fund | DEAR SHAREHOLDER
continued

During the semi-annual period ended November 30, 2008, the Fund paid six monthly dividends of \$0.154 per share. The current monthly dividend of \$0.154 per share represents an annualized distribution rate of 18.21% based on the Fund's closing market price of \$10.15 as of November 30, 2008.

To learn more about the Fund's performance and investment strategy, we encourage you to read the Questions & Answers section of the report, which begins on page 5. You'll find information on GPAM's investment philosophy, its views on the economy and market environment, and detailed information about the factors that impacted the Fund's performance.

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

We appreciate your investment and look forward to serving your investment needs in the future. For the most up-to-date information on your investment, please visit the Fund's website at www.claymore.com/gof or www.claymore.com/cef.

Sincerely,
/s/J. Thomas Futrell

4 SemiAnnual Report | November 30, 2008

GOF | Claymore/Guggenheim Strategic Opportunities Fund
QUESTIONS & ANSWERS|

Claymore/Guggenheim Strategic Opportunities Fund (the "Fund") is managed by a team of seasoned professionals at Guggenheim Partners Asset Management, Inc. ("GPAM" or the "Sub-Adviser"). This team includes B. Scott Miner, Chief Executive Officer and Chief Investment Officer; Anne Bookwalter Walsh, CFA, JD, Managing Director; Michael Curcio, Managing Director; Robert N. Daviduk, CFA, Managing Director; Shahab Sajadian, CFA, Director of Risk Management; and Eric Silvergold, Managing Director. In the following interview, the investment team discusses the market environment and the Fund's performance during the semi-annual period ended November 30, 2008.

=====

WILL YOU REMIND US OF THIS FUND'S OBJECTIVE AND THE WAY IT IS MANAGED?

The Fund's investment objective is to seek to maximize total return through a combination of current income and capital appreciation. The Fund pursues a relative value-based investment philosophy, which utilizes quantitative and qualitative analysis to seek to identify securities or spreads between securities that deviate from their perceived fair value and/or historical norms. GPAM seeks to combine a credit-managed fixed-income portfolio with access to a diversified pool of alternative investments and equity strategies. There is no guarantee that the perceived fair value will be achieved however.

The Fund seeks to achieve its investment objective by investing in a wide range of fixed income and other debt and senior equity securities ("income securities") selected from a variety of sectors and credit qualities, including, but not limited to, corporate bonds, loans and loan participations, structured finance investments, U.S. government and agency securities, mezzanine and preferred securities and convertible securities, and in common stocks, limited liability company interests, trust certificates and other equity investments ("common equity securities") that the Fund's Sub-Adviser believes offer attractive yield and/or capital appreciation potential, including employing a strategy of writing (selling) covered call and put options on such equities. We believe that we can reduce the volatility (risk) of the Fund by diversifying the portfolio across a large number of sectors and securities, many of which historically have not been highly correlated to one another.

- o The Fund may invest, under normal market conditions, up to 60% of its total assets in income securities rated below investment grade (commonly referred to as "junk bonds").
- o The Fund may invest up to 20% of its total assets in non-U.S. dollar-denominated fixed-income securities of corporate and governmental issuers located outside the U.S., including up to 10% of total assets in income securities of issuers located in emerging markets.
- o The Fund may invest up to 50% of its total assets in common equity

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

securities consisting of common stock; and

- o The Fund may invest up to 30% of its total assets in investment funds that primarily hold (directly or indirectly) investments in which the Fund may invest directly, of which amount up to 20% of the Fund's total assets may be invested in investment funds that are registered as investment companies under the Investment Company Act of 1940, as amended ("the 1940 Act") to the extent permitted by applicable law and related interpretations of the staff of the U.S. Securities and Exchange Commission.

GPAM's investment process is a collaborative effort between its Portfolio Construction Group, which utilizes tools such as GPAM's Dynamic Financial Analysis Model to determine allocation of assets among a variety of sectors, and its Sector Specialists, who are responsible for security selection within these sectors and for implementing securities transactions, including the structuring of certain securities directly with the issuer or with investment banks and dealers involved in the origination of such securities.

The Fund may seek to enhance the level of its current distributions by utilizing financial leverage through the issuance of senior securities such as preferred shares; through borrowing or the issuance of commercial paper or other forms of debt; through reverse repurchase agreements, dollar rolls or similar transactions; or through a combination of the foregoing (collectively "Financial Leverage"). The aggregate amount of Financial Leverage, if any, is not expected to exceed 33(1)/3% of the Fund's total assets after such issuance; however, the Fund may utilize Financial Leverage up to the limits imposed by the 1940 Act.

Although the use of Financial Leverage by the Fund may create an opportunity for increased return for the common shares, it also results in additional risks and can magnify the effect of any losses. If the income and gains earned on securities purchased with the financial leverage proceeds are greater than the cost of the financial leverage, the common shares' return will be greater than if financial leverage had not been used. Conversely, if the income or gains from the securities common shares will be less than if financial leverage had not been used. There can be no assurance that a leveraging strategy will be implemented or that it will be successful during any period during which it is employed.

=====

PLEASE TELL US ABOUT THE MARKET ENVIRONMENT OVER THE
LAST SIX MONTHS.

In the Fund's previous annual report, issued after the end of the Fund's fiscal year on May 31, 2008, we discussed the financial crisis that began as a correction in the subprime mortgage market in late 2007. We cited investors' increasing discomfort with risk, the illiquidity and volatility of global securities markets, and of massive de-leveraging. After policy makers engineered a rescue for The Bear Stearns Companies Inc. in March 2008, non-government bonds and equities rallied strongly. At the time it appeared that markets might have bottomed.

Following a two-month long rally in the financial markets that ended in May, the financial crisis became much worse over the next six months. Investors fled risk in a wholesale manner and indiscriminately sold securities with little consideration for their intrinsic value. Essentially all securities that do not

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

have explicit or implicit guarantee from the U.S. government have traded at extremely low valuations that we believe, in many instances, do not reflect the value that will ultimately be realized.

Over the six-month period ended November 30, 2008, U.S. Treasury Bonds were the best performing asset class; the Barclays Treasury Composite Index¹ returned 8.46%. In contrast, non-government bonds performed poorly. For example, investment grade corporate bonds as measured by the Barclays U.S. Corporate Bond Index² returned -10.81% for the period, while the Barclays Aggregate Bond Index³, which is a proxy for the investment grade bond market, returned 0.25% for the period. The Standard & Poor's 500 Index⁴ (the "S&P 500"), which is generally regarded as a good indicator of the broad stock market, returned -35.20%. World equity markets performed even worse than the US market; the MSCI World Index⁵, which measures performance of world equity markets, returned -40.79%. Indices are unmanaged and it is not possible to invest directly in an index.

The single event that had the greatest impact on the financial markets for this reporting period occurred in mid-September, when Lehman Brothers Holdings Inc. filed for bankruptcy. At GPAM we had come to the conclusion that allowing Lehman Brothers to fail would create massive turmoil throughout the global financial markets, which is exactly what happened in the wake of Lehman's bankruptcy filing. We believed that policymakers were aware of this as well and would act to avoid such an outcome. It is not clear why Lehman was allowed to fail without any attempts by policy makers to, at the very least, unwind Lehman in an orderly manner. It may have been due to the significant criticism that U.S. Treasury Secretary Henry Paulson and Federal Reserve Board (the "Fed") Chairman Ben Bernanke had received from Congress and the public for engineering a rescue of Bear Stearns that committed \$30 billion of taxpayer money via the Fed in order to get J.P. Morgan to agree to purchase Bear Stearns. Paulson and Bernanke's lack of action with regard to Lehman perhaps represented a yielding to pressure from elected officials whose constituents were unhappy with a bail-out that many believed benefited only Wall Street, while failing to recognize its benefits for the general public. After Lehman's failure, lending essentially ceased, as financial institutions exhibited no confidence in one another. In each of the months of September and October, broad bond indices such as the Barclays U.S. Corporate Bond Index (this index is a proxy for the U.S. investment grade corporate sector), had worse performance relative to Treasury securities than they have ever had for any full year period since the indices have existed.

Subsequent to the failure of Lehman Brothers, which proved to have a dramatically negative effect on markets, U.S. policy makers have indicated that they will not allow a systemically important institution to fail, and they have injected capital into almost every major financial institution and into many smaller ones as well. In addition, in order to gain access to funds from the \$700 billion Troubled Asset Relief Program ("TARP")--the fundamental component of the Emergency Economic Stabilization Act of 2008 that gives broad authority to the Secretary of the Treasury to purchase troubled assets--a number of non-bank institutions, such as American Express Company, The Goldman Sachs Group, Inc., Morgan Stanley, and GMAC, LLC, have converted to bank holding companies. Among other benefits, bank holding companies have access to capital from the government and are eligible to issue debt, subject to certain limitations, guaranteed by the Fed. We believe that the Fed and the U.S. Treasury will continue to aggressively pursue the policy actions they have put into place and to introduce new policies in order to return the credit markets to a more normal level of activity. Properly functioning credit markets are essential for the health of the U.S. economy.

1 The Barclays Treasury Composite Index is an unmanaged index of U.S. Treasury securities.

2 The Barclays U.S. Corporate Bond Index is an unmanaged index of bonds

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

issued by U.S. corporations.

- 3 The Barclays U.S. Aggregate Bond Index represents securities that are U.S. domestic, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities.
- 4 The Standard & Poor's 500 Index is an unmanaged, capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.
- 5 The Morgan Stanley Capital International ("MSCI") World Index is a float-adjusted capitalization-weighted index created by Morgan Stanley Capital International to measure equity market performance throughout the world.

=====

HOW DID THE FUND PERFORM IN THIS DIFFICULT ENVIRONMENT?

Given the Fund's objective and investment strategy, we believe that it has performed well considering the very difficult environment that has existed since it was launched. We believe this is a testament to our rigorous process of individual security selection in addition to our commitment to keeping the Fund highly diversified. All Fund returns cited--whether based on net asset value ("NAV") or market price--assume the reinvestment of all distributions. For the six-month period ended November 30, 2008, the Fund returned -26.24% on an NAV basis and -35.12% on a market price basis. The closing price of the Fund's shares as of November 30, 2008, was \$10.15, which represented a discount of 16.46% to the NAV of \$12.15.

The market value of the Fund's shares fluctuates from time to time and it may be higher or lower than the Fund's NAV. The current discount to NAV may provide an opportunity for suitable investors to purchase shares of the Fund below the market value of the securities in the underlying portfolio. We believe that, over the long term, the progress of the NAV will be reflected in the market price return to shareholders.

Although it is always disappointing to report negative returns, we are pleased that the Fund has outperformed the S&P 500 on an NAV basis since its inception and has had volatility or risk of less than one-third the level of the S&P 500. The Fund's volatility has been much more in line with the risk of fixed income securities. This is an important achievement, since one goal of the Fund is to provide long-term returns in line with equity returns but with volatility is closer to that of bonds. (For the period from the Fund's inception date of July 27, 2007, through November 30, 2008, the Fund's NAV return on an annualized basis was -21.05%. compared with return of -29.61% for the S&P 500. Over this same period, the Fund's annualized volatility has been approximately 10.5%. This compares with annualized volatility of the Barclays Aggregate Bond Index (a proxy for bonds) of approximately 5.5% and volatility of the S&P 500 Index of approximately 35% over the same period. The volatility is measured by calculating the standard deviation of the percentage changes in the Fund's daily NAV and then annualizing them. The relatively low volatility of the Fund's NAV is attributable to its high level of diversification across many different asset classes.

During the six-month period ended November 30, 2008, the Fund paid monthly

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

dividends of \$0.154 per share. On an annualized basis, the current monthly dividend represents distribution rate of 18.21% based on the closing market price of \$10.15 as of as of November 30, 2008. Past performance is not a guarantee of future results.

=====

HOW DID YOU ALLOCATE THE FUND AMONG ASSET CLASSES THIS PERIOD, AND HOW DID THESE INVESTMENTS PERFORM?

Broadly speaking, on November 30, 2008 the Fund had 84% of its assets in fixed income securities and 16% in equities. The Fund's average credit quality was Single A, and less than 18% of its holdings were rated below investment grade. At GPAM, we track a large number of equity and fixed income asset classes and, in constructing this portfolio, we have sought to use investments that historically have had low correlations to one another. At the end of the period, the Fund remains highly diversified, with exposure to over one dozen broad sector classifications and dozens of subsectors of the major sectors. We have attempted to optimize the portfolio by analyzing the historical returns generated by GPAM's management team in each sector, the volatility of each sector and the correlations among the sectors. We do this in an effort to reduce the risk of the portfolio while providing the opportunity for an attractive long-term return to our investors.

Correctly anticipating a flight to quality, when the Fund was established, we committed a substantial portion of the Fund's assets to U.S. Government and Agency securities. These securities performed very well during the Fund's first fiscal year, which ended May 31, 2008. By the beginning of the current fiscal year, we had reduced this position to approximately 15% of total investments and at the end of the period, U.S. Government and Agency securities comprised about 6% of the portfolio. As the market became even more risk-averse, these government-backed securities were by far the best performing asset class in the portfolio. More recently, in September we purchased some 30-year U.S. Treasury bonds, and they have provided a return in excess of 13% in the short time we have owned them. Since the current level of yields on most Government securities are very low and we believe not attractive from a long term investor's standpoint, we have been selling these securities to book gains and then purchasing Non-Government securities that, in our opinion, offer more attractive long term return potential.

Due to extreme market illiquidity, risk aversion, and the forced deleveraging of many investors, essentially all non-government debt securities posted sharply negative returns. As a result, the Fund's holdings in commercial mortgage-backed securities ("CMBS"), preferred securities, bank loans, asset-backed securities ("ABS") and high yield bonds were all negatively impacted.

SemiAnnual Report | November 30, 2008 | 7

GOF | Claymore/Guggenheim Strategic Opportunities Fund | QUESTIONS & ANSWERS
continued

Among securities other than government-related issues, the best performing asset class was event-linked securities, which provide investors with high return potential in exchange for effectively providing reinsurance for insurance and reinsurance companies. The bonds can be tied to any number of events; however, the most common types of event-linked securities are tied to the occurrence of a major hurricane, earthquake or pandemic that results in extreme catastrophic losses to insurers. These securities provide attractive yields and, in addition, reduce the Fund's overall level of risk due to their low correlations to most other fixed income and equity-related asset classes. Their relatively strong performance during this difficult period provides further confirmation of the value of diversification across a wide range of asset classes.

=====

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

HOW DID THE FUND'S LEVERAGE AFFECT PERFORMANCE DURING THIS PERIOD?

The purpose of leverage (borrowing) is to fund the purchase of additional securities that provide increased income and potentially greater appreciation to common shareholders than could be achieved from an unleveraged portfolio. Of course, leverage results in greater NAV volatility and entails more downside risk than an unleveraged portfolio. Since leverage adds to performance only when the cost of leverage is less than the total return generated by investments, the use of leverage detracted from the Fund's total return during this period. The use of leverage did, however, increase the amount of income available to pay the monthly dividend because the income earned (interest income, dividend income and equity call premiums) on the investments purchased with the borrowed funds exceeded the cost of the borrowings.

Since the Fund's inception, we have employed leverage through reverse repurchase agreements, under which we lend securities and receive cash in return which can be used for additional investments. In November, we were able to arrange a new financing facility through BNP Paribas, a leading European bank. We consider this a major accomplishment, since it is very difficult to secure committed financing in this environment. We believe that this facility, which will be used to reduce outstanding reverse repurchase agreements, will provide the Fund a more reliable source of leverage to be used in the management of the Fund.

=====

WHAT IS YOUR CURRENT OUTLOOK FOR THE MARKETS AND THE FUND?

Despite the abundant negatives, we are optimistic about the future, although we do not expect a quick recovery. On December 1, 2008, the Business Cycle Dating Committee of the National Bureau of Economic Research made the official announcement that the U.S. economy is in a recession, and that the recession began in December 2007. We believe that annualized real growth in gross domestic product will be in the range of -5% to -6% in the fourth quarter of 2008 and the first quarter of 2009. In the second quarter of 2009 we expect to see some moderation in the pace of decline and by the second half of 2009, we expect to see some improvement in economic trends. Typically, the economy begins to pick up about 18 months after the first easing of monetary policy by the Fed, which occurred in September 2007. If this recovery follows that pattern, we should see some signs of a recovery by the second or third quarter of 2009.

We believe that the Fed and the U.S. Treasury Department will do whatever is necessary to return credit markets to normalcy and to stimulate economic growth. In December 2008, the Fed lowered short-term interest rates effectively to zero, and we believe they will implement policies that have not been used since the 1930s and 1940s to keep not just short-term rates but also long-term rates at low levels. We also are expecting greater efforts to push mortgage rates down. Not only will the Fed and the U.S. Treasury Department be buying mortgages outright; we believe they will drive 30-year fixed rate mortgage rates below 5% and maybe as low as 4% to cause a wave of refinancing in addition to increasing the level of home affordability for buyers. That should lower the default rate and help to stabilize real estate values, which should help mitigate the losses that financial institutions are taking. That, in turn, should begin to stimulate lending, which is so essential to our credit-based economy. In addition to the highly stimulative monetary policy, we expect fiscal stimulus in the form of government spending programs under the new Democratically-controlled Congress and White House. The stimulus package is expected to be greater than \$750 billion and we believe will likely be spent over a two-year period. In our opinion, policy makers are more likely to over-stimulate the economy to ensure a recovery. The monetary and fiscal stimulus that is being introduced will likely create higher inflation, but that will be a problem that will take several years to

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

GOF | Claymore/Guggenheim Strategic Opportunities Fund | QUESTIONS & ANSWERS
continued

unfold. Over the near term, the battle is to avoid a large scale collapse of prices.

We also expect changes in law or regulations to avoid future episodes similar to what we have experienced, where a confluence of factors including overly easy credit and lax oversight lead to the financial crisis we have experienced.

As the name indicates, this is an opportunistic fund and we are finding some good opportunities in the current market. We believe that many assets are priced below their intrinsic long-term value because of investors' fear of risk. We have been selectively adding to positions in asset classes such as non-agency mortgage-backed securities, asset-backed securities, corporate securities and commercial mortgage-backed securities. There has been a wholesale flight of investors from these sectors, to the point that securities with strong credit profiles can be bought at extraordinarily valuations. However there is no guarantee that the perceived intrinsic value will be realized.

RISKS AND OTHER CONSIDERATIONS

No representation or warranty is made by Guggenheim Partners or any of their related entities or affiliates as to the sufficiency, relevance, importance, appropriateness, completeness, or comprehensiveness of the market data, information or summaries contained herein for any specific purpose. The views expressed in this presentation are the views of the GPAM and are subject to change based on market and other conditions. The opinions expressed may differ from those of other entities affiliated with GPAM that use different investment philosophies.

All material has been obtained from sources believed to be reliable, but its accuracy is not guaranteed. There is no representation or warranty as to the current accuracy of, nor liability for, decisions of any potential investors based on such information. There is no guarantee that Guggenheim Partners will make the investments as discussed herein. The illustrations are intended solely as tool to assist in consideration of various potential asset allocations for a client's account.

Past performance of indices of asset classes does not represent actual returns or volatility of actual accounts or investment managers, and should not be viewed as indicative of future results. The benchmarks used are for purposes of comparison and should not be understood to mean that there will necessarily be a correlation between the portrayed returns herein and these benchmarks. The investments discussed may fluctuate in price or value. Investors may get back less than they invested.

There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund will fluctuate with the value of the underlying securities. Historically, closed-end funds often trade at a discount to their net asset value.

BELOW INVESTMENT-GRADE SECURITIES RISK: The Fund may invest in income securities rated below investment grade or, if unrated, determined by the Sub-Adviser to be of comparable credit quality, which are commonly referred to as "high-yield" or

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

"junk" bonds. Investment in securities of below investment-grade quality involves substantial risk of loss. Income securities of below investment-grade quality are predominantly speculative with respect to the issuer's capacity to pay interest and repay principal when due and therefore involve a greater risk of default or decline in market value due to adverse economic and issuer-specific developments.

SENIOR AND SECOND LIEN SECURED LOANS RISK: The Fund's investments in senior loans and second lien secured floating-rate loans are typically below investment grade and are considered speculative because of the credit risk of their issuers. The risks associated with senior loans of below investment-grade quality are similar to the risks of other lower-grade income securities. Second lien loans are second in right of payment to senior loans and therefore are subject to the additional risk that the cash flow of the borrower and any property securing the loan may be insufficient to meet scheduled payments after giving effect to the senior-secured obligations of the borrower. Second lien loans are expected to have greater price volatility and exposure to losses upon default than senior loans and may be less liquid.

STRUCTURED FINANCE INVESTMENTS RISK: Structured finance investments entail considerable risk, including market risk, credit risk, interest-rate risk and prepayment risk. Returns on risk-linked securities are dependent upon such events as property or casualty damages which may be caused by such catastrophic events as hurricanes or earthquakes or other unpredictable events.

MEZZANINE INVESTMENTS RISK: Mezzanine investments are subject to the same risks associated with investment in senior loans, second lien loans and other lower-grade income securities. Mezzanine investments are expected to have greater price volatility than senior loans and second lien loans and may be less liquid.

PREFERRED STOCK RISK: Preferred stock is inherently more risky than the bonds and other debt instruments of the issuer, but typically less risky than its common stock. Preferred stocks may be significantly less liquid than many other securities, such as U.S. Government securities, corporate debt and common stock.

CONVERTIBLE SECURITIES RISK: As with all income securities, the market values of convertible securities tend to decline as interest rates increase and, conversely, to increase as interest rates decline. Convertible securities also tend to reflect the market price of the underlying stock in varying degrees, depending on the relationship of such market price to the conversion price in the terms of the convertible security.

EQUITY RISK: Common equity securities' prices fluctuate for a number of reasons, including changes in investors' perceptions of the financial condition of an issuer, the general condition of the relevant stock market, and broader domestic and international political and economic events.

REAL ESTATE SECURITIES RISK: Because of the Fund's ability to invest in securities of companies in the real estate industry and to make indirect investments in real estate, it is subject to risks associated with the direct ownership of real estate, including declines in the value of real estate; general and local economic conditions; increased competition; and changes in interest rates. Because of the Fund's ability to make indirect investments in natural resources and physical commodities, and in real property asset companies, the Fund is subject to risks associated with such real property assets, including supply and demand risk, depletion risk, regulatory risk and commodity pricing risk.

PERSONAL PROPERTY ASSET COMPANY RISK: The Fund may invest in personal property asset companies such as special situation transportation assets. The risks of special situation transportation assets include cyclicity of supply and demand

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

for transportation assets and risk of decline in the value of transportation assets and rental values. Private Securities Risk Private securities have additional risk considerations than with investments in comparable public investments.

INFLATION/DEFLATION RISK: There is a risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money.

DIVIDEND RISK: Dividends on common stock and other common equity securities which the Fund may hold are not fixed but are declared at the discretion of an issuer's board of directors. There is no guarantee that the issuers of the common equity securities in which the Fund invests will declare dividends in the future or that, if declared, they will remain at current levels or increase over time.

PORTFOLIO TURNOVER RISK: The Fund's annual portfolio turnover rate may vary greatly from year to year. A higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. High portfolio turnover may result in an increased realization of net short-term capital gains by the Fund which, when distributed to common shareholders, will be taxable as ordinary income. Additionally, in a declining market, portfolio turnover may create realized capital losses.

DERIVATIVES RISK: The Fund may be exposed to certain additional risks should the Sub-Adviser use derivatives as a means to synthetically implement the Fund's investment strategies. If the Fund enters into a derivative instrument whereby it agrees to receive the return of

10 SemiAnnual Report | November 30, 2008

GOF | Claymore/Guggenheim Strategic Opportunities Fund | QUESTIONS & ANSWERS
continued

a security or financial instrument or a basket of securities or financial instruments, it will typically contract to receive such returns for a predetermined period of time. During such period, the Fund may not have the ability to increase or decrease its exposure. In addition, such customized derivative instruments will likely be highly illiquid, and it is possible that the Fund will not be able to terminate such derivative instruments prior to their expiration date or that the penalties associated with such a termination might impact the Fund's performance in a material adverse manner. Furthermore, derivative instruments typically contain provisions giving the counterparty the right to terminate the contract upon the occurrence of certain events. If a termination were to occur, the Fund's return could be adversely affected as it would lose the benefit of the indirect exposure to the reference securities and it may incur significant termination expenses.

FOREIGN SECURITIES AND EMERGING MARKETS RISK: Investing in foreign issuers may involve certain risks not typically associated with investing in securities of U.S. issuers due to increased exposure to foreign economic, political and legal developments, including favorable or unfavorable changes in currency exchange rates, exchange control regulations, expropriation or nationalization of assets, imposition of withholding taxes on payments and possible difficulty in obtaining and enforcing judgments against foreign entities. Furthermore, issuers of foreign securities and obligations are subject to different, often less comprehensive, accounting, reporting and disclosure requirements than domestic issuers. The securities and obligations of some foreign companies and foreign markets are less liquid and at times more volatile than comparable U.S. securities, obligations and markets. These risks may be more pronounced to the extent that the Fund invests a significant amount of its assets in companies

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

located in one region and to the extent that the Fund invests in securities of issuers in emerging markets. Heightened risks of investing in emerging markets include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible repatriation of investment income and capital.

FINANCIAL LEVERAGE RISK: Although the use of Financial Leverage by the Fund may create an opportunity for increased after-tax total return for the Common Shares, it also results in additional risks and can magnify the effect of any losses. If the income and gains earned on securities purchased with Financial Leverage proceeds are greater than the cost of Financial Leverage, the Fund's return will be greater than if Financial Leverage had not been used. Conversely, if the income or gains from the securities purchased with such proceeds does not cover the cost of Financial Leverage, the return to the Fund will be less than if Financial Leverage had not been used. Financial Leverage involves risks and special considerations for shareholders, including the likelihood of greater volatility of net asset value and market price of and dividends on the Common Shares than a comparable portfolio without leverage; the risk that fluctuations in interest rates on borrowings or in the dividend rates on any preferred shares that the Fund must pay will reduce the return to the Common Shareholders; and the effect of Financial Leverage in a declining market, which is likely to cause a greater decline in the net asset value of the Common Shares than if the Fund were not leveraged, which may result in a greater decline in the market price of the Common Shares. There can be no assurance that a leveraging strategy will be implemented or that it will be successful during any period during which it is employed.

In addition to the risks described above, the Fund is also subject to: Income Securities Risk, Foreign Currency Risk, Risks Associated with the Fund's Covered Call Option Strategy, Risks of Real Property Asset Companies, Risks of Personal Property Asset Companies, Private Securities Risk, Derivative Transactions Risks, Investment Funds Risk, Private Investment Funds Risk, Affiliated Investment Funds Risk, Synthetic Investments Risk, Inflation/Deflation Risk, Anti-Takeover Provisions, Market Discount Risk, and Current Developments Risks. Please see www.claymore.com/gof for a more detailed discussion about Fund risks and considerations.

- (a) All or a portion of this security has been physically segregated in connection with swap agreements, options, reverse repurchase agreements, and unfunded loan commitments. As of November 30, 2008, the total amount segregated in connection with reverse repurchase agreements was \$63,640,098.
- (b) Securities are exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At November 30, 2008, these securities amounted to 57.9% of net assets applicable to common shares.
- (c) Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.
- (d) Floating or Variable Rate Coupon.
- (e) All or a portion of this security position represents cover for outstanding options written.
- (f) Non-income producing security.

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

(g) Risk-Linked Security - A risk-linked security is a form of derivative issued by insurance companies and insurance-related special purpose vehicles that apply securitization techniques to catastrophic property and casualty damages. The security is typically a debt obligation for which the return of principal and the payment of interest are contingent on the non-occurrence of a pre-defined "trigger event." Depending on the specific terms and structure of the security, this trigger could be the result of a hurricane, earthquake or some other catastrophic event.

Ratings shown are per Standard & Poor's and Moody's. Securities classified as NR are not rated.

Securities are classified by sectors that represent broad groupings of related industries.

Asset coverage per \$1,000 of indebtedness (f)	\$ 3,697

* Commencement of operations.

(a) Based on average shares outstanding during the period.

(b) Before deduction of offering expenses charged to capital.

(c) Total investment return is calculated assuming a purchase of a common share at the beginning of the period and a sale on the last day of the period reported either at net asset value ("NAV") or market price per share. Dividends and distributions are assumed to be reinvested at NAV for NAV returns or the prices obtained under the Fund's Dividend Reinvestment Plan for market value returns. Total investment return does not reflect brokerage commissions. A return calculated for a period of less than one year is not annualized.

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

- (d) Annualized.
- (e) Managed assets is equal to net assets applicable to common shareholders plus outstanding leverage.
- (f) Calculated by subtracting the Fund's total liabilities (not including the borrowings) from the Fund's total assets and dividing by the total borrowings.
- (g) The ratios of total expenses to average net assets applicable to common shares and to average managed assets do not reflect fees and expense incurred indirectly by the Fund as a result of its investment in shares of other investment companies. If these fees were included in the expense ratio, the net impact to the expense ratios would be 0.05% and 0.03% for the six-months ended November 30, 2008 and 0.04% and 0.03% for the period ended May 31, 2008.

See notes to financial statements.

SemiAnnual Report | November 30, 2008 | 23

GOF | Claymore/Guggenheim Strategic Opportunities Fund
Notes to FINANCIAL STATEMENTS | NOVEMBER 30, 2008 (UNAUDITED)

Note 1 - ORGANIZATION:

Claymore/Guggenheim Strategic Opportunities Fund (the "Fund") was organized as a Delaware statutory trust on November 13, 2006. The Fund is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended ("1940 Act").

The Fund's primary investment objective is to maximize total return through a combination of current income and capital appreciation.

Note 2 - ACCOUNTING POLICIES:

The preparation of the financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

The following is a summary of significant accounting policies followed by the Fund.

(a) VALUATION OF INVESTMENTS

The Fund values equity securities at the last reported sale price on the principal exchange or in the principal Over-the-Counter ("OTC") market in which such securities are traded, as of the close of regular trading on the New York Stock Exchange ("NYSE") on the day the securities are being valued or, if there are no sales, at the mean between the last available bid and asked prices on that day. Securities traded on the NASDAQ are valued at the NASDAQ Official Closing Price. Preferred stocks are valued at their sales price as of the close of the exchange on which they are traded. Preferred stocks for which the last sales price is not available are valued at the last available bid price. Debt securities, including term loans, are valued at the last available bid price for such securities or, if such prices are not available, at prices for securities of comparable maturity, quality and type. Foreign securities are translated from the local currency into U.S. dollars using the current exchange rate. The Fund's securities that are primarily traded in foreign markets may be traded in such markets on days that the NYSE is closed. As a result, the net asset value of the Fund may be significantly affected on days when holders of common shares have no ability to trade common shares on the NYSE. Investment Companies are valued at the last available closing price. The Fund values exchange-traded options and other derivative contracts at the mean of the best bid and asked prices at the

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

close on those exchanges on which they are traded. For those securities where quotations or prices are not available, valuations are determined in accordance with procedures established in good faith by the Board of Trustees. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

In September, 2006, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 157, "Fair Valuation Measurements" ("SFAS 157"). This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of fair value measurements. SFAS 157 establishes three different categories for valuations. Level 1 valuations are those based upon quoted prices in active markets. Level 2 valuations are those based upon quoted prices in inactive markets or based upon significant observable inputs (i.e. yield curves; benchmark interest rates; indices). Level 3 valuations are those based upon unobservable inputs (i.e. discounted cash flow analysis; non-market based methods used to determine fair valuation). Details as of November 30, 2008 were as follows:

DESCRIPTION (VALUES IN \$000S)	SECURITIES	OPTIONS AND OTHER DERIVATIVES	TOTAL
ASSETS:			
Level 1	\$ 27,170	\$ -	\$ 27,170
Level 2	132,924	2,399	135,323
Level 3	-	-	-
<hr/>			
Total	\$160,094	\$2,399	\$162,493
<hr/>			
LIABILITIES:			
Level 1	-	\$4,070	\$ 4,070
Level 2	-	2,494	2,494
Level 3	-	-	-
<hr/>			
Total	-	\$6,564	\$ 6,564

(b) INVESTMENT TRANSACTIONS AND INVESTMENT INCOME

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Dividend income is recorded net of applicable withholding taxes on the ex-dividend date and interest income is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized to interest income over the lives of the respective securities using the effective interest method.

(c) SWAPS

A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument. The Fund may enter into swap agreements to manage its exposure to interest rates and/or credit risk or to generate income. Interest rate swap agreements involve the exchange by the Fund with another party of their respective commitments to pay or receive interest. The swaps are valued daily at current market value and any unrealized gain or loss is included in the Statement of Assets and Liabilities. Gain or loss is realized on the termination date of the swap and is equal to the difference between the Fund's basis in the swap and the proceeds of the closing transaction, including any fees. During the period the swap agreement is open, the Fund may be subject to risk from the potential inability of the counterparty to meet the terms of the agreement. The swaps involve elements of both market and credit risk in excess of the amounts reflected on the Statement of Assets and Liabilities.

Credit default swap transactions involve the Fund's agreement to exchange the credit risk of an issuer. A buyer of a credit default swap is said to buy

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

protection by paying periodic fees in return for a contingent payment from the seller if the issuer has a credit event such as bankruptcy, a failure to pay outstanding obligations or deteriorating credit while the swap is outstanding. A seller of a credit default swap is said to sell protection and thus collects the periodic fees and profits if the credit of the issuer remains stable or improves while the swap is outstanding but the seller in a credit default swap contract would be required to pay an agreed-upon amount, which approximates the notional amount of the swap as disclosed in Note 5, to the buyer in the event of an adverse credit event of the issuer.

Realized gain (loss) upon termination of swap contracts is recorded on the Statement of Operations. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation (depreciation) of swap contracts. Net periodic payments

24 | SemiAnnual Report | November 30, 2008

GOF | Claymore/Guggenheim Strategic Opportunities Fund |
NOTES TO FINANCIAL STATEMENTS (unaudited) continued

received by the Fund are included as part of realized gains (losses) and, in the case of accruals for periodic payments, are included as part of unrealized appreciation (depreciation) on the Statement of Operations.

(d) COVERED CALL OPTIONS

The Fund will pursue its primary objective by employing an option strategy of writing (selling) covered call options on common stocks. The Fund seeks to generate current gains from option premiums as a means to enhance distributions payable to the Fund's common shareholders. An option on a security is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option at a specified exercise or "strike" price. The writer of an option on a security has an obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price (in the case of a call) or to pay the exercise price upon delivery of the underlying security (in the case of a put). There are several risks associated with transactions in options on securities. As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call but has retained the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fill its obligation as writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

(e) FUTURES

A futures contract is an agreement to buy or sell a financial instrument at a particular price on a stipulated future date. Upon entering into a futures contract, the Fund is required to make an initial margin deposit established by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the counterparty an amount of cash equal to the daily fluctuation in the value of the contract. Such receipt or payment is known as the variation margin and is recorded by the Fund as unrealized appreciation or depreciation. The Fund bears the market risk that arises from the change in the value of these financial instruments.

At November 30, 2008, the following futures contracts were outstanding:

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

					\$ (16,854)

(f) DISTRIBUTIONS TO SHAREHOLDERS

The Fund declares and pays monthly dividends to common shareholders. These dividends consist of investment company taxable income, which generally includes qualified dividend income, ordinary income and short-term capital gains. To the extent distributions exceed net investment income the excess will be deemed a return of capital. Any net realized long-term capital gains are distributed annually to common shareholders. It is likely that a portion of the current fiscal year distributions will be a return of capital, but this will not be known until after the Fund's fiscal year end, which is May 31, 2009.

Distributions to shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

Note 3 - INVESTMENT ADVISORY AGREEMENT, SUB-ADVISORY AGREE AND OTHER AGREEMENTS:

Pursuant to an Investment Advisory Agreement (the "Agreement") between the Fund and Claymore Advisors, LLC ("the Adviser"), the Adviser will furnish offices, necessary facilities and equipment, provide administrative services, oversee the activities of Guggenheim Partners Asset Management, Inc. (the "Sub-Adviser"), provide personnel including certain officers required for the Fund's administrative management and compensate all officers and trustees of the Fund who are its affiliates. As compensation for these services, the Fund will pay the Adviser a fee, payable monthly, in an amount equal to 1.00% of the Fund's average managed assets (net assets applicable to common shareholders plus any assets attributable to financial leverage).

Pursuant to a Sub-Advisory Agreement (the "Sub-Advisory Agreement") between the Fund, the Adviser and the Sub-Adviser, the Sub-Adviser under the supervision of the Fund's Board of Trustees and the Adviser, provides a continuous investment program for the Fund's portfolio; provides investment research; makes and executes recommendations for the purchase and sale of securities; and provides certain facilities and personnel, including certain officers required for its administrative management and pays the compensation of all officers and trustees of the Fund who are its affiliates. As compensation for its services, the Adviser pays the Sub-Adviser a fee, payable monthly, in an annual amount equal to 0.50% of the Fund's average daily total net assets.

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

Under a separate Fund Administration agreement, the Adviser provides fund administration services to the Fund. As compensation for services performed under the Administration Agreement, the Adviser receives a fund administration fee payable monthly at the annual rate set forth below as a percentage of the average daily managed assets of the Fund.

MANAGED ASSETS	RATE
First \$200,000,000	0.0275%
Next \$300,000,000	0.0200%
Next \$500,000,000	0.0150%
Over \$1,000,000,000	0.0100%

For the six months ended November 30, 2008 the Fund recognized expenses of approximately \$26,717 for these services.

The Bank of New York Mellon ("BNY") acts as the Fund's custodian, accounting agent, and transfer agent. As custodian, BNY is responsible for the custody of the Fund's assets. As accounting agent BNY is responsible for maintaining the books and records of the Fund's securities and cash. As transfer agent, BNY is responsible for performing transfer agency services for the Fund.

Certain officers and trustees of the Fund are also officers and directors of the Adviser or the Sub-Adviser. The Fund does not compensate its officers or trustees who are officers of the aforementioned firms.

SemiAnnual Report | November 30, 2008 | 25

GOF | Claymore/Guggenheim Strategic Opportunities Fund |
NOTES TO FINANCIAL STATEMENTS (unaudited) continued

Note 4 - FEDERAL INCOME TAXES:

The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required. In addition, by distributing substantially all of its ordinary income and long-term capital gains, if any, during each calendar year, the Fund intends not to be subject to U.S. federal excise tax.

Information on the components of investments, excluding written options, and net assets as of November 30, 2008 is as follows:

COST OF INVESTMENTS FOR TAX PURPOSES	GROSS TAX UNREALIZED APPRECIATION	GROSS TAX UNREALIZED DEPRECIATION	NET TAX UNREALIZED APPRECIATION ON INVESTMENTS
\$208,979,961	\$1,923,164	\$(50,887,969)	\$(48,964,805)

The differences between book basis and tax basis unrealized appreciation/ (depreciation) is attributable to the tax deferral of losses on wash sales and additional income accrued for tax purposes on swaps.

For federal income tax purposes, as of May 31, 2008, the Fund had no capital loss carryforward.

For the year ended May 31, 2008, the tax character of distributions paid to common shareholders as reflected in the Statement of Changes in Net Assets was as follows:

DISTRIBUTIONS FROM

2008

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

Ordinary Income	\$ 8,921,896
Capital Gain	1,817
Return of Capital	3,259,098

	\$12,182,811

On July 13, 2006, the FASB released FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" ("FIN 48"). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. Management has evaluated the implications of FIN 48 and has determined it does not have any impact on the financial statements as of November 30, 2008. The 2007 tax year is still subject to examination by major jurisdictions.

Note 5 - INVESTMENTS IN SECURITIES:

During the period ended November 30, 2008, the cost of purchases and proceeds from sales of investments, excluding written options and short-term investments were \$153,468,865 and \$67,137,618, respectively.

The Fund entered into swap agreements during the period ended November 30, 2008 to potentially enhance return. Details of the swap agreements outstanding as of November 30, 2008 are as follows:

CREDIT DEFAULT SWAPS

Options assigned during the period	(169)	(49,747)
Options outstanding, end of period	7,514	\$ 1,771,645

Note 6 - LEVERAGE:

REVERSE REPURCHASE AGREEMENTS

The Fund may enter into reverse repurchase agreements as part of its financial leverage strategy. Under a reverse repurchase agreement, the Fund temporarily transfers possession of a portfolio instrument to another party, such as a bank or broker-dealer, in return for cash. At the same time, the Fund agrees to repurchase the instrument at an agreed upon time (normally within seven days) and price, which reflects an interest payment. Such agreements are considered to be borrowings under the Investment Company Act of 1940. The Fund may enter into such agreements when it is able to invest the cash acquired at a rate higher than the cost of the agreement, which would increase earned income. When the Fund enters into a

26 | SemiAnnual Report | November 30, 2008

GOF | Claymore/Guggenheim Strategic Opportunities Fund | NOTES TO FINANCIAL STATEMENTS (unaudited) continued

reverse repurchase agreement, any fluctuations in the market value of either the instruments transferred to another party or the instruments in which the proceeds may be invested would affect the market value of the Fund's assets. As a result, such transactions may increase fluctuations in the market value of the Fund's assets. The average daily balance during the period for which reverse repurchase agreements were outstanding amounted to \$65,359,158. The weighted average interest rate was 3.29%. As of November 30, 2008, the total amount of segregated in connection with reverse repurchase agreements was \$63,640,098. At the period end, there was \$21,913,494 in reverse repurchase agreements outstanding.

BORROWINGS On September 18, 2008, the Fund entered into a \$30,000,000 credit facility agreement. Interest on the amount borrowed is based on the 3-month LIBOR plus 0.85%. An unused commitment fee of 0.75% is charged on the difference

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

between the \$30,000,000 credit facility and the amount borrowed. At November 30, 2008 there was \$19,100,000 outstanding in connection with the Fund's credit facility. The average daily amount of borrowings on the credit facility during the period ended November 30, 2008 was \$13,430,000 with a related average interest rate of 2.98%. The maximum amount outstanding during the period ended November 30, 2008, was \$19,100,000.

Note 7 - LOAN COMMITMENTS

Pursuant to the terms of certain of the Term Loan agreements, the Fund had the following unfunded loan commitments as of November 30, 2008. The Fund intends to reserve against such contingent obligations by designating liquid assets. The unrealized depreciation on these commitments as of November 30, 2008 is reported as "Unrealized deprecation on unfunded commitments" on the Statement of Assets and Liabilities.

At November 30, 2008 the Fund had the following unfunded loan commitments which could be extended at the option of the borrower:

BORROWER	PRINCIPAL AMOUNT	UNREALIZED APPRECIATION/ (DEPRECIATION)
Centaur, LLC	215,851	(78,790)
	\$ 215,851	\$ (78,790)

Note 8 - CAPITAL:

COMMON SHARES

In connection with its organization process, the Fund sold 5,240 shares of beneficial interest to Claymore Securities, Inc., an affiliate of the Adviser, for consideration of \$100,084 at a price of \$19.10 per share. The Fund has an unlimited amount of common shares, \$0.01 par value, authorized and 9,105,240 issued and outstanding. Of this amount, the Fund issued 9,100,000 shares of common stock in its initial public offering. These shares were issued at \$19.10 per share after deducting the sales load but before underwriters' expense reimbursement.

Offering costs of \$364,000 or \$0.04 per share, in connection with the issuance of common shares were borne by the Fund and were charged to paid-in capital. The Adviser and Sub-Adviser have agreed to pay offering costs (other than sales load, but including reimbursement of expenses to the underwriters) in excess of \$0.04 per common share.

Note 9 - INDEMNIFICATIONS:

In the normal course of business, the Fund enters into contracts that contain a variety of representations, which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would require future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of loss to be remote.

Note 10 - ACCOUNTING PRONOUNCEMENTS:

In March 2008, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 161, "Disclosures about Derivative Instruments and Hedging Activities." This standard is intended to enhance financial statement disclosures for derivative instruments and hedging activities and enable investors to understand: a) how and why a fund uses derivative instruments, b) how derivatives instruments and related hedge fund items are accounted for, and c) how derivative instruments and related hedge items affect a fund's financial position, results of operations and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. As of November 30, 2008, management does not believe the adoption of SFAS No. 161 will impact the financial statement amounts; however,

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

additional footnote disclosures may be required about the use of derivative instruments and hedging items.

SemiAnnual Report | November 30, 2008 | 29

GOF | Claymore/Guggenheim Strategic Opportunities Fund
Dividend Reinvestment PLAN|

Unless the registered owner of common shares elects to receive cash by contacting the Plan Administrator, all dividends declared on common shares of the Fund will be automatically reinvested by The Bank of New York Mellon (the "Plan Administrator"), Administrator for shareholders in the Fund's Dividend Reinvestment Plan (the "Plan"), in additional common shares of the Fund. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional common shares of the Fund for you. If you wish for all dividends declared on your common shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each common shareholder under the Plan in the same name in which such common shareholder's common shares are registered. Whenever the Fund declares a dividend or other distribution (together, a "Dividend") payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in common shares. The common shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund ("Newly Issued Common Shares") or (ii) by purchase of outstanding common shares on the open market ("Open-Market Purchases") on the New York Stock Exchange or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commission per common share is equal to or greater than the net asset value per common share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the net asset value per common share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per common share on the payment date. If, on the payment date for any Dividend, the net asset value per common share is greater than the closing market value plus estimated brokerage commission, the Plan Administrator will invest the Dividend amount in common shares acquired on behalf of the participants in Open-Market Purchases.

If, before the Plan Administrator has completed its Open-Market Purchases, the

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

market price per common share exceeds the net asset value per common share, the average per common share purchase price paid by the Plan Administrator may exceed the net asset value of the common shares, resulting in the acquisition of fewer common shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at net asset value per common share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per common share; the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instruction of the participants.

There will be no brokerage charges with respect to common shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commission incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such Dividends.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, BNY Mellon Shareowner Services P.O. Box 358015 Pittsburgh, PA 15252-8015, Phone Number: (866) 488-3559.

PRIVACY PRINCIPLES OF THE FUND

The Fund is committed to maintaining the privacy of its shareholders and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information the Fund collects, how the Fund protects that information and why, in certain cases, the Fund may share information with select other parties.

Generally, the Fund does not receive any non-public personal information relating to its shareholders, although certain non-public personal information of its shareholders may become available to the Fund. The Fund does not disclose any non-public personal information about its shareholders or former shareholders to anyone, except as permitted by law or as is necessary in order to service shareholder accounts (for example, to a transfer agent or third party administrator).

The Fund restricts access to non-public personal information about its shareholders to employees of the Fund's investment advisor and its affiliates

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

with a legitimate business need for the information. The Fund maintains physical, electronic and procedural safeguards designed to protect the non-public personal information of its shareholders.

QUESTIONS CONCERNING YOUR SHARES OF CLAYMORE/GUGGENHEIM STRATEGIC OPPORTUNITIES FUND?

- o If your shares are held in a Brokerage Account, contact your Broker.
- o If you have physical possession of your shares in certificate form, contact the Fund's Administrator, Custodian and Transfer Agent:

The Bank of New York Mellon, 101 Barclay 11E, New York, NY 10286;
(866)488-3559.

This report is sent to shareholders of Claymore/Guggenheim Strategic Opportunities Fund for their information. It is not a Prospectus, circular or representation intended for use in the purchase or sale of shares of the Fund or of any securities mentioned in this report.

The Fund has delegated the voting of proxies relating to its voting securities to the Fund's Sub-Adviser. A description of the Fund's proxy voting policies and procedures related to portfolio securities is available without charge, upon request, by calling the Fund at (800) 345-7999 or on the U.S. Securities and Exchange Commission's ("SEC") website at <http://www.sec.gov>.

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q is available on the SEC website at <http://www.sec.gov>. The Fund's Form N-Q may also be viewed and copied at the SEC's Public Reference Room in Washington, DC; information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330 or at www.claymore.com.

In November 2008, the Fund submitted a CEO annual certification to the New York Stock Exchange ("NYSE") in which the Fund's principal executive officer certified that he was not aware, as of the date of the certification, of any violation by the Fund of the NYSE's Corporate Governance listing standards. In addition, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and related SEC rules, the Fund's principal executive and principal financial officers have made quarterly certifications, included in filings with the SEC on Forms N-CSR and N-Q, relating to, among other things, the Fund's disclosure controls and procedures and internal control over financial reporting.

Edgar Filing: Claymore/Guggenheim Strategic Opportunities Fund - Form N-CSRS

INVESTMENT PHILOSOPHY

Guggenheim's investment philosophy is predicated upon the belief that thorough research and independent thought are rewarded with performance that has the potential to outperform benchmark indexes with both lower volatility and lower correlation of returns over time as compared to such benchmark indexes.

INVESTMENT PROCESS

Guggenheim's investment process is a collaborative effort between its Portfolio Construction Group, which utilizes tools such as Guggenheim's Dynamic Financial Analysis Model to determine allocation of assets among a variety of sectors, and its Sector Specialists, who are responsible for security selection within these sectors and for implementing securities transactions, including the structuring of certain securities directly with the issuer or with investment banks and dealers involved in the origination of such securities.

None.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

On October 22, 2008, the registrant's Board of Trustees (the "Board") approved a revised written charter (the "Nominating and Governance Committee Charter") for its nominating and governance committee (the "Nominating and Governance Committee") that contains changes to the procedures by which shareholders may recommend nominees to the Board.

Under the Nominating and Governance Charter, the previously existing procedures by which shareholders may recommend nominees to the Board, as described in the registrant's proxy statement filed with the Securities and Exchange Commission on September 19, 2008, remain in effect. In addition to these previously existing procedures, the Nominating and Governance Charter includes a new requirement that following the submission by a shareholder of a Trustee candidate recommendation, a Trustee candidate must (i) be prepared to submit written answers to a questionnaire seeking professional and personal information that will assist the Nominating and Governance Committee to evaluate the candidate and to determine, among other matters, whether the candidate would qualify as a Trustee who is not an "interested person" of the registrant as such term is defined under the Investment Company Act of 1940; (ii) be prepared to submit character references and agree to appropriate background checks; and (iii) be prepared to meet with one or more members of the Nominating and Governance Committee at a time and location convenient to those Nominating and Governance Committee members in order to discuss the nominee's qualifications.

A copy of the Nominating and Governance Committee Charter will be filed with the Securities and Exchange Commission as an appendix to the registrant's 2009 proxy statement.

ITEM 11. CONTROLS AND PROCEDURES.

- (a) The registrant's principal executive officer and principal financial officer have evaluated the registrant's disclosure controls and procedures (as defined in Rule 30a3(c) under the Investment Company Act) within 90 days of this filing and have concluded based on such evaluation, that the registrant's disclosure controls and procedures were effective as of that date in ensuring that information required to be disclosed by the registrant in this Form N-CSR was recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.
- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act) that occurred during the registrant's second fiscal quarter of the period covered by this report that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 12. EXHIBITS.

- (a) (1) Not applicable.
- (a) (2) Certifications of principal executive officer and principal financial officer pursuant to Rule 30a-2(a) of the Investment Company Act.
- (a) (3) Not Applicable.
- (b) Certifications of principal executive officer and principal financial officer pursuant to Rule 30a-2(b) of the Investment Company Act and Section
